## VORWORT DER HERAUSGEBER

Wir danken Frau Katja Koralewski und Herrn Constantin Künzl von der Bibliothek der Hochschule München (Munich University of Applied Sciences) dafür, einen weiteren Band unserer Reihe FORTVNA PAPERS, die 2017 an der Hochschule gegründet wurde, auf ihrem Publikationsserver publizieren zu dürfen.

Unser besonderer Dank gilt zudem allen, die mit eigenen Beiträgen zum Gelingen dieses Bandes seit 2018 beigetragen haben. Es handelt sich (in alphabetischer Reihenfolge) um folgende Personen: John Bodel, Emanuele M. Ciampini, Amanda Claridge, Angelo Geißen, Laura Gigli, Hans Rupprecht Goette, Peter Herz, Eugenio La Rocca, Eric M. Moormann, Jörg Rüpke, R.R.R. Smith, Giandomenico Spinola, Mario Torelli, Walter Trillmich, Claudia Valeri und T.P. Wiseman.

Dieses Buch über Domitian ist 'zufällig' entstanden als Folge einer Email, die mir (Häuber) Rose Mary Sheldon am 26. August 2018 schrieb, und in der sie mich fragte, ob ich ihr bezüglich ihres eigenen Buches (R.M. SHELDON 2023, in press) über die Flavii helfen könne, falls sie Fragen zu flavischen Kunstwerken hätte, wobei sie ausdrücklich die Cancellariareliefs erwähnt hat.

Pandemiebedingt kam dann ab 2020 zeitweise der internationale 'Tagungstourismus'\*) zum Erliegen, was für dieses, inzwischen als Festschrift für Rose Mary konzipierte Buch, unvorhergesehene Folgen haben sollte. Plötzlich waren nämlich viele Spezialisten, die ich meinerseits um ihren Rat fragen wollte, problemlos per Email, oder sogar telefonisch zu Hause erreichbar. Diese meine ehemaligen Universitätsdozenten und Chefs, sowie Kollegen und Freunde zeigten sich nicht nur sehr an dieser Thematik interessiert, sondern schickten mir überdies, von sich aus, eine nahezu unübersehbare Fülle von einschlägiger Fachliteratur, die ich ohne ihre Hinweise nie selbst gesucht, geschweige denn gefunden hätte.

Die resultierende bedeutende Erweiterung der in diesem Werk behandelten Themen hatte ihrerseits die bedauerliche Folge, dass einige dieser Gelehrten, die dieses Buch gleichfalls mit gutem Rat, und sogar mit eigenen Beiträgen unterstützt hatten, in der Zwischenzeit verstorben sind, ohne dass wir Ihnen das fertige Resultat hätten überreichen können. Um sie alle noch lebend antreffen zu können, hätte ich allerdings nur einen kleinen Aufsatz über Domitian verfassen können, der Mitte 2020 hätte fertig sein müssen. - Dazu ist hinzuzufügen, dass viele der sehr fruchtbaren Fachgespräche mit einigen dieser Gelehrten noch bis in den Juli 2023 hinein andauern sollten.

In alphabetischer Reihenfolge handelt es sich bei diesen verstorbenen Gelehrten um:

Hugo Brandenburg, Marco Buonocore, Frederick E. Brenk, Paola Ciancio Rossetto, Maria Gabriella Cimino, Amanda Claridge, Andrew Stewart und Mario Torelli.

Neben der Pandemie im Jahre 2020 gab es, was dieses Buch betrifft, im Februar 2021 eine weitere wichtige Zäsur: Damals hoffte ich nämlich, dieses Manuskript sehr bald fertigstellen zu können. Da mir jedoch ab diesem Zeitpunkt bis zum Dezember 2021 (und lange darüber hinaus) noch weitere zahlreiche Publikationen von Freunden und Kollegen geschickt werden sollten, die ich beschlossen habe, in diesem Buch zu diskutieren, hat sich die Bearbeitung aller dieser Werke noch bis zum Juli 2023 hingezogen (!).

Und weil diese Studie im Jahr 2021 von anderen in ihren Publikationen als 'Häuber 2020' (wie ich sie zunächst datiert hatte) und als 'Häuber 2021' zitiert worden war, haben wir beschlossen, bei 'Häuber 2021' zu bleiben. Korrekterweise haben wir jetzt die beiden Bände 'Häuber 2021/ 2023' datiert.

Am 15. Juli 2023 hatten wir bereits wunschgemäß dieses Vorwort datiert, als uns überraschend das großzügige Geschenk von Eugenio La Rocca erreichte, der Katalog *Domiziano Imperatore. Odio e Amore* (2023) (!). Ich (Häuber) habe daraufhin noch einige der darin gemachten Erkenntnisse in meinen Text integriert.

Franz Xaver Schütz und Chrystina Häuber

München, 23. Juli 2023

\*) Vergleiche zum oben erwähnten, salopp so genannten 'Tagungstourismus', an dem natürlich auch wir selbst seit Jahrzehnten beteiligt gewesen sind: Chrystina Häuber und Franz Xaver Schütz: "Von Forschungsreisenden für Forschungsreisende: FORTVNA - ein Archäologisches Informationssystem für Rom", vorgetragen am 2. Oktober 2001, in der Fachsitzung "Virtueller Städtetourismus", beim 53. Deutschen Geographentag in Leipzig.

### *Dedication*

Ich widme dieses Buch meiner guten Freundin, der Militärgeschichtlerin Rose Mary Sheldon, Professor Emerita des Virginia Military Institute.

Rose Mary hat nichts Geringeres fertig gebracht, als mich zuerst nach Rom und dann nach Dumbarton Oaks zu bringen. Ihr ist es also zu verdanken, dass ich in Rom (nach vielen vergeblichen Versuchen) mein Dissertationsthema gefunden habe, und später in Dumbarton Oaks, dank eines Junior Fellowships, in aller Ruhe meine Doktorarbeit schreiben konnte.

Dass ich mit Hilfe von Rose Mary nach Rom, und damit zu meinem Lebensthema, der stadtrömischen Topographie, gelangt bin, lag daran, dass wir im Juli-August 1979 ein Zimmer geteilt haben. Das war bei den "Corsi estivi di Lingua e Cultura Italiana dell'Università del Sacro Cuore di Milano", die im Collegio Denza auf dem Capo Posillipo bei Neapel stattgefunden haben. - Seither haben wir unsere Forschungsthemen miteinander diskutiert.

Ein sehr wichtiger Bestandteil dieser Kurse waren Exkursionen zu allen Museen und Ausgrabungen rund um den Vesuv und zu den Inseln im Golf von Neapel, die Prof. Mario Torelli von der Università Perugia durchgeführt hat.

**Abb. 1. Mario Torelli, teaching us members of the "Corsi estivi di Lingua e Cultura Italiana dell'Università del Sacro Cuore di Milano" in the summer of 1979. The photo shows Torelli in the Museo Archeologico Nazionale at Naples in front of the marble bust of Pindar (cf. here Fig. 51), which he explains to us. Photo: Courtesy Rose Mary Sheldon.**

Rose Mary hatte bei Torelli an der University of Michigan studiert, weshalb ich ihn durch sie persönlich kennenlernen konnte. So kam es, dass Mario von meinem (bereits vierten) Dissertationsthema erfuhr: "Die Statuenausstattung der Villa dei Papiri". Er wies mich dann freundlicherweise darauf hin, dass ich (auch) diese Arbeit nicht würde schreiben können, da dieses Thema bereits seit geraumer Zeit von einer Doktorandin der Università Perugia bearbeitet wurde. Mein Doktorvater, Andreas Linfert, hatte darauf bestanden, dass ich mein Dissertationsthema selbst finden solle - wofür ich ihm im Nachhinein sehr dankbar bin. Es war ein langwieriger Prozeß, der von 1975-1981 andauern sollte: das erste Thema (begonnen 1975) lautete: "Die Portraits der Ptolemäerinnen", das zweite: "Der Statuentypus der Großen Herculansenserin".

Unterstützt durch ein Gutachten von Mario Torelli, habe ich daraufhin erfolgreich ein DAAD-Stipendium für Rom beantragt. Gleichzeitig mit mir war Rose Mary in Rom, in der American Academy (von 1980-1982).

Und als Rose Mary dann in Washington, D.C., im Center for Hellenic Studies, beschäftigt war, hat sie mir 1984 einen Zeitungsausschnitt nach Rom geschickt, in dem das Center beschrieben wurde, 'das an den Park von Dumbarton Oaks grenzt'. Ich schrieb zurück: 'Ist das das berühmte Dumbarton Oaks?'. 'Ja', antwortete Rose Mary, und fügte hinzu, 'sie vergeben auch Stipendien', und legte ein Faltblatt bei, das sie für mich in Dumbarton Oaks besorgt hatte, und in dem erklärt wurde, wie man sich dort um Stipendien bewirbt. Ich habe sogleich einen Antrag gestellt und im akademischen Jahr 1985-86 das Privileg genossen, mit einem Junior Fellowship ausgestattet, in 'DO' forschen zu können. Auf diese Weise waren Rose Mary und ich wieder zusammen, diesmal in Georgetown, in Washington, D.C., wo sie wie immer lebhaft an meinen Forschungen Anteil nahm.

Durch einen glücklichen 'Zufall' habe ich in Rom am 29. Dezember 1980 meine gute Freundin Amanda Claridge wiedergefunden.

Amanda hatte im Juli 1973 Hansgeorg Oehler in Köln besucht, den Gründer und damaligen Direktor der '*Monumenta Artis Romanae*', des 'Forschungsarchivs für Römische Plastik' am Archäologischen Institut der Universität zu Köln, und zwar just an dem Tag, an dem ich bei ihm als Studentische Hilfskraft angefangen hatte.

An diesem 29. Dezember 1980 nahm ich an einem Besuch der Villa Albani in Rom teil, zu dem mich freundlicherweise Valentin Kockel vom Deutschen Archäologischen Institut (DAI) Rom eingeladen hatte. Mit von der Partie in dieser Gruppe des DAI waren unter anderem Denys Haynes (1913-1994), der bis 1976 Keeper der Greek and Roman Antiquities des British Museum in London gewesen war, und seine Ehefrau, Sybille Haynes, die ich bei dieser Gelegenheit kennen gelernt habe.

Vor der Villa Albani wartend, erzählte das Ehepaar Haynes neben ihnen stehenden Freunden, dass sie soeben aus Princeton zurückgekommen seien. Daraufhin fragte ich Denys Haynes, ob er in Princeton Amanda Claridge getroffen habe, von der ich wußte, dass sie dort seit 1977 an der Universität arbeitete (Denys Haynes hätte sie jedoch zu diesem Zeitpunkt dort gar nicht mehr antreffen können, weil Amanda, wie sie mir später erzählte, bereits im September 1980 nach Rom gekommen war).

Haynes erinnerte sich an meinen Besuch bei ihm im British Museum im Jahre 1975, den Amanda für mich arrangiert hatte. Ich hatte einen römischen Frauenkopf anschauen wollen, den Walter Görlitz (1936) als ein Portrait Königin Kleopatras VII. erklärt hatte - ein Thema, das damals für mich im Zusammenhang meines (ersten) Dissertationsthemas über die Portraits der Ptolemäerinnen von Interesse war. Denys Haynes war so freundlich gewesen, Amanda und mich ins Magazin des British Museum zu begleiten, wo dieses 'Kleopatraportrait' in einem Pappkarton aufbewahrt wurde, und das wir dann gemeinsam studiert hatten.

Sybille Haynes, die ebenfalls Amanda kannte, hatte aufmerksam unserem Gespräch zugehört. In der 'Sala ovale' der Villa Albani angelangt, ging Sybille Haynes zum aufgeschlagenen Gästebuch, das auf einem Tischchen neben dem 'Apollon auf dem Omphalos sitzend' lag, und rief: "Da ist sie doch!". Neben ihr stehend lasen wir dann alle den letzten Eintrag in dieses Gästebuch: "22. December 1980, Amanda Claridge, British School at Rome". In meine Wohnung zurückgekehrt, habe ich gleich in der British School angerufen, und Amanda am folgenden Tag dort besucht. - Ein Entschluß, der mein Leben komplett verändern sollte. Und mit Sybille Haynes, die wir Jahre später in der British School wiedersehen sollten, haben Amanda und ich dann herzlich über ihren Ausruf: "da ist sie doch!", gelacht.

Auf Amandas Einladung hin konnte ich dann seit dem 30. Dezember 1980 in der Bibliothek der British School at Rome arbeiten, wo sie inzwischen Assistant Director geworden war. Dort habe ich im Januar 1981 einen der Bibliothekare, Demetrios Michaelides, kennen gelernt. Am 2. März 1981 hat sich dann auch mein fünftes Dissertationsprojekt, "Die Statuenausstattung der Villa von Chiragan" bei einem Gespräch im Musée Saint Raymond in Toulouse als nicht realisierbar herausgestellt. Diese römische Villa befindet sich in der Nähe von Toulouse und die entsprechenden Funde werden in diesem Museum aufbewahrt, das aber vom

folgenden Tag an für fünf Jahre geschlossen werden sollte. - Danach entschloss ich mich, *nolens volens*, mein drittes Dissertationsthema wieder aufzunehmen: "Die Statuenausstattung der *Horti Sallustiani* in Rom".

Demetrios Michaelides, der mich am 19. März 1981 in der British School auf die *Horti Sallustiani* ansprach, hatte dann die rettende Idee. Eugenio La Rocca, der Direktor der Kapitolinischen Museen, hatte Demetrios soeben ein Angebot zur Mitarbeit in einem Projekt unterbreitet, das dieser aber nicht annehmen konnte, weil er nach Zypern zurückkehren musste. Demetrios fragte mich deshalb, warum ich nicht die 'Statuen aus den *Horti* des Maecenas' untersuchen wolle, ich könne diesbezüglich doch einmal La Rocca ansprechen. "Hatte Maecenas auch Statuen?", fragte ich ungläubig. Demetrios erzählte mir von La Roccas Angebot an ihn, und dass ich La Rocca am folgenden Tag, dem 20. März 1981, anlässlich einer Tagung in der American Academy, kennen lernen könne: *The Topography of ancient Rome: New Developments and suggestions* - da La Rocca dort einen Vortrag halten werde.

Zu dieser Tagung erschien selbstverständlich auch Rose Mary, sowie glücklicherweise auch Mario Torelli. Mario hat mich auf meine Bitte hin Eugenio La Rocca vorgestellt, und dieser hat mich eingeladen, ihn am Morgen des 23. März 1981 in seinem Büro in den Kapitolinischen Museen aufzusuchen.

Eugenio La Rocca hat mir am 23. März 1981 ein Thema zur Bearbeitung angeboten, das, nach Absprache mit meinem Doktorvater, mein Dissertationsthema werden sollte. Ich habe zunächst die Fundorte der Neufunde der Archäologischen Kommission in Rom nach 1870 identifiziert, von denen sich die meisten in den Musei Capitolini, sowie früher auch im Antiquarium Comunale auf dem Caelius befanden, und dann, darauf aufbauend, "Die Statuenausstattung der *Horti Maecenatis* und der *Hort Lamiani* auf dem Esquilin" studiert.

La Rocca war außerdem so freundlich, mich an diesem Morgen einzuladen, gleich damit anzufangen, zeigte mir die Registerbände der Funde, die zu bearbeiten seien, und stellte mich allen Mitarbeitern seines Museums vor. Die Kapitolinischen Museen sind daraufhin für die folgenden fünf Jahre mein Zuhause geworden.

Als ich nach dem Gespräch mit Eugenio La Rocca die *Cordonata* des Kapitols hinuntergehüpft bin, hat mich ein sehr alter Römer gefragt: 'Warum singen Sie denn so fröhlich?'. Ich hatte das gar nicht bemerkt, und nachdem ich ihm die ganze Geschichte erzählt hatte, hat er gelächelt und gesagt, dass er mich nun sehr gut verstehen könne.

Dass das, was so vergnügt begann, gelingen konnte, hat natürlich Gründe: es ist tatsächlich nur der unendlichen Geduld und dem wissenschaftlichen Sachverstand von einigen meiner ehemaligen Universitätsdozenten und Chefs, und vielen meiner Kollegen und Freunde zu verdanken. Sowohl denen, die ich bereits in Köln und Neapel kennen gelernt hatte, als auch den neu hinzugewonnenen in Rom und später in den Vereinigten Staaten, Greifswald, Bonn, Regensburg, Tübingen und München. Sie haben mich die entsprechende Methodik gelehrt und mir das entsprechende Wissen vermittelt, waren seither an allen meinen Forschungsprojekten beteiligt, auch an diesem Buch, sind mir immer mit Rat und Tat beigestanden und haben mich durch alle damit verbundenen wissenschaftlichen Schwierigkeiten 'hindurchgelotst'.

Mit dieser Festschrift danke ich aber allen voran Rose Mary Sheldon.

Ohne sie hätte ich es nie geschafft, am 3. Oktober 1980 überhaupt erst einmal nach Rom zu kommen, obendrein mit einem Stipendium versehen, zunächst allerdings nur mit dem Wunsch, dort eine Dissertation schreiben zu wollen. - Dass ich mich dann an Rom gewöhnt habe, und seither ausschließlich über diese Stadt forsche, war das sehr angenehme, völlig unvorhergesehene Ergebnis dieses Aufenthalts.

Chrystina Häuber

For the identification of the portrait of Pindar (cf. here **Fig. 51**), visible on **Abb. 1**; cf. below at *The second Contribution by R.R.R. Smith : Note on the function of the 'Atrium House' at Aphrodisias* (cf. here **Figs. 51; 52**).

The above-mentioned, very beautiful and well preserved female portrait in the British Museum is wearing a mellon coiffure but not the diadem, which is why this is *not* Queen Cleopatra VII; cf. Walter Görlitz (1936, Frontispiz, illustrating a photo of this head, the caption reads: "Kleopatra"); Peter Higgs (in: S. WALKER and P. HIGGS 2000, 164-165: "III. 11. Testa di donna somigliante a Cleopatra VII 50-40 a. C. circa. Acquistata in Italia, già nella collezione di Alessandro Castellani, Travertino italiano, h 28 cm, Londra, the British Museum, Department of Greek & Roman Antiquities, GR 1879.7-12.15 (Scultura 1873)"); cf. Peter Higgs (in: S. WALKER and P. HIGGS 2001, 228-229: "210 Head of a woman resembling Cleopatra VII"). Higgs himself (2000; *id.* 2001) does not quote Görlitz (1936).

## TABLE OF CONTENTS

<b>What this Study is all about</b> .....	20
<b>Introductory remarks and acknowledgements</b> .....	25
<b>Preamble: Domitian's negative image</b> .....	129
I. 'The intentional creation of Domitian's negative image', here presented by discussing relevant text passages from Markus Handy ("Strategien zur Legitimierung der Ermordung des Domitian", 2015) and from Peter L. Viscusi ( <i>Studies on Domitian</i> , 1973).....	129
II. Conclusions: Domitian's representations of his military successes and his claims to be of divine descent and to possess a divine nature.....	150
III. My own thoughts about Domitian. With <i>The second Contribution by Eugenio La Rocca: Una nota sul labirinto del Palatino</i> .....	182
<b>I. A survey of the scholarly discussion of the Cancelleria Reliefs (cf. here Figs. 1; 2)</b> .....	238
<b>I.1. The discussion of the Cancelleria Reliefs (cf. here Figs. 1; 2), or the story of a dilemma: 'wrong shoes' or wrong interpretations?</b> .....	238
I.1.1. Summary of the scholarly discussion concerning the 'wrong shoes', worn by figures on Frieze B (cf. here Fig. 2), and the decision to pursue a different avenue of research.....	274
<b>I.2. The amazon-like figure on Frieze A (cf. here Fig. 1): Dea Roma, not Virtus</b> .....	281
<b>I.2.1. The consequence of the identification of the amazon-like figure on Frieze A as Dea Roma (cf. here Fig. 1): she and Domitian (now Nerva) separate from each other at the pomerium of Rome; with a discussion of the lictors and soldiers on both friezes of the Cancelleria Reliefs (cf. here Figs. 1; 2)</b> .....	301
I.2.1.a) The relationship of Domitian with the <i>Dea Roma</i> on Frieze A of the Cancelleria Reliefs (cf. here Fig. 1): thoughts at 'second glance'.....	301
I.2.1.b) An anticipation of my tentative reconstruction of the Cancelleria Reliefs (cf. here Figs. 1; 2) as the two horizontal panels in the bay of one of Domitian's arches (cf. <i>infra</i> , at Chapter I.3., and here Figs. 1 and 2 of the Cancelleria Reliefs, drawing, 'in situ').....	304
I.2.1.c) The problems, connected with the lictors and soldiers on both friezes of the Cancelleria Reliefs (cf. here Figs. 1; 2).....	307
<b>I.3. Were the Cancelleria Reliefs (cf. here Figs. 1; 2) the horizontal panels in the bay of an arch, built by Domitian?</b> .....	316
I.3.1. M. Pentricci's discussion (2009) of the excavations underneath the Palazzo della Cancelleria, his reconstruction of the stratigraphy of the excavated area, and his discussion of the two sculptor's workshops found there, and of the pertaining architectural and archaeological finds.....	319

I.3.2. A discussion of the question, whether the Cancelleria Reliefs (cf. here <b>Figs. 1; 2</b> ) and the architectural finds from the area of the Palazzo della Cancelleria could have belonged to an arch, built by Domitian (cf. here <b>Figs. 1 and 2 of the Cancelleria Reliefs, drawing, 'in situ'</b> ).....	322
<b>II. Technical observations concerning the Cancelleria Reliefs (cf. here Figs. 1; 2) and various hypotheses concerning their reworking.....</b>	<b>336</b>
<b>II.1. My own discussion of these subjects.....</b>	<b>336</b>
II.1.a) where exactly was the carving of the first phase of the Cancelleria Reliefs (cf. here <b>Figs. 1; 2</b> ) conducted and do we have criteria that allow us to date these friezes?.....	337
II.1.b) which emperor commissioned those friezes (cf. here <b>Figs. 1; 2</b> ), and had that first phase of the reliefs been finished? What evidence do we have that other emperors were also involved in the making of these friezes?.....	337
II.1.c) where should we assume those friezes to have been, when the face of the emperor on Frieze A (cf. here <b>Fig. 1</b> ) was recut into a portrait of Nerva?.....	338
II.1.d) what can the state of the friezes (cf. here <b>Figs. 1; 2</b> ) in which they were found, when excavated tell us?.....	339
II.1.e) scenario, which tries to explain, why both friezes (cf. here <b>Figs. 1; 2</b> ) were not found attached to a monument, but rather as intentionally discarded material in the deposit of a sculptor's workshop.....	340
<b>II.2. My first conclusion, written before reading the account by M. Pentiricci (2009).....</b>	<b>342</b>
<b>II.3. My second conclusion, written after reading the account by M. Pentiricci (2009) The observations made in Chapter II.3. allow new interpretations concerning the Cancelleria Reliefs (cf. here Figs. 1; 2) and concerning Domitian's building policy in general..</b>	<b>344</b>
<b>II.3.1. Nerva's victory in the <i>bellum Suebicum</i> October AD 97, the architectural fragments, found together with the Cancelleria Reliefs (cf. here Figs. 1; 2), comprising the architrave block carrying the inscription <i>PP FECIT (CIL VI, 40543)</i>, Domitian's <i>Forum/ Forum Nervae/ Forum Transitorium</i>, and Domitian's building policy: praising the <i>gens Flavia</i>, emulating Augustus and Nero.....</b>	<b>344</b>
II.3.1.a) Nerva's victory in the <i>bellum Suebicum</i> October AD 97.....	344
II.3.1.b) The architectural fragments, found together with the Cancelleria Reliefs (cf. here <b>Figs. 1; 2</b> ), comprising the architrave block carrying the inscription <i>PP FECIT (CIL VI, 40543)</i> , and Domitian's <i>Forum/ Forum Nervae/ Forum Transitorium</i> .....	347
II.3.1.c) Domitian's building policy: praising the <i>gens Flavia</i> , emulating Augustus and Nero.....	348
<b>II.3.2. Nerva's adoption of Trajan in late October or at the beginning of November AD 97 and the consequences which this had for the monument (an arch?), built by Domitian, that contained the Cancelleria Reliefs (cf. here Figs. 1; 2).....</b>	<b>360</b>

<b>II.3.3. The Cancelleria Reliefs (cf. here Figs. 1; 2), the panels of the Arch of Trajan at Beneventum (cf. here Fig. 46) and the importance of the hierarchy of scale.....</b>	<b>366</b>
 <b>II.3.3.a) A Summary of the following Chapters:</b>	
 <i>I.3. Were the Cancelleria Reliefs (cf. here Figs. 1; 2) the horizontal panels in the bay of an arch, built by Domitian?;</i>	
 <i>I.3.2. A discussion of the question, whether the Cancelleria Reliefs (cf. here Figs. 1; 2) and the architectural finds from the area of the Palazzo della Cancelleria could have belonged to an arch, built by Domitian (cf. here Figs. 1 and 2 of the Cancelleria Reliefs, drawing, `in situ`);</i>	
 <i>II.1.e) scenario, which tries to explain, why both friezes (cf. here Figs. 1; 2) were not found attached to a monument, but rather as intentionally discarded material in the deposit of a sculptor's workshop;</i>	
 <i>II.3.1. Nerva' victory in the bellum Suebicum October AD 97, the architectural fragments, found together with the Cancelleria Reliefs (cf. here Figs. 1; 2), comprising the architrave block carrying the inscription PP FECIT (CIL VI, 40543), Domitian's Forum/ Forum Nervae/ Forum Transitorium, and Domitian's building policy: praising the gens Flavia, emulating Augustus and Nero;.</i>	
 <i>II.3.1.a) Nerva' victory in the bellum Suebicum October AD 97;</i>	
 <i>II.3.1.b) The architectural fragments, found together with the Cancelleria Reliefs (cf. here Figs. 1; 2), comprising the architrave block carrying the inscription PP FECIT (CIL VI, 40543), and Domitian's Forum/ the Forum Nervae;</i>	
 <i>II.3.2. Nerva's adoption of Trajan in late October or at the beginning of November AD 97 and the consequences which this had for the monument (an arch?), built by Domitian, that contained the Cancelleria Reliefs (cf. here Figs. 1; 2);</i>	
<i>II.3.3. The Cancelleria Reliefs (cf. here Figs. 1; 2), the panels of the Arch of Trajan at Beneventum (cf. here Fig. 46) and the importance of the hierarchy of scale.....</i>	<b>371</b>
 <b>II.4. Technical observations concerning the Cancelleria Reliefs (cf. here Figs. 1; 2) and various hypotheses concerning their reworking. Discussion of the above-mentioned subjects by other scholars.....</b>	<b>375</b>
 <i>III. A comparison of the interpretations of the Cancelleria Reliefs (cf. here Figs. 1; 2) by Tonio Hölscher (2009a) and Giandomenico Spinola.....</i>	<b>381</b>
 <i>IV. Frieze B of the Cancelleria Reliefs (cf. here Fig. 2) and the Obeliscus Pamphilius/ Domitian's obelisk (cf. here Fig. 28).....</i>	<b>400</b>
 <b>IV.1. A letter by Giandomenico Spinola concerning the Cancelleria Reliefs (cf. here Figs. 1; 2) and the Obeliscus Pamphilius/ Domitian's obelisk (cf. here Fig. 2).....</b>	<b>400</b>

<b>IV.1.1. The Obeliscus Pamphilius/ Domitian's obelisk (cf. here Fig. 28) - that was commissioned for the Iseum Campense, not for the <i>Templum Gentis Flaviae</i>.....</b>	410
IV.1.1.a) A summary of the hypotheses of J.-C. Grenier and F. Coarelli, according to whom Domitian's obelisk (cf. here Fig. 28) was not commissioned for the Iseum Campense, but instead for the <i>Templum Gentis Flaviae</i> . With a discussion of the contents of the reliefs on the <i>pyramidion</i> of Domitian's obelisk and of the contents of its hieroglyphic inscriptions.....	411
IV.1.1.b) My first attempt to find arguments in support of the hypothesis that Domitian's obelisk (cf. here Fig. 28) was commissioned for the Iseum Campense.....	421
IV.1.1.c) Further research that was undertaken to clarify the question, whether or not Domitian's obelisk (cf. here Fig. 28) was commissioned for the Iseum Campense and G. Gatti's (1943-1944) correct reconstruction of the central <i>Campus Martius</i> (cf. here Fig. 78).....	422
IV.1.1.d) E.M. Ciampini (2005) has observed that the contents of the hieroglyphic inscriptions and of the representations on the <i>pyramidion</i> of Domitian's obelisk (cf. here Fig. 28) are closely related to the structures called <i>mammisis</i> in Egypt. The (new) king of Egypt was legitimized by the 'royal rituals', which were performed there and elsewhere. With the article of Emanuele M. Ciampini (2005) and with <i>The first Contribution by E.M. Ciampini</i> .....	427
IV.1.1.e) J.-C. Goyon (1988) on the 'royal rituals', performed at the structures called <i>mammisis</i> , and P.G.P. Meyboom (2016) on the festivals connected with the Nile flood and on the 'royal rituals' at the festival of New Year.....	433
IV.1.1.f) What consequences has the fact that the contents of Domitian's obelisk (cf. here Fig. 28) refer to <i>mammisis</i> , in regard to our question, for which location this obelisk was commissioned?	439
IV.1.1.g) The controversy concerning the "ARCUS AD ISIS" that is visible on a relief from the Tomb of the Haterii (cf. here Figs. 89; 90): it cannot be identified with the Arco di Camilliano to the east of the Iseum Campense, but stood instead near the Temple of <i>Isis et Serapis in Regio III</i> . With a summary of Domitian's 'pharaonic project', called 'Colosseum city' .....	440
IV.1.1.h) The new findings by B.E. Borg (2019) concerning the <i>Templum Gentis Flaviae</i> support the hypothesis suggested here that Domitian's obelisk (cf. here Fig. 28) was commissioned for the Iseum Campense. With some observations concerning the Temple of <i>Divus Traianus</i> at Italica, and concerning the Marble Forum at the <i>Colonia Augusta Emerita</i> (Mérida) in Spain. With <i>The Contributions by Eric M. Moormann, Mario Torelli, and Walter Trillmich</i> , and with <i>The second Contribution by Jörg Rüpke</i> .....	448
<b>V. Summary of the publications by S. Langer and M. Pfanner (2018), M. Wolf (2018), and K.S. Freyberger (2018), concerning the Cancellaria Reliefs (cf. here Figs. 1; 2) and the architectural fragments found together with them, which appeared when that part of this Study was almost finished, which is dedicated to the Cancellaria Reliefs.....</b>	500
<b>V.1. Summary of the publication by S. Langer and M. Pfanner (2018) concerning the Cancellaria Reliefs (cf. here Figs. 1; 2), and comparisons of their conclusions with my own.....</b>	500
V.1.a) The stratigraphy of the site, where the Cancellaria Reliefs (cf. here Figs. 1; 2) were excavated, the topography of the entire area, and the date of the dismantling of these panels..	502

V.1.a.1.) My own comments on the passages, quoted from Langer and Pfanner (2018) in Chapter V.1.a), and the 'First sculptor's workshop' and the 'Second sculptor's workshop' underneath the Palazzo della Cancelleria.....	506
V.1.b) The Cancellaria Reliefs (cf. here <b>Figs. 1; 2</b> ) under Nerva - as reconstructed by S. Langer and M. Pfanner (2018) and my own comments on their conclusions. With some remarks on the efforts of Septimius Severus to legitimize his reign.....	509
V.1.c) The Cancellaria Reliefs (cf. here <b>Figs. 1; 2</b> ) under Nerva - as reconstructed by myself in this <i>Study</i> .....	520
V.1.d) The reconstruction, in my opinion erroneous, of the length of Frieze B of the Cancellaria Reliefs by S. Langer and M. Pfanner (2018) (cf. here <b>Figs. 1 and 2 drawing</b> ) and the correct reconstruction of the length of Frieze B by F. Magi (1945), whom I am following here (cf. here <b>Figs. 1; 2; Figs. 1 and 2 drawing; and Figs. 1 and 2 of the Cancellaria Reliefs, drawing, 'in situ'</b> ). ## What this *Study* is all about

This *Study* analyses the Cancellaria Reliefs (cf. here **Figs. 1; 2**) and tries to answer the question: to which monument or building did these panels belong? This structure was commissioned by the Emperor Domitian, whose other building projects at Rome are likewise discussed. The text is divided into Chapters I.-VI., and is supplemented by Appendices I.-VI., that are published *infra*, in volume 3-2. To some of these Chapters and Appendices belong separate *Studies* on specific subjects, *inter alia* on famous sculptures.

**These four separate, but interrelated monographs have provided (in many cases unforeseen) new insights concerning Domitian, which is why they are published in this book on Domitian :**

**The text *A Study on the consequences of Domitian's assassination* is to be found in volume 3-2, the other three additional *Studies* are to be found below, in this volume 3-1.**

To Chapter I.2. *The amazon-like figure on Frieze A* (cf. here **Fig. 1**): Dea Roma, not Virtus belongs:

### ***A Study on the consequences of Domitian's assassination :***

*Nero is forced to adopt Trajan and Trajan creates Domitian's negative image to consolidate his own reign. With Hadrian's adoption manquée in late October or at the beginning of November of AD 97, his 20-year long road to his accession and his thanksgivings for it, his Temple complex in the Campus Martius.*

*Or: The wider topographical context of the Arch of Hadrian alongside the Via Flaminia which led to the (later) Hadrianeum and to Hadrian's Temples of Diva Matidia (and of Diva Sabina?). With discussions of Hadrian's journey from Moesia Inferior to Mogontiacum (Mayence) in order to congratulate Trajan on his adoption by Nero, and of Hadrian's portrait-type Delta Omikron ( $\Delta o$ ) (cf. here **Fig. 3**). With The fourth and the fifth Contribution by Peter Herz, with The first Contribution by Franz Xaver Schütz, with The Contribution by John Bodel, and with The second Contribution by Angelo Geißen.*

To Appendix I.g.4.) *Domitian's sacellum of Iuppiter Conservator, his Temple of Iuppiter Custos, and his (fourth) Temple of Iuppiter Optimus Maximus Capitolinus* belongs:

### ***A Study on Domitian's cult-statue of Iuppiter Optimus Maximus Capitolinus* (cf. here **Fig. 10**).**

To Appendix IV.c.1.) *Final remarks on Appendix IV.b) and Appendix IV.c): Hadrian's efforts to legitimize his reign at the beginning of his principate, as expressed in the Anaglypha Hadriani ...* belongs:

***A Study on the colossal portrait of Hadrian (now Constantine the Great) in the courtyard of the Palazzo dei Conservatori at Rome* (cf. here **Fig. 11**). With The Contribution by Hans Rupprecht Goette on the reworking of the portrait of Hadrian (now Constantine the Great).**

To Appendix IV.c.2.) *The Ogulnian monument ... and the she-wolf suckling Romulus and Remus on a headless cuirassed statue of a Flavian emperor (Domitian?) in the Vatican Museums* (cf. here **Fig. 6, right**) and on Hadrian's cuirassed statue from Hierapydna at Istanbul ... belongs:

### ***A Study on Hadrian's portrait-statue from Hierapydna* (cf. here **Fig. 29**).**

In six cases, I have followed the views of earlier scholars, that have been contested in the meantime:

1.) Filippo Magi (1939; *id.* 1945) in believing that the emperor, represented on frieze B of the Cancellaria Reliefs (cf. here **Fig. 2; Figs. 1 and 2 drawing: figures 14 and 12**), was from the very beginning Vespasian, and that the togate youth, standing in front of him, his younger son Domitian;

2.) I have followed those scholars, who suggest that Flavius Sabinus and his men comprising Domitian, when taking refuge on the Capitoline Hill on 18th December AD 69, did not withdraw to the *Arx*, as has been suggested, but instead to the *Capitolium*, that is to say within the *area Capitolina*;

3.) Instead of believing that Domitian erected his obelisk (cf. here **Fig. 28**) in front of his *Templum Gentis Flaviae*, as has been suggested, I have followed those earlier scholars, who were of the opinion that Domitian commissioned his obelisk for the square between the Temples of Isis and Serapis in the *Campus Martius* (i.e., the Iseum Campense), both built anew by the emperor after the great fire of AD 80. Domitian's obelisk is on display on Gianlorenzo Bernini's famous Fountain of the Four Rivers in Piazza Navona at Rome;

4.) Mario Torelli (1987) in believing that Domitian's *sestertius* of AD 95/96 (cf. here **Fig. 30**) and the "Rilievo Terme Vaticano" (cf. here **Fig. 31**) represent the *Templum Gentis Flaviae*, built by Domitian;

5.) Cécile Evers (1991) in believing that the colossal acrolithic statue of Constantine the Great (cf. here **Fig. 11**) in the courtyard of the Palazzo dei Conservatori at Rome was reworked from a statue of Hadrian;

6.) T.P. Wiseman (1987-2022) and Amanda Claridge (1998; *ead.* 2010; *ead.* 2014) in believing that Octavian/Augustus, although the owner of the "House of Augustus", did not live there, but, when this house was hit by lightning in 36 BC, erected the Temple of Apollo Palatinus on top of it, which was oriented towards the north-east; and that the (real) House of Augustus, the former House of Hortensius, stood at the site of Domitian's '*Domus Flavia*' / *Domus Augustana*.

For a discussion of the Cancellaria Reliefs; cf. *infra*, at Chapters I.; II.; III.; IV.; V.; VI.; for summaries of my hypotheses concerning point 1.), cf. below, at Chapters V.1.d; V.1.h; V.1.h.1.); V.1.h.2); V.1.i.3.) VI.3; and at *The major results of this book on Domitian*.

My hypotheses concerning point 2.), Domitian's escape from the *Capitolium* on 19th December AD 69, are to be found below, in Chapter *Preamble*; Section III., at point 1.); *infra*, in volume 3-2, at *Appendix I.*; *Appendix IV.*

For my hypotheses concerning point 3.), Domitian's obelisk, which he erected at the Iseum Campense, for my hypotheses concerning Domitian's Iseum Campense, and concerning Domitian's *Templum Gentis Flaviae*; cf. below, in Chapters IV.1.; IV.1.1.a-f); IV.1.1.h); and V.1.i.3.a); *infra*, in volume 3-2, in *Appendix I.g*); *Appendix I.g.1.*); *Appendix I.g.2.*); *Appendix I.g.3.*); *Appendix II.*; *Appendix III.*; and in *Appendix VI.*, at Sections II.; and XII.

For a discussion of point 4.), that the *sestertius*, issued by Domitian in AD 95/96, and the "Rilievo Terme Vaticano" represent the *Templum Gentis Flaviae*; cf. below, in Chapters IV.1.1.h); V.1.i.3.a); and *infra*, in volume 3-2, in *Appendix I.g.3.*); at Sections I.-IV.; in *Appendix IV.c.1.*); in *Appendix IV.c.2.*); and in *Appendix VI.*; at Sections II. and XII.

For a discussion of point 5.), that the colossal acrolithic statue of Constantine the Great in the courtyard of the Palazzo dei Conservatori at Rome was reworked from a statue of Hadrian; cf. below, at *A Study on the colossal portrait of Hadrian (now Constantine the Great) in the courtyard of the Palazzo dei Conservatori at Rome* (cf. here **Fig. 11**). With The Contribution by Hans Rupprecht Goette on the reworking of the portrait of Hadrian (now Constantine the Great); at Part I.; and *infra*, in volume 3-2, at *Appendix IV.c.1.*); and *Appendix IV.c.2.*).

For a discussion of point 6.), the "House of Augustus", the Temple of Apollo Palatinus, the House of Hortensius and the (real) House of Augustus; cf. *infra*, in volume 3-2, in *Appendix V.*; at Section IX; and in *Appendix VI.*; at Sections I.-XII.

On 4th December 2022, Franz Xaver Schütz and I have published an earlier version of this Chapter on our Webserver as a Preview for this *Study on Domitian*:

Online at: <<https://FORTVNA-research.org/FORTVNA/FP3.html>>.

Only after having finished writing my text on the Cancellaria Reliefs, did I come across the research of Rita Paris (1994b) on the *Templum Gentis Flaviae*. Her findings, especially those concerning the relief, representing Vespasian's *adventus* into Rome in AD 70 (cf. here **Fig. 33**), which she discusses in context with Frieze A and B of the Cancellaria Reliefs (cf. here **Figs. 1; 2**), support my overall hypothesis concerning those panels. I have added the Chapter *V.1.i.3.a*) to my text, in which Paris's research is presented.

Even later than that, on 31st August 2019, John Pollini was kind enough to send me his article on the so-called Nollekens Relief (2017b; cf. here **Fig. 36**) which, exactly like the relief **Fig. 33** from the *Templum Gentis Flaviae*, shows great similarities with the Cancellaria Reliefs. I have, therefore, also added Chapter *V.1.i.3.b*), in which Pollini's discussions on both subjects are summarized. Pollini's analyses of the Nollekens Relief and of the Cancellaria Reliefs corroborate likewise the here developed view of the Cancellaria Reliefs.

I had just found in John Pollini's article (2017b, 124, with n. 118) the famous line by Augustus (*RG 13*): *parta victoriis pax*, translated by Pollini as: "peace through victory", when I received on 2nd November 2019 the manuscript of the article by Rose Mary Sheldon, which has appeared in the meantime (cf. *ead.*, "Insurgency in Germany: The Slaughter of Varus in the Teutoburger Wald", 2020). In this article, Rose Mary has greatly expanded her earlier relevant observations; cf. Sheldon (2001).

Rose Mary Sheldon (2020) thus provided me with a classic example of what Augustus's doctrine 'peace through victory' in reality may have meant. P. Quinctilius Varus, "the commander of the Rhine army" (R.M. SHELDON 2020, 1011), was precisely one of those men, who was supposed to provide Augustus's subjects in the provinces with 'peace through victory'. For Sheldon's (2020) and Pollini's (2017b) observations in detail; cf. *infra*, in volume 3-2, at *Appendix IV.c.1.*).

Sheldon (2020) describes the events that led to P. Quinctilius Varus' catastrophic defeat in the Teutoburger Wald in AD 9 and to the destruction of his entire army, the battle itself, which she assumes at Kalkriese, and its extraordinary historical impact. There, to regain their liberty, Arminius, his Cherusci and their allies, destroyed Varus's three Roman legions, and the many Roman civilians accompanying them, in the course of three days. 20,000 Romans soldiers and 10,000 civilians perished in the Teutoburger Wald, comprising one tenth of Augustus's entire thirty legions; cf. Sheldon (2020, 1014, 1018, 1025, 1030). Sheldon (2020, 1013, with n. 25, quoting Tacitus, *Annals* 2,88) writes about Arminius: "no doubt, the liberator of Germany".

To Arminius I will come back below (cf. at *A Study on Hadrian's portrait-statue from Hierapydna* (cf. here **Fig. 29**); and *infra*, in volume 3-2, at *Appendix IV.c.1.*); *Appendix IV.c.2.*); and *Appendix IV.d.2.d*)). For the visit on 11th June 1999 of Rose Mary Sheldon, her husband Jeff Aubert, Franz Xaver Schütz and myself of the battle site at Kalkriese and the Varusschlacht-Museum; cf. *infra*, in volume 3-2, at *Appendix IV.c.1.*).

When this manuscript was about to be sent to the press, Franz Xaver Schütz alerted me to the following publication, some passages of which are quoted *verbatim infra*, in volume 3-2, at *Appendix IV.c.1.*):

ARCHAEOLOGIE-ONLINE.DE Metallurgischer Fingerabdruck weist Legion des Varus in Kalkriese nach. Neue wissenschaftliche Methode bestätigt Kalkriese als Ort der Varusschlacht. 21.11.2022. Online at: <<https://www.archaeologie-online.de/nachrichten/metallurgischer-fingerabdruck-weist-legion-des-varus-in-kalkriese-nach-5466/>> [last visit: 15062023].

From this publication emerges that until recently, quite a few scholars have still doubted that the area at Kalkriese was indeed the theatre of "The Slaughter of Varus in the Teutoburger Wald", to borrow the title of Sheldon's (2020) article. Those scholars have suggested that the excavated archaeological finds at Kalkriese should instead be attributed to a military campaign, conducted by Germanicus six years later. As we have seen above, Sheldon (2020), on the contrary, had based her, in my opinion very convincing account, on the assumption that those remains, excavated at Kalkriese, may actually be attributed to Varus's famous defeat.

Excavated fragments of the equipment of the Roman soldiers, who were killed in the battle at Kalkriese, are on display in the Varusschlacht-Museum there. In this article in *ARCHAEOLOGIEONLINE DE* is described, how the metal of those finds has recently been analysed. The obtained results have not only been compared with those of all other contemporary Roman legions in the area, but, in addition to this, with finds from all those camps, where Varus's three legions had been stationed *before* AD 9. It could thus be

proven beyond any doubt, that some of these items from Kalkriese had certainly been owned by soldiers of 'Legio 19', one of Varus's three legions, who perished 'in the Teutoburger Wald'.

See below, at *The first Contribution by Franz Xaver Schütz: Zur kartographischen Visualisierung historischer Landschaftselemente zwischen Rhein und Schwarzem Meer von Augustus bis Hadrian* (cf. here **Fig. 77**).

The manuscript of Sheldon's article (2020) had reached me on 2nd November 2019 right in time to make me realize what it meant to the people in the Roman provinces, to be deprived of great parts of their income in form of taxes, because Augustus or later emperors, such as Domitian (or for example Vespasian, Trajan, Hadrian and Septimius Severus, whose relevant actions are also discussed in this *Study*), spent such enormous sums on their (building) projects.

Concentrating predominantly on Domitian, this *Study* tries to answer the question, *why* Domitian felt the desperate need to build 'in such a pharaonic manner', as has (similarly) first been suggested by Mario Torelli (1987, 575, quoted *verbatim infra*, n. 228, in Chapter I.2.). Of course, Domitian's building policy has already been studied by many previous scholars. In the following, I, therefore, anticipate a conclusion, at which I have arrived below (cf. *infra*, at Chapter II.3.1.c):

'Eric M. Moormann (2018, 162) mentions "three fields of interest in Domitian's building policy", as defined by Jens Gering (2012, 210-211): "personal grandeur, family memory and legitimization".

This is exactly how, in my opinion, also the contents of the Cancellaria Reliefs can be defined. Contrary to all other scholars - the only exception being Wolfgang Kuhoff - I have concentrated in this *Study* on a comparison of the contents of Frieze B of the Cancellaria Reliefs (cf. here **Fig. 2; Figs. 1 and 2 drawing**) with the contents of Domitian's obelisk, which the emperor erected at the Iseum Campense (cf. here **Fig. 28**): namely the contents of the representations on the *pyramidion* of this obelisk, as well as the contents of its hieroglyphic texts. And I happily confess that my research on this obelisk was only possible thanks to the generous support by the Egyptologist Emanuele M. Ciampini. To this I will come back below in a minute.

As I only realized after having conducted this research, a comparison between Frieze B of the Cancellaria Reliefs and the hieroglyphic inscriptions of Domitian's obelisk has been drawn before by Wolfgang Kuhoff (1993, 77 with n. 103, quoted *verbatim* in Chapter IV.1.), who mentions his findings in a footnote.

To attain this goal, two avenues of research have been pursued in this *Study*, at first was made a detailed analysis of the contents of Frieze B of the Cancellaria Reliefs, and second, on the basis of this, a comparison of those contents with the contents of the representations on the *pyramidion* of Domitian's obelisk, as well as with the contents of its hieroglyphic texts, both of which have been analysed by Ciampini (2004; *id.* 2005). This article is quoted *verbatim* in its entirety; cf. *infra*, at Chapter IV.1.1.d.). See also *The first Contribution by Emanuele M. Ciampini* in this volume: *La regalità domiziana: una nota egittologica*.

As a result of this comparison, I suggest that exactly the same themes (as on Frieze B of the Cancellaria Reliefs) are also formulated in the representations on the *pyramidion* and in the hieroglyphic texts of Domitian's obelisk.

The contents of Frieze B of the Cancellaria Reliefs are hotly debated, and what I am presenting here is my own opinion.

For a summary of the relevant debate by other scholars; cf. *infra*, at Chapters I.1.; I.1.1.; VI.1.; and below, in Chapter *The major results of this book on Domitian*.

The contents of the representations on the *pyramidion* of Domitian's obelisk are likewise debated, but the hieroglyphic texts of Domitian's obelisk, on the contrary, have the great advantage that here Domitian's propaganda is formulated *expressis verbis*. See for both Ciampini (2004; *id.* 2005); cf. also *infra*, at Chapter IV.1.1.f)); and at *The first Contribution by Emanuele M. Ciampini* in this volume: *La regalità domiziana: una nota egittologica*, as well as my own comments on all those subjects (cf. *infra*, in Chapter *Preamble: Domitian's negative image*; at Section II. *Conclusions: Domitian's representations of his military successes and his claims to be of*

*divine descent and to possess a divine nature; at Section III. My own thoughts about Domitian; at Chapters IV.1; IV.1.1.a); IV.1.1.b); IV.1.1.c); IV.1.1.d); IV.1.1.f); VI.3.); and at The major results of this book on Domitian.*

Whether or not I have been able to define correctly: 1.) the contents of Frieze B of the Cancelleria Reliefs; and 2.) the contents of the representations on the *pyramidion* of Domitian's obelisk, as well as of the hieroglyphic texts of Domitian's obelisk, can both only be judged by other scholars.

But one thing is clear. Egyptologists are certainly able to add many more insights to this complex subject, when studying in-depth the hieroglyphic texts on Domitian's obelisk - as well as other Egyptian texts that have been created at Rome in the Flavian period. On 28th October 2022, after this *Chapter* was written so far, reached me an E-mail by Emanuele M. Ciampini, who kindly informed me that the paper, prepared by himself and by the Egyptologist Federica Pancin, has been accepted for a Conference, which has the following title: *The Damned Despot : Rethinking Domitian and the Flavian World*", and was held at Rome from 18-21 January 2023. This Conference was organized by Antony Augoustakis, Emma Buckley, Nathalie de Haan, Eric Moormann, Maria Paola del Moro, Massimiliano Munzi, Claudio Parisi Presicce, Aurora Raimondi Cominesi, and Claire Stocks.

In their paper, Ciampini and Pancin have presented precisely that, the results of their current research on the Egyptian inscriptions, created at Rome in the Flavian period, comprising those on Domitian's obelisk. The title of the paper by Emanuele M. Ciampini and Federica Pancin is:

**"And may the land be prosperous in the time of the dynasty whose name is Flavii'. Thoughts on the Egyptian Domitian [my emphasis]".** The first part of the title of their paper is, of course, a quote from Domitian's obelisk; cf. E.M. Ciampini (2004,159, H.7).

Assuming for the time being that my above-mentioned observations are correct, I have in this *Study*, concerning the "three fields of interest in Domitian's building policy", as defined by Gering (2012, 210-211): "personal grandeur, family memory and legitimization", concentrated on Domitian's aim of 'legitimization' - (so my first aim). These activities of Domitian can be compared in this *Study* with the relevant efforts reported for Augustus, Vespasian, Trajan, Hadrian and Septimius Severus. The summary will show (cf. *infra*, in volume 3-2, at *Appendix IV.d*) *The summary of the research presented in Appendix IV. has led to a summary of Domitian's building projects at Rome*) that also Gering's 'other two fields of interest in Domitian's building policy : personal grandeur and family memory', have in the end likewise been discussed in this book in detail. Again assuming for the time being that my relevant observations are correct, my answer to the above posed question - *why* Domitian felt the desperate need to build 'in such a pharaonic manner' - is therefore:

The extraordinary efforts that Domitian undertook served, exactly like the comparable ones in the case of Augustus, Vespasian, Trajan, Hadrian and Septimius Severus (apart from the other two motivations in the case of Domitian: "personal grandeur and family memory"), the purpose of legitimizing Domitian's reign. The actions discussed here, especially the grandiose building projects of these emperors, served, therefore, the purpose that all of these emperors should duly be acknowledged by their subjects for these achievements, and, in addition to this, favourably remembered by posterity.

Rose Mary Sheldon (2020, 1011 with n. 12) succinctly defines the underlying conflict of the above-described situation from the perspective of those subjects in the Roman provinces, who had to pay the taxes, with which those emperors financed all these formidable activities: "Florus rightfully points out that it is easier to subdue a province than to retain one.

**The simple truth is that no one likes being occupied [my emphasis]".**

In her **note 12**, Sheldon writes: "Florus, *Epitome of Roman History*, 2.30.29 ...".

### *Introductory remarks and acknowledgements*

On 26th August 2018, my good friend Rose Mary Sheldon has asked me to consult her on artworks and buildings dating to the Flavian period that she will discuss in her book related to the Flavians (cf. *infra*, n. 1, in Chapter I.1.), mentioning in this context the Cancellaria Reliefs to me (cf. here **Figs. 1; 2; Figs. 1 and 2 drawing**).

To begin with, I had no idea that my relevant inquiries could possibly develop into an entire book about Domitian. I hope that the resulting *Study* will be regarded as one step towards the reconstruction of a more colourful portrait of *Domitian and his achievements, especially at Rome* when regarded in retrospect. Here are two reasons:

a) The different avenues of research followed in this book were often stimulated by discussions with other scholars, Rose Mary Sheldon included, some of whom even wrote *Contributions* to this volume on my request. Many of these scholars alerted me to new publications or even presented me with them, and I confess that in many cases I only realized much later the potential of those publications for the topics, discussed here;

b) Domitian's actions were *inter alia* defined in the course of studying the achievements of other emperors and/ or by discussing artworks commissioned by other emperors.

Let me mention two of many more possible examples, in order to explain this working method in more detail; both examples are, by the way, closely related to each other. - As we shall see below, also a 3.) major hypothesis of this *Study* has resulted from studying those two examples.

1.) None of the books presented to me is dedicated to Domitian (although that was only true at the beginning of these studies; cf. *infra*).

But one of them, Hugo Brandenburg's (*Le Prime Chiese di Roma IV-VII Secolo*, 2013), which Hugo Brandenburg and Angelika Geyer were so kind as to present me with, deals with the colossal acrolithic marble portrait of Constantine the Great in the cortile of the Palazzo dei Conservatori at Rome (cf. here **Fig. 11**).

Brandenburg (2013, 16) writes that Constantine 'put himself under the protection of the god [of the Christians] to guarantee, according to Roman tradition, his victory [over Maxentius at the *Pons Milvius* in AD 312], as *imperator invictus*, and thus the prosperity of the Roman Empire'.

At first, I became only interested in pursuing the doctrine of 'invincibility' over time, my inquiry at that very moment. I then began to study this *colossus* of Constantine itself, however, which turned out to have originally been a portrait of Hadrian, as has first been suggested by Cécile Evers (1991). Concentrating on Hadrian, has led me to look for the first time at Hadrian's military campaigns (but see below).

Studying this colossal statue of Hadrian/ Constantine the Great had also another effect, since Claudio Parisi Presicce (2006b) has compared it with the statue of Jupiter in the Hermitage at St. Petersburg (cf. here **Fig. 10**), which copies the same prototype of Jupiter as the Hadrian/ Constantine in mirror image. This statue-type of Jupiter (here **Fig. 10**) (and its variants) was extremely successful in antiquity and has also been copied in statuette format as Capitoline Triad, together with Juno and Minerva (cf. here **Fig. 13**). Most famous among these copies in statuette format is certainly the statuette of 'Euripides' in the Louvre at Paris (cf. here **Fig. 12**). As Hans Rupprecht Goette (forthcoming) has demonstrated, this was created at the order of Francesco Ficoroni by turning such a headless copy of Jupiter of a Capitoline Triad into the tragic poet. And Evers's article (1991), in its turn, has also led to detailed research on Hadrian's portrait-statue from Hierapydna in Crete at Istanbul (here **Fig. 29**).

2.) Trying to understand Domitian's escape from the *Capitolium* on 19th December AD 69, I came across the reliefs called Anaglypha Hadriani (cf. here **Figs. 21-22**), because, as Dunia Filippi (1998) has shown, on one of them, the 'burning of debt records' relief (cf. here **Fig. 22**), appears an arch that is of importance in this context. But instead of contenting myself with the discussion of the topographical situation, which is visualized on this relief, I turned then to the overall content of both Anaglypha Hadriani, which led me again to military campaigns, but in this case not only to those of Hadrian, but also to those of Trajan. For all that; cf. *infra*, at *The third Contribution by Peter Herz* in this volume: *Der Übergang von Trajan auf Hadrian und das erste Regierungsjahr Hadrians*.

As a result of his research was added *Appendix IV.* to this book, in which all the topics of points 1.) and 2.) are discussed in detail (cf. *infra*, in volume 3-2, at *Appendix IV.*, and here **Figs. 21; 22**).

Studying Hadrian's military campaigns that are mentioned among the topics of points 1.) and 2.) has also provided new insights concerning Domitian's Dacian Wars, and has procured the answer to the question for which of his military campaigns Domitian (now Nerva) is actually leaving for on Frieze A of the Cancellaria Reliefs (cf. here **Fig. 1; Figs. 1 and 2 drawing: figure 6**). Another result consists in the identification of the statue of Jupiter in the Hermitage at St. Petersburg (cf. here **Fig. 10**), and of those Capitoline Triads in statuette format (cf. here **Fig. 13**, for which this had already been suggested by other scholars), including the statuette of 'Euripides' in the Louvre (cf. here **Fig. 12**), as copies of the colossal (chryselephantine?) cult-statue of Jupiter in Domitian's (fourth) Temple of Iuppiter Optimus Maximus Capitolinus.

**I am not saying that it would have been impossible to find out those new data about Domitian's military campaigns or concerning his cult-statue of Iuppiter Optimus Maximus Capitolinus otherwise, but, as a matter of fact, I found them *this way*. - The above-mentioned ideas are based on publications which will be mentioned in the following. The relevant insights developed slowly and are, therefore, described in the following in detail and in chronological order.**

Hugo Brandenburg's and Angelika Geyer's present of Brandenburg's *Le Prime Chiese di Roma IV-VII Secolo*, 2013) has resulted in research, that was at first integrated into already existing *Chapters* of this book. At a later stage, I 'cut some relevant text passages out of those Chapters', to the effect that this book present has finally resulted in three separate, but interrelated monographs, all of which have provided (unforeseen) new insights concerning Domitian, which is why they are all published in this book on Domitian:

See below, at *A Study on the colossal portrait of Hadrian (now Constantine the Great) in the courtyard of the Palazzo dei Conservatori at Rome* (cf. here **Fig. 11**). With The Contribution by Hans Rupprecht Goette on the reworking of the portrait of Hadrian (now Constantine the Great); *A Study on Domitian's cult-statue of Iuppiter Optimus Maximus Capitolinus* (cf. here **Fig. 10**); and *A Study on Hadrian's portrait-statue from Hierapydna* (cf. here **Fig. 29**).

**Since I was about to leave for Rome, when Rose Mary Sheldon's request first reached me on 26th August 2018, I therefore took the chance of asking Claudia Valeri and Giandomenico Spinola of the Vatican Museums, as well as Paolo Liverani to discuss with me the two Cancellaria Reliefs (cf. here **Figs. 1; 2**).**

**I especially thank Giandomenico Spinola, who was so kind as to explain to me his own findings concerning those friezes while in front of the reliefs (cf. here **Figs. 1; 2**) on 24th September 2018, and in our following E-mail correspondence, the content of all this he has generously allowed me to publish here (see Chapter III.). In addition to this, he took the time to summarize, on my request, in an E-mail on October 15th, 2018, what he had told me at our first meeting; this letter is here published with his friendly consent.**

**Cf. below, at *The Contribution by Giandomenico Spinola on the Cancellaria Reliefs*.**

I further thank Paolo Liverani for sending me his comments on an early draft of this text, and for his much appreciated bibliographic help. - Not only concerning the Cancellaria Reliefs, which I had hoped and almost expected that he would have discussed them himself (cf. *id.*, "Per una >Storia del colore< La scultura policroma romana, un bilancio e qualche prospettiva", 2014).

**This essay by Liverani (2014) turned out to be decisive in the identification of Frieze A as a *profectio* (cf. *infra*, at Chapters III.; and V.1.i.3.)).**

I seem to constantly run into themes, which Liverani has studied long before me : this time this 'additional' subject was the 'Phrygianum' *Vaticanum*, which had been mentioned by him on 23rd September 2008 at the Congress of Classical Archaeology, Roma 2008, in the discussion after a session on oriental cults in Rome, and I am very glad that he has provided me now, by request, with a copy of his publication ("Il 'Phrygianum' Vaticano", 2008).

**On the content of Liverani's article (2008), I have based my hypothesis concerning Domitian's escape from the *Capitolium* on 19th December AD 69 (cf. *infra*, in volume 3-2, at Appendix I.d)).**

**Also especially fruitful for this *Study* has been the fact that the organizers of the Iseum Campense Conference at Rome in May 2016, Miguel John Versluys, Kristine Bülow Clausen and Giuseppina Capriotti Vittozzi invited me to attend.**

**There I met again with the classical archaeologist Paul G.P. Meyboom, who was so kind as to present me with a copy of his recent book (*The Nile Mosaic of Palestrina. Early Evidence of Egyptian Religion in Italy*, 2016).**

Cf. below, at Chapter IV.1.1.e); and *infra*, in volume 3-2, at Appendix I.g.1.); Appendix I.g.2.); Appendix II.a); and Appendix IV.c.1.)).

**In addition to this, I was lucky enough to make the acquaintance of the Egyptologist Nicola Barbagli at the Iseum Campense Conference at Rome in May 2016, who helped me to solve a great problem I had at the time concerning the question, whether or not Octavian/ Augustus actually *was* the Pharaoh of Egypt; cf. Barbagli (2017; *id.* 2018; and *id.*. Ph.D. Dissertation Scuola Superiore, Pisa 2022). - To this I will come back below.**

On 25th February 2018, Franz Xaver Schütz and I met in Rome, at the home of our good friend Laura Gigli, one of her former colleagues, the architect Carla Bresciani. Like herself, Carla's late husband, the architect Giuliano Sacchi, had likewise been working for the Superintendency of the State. When telling both ladies of my idea (published 2017; cf. here **Figs. 58; 59; 60**, for our updated maps) that the *Porticus Octaviae* had also a propylon on its north side, Carla told us the following. Her husband, Giuliano Sacchi, had excavated architectural remains in the basements of Palazzo Patrizi Clementi immediately to the north of the *Porticus Octaviae* (cf. here **Fig. 59; 60**), which have been attributed to a *propylon* on the north side of the *Porticus Octaviae*; cf. Sacchi (1995), a publication that I had unfortunately overlooked when writing my book of 2017.

I therefore met, when back in Rome, on 3rd May 2018 with my good friend, the archaeologist Giuseppina Pisani Sartorio, who was kind enough to organize on 9th May 2018 a meeting of the two of us with her friend Paola Ciancio Rossetto, who was at the time (again) excavating at the *Porticus Octaviae*; cf. Ciancio Rossetto (2018; 2021; 2022). - To this I will come back below.

For a discussion of all that; cf. *infra*, in volume 3-2, at *A Study on the consequences of Domitian's assassination ... Or: The wider topographical context of the Arch of Hadrian alongside the Via Flaminia which led to the (later) Hadrianeum and to Hadrian's Temples of Diva Matidia (and of Diva Sabina?) ...*; at Introduction; Section I. The motivation to write this Study: W. Eck's (2019b) new interpretation of the inscription CIL VI 40518 (cf. here **Fig. 91.1**), the decision to correct my own relevant errors in my earlier Study (2017), and the subjects discussed here, as told by the accompanying figures and their pertaining captions.

Carlotta Caruso (of the Museo Nazionale Romano) generously presented Franz Xaver Schütz and me on 27th February 2018 with a copy of Maria Antonietta Tomei's book (*Augusto sul Palatino. Gli scavi di Gianfilippo Carettoni. Appunti inediti (1955-1984)*, 2014), when we were discussing the marble statue of Jupiter kept at the Museo Nazionale Romano (MNR), Terme di Diocleziano (the 'Giove Vimino', inv. no. 424751) which, when I was studying it some years before had unfortunately not been accessible; cf. Häuber (2014a, 449, 680-681, 692, Figs. 76a-c on p. 449; cf. **B 23**). Tomei's book has turned out to be of great importance in the discussion of the 'House of Augustus' on the Palatine, which Gianfilippo Carettoni excavated, and the (real) House of Augustus on the Palatine, at the site of which Domitian built his Palace, therefore on purpose called '*Domus Augustana*' (cf. *infra*, in volume 3-2, in *Appendix VI.*, at Section I.)).

On 28th February 2018, Francesca Ceci (of the Musei Capitolini) was kind enough to present Franz Xaver Schütz and me with books that likewise turned out to be of great importance for some of the topics, discussed in this *Study*: the *Bullettino Comunale* 117 (2016), which contains *inter alia* the article by Giuliano Giovannetti ("La struttura portuale di lungotevere Testaccio: una nuova analisi della documentazione", 2016 (cf. below, in volume 3-2, at *Appendix IV.c.1.*)); Elisabetta Carnabuci (*Regia. Nuovi dati archeologici dagli appunti inediti di Giacomo Boni, LTUR Suppl. 5*, Roma 2012; cf. *infra*, in volume 3-2, in *Appendix VI.*; at Section III.); Margherita Albertoni and Isabella Damiani (*Il tempio di Giove e le origini del Colle Capitolino*, 2008); and Eloisa Dodero and Claudio Parisi Presicce (*Il tesoro di Antichità. Winckelmann e il Museo Capitolino nella Roma del Settecento*, 2017); for a discussion of both publications; cf. *infra*, in volume 3-2, at *Appendix I.e.*

As we shall see in the following, also the discussion of the quartiere Testaccio/ *La Marmorata* in *Appendix IV.c.1.*) has later been 'cut out' and incorporated into another separate monograph within this *Study* on Domitian:

Cf. *infra*, at *A Study on the colossal portrait of Hadrian (now Constantine the Great) in the courtyard of the Palazzo dei Conservatori at Rome (cf. here Fig. 11)*. With The Contribution by Hans Rupprecht Goette on the reworking of the portrait of Hadrian (now Constantine the Great); at Part I. *The statue of Hadrian (now Constantine the Great) in the courtyard of the Palazzo dei Conservatori (cf. here Fig. 11), the inscription (CIL VI 974 = 40524; cf. here Fig. 29.1)*, and the cult-statue of *Divus Vespasianus* in the Temple of *Divus Vespasianus*. With The Contribution by Hans Rupprecht Goette on the reworking of the portrait of Hadrian (now Constantine the Great); and at Part II. *Ancient Rome's new commercial river port, at La Marmorata. With discussions of the 'Porticus Aemilia' (in reality identifiable as Navalía) and of the Horrea Aemiliana*. With The sixth Contribution by Peter Herz : Rom. Strukturen der Versorgung; and with The second Contribution by Franz Xaver Schütz : *Wie schwer war der ägyptische Obelisk, der heute auf der Piazza di S. Giovanni in Laterano in Rom steht?*

Peter Herz should send me his sixth *Contribution* to this volume on 25th February 2023 (see below).

**At the Iseum Campense Conference in May of 2016, I was also lucky enough to make the acquaintance of the Egyptologist Alessandro Roccati, whom I met again in Rome on 4th May 2018. On that occasion, Roccati presented me with the volume *L'Impero Ramesside* (1997). As I only realized much later, this volume turned out to be precisely what I needed for my research.**

The occasion to understand this came when studying Domitian's escape from the *Capitolium* on 19th December AD 69 (cf. *infra*, in volume 3-2, at *Appendix I.*). When reading the first draft of my resulting text, Rose Mary Sheldon alerted me to the fact that the stories told about this event are reminiscent of *The Taking of Joppa*, an Egyptian story, set in the Levant around 1450 BC. In this tale Djehuty, a general of Pharaoh Tuthmosis III, takes the city of Joppa (today: Tel Aviv-Jaffa) by applying a similar stratagem as the one applied on 19th December AD 69 by some of Flavius Sabinus's companions, who thus escaped from the *Capitolium*. *The Taking of Joppa* was written down circa 200 years after the (possible) event, that is to say, under the Egyptian Pharaoh Rameses II. As we shall see when discussing its historical background this turns out to be (in part) the Egyptian Imperialism in the Levant under Rameses II.

Moreover, another coincidence, the Ramesside period was the subject of the International Conference, organized by the Università di Roma "La Sapienza", published in the volume *L'Impero Ramesside. Convegno Internazionale in Onore di Sergio Donadoni* (1997), that Roccati had given me. Paolo Liverani's essay in this volume discussing the Egyptian Imperialism in the Levant under Rameses II ("Ramesside Egypt in a changing world an institutional approach", 1997) happened to be particularly relevant.

For all that; cf. *infra*, in volume 3-2, at *Appendix I.d.1.a*).

**Alessandro Roccati was also kind enough to introduce me to the Egyptologist Emanuele Marcello Ciampini, whom I first met in Rome on 11th May 2018.**

**Even later than that I realized that Rose Mary Sheldon's hint at the Egyptian story *The Taking of Joppa* can help us also to understand the otherwise rather bewildering iconography of the portrait-statue of Hadrian from Hierapydna at Istanbul (cf. here Fig. 29), in which the cuirassed emperor sets his left foot on the neck of a (representation of a?) vanquished 'enemy', possibly the representation of *Iudaea* - if so, this portrait-type celebrates Hadrian's victory over his own subjects. This portrait of Hadrian from Hierapydna was copied after a very successful prototype.**

It is well known that the iconography of this series of portraits of Hadrian (cf. here Fig. 29) was derived from archaic 'oriental' models, as demonstrated by Eugenio La Rocca ("Ferocia barbarica. La rappresentazione dei vinti tra medio Oriente e Roma", 1994). These 'oriental' iconographies show Near Eastern and Egyptian kings in the act of smiting their enemies; but note that the same iconographies were likewise used when those kings had suppressed the revolts of subjects in their own Empires.

**But only when we consider, in addition, the discoveries by the Egyptologist David Peter Davies (*The Taking of Joppa*, 2003), in combination with the observations of the Egyptologist Emanuele M. Ciampini ("The King's Food A Note on the Royal Meal and Legitimation", 2016), can we arrive at a better understanding of Hadrian's peculiar portrait (cf. here Fig. 29).**

David Peter Davies (2003, 48, quoted in detail *infra*, in volume 3-2, at *Appendix I.d.1.a*)) concludes that Tuthmosis III's general Djehuty, whose name derives from that of the god Thot, by taking the city of Joppa, 'restores harmony', precisely as the god Thot himself 'restores harmony'.

For that conviction; cf. *infra*, in volume 3-2, at *Appendix I.d.1.a*) *The stratagem, told in The Taking of Joppa, a town, 'taken' by Djehuty, a general of Tuthmosis III (around 1450 BC), compared with the escape of some of the Flavians from the Capitol on 19th December AD 69. With some remarks on what The Taking of Joppa has to do with Tuthmosis III's Lateran Obelisk (cf. here Fig. 101). With The second Contribution by Emanuele M. Ciampini.*

See also below, at still another separate monograph, integrated into this *Study on Domitian: A Study on Hadrian's portrait-statue from Hierapydna* (cf. here Fig. 29).

Let me explain, why the Egyptians believed in this important power of their god Thot. The Egyptian Pharaoh was crowned at the festival of New Year, presided over by the gods Thot and Ma'at, and celebrated in the month named after the god Thot. As a result of his coronation, the Egyptian king would then be able to restore the desired state of affairs in the Egyptian state, as well as in the realm of the gods, called by the Egyptians Ma'at - harmony. The Egyptians believed also that only their king was able to achieve this foremost goal, and that without the king there would be no Ma'at, but the opposite: *chaos*.

Cf. *infra*, in volume 3-2, at *Appendix II. Again on the Egyptianizing marble relief allegedly from Ariccia at the Museo Nazionale Romano, Palazzo Altamps (Fig. 111) - a representation of the Egyptian festival of New Year?*

Emanuele M. Ciampini (2016, 115, quoted in more detail below, at *A Study on Hadrian's portrait-statue from Hierapydna* (cf. here Fig. 29), explains that the Egyptian iconography, showing the king "smiting the chaotic element (= the enemy)", illustrates the foremost duty of the Egyptian Pharaoh, namely to restore order and

justice, a state of affairs called by the Egyptians Ma'at - harmony, thus proving, as Ciampini writes, the ruler's 'active role in the eternal conflict between order and chaos'.

**Seen from this perspective, the very large series of these portraits of Hadrian, among them the statue from Hierapydna (cf. here Fig. 29), which commemorate one of the emperor's victories (in my opinion, the Bar Kokhba Revolt), could, in theory, have celebrated Hadrian as 'the restorer of harmony'. If so, that particular state of harmony was, of course, clearly a matter of perspective. Besides, when one stands in front of this over-lifesize portrait of Hadrian (here Fig. 29), which I found very impressive and even scary, this interpretation of its iconography does not come to mind easily. - To all the above-mentioned publications I will come back below.**

The above-mentioned research topic point 1.), in addition to what was already said, has also led to another result, namely:

3.) to the hypothesis that we know the original of this large group of portraits of Hadrian discussed here, of which the statue from Hierapydna (cf. here Fig. 29) is the most prominent one.

Cécile Evers (1991), in her discussion of the portrait of Hadrian/ Constantine the Great (cf. here Fig. 11), mentioned five inscriptions found in the *Forum Romanum*, suggesting that these could (in theory) have belonged to this colossal portrait of Hadrian. One of these inscriptions was CIL VI 974, now called CIL VI 40524. Geza Alföldy (at: CIL VI 40524 = here Fig. 29.1), because of its findspot, believed that this dedicatory inscription belonged to an honorary portrait of Hadrian that was erected within the *cella* of the Temple of *Divus Vespasianus*. Michaela Fuchs (2014, 130, with n. 47) followed him, not only because of the provenance of this inscription, but also because of its content. This honorific statue of Hadrian was dedicated by the Senate and the Roman People to commemorate Hadrian's victory in the Bar Kokhba Revolt. In this inscription, the emperor's military success is explicitly compared with those of the *imperatores maximi*, thus referring to Vespasian and Titus, 'whom, with his victory, Hadrian has even surpassed'.

Alföldy and Fuchs have not themselves discussed Evers's hypothesis concerning this inscription. I have at first followed Evers by tentatively suggesting that this portrait of Hadrian, to which the inscription (CIL VI 40524 = CIL VI 974 = here Fig. 29.1) belonged, could have been the colossal portrait of Hadrian/ Constantine the Great (here Fig. 11). But while writing *Appendix IV.c.2.*) (cf. *infra*, in volume 3-2), further information turned up, which made me change my mind. This portrait of Hadrian, erected by the Senate and the Roman People (possibly) within the *cella* of Domitian's Temple of *Divus Vespasianus*, should, in my opinion, be regarded as the original, after which Hadrian's portrait-statue from Hierapydna (cf. here Fig. 29) was copied. And this, in my opinion, is also true for the almost 30 replicas of this portraits of Hadrian (here Fig. 29), which are discussed here as well.

Cf. below, a *A Study on the colossal portrait of Hadrian (now Constantine the Great) in the courtyard of the Palazzo dei Conservatori at Rome* (cf. here Fig. 11). With The Contribution by Hans Rupprecht Goette on the reworking of the portrait of Hadrian (now Constantine the Great); at Part I. *The statue of Hadrian (now Constantine the Great) in the courtyard of the Palazzo dei Conservatori* (cf. here Fig. 11), the inscription (CIL VI 974 = 40524; cf. here Fig. 29.1), and the cult-statue of *Divus Vespasianus* in the Temple of *Divus Vespasianus*. With The Contribution by Hans Rupprecht Goette on the reworking of the portrait of Hadrian (now Constantine the Great); below, at *A Study on Hadrian's portrait-statue from Hierapydna* (cf. here Fig. 29); and *infra*, in volume 3-2, at *Appendix IV.c.2.*)

**Emanuele M. Ciampini has also translated the hieroglyphic texts of all the obelisks in Rome into Italian (cf. *id.*, *Gli Obelischi iscritti di Roma*, 2004). With Alessandro Roccati and Ciampini I discussed the question, of whether or not Domitian had commissioned the Obeliscus Pamphilius/ Domitian's obelisk for the Iseum Campense, which is today mounted on top of Gianlorenzo Bernini's 'Fountain of the Four Rivers' in Piazza Navona at Rome (cf. here Fig. 28). Personally I am unable to read hieroglyphs, and Ciampini was kind enough to present me with his book.**

**I am glad to say that Ciampini has helped me find evidence in these hieroglyphic inscriptions which, in our opinion, proves that Domitian had indeed commissioned his obelisk for the Iseum Campense.**

**Cf. supra, at Chapter *What this Study is all about*; and infra, Chapter *Preamble: Domitian's negative image*; at Sections II. and III.; at Chapters IV.1.1.d); IV.1.1.f); and below, at *The first Contribution by Emanuele M. Ciampini : La regalità domiziana: una nota egittologica*.**

The reason, why I had asked first Roccati and then Ciampini to help me study the hieroglyphic texts of Domitian's obelisk in more detail, was the following. Whereas most earlier scholars took for granted that the Obeliscus Pamphilius had been commissioned by Domitian for the Iseum Campense, Jean-Claude Grenier (1996; *id.* 1999; *id.* 2009) and Filippo Coarelli (1996; *id.* 2009b; *id.* 2014) have attributed this obelisk to the *Templum Gentis Flaviae* instead, that Domitian built at the site of the *domus* of his father Vespasian on the Quirinal, where Domitian was born (Suet., *Dom.* 1; cf. *Dom.* 15).

On 3rd May 2018, I discussed with Barbara E. Borg at the British School at Rome her new findings concerning the *Templum Gentis Flaviae*, which have in the meantime been published (cf. B. BORG, *Roman Tombs and the Art of Commemoration*, 2019). Borg's new findings concerning the building type of the *Templum Gentis Flaviae* further support the hypothesis suggested here that Domitian commissioned the Pamphili Obelisk for the Iseum Campense instead.

Luckily I also had the chance to meet with Mario Torelli at Perugia on 5th May 2018. Torelli has, since 1979 taken a great interest in my work, and has also been so kind, as to read an earlier version of this entire text. This time, I wanted to know Torelli's current opinion concerning the *Templum Gentis Flaviae*, which he has discussed in an article of 1987. I told Torelli the idea of Emanuele M. Ciampini and myself that the Obeliscus Pamphilius/ Domitian's obelisk (here **Fig. 28**) was not created for the *Templum Gentis Flaviae*, as has first been suggested by Jean-Claude Grenier (1996; *id.* 1999; *id.* 2009), followed by Filippo Coarelli (1996; *id.* 2009b; *id.* 2014). Torelli agreed that, also in his opinion, Domitian's obelisk does not belong to the *Templum Gentis Flaviae*, *inter alia* because it does not show similarities with any of the known fragments of its sculptural decoration, published by Rita Paris 1994b (cf. here **Figs. 33; 34**). At that stage of my research, I had not as yet studied the entire relevant scholarly debate, which is why Franz Xaver Schütz and I visited Torelli another time at Perugia on 29th November 2019, to discuss some additional questions concerning the *Templum Gentis Flaviae*. As we shall hear in more detail below, as a result of both visits, and after I had sent him my texts on the subjects discussed with him, Torelli wrote me an E-mail with his comments, part of which I publish here with his kind consent.

**Cf. below, at *The Contribution by Mario Torelli on the Templum Gentis Flaviae*.**

See also *supra*, at *Dedication*, with Abb. 1; and *infra*, at Chapter V.1.i.3.a) *The reconstruction by R. Paris (1994b) of two of the marble reliefs of the Templum Gentis Flaviae: 'Vespasian' adventus into Rome in October of AD 70* (cf. here **Fig. 33**), and *'Sacrifice in front the Temple of Quirinus on the Quirinal'* (cf. here **Fig. 34**); and *infra*, in volume 3-2, in *Appendix VI.*; at Sections II.; V.; VI.; VII.; X.; XII.

See, in addition to this, *infra*, at Chapter IV.1.1.h) *The new findings by B. E. Borg (2019) concerning the Templum Gentis Flaviae support the hypothesis suggested here that Domitian's obelisk (cf. here Fig. 28) was commissioned for the Iseum Campense. With some observations concerning the Temple of Divus Traianus at Italica, and concerning the Marble Forum at the Colonia Augusta Emerita (Mérida) in Spain. With The Contributions by Eric M. Moormann, Mario Torelli, and Walter Trillmich, and with The second Contribution by Jörg Rüpke.*

**On 13th May 2018, I met with two more scholars in Rome to discuss the 'Templum Gentis Flaviae debate', Hugo Brandenburg and Angelika Geyer, who specialize in Early Christian Archaeology. I likewise discussed with them the idea that, according to Emanuele M. Ciampini and myself, the Obeliscus Pamphilius had actually originally been commissioned by Domitian for the Iseum Campense.**

Hugo Brandenburg and Angelika Geyer agreed with me, and that although we know -

a) that the Emperor Maxentius (reigned AD 306-312) had re-used this obelisk, by erecting it on the *spina* of the *Circus* he built at his *Villa* on the *Via Appia*, and -

b) although I had just learned in Brandenburg's recent book (cf. *id.*, *Die konstantinische Petersbasilika am Vatikan in Rom*, 2017, 70 with n. 203) that until the middle of the 5<sup>th</sup> century 'pagan' temples like the Iseum Campense were regarded as *ornamenta urbis* and were thus protected from being robbed of their artworks and of their building material. - In his note 203, Brandenburg quotes for this statement *inter alia* Angelika Geyer ("*Ne ruinis urbis deformetur. Ästhetische Kriterien in der spätantiken Baugesetzgebung*", 1993, 63-77).

Cf. *infra*, at Chapter IV.1.1.c) *Further research that was undertaken to clarify the question, whether or not Domitian's obelisk (cf. here Fig. 28) was commissioned for the Iseum Campense and G. Gatti's (1943-1944) correct reconstruction of the central Campus Martius (cf. here Fig. 78).*

But, as already mentioned above, my own contribution to the '*Templum Gentis Flaviae* debate' did not end here: On 2nd July 2018, Oliva Rodríguez Gutiérrez (Universidad de Sevilla) gave a talk at the Archäologisches Institut der Ludwig-Maximilians-Universität (henceforth: LMU) München, with the title: "Itálica, die Stadt des Scipio Africanus, Trajan und Hadrian", that I was lucky enough to attend. Rodríguez Gutiérrez has excavated herself at Itálica, and on 4th July 2018 she was so kind as to discuss with me in Munich the Temple of *Divus Traianus* at Itálica, which she had shown in her talk.

This temple was built by Hadrian, together with an entire new city quarter. Its architecture has great similarities with Hadrian's 'Library' at Athens, the architecture of which in its turn is not only based on the gymnasium of Plato's academy at Athens, but also on Vespasian's *Templum Pacis* at Rome and even more so on Domitian's *Templum Gentis Flaviae*. On 20th August 2019, Rodríguez Gutiérrez was so kind as to inform me about recent publications on the *Traianeum* at Itálica.

Cf. *infra*, at Chapter IV.1.1.h) *The new findings by B. E. Borg (2019) concerning the Templum Gentis Flaviae support the hypothesis suggested here that Domitian's obelisk (cf. here Fig. 28) was commissioned for the Iseum Campense. With some observations concerning the Temple of Divus Traianus at Itálica, and concerning the Marble Forum at the Colonia Augusta Emerita (Mérida) in Spain. With The Contributions by Eric M. Moormann, Mario Torelli, and Walter Trillmich, and with The second Contribution by Jörg Rüpke.*

On 17th September, 2018, I had again the chance to meet with Emanuele Ciampini in Rome. We began then to discuss other passages of the hieroglyphic inscriptions of Domitian's obelisk, since I had, in the meantime, started to study the Cancellaria Reliefs and, because all these monuments were made at the order of Domitian, I wanted to know more about their meaning.

**I had already been discussing for quite some time the course of the *Aqua Claudia* from the Caelian towards the Palatine with our good friend, the engineer Edoardo Gautier di Confienigo. On 21st September 2018, both of us had the chance to meet with Francesco Paolo Arata in Rome.**

Arata has not only studied the same subject, but has recently discussed the results of an excavation at the Casina Salvi on the western slope of the Caelian, on the basis of which he has been able to correct the course of this aqueduct between the Caelian and the Palatine. The purpose of this meeting was to discuss with Arata the results of his relevant publication ("*L'acquedotto della Claudia tra il Celio e il Palatino alcune note*", 2012).

**Arata (2012) mentions also Nero's project to supply the structures of his *Domus Transitoria* on the Palatine by building an extension of this aqueduct, but observes that the extant architectural foundations of pylons of this aqueduct at the Casina Salvi can be attributed to Domitian, who thus supplied his**

**'Domus Flavia' / 'Domus Augustana' with water (cf. *infra*, in volume 3-2, in Appendix V.; at Section III.; and in Appendix VI., at Section XII.).**

On 23rd September 2018, Franz Xaver Schütz and I had the chance to pursue these discussions together with Edoardo Gautier di Confiengo and Elettra Santucci, both of whom were, at that stage, in the course of preparing a publication on the subject. - To this I will come back below.

**On 24th September, 2018, I was also able to discuss the Cancellaria Reliefs with Eugenio La Rocca in Rome, who alerted me to the fact that on Frieze A the process of reworking the portrait of Nerva has not been finished. This information became the starting point of research that led to the solution of the question, how many carving phases the Cancellaria Reliefs may have had, and that in turn to historical conclusions drawn from those facts.**

Cf. *infra*, at Chapters I.1.- II.3; II.3.2; II.4.).

I further thank Amanda Claridge for her advice given to me on the Cancellaria Reliefs in a telephone conversation on 17th October, 2018. Long ago, Amanda had also alerted me to the article by Cécile Evers (1991), when that had just come out, in which the author suggests that for the colossal portrait of Constantine the Great in the courtyard of the Palazzo dei Conservatori the head had been reworked from a portrait of Hadrian. In the meantime, Amanda Claridge (1998, 382; *ead.* 2010, 465, quoted *verbatim infra*, in volume 3-2, at Appendix I.a); Section XIII.) has followed Evers's (1991) idea, but without naming Evers, or providing a reference. As it happens, Evers's observation has now become important in the contexts discussed here. Back in 1991, I was completely convinced, whereas now, by writing this text, I had at first serious doubts. Now I follow Evers as well and hope to have found additional arguments in favour of her thesis. Hans Rupprecht Goette has added some more supporting observations concerning Evers's (1991) hypothesis.

**See below, at *The Contribution by Hans Rupprecht Goette on the reworking of the portrait of Hadrian (now Constantine the Great)*, which he would kindly send me on 6th May 2020, and to which I will come back below.**

For all that; cf. below at *A Study on the colossal portrait of Hadrian (now Constantine the Great) in the courtyard of the Palazzo dei Conservatori at Rome (cf. here Fig. 11)*. With *The Contribution by Hans Rupprecht Goette on the reworking of the portrait of Hadrian (now Constantine the Great)*; at Part I. *The statue of Hadrian (now Constantine the Great) in the courtyard of the Palazzo dei Conservatori (cf. here Fig. 11)*, the inscription (CIL VI 974 = 40524; cf. here Fig. 29.1), and the cult-statue of Divus Vespasianus in the Temple of Divus Vespasianus. With *The Contribution by Hans Rupprecht Goette on the reworking of the portrait of Hadrian (now Constantine the Great)*.

On 18th October, 2018, I had the chance to study the plaster casts of the three portraits on the Cancellaria Reliefs that are kept at the Museum für Abgüsse Klassischer Bildwerke, München (M. F. A.), which Daniel Wunderlich (M. F. A.) was so kind as to make accessible to Michaela Fuchs (Archäologisches Institut der LMU München) and to myself. I thank Michaela Fuchs for arranging this visit for us, and for discussing the Cancellaria Reliefs with me on that occasion, as well as on many later ones. I am especially thankful that on 30th July 2019 I had also the chance to learn her opinion concerning the so-called Anaglypha Hadriani (cf. *ead.*: "*Libertas restituta: Hadrians Verfügungen des Jahres 118 n. Chr.*", 2019, and here *infra*, in volume 3-2, at Appendix IV.). And because I was still unable to find the publication by "Siegfried Fuchs 1938", quoted by Hugo Meyer (2011, 175) in which the author was (allegedly) first to realize that the portrait of the emperor on Frieze B represented Vespasian, I sent Michaela Fuchs on 30th January 2020 the relevant passage of my text. When I called her on January 31st, she had already found this article by Siegfried Fuchs (!), but its content turned out to be very surprising. I am indeed very grateful to Michaela Fuchs for finding this text,

especially because she looked for it in a place, which I myself would never have checked (cf. *infra*, at Chapter I.1., at the Section: *The Siegfried Fuchs Saga*).

In addition, Michaela Fuchs was kind enough to send me, on request, on 9th February 2020, her article, in which she discusses the portrait of Hadrian from Hierapydna at Istanbul (cf. *infra*, in volume 3-2, at *Appendix IV.c.2*), and here **Fig. 29**), as well as the inscription *CIL VI 974 = 40524* (cf. here **Fig. 29.1**), which belonged to a statue, dedicated by the Senate and the Roman People to Hadrian in commemoration of his victory in the Bar Kokhba Revolt ("Ein Ehrenbogen für Hadrian in Rom: Würdigung eines vielseitigen Kaisers am Ende seines Lebens", 2014).

Cf. below, at *A Study on the colossal portrait of Hadrian (now Constantine the Great) in the courtyard of the Palazzo dei Conservatori at Rome* (cf. here **Fig. 11**). With The Contribution by Hans Rupprecht Goette on the reworking of the portrait of Hadrian (now Constantine the Great); at Part I. *The statue of Hadrian (now Constantine the Great) in the courtyard of the Palazzo dei Conservatori* (cf. here **Fig. 11**), the inscription (*CIL VI 974 = 40524*; cf. here **Fig. 29.1**), and the cult-statue of Divus Vespasianus in the Temple of Divus Vespasianus. With The Contribution by Hans Rupprecht Goette on the reworking of the portrait of Hadrian (now Constantine the Great); below, at *A Study on Hadrian's portrait-statue from Hierapydna* (cf. here **Fig. 29**); and *infra*, in volume 3-2, at *Appendix IV.c.1.*); and at *Appendix IV.c.2.*).

My thanks are also due to Sandra Schmeck (Archäologisches Institut, LMU München), who was so kind as to provide me with professional scans that I needed for this publication, and to Maria Rüegg for providing me with photocopies of a publication I needed (both of the same institute). Further thanks go to Paul Scheduling and to Viktoria Räuchle, and to the Librarian Frau Barbara Birk (of the same institute), for kindly supporting this *Study* in many ways.

My colleagues Maria Beck and Andrea Beigel, the secretaries of the Lehr- und Forschungseinheit Wirtschaftsgeographie at the Department of Geography of the LMU until 30th September 2021, were so kind as to provide me with library services. My thanks are also due to the 'Fernleihteam' of the Hochschule München, who was again able to provide me with a rare publication.

**On 18th November 2018, the ancient historian Peter Herz, whose collaborator I have been at the University of Regensburg (2006-2009), was so kind as to explain to me in a telephone conversation the circumstances, under which Nerva had adopted Trajan, and when exactly that had happened. And on 18th and 23rd July 2019, he helped me with an inscription of the Arval brethren (*CIL VI 2059.11*).**

**Cf. below, at *The first Contribution by Peter Herz on the inscription (*CIL VI 2059.11*), which reports on a meeting of the Arvel brethren on 7th December 80 at the Temple of Ops in Capitolio, among them Titus and Domitian: Titus vows to restore and dedicate what would become Domitian's (fourth) Temple of Iuppiter Optimus Maximus Capitolinus.***

On 18th November 2019, I called Peter Herz again, this time we discussed Hadrian's destruction of debt records in AD 118. Since I was wondering, how the emperor had managed this enterprise, and which consequences it might have had financially, it turned out that Peter Herz had just finished a manuscript on the relevant details of the Imperial household ("*SPQR. Die Verwaltung während der römischen Kaiserzeit*", Arbeitstitel; forthcoming), from which he has kindly allowed me to quote here (cf. *infra*, in volume 3-2, at *Appendix IV.b*).

**When it comes to ancient coins, I have, as long as I can remember, asked and immediately received help from our good friend Angelo Geißen, with whom I studied numismatics at the Universität zu Köln since 1975.**

**I thank Angelo Geißen this time for discussing with me in a telephone conversation on 26th November 2018 the problem of distinguishing the iconographies of *Virtus* and *Dea Roma* from each other, as well as 'the fundamental problem of the Flavians', as he put it, that of 'the legitimization of their reign': his remark has actually made me change the title, as well as the avenue of research of this *Study* accordingly.**

On 3rd July 2019, I had in addition to this the chance to discuss with Angelo Geißen on the telephone some details of the controversy concerning Domitian's escape from the *Capitolium* on 19th December AD 69, and on 23rd July 2019, he was so kind as to send me the link to here **Fig. 38**, a bronze drachma, issued by Antoninus Pius in Alexandria in 144/145 AD. In addition to this, I am very thankful that he has read an earlier version of this entire text.

Since, back in 2015, I had discussed with Hans Rupprecht Goette the provenance of the statuette of 'Euripides' in the Louvre (cf. here **Fig. 12**), Hans was kind enough to write me by E-mail on 19th December 2018 that he had in the meantime presented his ideas concerning this statuette in various talks and that he was in the course of writing an article about his findings. - As I only realized much later, the discussions with Goette about this 'Euripides'-statuette have contributed to the very long and convoluted discussions with several scholars that has finally led to my hypothesis of identifying the statue of Jupiter in the Hermitage of St. Petersburg (cf. here **Fig. 10**) as a copy of the cult-statue of Jupiter in Domitian's (fourth) Temple of Iuppiter Optimus Maximus Capitolinus. - To all of this I will come back below.

Back in Rome in the spring of 2019, I asked on 25th February Giuseppina Pisani Sartorio, who has always greatly supported my studies, for help concerning the Arch of Titus in the *Circus Maximus*, which she did by contacting Paola Cancio Rossetto for me. The latter had actually been one of the first among those who have recently excavated the Arch of Titus in the *Circus Maximus*, and on 1st March 2019, Paola Cancio Rossetto wrote me an E-mail, kindly providing me with the recent publications on the subject (cf. *infra*, at Chapter I.3.2.).

**My thanks are also due to Patrizio Pensabene, whom I have met on 27th February 2019 in Rome. Since I knew from Sibel Kioukioukali who, during her studies at the Universität Tübingen, had been involved in 2009 in his excavation of the podium of the Temple of Iuppiter Invictus on the Palatine (also identified with the Temple of Iuppiter Stator, Iuppiter Victor, and with the Temple of Iuppiter Propugnator), I was interested to know, whether he had published in the meantime his findings.**

Pensabene kindly provided me with an update on his relevant work, and on 11th November 2019, I received his two articles on the subject, which he has written together with Vincenzo Graffeo: "Il Tempio sul cd. [cosiddetto] Clivo Palatino" (2014), and: "(LAZIO) I. ROMA - *Indagini sul Palatino: fronte della Domus Flavia e c.d. [cosiddetto] Tempio di Iuppiter Invictus*" (2016-2017). I am very grateful that Pensabene shared this information with me, since thanks to these publications, he and Graffeo have been able to solve some major topographical problems (cf. below, in Chapter *The major results of this book on Domitian*; and *infra*, in volume 3-2, in *Appendix VI.*, at Section X.). - To this I will come back below.

**Edoardo Gautier di Confiengo was kind enough to meet with me on 4th March 2019 to discuss again his thoughts concerning the course of the *Aqua Claudia* from the Caelian to the Palatine and he brought along the manuscript of the forthcoming article which he wrote with Elettra Santucci ("La distribuzione di *Aqua Claudia* e *Anio Novus* in Roma. Un tentativo di ricostruzione"; cf. *infra*, in volume 3-2, at *Appendix V.; Section III.*).**

To this I will come back below. Another subject, that both of us are interested in, is Nero's *cenatio rotunda*, that the emperor built at his *Domus Aurea*, and which has been identified with a spectacular structure on the Palatine within the former Vigna Barberini. This building had later disappeared in the course of building that part of Domitian's Palace which would accommodate his 'Adonis garden' (the DI(aeta) (a)DONAEA, which is visible on the Severan Marble Plan; cf. *infra*, in Chapter *V.1.i.3.b*); at Section II.), as well as

Domitian's *Tabularium principis*, built for the documents previously kept at the *Tabularium publicum* on the Capitoline (cf. *infra*, in Chapter II.3.1.c), and *infra*, at volume 3-2, in Appendix IV.b.2.)).

Edoardo brought along also his manuscript on the *cenatio* ("La macchina della cenatio rotunda neroniana [Suet. Nero 31]. Ipotesi costruttive", forthcoming), as well as the most recent publication on the subject by the excavator of this structure, Françoise Villedieu ("La *cenatio rotunda* de Néron : état des recherches", 2016). Both the projects of Gautier di Confiengo mentioned here are closely related since, in his opinion, the mechanism, which made Nero's *cenatio rotunda* turn around its own axis, was powered by the waters of the *Aqua Claudia*. If so, Nero had *inter alia* for that purpose added the above-mentioned branch of this aqueduct that led from the Caelian to the Palatine.

As a matter of fact, Nero's *coenatio rotunda* and its predecessors was also the subject of studies undertaken by Filippo Coarelli and first presented by him at a Conference in Rome, which Franz Xaver Schütz and I had the chance to attend ("I precedenti della *praecipua cenationum rotunda*"). This Conference was organized "Nell'ambito del WORKSHOP organizzato dal Master Sapienza *Architettura per Archeologia Progetti di valorizzazione del patrimonio culturale*", had the title: *Convegno di studi alle Terme di Diocleziano*, and was held at the Museo Nazionale Romano, Terme di Diocleziano, on 24th September 2015. - As we shall see in the following, the above-mentioned research, conducted on Nero's *cenatio rotunda* by Françoise Villedieu, Edoardo Gautier di Confiengo and Filippo Coarelli, has all appeared in the meantime in a volume, edited by Villedieu (*La Vigna Barberini*, III. *La cenatio rotunda*, 2021). Cf. *infra*, at Chapter V.1.i.3.b); at Section II.

**On 7th March 2019, I met again with Emanuele M. Ciampini in Rome. I now informed him about my idea to compare in this Study the political message, visualized on Frieze B of the Cancelleria Reliefs (cf. here Fig. 2; Figs. 1 and 2 drawing), with a section of the hieroglyphic inscriptions of Domitian's obelisk in which, in my opinion, the same message is *expressis verbis* formulated: the *Autokrator* [emperor] *Caesar Domitianus Augustus* has received his reign from his father, *Divus Vespasianus*, and from his brother, *Divus Titus* - as I had just learned in his book (cf. E.M. CIAMPINI 2004, discussed in detail *infra*, at Chapter IV.1., and in Chapter *The major results of this book on Domitian*).**

Ciampini was so kind as to tell me that this is a formula that defines the legitimation of the new king, which is known from several documents of the Ptolemaic period. I am especially grateful that he has taken the time to write upon my request a short text, in which he summarizes his relevant observations, which he kindly explained to me on that occasion, and that he has generously allowed me to publish here. His text shows that the meanings of those hieroglyphic texts are much more complex than I had been able to understand myself by reading his translation of them.

Cf. below, at *The first Contribution by Emanuele M. Ciampini: La regalità domiziana: una nota egittologica*.

On 8th March of 2019, I again had the chance to discuss the Cancelleria Reliefs in front of the originals with Giandomenico Spinola and Claudia Valeri, with whom I could also discuss the most recent publication of those reliefs by Stephanie Langer and Michael Pfanner (2018, 18-90; cf. *infra*, at Chapter V.1.) - which at the time I had not as yet completely read. I wanted to see the originals of the Cancelleria Reliefs another time, in order to check several details on both friezes, and especially the amazon-like figure of Frieze A, and the heads of the emperor on Frieze B, and of the togate youth standing in front of him.

I agree with Filippo Magi, Giandomenico Spinola and Claudia Valeri that the amazon-like figure on Frieze A is the *Dea Roma*, that the head of the emperor on Frieze B was from the very beginning a portrait of Vespasian, and that the togate youth standing in front of him is his son Domitian (cf. here Figs 1 and 2 drawing: figures 14 [Vespasian]; 12 [Domitian]).

Paolo Liverani, with whom I met on 14th March 2019 in Rome, was so kind as to discuss with me the hypotheses suggested here, and he alerted me to some details of the Cancellaria Reliefs that I had neglected so far. Cf. *infra*, at Chapter I.2.1.c)).

My thanks are also due to Francesca Deli and Cecilia Carponi, the Assistant Librarians of the British School at Rome, who on 14th March 2019, were kind enough to provide me with scans of the reconstructions of the Arch of Titus in the *Circus Maximus*. On 28th November 2019, Francesca Deli was, in addition to this, so kind, as to make a scan of the reconstruction drawing of the Extispicium Relief by A.J.B. Wace (1907, pl. 29; cf. here **Figs. 16-18**) of the Capitoline Triad that appears in the pediment of the Temple of Iuppiter Optimus Maximus Capitolinus on the 'Extispicium Relief' (cf. here **Figs. 16-18**), as well as on Marcus Aurelius's sacrifice panel (cf. here **Fig. 19**) for me, both of which represent a sacrifice in front of Domitian's (fourth) Temple of Iuppiter Optimus Maximus Capitolinus.

Cf. *infra*, n. 144, in Chapter I.1.; at *A Study on Domitian's cult-statue of Iuppiter Optimus Maximus Capitolinus* (cf. here **Fig. 10**)); and *infra*, in volume 3-2, at *Appendix I.g.3.*); and at *Appendix I.g.4.*).

And on 5th March 2020, Francesca Deli, Assistant Librarian at the British School at Rome, scanned for me the plan of the Orti Farnesiani on the Palatine by Silvano Cosmo (1990, Fig. 8 [= here **Fig. 39**]), in which the author marks the areas, where Francesco Bianchini and Pietro Rosa had excavated.

Cf. *infra*, Chapter *Preamble: Domitian's negative image*; at Section II. *Conclusions: Domitian's representations of his military successes and his claims to be of divine descent and to possess a divine nature*; *infra*, in Chapters V.1.i.3.b); VI.3.; and in *The major results of this book on Domitian*; and *infra*, in volume 3-2, in *Appendix IV.c.1.*); and in *Appendix VI.*, at Section I.

Asuman Lätzer-Lasar was kind enough to visit me on 19th March 2019 in Munich to share with me her findings concerning the cult of Magna Mater on the Palatine, the Caelian and at the 'Phrygianum Vaticanum' (cf. *infra*, in volume 3-2, at *Appendix I.d.*)).

**On 4th April 2019, I asked the religious historian Jörg Rüpke for advice, who has already in the past kindly discussed with me subjects related to 'pagan' religions. This time I asked him, whether Ranuccio Bianchi Bandinelli's (1946-48, 259) statement is based on any literary sources or other ancient documents, that on Frieze B of the Cancellaria Reliefs appear on purpose only five (of altogether six) Vestal Virgins, because one of them had always to stay behind in the Temple of Vesta, to keep the fire going. There seems to be no such record for this, as Rüpke replied, but his answer was so interesting that I have asked him to give me his permission to publish it here, which he was kind enough to grant.**

**See below, at *The first Contribution by Jörg Rüpke***

Cf *infra*, at Chapter V.1.d) *The reconstruction, in my opinion erroneous, of the length of Frieze B of the Cancellaria Reliefs by S. Langer and M. Pfanner (2018) (cf. here **Figs. 1 and 2 drawing**) and the correct reconstruction of the length of Frieze B by F. Magi (1945), whom I am following here (cf. here **Figs. 1; 2; **Figs. 1 and 2 drawing**; and **Figs. 1 and 2 of the Cancellaria Reliefs, drawing, 'in situ'**). With a discussion of how many Vestal Virgins we might expect to appear at public ceremonies, such as the one shown on this panel (cf. here **Fig. 2**), and with *The first Contribution by Jörg Rüpke.****

I am in addition to this very thankful that Jörg Rüpke too has read an early version of this book manuscript.

**When I (for the first time) thought to have finished writing this *Study*, reached me on 26th April 2019 the *Proceedings of the Iseum Campense Conference at Rome in May 2016*, edited by Miguel John Versluys, Kristine Bülow Clausen and Giuseppina Capriotti Vittozzi (2018a, *The Iseum Campense from the Roman***

***Empire to the modern Age Temple - Monument - Lieu de Mémoire*), which Miguel John Versluys was kind enough to provide.**

Many subjects discussed in this volume appear also in this *Study*. As was already the case at the conference, and in many discussions with these scholars since then, their printed essays have again greatly improved my understanding of these subjects. I wish to especially single out Martin Bommas, Irene Bragantini, Frederick E. Brenk, Filippo Coarelli, Valentino Gasparini, Alexander Heinemann, Katja Lembke, Trevor Luke, Eric M. Moormann, Stefan Pfeiffer, Laurent Bricault and Richard Veymiers, as well as Miguel John Versluys, whose accounts reached me just in time to be discussed here: for all of this important help I am very grateful indeed!

On 3rd May 2019, I had the chance to discuss my ideas, presented in this *Study*, with Hans-Ulrich Cain in Munich, to whom I am very thankful for helping me to interpret the inscription *PP FECIT* (CIL VI, 40543) on an architrave block, found together with the Cancellaria Reliefs, that may have belonged to the same monument or building. On the same occasion, we discussed our research related to the *Campus Martius*. - To this I will come back below.

Cf. *infra*, at Chapters II.3.1.b); V.2.; V.3.; VI.3; and at *The major results of this book on Domitian*.

**On 9th May 2019, I fortunately had another chance to discuss the Cancellaria Reliefs with Giandomenico Spinola and Claudia Valeri in the Vatican Museums. This visit became necessary, because I had found in the meantime more observations by Langer and Pfanner (2018) that I wanted to verify myself in front of the original reliefs, and that I wished to discuss with Spinola and Valeri, who deserve my heartfelt thanks for their valuable contributions to this long discussion, in which we have tried together to better understand those panels. This time I wanted to know, whether Langer and Pfanner are right in assuming an additional slab between slabs B1 and B2 on Frieze B.**

**Thanks to our additional observations, which were unknown to Stephanie Langer and Michael Pfanner, Giandomenico Spinola, Claudia Valeri and I have been able to disprove their hypothesis concerning an additional slab for Frieze B (cf. *infra*, at Chapters V.1.d); and at *The major results of this book on Domitian*).**

At the same time, these new findings demonstrate that Magi's reconstruction of the length of Frieze B proves to be correct (cf. here **Fig. 2; Figs. 1 and 2 drawing**). This verification of Magi's reconstruction of the length of Frieze B is in its turn of importance for any attempt to visualize the hypothesis, suggested by Massimo Pentiricci (2009; cf. *infra*, at Chapter I.3.) - who follows with this idea some earlier scholars - according to which both friezes of the Cancellaria Reliefs should be identified as the two horizontal panels in the bay of an arch. See our own visualization of this idea, presented here (cf. here **Figs. 1 and 2 of the Cancellaria Reliefs, drawing, 'in situ'**, and below at Chapters I.3.2.; V.1.d); and at *The major results of this book on Domitian*), of which we can now say that it is thus based on correct assumptions.

**The other detail I wanted to study again on 9th May 2019 in front of the original was the neck of the emperor on Frieze B. Langer and Pfanner (2018; cf. *infra*, at Chapter V.1.h.2.)) assert that Vespasian's larynx cuts through a wrinkle at the represented man's neck, an alleged fact, which, in their opinion, proves that this wrinkle belongs to a presumed earlier portrait, and that Vespasian's larynx was only carved at a second moment. Langer and Pfanner, therefore, conclude that Vespasian's entire head has been recut from this alleged earlier portrait. Their conclusion is based on a wrong observation though: in front of the original is clearly visible - with and without the aid of a lamp - that the wrinkle in question was instead cut *after* the larynx was sculpted. What we see is, therefore, the first and only larynx ever carved on this figure's neck - a fact, which proves beyond any doubt that the extant portrait of Vespasian is the original head of the emperor on Frieze B (cf. *infra*, at Chapters V.1.h.2.); and at *The major results of this book on Domitian*).**

**Consequently, also Magi's assumptions concerning the head of Vespasian prove to be correct, which he took for the original head of the represented emperor on Frieze B (cf. *id.* 1939, quoted *verbatim infra*, in n. 112, at Chapter I.1.; and *id.* 1945).**

Besides, Rita Paris (1994b) had already found long ago an argument that proves beyond any doubt that the emperor on frieze B was from the very beginning Vespasian. In her discussion of one of the marble reliefs of the *Templum Gentis Flaviae*, which shows, in my opinion, Vespasian's *adventus* into Rome in October of AD 70, Paris mentions the *corona civica* Vespasian is wearing on this panel (cf. *infra*, at Chapter V.1.i.3.a) and here **Fig. 33**). Paris (1994b, 81-83), in her description of this relief, stresses that the decoration with this specific wreath was *a*) regarded by Pliny (*HN* 16,3) as "l'emblema più fulgido del valore militare" ('the most splendid symbol of military prowess'), highly superior to the decorations with all other known crowns granted for military victories, and *b*) that Vespasian had been honoured this way because, by conducting his victorious campaigns, he had put an end to the civil war of AD 68-69. - Exactly as Augustus before him, who had received the *corona civica* for likewise having ended a civil war.

Cf. *infra*, at Chapter V.1.i.3.a) and here **Fig. 35**); and at Chapter *The major results of this book on Domitian*.

On 27th August 2019, Florian Ebeling was so kind as to send me the recently published volume 4 of *Aegyptiaca. Journal of the History of Reception of Ancient Egypt* (2019). Especially interesting for the subjects discussed in this *Study*, is Eleanor Dobson's essay ("Cross-Dressing Scholars and Mummies in Drag: Egyptology and Queer Identity", 2019). It made me realize that, unfortunately, I cannot offer here any relevant thoughts concerning Domitian's famous disguise as an *Isiacus* or as an Isis priest on 19th December AD 69, let alone compete with Dobson's deep insights into such enterprises, that may have complex consequences for all individuals involved.

But because I side with those, who believe the accounts of Suetonius (*Dom.* 1) and Tacitus (*Hist.* 3,74,1), according to which Domitian *did* disguise himself this way, I do hope that in the future some scholar will study also this important aspect of Domitian's 'providential escape' (so Josephus, *BJ* 4,11,4). Especially because Domitian, when himself emperor, would become known for his stratagems, as such manoeuvres are precisely called in military contexts.

Cf. below, in Chapter *Preamble: Domitian's negative image*; at Section III. *My own thoughts about Domitian*; at point 1.); and *infra*, in volume 3-2, at Appendix I.c); Appendix I.d.1.a), and Appendix I.i).

**On 31st August 2019, John Pollini was so kind as to send me, by request, his recent publication on the Iseum Campense ("Contact Points: The Image and Reception of Egypt and Its Gods in Rome", 2018), and since he knew that I wished to integrate his relevant findings into this *Study* about the Cancellaria Reliefs, he also provided me with a copy of another article ("The 'lost' Nollekens Relief of an imperial sacrifice from Domitian's Palace on the Palatine: its history, iconography and date", 2017b; cf. here Fig. 36). This article I had planned to check anyway (cf. below, n. 72, in Chapter I.1.), and both texts have turned out to add important information to many of the subjects discussed here.**

Cf. *supra*, at *What this Study is all about*; and *infra*, at Chapters I.1.; I.2.; I.2.1.; I.2.1.c); I.3.2., II.1.e); II.3.1.c); II.4.; *ad b*); III.; IV.1.; V.1.b); V.1.i.3.); especially at Chapter V.1.i.3.b) J. Pollini's discussion (2017b) of the allegedly 'lost' Nollekens Relief (cf. here **Fig. 36**), which he compares with the Cancellaria Reliefs (cf. here **Figs. 1; 2**) and Domitian's 'Domus Flavia' / Domus Augustana. With The Contribution by Amanda Claridge; at Chapters VI.3.; and at *The major results of this book on Domitian*; and *infra*, in volume 3-2, at Appendix III); Appendix IV.c.1.); Appendix IV.c.2.); Appendix IV.d.2.f); Appendix IV.d.4.b); and Appendix VI.; at Section I. - To this I will come back below.

**Pollini's article (2017b) has turned out to be so important for this *Study*, because he has compared the Cancellaria Reliefs (cf. here **Figs. 1; 2**) with the Nollekens Relief (cf. here **Fig. 36**), both of which have a lot**

in common. Pollini's article (2017b) and the new book by T.P. Wiseman (2019; cf. *infra*) have, in addition to this, made me enlarge the map Fig. 73 considerably and to add *Appendix V.* to this *Study* (cf. *infra*, in volume 3-2), in which the toponyms, marked on this map, are explained.

On 13th September 2019, Franz Xaver Schütz and I visited the recently opened, very elegant market halls, called *Il Nuovo Mercato del Testaccio* at Rome, together with Francesco Buranelli and Susanna Le Pera, who kindly presented us with Francesco's recent exhibition-catalogue (*L'Arte di Salvare l'Arte. Frammenti di storia d'Italia. Mostra organizzata in occasione del 50° anniversario dell'istituzione del Comando Carabinieri Tutela Patrimonio Culturale 1969 - 2019, 2019*).

Cf. *infra*, in volume 3-2, at *Appendix I.g.4.*); and *Appendix IV.c.1.*).

As I only realized much later, a marble Capitoline Triad in statuette format is published in Buranelli's catalogue (2019, 73; cf. here Fig. 13), on display in the Museo Civico Archeologico 'Rodolfo Lanciani' at Guidonia Montecelio (Roma). This Capitoline Triad has been identified as copying the cult-images in Domitian's (fourth) Temple of Iuppiter Optimus Maximus Capitolinus.

Cf. *infra*, at *A Study on Domitian's cult-statue of Iuppiter Optimus Maximus Capitolinus* (cf. here Fig. 10); at Part II. *The Capitoline Triad in statuette format at Guidonia Montecelio (Roma), Museo Civico Archeologico 'Rodolfo Lanciani'* (cf. here Fig. 13) and the colossal statue of Jupiter at the Hermitage (cf. here Fig. 10). - To this I will come back below.

Sylvia Diebner, who has recently studied the foreign academies at the Valle Giulia, as well as the monuments dedicated to foreigners in the Valle Giulia and in the adjacent Villa Borghese, was so kind as to send me, by request, her relevant article ("Austria in Urbe Österreichs Adresse in der Ewigen Stadt una dimora terrena dell'Austria nella Città eterna", 2018). On 15th September 2019, and on 23rd September, Franz Xaver Schütz and I were able to discuss her research with her in Rome. As I had hoped, Diebner has also studied in this text the equestrian statue of Simon Bolívar (cf. here Fig. 40) in the context of the "*memorial garden di Valle Giulia*", as it has recently been called. A work of the Italian sculptor Pietro Canonica (1934), this monument is on display on the Piazzale Simon Bolívar at the Valle Giulia.

Cf. *infra*, at Chapter VI.2; and *infra*, in volume 3-2, at *Appendix I.d.1.*), and here Fig. 40.

Because we know that Domitian restored the Iseum Campense after its destruction in the great fire of AD 80, I have added to this *Study* a discussion of the controversy, when exactly the Iseum Campense was first built (cf. *infra*, in volume 3-2, at *Appendix III.*).

On 17th September 2019, Franz Xaver Schütz and I had again the chance to meet with Eugenio La Rocca in Rome, whom I have asked for advice in this question. He agreed with me that my further topographical arguments sound convincing. With these I hope to support the early dating of the sanctuary Iseum Campense, that is to say, shortly after the relevant decision by the triumvirs in 43 BC (Dio Cassius 47,15,4 or 47,16,1, depending on which edition one uses). This has been suggested by Filippo Coarelli since (1982, 64) and is maintained by him in his most recent publications on the subject (cf. *id.* 2018; 2019b). See also *infra*, in volume 3-2, at *Appendix III.*

On 17th September 2019, I also asked Eugenio La Rocca for advice concerning the Extispicium Relief in the Louvre, which shows a sacrifice in front of Domitian's (fourth) Temple of Iuppiter Optimus Maximus Capitolinus. Cf. *infra*, n. 144, in Chapter I.1.; below, at *A Study on Domitian's cult-statue of Iuppiter Optimus Maximus Capitolinus*, and here Figs. 16-18); and *infra*, in volume 3-2, at *Appendix I.g.3.*); and at *Appendix I.g.4.*); and concerning the Italian sculptor Pietro Canonica (1869-1959), whose works are discussed in this *Study* (cf. *infra*, at Chapter VI.2.; and *infra*, in volume 3-2, at *Appendix I.d.1.*)). On 11th November 2019, we could pursue these inquiries, when Franz Xaver Schütz and I met with La Rocca in Munich.

Giandomenico Spinola and Claudia Valeri, after receiving my updated manuscript that comprised now all relevant additions concerning our observations at the Cancellaria Reliefs, were so kind as to make on 19th September 2019 another appointment with me in front of those panels, to discuss again all the results obtained. On that occasion, Giandomenico Spinola accompanied me to these friezes.

In the course of our discussions, Giandomenico Spinola was able to further confirm Magi's observations concerning the Vestal Virgin figure 6 on frieze B by realizing that the large toe of her right foot is visibly indicated under the soft leather of her shoe. Thus Magi is proven right (cf. *id.* 1945, 27-28), who wrote that what we see of this figure 6 on slab B2 is her right foot, and that this now heavily destroyed Vestal Virgin faced the beholder (cf. Figs. 1 and 2 drawing: figure 6 on slab B2).

Langer and Pfanner (2018) erroneously suggest instead that Magi had asserted this foot belonged to the Vestal Virgin figure 5 on slab B1, but this Vestal Virgin turns her back to the beholder (cf. Figs. 1 and 2 drawing: figure 5). Langer and Pfanner's wrong observation concerning the Vestal Virgins figure 5 (and thus concerning also figure 6) is one of the reasons, why they postulate for frieze B an additional slab between slabs B1 and B2 (cf. *infra*, at Chapter V.1.d)). Spinola and I discussed on this occasion again all the peculiarities of both panels of the Cancellaria Reliefs, observed at our previous meetings, in addition, he was so kind as to photograph all these details for me; those photographs are kept in my archive.

On 20th September 2019, Franz Xaver Schütz and I were lucky enough to discuss Domitian's escape from the *Capitolium* with Claudio Parisi Presicce in Rome. To my great surprise, Parisi Presicce told us that he has recently conducted an excavation behind the 'ospedale teutonico' (*i.e.*, the 'Casa Tarpea') on the *Capitolium*. The spectacular finds that occurred in this excavation, accompanied by in-depth research concerning all previous excavations of the four Temples of Iuppiter Optimus Maximus Capitolinus at this site, are published in the exhibition catalogue *Campidoglio mito, memoria, archeologia*, edited by Parisi Presicce and Alberto Danti (2016) - that I had managed to overlook so far. Parisi Presicce was so kind as to present us with a copy of this catalogue. Fortunately the discussions of those finds could still be integrated into the relevant Chapters of my text.

Cf. *infra*, in volume 3-2, at Appendix I.d); Appendix I.e); and Appendix I.g).

These finds comprise architectural terracottas of the Jupiter temple(s), dating between the Archaic and the Republic, which prove that the first two Jupiter Capitolinus temples were much smaller than hitherto believed. Also the research focused on the excavated remains of the temples at this site has come to the result that only Domitian's (fourth) Jupiter temple had the enormous size that some scholars had previously also attributed to the first three Jupiter temples, that had been erected at the same site.

Parisi Presicce, who is planning further excavations in the area in question, told us also that he believes that to Domitian's Jupiter temple belonged not only one altar, as I had so far suggested in my text (cf. *infra*, in volume 3-2, at Appendix I.d)), but instead altogether three altars (!); in an telephone conversation of 28th October 2019, Parisi Presicce has kindly allowed me to mention all this here.

See now also Claudio Parisi Presicce ("L'istituto di Corrispondenza Archeologica 190 anni dopo: la prospettiva italiana", 2019); and Ortwin Dally ("L'istituto di Corrispondenza Archeologica 190 anni dopo: la prospettiva tedesca", 2019); as well as Claudio Parisi Presicce and Eloisa Dodero ("Il Campidoglio di Domiziano", 2023).

On 21st September 2019, I had the chance to discuss the above-mentioned ideas concerning the Iseum Campense with Emanuele M. Ciampini in Rome, who, exactly like Franz Xaver Schütz, agrees with me that the peculiarities of the construction of the *Aqua Virgo* in the area in question are a strong argument for the assumption that "C'era qualche cosa" ('there was something', so Ciampini), when the *Aqua Virgo* was being built this way (or that something was already planned for this area at that stage), namely the Iseum Campense. - I have chosen Ciampini's line as the first epigraph of my Appendix III; cf. *infra*, in volume 3-2.

On 25th September 2019, Franz Xaver Schütz and I met with Luca Sasso D'Elia in Rome, and I myself with Giuseppina Pisani Sartorio, with both of whom I could discuss these ideas as well, both of whom likewise agreed with me.

**Finally on 26th September 2019, Franz Xaver Schütz and I met with Filippo Coarelli in Rome, who like these other friends and colleagues was of the opinion that my arguments are sound (for a detailed discussion; cf. *infra*, in volume 3-2, at Appendix III.).**

Coarelli had just finished writing his forthcoming monograph, which has appeared in the meantime (*Initia Isidis: L'ingresso dei culti egiziani a Roma e nel Lazio*, 2019b), of which he was so kind as to present us with the relevant file, and in which he addresses again the problem of the dating of the Iseum Campense. On that occasion, we had also the chance to discuss with Coarelli all my other questions concerning this sanctuary, as well as my hypotheses concerning Domitian's escape from the *Capitolium* on 19th December AD 69 (cf. *infra*, in volume 3-2, at Appendix I).

**As usual in discussions with Coarelli, he contributed valuable information, in this case concerning the meaning of the epithet of that Isis, who had an altar behind the Temple of Ops in Capitolio - Isis *deserta*. Namely that this is the 'widowed' goddess Isis, who has lost her husband Osiris, and who, according to the relevant myth, is now 'in search of her husband Osiris'. This information turned out to be decisive in my effort to solve the whole problem. This is for the following reasons.**

Ops (whom the Romans equated with Isis) and Saturn (whom the Romans equated with Osiris) were believed to be spouses. Another cult of Ops, called *ad Forum*, was located at the Temple of Saturnus, likewise called *ad Forum*, facts, which can also explain that their festivals were 'close to each other': the *Saturnalia* began on 17th December, followed by the *Opalia* on the 19th, which were celebrated at Ops *ad Forum*. I learned from Alfred Grimm (1997, 128) that Domitian's escape occurred on 19th December, and that this was not a festival of Isis but the day of the *Opalia*, and that Ops could be equated with Isis. But contrary to Grimm (1997, 128), I believe those literary sources (Suetonius, *Dom.* 1, and Tacitus, *Hist.* 3,69-86,3), which, describing Domitian's escape from the *Capitolium*, state that he managed to do so by disguising himself as an *Isiacus* or as a priest of Isis. I, therefore, suggest that this procession, which Domitian joined, had come down from the Temple of Ops in *Capitolio* to the Roman Forum that day.

Cf. below, in Chapter *Preamble*; Section III., at point 3.); and *infra*, in volume 3-2, at Appendix I.d); Appendix I.f.1.); Appendix I.g.1.); and Appendix II.a).

Since in connection with Domitian's escape from the *Capitolium*, I was studying the statue of the mule Scudela by Pietro Canonica (here Fig. 41; cf. Fig. 42, for the inscription on the base of this statue, and for the statue of the Alpino, who is accompanying Scudela - or vice versa), I asked also Coarelli my relevant questions, and he was able to answer one of them, having himself observed the behaviour of those animals.

**On 14th October 2019 reached me T.P. Wiseman's new book (*The House of Augustus: A Historical Detective Story*, 2019), which he was so kind as to present us with, and that I had been waiting for since quite some time. Fortunately it arrived in time, so that I could still discuss those of his findings that relate to subjects discussed in this *Study*. I hope to have added some observations that further support his hypotheses.**

Cf. *infra*, in Chapter V.1.i.3.a); and *infra*, in volume 3-2, in Appendix I.c); Appendix I.e); Appendix IV.c); Appendix V.; at Section IX; and Appendix VI., at Sections I.; III., IV.; V.; VI.; IX.; and XI.

On 29th March 2020, T.P. Wiseman was kind enough to send me his latest discussion of Romulus ("Rome's legendary foundations: Could a newly discovered sarcophagus really be that of Romulus?", 2020).

On 26th November 2019 in Rome, Hugo Brandenburg and Angelika Geyer were so kind as to present me with the already mentioned book by Brandenburg: *Le prime chiese di Roma IV-VII secolo* (2013).

On page 16, in his discussion of Constantine the Great, which is illustrated with a photo of the colossal acrolithic portrait of the emperor (cf. here Fig. 11), Brandenburg states that Constantine "ponendosi sotto la protezione della divinità [*i.e.*, the god of the Christians] per preservare, seconda la tradizionale concezione romana, la propria vittoria [in AD 312 in his battle against Maxentius at the *Pons Milvius*] nelle vesti di *imperator invictus*, e quindi la prosperità dell'impero".

'Invincibility' will loom large in this *Study* (see especially below, at Chapter *Preamble*; in *A Study on the colossal portrait of Hadrian (now Constantine the Great) in the courtyard of the Palazzo dei Conservatori at Rome* (cf. here Fig. 11). With The Contribution by Hans Rupprecht Goette on the reworking of the portrait of Hadrian (now Constantine the Great); at Part I. *The statue of Hadrian (now Constantine the Great) in the courtyard of the Palazzo dei Conservatori* (cf. here Fig. 11), the inscription (CIL VI 974 = 40524; cf. here Fig. 29.1), and the cult-statue of *Divus Vespasianus* in the Temple of *Divus Vespasianus*. With The Contribution by Hans Rupprecht Goette on the reworking of the portrait of Hadrian (now Constantine the Great); at *A Study on Hadrian's portrait-statue from Hierapydna* (cf. here Fig. 29); at Chapter *The major results of this book on Domitian*; and *infra*, in volume 3-2, at *Appendix IV.c.1.*); and *Appendix IV.c.2.*)).

This *virtus* was on principle expected of Roman generals, and later also of Roman emperors. Only the gods could grant victory, of course, and that was *the* prerequisite for the leaders in question to create 'peace through victory' (cf. J. POLLINI 2017b, 124, with n. 118) - a state of affairs which in its turn resulted (in theory) in prosperity and *felicitas* of their subjects.

Although at first only interested in pursuing the doctrine 'invincibility' over time, Hugo Brandenburg's and Angelika Geyer's present of Brandenburg's book *Le prime chiese di Roma IV-VII secolo* (2013) has thus become the starting point of research on the colossal acrolithic portrait of Constantine the Great itself, the fragments of which are on display in the cortile of the Palazzo dei Conservatori (cf. here Fig. 11). Its head has been reworked from a portrait of an earlier emperor, the identification of whom is debated. As a result of this inquiry, I myself follow now Cécile Evers (1991) in assuming that the original statue had represented Hadrian.

Cf. *infra*, at *A Study on the colossal portrait of Hadrian (now Constantine the Great) in the courtyard of the Palazzo dei Conservatori at Rome* (cf. here Fig. 11). With The Contribution by Hans Rupprecht Goette on the reworking of the portrait of Hadrian (now Constantine the Great); and *infra*, in volume 3-2, in *Appendix I.a*; at Section XIII. - But, as already mentioned above, that was not the only result of this book present.

By studying this colossal portrait of Constantine (here Fig. 11), I have arrived - via discussions of various other sculptures - at the hypothesis that the colossal statue of Jupiter in the Hermitage of St. Petersburg (cf. here Fig. 10), which Claudio Parisi Presicce (2006b) has compared with this colossal portrait of Constantine (here Fig. 11), may be identified as a copy of the cult-statue of Jupiter, commissioned by Domitian for his (fourth) Temple of Iuppiter Optimus Maximus Capitolinus.

Cf. *infra*, at *A Study on Domitian's cult-statue of Iuppiter Optimus Maximus Capitolinus*; cf. here Fig. 10); and *infra*, in volume 3-2, at *Appendix IV.c.1.*) - To this I will come back below.

On 27th November 2019, when Franz Xaver Schütz and I met again with Filippo Coarelli in Rome, he kindly allowed me to publish his above-mentioned personal observations on mules (cf. *infra*, in volume 3-2, at *Appendix I.d.1.*)).

On that occasion, Filippo Coarelli was kind enough to present me with his new book (*Statio: I luoghi dell'amministrazione nell'antica Roma*, 2019a), in which he concentrates on many ancient buildings at Rome and the institutions of the Roman state attached to them, that are of importance to this *Study*. Many of these

structures were built anew, or were dramatically changed under Domitian. For Domitian's *Tabularium principis* at his Palace on the Palatine, built for the documents previously kept at the *Tabularium publicum* on the Capitoline (cf. *infra*, at Chapter II.3.1.c), and *infra*, in volume 3-2, at Appendix IV.b.2.); for Domitian's *Porticus Minucia Frumentaria* (cf. *infra*, at Chapter II.3.1.c)); for the *praefectura urbana* and the different buildings, where it was accommodated over time (cf. *infra*, in volume 3-2, at Appendix I.a)); for the *Mundus*, a *sacellum* next to the Temple of Saturn *ad Foro*, which was dedicated to Dis Pater and Proserpina, who could be equated with Saturn and Ops (cf. *infra*, in volume 3-2, at Appendix I.f.1.); Appendix II.a); and Appendix IV.b.2.); for the Temple of Iuno Moneta and the *officina Monetae*, the mint, which Domitian transferred from its original site on the *Arx* to the Augustan *Regio III* (cf. *infra*, in volume 3-2, at Appendix I.g.4.), and Appendix IV.c)); for the *Aerarium publicum populi Romani* that was attached to the Temple of Saturn (cf. *infra*, in volume 3-2, at Appendix IV.b)); for the Temple of Iuppiter Custos (cf. *infra*, in volume 3-2, at Appendix I.g.4.)); for the Temple of Ops in *Capitolio* and the *aerarium militare* (cf. *infra*, in volume 3-2, at Appendix I.d.2.)); for the so-called 'Tabularium' and the *Tabularium publicum* on the Capitol, and Domitian's destruction of the *Tabularium publicum* (cf. *infra*, in volume 3-2, at Appendix IV.c)); for the *Schola Xanthi* at the 'Portico degli Dei Consenti', which was related to the *Aerarium* at the Temple of Saturn (cf. *infra*, in volume 3-2, at Appendix IV.a)); for the consequences of Domitian's/ Trajan's destruction of the *sella* between the Quirinal and the Capitoline, in order to build the Forum (of Trajan): the new *Atrium Libertatis* was built at the Forum of Trajan, and the 'Mercati di Traiano' were erected anew. This huge office building replaced the offices of the old *Atrium Libertatis* that had been related to the *Censores*, and it possibly accommodated also the office of the *fiscus libertatis et peculiorum* (cf. *infra*, in volume 3-2, at Appendix IV.b.2.). - On 24th February 2020, I had the chance to discuss all these subjects with Coarelli in Rome. To this I will come back below.

**On 28th November 2019, I met (as I erroneously believed at that stage) for the last time with Claudia Valeri at the Vatican Museums in relation to this Study. On that occasion, she kindly discussed with me the "Rilievo Terme Vaticano" (cf. here Fig. 31), which has likewise been most recently published by Langer und Pfanner (2018, 142-157), who suggest a Claudian date for it.**

Cf. *infra*, in volume 3-2, in Appendix I.g.3.); at Section I.

Langer and Pfanner (2018, 152) discuss also Domitian's *sestertius* of 95/96 AD (cf. here Fig. 30), which, according to Mario Torelli (1987), shows the same building as the "Rilievo Terme Vaticano". But because Langer and Pfanner (erroneously) compare the coin images representing Severus Alexander's Temple of Iuppiter Ultor on the Palatine (cf. R. PARIS 1994b, 27, Fig. 15, and *infra*, in volume 3-2, ns. 760-763, in Appendix V.; at Section VII.) with the "Rilievo Terme Vaticano" (here Fig. 31), they arrive at wrong conclusions; cf. *infra*, in volume 3-2, in Appendix I.g.3.); at Section III.

Torelli (1987), who dates also the "Rilievo Terme Vaticano" to the Flavian period, has, in addition to this, identified the decastyle temple, visible on both the coin (here Fig. 30) and the relief (here Fig. 31), with Domitian's *Templum Gentis Flaviae*. Langer and Pfanner (2018), who ignore the fact that the *Templum Gentis Flaviae* has in the meantime been securely located (cf. *infra*, at Chapter IV.1.1.h)), reject Torelli's hypotheses, basing their arguments, as already mentioned, on wrong assumptions. But with Langer and Pfanner's (2018, 151) important observation that the temple, visible on the "Rilievo Terme Vaticano", certainly stood within the *pomerium* - which is true in the case of the *Templum Gentis Flaviae* - the authors unwittingly provide a strong argument in favour of Torelli's hypothesis.

For a discussion of this point; cf. *infra*, in volume 3-2, in Appendix I.g.3.); at Section II.

**By discussing the "Rilievo Terme Vaticano" (cf. here Fig. 31), standing in front of it on 28th November 2019, Claudia Valeri and I have come to the conclusion that Torelli's (1987) Flavian dating of it is correct.**

As is well known, at the Vatican Museums, Museo Gregoriano Profano, are on display the original fragment owned by this collection (cf. here Fig. 31, below), as well as a plaster cast of the fragmentary relief in the

Museo Nazionale Romano (cf. here **Fig. 31, in the middle**), both of which belong together, as shown in the photomontage (cf. here **Fig. 31, above**).

Claudia Valeri has added some additional observations which support the dating of the "Rilievo Terme Vaticano" to the Flavian period, which she has kindly allowed me by E-mail of 1st May 2020 to mention here.

**See below, at *The first Contribution by Claudia Valeri on the "Rilievo Terme Vaticano"* (cf. here Fig. 31),**

And below, in Chapter *V.1.i.3.a*); and *infra*, in volume 3-2, in *Appendix I.g.3.*); and in *Appendix VI.*; at Sections *II.*; *XII.*

**On 10th December 2019, Giandomenico Spinola was kind enough to write to me by E-mail that he agrees with Claudia Valeri and me concerning our dating of the "Rilievo Terme Vaticano" (here Fig. 31) to the Flavian period.**

In the case of the marble fragment in the Museo Nazionale Romano, the 'other' half of the "Rilievo Terme Vaticano" (cf. here **Fig. 31, in the middle**), I was not so lucky. Claudia Valeri and I originally had the idea of studying it together, but on November 29th 2019, Carlotta Caruso of the Museo Nazionale Romano alle Terme di Diocleziano sent me an E-mail, kindly informing me that this fragment is currently not only not on display at the Museum, but in addition to this not accessible to visitors for safety reasons. - To the "Rilievo Terme Vaticano" I will come below.

As already mentioned above, Franz Xaver Schütz and I went again on 29th November 2019 to Perugia to meet with Mario Torelli, since I wished to know his current opinions concerning Domitian's *sestertius* (cf. here **Fig. 30**) and concerning the "Rilievo Terme Vaticano" (cf. here **Fig. 31**); Torelli maintains his relevant judgements, already published in 1987. As in the past on many other occasions, for example at our meeting in Perugia on 5th May 2018, this meeting with Torelli has helped me tremendously to formulate my own ideas concerning both Domitian's *sestertius* (here **Fig. 30**) and the "Rilievo Terme Vaticano" (here **Fig. 31**). -To this I will come back below.

**Since December 20th 2019, I have had the chance to discuss in many telephone calls and in a long E-mail-correspondence the ideas developed in this *Study* with Eric M. Moormann, who, together with other colleagues, is in the course of preparing a large exhibition on Domitian, to be held in the Rijksmuseum van Oudheden at Leiden.**

For the accompanying volume containing essays on the subject; cf. Aurora Raimondi Cominesi *et al.* (*God on Earth: Emperor Domitian. The re-invention of Rome at the end of the 1<sup>st</sup> century AD*, 2021); after that, this exhibition will then be on display at Rome (to this I will come back below). Moormann has kindly offered to read an earlier version of this entire manuscript, and, as a result of this, has provided me with lots of information that I had neglected so far (not only relating to Domitian), which I was lucky enough to still be able to incorporate into my manuscript.

Cf. below, in Chapters *I.2.1.c*); *I.3.2.S*); and *infra*, in volume 3-2, in *Appendix I.a*); at Section *VII.*; in *Appendix IV.d.4.b*) *Domitian's building project comprising the Campus Martius, the Capitoline Hill and the sella between Arx and Quirinal. With detailed discussion of the Templum Pacis, and some remarks on Domitian's Villa, called Albanum*; and in *Appendix VI.*; at Section *I.*

**Thanks to Eberhard Thomas (Köln), the former assistant of Heinz Kähler at the *Archäologisches Institut der Universität zu Köln*, I was able to contact Frau Waltraud Holst (who is a Librarian at the *Historisches Archiv der Universität zu Köln*). She kindly provided me on 13th January 2020 with the title of Kähler's last *Vorlesung*: *Kunst der Zeit Konstantins*, held in the *Wintersemester* of 1972/1973, which I had been lucky enough to attend. In this *Vorlesung*, that also Eberhard Thomas attended, Kähler had presented his**

**research, that is discussed here, which related to the Basilica of Maxentius and to the colossal acrolithic portrait of Hadrian (now Constantine the Great) in the cortile of the Palazzo dei Conservatori.**

Cf. below, at *A Study on the colossal portrait of Hadrian (now Constantine the Great) in the courtyard of the Palazzo dei Conservatori at Rome* (cf. here **Fig. 11**). With The Contribution by Hans Rupprecht Goette on the reworking of the portrait of Hadrian (now Constantine the Great); and *infra*, in volume 3-2, at *Appendix I.a*; Section XIII.; and at *Appendix IV.c.1.*).

Frank G.J.M. Müller kindly presented me with his new book on the 'Aldobrandini Wedding', which reached me on 14th January 2020 (*The So-Called Aldobrandini Wedding. Research from the Years 1990 to 2016. With contributions by Carla Benocci and Valter Proietti*, 2019).

Cf. below, at *A Study on Domitian's cult-statue of Iuppiter Optimus Maximus Capitolinus* (cf. here **Fig. 10**); at Part I. *The wall painting 'Aldobrandini Wedding' in the Vatican Museums and the statuette of the 'Euripides' in the Louvre* (cf. here **Fig. 12**), which has been discussed together with it; and *infra*, in volume 3-2, at *Appendix IV.c.1.*)). - To this I will come back below.

The visit to Rome, which Franz Xaver Schütz and I undertook from 16th February 2020 onwards (originally planned to last until 15th March), in order to support the research conducted for this book on Domitian, was overshadowed by the dramatic vicissitudes in connection with the Corona Virus. The outbreak had accelerated at the end of our stay. March 5th was, for example, the last day on which we could work at the Library of the British School at Rome. We still had the chance to meet with Giuseppina Pisani Sartorio on 22nd February, 28th February and 2nd March 2020, who told us at our last meeting about her own talk and those of other scholars presented at the *Colloque international*, organized by the Université de Caen Normandie from 11-13 December 2019 (« *Topographie et urbanisme de la Rome antique* »), for example on the Forum of Trajan. (cf. *infra*, in volume 3-2, at *Appendix V.*).

We met with Filippo Coarelli on 24th February and on March 4th 2020, with whom I discussed, once again, his new books (*STATIO: I luoghi dell'amministrazione nell'antica Roma*, 2019a; cf. *infra*, in volume 3-2, at *Appendix I.a*) and elsewhere in this *Study*, and *Initia Isidis: L'ingresso dei culti egiziani a Roma e nel Lazio*, 2019b; cf. *infra*, in volume 3-2, at *Appendix III.*), as well as his talk on the Temple of Iuppiter Tonans on the *Capitolium*, held at the Conference at Caen (cf. F. COARELLI 2019c, and *infra*, in volume 3-2, at *Appendix I.g.4.*)), of which he has kindly given me a copy. On 24th February 2020, Coarelli was also kind enough to discuss with me our different locations of the *lucus Iovis Fagutalis*, which is caused by the fact that we have reconstructed the courses of the procession of the *Argei* on the *Mons Oppius* differently.

Cf. *infra*, in volume 3-2, in *Appendix I.a*); at Section XI. *The locations of the lucus Iovis Fagutalis, as suggested by myself* (2014a), and by F. Coarelli (2019a). Both hypotheses are based on our reconstructions of the course of the procession of the *Argei* on the *Mons Oppius*, as described by Varro (Ling. 5,45-54).

I met with Gabriella Centi on 29th February, discussing the progress of our studies on the *Mons Oppius*, a research area that we are both interested in (cf. *infra*). On 3rd March 2020, I had the chance to meet with Christoph Luitpold Frommel and Massimo Pentiricci (cf. *infra*), and on the 7th of March 2020, Franz Xaver Schütz and I saw Eugenio La Rocca. But I could not meet again with Claudio Parisi Presicce, Giandomenico Spinola or Claudia Valeri, since first the offices of the Capitoline Museums closed on March 6th 2020, then the Vatican Museums on March 9th 2020, and were not accessible to visitors any more. On that day, Claudia Valeri and I had intended to study together the two headless cuirassed statues in the Museo Chiaramonti (inv. nos. 1250 and 1254; cf. here **Fig. 6, left and right**), because it has been suggested that one of them (cf. here **Fig. 6, right**) had possibly represented Domitian (cf. below, at *A Study on Hadrian's portrait-statue of Hadrian from Hierapydna* (cf. here **Fig. 29**); and *infra*, in volume 3-2, at *Appendix IV.c.2.*)). - To this I will come back below.

When on 8th of March 2020 Franz Xaver Schütz and I wanted to make photographs in the *Forum Romanum*, of the *Miliarium Aureum* and of the Basilica of Maxentius, we found out that the *Forum Romanum* was closed. On 9th March there were no trains to Germany any more - which we usually take - which is why we left Rome by airplane on 12th March 2020. Because our research at Rome could thus not be finished this time, we could only hope to come back as soon as possible.

**On 22nd February 2020, Franz Xaver Schütz and I met again with Giuseppina Pisani Sartorio in Rome, this time discussing with her the recent article, published by her together with Paola Virgili ("Dioniso e Leucotea, Atena e Eracle sul tempio arcaico di Fortuna e Mater Matuta nel Foro Boario", 2020; cf. *infra*, in Chapter V.1.i.3.b); at Section IV.). In addition, I thank Geppi as ever for much bibliographic help and for presenting us with publications on subjects that are discussed in this *Study*, or later sending them by E-mail, that I received still in time to be integrated into this book.**

For example the book by Silvana Balbi de Caro (*Roma Caput Mundi. Lusso e denaro nell'età Repubblicana*, 2018a; cf. *infra*, in volume 3-2, at *Appendix IV.c*), and an article by Clementina Panella ("Roma: Massenzio, Costantino e gli spazi urbani", 2015; cf. *infra*, in volume 3-2, at *Appendix IV.c.1*). On 28th February 2020, we were able to continue these discussions, and Geppi presented us with volume 89 of the *RendPontAcc* (2016-2017), with the contributions on the Forum of Trajan by Patrizio Pensabene and Javier Á. Domingo (I) and Paola Baldassari (II) ("Foro Traiano: organizzazione del cantiere e approvvigionamento dei marmi alla luce dei recenti dati di Palazzo Valentini: "I Il cantiere, l'approvvigionamento dei marmi, il trasporto e i costi dei grandi monoliti in granito del Foro e in sienite"; "II Templum *Divi Traiani et Divae Plotinae*: nuovi dati dalle indagini archeologiche a Palazzo Valentini"), and with the volume, written by Carlo Buzzetti and Giuseppina Pisani Sartorio herself (*Le scoperte archeologiche sul tracciato della metropolitana B di Roma (1939-1953) dall'Archivio Gatti*, 2015).

For a discussion of all this; cf. below, at *A Study on the colossal portrait of Hadrian (now Constantine the Great) in the courtyard of the Palazzo dei Conservatori at Rome (cf. here Fig. 11)*. With The Contribution by Hans Rupprecht Goette on the reworking of the portrait of Hadrian (now Constantine the Great); at Part II. *Ancient Rome's new commercial river port, at La Marmorata. With discussions of the 'Porticus Aemilia' (in reality identifiable as Navalìa) and of the Horrea Aemiliana*. With The sixth Contribution by Peter Herz : Rom. Strukturen der Versorgung; and with The second Contribution by Franz Xaver Schütz : Wie schwer war der ägyptische Obelisk, der heute auf der Piazza di S. Giovanni in Laterano in Rom steht?; and *infra*, in volume 3-2, in *Appendix V*.; at Section II.).

**On 3rd March 2020, I finally had the chance to discuss the ideas developed here concerning the Cancelleria Reliefs (cf. here Figs. 1; 2; Figs. 1 and 2 drawing) with Christoph Luitpold Frommel and Massimo Pentiricci in Rome, whose monumental publication (*L'antica Basilica di San Lorenzo in Damaso. Indagini archeologiche nel Palazzo della Cancelleria (1988-1993)*, 2009) I have discussed in this *Study* in great detail. Both of whom asked many constructive questions concerning my hypotheses.**

Thanks to my good friend Gabriella Centi, I was able to solve a problem that I had worked on for many years when studying the former Capuchin monastery on the former Via Curva (today Via Carlo Botta) on the *Mons Oppius*. Gabriella was kind enough to present me on 29th February 2020 in Rome with the new book by Carmelo G. Severino (*Roma. Esquilino 1870-1911 ... e nel centro del progettato quartiere una vastissima piazza*, 2019), in which he discusses the "Villa D'Aste alle Sette Sale", where this monastery was located, and also addresses the questions that interest me; cf. Häuber (2014a, 220: "Other facts that we do not know are when the Villa d'Aste had become Villa Capaccini, nor when and under which conditions the Capuchin monks had entered the scene to live in the former Villa d'Aste").

Cf. *infra*, in volume 3-2, in *Appendix I.a*); at Section XI.).

**On 7th March 2020, in Rome, Eugenio La Rocca asked me, which were the most important results obtained in the meantime in regard to the Cancellaria Reliefs:**

**I told him those of my hypotheses that are summarized *supra*, in: *What this Study is all about*, and *infra*, in Chapters I.2.; V.1.b); V.1.d); V.1.h.1.); V.1.h.2.); V.1.i.3.); V.1.i.3.a); V.1.i.3.b); and VI.3. See now also a summary of all this, presented *infra*, in Chapter *The major results of this book on Domitian*.**

La Rocca was so kind as to discuss these ideas with me. On that occasion, I wanted also to know La Rocca's opinion concerning the colossal acrolithic statue of Hadrian (now Constantine the Great) in the cortile of the Palazzo dei Conservatori.

Cf. *infra*, at *A Study on the colossal portrait of Hadrian (now Constantine the Great) in the courtyard of the Palazzo dei Conservatori at Rome* (cf. here **Fig. 11**). With The Contribution by Hans Rupprecht Goette on the reworking of the portrait of Hadrian (now Constantine the Great); and *infra*, in volume 3-2, at *Appendix IV.c.1.*);

**In addition, La Rocca was so kind as to provide me, by request, with one of his articles I had been unable to find in the libraries I use ("The Colossal Herms at Villa Borghese and the Temple of Hermes/ Thoth: a Chapter of Religious History at the Time of Marcus Aurelius", 2007).**

As we know from literary sources and from Marcus Aurelius's Mercurius coin series (cf. here **Fig. 44**), the emperor had dedicated at Rome a Temple of Hermes-Thot (Hermes Trismegistos), as a thanksgiving for the famous rain miracle that had saved in AD 172/173 the Roman army in the war against the Quadi. - But note that, according to Dietmar Kienast, Werner Eck and Matthäus Heil (2017, 132), the "Blitz-und Regenwunder (so Dio 71 [72] 10, 5)", had only occurred in AD "174".

La Rocca (2007; cf. *infra*, in volume 3-2, at *Appendix II.a*)) has been able to demonstrate in this account, that the herms at the Parco Borghese (cf. here **Fig. 45**) belonged to Marcus Aurelius's Temple of Hermes-Thot. Fortunately, Florian Ebeling had already presented us on 24th June 2016 with his book on Hermes Trismegistos (*Das Geheimnis des Hermes Trismegistos. Geschichte des Hermetismus*, 2009), whom Ebeling refers to as: "Der legendäre weise Ägypter" ('the legendary wise Egyptian'; cf. *id.* 2009, back cover). This book has helped me a lot to understand the proceedings that had led to the dedication of Marc Aurelius's temple at Rome.

La Rocca was also so kind as to look at an earlier version of the entire manuscript of this *Study*, which resulted in the clearer structuring of its 'Table of Contents'.

**Despite this pandemic, and thanks to the invention of telephone, E-mails and the internet, I could nevertheless keep in touch with all those colleagues and friends in Rome.**

**For example with Claudio Parisi Presicce, who sent me, by request, on 24th March 2020 an article, which I would have liked to discuss with him in Rome ("Costantino come Giove. Proposta di ricostruzione grafica del colosso acrolitico della Basilica Costantiniana", 2006b).**

Cf. *infra*, in volume 3-2, at *Appendix IV.c.1.*).

In this text, Parisi Presicce compares this colossal portrait of Constantine (cf. here **Fig. 11**) with a likewise colossal acrolithic statue of Jupiter at the Hermitage of St. Petersburg (cf. *id.* 2006b, 146, Fig. 47; cf. here **Fig. 10**), because this statue is based on a statue-type of Jupiter which repeats the prototype of the portrait of Constantine (here **Fig. 11**) in mirror image. Besides, Parisi Presicce states that this mirror image prototype of a Jupiter was by far more successful than the original from which the statue of Constantine had been copied. As I only realized much later, this statue of Jupiter at the Hermitage is a copy of the cult-statue of Jupiter in Domitian's (fourth) Temple of Iuppiter Optimus Maximus Capitolinus.

Cf. below, at *A Study on Domitian's cult-statue of Iuppiter Optimus Maximus Capitolinus* (cf. here **Fig. 10**). - To this I will come back below.

On 1st May 2020 Claudia Valeri kindly allowed me to mention her observations concerning the "Rilievo Terme Vaticano" (cf. here **Fig. 31**) that she had shared with me when we were discussing the relief at the Museo Gregoriano Profano on 28th November 2019, and that I had summarized in the meantime.

**See below, at *The first Contribution by Claudia Valeri on the "Rilievo Terme Vaticano"* (cf. here **Fig. 31**); and *infra*, in volume 3-2, in *Appendix I.g.3.*); at **Section IV.****

I would, of course, very much have liked to discuss the relief and the resulting text together with her in person. On the 4th of May 2020, Claudia Valeri has, in addition to this, allowed me to quote a passage of her E-mail of 1st May in my text.

**On 4th and 6th April 2020, Hans Rupprecht Goette was kind enough to send me, by request, his impressive photographs of the Arch of Trajan at Beneventum, which he has very generously allowed me to publish here (cf. here **Fig. 46**). Scholars have compared the Cancellaria Reliefs in many respects with the reliefs of this arch.**

Cf. *infra*, at Chapters *II.3.3.*; *II.3.3.a.*); *V.1.h.1.*); *V.1.i.3.*); *V.1.i.3.a.*); *VI.3.*); and *infra*, in volume 3-2, at *Appendix IV.b.2.*).

Beginning with 7th April 2020, I discussed with Walter Trillmich the Marble Forum at Mérida in Spain. There togate statues without heads were excavated, one of them showing striking similarities with the togate youth on Frieze B of the Cancellaria Reliefs (cf. here **Fig. 2**; **Figs. 1 and 2 drawing: figure 12**), which is, in my opinion, a portrait of Domitian. Other scholars, who likewise compare the togate statues from the Marble Forum with the Cancellaria Reliefs, which they themselves regard as Flavian, date the togate statues in Mérida therefore to the Flavian period (cf. *infra*, at Chapter *IV.1.1.h.*)).

**On 25th April 2020, Walter Trillmich, who finds our visualization of the Cancellaria Reliefs 'in situ' convincing (cf. *infra*, at Chapters *I.2.1.b.*); *I.3.2.*; *V.1.d.*; at *The major results of this book on Domitian*: and here **Figs. 1 and 2 of the Cancellaria Reliefs, drawing, 'in situ'**), was kind enough to write me about what consequences it would have for other sculpture groups of *togati*, if the togate statues at the Marble Forum of Mérida were indeed datable to the Flavian period. Trillmich himself (2004), following Hugo Meyer's (2000) (in my opinion erroneous) Neronian dating of the Cancellaria Reliefs has so far dated all those statues, including those in Mérida, to the Claudian period. On 28th April 2020, Trillmich kindly gave me permission to publish here the relevant passage of his E-mail.**

**See below, *The Contribution by Walter Trillmich*; and *infra*, at Chapter *IV.1.1.h.***

Since, in 2015, I had discussed the matter both with Frank G.J.M. Müller and Hans Rupprecht Goette, after having read Frank Müller's new book on the 'Aldobrandini Wedding', I rang Hans Goette, who at the time, had been in the course of studying the above-mentioned statuette of 'Euripides' in the Louvre (cf. here **Fig. 12**). I asked him in this telephone conversation, how far he had gotten with his research.

**Hans Rupprecht Goette was kind enough to send me on 21st April 2020 the current draft of the manuscript of his relevant article ("Remarks on the statuette of Euripides in Paris, Musée du Louvre MA 343"). Goette's relevant research, as already mentioned above, turned out to be of great importance for the identification of the statue of Jupiter in the Hermitage of St. Petersburg (cf. here **Fig. 10**), as a copy of the cult-statue of Jupiter in Domitian's (fourth) Temple of Iuppiter Optimus Maximus Capitolinus.**

Cf. *infra*, at *A Study on Domitian's cult-statue of Iuppiter Optimus Maximus Capitolinus* (cf. here **Fig. 10**); at Part I. *The wall painting 'Aldobrandini Wedding' in the Vatican Museums and the statuette of the 'Euripides' in the Louvre* (cf. here **Fig. 12**), which has been discussed together with it.

Goette's research on this statuette of 'Euripides' is, as mentioned above, in addition to this of great importance in the context of the recent discussion of the wallpainting called 'Aldobrandini Wedding'.

Cf. *infra*, in volume 3-2, at *Appendix IV.c.1.) Final remarks on Appendix IV.b) and Appendix IV.c): Hadrian's efforts to legitimize his reign at the beginning of his principate, as expressed in the Anaglypha Hadriani ...*. - As already mentioned above, the relevant passages of this *Appendix IV.c.1.)* have in the meantime become a separate monograph within this *Study on Domitian*; cf. below, at *A Study on Domitian's cult-statue of Iuppiter Optimus Maximus Capitolinus* (cf. here **Fig. 10**).

**When Goette realized the subject of *Appendix IV.c.1.)* (cf. *infra*, in volume 3-2), he sent me on 27th April 2020, on his own account, one of his own publications ("Fragment of a newly discovered portrait of Hadrian in Budapest", 2019), as well as a publication by Marianne Bergmann ("Zu den Porträts des Trajan und Hadrian", 1997). Bergmann (1997) and Goette (2019) discuss Hadrian's portrait-type Delta Omikron ( $\Delta$ ), as well as coins, issued at Alexandria in AD 117, representing Hadrian. Both authors suggest, that, at the end of Hadrian's life, his last portrait-type Delta Omikron was modelled after those coins. - To this I will come back below.**

And when I decided to illustrate Hadrian's portrait-type Delta Omikron in this *Study*, Hans kindly provided me, on his own account, with photographs of the replica from the Villa Hadriana and of the portrait in the Prado at Madrid (cf. here **Fig. 3**). - To Goette's 'Euripides'-manuscript I will likewise come back below.

In the course of our recent correspondence on the 'Aldobrandini Wedding' (cf. here **Fig. 155**), Eric M. Moormann has sent me on 21st April 2020 one of his essays, the title of which actually refers to our current inquiry ("Did Roman Republican Mural Paintings Convey Political Messages?", 2013). I thank Eric also for discussing not only the Marble Forum at Mérida in Spain with me (cf. *infra*, at Chapter *IV.1.1.h*)), but also the colossal portrait of Hadrian (now Constantine; cf. here **Fig. 11**). Eric has alerted me to the colossal head of Constantine (cf. here **Fig. 47**), found on the Forum of Trajan, which has likewise been reworked from an earlier portrait, suggesting to me that I should compare it with the portrait here **Fig. 11**.

For all that; cf. below in *A Study on Domitian's cult-statue of Iuppiter Optimus Maximus Capitolinus* (cf. here **Fig. 10**); at Part I. *The wall painting 'Aldobrandini Wedding' in the Vatican Museums and the statuette of the 'Euripides' in the Louvre* (cf. here **Fig. 12**), which has been discussed together with it; and at *A Study on the colossal portrait of Hadrian (now Constantine the Great) in the courtyard of the Palazzo dei Conservatori at Rome* (cf. here **Fig. 11**). With The Contribution by Hans Rupprecht Goette on the reworking of the portrait of Hadrian (now Constantine the Great); and *infra*, in volume 3-2, at *Appendix IV.c.1.)*.

**My thanks are also due to Paolo Liverani for sending me on 22nd April 2020 his forthcoming essay ("Historical Reliefs and Architecture"), in which he discusses the Cancelleria Reliefs, as well as many other subjects that are dealt with here.**

This text has in the meantime appeared in the volume, edited by Aurora Raimondi Cominesi *et al.* 2021 (cf. *supra*), and on 30th April 2020, Liverani has kindly granted me the permission to quote *verbatim* from this text. In addition to this, Liverani sent me, by request, on 24th April 2020 his following publication ("La situazione delle collezioni di antichità a Roma nel XVIII secolo", 2000; cf. *infra*, in volume 3-2, at *Appendix IV.c.2.)*). Since I had sent him the current draft of my *Appendix IV.* (cf. *infra*, in volume 3-2), in which his essay is mentioned, he alerted me to an additional publication that relates to the subjects discussed, and sent me also another one of his own articles ("Osservazioni sui rostri del Foro Romano in età tardoantica", 2007). He

also read other parts of my here published *Study* and wrote me his much appreciated comments on 24th April 2020.

**Eric Moormann and Paolo Liverani also took the time to discuss with me the question for which of his military campaigns Domitian was actually leaving on Frieze A of the Cancellaria Reliefs (cf. here Fig. 1; Figs. 1 and 2 drawing: figure 6; and *infra*, at Chapter VI.3.). - Not that we could solve this problem, but I thought it was necessary to try to define the *status quaestionis*. - To this I will likewise come back below.**

I have also asked Hans Rupprecht Goette for advice concerning the headless marble *togati* that were excavated in the Marble Forum at Mérida. He sent me a detailed discussion of them on 30th April, and wrote me that they are in his opinion datable to the Flavian period (cf. *infra*, at Chapter IV.1.1.h)).

**In addition, I am very grateful to Hans for having had the chance to discuss with him by E-mail between 4th and 6th May 2020 the problems I had with the colossal acrolithic portrait of Hadrian (now Constantine the Great; cf. here Fig. 11), on display in the cortile of the Palazzo dei Conservatori at Rome (cf. *infra*, in volume 3-2, at Appendix IV.c.1.)). On 6th May 2020 Hans Rupprecht Goette was kind enough to send me his text on this portrait of Hadrian (now Constantine.**

**Cf. below, at *The Contribution by Hans Rupprecht Goette*.**

Finally, Hans Rupprecht Goette has alerted me to the recent essay by Ulrich-Walter Gans ("Bildhauerkunst zur Zeit der konstantinischen Kaiser", 2019), in which this portrait of Constantine here Fig. 11 is discussed. And when I realized that Gans (2019) mentions also the head of Constantine from the Forum of Trajan, Hans sent me on 19th May 2020, on his own account, his own photographs of this head (cf. here Fig. 47).

As already mentioned above, all this resulted in an additional monograph within this *Study*; cf. below, at *A Study on the colossal portrait of Hadrian (now Constantine the Great) in the courtyard of the Palazzo dei Conservatori at Rome (cf. here Fig. 11). With The Contribution by Hans Rupprecht Goette on the reworking of the portrait of Hadrian (now Constantine the Great)*. See also *infra*, in volume 3-2, at Appendix IV.c.1.).

Since I was working contemporaneously on the portrait-statue of Hadrian of the "Piräus-Hierapydna-type" (so M. FUCHS 2014), Hans Rupprecht Goette was also kind enough to send me on 12th May 2020, on his own account, the following articles: Marco Cavalieri and Simon Jusseret ("Hadrien et la Crète: Le témoignage des statues cuirassées de Gortyne et de Knossos", 2009) and Pavlina Karanastasi ("Hadrian im Panzer. Kaiserstatuen zwischen Realpolitik und Philhellenismus", 2012/2013). Also this research resulted in the creation of another monographs within this *Study* on Domitian.

See below, at a *A Study on Hadrian's portrait-statue from Hierapydna (cf. here Fig. 29)*; and *infra*, in volume 3-2, at Appendix IV.c.2.).

**Since for the dedicant of the *puteal Scribonianus* (or *Libonis*), that had been erected on the *Forum Romanum* under the open sky, two different individuals have been suggested: L. Scribonius Libo, who was tribune in 149 BC, and L. Scribonius Libo, who was *praetor peregrinus* in 204 BC, I asked T.P. Wiseman for advice, who was kind enough to send me on 23rd May 2020 a discussion of those two alternatives, which I may publish here with his kind consent.**

See below, at *The first Contribution by T.P. Wiseman on the identification of the L. Scribonius Libo, who was the dedicant of the puteal Scribonianus (or Libonis)*; and *infra*, in volume 3-2, at Appendix IV.c).

**The scenario developed here concerning Domitian's escape from the *Capitolium* on 19th December AD 69 (cf. *infra*, in volume 3-2, at Appendix I.), has had its starting point in one of the very vivid stories, told us**

**by our professor of history, Dr. Stephan Türr, in September of 1972, when he made us look from the former "Protestant hospital" (i.e., the 'Casa Tarpea') on the Capitoline Hill over to the Palatine.**

Cf. *infra*, in Chapter *Preamble*; Section III.; at point 1.); and *infra*, in volume 3-2, at *Appendix I.e*). It is conceivable that Vitellius (cf. *Suet.*, Vit. 15,3), on December 19th AD 69, could actually have watched the fighting on the Capitolium, while staying at the 'Domus Tiberiana' on the Palatine.

We were a group of students of the Kunstseminar at the Universität Duisburg, who visited Rome for the first time. I regret that it wasn't possible any more to discuss my ideas concerning Domitian's escape with Stephan Türr in person, because he has recently passed away. But I am happy to acknowledge that, since I am studying myself the history of Rome, to have constantly quoted the incredible wealth of information, which Stephan Türr used to share with all of us so generously. Fortunately I could talk to his wife, Gudrun Türr-Lipjes on 29th May 2020, who was also kind enough to tell me the precise dates of his life (Budapest 27th January 1927-25th September 2016 Duisburg). - My thanks are due to Helke Kammerer-Grothaus for finding the address of Gudrun Türr-Lipjes for me.

**On 29th May 2020 Emanuele Ciampini, whom I had asked for advice concerning this subject, was kind enough to send me the link to the publication by David Peter Davies (*The Taking of Joppa*, 2003). *The Taking of Joppa*, set in the time of Pharaoh Tuthmosis III, and written on Papyrus Harris 500 at the time of Rameses II, was first mentioned to me by my friend, the military historian Rose Mary Sheldon because it describes a similar stratagem as that applied by some of Flavius Sabinus's companions on 19th December AD 69, who were smuggled from the *Capitolium*, 'hidden between baggage'.**

For the stratagem of Flavius Sabinus's companions; cf. below, at Chapter *Preamble*; Section III.; at point 1.); and for *The Taking of Joppa*; cf. *infra*, in volume 3-2, at *Appendix I.d.1.a*); and *Appendix I.i*)).

**When studying David Peter Davies's account (*The Taking of Joppa*, 2003), I came across some problems, which Emanuele Ciampini was again kind enough to solve in an E-mail of 3rd June 2020, which I may publish here with his kind consent.**

**See below, at *The second Contribution by Emanuele M. Ciampini, which refers to the Egyptian tale The Taking of Joppa*.**

**By chance I found further information that has helped to clarify the question: for which of his military campaigns is Domitian actually leaving for on Frieze A of the Cancelleria Reliefs? (cf. here Fig. 1; Figs. 1 and 2 drawing; figure 6). Decisive in this respect was the study of Domitian's *Forum/ Forum Nervael Forum Transitorium*. This enquiry began when I read a remark by Rose Mary Sheldon (2007, 199) on the effect his suppression of the Bar Kokhba Revolt may have had on Hadrian *himself*.**

Cf. below, at Chapter *The major results of this book on Domitian*; *infra*, in volume 3-2, at *Appendix IV.c.2*.); and at *Appendix IV.d*) *The summary of the research presented in Appendix IV. has led to a summary of Domitian's building projects at Rome*.

**I, therefore, studied the reliefs of the representations of 'provinces' from the Temple of the divinized Hadrian at Rome, the *Hadrianeum*. The *Hadrianeum* is often compared with Domitian's *Forum/ Forum Nervael Forum Transitorium*, because that building had originally contained a similar group of 'provinces', of which unfortunately only one has survived in its entirety and some more representations of such 'provinces' in fragments. Cf. Maria Paola Del Moro ("Il Foro di Nerva", 2007; to this I will come back below). Because the figure appearing on the relevant relief of Domitian's *Forum* has been identified as the personification of a people called *Piroustaë* (cf. here Fig. 49), I finally arrived at suggesting for which military campaign Domitian is leaving on Frieze A of the Cancelleria Reliefs. - To all this I will come back below in detail.**

Contemporaneously, I studied the Anaglyphy Hadriani, commissioned by Hadrian (cf. here **Figs. 21; 22**).

Hans Rupprecht Goette sent me, therefore, by request, on 7th and 13th June 2020 his photographs of the Anaglypha Hadriani (cf. *infra*, in volume 3-2, at *Appendix IV.*, and here **Figs. 21; 22**), as well as his photographs of the marble reliefs from the *Hadrianeum* at Rome that represent 'provinces' and trophies and that are kept in the Palazzo dei Conservatori at Rome and in the Museo Archeologico Nazionale at Naples. On 21st June he sent me also his photographs of the two 'provinces' from the *Hadrianeum* that are kept in the Museo Nazionale Romano at Rome (cf. *infra*, in volume 3-2, at *Appendix IV.d.1.*); and *Appendix IV.d.2.a*) and here **Fig. 48**), all of which I may publish with his kind consent.

**Since Amanda Claridge (2010, 174-175) does not herself provide a reference for the important finding that at "Le Colonnacce" in Domitian's Forum/ Forum Nervae/ Forum Transitorium "On the attic storey the surviving sculptured panel in the recess shows a helmeted [page 175] female carrying a shield, recently recognized (thanks to a labelled version found at Aphrodisias in Turkey) as the personification of the Piroustae, a people of the Danube", I wrote her an E-mail on 13th June 2020, asking her for help, and asked on 13th June also Hans Rupprecht Goette for advice.**

Hans was kind enough to send me on the same day, on his own account, his photograph of the relevant marble relief in the *Sebasteion* at Aphrodisias, mentioned by Claridge (2010, 175). In addition, he wrote me a reference for this relief; cf. R.R.R. Smith (*Aphrodisias VI. The Marble reliefs from the Julio-Claudian Sebasteion*, 2013), and provided me with one of his photographs of "Le Colonnacce" at Domitian's Forum/ Forum Nervae/ Forum Transitorium (for all of those illustrations; cf. here **Fig. 49**), kindly granting me his permission to publish also those photographs.

On 14th of June 2020, I managed to reach Amanda Claridge on the telephone, who told me that she, at first, believed she had found the information, according to which the female figure of "Le Colonnacce" is a representation of the *Piroustae*, in an article by R.R.R. Smith ("*Simulacra Gentium: The Ethne from the Sebasteion at Aphrodisias*", 1988; cf. *infra*, in volume 3-2, at *Appendix IV.d.2.a*). Amanda provided me also with this article and told me in her accompanying E-mail that at least, in this account, Bert Smith does not mention the fact that the female figure of "Le Colonnacce" at Domitian's Forum/ Forum of Nervae/ Forum Transitorium is, in fact, a replica of the (labelled) relief with a representation of the *Piroustoi* in the *Sebasteion* at Aphrodisias.

**Apropos the *Piroustae* or *Piroustoi*. We shall see in the following, that the name of this people, an Illyrian tribe (also called a Pannonian tribe and a Dalmatian tribe) is spelled very differently. Apart from these two main transliterations they are also referred to as *Pirousti*, *Piroustai*, or *Perustae*, and in German as 'Pirousten', and as 'Perusten'.**

On 14th June 2020, Stefan Pfeiffer was kind enough to write me by E-mail on my request the reference to "Wiegartz 1996" ("*Simulacra Gentium auf dem Forum Transitorium*"), which is missing in his publication of 2009, and which I had been otherwise unable to find (cf. *infra*, in volume 3-2, at *Appendix IV.d.2.a*). According to Pfeiffer (2009), Hans Wiegartz (1996) wrote in his article that the alleged 'Athena/ Minerva' of "Le Colonnacce" at Domitian's Forum/ Forum Nervae/ Forum Transitorium represents a *gens* instead.

**But because the libraries were still closed and Wiegartz's article (1996) is not available on the internet, I wrote on 15th June R.R.R. Smith an E-mail, asking him, whether he himself or Hans Wiegartz had made the important finding that the female figure at "Le Colonnacce" does not depict Minerva, as hitherto believed, but instead a representation of the *Pirustae*. Bert Smith was kind enough to answer me straight away: WIEGARTZ!**

R.R.R. Smith enclosed the relevant chapters of his book (*Aphrodisias VI. The Marble reliefs from the Julio-Claudian Sebasteion*, 2013), in which he discusses the matter (cf. *infra*, in volume 3-2, at *Appendix IV.d.2.b*).

**When I realized that recently the female figure at "Le Colonnacce" in Domitian's Forum/ Forum Nervae/ Forum Transitorium (cf. here Fig. 49) has again been identified with Minerva, I asked on 28th June 2020 R.R.R. Smith another time for advice.**

As we shall see below, the author (*i.e.*, P. GROS 2009; cf. *infra*, in Chapter *The major results of this book on Domitian*) who asserted that this allegorical representation has recently again been interpreted as Minerva, has either himself misunderstood the publication to which he refers (*i.e.*, M.P. DEL MORO 2007), or his manuscript has been translated into Italian incorrectly.

**Bert Smith was kind enough to answer me immediately that, in his opinion, the female figure (cf. here Fig. 49) shows some iconographic features which prove that this is not 'Athena/ Minerva', but instead a representation of a "natio devicta". On 29th June 2020, Bert Smith kindly allowed me to publish his E-mail.**

**See below, at *The first Contribution by R.R.R. Smith on the iconography of the representation of the Piroustaie at "Le Colonnacce" in Domitian's Forum/ Forum Nervae/ Forum Transitorium (cf. here Fig. 49); and infra, in volume 3-2, at Appendix IV.d.2.a).***

Bert Smith sent me, in addition to this, on his own account a photo of the representation of the *Piroustoï* in the *Sebasteion* at Aphrodisias and granted me by E-mail of 29th June 2020 the permission to publish it in this book (cf. here **Fig. 50**). Cf. *infra*, at Chapter *The major results of this book on Domitian*; and *infra*, in volume 3-2, at *Appendix IV.d.2.a*).

The manuscript of Eric M. Moormann's article ("Some Observations on the Templum Pacis - a Summa of Flavian Politics", now published in 2022) reached me on 2nd July 2020, right in time to be still discussed (cf. below, in Chapter *II.3.1.c*); and *infra*, in volume 3-2, at *Appendix I.c*); *Appendix II.a*); and *Appendix IV.d.4.b*)), and on 3rd July 2020, he wrote me an E-mail kindly granting me the permission to quote *verbatim* from this manuscript.

Likewise on 2nd July 2020, Ulrich Hofstätter was kind enough to write me, on request, the title of his Dissertation, in which he discusses *inter alia* the 14 statues of 'nations', ordered by Pompeius Magnus for his Theatre in the *Campus Martius* (*Fremde Frauen. Republikanische und augusteische Darstellungen weiblicher Fremder in Rom*, forthcoming). Hofstätter has in addition to this sent me, on his own account, first the passages of his work, in which he discusses Pompeius Magnus's 'nations', then his entire dissertation (cf. *infra*, in volume 3-2, at *Appendix IV.d*)).

**My thanks are also due to Claudio Parisi Presicce for sending me on 6th July 2020, on request, his "ricostruzione virtuale del colosso di Costantino"; cf. Parisi Presicce (2006b, 147, caption of Fig. 48; cf. p. 127, note \*), which I publish here with his kind consent.**

Cf. below, in *A Study on the colossal portrait of Hadrian (now Constantine the Great) in the courtyard of the Palazzo dei Conservatori at Rome (cf. here Fig. 11)*. With The Contribution by Hans Rupprecht Goette on the reworking of the portrait of Hadrian (now Constantine the Great); at Part I. *The statue of Hadrian (now Constantine the Great) in the courtyard of the Palazzo dei Conservatori (cf. here Fig. 11)*, the inscription (CIL VI 974 = 40524; cf. here **Fig. 29.1**), and the cult-statue of *Divus Vespasianus* in the Temple of *Divus Vespasianus*. With The Contribution by Hans Rupprecht Goette on the reworking of the portrait of Hadrian (now Constantine the Great); and *infra*, in volume 3-2, at *Appendix IV.c.1*.); and here **Fig. 11.1**.

Eric Moormann (2022, 135 n. 26) mentions Beatrice Pinna Caboni's (2014) discussion of the cult-statue of Pax in her temple within the *Templum Pacis*, and when I asked Hans Rupprecht Goette for help, he was kind enough to provide me on 10th July 2020 with Pinna Caboni's publication. This acrolithic cult-statue of Pax is of interest here because it had been dedicated by Domitian. This fact has been neglected by most scholars,

but see Filippo Coarelli ("Pax, Templum", in: *LTUR* IV [1999] 69; cf. *infra*, in volume 3-2, at *Appendix IV.d.4.b*)).

On 10th July 2020, Hans Rupprecht Goette alerted me also to a publication by Klaus Fittschen that I had overlooked so far, and when I sent him the update of *Appendix IV*. (cf. *infra*, in volume 3-2), in which those sculptures are mentioned that we had been discussing in the last couple of months, he sent me, on his own account, this publication by Fittschen ("Lesefrüchte IV; 3. Zur Umarbeitung des Kolossalbildnisses Constantins im Hof des Konservatorenpalastes", 2012b), which is of great importance to *Appendix IV.c.1.*), as well as the article by Hans Wiegartz ("Simulacra Gentium auf dem Forum Transitorium", 1996), which I had already put on my to-do-list for *infra*, volume 3-2 *Appendix IV.d*). - See for a discussion of Wiegartz (1996) also below, at Chapter *The major results of this book on Domitian*.

**After having finished writing the relevant Chapters, I sent all the text passages, related to the "Rilievo Terme Vaticano" (cf. here Fig. 31) and to the *Templum Gentis Flaviae* to Mario Torelli, whom Franz Xaver Schütz and I had visited on 29th November 2019 at Perugia in order to discuss those matters with him. He was kind enough as to write me by E-mail of 18th July 2020 his comments. On July 19th 2020, he has granted me the permission to publish his E-mail. In addition to this, Mario kindly allowed me to mention him in the *Dedication* of this book.**

**Cf. below, at *The Contribution by Mario Torelli on the Templum Gentis Flaviae*.**

On 20th July 2020 reached me an E-mail by Demetrios Michaelides, in which he likewise kindly granted me the permission to mention him in the *Dedication* of this book.

Hans Rupprecht Goette was kind enough to send me on 20th July 2020 one of his own articles ("*Corona spicea, corona civica* und Adler. Bemerkungen zu drei römischen Dreifussbasen", 1984) that turned out to be of importance for the discussion of the *corona civica*, 'a civic crown [that] was fixed above my door', as Augustus wrote in his *Res gestae* (34.1-2; translation: T.P. Wiseman 2019, 9). Augustus thus referred to 'the (real) House of Augustus on the Palatine' (cf. *infra*, at Chapter *V.1.i.3.a*), and here **Fig. 35**).

**My thanks are also due to Eugenio La Rocca, who sent me on 20 July 2020, on request, his article ("*Ferocia barbarica. La rappresentazione dei vinti tra medio Oriente e Roma*", 1994), since I wanted to consult it in the context of the discussion of the portrait of Hadrian from Hierapydna.**

See below, at *A Study on Hadrian's portrait-statue from Hierapyda* (cf. here **Fig. 29**); and *infra*, in volume 3-2, at *Appendix IV.c.2*).

When reading La Rocca's article (1994), I realized that it is also of great importance to the discussions in other *Chapters* of this book (cf. *infra*, in volume 3-2, at *Appendix IV.d.2.e*)). And on 21st July 2020, La Rocca kindly wrote me an E-mail, granting me his permission to mention him in the *Dedication* of this book.

**On 23rd July 2020 Amanda Claridge kindly granted me the permission to mention her in the *Dedication* of this book. In addition to this, she answered my relevant question by writing to me that it had been her own idea to suggest that Domitian's *Forum/ Forum Nervae/ Forum Transitorium* could commemorate Domitian's triumph of AD 89; and the reason was the representation of the *Piroustaie* in this Forum. On 24th July 2020, Amanda wrote me an E-mail, allowing me to mention this here. Cf. Claridge (2010, 174-175, quoted *verbatim infra*, in volume 3-2, at *Appendix IV.d.2.a*); see also *Appendix IV.d.2.f*)).**

The friends and colleagues mentioned here, who helped me to understand the problems connected with the subjects discussed in Chapter *V.1.1.h*), *Appendix I*. and *Appendix IV*. (for the latter; cf. *infra*, in volume 3-2), did so by providing me not only with the explanations I had asked them for, but also, on their own accounts, with their own unpublished manuscripts, or with their own publications and photographs, and even with

publications by other scholars. They did this during the time of the Corona pandemic, when all libraries were closed. For this tremendous help I am very grateful indeed.

In the course of conducting the research for this *Study* on Domitian, many lifelong contacts with friends and colleagues have greatly been intensified, with the result that these scholars were, for example, kind enough to write *Contributions* for this volume. On 27th of July 2020, Franz Xaver Schütz and I met with Eric M. Moormann in Munich, which gave me the chance to celebrate with both of them these new achievements by discussing with Eric his own research projects, and also the common ones on Domitian, that are documented in this book.

From 29th July until 24th of August 2020, I had again the chance to discuss with Hans Rupprecht Goette in an E-mail correspondence the various opinions concerning the reworking of the facial traits of the colossal portrait of Hadrian into those of Constantine (cf. here **Fig. 11**). Related to our questions concerning the modern term 'damnatio memoriae', and concerning the reworking of the portraits of emperors, whose memory had been damned in antiquity, Hans alerted me to the article by Joachim Raeder ("Das Bildnis des C. Fulvius Plautianus und andere durch Umarbeitung entstandene Bildnisse des Septimius Severus", 2019). And because the fragments of the colossal statue of Hadrian/ Constantine are carved from Parian marble, Hans provided me with the article by Donato Attanasio, Matthias Bruno and Walter Prochaska ("The Marbles of Roman Portraits. New Data on the Marble Provenance of 261 Imperial and Private Urban Portraits Dating from the Mid 1<sup>st</sup> century to the Early 6<sup>th</sup> Century A.D", 2019), in which also portraits carved from Parian marble are discussed. We also asked ourselves, until when such large blocks of Parian marble, as used for this portrait of Hadrian/ Constantine, were available at Rome (cf. *infra*, in volume 3-2, at *Appendix IV.c.1.*), and here **Fig. 11**); one of the areas at Rome, where such materials were found in great quantities in past centuries, is the famous *La Marmorata* (to this I will come back below).

**Eugenio La Rocca was kind enough to send me on 1st August 2020 his publication (*Mosaici parietali nel Musaeum del Colle Oppio*, 2020a), in which he discusses the mosaics found in one of the buildings excavated underneath the Baths of Trajan on the *Mons Oppius*, identified by him as a pavilion belonging to Nero's *Domus Aurea*, that comprised a *Musaeum*. La Rocca's findings also have consequences concerning the efforts to reconstruct the topography of the area in question.**

Cf. *infra*, in volume 3-2, at *Appendix I.a*); Section X.; and at *Appendix IV.d.4.c*)).

**Discussing with La Rocca my idea suggested here that it may already have been Domitian's idea to erect large Baths on the *Mons Oppius* at precisely the same site, where the Baths of Trajan were later built, La Rocca agreed and wrote me by E-mail on 3rd August 2020 an answer that, as he has confirmed by E-mail of 4th August 2020, I may publish here with his kind consent. - To the Baths of Trajan I will come back below.**

See below, at *The first Contribution by Eugenio La Rocca*.

**On 4th August 2020, Hans Rupprecht Goette sent me, on his own account, Klaus Fittschen's (2014, 57-59, cat. 50a) discussion of the colossal head of Constantine the Great from the Forum of Trajan (cf. here **Fig. 47**), for which I am especially thankful. We may wonder, whether the (possibly) cuirassed statue, to which this head had once belonged, was the portrait of Constantine, described by Eusebius (*Hist. Eccl.* 10,4,16). The Senate had dedicated this portrait-statue to the emperor after Constantine's victory over Maxentius, and, as Eusebius writes, it carried in its right hand, at the explicit order of the emperor himself, Constantine's victory-bringing sign.**

See below, at *A Study on the colossal portrait of Hadrian (now Constantine the Great) in the courtyard of the Palazzo dei Conservatori at Rome* (cf. here **Fig. 11**). With The Contribution by Hans Rupprecht Goette on the

reworking of the portrait of Hadrian (now Constantine the Great); and *infra*, in volume 3-2, at *Appendix IV.c.1.*)

**As already mentioned, on 13th September 2019, Franz Xaver Schütz and I had visited the recently opened market halls, called *Il Nuovo Mercato del Testaccio*, together with Francesco Buranelli and Susanna Le Pera and Luca Sasso D'Elia. When Susanna Le Pera and Luca Sasso D'Elia went with us to the ongoing excavations and started talking with one of the archaeologists there, we were lucky enough to meet also with the director of those excavations, Renato Sebastiani, who is also the Responsabile of the *Museo Diffuso del Rione Testaccio*. This museum is called after the quarter, where it is located, the 'Testaccio', and is dedicated to the promotion of the archaeological sites of this part of the city.**

After our meeting with Renato Sebastiani, our little group went by chance to the restaurant 'da Checchino' on Via di Monte Testaccio 30, located at the Piazza Orazio Giustiniani, opposite the impressive entrance to the ex *Mattatoio*. Entering its interior rooms, we realized that they have virtually been cut into the steep western slope of the Monte Testaccio. At the beginning, we were all by ourselves in these very dark rooms. Into their back walls are carved large illuminated windows, through which the sherds of the Monte Testaccio are visible, that are immediately touching those windows from the outside. These sherds have very different sizes and shapes, but they have been deposited in incredibly neatly ordered layers - as if on purpose arranged like this by an artist to be viewed in these 'vitrines'. Considering that these rooms are located level with the current street, that is to say, presumably almost at the base of this artificial mount, and that the Monte Testaccio rises high above these rooms, one gets an extraordinary impression of the high sophistication, with which this 'dumping-ground' had been organized.

**For me this visit 'inside' the Monte Testaccio has been one of the most impressive ones ever experienced in the City of Rome since September of 1972 - the Cappella Sistina included.**

On 11th May 2022, Franz Xaver Schütz and I went to the Restaurant 'da Checchino' again, in the hope to get the permission to take photographs of these 'vitrines' with the terracotta sherds. I was kindly told by the gentleman, whom I had explained my wish that currently those rooms of the 'cantina' are unfortunately not accessible.

Before building *Il Nuovo Mercato del Testaccio*, the area in question, ancient Rome's new commercial riverport (by many scholars erroneously believed to have been called *Emporium* in antiquity, which is mentioned by Livy 35,10,12; 41,27,8 together with a *Porticus Aemilia*) had been excavated. In antiquity even larger warehouses had stood in this area; they were called *Horrea* (the 'Porticus Aemilia' [in reality *Navalia*], *Horrea Galbana*, *Lolliana*, *Seiana*, etc.), which had also covered parts of the area of the ex *Mattatoio* (the ex-abattoir), which stands to the south of the *Nuovo Mercato del Testaccio*. To those ancient *Horrea* had belonged in the Imperial period the above-mentioned immediately adjacent dumping-ground, which over time developed into a very impressive hill, called *Monte dei Cocci* or *Monte Testaccio*, because it consists of nothing else but sherds of terracotta *amphorae* of certain types, in which (mostly) olive oil was transported. The didactic concept of the *Museo Diffuso del Rione Testaccio* stresses also the importance of the *Monte Testaccio*, of course.

**Likewise, thanks to Luca Sasso D'Elia, Franz Xaver Schütz and I had the chance to visit the *Monte Testaccio* on 8th March 2018, accompanied by Francesco Pacetti, who gave us a very interesting guided tour on top and all around this artificial mount.**

**This entire quarter was called in post-antique times *La Marmorata* - because vast quantities of marble and of all other kinds of building material had occurred there over the centuries, having been stocked here in antiquity.**

See below, at *A Study on the colossal portrait of Hadrian (now Constantine the Great) in the courtyard of the Palazzo dei Conservatori at Rome (cf. here Fig. 11)*. With The Contribution by Hans Rupprecht Goette on the reworking

of the portrait of Hadrian (now Constantine the Great); at Part II. *Ancient Rome's new commercial river port, at La Marmorata. With discussions of the 'Porticus Aemilia' (in reality identifiable as Navalìa) and of the Horrea Aemiliana. With The sixth Contribution by Peter Herz : Rom. Strukturen der Versorgung; and with The second Contribution by Franz Xaver Schütz : Wie schwer war der ägyptische Obelisk, der heute auf der Piazza di S. Giovanni in Laterano in Rom steht?; and infra, in volume 3-2, at Appendix IV.c.1.).*

On 8th August 2020, I reached Luca Sasso D'Elia on the telephone, who was kind enough to send me on 10th August 2020 links to those recent excavations, *inter alia* to the publication by Mirella Serlorenzi and Renato Sebastiani ("Nuove scoperte dall'area di Testaccio [Roma] tecniche costruttive, riuso e smaltimento dei contenitori anforici pertinenti ad horrea e strutture utilitarie di età imperiale", 2011). For the *Museo Diffuso del Rione Testaccio*; cf. <<http://romearcheomedia.fub.it/testaccio/>>.

See also the above-mentioned article by Giuliano Giovannetti ("La struttura portuale di lungotevere Testaccio: una nuova analisi della documentazione", 2016); and more recently Paolo Liverani ("Il Tevere, i ponti e l'Annona", 2020). - To this I will come back below.

On 12th August 2020, Eric M. Moormann sent me his *Contribution* to this volume, which I publish here with his kind consent.

**See below, at *The Contribution by Eric M. Moormann : Can we Reconstruct the Templum Gentis Flaviae?***

Cf. *infra*, at Chapter IV.1.1.h). I especially appreciate that Eric M. Moormann also sent me the article by Maria Cristina Capanna ("Il Tempio della Gente Flavia sul Quirinale. Un tentativo di ricostruzione", 2008), which was already on my long to-do-list.

**John Pollini was kind enough to send me, at my request, on 24th August 2020, the photograph of the Nollekens Relief (cf. here Fig. 36), which he has recently published (cf. J. POLLINI 2017b, 98, Fig. 1 = here Fig. 36), and granted me at the same time his permission to publish it.**

This photograph was taken in 1914 in the White Hall of the Gatchina Palace near St. Petersburg, when the relief was still preserved in its restored state of the 18<sup>th</sup> century. Pollini (2017b, 120, 124), in my opinion convincingly, suggests that the Nollekens Relief shows the togate *triumphator* Domitian, sacrificing in AD 89 in front of Domitian's *Porta Triumphalis*; after which, the emperor would begin his (last) triumphal procession (cf. *infra*, at Chapter V.1.i.3.b); at Chapter *The major results of this book on Domitian*; and *infra*, in volume 3-2, at Appendix IV.d.2.f)).

**On 22nd July 2020 an E-mail by Angelo Geißen reached me. I had asked him for advice concerning the above-mentioned coins, issued at Alexandria in AD 117, that represent Hadrian, and to write a text on the subject, which resulted in Geißen's first *Contribution* to this volume, that he sent me on that day.**

From Geißen's first *Contribution* emerges that, contrary to Marianne Bergmann's opinion (1997, 144), who suggested that they had been ordered by local magistrates at Alexandria, those coins were instead issued at the order of Hadrian himself, who, after Trajan's death on 7th (?) August 117, on 11th August 117 had been hailed as Roman emperor.

Marianne Bergmann's opinion (1997, 144) is quoted *verbatim infra*, in volume 3-2, at Appendix IV.c.1.). Post Scriptum: *Hadrian's situation in AD 117-118. With The first Contribution by Angelo Geißen: Bemerkungen zur frühen Münzprägung Hadrians in Alexandria.*

But, as Angelo Geißen and I agreed, there were still some points that needed further clarification. On 25th August 2020, Geißen sent me the final version of his first *Contribution*, which I publish with his kind consent.

See below, at *The first Contribution by Angelo Geißen: Bemerkungen zur frühen Münzprägung Hadrians in Alexandria*.

Cf. *infra*, in volume 3-2, at *Appendix IV.c.1*). *Post Scriptum: Hadrian's situation in AD 117-118*. With *The first Contribution by Angelo Geißen: Bemerkungen zur frühen Münzprägung Hadrians in Alexandria*.

Edoardo Gautier di Confiengo was kind enough to send me, on his own account, on 7th September 2020 the English translation of his article, written together with Elettra Santucci ("The Distribution of *Aqua Claudia* and *Anio Novus* in Rome", 2020 - which has appeared in the meantime), as well as the current version of his manuscript on Nero's *cenatio rotunda* ("La macchina della *cenatio rotunda* neroniana [Suet. Nero 31]. Ipotesi costruttive ", forthcoming).

On 9th September 2020, Hans Rupprecht Goette was kind enough to inform me about his forthcoming article ("Zu einer Schwertbandbüste in Budapest - Werkstattfragen und Benennung", Arbeitstitel, 2021; cf. *infra*, in volume 3-2, at *Appendix IV.c.1*)). In this publication, Goette will develop further the ideas that he has already published in his above-mentioned article ("Fragment of a newly discovered portrait of Hadrian in Budapest", 2019 - of Hadrian's portrait-type Delta Omikron ( $\Delta\omicron$ )), and that in its turn has become the starting point of our common discussions on Hadrian, summarized here. - In the meantime, this publication has appeared; cf. Hans Rupprecht Goette (2021).

**In September of 2020, after reading Francesco Buranelli's exhibition-catalogue (*L'Arte di Salvare l'Arte ...*, 2019, 13; cf. pp. 72-73 [Z. MARI]), in which the Capitoline Triad (cf. here Fig. 13) is published, I resumed my correspondence with Hans Rupprecht Goette about the alleged portrait of Euripides in the Louvre (cf. here Fig. 12). Zaccaria Mari's publication and these additional discussions with Hans about representations of this Capitoline Triad (cf. here Fig. 13), and about Domitian's *Villa* on Lake Albano, called *Albanum*, have finally led me to identify the colossal statue of Jupiter in the Hermitage at St. Petersburg (cf. here Fig. 10) as a copy of the cult-statue of Jupiter in Domitian's (fourth) Temple of Iuppiter Optimus Maximus Capitolinus.**

For all that; see below, at *A Study on Domitian's cult-statue of Iuppiter Optimus Maximus Capitolinus* (cf. here Fig. 10).

On 12th September 2020, Hans Rupprecht Goette sent me, on request, the current version of his manuscript ("Remarks on the Statuette of ›Euripides‹ in Paris, Musée du Louvre MA 343"). I am very grateful that Hans has shared his findings with me, and that he has generously allowed me on 12th September 2020 to quote *verbatim* from this text.

Cf. *infra*, at *A Study on Domitian's cult-statue of Iuppiter Optimus Maximus Capitolinus* (cf. here Fig. 10); Part I. *The wall painting 'Aldobrandini Wedding' in the Vatican Museums and the statuette of the 'Euripides' in the Louvre* (cf. here Fig. 12), which has been discussed together with it.

On 14th September 2020, Hans Rupprecht Goette sent me the final version of this manuscript ("From Father god to tragic poet. Remarks on the Statuette of ›Euripides‹ in Paris, Musée du Louvre MA 343", forthcoming). The statuette in question (cf. here Fig. 12) shows the poet enthroned in front of a wall, on which appear the titles of some of his tragedies, written in Greek. Goette is able to demonstrate that this famous, but alleged Euripides was created at the order of Francesco Ficoroni on the basis of a representation of the Capitoline Triad in statuette format, of which only the (headless) figure of Jupiter and the common throne of all three divinities was re-used. This Capitoline Triad is also known from other sculpture groups in statuette format, such as the one, discussed by Goette ("From Father god to tragic poet. Remarks on the Statuette of ›Euripides‹ in Paris, Musée du Louvre MA 343", with n. 10, forthcoming), which is now kept in the Museo Civico Archeologico 'Rodolfo Lanciani' at Guidonia Montecelio (Roma) (cf. here Fig. 13).

According to Filippo Coarelli (in: F. COARELLI 2009a, 514, cat. no. 118), this Capitoline Triad (cf. here Fig. 13) shows the cult-statues of Domitian's (fourth) Temple of Iuppiter Optimus Maximus Capitolinus. This is certainly true since we know the iconography of the cult-statues of Domitian's temple from Renaissance drawings that represent the 'Extispicium Relief' at the Louvre (cf. here Figs. 16-18), and from the relief in the staircase at the Palazzo dei Conservatori, which shows Marcus Aurelius sacrificing in front of this temple (cf. here Fig. 19).

The statue-type of Jupiter, known in several variants, of which the colossal portrait of Hadrian (now Constantine the Great; cf. here Figs. 11; 11.1) and the statue of Jupiter in the Hermitage at St. Petersburg (here Fig. 10) are mirror copies, was extremely successful in antiquity, often copied for portraits of the Imperial period, *inter alia* of the Emperors Claudius and Tiberius (cf. here Fig. 15). Claudio Parisi Presicce (2006b, 144-145, quoted *verbatim infra*, at *A Study on Domitian's cult-statue of Iuppiter Optimus Maximus Capitolinus* (cf. here Fig. 10)), who discusses the statue of Constantine the Great (cf. here Fig. 11), therefore convincingly assumes as its prototype the cult-statue of Iuppiter Optimus Maximus Capitolinus (without indication, which one of the four cult-statues of the god he refers to). But Parisi Presicce (2006b, 144) does not address the (alleged) fact that according to Oskar Waldhauer (1928, 4, 5, quoted *verbatim infra*, at *A Study on Domitian's cult-statue of Iuppiter Optimus Maximus Capitolinus*) (cf. here Fig. 10)), the statue of Jupiter in the Hermitage (cf. here Fig. 10) originally held a thunderbolt in its right hand, exactly like the figure of Jupiter in the Capitoline Triad (cf. here Fig. 13), which certainly shows the cult-statues of Domitian's (fourth) Temple of Iuppiter Optimus Maximus Capitolinus.

Especially interesting in the context discussed here are the facts that the statue of Jupiter at St. Petersburg (cf. here Fig. 10), which, in my opinion, follows the same statue-type as the Jupiter in the Capitoline Triad (Fig. 13), is datable Domitianic and was found in the vicinity of Palazzo Barberini at Castel Gandolfo that was built 'on top of' Domitian's *Villa*, called *Albanum*. Because the right hand of this statue of Jupiter in the Hermitage was incorrectly restored, by holding a statue of Victoria, it thus (intentionally) resembles the cult-statue of Zeus in his Temple at Olympia, one of the Seven Wonders of the ancient (Western) World (cf. here Fig. 14) - a comparison which is actually drawn on the Website of the Hermitage at St. Petersburg (quoted *verbatim infra*, at *A Study on Domitian's cult-statue of Iuppiter Optimus Maximus Capitolinus* (here Fig. 10)).

In reality, this statue of Jupiter in the Hermitage (here Fig. 10) (allegedly) held a thunderbolt in its right hand, as explicitly stated by Oskar Waldhauer (1928, 4, 5). This iconographic detail characterized also Domitian's cult-statue of Iuppiter Optimus Maximus Capitolinus, see the Extispicium Relief in the Louvre (here Figs. 16-18), the above-mentioned relief of Marcus Aurelius (here Fig. 19), and the Capitoline Triad (here Fig. 13), all of which represent the Capitoline Triad in Domitian's Temple of Iuppiter Optimus Maximus Capitolinus. But, as I only found out later, when reading Anna Trofimowa's discussion of this statue of Jupiter in the Hermitage ("Kopien der Victoria von Calvatone aus dem 19. und 20. Jahrhundert", 2020, 78, on the modern statuette of Victoria this statue of Jupiter is holding in its right hand), the author states that, when this sculpture of Jupiter was excavated, its right hand had *not* been found (quoted *verbatim infra*, at *A Study on Domitian's cult-statue of Iuppiter Optimus Maximus Capitolinus* (cf. here Fig. 10)). My thanks are due to Hans Rupprecht Goette for sending me Trofimowa's article, to which I will come back below.

Because of its overall iconography, I nevertheless suggest that this statue of Jupiter in the Hermitage at St. Petersburg (here Fig. 10) can give us an impression, what the (probably chryselephantine) cult-statue of Iuppiter may have looked like, which Domitian commissioned for his (fourth) Temple of Iuppiter Optimus Maximus Capitolinus. - I maintain this view here, although according to the latest information concerning this point that I have been alerted to (to which I will come back below), this statue of Jupiter had not only been found without its right hand (or its right arm ?), but also without its head (!), a fact which previously had not been realized.

Cf. Massimiliano Papini (2021, 30 with Fig. 14 [= here **Fig. 10.1**]). - My thanks are due to Hans Rupprecht Goette, who provided me also with this information.

The reason for my confidence (back in 2020) that the colossal statue of Jupiter in the Hermitage (here **Fig. 10**) actually copies Domitian's cult-statue of Iuppiter Optimus Maximus Capitolinus lay in the following facts. This statue (here **Fig. 10**) was found in Domitian's Villa, called *Albanum* and is datable in the reign of Domitian. Although only its headless torso had survived, when found, without its right hand (or right arm?), it can nevertheless with confidence be restored as a replica of Jupiter of this specific type. Its pose, left arm, and exposed left knee and lower leg, are exactly those of Domitian's cult-statue, represented in the pediment of his temple - and that in its turn is known from the Renaissance drawings of the Extispicium Relief (cf. here **Figs. 16-18**). We learn from Anna Trofimowa (2020, 77-78) that the statue (here **Fig. 10**) had first been restored by Vincenzo Pacetti, holding a thunderbolt in its right hand: since its right thigh is ancient, my guess is that Pacetti had seen remains of this thunderbolt on the right leg of the god.

Fortunately in July of 2023, I should find out something else: the 'Capitoline Jupiter' is also known through the bronze statuette in New York, at the Metropolitan Museum of Art, datable to the 1st or 2<sup>nd</sup> century AD, which Stephan Faust (2022, 22-24, Abb. 4 [= here **Fig. 20.1**]) has published, and that I did not know before. This bronze statuette preserves both hands of the god, comprising his attributes thunderbolt and sceptre, as well as his head, whereas the colossal marble statue at the Hermitage (here **Figs. 10; 10.1**) was found without its right hand (or without its right arm ?) and even without its head.

The iconography of this bronze statuette (here **Fig. 20.1**) is (almost exactly the same as that of the marble statuette from the Via Appia Nuova in Rome (cf. here **Fig. 20**), with the great difference that this marble statuette shows the god with exposed left knee and lower left leg (here **Fig. 20**), whereas in the bronze statuette the left knee and lower left leg are completely covered by the god's garment. Because this statuette (here **Fig. 20.1**) is not precisely datable, we cannot know, whether it represents Domitian's (fourth) cult-statue of Jupiter, or rather the second or the third cult-statue of Iuppiter Optimus Maximus Capitolinus.

**I thank Hans Rupprecht Goette for discussing the above-mentioned ideas with me, who alerted me on 15th September 2020 to the article by Karoline Manfrecola on Domitian's Villa, called *Albanum* ("Aus zwei mach eins: Der Zusammenschluß zweier Villen zum *Albanum* des Domitian, 2020; cf. *infra*, in volume 3-2 at *Appendix I.g.4*)).**

Goette has also himself recently studied Domitian's *Albanum* ("The Portraits of Aischylus, Sophocles, Euripides, and Menander in Roman Contexts. Evidence of the Reception of the Theatre Classics in Late Republican and Imperial Rome"). He has sent me, on the same day, by request, this manuscript, and was kind enough to allow me by E-mail of 20th September to quote here *verbatim* from this text; in the meantime this text has been published in 2022.

Cf. *infra*, in volume 3-2, at *Appendix IV.d.4.b*) *Domitian's building project comprising the Campus Martius, the Capitoline Hill and the sella between Arx and Quirinal. With detailed discussion of the Templum Pacis, and some remarks on Domitian's Villa, called Albanum.*

Also on 15th September 2020, Hans Rupprecht Goette kindly alerted me to the article by Nicole G. Brown ("The Living and the Monumental on the Anaglypha Traiani", 2020; cf. *infra*, in volume 3-2, at *Appendix IV.b*); and at *Appendix IV.c*)).

**Between 16th and 21st September 2020, I had the chance to discuss with Hans Rupprecht Goette a marble fragment of a state relief that he has published in an article ("Disiecta membra eines trajanischen Frieses", 1983; cf. here **Figs. 32.A-E**), in which he attributed this fragment to the above-mentioned "Rilievo Terme Vaticano" (cf. here **Fig. 31**). - I suggest to call the fragment, found by Goette (here **Figs. 32.A-E**), "Rilievo**

**Foro Romano", and will discuss it below (cf. *infra*, in volume 3-2, at *Appendix I.g.3.*); at Section V.). - To the "Rilievo Foro Romano" I will likewise come back below.**

On 18th September 2020, Hans Rupprecht Goette sent me, on his own account, the catalogue text on the statue of Jupiter at St. Petersburg (cf. here **Fig. 10**) by Oskar Waldhauer (*Die antiken Skulpturen der Ermitage*, 1928), and on 21st September 2020, Hans sent me the book by Martin Bossert (*Die Skulpturen des gallorömischen Tempelbezirkes von Thun-Allmendingen*, 2000), who has already identified the above-mentioned type of a Capitoline Triad (cf. here **Fig. 13**) as a representation of the cult-statues in Domitian's Temple of Iuppiter Optimus Maximus Capitolinus.

For all that; cf. *infra*, at *A Study on Domitian's cult-statue of Iuppiter Optimus Maximus Capitolinus* (cf. here **Fig. 10**).

Finally, on 23rd September 2020, Hans Rupprecht Goette sent me photographs of coins that show the cult-statue of Zeus in his Temple at Olympia (cf. here **Fig. 14**), which actually held a statue of Nike (*Victoria*) on its right hand - contrary to the statue of Jupiter in the Hermitage (cf. here **Fig. 10**), which has only been restored this way. For both; cf. *infra*, at *A Study on Domitian's cult-statue of Iuppiter Optimus Maximus Capitolinus* (cf. here **Fig. 10**).

Between 7th and 19th October 2020 I had the chance to discuss with Peter Herz on the telephone- and in E-mail conversations the controversy concerning the dating of the *primus pilus* of *Legio XIII Gemina*, *T. Statius P. F. Serg. Marrax*, who is known from an inscription at Aquileia. According to Carl Patsch (1899), Statius Marrax had been decorated by Domitian for his services in the emperor's Dacian War(s). More recent scholars have either not dated this inscription at all, or have rather suggested that Statius Marrax served in the Augustan period (see below, at Chapter *The major results of this book on Domitian*; and *infra*, in volume 3-2, at *Appendix IV.d.2.e*); and at *Appendix IV.d.2.f*).

On 19th October 2020, Herz was kind enough to send me his second *Contribution* to this volume, which I publish here with his kind consent. In this text Herz suggests that more arguments speak for the later date, therefore, Statius Marrax may actually have served in the *Legio XIII Gemina* at the end of the 1<sup>st</sup> century AD, as already suggested by Carl Patsch (1899).

See below, at *The second Contribution by Peter Herz : Anmerkungen zu Statius Marrax*.

On 15th October 2020, Hans Rupprecht Goette was kind enough to send me the book by Ludwig Curtius (*Das antike Rom. Aufnahmen von Alfred Nawrath*, 1944). It is illustrated with the excellent photographs by Alfred Nawrath, which show for example the Anaglypha Hadriani, when those were still standing in the piazza of the *Forum Romanum*. This has led me right back to a more intensified discussion of those reliefs (cf. *infra*, in volume 3-2, at *Appendix IV.b*), and here **Figs. 21; 22**).

Since I wished to illustrate here a photograph, showing Mario Torelli, teaching us members of the 'Corsi estivi di Lingua e Cultura Italiana dell'Università del Sacro Cuore di Milano' in the summer of 1979, I asked Rose Mary Sheldon, who had taken it, to give me the permission to publish it, which she has generously granted (cf. *supra*, at *Dedication*, and here **Abb. 1**).

This photo shows Torelli in the Museo Archeologico Nazionale at Naples in front of the Roman marble bust of a Greek intellectual, explaining it to us. Since I vaguely remembered that R.R.R. Smith had been able to identify this man, I asked Bert now for advice. He was kind enough to write me on 18th October 2020 that it is Pindar !

This portrait-type, representing a Greek, Bert was able to identify by its inscription in Greek ('ΠΙΝΔΑΡΟΣ'; cf. here **Fig. 51**), incised on the bottom contour of a marble shield portrait of this man,

**found at Aphrodisias, together with many other such *clipeus* portraits. These portraits of intellectuals, who are identified by their inscriptions, had decorated the absidal building (called 'Atrium House' by R.R.R. Smith in his second *Contribution* to this volume) next to the *Sebasteion* (cf. here Fig. 52), which may (possibly) be identified as a philosophical school.**

For this 'Atrium House' at Aphrodisias (here Fig. 52); cf. R.R.R. Smith (1990, 132-135, Pls. IV-XVI; for this building, cf. pp. 128-130, 153-155). After having read R.R.R. Smith's article (1990), I asked him more questions on 24th October 2020. On 25th October, Bert Smith was kind enough to answer my questions concerning the possible function of this building and recent work on it. With his kind consent, I publish his answers here.

**See below, at *The second Contribution by R.R.R. Smith : Note on the function of the 'Atrium House' at Aphrodisias* (cf. here Figs. 51; 52).**

**On 18th October 2020, I asked Eugenio La Rocca for advice concerning the colossal marble portrait of Titus in the Museo Archeologico Nazionale at Naples (cf. here Fig. 53), which he (cf. *id.* 2009) has identified as the head of the cult-statue of *Divus Titus* in Domitian's *Templum Gentis Flaviae*, and on the facial traits of which Oskar Waldhauer (1928) has *inter alia* based his dating of the above-mentioned statue of Jupiter in the Hermitage at St. Petersburg (cf. here Fig. 10) into the Domitianic period. - But, as we shall see below, the Jupiter in the Hermitage was found without its head (!). - To this portrait of Titus I will likewise come back below.**

On 20th October 2020, I had, in addition to this, the chance to discuss this portrait of *Divus Titus* with Hans Rupprecht Goette (for all of that; cf. *infra*, at *A Study on Domitian's cult-statue of Iuppiter Optimus Maximus Capitolinus* (cf. here Fig. 10)).

Eric M. Moormann was kind enough to send me on 27th October 2020 the article by Stephanie Pearson ("Holding up the mirror to research on the Iseum Campense", 2020, a review of the volume edited by M.J. VERSLUYS, K. BÜLOW-CLAUSEN and G. CAPRIOTTI VITTOZZI 2018a); in this *Study* on Domitian are discussed many contributions to these proceedings of the Conference on the Iseum Campense in Rome 2016.

**On 27th October 2020 also Emanuele M. Ciampini sent me, by request, his article in which he describes the most decisive ritual, performed by the Egyptian Pharaoh himself on the occasion of his coronation that occurred on the Festival of New Year ("The King's Food A Note on the Royal Meal and Legitimation", 2016).**

Cf. below, at *The first Contribution by Emanuele M. Ciampini : La regalità domiziana: una nota egittologica; infra*, at Chapters IV.1.1.d); IV.1.1.e); and IV.1.1.f); and *infra*, in volume 3-2, at Appendix II.

To my great surprise Ciampini's discussion (2016) of the rôle of the Egyptian king, which in its turn helps to understand the meaning of this ritual, has also provided further crucial information to explain the 'oriental' roots of the iconography of the portrait of Hadrian from Hierapydna.

See below, at *A Study on Hadrian's portrait-statue from Hierapydna* (cf. here Fig. 29); and *infra*, in volume 3-2, at Appendix IV.c.2.).

On 28th October 2020 the article by Ian Lockey reached me: ("The Atrium House: the archaeology of a late-antique residence", 2016), that Hans Rupprecht Goette sent me, on his own account, because R.R.R. Smith had mentioned this article to us in an E-mail correspondence.

See below, at *The second Contribution by R.R.R. Smith : Note on the function of the 'Atrium House' at Aphrodisias*.

**On 29. October 2020, Michaela Fuchs was kind enough to send me the digital version of her recent article on the Anaglypha Hadriani ("Libertas restituta: Hadrians Verfügungen des Jahres 118 n. Chr."; cf. here Figs. 21; 22), because between the 29th October und 22nd November 2020 I was in the course of discussing these reliefs with Amanda Claridge in several telephone- and E-mail conversations, especially the meaning of the *suovetaurilia*, represented on both reliefs.**

On 8th November, Amanda Claridge sent me Mario Torelli's chapter on the subject in his book (*Typology & Structure of Roman Historical Reliefs*, 1982), and on 20th November, likewise on request, she sent me Filippo Coarelli's discussion of the Anaglypha Hadriani (which Coarelli himself, like Torelli, dates Trajanic) in his new book on the Roman Forum (*Il Foro Romano III. Da Augusto al tardo impero*, 2020).

Cf. *infra*, in volume 3-2, at Appendix IV.b) Similarly as some of the hypotheses, already published by M. Hammond (1953), M. Fuchs (2019) suggests that the therefore here-so-called Anaglypha Hadriani (cf. here Figs. 21; 22) celebrate Hadrian's achievements, and that Hadrian's burning of debt records in AD 118 occurred at two sites: the burning of the debt records of the *fiscus* in the Forum Traiani (represented on the Chatsworth Relief), and the burning of the debt records of the *Aerarium publicum populi Romani* in the Forum Romanum (represented on one of the Anaglypha Hadriani; cf. here Fig. 22). With a discussion of the *suovetaurilia* that appear on both Anaglypha Hadriani (cf. here Figs. 21.A; 22.A), and with The third Contribution by Peter Herz; and at Appendix IV.c) The meanings of the statue group 'Marsyas and fig tree' which appears twice on the Anaglypha Hadriani (Figs. 21; 22), and of the Ogulnian monument (a statue group representing the she-wolf suckling Romulus and Remus, standing underneath the sacred fig tree *ficus Ruminalis* in the Comitium). With The first Contribution by T.P. Wiseman.

**First of all I asked Hans Rupprecht Goette for advice concerning the *suovetaurilia*. On 2nd November 2020 he sent me not only his own photographs of *suovetaurilia* (those of the 'Altar of Domitius Ahenobarbus' in the Louvre at Paris; cf. here Fig. 27, and those of 'The Five-Column Monument or Decennial Monument' in the *Forum Romanum*; cf. here Fig. 26), but also his own article on the subject ("Kuh und Stier als Opfertier. Zur *probatio victimae*", 1986). On 4th November 2020 more of Hans Rupprecht Goette's own photographs of the Anaglypha Hadriani reached me, in addition to this, he was kind enough to send me the article by Nicole Brown on the subject ("The Living and the Monumental on the Anaglypha Traiani", 2020).**

Also for a discussion of all of this; cf. *infra*, in volume 3-2, at Appendix IV.b).

**On 4th November 2020 the new book by the Egyptologist Rafed El-Sayed, reached me. It was edited by himself and Cäcilia Fluck (*The Textile Centre Akhmîm-Panopolis (Egypt) in Late Antiquity. Material Evidence for Continuity and Change in Society, Religion, Industry and Trade*, 2020).**

The Cancellaria Reliefs (cf. below, in Chapters I.-VI., and here Figs. 1; 2; Figs. 1 and 2 drawing), the Nollekens Relief (cf. below, in Chapter V.1.i.3.b), and here Fig. 36), and the Anaglypha Hadriani (cf. *infra*, in volume 3-2, at Appendix IV., and here Figs. 21; 22) are discussed in this book in detail. They feature a great number of figures, who are dressed in specific ways, either according to their professions or social status, or because they are humans, allegorical representations, or divinities. The fact that these reliefs were originally painted must, therefore, have added tremendously to their overall messages, and to our ability to understand their contents immediately.

As we shall see in the case of Frieze A of the Cancellaria Reliefs (cf. *infra*, at Chapter III., and here Fig. 1; Figs. 1 and 2 drawing; figure 3), on one of its figures (*i.e.*, the lictor, walking in front of Domitian, now Nerva) part of the former paint of its garments is still extant. As already mentioned above, its specific colour has provided the decisive information to identify the scene as a *profectio* (cf. P. LIVERANI: "Per una >Storia del colore< La scultura policroma romana, un bilancio e qualche prospettiva", 2014), whereas previously that question had been debated.

The book, edited by Rafed El-Sayed and Cécilia Fluck (2020) thus fills a gap insofar, as the very different types of elaborately woven and, in addition to this, multi-coloured garments, which are discussed in their book, can give us an impression of how much information has been lost that the reliefs discussed here may have additionally contained.

On 7th November 2020, Hans Rupprecht Goette sent me, on his own account, his photographs of the plaster cast of the colossal marble head of Constantine from the Forum of Trajan in Rome at the Museo dei Fori Imperiali (inv. no. FT 10337). This plaster cast is on display at the Abgußsammlung of the Freie Universität Berlin (cf. *infra*, in volume 3-2, at *Appendix IV.c.1.*), and here **Fig. 47**); on 12th November 2020, Hans was kind enough to write me that I might publish his photos here.

See below, at *A Study on the colossal portrait of Hadrian (now Constantine the Great) in the courtyard of the Palazzo dei Conservatori at Rome* (cf. here **Fig. 11**). With The Contribution by Hans Rupprecht Goette on the reworking of the portrait of Hadrian (now Constantine the Great).

**As a result of the just-summarized additional research on the Anaglypha Hadriani, I had the chance, beginning with 11th November 2020, to discuss Hadrian's precarious situation at the beginning of his reign with Peter Herz, who was kind enough to summarize his relevant findings for me:**

See below, at *The third Contribution by Peter Herz : Der Übergang von Trajan auf Hadrian und das erste Regierungsjahr Hadrians*.

The first draft of this text reached me on 28th November 2020. Peter Herz's third *Contribution* has turned out to be, in its turn, the beginning of further research, to which I will come back below.

On 15th November 2020, Hans Rupprecht Goette sent me, on his own account, the already mentioned article by Anna Trofimowa ("Kopien der Victoria von Calvatone aus dem 19. und 20. Jahrhundert", 2020), in which the author discusses the bronze statuette of Victoria, held by the statue of Jupiter in the Hermitage of St. Petersburg in its right hand (cf. *infra*, at *A Study on Domitian's cult-statue of Iuppiter Optimus Maximus Capitolinus* (cf. here **Fig. 10**)).

Frau Daria Lanzuolo of the Deutsches Archäologisches Institut Rom was kind enough to send me on 16th November 2020 the photographs of the Anaglypha Hadriani of this institution that are published here (cf. **Figs. 21; 21.A; 22; 22.A**). I thank her, Frau Daniela Gauss, and Frau Heide Behrens for their combined efforts to provide me with those photographs.

For granting permission to illustrate some portraits of Hadrian at his Villa in Tivoli and in Madrid (cf. here **Fig. 3**), I would like to thank Hans Rupprecht Goette (DAI Zentrale, Berlin).

My thanks are also due to Michaela Fuchs, who took the effort to copy for me on 16th November 2020 a passage from Edoardo Brizio's article ("Due bassorilievi in marmo rappresentanti scene del Foro Romano", 1872, 316-317) and to send it to me by E-mail, in which the author describes the fig tree, which is visible on both Anaglypha Hadriani (cf. here **Figs. 21; 22**), quoted *verbatim infra*, in volume 3-2, at *Appendix IV.b*).

On 20th November 2020, Hans Rupprecht Goette was kind enough to send me, on request, the passage from Richard Neudecker's book (*Die Skulpturenausstattung römischer Villen in Italien*, 1988), concerning Domitian's Villa on Lake Albano, called *Albanum*, and the article by Karoline Manfrecola on Domitian's *Albanum* ("Aus zwei mach eins: Der Zusammenschluß zweier Villen zum *Albanum* des Domitian", 2020 (cf. *infra*, in volume 3-2, at *Appendix I.g.4.*); and at *Appendix IV.d.4.b*) *Domitian's building project comprising the Campus Martius, the Capitoline Hill and the sella between Arx and Quirinal. With detailed discussion of the Templum Pacis, and some remarks on Domitian's Villa, called Albanum*).

And on 21st November 2020, Hans Rupprecht Goette sent me, on his own account, a remark concerning the *suovetaurilia* of the Anaglypha Hadriani by Hansgeorg Oehler (2005, 55; cf. *infra*, in volume 3-2, quoted as epigraph of *Appendix IV.c*).

Peter Herz sent me on 23rd November 2020, on his own account, the current version of his book manuscript on building laws (*Studien zur römischen Wirtschaftsgesetzgebung. Die Baugesetzgebung, forthcoming*). We have been discussing this subject since I was his collaborator at the University of Regensburg (2006-2009), and I am especially thankful that Herz sent me this text right now, because he discusses also Domitian's relevant laws, of course.

**Riccardo Montalbano was kind enough to send me on 24th November 2020 the program of a conference, organized by himself, together with Antonio Pizzo of the Escuela Española De Historia y Arqueología en Roma (EEHAR), to be held online in Rome on 10-11 December 2020 (*Giornata di studio dedicata a Emilio Rodríguez Almeida - TRA LE PENDICI DEL QUIRINALE E IL CAMPO MARZIO, 10-11 dicembre 2020*). The Proceedings of this conference have in the meantime been published in 2022 (see below).**

Cf. *infra*, in volume 3-2, in *Appendix V.*; at Section VI. *The Imperial Fora on the map Fig. 73*.

In an E-mail correspondence of 24th-27th November 2020, I had the chance to discuss with John Pollini the parts of this *Study* on Domitian that relate to the Cancellaria Reliefs (cf. *infra*, at Chapters I.-VI.). Pollini agrees with me that the head of the emperor of Frieze B of the Cancellaria Reliefs (cf. here **Fig. 2; Figs. 1 and 2 drawing; figure: 14**) was from the beginning the extant portrait of Vespasian. In addition to this, he was kind enough to send me his recent articles on the reworking of the portraits of Roman emperors ("Recutting Roman Portraits: Problems in Interpretation and the New Technology in Finding Possible Solutions", 2010, and: "Die Umarbeitung römischer Kaiserbildnisse: Deutungsprobleme und neue Lösungsansätze mit Hilfe digitaler Technologie", 2020; cf. *infra*, at Chapter I.1.).

Hans Rupprecht Goette was kind enough to send me on 27th November 2020, on request, his photograph of the so-called Suovetaurilia Relief in the Louvre at Paris (cf. *infra*, in volume 3-2, at *Appendix IV.c*), and here **Fig. 25**), and on 1st December 2020 he sent me, on his own account, Étienne Michon's catalogue of the Louvre (*Les bas-reliefs historiques romains du Musée du Louvre*, 1910), in which the author discusses the Suovetaurilia Relief, as well as all the other state reliefs kept in the Louvre which are mentioned in this *Study*.

Likewise on 27th November 2020 reached me Peter Herz's article, in which he discusses the loss of Roman soldiers in Egypt during the Revolt of the Jews in the diaspora ("Join the army", 2015). Cf. *infra*, in volume 3-2, at *Appendix IV.b*)).

**On 1st December 2020 reached me the articles by Maria Paola Del Moro ("Il Tempio della Pace" and "Il Foro di Nerva", 2007), which Eugenio La Rocca was kind enough to send me, on request (cf. *infra*, in volume 3-2, at *Appendix IV.d.2.a*)). To my great surprise, the content of Del Moro's article on the *Forum* of Nerva differs very much from the discussion of her work, provided by the above-mentioned scholar (i.e., P. GROS 2009). Unfortunately, I do not know whether Pierre Gros (2009) himself had completely misunderstood Del Moro's observations (which I find difficult to believe) since, in theory, his original manuscript has perhaps not been understood by the person who translated it into Italian.**

This experience too has turned out to be an interesting effect of the Corona pandemic: whereas under normal circumstances, I would immediately have read Del Moro's article, as soon as I had found a discussion of it by Pierre Gros (2009). Whereas in this case, it has taken me a long time to find out that Del Moro's own arguments differ greatly from this summary of her work by Gros (2009). La Rocca was also kind enough to send me, on the same day and on his own account, an exhibition-catalogue, that I had, in part, already discussed in the context of Domitian's additions to Vespasian's *Templum Pacis* (cf. R. MENEGHINI and R.

REA, *La biblioteca infinita. I luoghi del sapere nel mondo antico*, 2014). Cf. *infra*, in volume 3-2, at *Appendix IV.d.4.b*)).

**Between the 2nd and 7th December 2020 Edoardo Gautier di Confiengo discussed with me in E-mail- and telephone conversations the final version of his article, in which he suggests a reconstruction of the mechanism that made Nero's *cenatio rotunda* in his *Domus Aurea* move ("La macchina della *cenatio rotunda neroniana* [Suet. Nero 31], ipotesi di ricostruzione", in press).**

As already mentioned above, Nero's *cenatio rotunda* stood in the north-eastern part of the Palatine, within the area of the (later) Vigna Barberini, and at a site where Domitian would later erect as one part of his Palace a grandiose office building for the *Tabularium principis*, an archive which comprised the documents previously kept at the *Tabularium publicum* that had belonged to the Temple of Saturn and stood at the foot of the Capitoline (cf. *infra*, at Chapter II.3.1.c), and *infra*, in volume 3-2, at *Appendix IV.b.2*)).

Domitian's new office building within his Palace on the Palatine was embellished by a huge roof terrace that accommodated the emperor's 'Adonis garden' (the DI(aeta) (a)DONAEA, which is visible on the Severan Marble Plan; cf. *infra*, at Chapter V.1.i.3.b); Section II.). Gautier di Confiengo was also kind enough to send me the '3D'-reconstructions of the *Domus Aurea*, created by Marco Fano, into which Nero's *cenatio rotunda* on the Palatine is integrated; cf. Clementina Panella ("VI. La Domus Aurea", 2013, Figs. 122; 136). Cf. *infra*, at Chapter V.1.i.3.b); at Section II.

**In the context of the common interest of Peter Herz, Hans Rupprecht Goette and myself in the beginning of Hadrian's reign, especially in the years 117-118 AD, I have discussed with both scholars in November and December of 2020 the observations made by Mario Torelli (1982, 105 with n. 131) in his account of the Anaglypha Hadriani (cf. here Figs. 21; 22).**

**Torelli (1982, 105 with n. 131), who followed in this respect earlier scholars, saw a close connection between the statues of Marsyas and of the fig tree that appear on both reliefs, and which, as Torelli wrote, in their combination, 'stood for the *libertas* of the Roman *plebs*, that kind of freedom that allowed the reproduction of the forces of the empire - the *continuitas imperii* - to which also the *alimenta* aimed'.**

But note that Torelli, contrary to myself, did not identify the fig tree on both reliefs as representations of a sculpture. I myself follow with this assumption the relevant judgement R.R.R. Smith (1983, 227), in his review of Mario Torelli (1982).

Using Torelli's (1982 105 with n. 131) above-mentioned statement as my starting point, I asked Peter Herz, whether we know, how many Roman soldiers died in Trajan's wars, especially in those against the Parthians, since I wondered, whether that fact could have been the motivation for both, Trajan and Hadrian, to spend so much money on their *alimenta* programs - facts that we know in great detail from the scholarly debate of the Anaglypha Hadriani (cf. *infra*, in volume 3-2, at *Appendix IV.b*); *Appendix IV.c*); and at *Appendix IV.c.1*)).

**I am happy to say that Peter Herz took an interest in this inquiry by finding the relevant scholarly discussion, and that Hans Rupprecht Goette was kind enough to provide Peter Herz and myself on 1st and 3rd December 2020 with these publications, in which, among many other things, both, the great losses of Roman soldiers in Trajan's and in Hadrian's own military campaigns, are discussed in detail. I am referring to the following publications:**

Johannes Kramer ("Die Wiener Liste von Soldaten der III. und XXII. Legion [P. Vindob. L2]", 1993); Werner Eck und Andreas Pangerl ("L. Minucius Natalis in einem weiteren Militärdiplom für Pannonia Superior", 2012); Werner Eck ("Konsuln des Jahres 117 in Militärdiplomen Traians mit *Tribunicia potestas XX*", 2013); Werner Eck und Andreas Pangerl ("Das vierte Diplom für die Provinz Galatia et Cappadocia, ausgestellt im

Jahr 99", 2014); Werner Eck und Andreas Pangerl ("Neue *Diplomata Militaria* aus der Zeit von Hadrian bis Antoninus Pius", 2015); Peter Weiss ("Hadrians Rückkehr nach dem Partherkrieg. Das früheste Militärdiplom für die *equites singulares Augusti* und die Entlassungsweihe in Rom vom Jahr 118", 2017); Werner Eck ("Soldaten aus den Donauprovinzen in der Prätorianergarde. Zum Erdbeben in Syrien aus dem Jahre 115 und zum Edikt Hadrians aus dem Jahr 119", 2018).

**Hans Rupprecht Goette sent me on 4th December 2020, on his own account, the passage in Cornelius Vermeule's book (*Art of Antiquity Volume Four Part Two. Jewish Relationships with the Art of Ancient Greece and Rome* ('*JVDAEA CAPTA SED NON DEVICTA*', 1981) that relates to the portrait-statue of Hadrian from Hierapydna at Istanbul (cf. here Fig. 29); this account had been ignored by the scholars, whom I had consulted so far. Vermeule, who based his judgement on additional observations that were so far unknown to me, came to the conclusion that this statue had most probably been dedicated to commemorate Hadrian's victory in the Bar Kokhba Revolt. Independently of Vermeule, and by following other scholars, I had come to the same conclusion.**

See below, at *A Study on Hadrian's portrait-statue from Hierapydna* (cf. here Fig. 29); and *infra*, in volume 3-2, at *Appendix IV.c.2.*)

**For detailed considerations of the above-quoted publications concerning Trajan's campaign against the Parthians and Hadrian's policy in this area at the beginning of his reign immediately after Trajan's death; cf. *infra*, in volume 3-2, at *Appendix IV*.**

Peter Herz incorporated also these new findings into his text, the final version of which he sent me on 16th December 2020, along with additional publications, related to this subject by David Potter ("The mysterious Arbaces", 1979) and Udo Hartmann ("Die Ziele der Orientpolitik Trajans", 2010a), as well as Hartmann's review (2010b) of Oliver Linz (*Studien zur römischen Ostpolitik im Principat*, 2009), Werner Eck ("Kaiserliche Imperatorenakklamation und *ornamenta triumphalia*", 1999c) and Bernhard Linke (*Von der Verwandtschaft zum Staat. Die Entstehung politischer Organisationsformen in der frühromischen Geschichte*, 1995), all of which Herz discusses in his *Contribution* as well. On the same day, Herz kindly granted me the permission to publish his text here.

See below, at *The third Contribution by Peter Herz : Der Übergang von Trajan auf Hadrian und das erste Regierungsjahr Hadrians*.

Hartmann's (2010a) description of Hadrian's policy in Mesopotamia immediately after Trajan's death provides also new insights concerning the discussion of the portrait of Hadrian from Hierapydna at Istanbul (see below, at *A Study on Hadrian's portrait-statue from Hierapydna* (cf. here Fig. 29), and *infra*, in volume 3-2, at *Appendix IV.c.2.*)), additionally supporting the hypothesis suggested here that the statue from Hierapydna (and the statues related to it) commemorated Hadrian's victory in the Bar Kokhba Revolt.

**The new book by Eric M. Moorman reached me on December 9th 2020 (*Nerone, Roma e la Domus Aurea*, 2020b), which he kindly presented to me. Moorman discusses the two structures that have so far been identified with the above-mentioned *cenatio rotunda* in Nero's *Domus Aurea*: the octagonal room in the 'Esquiline Wing' of the *Domus Aurea* on the *Mons Oppius* and the recently excavated structure on the Palatine within the (later) *Vigna Barberini*.**

Cf. *infra*, in Chapter *V.1.i.3.b*); at Section II.. *The Nollekens Relief was found in the 'Aula Regia' within the 'Domus Flavia' / Domus Augustana*.

**Finally, in the course of our further discussions of Hadrian's portrait-type Delta Omikron ( $\Delta\omicron$ ; cf. here Fig. 3), Hans Rupprecht Goette was kind enough to remind me in an E-mail of 15th December 2020 of a**

**term, coined by my late supervisor Andreas Linfert: 'Thronprätendenten-Bart' ('beard of a pretender to the throne'; cf. A. LINFERT, "Bärtige Herrscher", 1976).**

When Andreas Linfert was writing this article, he discussed this complex subject with me, also the togate youth of Frieze B of the Cancellaria Reliefs (cf. here **Fig. 2; Figs. 1 and 2 drawing; figure 12**) has been known to me for quite some time. This Frieze B shows, in my opinion, Vespasian's *adventus* into Rome in October of AD 70, where he is received at the *pomerium* line by the togate youth, in my opinion the acting *praetor urbanus*, his younger son Domitian (cf. *infra*, at Chapter V.1.i.3.), who held the office *praetor urbanus consulari potestate* since the 1st of January AD 70. We know also that already on 21st December AD 69, Domitian had received the title *Princeps iuventutis* (for both; cf. *infra*, at n. 189, in Chapter I.1.).

I have followed in this book Jocelyn M.C. Toynbee (1957, 8 with n. 11, quoted *verbatim infra*, at n. 205, in Chapter I.1.1.), who suggested that the togate youth on Frieze B of the Cancellaria Reliefs represents the young Domitian in his capacity as *Princeps iuventutis*, "a title that marked him out from other senators as heir presumptive to the Empire" (so M.C. TOYNBEE 1957, 8 with n. 11). But only thanks to Hans Rupprecht Goette's mentioning of Andreas Linfert's relevant research to me, did it occur to me that this togate youth's beard, if interpreted as a 'beard of a pretender to the throne', actually corroborates Toynbee's identification of this young man as the *Princeps iuventutis*, and thus as Domitian (for detailed discussions of all these subjects; cf. *infra*, at Chapters I.1.; I.1.1.).

Previously, I had followed those scholars, who had explained Domitian's beard with his age: "we see the young Domitian, togate and slightly whiskered", so Toynbee (1957, 5, quoted in more detail *infra*, at n. 208, in Chapter I.1.1.), which, provided the togate youth represents indeed Domitian, who was 19 at that stage (being born on 24th October AD 51; cf. *infra*, n. 82, in Chapter I.1.), may simply be interpreted that way. Diana E.E. Kleiner, assuming this, describes this togate youth, therefore, as follows (cf. *ead.* 1992, 191, quoted in more detail *infra*, at n. 394, in Chapter III.): "Domitian ... He has a slight beard on his cheeks and chin, which was probably worn by young men before the traditional first shave at age twenty". - My thanks are due to Claudia Valeri, whom I had asked for advice, for writing me by E-mail of 22nd December 2020 that she agrees with me that Domitian's portrait on Frieze B of the Cancellaria Reliefs (cf. here **Fig. 2**), discussed here, shows him with a 'beard of a pretender to the throne', but reminding me at the same time of the fact that Domitian's "'barbula'" indicates in the first place his age as that of an adolescent young man, of course. - I can only agree.

**On 18th December 2020 another E-mail by Claudia Valeri had reached me, in which she was kind enough to answer all my questions concerning the two headless cuirassed statues in the Museo Chiaramonti (inv. nos. 1250 and 1254; cf. Fig. 6, left and right), which she and I had planned to study together on 9th March 2020, when, as mentioned above, all of a sudden the Vatican Museums were closed on that very day because of the Corona pandemic. Since then, we had been discussing various aspects of these sculptures in telephone and E-mail conversations, and in this E-mail, Claudia Valeri answered all my questions in writing. In addition to this, Claudia Valeri had looked again herself closely at those sculptures, together with Giandomenico Spinola - for which I am especially thankful, of course. To the effect that both Claudia Valeri and Giandomenico Spinola confirm that the Domitianic date of those statues, which Claudia Valeri had already earlier suggested to me, may be regarded as the most probable one - as she added in her E-mail. On 22nd January 2021, Claudia Valeri was kind enough to grant me the permission to publish this Email here.**

See below, at *The second Contribution by Claudia Valeri; and infra*, in volume 3-2, at *Appendix IV.c.2.*)

These cuirassed statues (cf. here **Fig. 6, left and right**) have always been identified as a pair of emperors, but their date and the resulting identifications, are debated. A Domitianic date had already been suggested before, and was confirmed by Claudio Parisi Presicce (2000), who was first to suggest that these cuirassed statues should be identified with two Flavian emperors, identifying inv. no. 1254 with Domitian (cf. here **Fig.**

**6, right**), and inv. no. 1250 (cf. here **Fig. 6, left**) with Titus or Vespasian. I have tentatively followed Parisi Presicce's relevant hypotheses, and hope to have added some observations that may corroborate his hypotheses. To this I will come back below, because luckily, on 16th May 2022, Claudia Valeri and I could in the end study those two headless statues together (cf. here **Fig. 6, left and right**).

Cf. *infra*, in Chapter *Preamble: Domitian's negative image*; at Section II. and III.; at point 5.); below, at *A Study on Hadrian's portrait-statue from Hierapydna* (cf. here **Fig. 29**), and *infra*, in volume 3-2, at *Appendix IV.c.2.*)).

**Between 24th and 25th December 2020, I had again the chance to discuss with Hans Rupprecht Goette the above-mentioned "Rilievo Foro Romano". He was kind enough to allow me to publish a summary of our discussion and sent me, on request, his photographs of this fragment, which I publish here with his kind consent (cf. *infra*, in volume 3-2, in *Appendix I.g.3.*); at Section V., and here Figs. 32.A-C).**

In the course of discussing with me the above-mentioned *Navalia* at Rome's so-called *Emporium*, which was (therefore) previously erroneously identified with the *Porticus Aemilia*, Peter Herz was kind enough to send me on 31st December 2020 the article by Lucos Cozza and Pier Luigi Tucci ("*Navalia*", 2006), as well as Pier Luigi Tucci's later article ("*La controversa storia della 'Porticus Aemilia'*", 2012). On 7th January 2021 Francesco Paolo Arata was so kind as to send me, by request, the article written by himself and Enrico Felici ("*Porticus Aemilia, navalia o horrea? Ancora sui frammenti 23 e 24 b-d della Forma Urbis*", 2011); on the same day reached me also the article by Paolo Liverani ("*Il Tevere, i ponti e l'Annona*", 2020), which Amanda Claridge was kind enough to provide me with.

Cf. below, at *A Study on the colossal portrait of Hadrian (now Constantine the Great) in the courtyard of the Palazzo dei Conservatori at Rome* (cf. here **Fig. 11**). With The Contribution by Hans Rupprecht Goette on the reworking of the portrait of Hadrian (now Constantine the Great); at Part II. *Ancient Rome's new commercial river port, at La Marmorata. With discussions of the 'Porticus Aemilia' (in reality identifiable as Navalia) and of the Horrea Aemiliana. With The sixth Contribution by Peter Herz : Rom. Strukturen der Versorgung; and with The second Contribution by Franz Xaver Schütz : Wie schwer war der ägyptische Obelisk, der heute auf der Piazza di S. Giovanni in Laterano in Rom steht?*; see also *infra*, in volume 3-2, at *Appendix IV.c.1.*).

**Between the 8th and 11th January 2021, I had the chance to discuss with Rose Mary Sheldon and T.P. Wiseman in E-mail conversations, which ancient author explicitly records that Domitian had restored the *Templum (novum) Divi Augusti*, and that he had dedicated this temple in AD 89 or 90, since the quotation I found had proved to be wrong. On 13th January 2021 Peter Wiseman was kind enough to grant me the permission to publish his E-mail of 10th January 2021 here.**

**See below, at *The second Contribution by T.P. Wiseman*; below, at Chapter II.3.1.c); and *infra*, in volume 3-2, at *Appendix IV.d.4.b*); and *Appendix V.*; at Section I.**

On 17th January 2021 Mirella Serlorenzi was so kind as to send me, by request, the article on the '*Domus Tiberiana*' on the Palatine, written by herself, Stefano Camporeale, Fulvio Coletti and Lino Traini ("*Il progetto della Domus Tiberiana (Roma): cantieri edili e topografia della pendice nord-ovest del Palatino tra l'età neroniana e l'età severiana*", 2020).

Cf. *infra*, in volume 3-2, at *Appendix I.d*) *Domitian's escape from the Capitolium on 19th December AD 69, which happened on the festival of the Opalia, one day of the Saturnalia*.

Donato Colli was kind enough to send me on 17th January 2021, on his own account, his new publication on the *Sessorianum* ("*Costantino, il Sol Invictus e il palazzo Sessoriano. Spunti, dati e considerazioni per una ricostruzione della residenza imperiale*", 2020).

Cf. *infra*, in volume 3-2, at *Appendix IV.d.4.b) Domitian's building project comprising the Campus Martius, the Capitoline Hill and the sella between Arx and Quirinal. With detailed discussion of the Templum Pacis and some remarks on Domitian's Villa, called Albanum.*

The first draft of the forthcoming monograph by Hans Rupprecht Goette ("Schwertbandbüsten der Kaiserzeit. Zu Bildtraditionen, Werkstattfragen und zur Benennung der Büste inv. 4810 im Museum der bildenden Künste in Budapest und verwandter Werke. 1. Die Schwertbandbüste Inv. 4810 im Museum der Bildenden Künste") reached me on 19th January 2021. In this text, he addresses many topics that are discussed in this *Study* on Domitian as well. On 23rd January 2021, Hans has kindly allowed me to quote *verbatim* from this manuscript; in the meantime this monograph has been published in 2021.

Cf. below, in Chapter *V.1.i.3.b)*; at Section *III.*);

and *infra*, in volume 3-2, at *A Study on the consequences of Domitian's assassination ...*

Or: *The wider topographical context of the Arch of Hadrian alongside the Via Flaminia which led to the (later) Hadrianeum and to Hadrian's Temples of Diva Matidia (and of Diva Sabina?). With discussions of ... Hadrian's portrait-type Delta Omikron (Δο) (cf. here Fig. 3) ...*; at Chapter *VI.2. Hadrian's portrait-type Delta Omikron (Δο) ...*; at Chapter *VI.2.1. H.R. Goette's (2021) discussion of Hadrian's portrait-type Delta Omikron (Δο) (cf. here Fig. 3)*. To this I will come back below. See now also *infra*, at Chapter *The major results of this book on Domitian.*

From 20th-22nd January 2021 I had the chance to discuss with Hans Rupprecht Goette, in an E-mail conversation, the cuirassed portrait-statue of Hadrian from Hierapydna (cf. here **Fig. 29**).

**On 21st January 2021, Carlo Gasparri surprised me with his elegant exhibition-catalogue (*I Marmi Torlonia. Collezionare Capolavori*, 2020), which he has edited together with Salvatore Settis. Carlo's present of this splendid catalogue became the starting point of research on Domitian's sister, Flavia Domitilla minor, since to this collection belongs an excellent portrait of her (cf. here **Fig. 54**, and *infra*, at Chapter *IV.1.1.h*). I also started studying the famous marble relief of the Collezione Torlonia, which shows ships in the *Portus Augusti* at *Portus* (cf. here **Figs. 98; 99**).**

Cf. *infra*, at *A Study on the colossal portrait of Hadrian (now Constantine the Great) in the courtyard of the Palazzo dei Conservatori at Rome (cf. here Fig. 11)*. With The Contribution by Hans Rupprecht Goette on the reworking of the portrait of Hadrian (now Constantine the Great); at Part *II. Ancient Rome's new commercial river port, at La Marmorata. With discussions of the 'Porticus Aemilia' (in reality identifiable as Navalía) and of the Horrea Aemiliana. With The sixth Contribution by Peter Herz : Rom. Strukturen der Versorgung; and with The second Contribution by Franz Xaver Schütz : Wie schwer war der ägyptische Obelisk, der heute auf der Piazza di S. Giovanni in Laterano in Rom steht?*

On 24th January 2021 Hans Rupprecht Goette sent me the publication by Martin Beckmann ("Trajan and Hadrian", 2012"), and on 26th January 2021, Hans sent me also Martin Beckmann's ("The Gold Coinage of Hadrian AD 130-138", 2019).

Cf. *infra*, at the Chapter *The major results of this book on Domitian;*

and *infra*, in volume 3-2, at *A Study on the consequences of Domitian's assassination ...*

Or: *The wider topographical context of the Arch of Hadrian alongside the Via Flaminia which led to the (later) Hadrianeum and to Hadrian's Temples of Diva Matidia (and of Diva Sabina?). With discussions of Hadrian's journey from Moesia Inferior to Mogontiacum (Mayence) in order to congratulate Trajan on his adoption by Neroa, and of Hadrian's portrait-type Delta Omikron (Δο) (cf. here Fig. 3) ...*; at Chapter *VI.2. Hadrian's portrait-type Delta Omikron (Δο). Hadrian issued coins with this portrait-type in AD 117 on tetradrachmas at Alexandria (cf. here Fig. 137) and on aurei in AD 138 at Rome, inter alia with his DIVIS PARENTIBVS on the reverse (cf. here Fig. 139), on all of which Hadrian looks straight ahead ...*; at Chapter *VI.2.2. Additional information that is of importance for the discussion of Hadrian's portrait-type Delta Omikron (Δο) (cf. here Fig. 3)*; at *Hadrian's adoption by Trajan, as propagated by Hadrian; at The tetradrachma issued by Hadrian in AD 137/138 at Alexandria to commemorate his adoption of Antoninus Pius (cf. here Fig. 138)*.

Since we had for quite some time discussed the Arch of Domitian, erected in front of the emperor's 'Domus Flavia' / Domus Augustana on the Palatine, Amanda Claridge was kind enough to send me on 6th February 2021 Alessandro Cassatella's report of his re-excavation of one of its piers ("Arco di Domiziano sul Clivo Palatino", 1986), and on 7th February 2021 the article by Maria Antonietta Tomei ("Le indagini di G. Boni all'Arco di Domiziano: gli scavi e la storia della sistemazione del pilone sotto via S. Bonaventura", 1997).

Cf. below, in Chapter VI.3. *Summary of my own hypotheses concerning the Cancelleria Reliefs presented in this Study; Addition: My own tentative suggestion, to which monument or building the Cancelleria Reliefs may have belonged, and a discussion of their possible date; and infra, in volume 3-2, in Appendix IV.d.2.f); in Appendix IV.d.4.b); and in Appendix VI.; at Section VI.*

Hans Rupprecht Goette was kind enough to send me on 10th February 2021 the article by Werner Eck ("Zur Entstehung der kaiserlichen Gladiatorenschulen in Rom: Der Ludus Dacicus", 2020; cf. *infra*, at Chapters IV.1.1.g); and IV.1.1.h); and *infra*, in volume 3-2, at Appendix IV.c); Appendix IV.d.4.); Appendix IV.d.4.a); and at Appendix IV d.4.c). Hans Goette sent me, in addition to this, Eck's ("Chapter 6. Judäa als Teil der Provinz Syrien im Spannungsfeld zwischen den Legaten von Syrien und den ritterlichen Funktionsträgern in Judäa von 6-66 n. Chr.", 2021a). Cf. below, at Chapter I.1.1.); and *infra*, in volume 3-2, at Appendix IV.c.2.).

Peter Herz was kind enough to alert me to the research of Lorenzo Cigaina on Crete. Lorenzo Cigaina, with whom I had the chance to start an E-mail correspondence on the subject of his dissertation, was kind enough to send me on 16th February 2021 his recent book (*Crete nel Mediterraneo greco-romano: identità regionale e istituzioni federali*, 2020), in which he discusses *inter alia* the portrait statue of Hadrian from Hierapydna (cf. here Fig. 29). Concentrating on the five (or six?) copies of this statue-type, found in Crete, Cigaina (2020) is able to add important new observations concerning the meaning of the iconography of this enigmatic sculpture, and concerning the date of its creation.

Cf. *infra*, at A Study on Hadrian's portrait-statue from Hierapydna (cf. here Fig. 29).

Between 15th and 18th February 2021, Eugenio La Rocca, with whom I have been discussing those sculptures in the last couple of years on the occasions of several meetings in Rome and München, was kind enough to read the resulting texts and to discuss them with me in telephone conversations.

Cf. below, at Chapter I.2.; and *infra*, in volume 3-2, at Appendix I.g.4.); Appendix IV.c.1.); and Appendix IV.c.2.)).

Since the accounts concerning those sculptures comprised in each case detailed documentations of the scholarly discussions, La Rocca suggested to me to publish them as *separate* texts. La Rocca's advice resulted in the following decision: these four separate, but interrelated monographs, that were developed from the below-mentioned *Chapters*, have, in addition to this, provided (in many cases unforeseen) new insights concerning Domitian. This is why they are, therefore, published in this book on Domitian:

To Chapter I.2. belongs the following monograph, which is published *infra*, in volume 3-2:

*A Study on the consequences of Domitian's assassination :*

*Nerva is forced to adopt Trajan and Trajan creates Domitian's negative image to consolidate his own reign. With Hadrian's adoption manquée in late October or at the beginning of November of AD 97, his 20-year long road to his accession and his thanksgivings for it, his Temple complex in the Campus Martius.*

*Or: The wider topographical context of the Arch of Hadrian alongside the Via Flaminia which led to the (later) Hadrianeum and to Hadrian's Temples of Diva Matidia (and of Diva Sabina?). With discussions of Hadrian's journey from Moesia Inferior to Mogontiacum (Mayence) in order to congratulate Trajan on his adoption by Nerva, and of Hadrian's portrait-type Delta Omikron ( $\Delta o$ ) (cf. here Fig. 3). With The fourth and the fifth Contribution by Peter Herz; with The first Contribution by Franz Xaver Schütz, with The Contribution by John Bodel, and with The second Contribution by Angelo Geißen.*

To *infra*, volume 3-2, *Appendix I.g.4.*), belongs:

*A Study on Domitian's cult-statue of Iuppiter Optimus Maximus Capitolinus* (cf. here **Fig. 10**). This, and the next two monographs, are published below, in this volume.

To *infra*, volume 3-2, *Appendix IV.c.1.*), belongs:

*A Study on the colossal portrait of Hadrian (now Constantine the Great) in the courtyard of the Palazzo dei Conservatori at Rome* (cf. here **Fig. 11**). With The Contribution by Hans Rupprecht Goette on the reworking of the portrait of Hadrian (now Constantine the Great).

And to *infra*, volume 3-2, *Appendix IV.c.2.*); belongs:

*A Study on Hadrian's portrait-statue from Hierapydna* (cf. here **Fig. 29**).

**On 15th February 2021, Hans Rupprecht Goette was kind enough to send me the article by Sam Heijnen ("Living up to expectations. Hadrian's military representation in freestanding sculpture", 2020)**

*Cf. infra*, at *A Study on Hadrian's portrait-statue from Hierapydna* (cf. here **Fig. 29**).

**And on 18th February 2021, Hans Rupprecht Goette sent me, likewise on his own account, Werner Eck's article ("Hadrian mit dem Titel ›proconsul‹ als Bauherr in Rom. Zur Neuinterpretation von CIL VI 40518, einer stadtrömischen Bauinschrift", 2019b).**

**In my publication of 2017, I had followed Michaela Fuchs's interpretations (2014) concerning the inscription CIL VI 40518 (cf. here **Fig. 91.1**), to which Werner Eck refers in the title of this article, and which he rejects. I myself follow some of Eck's arguments (2019b), and have decided to add to this *Study on Domitian* a discussion of this controversy, and to correct my own relevant errors of 2017. To write this additional text kept me busy for more than two full years.**

*Cf. infra*, in volume 3-2, at *A Study on the consequences of Domitian's assassination ...*

*Or: The wider topographical context of the Arch of Hadrian alongside the Via Flaminia which led to the (later) Hadrianeum and to Hadrian's Temples of Diva Matidia (and of Diva Sabina?)...;*

*Introduction; at Section I. The motivation to write this Study: W. Eck's (2019b) new interpretation of the inscription CIL VI 40518 (cf. here **Fig. 91.1**), the decision to correct my own relevant errors in my earlier Study (2017), and the subjects discussed here, as told by the accompanying figures and their pertaining captions;*

*at Chapter II. W. Eck's (2019b) critique of the hypotheses published by M. Fuchs (2014) concerning the inscription CIL VI 40518 (cf. here **Fig. 91.1**) and the Arch of Hadrian discussed here; and at Chapter IV. Summary of my own research (2017) of this Arch of Hadrian, updated with W. Eck's (2019b) new findings concerning this subject.*

In addition to this, Hans Rupprecht Goette sent me Caroline Barron's article ("Dedication for a statue of Hadrian near the Temple of Vespasian and Titus (CIL VI, 974 = CIL VI, 40524), 2018"); cf. here **Fig. 29.1**.

*Cf. below*, at *A Study on Hadrian's portrait-statue from Hierapydna* (cf. here **Fig. 29**).

**On 23rd February 2021, Eugenio la Rocca was kind enough send me, by request, two of his articles (cf. *id.*: "Traianus vs. [versus] Domitianus. Dalla rappresentazione del potere imperiale all'usurpazione dei Monumenti pubblici", 2017).**

*Cf. infra*, at *A Study on Hadrian's portrait-statue from Hierapydna* (cf. here **Fig. 29**); at Chapter *The major results of this book on Domitian*; and *infra*, in volume 3-2, at *Appendix IV.d.4.c.*

The other article was : La Rocca ("La testa colossale di Tito nel Museo Nazionale di Napoli: uno scandalo agli albori dell'unità d'Italia", 2020b; cf. here Fig. 53), on the already mentioned colossal head of Titus at the Museo Archeologico Nazionale at Napoli, which La Rocca (2009) has recognized as the head of the cult-statue of *Divus Titus* in Domitian's *Templum Gentis Flaviae*. La Rocca's article (2020b) contains the archaeological plans of the area here Figs. 56; 57, in which the findspot of this portrait of Titus and the location of the *Templum Gentis Flaviae* are marked.

Cf. *infra*, at Chapter IV.1.1.h); at *A Study on Domitian's cult-statue of Iuppiter Optimus Maximus Capitolinus* (cf. here Fig. 10); at Part II.; and below, at *The Contribution by Eric M. Moormann : Can we Reconstruct the Templum Gentis Flaviae?*; and at *The Contribution by Mario Torelli on the Templum Gentis Flaviae*.

On 7th May 2021, Eugenio La Rocca was kind enough to send me, on request, his illustrations of the colossal head of Titus at the Museo Archeologico Nazionale at Napoli (Fig. 53), which I may publish here with his kind consent (cf. *infra*, at Chapter IV.1.1.h); and at *A Study on Domitian's cult-statue of Iuppiter Optimus Maximus Capitolinus* (cf. here Fig. 10); at Part II.).

Apropos, the maps and plans of the areas in Rome discussed in this *Study on Domitian*. In March of 1999 the then Sovraintendente ai Beni Culturali of the Comune di Roma, Eugenio La Rocca, had generously provided Franz Xaver Schütz and me with the official photogrammetric data of the Comune di Roma (now *Roma Capitale*) for our research projects on the basis of which our Rome maps have been drawn since then. In February of 2004, the Sovraintendente ai Beni Culturali of Roma Capitale, Claudio Parisi Presicce, kindly renewed this contract, granting us also the permission to publish the photogrammetric data *themselves*, even on the internet.

See the maps here Figs. 8.1; 58; 59; 60; 61; 62; 63; 64; 65; 66; 71; 72; 73; 74; 75; 76.

On 25th February 2021 I started a series of discussions with Peter Herz on hypotheses published by Werner Eck (2019b), *inter alia* on Hadrian's title *proconsul* in the inscription CIL VI 40518 (cf. here Fig. 91.1).

Cf. *infra*, in volume 3-2, at *A Study on the consequences of Domitian's assassination ...*

Or: *The wider topographical context of the Arch of Hadrian alongside the Via Flaminia which led to the (later) Hadrianeum and to Hadrian's Temples of Diva Matidia (and of Diva Sabina?)...*; at Chapter II. W. Eck's (2019b) critique of the hypotheses published by M. Fuchs (2014) concerning the inscription CIL VI 40518 (cf. here Fig. 91.1) and the Arch of Hadrian discussed here; and at Chapter IV. Summary of my own research (2017) of this Arch of Hadrian, updated with W. Eck's (2019b) new findings concerning this subject.

In this '*Study on the consequences of Domitian's assassination*' is also mentioned the fact that Hadrian had been advised to congratulate Trajan on his adoption by Nerva. Discussing the matter with Peter Herz, he was kind enough to correct the date of this important event that I had mentioned so far in this *Study on Domitian* (cf. *infra*, at Chapters II.3.1.a); and II.3.2.). On my request, Peter Herz has written me in an E-mail, what he had explained to me on 9th March 2021 concerning Trajan's adoption in this telephone-conversation, and on 11th March 2021, he has generously allowed me to publish this here.

See below, at *The fourth Contribution by Peter Herz : Wann wurde Trajan von Nerva adoptiert?*

Between the 4th and the 26th of March 2021, I had the chance to discuss with Rose Mary Sheldon in an Email- correspondence the recent controversy concerning the question, whether or not Hadrian had in person led a campaign in the course of suppressing the Bar Kokhba Revolt.

Cf. *infra*, in volume 3-2, at *A Study on the consequences of Domitian's assassination ...*

Or: *The wider topographical context of the Arch of Hadrian alongside the Via Flaminia which led to the (later) Hadrianeum and to Hadrian's Temples of Diva Matidia (and of Diva Sabina?)...*; at Chapter III. Was Hadrian himself present at the suppression of the Bar Kokhba Revolt?; and at Appendix IV.c.2.).

See also below, at *A Study on Hadrian's portrait-statue from Hierapydna* (cf. here **Fig. 29**); and at *A Study on the colossal portrait of Hadrian (now Constantine the Great) in the courtyard of the Palazzo dei Conservatori at Rome* (cf. here **Fig. 11**). With The Contribution by Hans Rupprecht Goette on the reworking of the portrait of Hadrian (now Constantine the Great).

**On 9th March 2021, Ilaria Romeo was kind enough to send me, on her own account, her new study on the statue-type 'Athena in corsa' ('Un'Athena capitolina, il puteale di Madrid e il frontone Est del Partenone', 2020).**

Romeo (2020) convincingly suggests that the statue-type 'Athena in corsa' copies the Athena from the Eastern pediment of the Parthenon at Athens, which shows the 'birth of Athena'. In addition to this, Romeo (2020, 850 with n. 53) discusses the important observation that the figure of Minerva on Frieze A of the Cancellaria Reliefs (cf. here **Fig. 1**; **Figs. 1 and 2 drawing**; **figure 5**) is modelled on this statue-type 'Athena in corsa' (!). - To this I will come back below.

For Domitian's interest in the Acropolis of Athens, see also the already-mentioned article by Hans Rupprecht Goette, in which he has *inter alia* studied Domitian's *Albanum* ("The Portraits of Aeschylus, Sophocles, Euripides, and Menander in Roman Contexts. Evidence of the Reception of the Theatre Classics in Late Republican and Imperial Rome"). In this article, Goette suggests that the overall design of Domitian's *Villa*, called *Albanum* may be regarded as "inspired by the topographical situation of the Athenian Acropolis with its south slope"; my thanks are due to Hans Rupprecht Goette for having discussed this subject with me again in an E-mail of 17th June 2022, in which he has suggested the just-quoted formulation to me.

Cf. Hans Rupprecht Goette ("The Portraits of Aeschylus, Sophocles, Euripides, and Menander in Roman Contexts. Evidence of the Reception of the Theatre Classics in Late Republican and Imperial Rome", which has in the meantime been published in 2022).

Already Paolo Liverani (in an unpublished manuscript), because of copies of two sculpture groups, found at Domitian's *Albanum*, the famous originals of which had been dedicated on the Acropolis at Athens, has observed that, 'these two sculpture groups could have created together [for Domitian's *Albanum*] "il modello dell'Acropoli ateniese"'. Licia Luschi (2015, 13 n. 115) has followed this (unpublished) idea of Paolo Liverani, and I myself follow both scholars. - To this I will come back below.

Cf. *infra*, in Chapter *Preamble*; Section *III.*; at point *4.*); below, at *A Study on Domitian's cult-statue of Iuppiter Optimus Maximus Capitolinus* (cf. here **Fig. 10**); and *infra*, in volume 3-2, at *Appendix IV.d.4.b* *Domitian's building project comprising the Campus Martius, the Capitoline Hill and the sella between the Arx and the Quirinal. With detailed discussion of the Templum Pacis*, and some remarks on Domitian's *Villa*, called *Albanum*.

Ilaria Romeo (2020, 850 with n. 54) follows Ferdinando Castagnoli (1960), who was one of the scholars who believed that Domitian's coin (cf. here **Fig. 84**), which shows a temple with a cult-image copying the statue-type 'Athena in corsa', should be identified with Domitian's (alleged) Temple of Minerva Chalcidica; cf. Francesca de Caprariis ("Minerva Chalcidica, Templum", in: *LTUR* III [1996] 255, Fig. I, 122; Fig. 174 [= here **Fig. 84**]). Also Frederick G. Naerebout (2021, 149 with n. 18) and Diane Atnally Conlin (2021, 158) still (erroneously) believe that 'Minerva Chalcidica' was a temple.

Romeo (2020), Naerebout (2021) and Atnally Conlin (2021) have not realized that Mario Torelli (2003; 2004a) has been able to demonstrate that *a*) Domitian's Minerva Chalcidica was a fountain (as had also been realized by earlier scholars), and *b*) that on top of this fountain was placed a colossal statue of a *standing* Minerva *promachos* instead. Cf. here **Figs. 59; 60; 61**, labels: ISEUM; SERAPEUM; Piazza Collegio Romano; Former site of S. Marta and of the Monastero d'Agostiniane; Fountain: MINERVA CHALCIDICA.

**Fig. 84.** *Denarius, issued by Domitian, BMC 241 (undated), allegedly showing the round Temple of Minerva Chalcidica, within which its cult-statue is visible . In reality this temple is not identified. Cf. R.H. Darwall-Smith (1996, 125, 280, Fig. 33 on Plate XX); cf. LTUR III (1996) 476, Fig. 174: "... Denario di Domiziano del 94-96 d.C. BMCEmp II, 346 N. 241 tav. 67.7". The represented statue-type is called 'Athena in corsa'.*

See below, in Chapter *Preamble; Section III.*, at point 4.); and *infra*, in volume 3-2, at *Appendix I.g) The shrines built by Domitian as a thanksgiving for his escape from the Capitolium (sacellum of Iuppiter Conservator, Temple of Iuppiter Custos, and in a certain sense also his [fourth] Temple of Iuppiter Optimus Maximus Capitolinus), and some other of his buildings in Rome, which are documented on his coins.*

Other scholars have identified the Minerva that (allegedly) belongs to Domitian's (alleged) Temple of Minerva Chalcidica (cf. here **Fig. 84**) with the statue of Minerva standing in the central bay of the "ARCUS AD ISIS" (cf. here **Figs. 89; 90**), which appears on one of the reliefs from the Tomb of the Haterii; cf. Häuber (2014a, 787). These scholars (erroneously) assume that this "ARCUS AD ISIS" may be identified with the 'Arco di Camilliano' (or 'Arco di Camigliano') standing immediately to the east of the Iseum Campense.

In reality, the "ARCUS AD ISIS" stood at the former site of the *Porta Querquetulana* within the Servian city wall and bridged the ancient road underneath the modern *Via Labicana*. The "ARCUS AD ISIS" had presumably been erected by the Roman Senate in honour of Vespasian. The inscription "ARCUS AD ISIS" on this arch (cf. here **Figs. 89; 90**), therefore, refers to the sanctuary *Isis et Serapis* in *Regio III*, and the arch itself was the eastern entrance of the new 'Colosseum city', begun by Vespasian and completed by Domitian. The statue of Minerva (cf. here **Figs. 89; 90**), standing under the central bay of this arch, may, therefore, be identified with the cult-statue of Minerva Medica, built by Maecenas on the substructure in *Via Pasquale Villari*, which stands immediately to the north of the *Porta Querquetulana* / "ARCUS AD ISIS"; cf. Häuber (forthcoming, *Laocoon*, Chapter IV.2.8.).

For discussions of all that; cf. *infra*, at Chapter IV.1.1.g) *The controversy concerning the "ARCUS AD ISIS" that is visible on a relief from the Tomb of the Haterii (cf. here Figs. 89; 90): it cannot be identified with the Arco di Camilliano to the east of the Iseum Campense, but stood instead near the Temple of Isis et Serapis in Regio III. With a summary of Domitian's 'pharaonic project', called 'Colosseum city'.*

The question remains, which one of Domitian's temples of Minerva did Domitian's coin (here **Fig. 84**) represent?

For a discussion of this question, and of the other coins of Domitian which represent temples built by him; cf. *infra*, in volume 3-2, at *Appendix I.g) The shrines built by Domitian as a thanksgiving for his escape from the Capitolium (sacellum of Iuppiter Conservator, Temple of Iuppiter Custos, and in a certain sense also his [fourth] Temple of Iuppiter Optimus Maximus Capitolinus), and some other of his buildings in Rome, which are documented on his coins.*

Likewise on 9th March 2021 Hans Rupprecht Goette's article ("Bellerophon zähmt Pegasos", 2020b) reached me. Cf. *infra*, in volume 3-2, at *Appendix IV.c.2.*

On 16th March 2021 Peter Herz was kind enough to send me, on his own account, the articles by Henner von Hesberg ("Das Augustus-Mausoleum in Rom und die Verehrung der römischen Herrscher", 2021), and Alfred Schäfer ("Symbols of Power. The Tombs of Roman Rulers and Roman Victory Monuments", 2021). Cf. *infra*, at Chapter V.1.i.3.a).

In addition, Peter Herz sent me on 19th March 2021 his manuscript (*Untersuchungen zur Geschichte Marc Aurels. Wie verhielt sich das Imperium Romanum in den Zeiten einer Krise?*), and generously allowed me in a telephone conversation on 20th March 2021 to quote *verbatim* from this text.

Cf. *infra*, in volume 3-2, at *A Study on the consequences of Domitian's assassination ....*

Or: *The wider topographical context of the Arch of Hadrian alongside the Via Flaminia which led to the (later) Hadrianeum and to Hadrian's Temples of Diva Matidia (and of Diva Sabina?)...; at Chapter III. Was Hadrian himself present at the suppression of the Bar Kokhba Revolt?*

**Because I had asked him in this context, whether we know how many people were involved in managing the  *fiscus*  (i.e., the imperial treasury, or else the emperor's private 'bank'), Peter Herz also recommended that I consult also in this case his already mentioned manuscript on the administration of the Roman state in the Imperial period, the current version of which he was so kind as to send me on 20th March 2021 ("SPQR", Arbeitstitel), from which he has kindly allowed me to quote here as well.**

Cf. *infra*, in volume 3-2, at *Appendix IV.b.1.) The meaning of the suovetaurilia, which appear on both Anaglypha Hadriani (cf. here Figs. 21.A; 22.A); at Appendix IV.b.2.) The Aerarium publicum populi Romani at the Temple of Saturn with the pertaining archive at the site of the Porticus of the Dei Consentes, called Tabularium publicum; Domitian's transfer of this archive to his Palace on the Palatine at the (later) Vigna Barberini, which was now called Tabularium principis, tabularium Caesaris or sanctuarium Caesaris, and the Anaglypha Hadriani (cf. Figs. 21; 22).*

**In the context of my research related to the Arch of Hadrian alongside the *Via Flaminia*, I had the chance to discuss with Peter Herz in telephone conversations on 21st and 22nd March of 2021 Hadrian's legal status at the moment when he went to Mogontiacum (Mainz) at the end of October AD 97 in order to congratulate Trajan on his adoption by Nerva.**

And because in his own manuscript on Marcus Aurelius, which he had sent me earlier, Herz has mentioned several military campaigns, conducted in this period that were called *expeditio* in our sources, I had the chance to discuss with him on 24th March 2021 my ideas concerning the meaning of this term.

Finally, on 30th March 2021, I was able to discuss with Peter Herz the question of how fast Hadrian, in late October of November of AD 97, could (in theory) have gotten from Moesia *Inferior*, where he was based as senatorial tribune of *legio V Macedonica*, to Mogontiacum (Mayence, Mainz) in order to congratulate Trajan on his adoption by Nerva. Peter Herz was kind enough to study also this question and wrote a text, which would later become *The fifth Contribution by Peter Herz : Der Ritt Hadrians nach Mogontiacum*.

See *infra*, in volume 3-2, at *A Study on the consequences of Domitian's assassination ...*

Or: *The wider topographical context of the Arch of Hadrian alongside the Via Flaminia which led to the (later) Hadrianeum and to Hadrian's Temples of Diva Matidia (and of Diva Sabina?). With discussions of Hadrian's journey from Moesia Inferior to Mogontiacum (Mayence) in order to congratulate Trajan on his adoption by Nerva, and of Hadrian's portrait-type Delta Omikron ( $\Delta$ ) (cf. here Fig. 3). With The fourth and the fifth Contribution by Peter Herz, with The first Contribution by Franz Xaver Schütz, with The Contribution by John Bodel, and with The second Contribution by Angelo Geißen; at Chapter III. Was Hadrian himself present at the Bar Kokhba Revolt?; and at Chapter VI.1. My 2. Conclusion: In this context it is interesting to analyse the process by which Hadrian finally became emperor; at Trajan's adoption by Nerva and Hadrian's Parforceritt from Moesia Inferior to Mogontiacum to congratulate Trajan on his adoption.*

**Michaela Fuchs was kind enough to provide me on 27th March 2021, on request, with her illustrations of the four Hadrianic reliefs (cf. here Figs. 91-94) that originally belonged to the Arch of Hadrian discussed here, and that she has published as her Figs. 12; 16; 21; 22 in her above-mentioned article (cf. *ead.*, "Ein Ehrenbogen für Hadrian in Rom: Würdigung eines vielseitigen Kaisers am Ende seines Lebens", 2014).**

Cf. *infra*, in volume 3-2, at *A Study on the consequences of Domitian's assassination ...*

Or: *The wider topographical context of the Arch of Hadrian alongside the Via Flaminia which led to the (later) Hadrianeum and to Hadrian's Temples of Diva Matidia (and of Diva Sabina?)...; Introduction; at Section I. The motivation to write this Study: W. Eck's (2019b) new interpretation of the inscription CIL VI 40518 (cf. here Fig. 91.1), the decision to correct my own relevant errors in my earlier Study (2017), and the subjects discussed here, as told by the accompanying figures and their pertaining captions; at Chapter I. The Arch of Hadrian alongside the Via Flaminia and the four marble reliefs belonging to it (cf. here Figs. 91-94); at Chapter II. W. Eck's (2019b) critique of the hypotheses published by M. Fuchs (2014) concerning the inscription CIL VI 40518 (cf. here Fig. 91.1) and the Arch of Hadrian discussed here; at Chapter IV. Summary of my own research (2017) of this Arch of Hadrian, updated with W. Eck's (2019b) new findings concerning this subject; at Chapter V. The results of this discussion of this Arch of Hadrian and my 1. Conclusion; at Chapter VI. The results of this discussion of this Arch of Hadrian and my 2. Conclusion. This is based on the topographical context of this Arch of Hadrian and on some considerations concerning Hadrian's accession and is in my opinion the preferable scenario.*

**Likewise on 27th March 2021 the manuscript by our good friend, the art historian Laura Gigli reached me (cf. *ead.*, "Dal faro di Alessandria alla banchina di Santa Passera: viaggio fra realtà e immaginazione", 2022, which has been published in the meantime).**

This she was kind enough to send me by request, since it very vividly helps to understand the life of those merchants, in this case coming from Alexandria, who supplied the ancient City of Rome with goods from all over the Roman Empire. On 30th March 2021, Laura generously allowed me to quote *verbatim* from her text, and on 31st March 2021, Laura sent me, on request, the article written by herself and Gianfrancesco Solferino ("La chiesa di Santa Passera. Riflessioni sui dipinti del presbiterio", 2016).

Cf. *infra*, at *A Study on the colossal portrait of Hadrian (now Constantine the Great) in the courtyard of the Palazzo dei Conservatori at Rome (cf. here Fig. 11). With The Contribution by Hans Rupprecht Goette on the reworking of the portrait of Hadrian (now Constantine the Great); at Part II. Ancient Rome's new commercial river port, at La Marmorata. With discussions of the 'Porticus Aemilia' (in reality identifiable as Navalia) and of the Horrea Aemiliana. With The sixth Contribution by Peter Herz : Rom. Strukturen der Versorgung; and with The second Contribution by Franz Xaver Schütz : Wie schwer war der ägyptische Obelisk, der heute auf der Piazza di S. Giovanni in Laterano in Rom steht?*

**Hans Rupprecht Goette, with whom the discussions on *La Marmorata* had started, when seeing the first draft of the resulting text, was kind enough to send me on 6th April 2021, on his own account, his own photograph of a famous marble relief from the Quadrifrons/ Tetrapylon at Leptis Magna, that I mention in this text, and kindly allowed me to publish this photo here (cf. here Fig. 100). This relief represents Septimius Severus and his wife and two sons, Iulia Domna, Augustus Caracalla and Caesar Geta, and is on display in the Archaeological Museum at Tripoli (Libya).**

**In order to get an idea of how the ancient city of Rome was supplied with goods from all over the then known parts of the world, the study of the ports of Rome are of the greatest importance.**

Already on 25th February 2010 the late Simon Key was so kind as to present Franz Xaver Schütz and me with his book, written by himself together with Martin Millett, Lidia Paroli and Kristian Strutt (*Portus*, 2005). In this book are published plans (cf. here Figs. 95-97), which show how the layouts of the Port of Claudius and of the Trajanic Harbour developed over time. To get an idea, how busy the Trajanic harbour was, we need only to look at the famous, already mentioned marble relief in the Museo Torlonia, dating to the Severan period, which shows ships in the *Portus Augusti* at Portus (cf. here Figs. 98; 99).

The latter two harbours were connected by means of the *Fossa Traiana* and the *Canale Romano* with the Tiber. It is fascinating to imagine that the heaviest documented object in antiquity that was with certainty transported on the Tiber must have been shipped on those canals. I am referring to the Lateran Obelisk (cf. her Fig. 101), which came from Egypt in AD 357, and travelled here to its final destination in antiquity, the

*spina* in the *Circus Maximus*. Its size and weight at this time are disputed. I myself, like Emanuele Ciampini and Franz Xaver Schütz, follow the late Egyptologist Labib Habachi (2000, 49, 67), according to whom the Lateran Obelisk was at that stage 34 m high. Today it is 'only' 32,18 m high, but it still weighs 455 tons, according to Habachi.

Other scholars, for example Patrizio Pensabene and Javier Á. Domingo (2016-2017, 580, with n. 195, providing references) believe that the Lateran Obelisk was already in AD 357 (like today) 'only' 32 m high, and that it weighs 'only' 350 tons.

Also (almost) all the marble blocks, which were used in Domitian's enormous building sites all over the city of Rome were imported via Portus and the Tiber. At Rome's new commercial river port (by many scholars, in my opinion, erroneously identified with the *Emporium*) on the left bank of the Tiber (cf here **Figs. 102; 103**), at the foot of the Aventine, not by chance called *La Marmorata* in post-antique times, were found over the last centuries countless blocks of ancient building material. Many of the marble blocks, found there, carry consular dates, and of those by far the most date to the reign of Domitian. Not by chance the only representation of a marble block, shipped on the Tiber, is to be found on the plinth of Domitian's statue of the Tiber (cf. here **Figs. 104; 105; 106**), which the emperor had commissioned for his newly restored Iseum Campense (to this I will come back below).

For discussions of all that, cf. *infra*, at *A Study on the colossal portrait of Hadrian (now Constantine the Great) in the courtyard of the Palazzo dei Conservatori at Rome* (cf. here **Fig. 11**). With The Contribution by Hans Rupprecht Goette on the reworking of the portrait of Hadrian (now Constantine the Great); at Part II. *Ancient Rome's new commercial river port, at La Marmorata. With discussions of the 'Porticus Aemilia' (in reality identifiable as Navalía) and of the Horrea Aemiliana.* With The sixth Contribution by Peter Herz : Rom. Strukturen der Versorgung; and with The second Contribution by Franz Xaver Schütz : Wie schwer war der ägyptische Obelisk, der heute auf der Piazza di S. Giovanni in Laterano in Rom steht?

**Laura Gigli sent me on 7th April 2021, on her own account, an article written by herself and the architect Giuseppe Simonetta, which had come out in the last couple of days and right in time to be incorporated here ("Storia di un ritorno e del rinnovamento di un dono: Palazzo Capranica in Roma", 2018 [2021]).**

In this publication, Simonetta and Gigli (2018) have published, for the first time, the reconstructed ground-plan of an ancient building (cf. here **Figs. 67; 67.1**), which they have found in the basements of Palazzo Capranica at Rome.

Following my suggestion in Häuber (2017, 218-322; cf. here **Figs. 62-66**) to locate the Temple of Matidia, built by Hadrian, right there, Simonetta and Gigli (2018) likewise identify this building as the Temple of Matidia. Not having had access to those architectural finds in the basement of Palazzo Capranica when I conducted my earlier research (published 2017), I reconstructed the ground-plan of this temple with a very similar ground-plan, basing my reconstruction *inter alia* on Giambattista (G.B.) Nolli's large Rome map of 1748 (cf. here **Figs. 62; 63**) and on Hadrian's medallion which represents his Temple of Matidia (cf. here **Fig. 68**). In this context I had also studied a drawing of the "Tempio di Siepe" at Windsor and Alò Giovannoli's etching of the "Tempio di Siepe" (cf. here **Figs. 69.1; 69.2**).

And on 15th April Laura Gigli sent me, on request, the article by Alessandra Eula ("Il palazzo del cardinal Capranica", with Fig. 22.a.b), who has published a plan that shows Cardinal Domenico Capranica's huge garden behind his Palazzo, in which he grew vegetables for the students of his 'Collegio Capranica'. This garden extended so far north and north-east that it covered parts of the current Piazza in Montecitorio. - For Cardinal Domenico Capranica's vegetable garden; cf. also the Rome map by Giovanni Battista Falda (1676; here **Fig. 69.3**).

For all that; cf. *infra*, in volume 3-2, at *A Study of the consequences of Domitian's assassination ..*

Or: *The wider topographical context of the Arch of Hadrian alongside the Via Flaminia which led to the (later) Hadrianeum and to Hadrian's Temples of Diva Matidia (and of Diva Sabina?) ...;*

at Chapter VI. *The results of this discussion of this Arch of Hadrian and my 2. Conclusion. This is based on the topographical context of this Arch of Hadrian and on some considerations concerning Hadrian's accession and is in my opinion the preferable scenario;* at *The Templum Divae Matidiae ('Precinct of Diva Matidia') with Hadrian's Temple complex discussed here. With the correct location of the Temple of Diva Matidia (cf. here Figs. 67; 67.1), and new findings concerning the "Tempio di Siepe", and concerning the TEM PL[...], which is recorded by the inscription on fragment 36b of the Severan Marble Plan (cf. here Figs. 132-134) and refers to a Templ(um) of Diva Sabina?: a 'Precinct of Diva Sabina'? or a Temple of Diva Sabina?;* at *To whom was the second temple (seemingly) within the Templum Divae Matidiae (the 'Precinct of Diva Matidia') dedicated: to Diva Sabina or to Diva Plotina? (cf. here Figs. 66; 135; 136);* and at *The "Tempio di Siepe" (cf. here Figs. 69.1; 69.2).*

**On 8th April 2021, Javier Á. Domingo was kind enough to send me, on request, a photo of the relief (here Fig. 105).**

Domingo and Patrizio Pensabene have published this relief in their article ("Foro Traiano: Organizzazione del cantiere e approvvigionamento dei armi alla luce dei recenti dati di Palazzo Valentini. I. Il Cantiere, l'approvvigionamento dei marmi, il trasporto e i costi dei grandi monoliti in granito del Foro e in sienite", 2016-2017, 573, Fig. 15). This relief represents a ship on the Tiber transporting a huge block of marble and decorates the base of the famous statue of the River God Tiber in the Louvre in Paris (cf. here Fig. 104). This statue was once on display in the water basin in front of the Temple of Serapis at the Iseum Campense which was built anew by Domitian after this sanctuary had been completely destroyed in the great fire of AD 80.

**Pensabene and Domingo (2016-2017, 527-534, Section: "La gestione del progetto architettonico [of the Forum of Trajan] e l'approvvigionamento dei materiali") rightly stress the admirable management of the enormous building site of the (future) Forum of Trajan. - to their observations we should add, that it was Domitian, who had already planned and begun this huge forum (the later 'Forum of Trajan').**

For all that, cf. *infra*, at *A Study on the colossal portrait of Hadrian (now Constantine the Great) in the courtyard of the Palazzo dei Conservatori at Rome (cf. here Fig. 11). With The Contribution by Hans Rupprecht Goette on the reworking of the portrait of Hadrian (now Constantine the Great);* at Part II. *Ancient Rome's new commercial river port, at La Marmorata. With discussions of the 'Porticus Aemilia' (in reality identifiable as Navalia) and of the Horrea Aemiliana. With The sixth Contribution by Peter Herz : Rom. Strukturen der Versorgung; and with The second Contribution by Franz Xaver Schütz : Wie schwer war der ägyptische Obelisk, der heute auf der Piazza di S. Giovanni in Laterano in Rom steht?*

Hans Rupprecht Goette was also kind enough to send me on 9th April 2021 the article by Werner Eck ("14. The Extraordinary Roman Military Presence in Judaea from AD 70 until the 3<sup>rd</sup> Century", 2021b).

Cf. *infra*, in volume 3-2, at *A Study on the consequences of Domitian's assassination ...*

Or: *The wider topographical context of the Arch of Hadrian alongside the Via Flaminia which led to the (later) Hadrianeum and to Hadrian's Temples of Diva Matidia (and of Diva Sabina?) ...;* at Chapter III. *Was Hadrian himself present at the suppression of the Bar Kokhba Revolt?*

**Amanda Claridge, with whom I had discussed the above-mentioned photo of the Tiber ship (here Fig. 105), represented on the plinth of Domitian's statue of the Tiber (here Fig. 104), was kind enough to send me on 9th April 2021 information concerning a drawing of the plinth of this statue, which belongs to the 'Paper Museum' of Cassiano Dal Pozzo and is kept at Windsor, Royal Library (RL 8739; cf. here Figs. 106).**

Amanda Claridge and Eloisa Dodero will publish this drawing in their catalogue raisonné (*The Paper Museum of Cassiano dal Pozzo*, Series A, Part III, *Sarcophagi and Reliefs*, 4 vols. forthcoming, cat. no. 563; these volumes have appeared in the meantime in 2022). - To this I will come back below.

**Between 10th and 16th April 2021 the different versions of *The fifth Contribution by Peter Herz* in this volume reached me. On 17th April 2021, Peter Herz generously granted me the permission to publish the final version.**

*See below, at The fifth Contribution by Peter Herz : Der Ritt Hadrians nach Mogontiacum.*

Hans Rupprecht Goette, with whom I had already discussed for a long time the subjects of the relevant *Chapter*, was kind enough to send me by E-mail on 15th April 2021 his comments. In addition, Hans sent me, on his own account, the final version of his manuscript (*Schwertbandbüsten der Kaiserzeit. Zu Bildtraditionen, Werkstattfragen und zur Benennung der Büste inv. 4810 im Museum der bildenden Künste in Budapest und verwandter Werke*, 2021), and on 18th April 2021 the article by Andrew Burnett ("Trajan Optimus", 2017).

For all that; cf. below, at *The fifth Contribution by Peter Herz: Der Ritt Hadrians nach Mogontiacum*; and *infra*, in volume 3-2, at *A Study on the consequences of Domitian's assassination ...*

Or: *The wider topographical context of the Arch of Hadrian alongside the Via Flaminia which led to the (later) Hadrianeum and to Hadrian's Temples of Diva Matidia (and of Diva Sabina?). With discussions of Hadrian's journey from Moesia Inferior to Mogontiacum (Mayence) in order to congratulate Trajan on his adoption by Nerva, and of Hadrian's portrait-type Delta Omikron (Δο) (cf. here Fig. 3)...; at Chapter VI.2. Hadrian's portrait-type Delta Omikron (Δο). Hadrian issued coins with this portrait-type in AD 117 on tetrachmas at Alexandria (cf. here Fig. 137) and on aurei in AD 138 at Rome, inter alia with his DIVIS PARENTIBVS on the reverse (cf. here Fig. 139), on all of which Hadrian looks straight ahead. This portrait-type is also known from two marble heads and two marble busts (cf. here Fig. 3), in all of which Hadrian turns to his left. The date of those marble portraits is debated. Concerning this portrait-type we need to answer the following questions, 1.) when exactly was this youthful likeness of Hadrian created?, connected with the further question: had Hadrian commissioned its prototype in order to commemorate a specific event in his youth?; and 2.), what was Hadrian's intention at the end of his life, when he ordered for the first time marble portraits in the round of himself of this portrait-type?; and at Chapters VI.2.1.; VI.2.2.; VI.2.3.*

For a summary of this research; cf. *infra*, at Chapter *The major results of this book on Domitian*.

**Peter Herz sent me, on his own account, on 16th April 2021 the article by Markus Handy ("Strategien zur Legitimierung der Ermordung des Domitian", 2015). Reading this interesting essay has resulted in my decision to add a Preamble to this book on Domitian:**

Cf. *infra*, in Chapter *Preamble: Domitian's negative image*; at Section I. 'The intentional creation of Domitian's negative image', here presented by discussing relevant text passages from Markus Handy ("Strategien zur Legitimierung der Ermordung des Domitian", 2015) and from Peter L. Viscusi (*Studies on Domitian*, 1973); and *infra*, in volume 3-2, at *A Study on the consequences of Domitian's assassination ... Or: The wider topographical context of the Arch of Hadrian alongside the Via Flaminia which led to the (later) Hadrianeum and to Hadrian's Temples of Diva Matidia (and of Diva Sabina?) ...; at Chapter VI.1.*

On 4th May 2021, Hans Rupprecht Goette sent me, on his own account, the article by Fabrice Delrieux ("Les frappes provinciales romaines de Mylasa en Carie au nom de M. Iulius Damianus. Un acte d'évergétisme monétaire sous Hadrian", 2017).

Cf. *infra*, in volume 3-2, at *A Study of the consequences of Domitian's assassination ...*

Or: *The wider topographical context of the Arch of Hadrian alongside the Via Flaminia which led to the (later) Hadrianeum and to Hadrian's Temples of Diva Matidia (and of Diva Sabina?). With discussions of Hadrian's journey from Moesia Inferior to Mogontiacum (Mayence) in order to congratulate Trajan on his adoption by Nerva,*

and of Hadrian's portrait-type Delta Omikron ( $\Delta o$ ) (cf. here **Fig. 3**) ...; at Chapter VI.2.3. My own interpretation of Hadrian's portrait-type Delta Omikron ( $\Delta o$ ) (cf. here **Figs. 3**); at How adoptions could be visualized on coins: Nerva/Trajan, Trajan/Hadrian, Hadrian/Aelius Caesar, Hadrian/ Antoninus Pius, Antoninus Pius/Marcus Aurelius.

**On 10th May 2021, Hans Rupprecht Goette sent me, on request, the article by Klaus Stemmer ("Fragment einer kolossalen Panzerstatue Domitians? Zur Kolossalität in Flavischer Zeit", 1971); cf. here Fig. 5.**

Klaus Stemmer (1971) has (convincingly) dated this fragment (here **Fig. 5**) to the Flavian period, and because the cuirass of the represented man is decorated with a huge *gorgoneion*, he has identified the pertaining colossal cuirassed statue as a portrait of 'Domitian as Jupiter'.

Cf. *infra*, in Chapter *Preamble: Domitian's negative image*; at Section II. *Conclusions: Domitian's representations of his military successes and his claims to be of divine descent and to possess a divine nature*; below, at Chapter *The major results of this book on Domitian*; and *infra*, in volume 3-2, at Appendix IV.c.2.) *The Ogulnian monument (a statue group representing the she-wolf suckling Romulus and Remus, standing underneath the sacred fig tree ficus Ruminalis), and she-wolf suckling Romulus and Remus on a headless cuirassed statue of Flavian emperor (Domitian?) in the Vatican Museums (cf. here Fig. 6, right) and on Hadrian's cuirassed statue from Hierapydna at Istanbul (cf. here Fig. 29). Exactly like the statue of the ficus Ruminalis on the Anaglypha Hadriani (cf. here Figs. 21; 22), the lupa and the twins on those cuirasses symbolize Rome's claim to eternal power and divine mission, and that it was the task of the Roman emperor to fulfill this obligation (cf. C. Parisi Presicce 2000, 28, 29). With a discussion of the meaning of the lupa and the twins on the "Rilievo Terme Vaticano" (cf. here Fig. 31), and with The second Contribution by Claudia Valeri.*

Peter Herz sent me, on his own account, on 12th May 2021 also the following article: Virginia Closs ("Neronianis Temporibus: the So-Called Arae Incendii Neroniani and the Fire of A.D. 64 in Rome's Monumental Landscape", 2016).

Cf. *infra*, in volume 3-2, at Appendix IV.d.4.b) *Domitian's building project comprising the Campus Martius, the Capitoline Hill and the sella between Arx and Quirinal. With detailed discussion of the Templum Pacis and some remarks on Domitian's Villa, called Albanum.*

**Peter Herz was kind enough to send me on the same day also the article by Brent D. Shaw ("The Myth of the Neronian Persecution", 2015).**

Cf. *infra*, in Chapter *Preamble: Domitian's negative image*; at Section I. 'The intentional creation of Domitian's negative image', here presented by discussing relevant text passages from Markus Handy ("Strategien zur Legitimierung der Ermordung des Domitian", 2015) and from Peter L. Viscusi (Studies on Domitian, 1973).

**On 18th May 2021, Eric M. Moormann was kind enough to send me, on his own account, the digital version of the volume edited by Aurora Raimondi Cominesi, Nathalie de Haan, Eric M. Moormann and Claire Stocks (God on Earth: Emperor Domitian. The re-invention of Rome at the end of the 1st century AD, 2021).**

Cf. *infra*, in Chapter *Preamble: Domitian's negative image*; at Sections I.; II. and III.; and at Chapter *The major results of this book on Domitian.*

On 21st May 2021 Hans Rupprecht Goette was kind enough to alert me to a passage in the publication by Silvia Aglietti and Alexandra Busch (*Ager Albanus: von republikanischer Zeit zur Kaiservilla = Dall'età repubblicana alla villa imperiale. Albanum 1*, 2020), in which Massimiliano Papini ("I monumenti dell'AGER ALBANUS nella storia degli studi", 2021, 30 with Fig. 14 [= here **Fig. 10.1**]) discusses the first find report of

the statue of Jupiter in the Hermitage (cf. here **Fig. 10**): **according to this report, the statue was found without its head.** Papini's Fig. 14 is Plate 11 from the book by Giuseppe Antonio Guattani (*Monumenti antichi ovvero notizie sulle antichità e belle arti di Roma per l'anno 1805, 1805*), who published this first restoration of this statue of Jupiter (cf. here **Fig. 10.1**).

Cf. *infra*, at *A Study on Domitian's cult-statue of Iuppiter Optimus Maximus Capitolinus* (cf. here **Fig. 10**).

On 25th May 2021 Emanuele M. Ciampini was kind enough to send me the final version of his first *Contribution* to this volume: *La regalità domiziana: una nota egittologica*.

Cf. *infra*, in Chapter *Preamble: Domitian's negative image*; at Section II. *Conclusions: Domitian's representations of his military successes and his claims to be of divine descent and to possess a divine nature*; at Chapter IV., *passim*; and *infra*, in volume 3-2, at *Appendix II.*, *passim*.

As already mentioned, I had also discussed with Emanuele M. Ciampini the weight of the Lateran Obelisk (cf. here **Fig. 101**), on 28th May 2021 he wrote me his relevant opinion.

Cf. *infra*, at *A Study on the colossal portrait of Hadrian (now Constantine the Great) in the courtyard of the Palazzo dei Conservatori at Rome* (cf. here **Fig. 11**). With The *Contribution* by Hans Rupprecht Goette on the reworking of the portrait of Hadrian (now Constantine the Great); at Part II. *Ancient Rome's new commercial river port, at La Marmorata. With discussions of the 'Porticus Aemilia' (in reality identifiable as Navalia) and of the Horrea Aemiliana.* With The sixth *Contribution* by Peter Herz : Rom. Strukturen der Versorgung; and with The second *Contribution* by Franz Xaver Schütz : Wie schwer war der ägyptische Obelisk, der heute auf der Piazza di S. Giovanni in Laterano in Rom steht?

**On 4th July 2021 Amanda Claridge was kind enough to send me her Contribution to this volume. Cf. here Figs. 108-110. On 15th July she sent me the second version of her Contribution.**

**See below, at A note for Chrystina Häuber: Drawings of the interior order of the Aula Regia of the Palace of Domitian on the Palatine, once in the British School at Rome.**

As far as I can see, these drawings (here **Figs. 108-110**) represent the only *measured* reconstructions of the interior order of the 'Aula Regia' and of other parts of Domitian's 'Domus Flavia' within his *Domus Augustana* (the 'Peristyle' and the 'Triclinium'/'Cenatio Iovis'), into which the colossal statues (that had originally decorated the 'Aula Regia'), as well as some of the architectural fragments are integrated, that Francesco Bianchini had excavated (1720-1726) within the 'Aula Regia' (he found only two of those colossal statues in a secondary context immediately next to the 'Aula Regia') and published (posthumously) in 1738. The author of those drawings (here **Figs. 108-110**) is the architect Gordon Leith (1885-1965) from South Africa, who had in 1913 a scholarship at the British School at Rome. As Amanda would later confirm (see below), Gordon Leith had only received a scholarship for one academic year (*i.e.*, from October until June).

For Bianchini's measured plans, the two reliefs, and the architectural fragments, excavated by him within the 'Aula Regia' of Domitian's 'Domus Flavia'/'Domus Augustana' on the Palatine, and published posthumously (1738); cf. here **Figs. 8; 9; 36; 37**.

Cf. below, at Chapter V.1.i.3.b) J. Pollini's discussion (2017b) of the allegedly 'lost' Nollekens Relief (cf. here **Fig. 36**), which he compares with the Cancellaria Reliefs (cf. here **Figs. 1; 2; Figs. 1 and 2 drawing**) and Domitian's 'Domus Flavia'/'Domus Augustana'. With The *Contribution* by Amanda Claridge; and at Chapter *The major results of this book on Domitian*.

Back in 2020, Amanda had told me for the first time about those reconstruction drawings of Domitian's Palace on the Palatine, that she had seen at the British School, where they had been on display, and which, as she recalled, in the 1980s or 1990s had been donated to the Superintendency of the State on the Palatine. At that stage (*i.e.*, in 2020) it seemed impossible to trace the architect and his drawings. I myself, although having spent much time at the BSR since late December of 1980, did not remember these drawings, which is why, without Amanda's help, I would never have been able to identify them (!).

The reason being that neither the name of this man, nor the time of his scholarship at the British School were known, and that although Valerie Scott, the Librarian of the BSR, and the archivist Alessandra Gioenco had supported Amanda's relevant research in all possible ways. In the end, Amanda found out by chance that, already a long time ago, four of those drawings have been published by Maria Antonietta Tomei (*Scavi Francesi sul Palatino : le indagini di Pietro Rosa per Napoleone III (1861-1870)*, École française de Rome 1999, figs 225, 228, 229, and 230), who mentions the information that Amanda had in vain been looking for : the name of the architect, Gordon Leith, and the date of his drawings, 1913. But Amanda told me also that she knew that Gordon Leith had created many more of these drawings.

My thanks are due to Francesca Deli, Assistant Librarian at the BSR, for scanning for me in Tomei's publication Gordon Leith's extraordinary reconstruction drawings of Domitian's Palace on the Palatine (cf. here **Figs. 108-110**).

**On 6th July 2021, Eric M. Moormann was kind enough to send me, on his own account, and for a different book-project; cf. Häuber (forthcoming, Laocoon) two articles: by James C. Anderson Jr. ("The Date of the Thermae Traiani and the Topography of the Oppius Mons", 1985), and Rabun Taylor, Edward O'Neill, Katherine W. Rinne, Giovanni Isidori, Michael O'Neill und R. Benjamin Gorham ("A Recently Discovered Spring Source of the Aqua Traiana at Vicarello, Lazio", 2020).**

Apart from the fact that this information was also crucial in *this* context, the research on the different findspots that have been attributed to the Laocoon over time, Eric's relevant information reached me right in time to change the heading of the following *Chapter* in this volume:

Cf. *infra*, in volume 3-2, at *Appendix IV.d.4.c) Domitian's building projects at Rome: Conclusions arrived at in Appendix IV.d. With The first Contribution by Eugenio La Rocca.*

*As a result of this Chapter it seems to be clear that Domitian, who destroyed the sella between the Quirinal and the Arx, in order to erect his huge forum there (the later 'Forum of Trajan'), had used this excavated material to fill in a valley on the Mons Oppius. This finding invited the further assumption that already Domitian had planned to erect at this site great public baths, the now so-called 'Baths of Trajan'. The confirmation that Domitian had actually started building those baths, reached me only afterwards.*

**On 7th July 2021 Hans Rupprecht Goette's new book (*Schwertbandbüsten der Kaiserzeit. Zu Bildtraditionen, Werkstattfragen und zur Benennung der Büste inv. 4810 im Museum der Bildenden Künste in Budapest und verwandter Werke*, 2021) reached me.**

Cf. *infra*, in volume 3-2, at *A Study on the consequences of Domitian's assassination ...*

*Or: The wider topographical context of the Arch of Hadrian alongside the Via Flaminia which led to the (later) Hadrianeum and to Hadrian's Temples of Diva Matidia (and of Diva Sabina?). With discussions of Hadrian's journey from Moesia Inferior to Mogontiacum (Mayence) in order to congratulate Trajan on his adoption by Neroa, and of Hadrian's portrait-type Delta Omikron ( $\Delta o$ ) (cf. here **Fig. 3**) ...; at Chapter VI.2.1. H.R. Goette's (2021) discussion of Hadrian's portrait-type Delta Omikron ( $\Delta o$ ) (cf. here **Fig. 3**); and at Chapter VI.2.3. My own interpretation of Hadrian's portrait-type Delta Omikron ( $\Delta o$ ) (cf. here **Figs. 3**);*

*see also below, at A Study on the colossal portrait of Hadrian (now Constantine the Great) in the courtyard of the Palazzo dei Conservatori at Rome (cf. here **Fig. 11**). With The Contribution by Hans Rupprecht Goette on the reworking of the portrait of Hadrian (now Constantine the Great); and at Chapter *The major results of this book on Domitian.**

Hans Rupprecht Goette was so kind as to alert me on 2nd August 2021 to Christopher Weikert (*Von Jerusalem zu Aelia Capitolina. Die römische Politik gegenüber den Juden von Vespasian bis Hadrian*, 2016).

Cf. *infra*, in volume 3-2, at *A Study on the consequences of Domitian's assassination ...*

Or: *The wider topographical context of the Arch of Hadrian alongside the Via Flaminia which led to the (later) Hadrianeum and to Hadrian's Temples of Diva Matidia (and of Diva Sabina?) ...*; at Chapters III. and VI.1.; and at Appendix IV.c.2.).

**Hans Rupprecht Goette sent me also, on request, on 14th August 2021 his photographs of the colossal portrait of Domitian's sister, Flavia Domitilla *minor*, in the Ny Carlsberg Glyptotek at Copenhagen (inv. no. 3186), which I may publish here with his kind consent (cf. *infra*, at Chapter IV.1.1.h), and here Fig. 55).**

**On 6th September 2021, an E-mail by our good friend John Bodel, reached me, in which he kindly accepted my offer to write a *Contribution* to this volume on the subject temple tombs.**

I had asked him for advice concerning a problem related to Domitian's *Templum Gentis Flaviae*: Eugenio La Rocca (2020b) has reminded us of the fact that, 'under normal circumstances', within a *templum*, an inaugurated space, burials should have been forbidden. Which is why we must ask ourselves, whether or not Domitian could have built his temple tomb within his *Templum Gentis Flaviae* without infringing upon this sacred law.

Concerning this subject, I had also asked Jörg Rüpke for advice, who answered my relevant question by Email on 21st October 2021. - To all of this I will come back below.

Amanda Claridge, with whom I discussed this subject in a telephone conversation on 7th September 2021, had an excellent idea which she kindly shared with John Bodel and me: such temple tombs as the one within Domitian's *Templum Gentis Flaviae*, are by no means without precedent, since founders were usually honoured this way: 'and the Flavians *were founders too*', as Amanda added. On 25th September 2021, Amanda wrote me that I may mention our relevant correspondence here. Cf. *infra*, at Chapter IV.1.1.h).

**Hans Rupprecht Goette was kind enough to send me, on request, on 8th September 2021 the last and posthumously published article by the late Ulrike Wulf-Rheidt on Domitian's Palace on the Palatine ("Il cuore del Palazzo Flavio sul Palatino: le diverse funzioni della *Domus Augustana*", 2020). Cf. *infra*, at Chapters V.1.i.3.b); at *The major results of this book on Domitian*; and at *The visualization of the results of this book on Domitian on our maps*.**

Amanda Claridge sent me on 10th September 2021, on request, further information about the architect Gordon Leith, who had received a scholarship in 1913 for a stay at the British School at Rome and who created the above-mentioned extraordinary reconstruction drawings of Domitian's Palace on the Palatine (cf. *infra*, at Chapters V.1.i.3.b); and at *The major results of this book on Domitian*; and here **Figs. 108-110**).

**Likewise on 10th September 2021, Laura Gigli, with whom I had discussed Domitian's obelisk in the Piazza Navona, sent me, on her own account, some digital files of her own photographs, which were made in the context of her research project, that resulted in the restoration of the Church of S. Agnese.**

The results were published in: Giuseppe Simonetta, Laura Gigli and Gabriella Marchetti (*Sant'Agnese in Agone a Piazza Navona. Immagine Luce Ordine Suono nelle fabbriche Pamphili II* [2004]). Laura sent me also some files of the famous photographs of Domitian's obelisk, taken by the late Cesare D'Onofrio (1921-2003), who had presented Laura with his original photos. With Laura Gigli's kind consent, I publish here one of D'Onofrio's photos of this obelisk, which she has herself published; cf. Simonetta, Gigli and Marchetti ([2004] 122, Fig. 8 [= here **Fig. 28**]), which was among those she had send me. Laura also wrote to me that a similar

photo, like the one illustrated here, was published by Cesare D'Onofrio himself in black and white in one of his now famous books (*Le fontane di Roma*, 1986, 397, Fig. 352). - For Cesare D'Onofrio; cf. Laura Gigli (2004).

In September of 2021, Laura Gigli donated the original photographs of her vast collection, comprising the photographs of Cesare D'Onofrio in her possession, to the Fototeca Hertziana, where they will be part of the 'Fondo Simonetta-Gigli'. - To this I will come back below.

On 13th September 2021 the article by Nihal Tüner Önen ("Hadrians Reisen im östlichen Mittelmeer anhand neuer Inschriften aus Phaselis", 2013) reached me, which Hans Rupprecht Goette was kind enough to send me.

Cf. *infra*, in Chapter *Preamble: Domitian's negative image*; at Section I. 'The intentional creation of Domitian's negative image', here presented by discussing relevant text passages from Markus Handy ("Strategien zur Legitimierung der Ermordung des Domitian", 2015) and from Peter L. Viscusi (Studies on Domitian, 1973).

**Barbara E. Borg, with whom I had already had the chance to discuss her findings concerning the *Templum Gentis Flaviae* in 2018, was kind enough to answer my above-mentioned new question concerning this building by E-mail of 14th September 2021. Barbara Borg sent me, on her own account, the relevant Chapter 4 of her recent book; cf. Borg (*Roman Tombs and the Art of Commemoration. Contextual Approaches to the Funerary Customs in the Second Century CE*, 2019; Chapter: "4 Straddling Borderlines: Divine Connotations in Funerary Commemoration"). On 20th September 2021 Barbara Borg wrote me that I may mention our relevant correspondence here.**

For a detailed discussion; cf. *infra*, at Chapter IV.1.1.h) *The new findings by B. E. Borg (2019) concerning the Templum Gentis Flaviae support the hypothesis suggested here that Domitian's obelisk (cf. here Fig. 28) was commissioned for the Iseum Campense. With some observations concerning the Temple of Divus Traianus at Italica, and concerning the Marble Forum at the Colonia Augusta Emerita (Mérida) in Spain. With The Contributions Eric M. Moormann, Mario Torelli, and Walter Trillmich, and with The second Contribution by Jörg Rüpke.*

**On 27 September 2021 an E-mail by Nicola Barbagli reached me. He was kind enough to send me his recent article ("The emperors in the province: A study of the Tetrarchic images from the imperial cult chamber in Luxor"). Barbagli's essay adds important insights to our understanding of the latest phase of the Temple complex of Amun at Karnak/Luxor, of which we have also heard a lot of its earlier history in this *Study on Domitian*.**

Cf. *infra*, in volume 3-2, at Appendix I.d.1.a) *The stratagem, told in The Taking of Joppa, a town, 'taken' by Djehuty, a general of Tuthmosis III (around 1450 BC), compared with the escape of some of the Flavians from the Capitol on 19th December AD 69. With some remarks on what The Taking of Joppa has to do with Tuthmosis III's Lateran Obelisk (cf. here Fig. 101). With The second Contribution by Emanuele M. Ciampini.*

**Nicola Barbagli was also kind enough to write me on that occasion the title of his dissertation (*Faraoni romani: rappresentazioni del potere imperiale in Egitto da Augusto a Domiziano (30 a.C.-96 d.C)*, which he has finished in the meantime, as Ph.D. Dissertation Scuola Normale Superiore, Pisa 2022). Already at the Iseum Campense Conference at Rome in May 2016, I had been lucky enough to discuss this topic with him. I am happy to confess that this meeting with Nicola Barbagli came then right in time for me, because I myself was very insecure concerning two questions: 1.) how to judge the controversial discussion revolving around the question, whether or not Augustus *was* the Pharaoh of Egypt; and 2.) because I assumed that he *was* the Pharaoh of Egypt, I also wanted to know, whether that fact had any effect on Octavian/ Augustus *himself*.**

Cf. Häuber (2017, 19, PREFACE, pp. 350-351, Chapter: III., pp. 374-381, Chapter: V., p. 599, Chapter: VIII.). Concerning my 1.) question, Nicola Barbagli was kind enough to write a *Contribution* to my book; cf. Barbagli ("Augusto e la regalità egiziana: lo stato attuale della ricerca", 2017; see also N. BARBAGLI 2018).

**Barbagli's research is also of importance concerning my 2.) question, that will be discussed in this *Study* on Domitian again; cf. *infra*, in volume 3-2, at *Appendix IV.d.4.b*); and at *Appendix IV.d.4.c*).**

Hans-Ulrich Cain, with whom I had already had the chance to discuss my publication on the *Campus Martius* (2017) in May of 2019, was kind enough to send me on 9th October 2021 his own recently published article on the subject he had been studying at the time ("Dynastischer Memorialraum und Herrschernekropole - das römische Marsfeld im 2. Jahrhundert n. Chr.", 2021). In this article, Cain discusses *inter alia* Hadrian's Temple of Matidia and the "Tempio di Siepe". Cain (2021, 38-39 with n. 89) himself suggests the identification of the "Tempio di Siepe" with the previously unlocated temple that must have been dedicated to the divinized Marcus Aurelius and Faustina *minor*. - I am especially grateful that on 25th October 2021, Hans-Ulrich Cain presented me also with the volume, in which his article has appeared (W. AUGUSTYN and U. SÖDING [eds.], *Bildnis - Memoria - Repräsentation. Beiträge zur Erinnerungskultur im Mittelalter und in der frühen Neuzeit*, 2021).

Cf. *infra*, in volume 3-2, at *A Study on the consequences of Domitian's assassination ...*

Or: *The wider topographical context of the Arch of Hadrian alongside the Via Flaminia which led to the (later) Hadrianeum and to Hadrian's Temples of Diva Matidia (and of Diva Sabina?) ...*; at Chapter VI. *The results of this discussion of this Arch of Hadrian and my 2. Conclusion. This is based on the topographical context of this Arch of Hadrian and on some considerations concerning Hadrian's accession and is in my opinion the preferable scenario*; at *The Templum Divae Matidiae ('Precinct of Diva Matidia')* with Hadrian's Temple complex discussed here. *With the correct location of the Temple of Diva Matidia (cf. here Figs. 67; 67.1), and new findings concerning the "Tempio di Siepe", and concerning the TEM PL[...], which is recorded by the inscription on fragment 36b of the Severan Marble Plan (cf. here Figs. 132-134) and refers to a Templ(um) of Diva Sabina?: a 'Precinct of Diva Sabina?' or a Temple of Diva Sabina?; at To whom was the second temple (seemingly) within the Templum Divae Matidiae (the 'Precinct of Diva Matidia') dedicated: to Diva Sabina or to Diva Plotina? (cf. here Figs. 66; 135; 136); and at The "Tempio di Siepe" (cf. here Figs. 69.1; 69.2).*

**On 12th October 2021, John Pollini was kind enough to send me his forthcoming article ("New Observations on the imperial reliefs from the Sebasteion at Aphrodisias and the portraiture of Claudius, Britannicus, and the young Nero", 2021), which has appeared in the meantime.**

Cf. *infra*, in volume 3-2, at *Appendix IV.d.2.b*) R.R.R. Smith (1988; 2013) on the series of 50 *ethne* in the Sebasteion at Aphrodisias, its model, the 'nations' within Augustus's Porticus ad Nationes at Rome, the Piroustaie and their representation in the Sebasteion at Aphrodisias and in Domitian's Forum/ Forum Nervae/ Forum Transitorium.

As the title of the above-mentioned *Appendix IV.d.2.b*) implies, of the 50 representations of *ethne* ('nations') in the Sebasteion at Aphrodisias, one, that of the *Piroustoï*, appears also in Domitian's Forum/ Forum Nervae/ Forum Transitorium at Rome: the representation of the *Piroustaie*. As we shall see below, the presence of the *Piroustaie* in Domitian's Forum allows the dating of the *profectio*, to which Domitian (now Nerva) is leaving on Frieze A of the Cancellaria Reliefs (cf. here **Fig. 1; Figs. 1 and 2 drawing; figure 6**).

**The 50 *ethne* in the Sebasteion at Aphrodisias were presumably chosen from the altogether 250 'nations', that decorated Augustus' (lost) Porticus ad Nationes at Rome. Because that assumption sounds reasonable, I ask myself, whether the representations of Claudius, Agrippina *minor*, Britannicus and Nero in the Sebasteion could be somehow related to the (completely? lost) sculptural decoration of the Temple of Divus Claudius on the Caelian in Rome.**

Pollini's (2021) new findings concerning the portraits of Claudius's son Britannicus could not be considered any more in my own discussion of a portrait of Britannicus (?) that probably belonged to the sculpture decoration of the temple of his father *Divus Claudius* on the Caelian, since my *Chapter IV.*, where this portrait is mentioned, had already been published on 4th October 2021, in the Preview of this volume on our Websserver.

This portrait of Britannicus (?) possibly belongs to a statue of Messalina (?) or rather Agrippina *minor*. Both statues were found in the same area on the Caelian in different secondary contexts, but are carved from the same rare green greywacke (or rather basanite, *basanites*; cf. *infra*) from Egypt. Emilia Talamo (2011) tentatively identifies this statue of a boy with Britannicus, which, given the rare material that identifies him as a member of the imperial family, and the represented age of the boy, who is still wearing the *bullae*, is very convincing - especially because this statue cannot possibly represent Nero, who was already 17 years old, when Claudius died. Talamo identifies the female portrait with Agrippina *minor* (which is clearly reworked from an earlier portrait, the identification of which is debated).

**Talamo further suggests that Claudius's widow is here represented as the priestess of the deified Claudius, and that both statues were either on display in the *Augusteum*, next to the temple, or even within the Temple of *Divus Claudius* itself. - To this structure, called *Augusteum* by Talamo, I will come back below, because that has now been studied by Patrizio Pensabene and Javier Domingo (2022).**

Cf. Talamo (in: E. LA ROCCA *et al.* 2011, 230-231, cat. no. "3.7 Statua di Agrippina minore come orante"), Roma; Musei Capitolini, Centrale Montemartini (inv. no. 1882), this torso is restored with a plaster cast of the statue's head in the Ny Carlsberg Glyptotek at Copenhagen; cf. p. 232, cat. no. "3.8 Statua di fanciullo togato", Britannicus (?), Firenze, Galleria degli Uffizi (inv. no. 1914).

See for this statue of Agrippina *minor* now also: Thorsten Opper (2021, 128 Fig. 144 "Statua of Agrippina performing a sacrifice"; according to him it is carved from basanite.

A large number of hydraulic *pozzi* proves that the Temple of *Divus Claudius* was built at the site of a very old and very large *domus*. According to Filippo Coarelli (2003, 260), the Temple of *Divus Claudius* was possibly erected at the site of Claudius's private *domus*, "forse nei pressi della *domus* ancestrale della gens". For this *domus*, the Temple of *Divus Claudius* and these statues of Messalina (?)/Agrippina *minor* and Britannicus (?); cf. Häuber (2014a, 153, 383, 552, 553-554).

This statue of Britannicus (?) was excavated by, and once in the possession of, Leonardo Agostini, who is known for his precious collection of ancient gems (comprising an alleged portrait of Britannicus, after which this head could in theory have been created), as well as for the excellent restorations of the statues he found; cf. for him additionally, Häuber (2014a, 395-399). Talamo (2011, 232) writes that it is possible but not certain that the head of this Britannicus (?) belongs to the statue. Given the rareness of the material, from which both the head and the (headless? statue of the) body are carved, I myself have nevertheless suggested that this head could actually *belong* to the statue.

**Now that Pollini (2021) has found several portraits which he identifies with Britannicus, it would be interesting to look at the head of this statue of Britannicus (?) in Florence, Galleria degli Uffizi (inv. no. 1914) again.**

For this portrait of Britannicus (?); cf. *infra*, at Chapter IV.1.1.g) *The controversy concerning the "ARCUS AD ISIS" that is visible on a relief from the Tomb of the Haterii (cf. here Figs. 89; 90): it cannot be identified with the Arco di Camilliano to the east of the Iseum Campense, but stood instead near the Temple of Isis et Serapis in Regio III. With a summary of Domitian's 'pharaonic' project, called 'Colosseum city'.*

**On 14th of October 2021, Hans Rupprecht was kind enough to send me, on his own account, an article by Dietrich Willers, in which the author discusses the 'Relief Ruesch', a marble relief that represents a cavalry battle of Romans against Germanic troops ("Relief mit Reiterschlacht", 2021, his Taf. 11; 13 [= here Fig. 7]), in which the Roman general is (a now defaced) portrait of the Emperor Domitian.**

Cf. below, in Chapter *Preamble: Domitian's negative image*; Section III. *My own ideas about Domitian*; at point 5.); and *infra*, at Chapter *The major results of this book on Domitian*.

On 20th October 2021, Carlo Gasparri, who has published the sculptures once owned by the Farnese family (*Le Sculture Farnese. Storia e documenti*, 2007) was kind enough to answer my question concerning the 'Trofei Farnese' as they are sometimes called, since I was not sure whether the architectural fragments (cf. here **Fig. 5.1**) that are on display in the Cortile of Palazzo Farnese at Rome, and which I am discussing here, are those that are sometimes referred to by that name - which is actually the case, as Carlo told me.

Cf. below, in Chapter *Preamble: Domitian's negative image*; at Section II; and *infra*, in Chapter *V.1.i.3.b*) J. Pollini's discussion (2017b) of the allegedly 'lost' Nollekens Relief (cf. here **Fig. 36**), which he compares with the Cancellaria Reliefs (cf. here **Figs. 1; 2**) and Domitian's 'Domus Flavia' / Domus Augustana. With The Contribution by Amanda Claridge; at Section III. *Does the design of the Nollekens Relief reflect the topographical context, for which Domitian had commissioned it?*; and *infra*, at Chapter *The major results of this book on Domitian*.

When discussing Domitian's *Villa*, called *Albanum* at Castel Gandolfo with her in a telephone conversation on 20th October 2021, Claudia Valeri was kind enough to inform me that she is right now in the course of studying its sculpture decoration, and that she would give a talk on the subject the following day ("Sculptures in Context. The Ariadne Barberini and the Decorative Programme of the Domitian's Villa in Castel Gandolfo", 21st October 2021).

For Domitian's *Villa*, called *Albanum*; cf. *infra*, in volume 3-2, at *Appendix IV.c.1.*); and at *Appendix IV.d.4.b*) *Domitian's building project comprising the Campus Martius, the Capitoline Hill and the sella between Arx and Quirinal*. With detailed discussion of the *Templum Pacis* and some remarks on Domitian's *Villa*, called *Albanum*.

**On 21st October 2021, Jörg Rüpke answered by Email my questions concerning the above-mentioned temple- tomb-problem that I have also discussed with John Bodel and Barbara E. Borg.**

In this E-mail, Jörg Rüpke has contributed important thoughts to solve this problem, and because he is already mentioned as a 'Contributor' in the title of this book, first published in September 2021 in the first Preview of this book on our Webserver, I could ask him to grant me the permission to publish his E-mail here as his *second Contribution* to this volume. He kindly agreed by E-mail of 22nd October 2021.

**See below, at *The second Contribution by Jörg Rüpke to this volume : Tempel-Gräber*.**

Cf. *infra*, at Chapter *IV.1.1.h*) *The new findings by B. E. Borg (2019) concerning the Templum Gentis Flaviae support the hypothesis suggested here that Domitian's obelisk (cf. here Fig. 28) was commissioned for the Iseum Campense. With some observations concerning the Temple of Divus Traianus at Italica, and concerning the Marble Forum at the Colonia Augusta Emerita (Mérida) in Spain. With The Contributions by Eric M. Moormann, Mario Torelli, and Walter Trillmich, and with The second Contribution by Jörg Rüpke.*

My thanks are due to Frau Daria Lanzuolo (Deutsches Archäologisches Institut, Rom) for sending me on 26th October 2021 photos of the fragment of a colossal cuirassed marble statue of Domitian (cf. here **Fig. 5**),

which is on display among one of the two famous ensembles of ancient architectural marbles at the Palazzo Farnese, the above-mentioned 'Trofei Farnese', of which she sent me photographs as well (cf. here **Fig. 5.1**).

Cf. *infra*, in Chapter *Preamble: Domitian's negative image*; at Section II. *Conclusions: Domitian's representations of his military successes and his claims to be of divine descent and to possess a divine nature*; and at Chapter *The major results of this book on Domitian*.

**Likewise on 26th October 2021, Claudio Parisi Presicce was kind enough to send me, on his own account, the proofs of his forthcoming article ("Il tempio di Plotina in un frammento della pianta marmorea severiana. Ipotesi e contesto, 2021"). In this article, which has appeared in the meantime, the author rejects my tentative identification of a temple, visible on fragment 36b of the Severan Marble Plan (cf. here Fig. 132), as that of the Empress *Diva Sabina*. He himself suggests that the inscription TEM PL on this fragment refers to a 'Temple of Plotina' instead, but I myself maintain my earlier hypothesis.**

For a discussion; cf. *infra*, in volume 3-2, at *A study of the consequences of Domitian's assassination ... Or: The wider topographical context of the Arch of Hadrian alongside the Via Flaminia which led to the (later) Hadrianeum and to Hadrian's Temples of Diva Matidia (and of Diva Sabina?) ...*

With The fourth and the fifth Contribution by Peter Herz, with The first Contribution by Franz Xaver Schütz (cf. here **Fig. 77**), with The Contribution by John Bodel, and with The second Contribution by Angelo Geißen; Introduction; at Sections X. and XIII.; and at Chapter VI. *The results of this discussion of this Arch of Hadrian and my 2. Conclusion. This is based on the topographical context of this Arch of Hadrian and on some considerations concerning Hadrian's accession and is in my opinion the preferable scenario*; at *The Templum Divae Matidiae ('Precinct of Diva Matidia') with Hadrian's Temple complex discussed here. With the correct location of the Temple of Diva Matidia (cf. here Figs. 67; 67.1), and new findings concerning the "Tempio di Siepe", and concerning the TEM PL[...], which is recorded by the inscription on fragment 36b of the Severan Marble Plan (cf. here Figs. 132-134) and refers to a Templ(um) of Diva Sabina?: a 'Precinct of Diva Sabina'? or a Temple of Diva Sabina?; at To whom was the second temple (seemingly) within the Templum Divae Matidiae (the 'Precinct of Diva Matidia') dedicated: to Diva Sabina or to Diva Plotina? (cf. here Figs. 66; 135; 136); and at The "Tempio di Siepe" (cf. here Figs. 69.1; 62.2).*

See also below, at *The Contribution by John Bodel: The Label Inscribed on Fragment 36b of the Severan Marble Plan*.

**As a consequence of our discussion of Domitian's *Villa*, called *Albanum*, Claudia Valeri was kind enough to send me on 30th October 2021 the already mentioned article by Licia Luschi ("Un gruppo di Teseo con il Minotauro dell'*Albanum Domitiani*. Origine e dispersione delle antichità Barberini", 2015), who discusses in this article also the copy of the statue group *Athena and Marsyas*, found at the *Albanum*.**

Claudia alerted me to the fact that already Luschi (2015) has observed that Domitian's *Albanum* was in a certain way 'modeled' on the Acropolis at Athens. She told me this, because I had mentioned to her my discussion on the *Albanum* with Hans Rupprecht Goette, who, as mentioned above, in an article (which has in the meantime been published in 2022) has observed something very similar concerning the *Albanum*.

Luschi (2015) quotes for this observation from an unpublished manuscript, written by Paolo Liverani (cf. *infra*), who refers to the facts that in Domitian's *Albanum* were found the copies of marble statues, representing Theseus and the Minotaur and *Athena and Marsyas*, the originals of both were dedicated on the Acropolis at Athens. As a consequence, I sent Hans Rupprecht Goette the article by Licia Luschi (2015), who, on 1st November 2021, was kind enough to provide me with the entry in *Der Neue Overbeck (DNO, 2014)* on the statue group *Athena and Marsyas* by Myron, the original of which stood on the Acropolis.

Paolo Liverani, whom I had asked, whether he has in the meantime published his brilliant idea, quoted by Licia Luschi (2015, 12 with n. 115), according to which Domitian's *Albanum*, because of its sculpture decoration which copies famous sculptures of the Acropolis at Athens, could be regarded as being modelled

on the Acropolis, was kind enough to answer me by E-mail on 6th November 2021 the following. This article was never published. He had written it in 2002 for a volume, edited by Wilhelmina Jashemski.

For a discussion of all that; cf. *infra*, in volume 3-2, at Appendix IV.d.4.b) Domitian's building project comprising the Campus Martius, the Capitoline Hill and the sella between Arx and Quirinal. With detailed discussion of the Templum Pacis, and some remarks on Domitian's Villa, called Albanum.

In addition to this, I myself find another of Licia Luschi's (2001, 197) observations very interesting, namely that Domitian had chosen as one of his models the Attic hero and mythical king Theseus, which is why I have chosen her relevant statement as the second epigraph of this Study on Domitian (cf. *infra*, at Chapter I.1.). For a discussion of Licia Luschi's findings; cf. below, in Chapter Preamble: Domitian's negative image; at Section II. Conclusions: Domitian's representations of his military successes and his claims to be of divine descent and to possess a divine nature; and at Section III. My own thoughts about Domitian; at point 4.). - To this I will come back below.

**On 2nd November 2021 the article by Eugenio La Rocca reached me ("Il tempio dei Divi Traiano e Plotina, l'arco partico e l'ingresso settentrionale al Foro di Traiano: un riesame critico delle scoperte archeologiche", 2018), which I had asked him to provide me with. In addition to this, he was kind enough to send me, on his own account, also another, forthcoming article on a similar subject ("Atti della Giornata di Studi Roma, Auditorium dell'Ara Pacis 30 gennaio 2020 a cura di EUGENIO LA ROCCA ROBERTO MENEGHINI", with Eugenio La Rocca's Preface: "Prefazione. La topografia dell'area a nord del foro di Traiano: sulle questioni irrisolte", 2021), which has appeared in the meantime.**

La Rocca (2021, 93) discusses my tentative suggestion; cf. Häuber (2017 and here Fig. 66) to identify the ground-plan which is partly visible on fragment 36b of the Severan Marble Plan (cf. here Fig. 132) and accompanied by the inscription TEM PL, as a Temple of *Diva Sabina*, but prefers Claudio Parisi Presicce's (2021) hypothesis to identify this building with a Temple of *Diva Plotina*. - To this I will come back below.

**Already on 20th September 2017, I had the chance to discuss with Eugenio La Rocca our map of the Campus Martius with my reconstruction of the "TEMPLUM : DIVA MATIDIA", the Precinct of *Diva Matidia*, published in 2017 (cf. our updated map; here Fig. 66). Looking at the first version of this map, La Rocca had been kind enough to disclose to me that, in his opinion, within a sacred precinct could not possibly have been dedicated temples to *different* divinities, as I had done by assuming within this precinct also my Temple of *Diva Sabina* ?**

Because of this, I now tentatively suggest that my Temple of *Diva Sabina* ? which, in my opinion, is visible on fragment 36b of the Severan Marble (here Fig. 132), stood within its own precinct, the 'Precinct of *Diva Sabina*?', which was located immediately to the south of my Precinct of *Diva Matidia* (cf. here Fig. 66).

On 11th November 2021, I discussed these hypotheses with Jörg Rüpke in an E-mail correspondence, who was kind enough to reminded me of the fact that, at Rome, the "Einschachtelung" of sacred precincts was not problematic, on the contrary, it happened frequently, mentioning some famous examples to me. This means that my Temple of *Diva Sabina* ? could just as well have been erected *within* my Precinct of *Diva Matidia* - as I had assumed in the first version of our map here Fig. 66; cf. Häuber (2017, 99, Fig. 3.7.5.c).

For a discussion of all that; cf. *infra*, in volume 3-2, at A Study on the consequences of Domitian's assassination ... Or: The wider topographical context of the Arch of Hadrian alongside the Via Flaminia which led to the (later) Hadrianeum and to Hadrian's Temples of *Diva Matidia* (and of *Diva Sabina*?) ... With ... The Contribution by John Bodel ...; Introduction; at Section X. Further new research on the Precinct of *Diva Matidia* : C. Parisi

*Presicce's (2021) identification of my Temple of Diva Sabina ? with a Temple of Diva Plotina. With related research and with The Contribution by John Bodel : The Label Inscribed on Fragment 36b of the Severan Marble Plan.*

On 13th November 2021, after I had sent her the relevant *Chapter* of my text, I had the chance to discuss with Amanda Claridge my idea that the inscription TEM PL on fragment 36b of the Severan Marble Plan could possibly relate to a *templum* in the sense of a sacred precinct. In the course of this discussion, I realized that she too has discussed the portrait of Hadrian of the Delta Omikron ( $\Delta o$ ) type (cf. here **Fig. 3**), and she was kind enough to send me on the same day, by request, her following article ("Hadrian's Succession and the Monuments of Trajan", 2013), which I had managed to overlook so far. And when I told her on 22nd November 2021 that Franz Xaver Schütz had found the volume, edited by Fritz Mitthof und Günther Schörner on the Internet (*Columna Traiani - Traianssäule Siegesmonument und Kriegsbericht in Bildern. Beiträge der Tagung in Wien anlässlich des 1900. Jahrestages der Einweihung*, 2017), Amanda replied that she had reviewed this volume and sent me on the same day her review; cf. Claridge (2019).

For a summary of this discussion; cf. *infra*, at *The major results of this book on Domitian*; see also *infra*, in volume 3-2, at *A Study on the consequences of Domitian's assassination ...*

*Or: The wider topographical context of the Arch of Hadrian alongside the Via Flaminia which led to the (later) Hadrianeum and to Hadrian's Temples of Diva Matidia (and of Diva Sabina?) ...; at Chapter VI.2.4. Amanda Claridge (2013) has identified the head of the "Stonethrower" in the battle Scene LXXII on Trajan's Column (here Figs. 4; 4.1) as a copy of Hadrian's portrait-type Delta Omikron ( $\Delta o$ ). Since all four of Hadrian's known marble portraits of this type (here Fig. 3) show him turning to his left, and the "Stonethrower" (here Figs. 4; 4.1) turns to his left as well, we may wonder, provided Claridge's identification is correct, whether we have in this relief for the first time a representation of Hadrian's complete statue-type Delta Omikron. But we shall see that further research on this subject has led to a surprising result, opening new questions related to Hadrian's Delta Omikron ( $\Delta o$ ) portrait-type.*

Peter Herz was kind enough to alert me on 14th of November 2021 to the new monograph by Joelle Prim (*Aventinus Mons*, 2021). And on 15th November 2021 the following publication by Simon Malmberg ("Understanding Rome as a port city", 2021) reached me, kindly sent by Hans Rupprecht Goette.

For both; cf. *infra*, at *A Study on the colossal portrait of Hadrian (now Constantine the Great) in the courtyard of the Palazzo dei Conservatori at Rome (cf. here Fig. 11)*. With The Contribution by Hans Rupprecht Goette on the reworking of the portrait of Hadrian (now Constantine the Great); at Part II. *Ancient Rome's new commercial river port, at La Marmorata. With discussions of the 'Porticus Aemilia' (in reality identifiable as Navalia) and of the Horrea Aemiliana*. With The sixth Contribution by Peter Herz : Rom. Strukturen der Versorgung; and with The second Contribution by Franz Xaver Schütz : Wie schwer war der ägyptische Obelisk, der heute auf der Piazza di S. Giovanni in Laterano in Rom steht?

My thanks are due to Hans Rupprecht Goette for sending me, on the same day, also the article by Sabine Panzram ("Domitian und das Marsfeld. Bauen mit Programm", 2008) that I had managed to overlook so far.

Cf. *infra*, in volume 3-2, at *Appendix IV.d.4.b) Domitian's building project comprising the Campus Martius, the Capitoline Hill and the sella between Arx and Quirinal*. With detailed discussion of the *Templum Pacis*, and some remarks on *Domitian's Villa, called Albanum*.

T.P. Wiseman was kind enough to send me on 15th November 2021 the manuscript of his forthcoming article ("Palace-sanctuary or pavilion? Augustus' House and the limits of archaeology"). - To this I will come back below. Cf. *infra*, in volume 3-2, in *Appendix VI*.; at Section I. *The 'House of Augustus', the 'House of Livia' and the Temple of Apollo Palatinus, and the (real) House of Augustus and Domitian's Domus Augustana*.

On 23rd November 2021 the exhibition-catalogue by Thorsten Opper reached me (*Nero the man behind the myth*, 2021) that Amanda Claridge was kind enough to present me with.

Cf. below, in Chapter *V.1.i.3.b*); at Section *II. The Nollekens Relief was found in the 'Aula Regia' within the 'Domus Flavia'*.

Hans Rupprecht Goette alerted me on 2nd December 2021 to Anne Wolsfeld (*Die Bildnisrepräsentation des Titus und Domitian*, 2021), and on 3rd December 2021 he was kind enough to provide me with the passages that are relevant to my work.

Cf. below, in Chapter *Preamble: Domitian's negative image*; at Sections *II.* and *III.*; and at Chapter *The major results of this book on Domitian*.

On 6th December 2021 the new, very interesting book by the Egyptologists Rafed El-Sayed and Konstantin C. Lakomy, reached Franz Xaver Schütz and me. It was edited by themselves, together with Elisabeth Ehler, Cäcilia Fluck, Anne Herzberg-Beiersdorf and Olivia Zorn (*Akhmîm Ägyptens vergessene Stadt*, 2021). Also their book 'reached me right in time' because it addresses several subjects revolving around the Emperor Hadrian that I was studying at this very moment, and I am very glad that I could further discuss those subjects with Rafed El-Sayed in many telephone conversations. And on 7th December 2021, Paolo Liverani was kind enough to send me, by request, his essay ("*Leo in fabula: l'apoteosi di Antinoo*", 2020a), the content of which we had been discussing years before, when I was in the course of studying the Obelisk of Antinous.

For a discussion of both subjects; cf. *infra*, at *A Study on Hadrian's portrait-statue from Hierapydna* (cf. here **Fig. 29**); at *The research published in my earlier Study (2017): on the tomb of Antinous at Antinoopolis, on his (alleged) tomb at Hadrian's Villa near Tivoli, on his cenotaph at Rome, and on the two pertaining Antinous Obelisks*.

Hans Rupprecht Goette was so kind as to send me, by request, in addition to all this on 6th December 2021 the article by Maria Cristina Capanna ("*L'anfiteatro di Traiano distrutto, il tempio della diva Matidia e l'edificio funerario a nicchie (detto 'di Siepe')*", 2019), because I had found this reference in Claudio Parisi Presicce's above-mentioned article of 2021.

Cf. *infra*, in volume 3-2, at *A Study on the consequences of Domitian's assassination ...*

Or: *The wider topographical context of the Arch of Hadrian alongside the Via Flaminia which led to the (later) Hadrianeum and to Hadrian's Temples of Diva Matidia (and of Diva Sabina?) ... With The fourth and the fifth Contribution by Peter Herz, with The first Contribution by Franz Xaver Schütz, with The Contribution by John Bodel, and with The second Contribution by Angelo Geißen;*

*Introduction*; at Section *XIV. Further new research: F. Chausson's (2001) idea that the Hadrianeum was possibly dedicated to Divus Hadrianus and to Diva Sabina, and recent discussions of this hypothesis. With The second Contribution by Angelo Geißen : Zum 'Hadrianeum' auf Münzen des Antoninus Pius;*

at Chapter *VI.*; at *The Templum Divae Matidiae ('Precinct of Diva Matidia')* with *Hadrian's Temple complex discussed here. With the correct location of the Temple of Diva Matidia (cf. here Figs. 67.; 67.1), and new findings concerning the "Tempio di Siepe" and concerning the inscription TEM PL[...], which is recorded by fragment 36b of the Severan Marble Plan (cf. here Fig. 132- 134) and refers to a Templ(um) of Diva Sabina?, a 'Precinct of Diva Sabina?' or a Temple of Diva Sabina?;*

and below, at *The Contribution by John Bodel: The Label Inscribed on Fragment 36b of the Severan Marble Plan*.

**On 10th December 2021 Andrew Stewart's very interesting article ("Continuity or Rupture? Further Thoughts on the 'Classical Revolution' (2500+ Years after Salamis)", 2021) reached me, and on 11th December 2021 Franz Xaver Schütz presented me with the likewise very interesting catalogue by Florian S. Knauß and Christian Gliwitzky (*SALAMIS 480*, 2021) of their current exhibition here in Munich.**

Although I have studied half a century ago at the Universität zu Köln both Near Eastern Archaeology with Wolfram Nagel and Greek sculpture with Andreas Linfert, after reading the above-quoted publications, one important insight concerning this period has occurred to me *only now*.

Wolfram Nagel frequently told us that the Egyptian Pharaohs had waged wars, because they were in desperate need of manpower for their ambitions building projects. For example, they deported men from the states of the Near-East, which at times they had conquered and incorporated into their own Empires. I have mentioned above a telling example, the Egyptian story *The taking of Joppa* in Palestine (today: Tel Aviv-Jaffa), in which Djehuty, a general of the Egyptian Pharaoh Tuthmosis III, takes (circa 1450 BC) the city of Joppa exclusively by applying stratagems, that is to say, without any bloodshed - to the effect that no one of his own very few soldiers and of the expected precious 'booty', the town's inhabitants, was hurt.

All former inhabitants of Joppa are then deported by Djehuty over a distance of circa 1000 kilometres to the Temple of Amun at Karnak in Egypt, where they become the slaves of the god Amun; *inter alia*, Tuthmosis III erected 7 obelisks in this Temple complex. One of these, the tallest of all extant Egyptian obelisks, is the Lateran Obelisk at Rome (cf. here **Fig. 101**).

Since we know from relevant accounts, written on papyri, how many thousand men were needed to carve an obelisk and to transport it from the quarry to its final destination in Egypt, and, in addition to this, how many men perished in each of these enterprises, I have asked myself, whether these deported people from Joppa could have been personally involved in the creation of the Lateran Obelisk. We are fortunate to have the complete hieroglyphic inscriptions of the Lateran Obelisk, which tell us its dramatic history, but the people of Joppa, if at all they were involved in the making of this obelisk, are, of course, not mentioned.

We have also heard of the scenes of defeated and deported enemies of Near-Eastern sovereigns, who had likewise founded Empires, and of some Egyptian Pharaohs, which are represented in the reliefs of their relevant temples, and that have both been studied by Eugenio La Rocca ("*Ferocia barbarica. La rappresentazione dei vinti tra medio Oriente e Roma*", 1994). La Rocca has rightly observed that the merciless iconography, chosen for Hadrian's portrait-statue from Hierapydna at Istanbul (cf. here **Fig. 29**) was precisely based on such archaic 'oriental' models.

For all that; cf. *infra*, in volume 3-2, at *Appendix I.d.1.a) The stratagem, told in The Taking of Joppa, a town, 'taken' by Djehuty, a general of Tuthmosis III (around 1450 BC), compared with the escape of some of the Flavians from the Capitol on 19th December AD 69. With some remarks on what The Taking of Joppa has to do with Tuthmosis III's Lateran Obelisk (cf. here Fig. 101). With The second Contribution by Emanuele M. Ciampini; and below, at A Study on Hadrian's portrait-statue from Hierapydna (cf. here Fig. 29).*

Yet 970 years after *The Taking of Joppa* (circa 1450 BC), at Salamis (in 480 BC), things were very different. Against all odds it was the Greeks, who defeated no less than the Persian Great King, Xerxes. Moreover, after reading Andrew Stewart's article (2021), I see another important difference. All those peoples, who were defeated by the 'predecessors' of Xerxes, the above-mentioned kings of the Near-Eastern Empires, and by the Egyptian Pharaohs, appear only on the 'state reliefs' of those sovereigns, as defeated and humiliated 'enemies' - whereas we possess no testimonia from those people themselves.

Contrary to that, we can now with Andrew Stewart (2021) discuss his "Thoughts on the 'Classical Revolution' (2500+ Years after Salamis)", that is to say, on Greek art and Greek literature after the victories at Marathon (490 BC) and Salamis (480 BC) against the Persians. And together with Stewart (2021), and with the authors of the catalogue, edited by Florian S. Knauß and Christian Gliwitzky (*SALAMIS 480*, 2021), we can study the complex relationships of Greeks and Persians (at that time, but also before and afterwards), and what consequences that had for their own societies - and for us today.

**On 15th December 2021, Edoardo Gautier di Confiengo was kind enough to send me his above-mentioned article ("La macchina della *cenatio rotunda* neroniana (Suet., *Nero*, 31), ipotesi di ricostruzione"), which had just appeared in the volume, edited by Françoise Villedieu (*La Vigna Barberini, III. La cenatio rotunda*, 2021).**

Cf. below, in Chapter *II.3.1.c*); in Chapter *V.1.i.3.b*); at Section *II*.); and *infra*, in volume 3-2, at *Appendix IV.b.2*.)).

**On 17th December 2021 reached me the files of the *aurei*, issued by Trajan in AD 112/113, that represent himself with his divinized natural father, and with both his divinized natural father *Divus Traianus pater* and with his adoptive father *Divus Nerva*. Eugenio La Rocca (2021, 92, Figs. 18; 19 [= here Figs. 141.2; 141.1]) has published those coins and he was kind enough to send these files to me, after we had discussed his article in a telephone conversation.**

Cf. *infra*, in volume 3-2, at *A Study on the consequences of Domitian's assassination ...*

Or: *The wider topographical context of the Arch of Hadrian alongside the Via Flaminia which led to the (later) Hadrianeum and to Hadrian's Temples of Diva Matidia (and of Diva Sabina?) ...; at Chapter VI.2.3. My own interpretation of Hadrian's portrait-type Delta Omikron ( $\Delta o$ ) (cf. here Figs. 3); and at How adoptions could be visualized on coins: Nerva/Trajan, Trajan/Hadrian, Hadrian/Aelius Caesar, Hadrian/ Antoninus Pius, Antoninus Pius/Marcus Aurelius.*

**On 19th December 2021, Mark Wilson Jones was kind enough to send me, by request, his article on the Basilica at Volubilis ("La basilique de Volubilis, quelques considérations architecturales", 2019).**

The reason of my request was the fact that Maria Teresa D'Alessio (2017; *ead.* 2019) and Maria Cristina Capanna (2019) have based their reconstruction drawings of the ground-plans of the Basilica of *Diva Matidia* and of the Basilica of *Diva Marciana* within Hadrian's Temple complex in the *Campus Martius* on Wilson Jones's drawing of the ground-plan of the Basilica at Volubilis, which was only published in 2019.

For a discussion; cf. *infra*, in volume 3-2, at *A Study on the consequences of Domitian's assassination ....*

Or: *The wider topographical context of the Arch of Hadrian alongside the Via Flaminia which led to the (later) Hadrianeum and to Hadrian's Temples of Diva Matidia (and of Diva Sabina?) ...;*

*Introduction; at Section VII. The Precinct and Temple of Diva Matidia: further new research: M.T. D'Alessio (2017; 2019), F. de Caprariis (2018), A. Carandini (2019), M.C. Capanna (2019) and F. Dell'Era (2020) follow H.-J. Beste's and H. von Hesberg's (2015) (in my opinion erroneous) reconstructions of their Precinct and Temple of Diva Matidia; at Chapter VI. The results of this discussion of this Arch of Hadrian and my 2. Conclusion. This is based on the topographical context of this Arch of Hadrian and on some considerations concerning Hadrian's accession and is in my opinion the preferable scenario; at The Templum Divae Matidiae ('Precinct of Diva Matidia') with Hadrian's Temple complex discussed here. With the correct location of the Temple of Diva Matidia (cf. here Figs. 67; 67.1), and new findings concerning the "Tempio di Siepe" and concerning the inscription TEM PL[...], which is recorded by fragment 36b of the Severan Marble Plan (cf. here Figs. 132- 134) and refers to a Templ(um) of Diva Sabina?, a 'Precinct of Diva Sabina?' or a 'Temple of Diva Sabina?'; and at To whom was the second temple (seemingly) within the Templum Divae Matidiae (the 'Precinct of Diva Matidia') dedicated: to Diva Sabina or to Diva Plotina? (cf. here Figs. 66; 135; 136).*

**On 19th Dezember 2021 John Bodel was kind enough to send me his *Contribution* to this volume. Because John is already mentioned as a 'Contributor' in the title of this book, published in October 2021 in the first Preview of this book on our Webserver (for his text on temple tombs, a project which, unfortunately, we later had to abandon) - I could still accept his very kind offer.**

**See below, at *The Contribution by John Bodel : The Label Inscribed on Fragment 36b of the Severan Marble Plan*.**

See also *infra*, in volume 3-2, at *A Study on the consequences of Domitian's assassination ...*

Or: *The wider topographical context of the Arch of Hadrian alongside the Via Flaminia which led to the (later) Hadrianeum and to Hadrian's Temples of Diva Matidia (and of Diva Sabina?) ... With ... The Contribution by John Bodel ...; Introduction; at Section X. Further new research on the Precinct of Diva Matidia : C. Parisi Presicce's (2021) identification of my Temple of Diva Sabina ? with a Temple of Diva Plotina. With related research and with The Contribution by John Bodel : The Label Inscribed on Fragment 36b of the Severan Marble Plan.*

**Between 22nd December 2021 and 18th January 2022, the Egyptologist Friedhelm Hoffmann of the Ludwig-Maximilians-Universität was kind enough to discuss with me the first Preview of this book on Domitian on our Webserver (published in October of 2021), as well as the manuscripts of the Appendices I and II to this book on Domitian.**

Hoffmann alerted me to two things, for which I am especially grateful: first of all that the transcriptions of the hieroglyphic texts in Emanuele M. Ciampini's text were not correctly represented in the Preview on our Webserver (these mistakes turned out to be caused by our application of a wrong software). Thanks to the combined efforts of Emanuele Ciampini, Franz Xaver Schütz and myself these mistakes could be corrected. To our great surprise, Hoffmann disclosed to us also that he has been studying in a research project the architectural remains of precisely that temple of the Egyptian goddess Nehemet-awy, built by Domitian at Hermopolis Magna in Egypt, which, according to Giuseppina Capriotti Vittozzi (2013; 2014), is represented on the Roman marble relief, allegedly 'from Ariccia' (cf. here **Fig. 111**) at the Museo Nazionale Romano, Palazzo Altemps, which is the subject of *Appendix II*.

Cf. *infra*, in volume 3-2, at *Appendix I. The praefectus urbi T. Flavius Sabinus, Domitian's escape from the Capitolium on 19th December AD 69, which happened on the festival of the Opalia, one day of the Saturnalia, and the 'Isis ship', shown in the processions of the Saturnalia at Cologne; at Appendix II. Again on the Egyptianizing marble relief allegedly from Ariccia at the Museo Nazionale Romano, Palazzo Altemps (Fig. 111) - a representation of the Egyptian festival of New Year?; at Appendix II.d) The interpretation of the relief Fig. 111 by G. Capriotti Vittozzi (2013; 2014): it is datable in the Domitianic period and represents the goddess Nehemet-awy, the parhedros of Thot, who was assimilated to Isis, in her temple at Hermopolis Magna in Egypt ('the city of the god Thot'), which was built by Domitian.*

On 18th January 2022, Friedhelm Hoffman wrote me the title of his relevant research-project: "Weltentstehung und Theologie von Hermopolis Magna. Tuna el-Gebel als Teil einer Kultlandschaft in Mittelägypten von der Spät- bis in die Römerzeit (ca. 600 v. Chr. - 400 n. Chr.)". Hoffmann told me that from Domitian's Temple of Nehemet-awy at Hermopolis Magna some fragmentary columns are preserved, which carry inscriptions that could be reconstructed in this project and that will be published in one volume of the series "Weltentstehung und Theologie von Hermopolis Magna", of which volume I has already appeared, edited by Roberto A. Diaz Hernández, Mélanie C. Flossmann-Schütze and Friedhelm Hoffmann (*Antike Kosmogonien*, 2019 = *Tuna el Gebel* Band 9). The scholars of this project have also discussed an older temple, dedicated to the same goddess at the same site: this temple had been renovated by king Nektanebis (I.) of the 30th Dynastie. To this older temple belongs a long inscription on a stela, in which the goddess Nehemet-awy is even represented. This stela will likewise be published in the same volume.

**On 11th January 2022 R.R.R. Smith sent me his article ("*Maiestas Serena: Roman Court Cameos and Early Imperial Poetry and Panegyric*", 2021), which likewise 'reached me right in time', because he adds very interesting observations to the 'Great Trajanic Frieze', with Trajan (now Constantine the Great) on horseback (here Fig. 7.1), that I was discussing in my text on Domitian at this very moment.**

Cf. below, in Chapter *Preamble; Section III; at point 5.*); and at Chapter *The major results of this book on Domitian.*

**Frederick E. Brenk was kind enough to send me on 16th January 2022 his forthcoming article on the Iseum Campense ("The temple of Isis in the Campus Martius in Rome: Place, Space, and Identity in the Ancient Mediterranean World", 2022), which has appeared in the meantime.**

Cf. *infra*, in volume 3-2, at *Appendix II.c;* and at *Appendix III.*

**On 20th January 2022 the article by Ronald T. Ridley ("The Man in the Background: The Search for Maecenas"; 2020) reached me. And on 28th January 2022, Ronald Ridley sent me, likewise by request, his article "The Fate of an Architect: Apollodoros of Damascus", 1989).**

Cf. *infra*, in volume 3-2, at *A Study on the consequences of Domitian's assassination ...*

Or: *The wider topographical context of the Arch of Hadrian alongside the Via Flaminia which led to the (later) Hadrianeum and to Hadrian's Temples of Diva Matidia (and of Diva Sabina?) ...*; at Chapter III. *Was Hadrian himself present at the suppression of the Bar Kokhba Revolt?*

**On 28th January 2022 reached me two generous presents by Eric M. Moormann: the printed essay volume, edited by Aurora Raimondi Cominesi, Nathalie de Haan, Eric M. Moormann, and Claire Stocks (*God on Earth: Emperor Domitian. The re-invention of Rome at the end of the 1st century AD*, 2021), and the book, written by Nathalie de Haan and Eric M. Moormann (*God op aarde Keizer Domitianus*, 2021).**

Cf. *infra*, in Chapter *Preamble: Domitian's negative image*; at Sections I-III; at Chapter IV.; and at

Chapter *The major results of this book on Domitian*; cf. also *infra*, in volume 3-2, at *Appendix II*.

Another consequence was that Eric M. Moormann and Nathalie de Haan were kind enough to discuss with me my Chapter IV. I am very grateful for their interest in my work and also for their corrections of my text.

**On 2nd February 2022 reached me the final version of Emanuele M. Ciampini's first *Contribution to this volume*.**

He was, in addition to this, kind enough so send me Luigi Prada's text on the pair of obelisks from the Temple of Isis at Beneventum ("Obelisk honoring Emperor Domitian and Isis", 2018), which Ciampini has quoted in his text.

See below, at *The first Contribution by Emanuele M. Ciampini : La regalità domiziana: una nota egittologica*.

**On 10th February 2022, T.P. Wiseman was kind enough to send me, on his own account, two of his articles ("The Temple of Iuppiter Stator", 2021, and "Palace-sanctuary or pavilion? Augustus' House and the limits of archaeology", 2022).**

Cf. *infra*, in volume 3-2, in *Appendix V.*; at *Section IV. The (now twelve) different locations of the Temple of Iuppiter Stator, of which seven are marked on the map Fig. 73*; and in *Appendix VI. A digression on Domitian's intention to emulate Augustus and Nero*; at Sections I.; III.; V.; and XI.

**Between February 4th and 24th 2022, I could discuss with Andrew Stewart the portrait-statue of Hadrian from Hierapydna at Istanbul (here Fig. 29), the 'Relief Ruesch' (here Fig. 7), as well as the famous Alexander Mosaic from the Casa del Fauno in Pompeii, kept at the Museo Archeologico Nazionale at Naples.**

Cf. *infra*, in Chapters *Preamble*; *Section III.*; at point 5.); at *A Study on Hadrian's portrait-statue from Hierapydna* (cf. here Fig. 29); and at *The major results of this book on Domitian*.

**On 25th February 2022 Filippo Coarelli was kind enough to send me his above-mentioned article ("La praecipua cenationum rotunda"), which had recently appeared in the volume, edited Françoise Villedieu (*La Vigna Barberini, III. La cenatio rotunda*, 2021).**

Cf. *infra*, at Chapter II.3.1.c); Chapter V.1.i.3.b); at Section II.); and *infra*, in volume 3-2, at *Appendix IV.b.2.*)).

**From 3rd until 5th March 2022 I had the chance to discuss with Eugenio la Rocca in E-mail and telephone conversations which temple could possibly have been represented on fragment 36b of the Severan Marble Plan, a question, which he himself (2021) and Claudio Parici Presicce (2021) have recently addressed.**

Both reject my hypothesis (of 2017), to tentatively identify this temple as that of *Diva Sabina*. La Rocca (2021, 93) follows Parici Presicce (2021, *passim*, especially p. 226 with n. 42) in identifying this temple with that of *Diva Plotina* instead. Parici Presicce himself has based his hypothesis on some new observations concerning fragment 36b of the Severan Marble Plan (cf. here **Figs. 132-136**).

In order to evaluate those contradictory hypotheses, I, therefore, asked Francesca de Caprariis on 8th March 2022, whether it is possible to study several fragments of the Severan Marble Plan, and especially fragment 36b. I am very grateful that on 6th May 2022, Francesca de Caprariis has kindly arranged in the Antiquarium Comunale at Rome that we could study fragment 36b of the Severan Marble Plan : apart from Franz Xaver Schütz and myself also Claudio Parici Presicce and Eugenio La Rocca came to this meeting.

As a result of my new research on those hypotheses, my discussions with John Bodel, who was kind enough to write the following *Contribution* to this volume ("The Label Inscribed on Fragment 36b of the Severan Marble Plan"), and especially after viewing fragment 36b now for the first time myself, I maintain my suggestion of 2017 (cf. here **Fig. 66**) of tentatively attributing this temple to *Diva Sabina*.

For a detailed discussion of all aspects of this topic; cf. *infra*, in volume 3-2, at:

*A Study on the consequences of Domitian's assassination ...*

*Or: The wider topographical context of the Arch of Hadrian alongside the Via Flaminia which led to the (later) Hadrianeum and to Hadrian's Temples of Diva Matidia (and of Diva Sabina?) ...; at Introduction; Section X. Further new research on the Precinct of Diva Matidia : C. Parici Presicce's (2021) identification of my Temple of Diva Sabina ? with a Temple of Diva Plotina. With related research and with The Contribution by John Bodel : The Label Inscribed on Fragment 36b of the Severan Marble Plan;*

*and at Chapter VI. The results of this discussion of this Arch of Hadrian and my 2. Conclusion. This is based on the topographical context of this Arch of Hadrian and on some considerations concerning Hadrian's accession and is in my opinion the preferable scenario; at The Templum Divae Matidiae ('Precinct of Diva Matidia') with Hadrian's Temple complex discussed here. With the correct location of the Temple of Diva Matidia (cf. here **Figs. 67; 67.1**), and new findings concerning the "Tempio di Siepe", and concerning the TEM PL[...], which is recorded by the inscription on fragment 36b of the Severan Marble Plan (cf. here **Figs. 132-134**) and refers to a Templ(um) of Diva Sabina?: a 'Precinct of Diva Sabina' ? or a Temple of Diva Sabina?; at To whom was the second temple (seemingly) within the Templum Divae Matidiae (the 'Precinct of Diva Matidia') dedicated: to Diva Sabina or to Diva Plotina? (cf. here **Figs. 66; 135; 136**); and at The "Tempio di Siepe" (cf. here **Figs. 69.1; 69.2**).*

See also below, at *The Contribution by John Bodel: The Label Inscribed on Fragment 36b of the Severan Marble Plan*.

**On 11th March 2022 the book by Friderike Senkbeil reached me (*Tacitus und Rom. Die urbs Roma als Raum der erzählten Welt in den Historien und Annalen*, 2022), kindly sent me by Peter Herz.**

Cf. below, in Chapters *Preamble*; at Section II.; at *The major results of this book on Domitian*; and *infra*, in volume 3-2, at *Appendix I.b*).

**Francesca de Caprariis, whom I had asked on 8th March 2022 to give us also access to fragments 23a-d and 24b of the Severan Marble Plan, which represent the 'Porticus Aemilia'/ Navalvia at La Marmorata, was kind enough to send me on 13th March 2022, on her own account, two of her own publications on this subject.**

Cf. Francesca de Caprariis ("L'invisibile Roma dei Fulvi", 2019; and "Public buildings and Urban Landscape: A View from the Riverfront", forthcoming 2022. This article has been published in the meantime and Francesca de Caprariis was kind enough to provide with on 16th February 2023 with a scan of it).

On 6th May 2022, we had the chance to study together with her at the Antiquarium Comunale also the fragments 23a-d and 24b of the Severan Marble Plan.

De Caprariis (2022, 131, n. 49) mentions a text by Renato Sebastiani (*et al.* 2016), from which we learn the title of another of their articles, published in *BABESCH* of 2015. I have, therefore, called the editor of this periodical, my good friend Eric M. Moormann in Amsterdam, who, in his turn, on his own account, contacted Gert-Jan Burgers for me, for which I am likewise very grateful indeed.

As a result of Eric Moormann's initiative, Gert-Jan Burgers was kind enough to send me on 21st March 2022 this article which he published together with his co-excavators Raphaëlle-Anne Kok-Merlino and Renato Sebastiani ("The Imperial *horrea* of the *Porticus Aemilia*", 2015).

And on 28th March, two more articles on these excavations by Gert-Jan Burgers reached me, which the author was kind enough to send me as well by request. They were written by himself and by his co-excavators Valerio De Leonardis, Sara Della Ricca, Raphaëlle-Anne Kok-Merlino, Matteo Merlino, Renato Sebastiani and Franco Tella ("*Porticus una extra Portam Trigemina*: nuove considerazioni sulla *Porticus Aemilia*", 2014a, and "Le trasformazioni del paesaggio subaventino nell'età tardoantica: il caso di studio della *Porticus Aemilia*", 2014b).

Finally, on 11th May 2022, Franz Xaver Schütz had the chance to I visit ourselves the quartiere Testaccio and especially the area, called *La Marmorata* in past centuries, with the enormous *opus incertum* building, identified by many scholars (in my opinion erroneously) with the *Porticus Aemilia*.

In addition to this, we met on 19th May 2022 with Laura Gigli at the Church of Santa Passera, located on the opposite (right) bank of the Tiber. Both, the *opus incertum* building at *La Marmorata* and the Church of Santa Passera (cf. here **Figs. 102; 103**) loom large in the following text. Unfortunately, the Rettore of the Church of Santa Passera, whom Laura had asked to give us access to the church, could not join us that day, which is why we need to postpone this detail of our research to a future publication.

For discussions of all that; cf. *infra*, at *A Study of the colossal portrait of Hadrian (now Constantine the Great) in the courtyard of the Palazzo dei Conservatori at Rome* (cf. here **Fig. 11**). With The Contribution by Hans Rupprecht Goette on the reworking of the portrait of Hadrian (now Constantine the Great); at Part II. *Ancient Rome's new commercial river port, at La Marmorata. With discussions of the 'Porticus Aemilia' (in reality identifiable as Navalìa) and of the Horrea Aemiliana. With The sixth Contribution by Peter Herz : Rom. Strukturen der Versorgung; and with The second Contribution by Franz Xaver Schütz : Wie schwer war der ägyptische Obelisk, der heute auf der Piazza di S. Giovanni in Laterano in Rom steht?*

See also below, at *The sixth Contribution by Peter Herz : Rom. Strukturen der Versorgung*; and at *The second Contribution by Franz Xaver Schütz : Wie schwer war der ägyptische Obelisk, der heute auf der Piazza di S. Giovanni in Laterano in Rom steht?*

**Claudia Valeri was kind enough to send me on 26th March 2022, on request, the article by Cecilia Ricci ("La sicurezza degli imperatori nelle ville di Praeneste e Albanum", 2021).**

Cf. *infra*, in volume 3-2, at *Appendix IV.d.4.b) Domitian's building project comprising the Campus Martius, the Capitoline Hill and the sella between Arx and Quirinal. With detailed discussion of the Templum Pacis, and some remarks on Domitian's Villa, called Albanum.*

**On 3rd April 2022, Amanda Claridge was kind enough to send my, by request, the article by T.P. Wiseman ("Walls, gates and stories: Detecting Rome's riverside defences", 2021a).**

Cf. *infra*, at *A Study on the colossal portrait of Hadrian (now Constantine the Great) in the courtyard of the Palazzo dei Conservatori at Rome* (cf. here **Fig. 11**). With The Contribution by Hans Rupprecht Goette on the reworking of the portrait of Hadrian (now Constantine the Great); at Part II. *Ancient Rome's new commercial river port, at La Marmorata. With discussions of the 'Porticus Aemilia' (in reality identifiable as Navalía) and of the Horrea Aemiliana.* With The sixth Contribution by Peter Herz : Rom. Strukturen der Versorgung; and with The second Contribution by Franz Xaver Schütz : Wie schwer war der ägyptische Obelisk, der heute auf der Piazza di S. Giovanni in Laterano in Rom steht?

**On 4th May 2022, Helen Whitehouse, whom I had called in Oxford, and Panorea Alexandratos were kind enough to help me acquire a photo from a drawing of the Paper Museum of Cassiano Dal Pozzo (cf. here Fig. 106), and to get in touch with the Royal Collection Trust at London.**

This drawing represents the above-mentioned relief with three Tiber ships, carved on the plinth of the colossal marble statue of the River God Tiber, which Domitian had commissioned for the Iseum Campense at Rome, after this sanctuary had been destroyed in the great fire of AD 80. This statue of the River God Tiber is on display in the Louvre at Paris (here **Fig. 104**), and the drawing of the three Tiber ships is kept at Windsor, at the Royal Library (RL 8739). It had been, of course, Amanda Claridge who, when discussing with her the photo of one of those Tiber ships, which transports a huge block of marble, and has been published by Patrizio Pensabene and Javier Á. Domingo (2016-2017, 573, Fig. 15 [= here **Fig. 105**]), alerted me to the fact that all three Tiber ships, represented on this relief, have been documented on a drawing, kept in the Paper Museum of Cassiano Dal Pozzo (here **Fig. 106**).

On 6th May 2022, an E-mail of Daniel Partridge of the Royal Collection Trust (London) reached me, who informed me that, according to their regulations concerning scholarly publications, I may publish the image of this drawing (here **Fig. 106**). For this generous offer I am very grateful indeed.

Cf. *infra*, at *A Study on the colossal portrait of Hadrian (now Constantine the Great) in the courtyard of the Palazzo dei Conservatori at Rome* (cf. here **Fig. 11**). With The Contribution by Hans Rupprecht Goette on the reworking of the portrait of Hadrian (now Constantine the Great); at Part II. *Ancient Rome's new commercial river port, at La Marmorata. With discussions of the 'Porticus Aemilia' (in reality identifiable as Navalía) and of the Horrea Aemiliana.* With The sixth Contribution by Peter Herz : Rom. Strukturen der Versorgung; and with The second Contribution by Franz Xaver Schütz : Wie schwer war der ägyptische Obelisk, der heute auf der Piazza di S. Giovanni in Laterano in Rom steht?; at Section II. *Ships in the Portus Augusti* (here **Figs. 98; 99**) and on the Tiber (here **Figs. 105; 106**), which supplied the city of Rome with goods from all over the Empire, and the men, who provided these services.

**On the 13th of May 2022, Franz Xaver Schütz and I had the chance to meet with Filippo Coarelli in Rome. We discussed my reconstruction of Hadrian's Temple complex in the Campus Martius (cf. here Fig. 66), and Coarelli was kind enough to offer me to read the manuscript, in which all this is discussed: the Introduction of my text *A Study on the consequences of Domitian's assassination*.**

Coarelli, after having read this *Introduction*, told me in a telephone conversation of 9th June 2022 that, in his opinion, the temple represented on fragment 36b of the Severan Marble Plan cannot possibly have been dedicated to *Diva Sabina*, as I myself propose (cf. here **Fig. 66**). The reason being the suggestion by François Chausson ("Temples des Diui et Diuae de la dynastie antonine", 2001) that *Diva Sabina* may have been worshipped in the Temple of *Divus Hadrianus*, the *Hadrianeum* (here **Fig. 66**).

If true, this hypothesis would preclude my assumption of a separate Temple of *Diva Sabina* in the area of the *Campus Martius* under scrutiny here. When writing my earlier *Study* on the subject, published in 2017, I had managed to overlook this publication by Chausson (2001). I have, therefore, now added to this *Introduction* the below-quoted Section XIV., in which I discuss Chausson's hypothesis (2001), as well as all similar more recent hypotheses.

In addition to this; I have asked the numismatist Angelo Geißen for advice, who was kind enough to study for me some coins, issued by Antoninus Pius in 150-151 AD; those coins are believed by some of the just-

mentioned scholars to show the *Hadrianeum*. And because some of those coins represent *two cult-statues* in the *cella* of the represented temple, this is taken by those scholars for the proof, that, in the *Hadrianeum*, *Diva Sabina* was worshipped together with *Divus Hadrianus*. But it is not as easy as that. See below, at Angelo Geißen's second *Contribution* to this book on Domitian : *Zum 'Hadrianeum' auf Münzen des Antoninus Pius*.

**As a result of all this, I maintain my earlier tentative hypothesis (of 2017; cf. here Fig. 66) that the temple, represented on fragment 36b of the Severan Marble Plan was dedicated to 'Diva Sabina'.**

For a discussion; cf. *infra*, in volume 3-2, at *A Study on the consequences of Domitian's assassination : Nerva is forced to adopt Trajan and Trajan creates Domitian's negative image to consolidate his own reign. With Hadrian's adoption manquée in late October or at the beginning of November of AD 97, his 20-year long road to his accession and his thanksgivings for it, his Temple complex in the Campus Martius. Or: The wider topographical context of the Arch of Hadrian alongside the Via Flaminia which led to the (later) Hadrianeum and to Hadrian's Temples of Diva Matidia (and of Diva Sabina?) ... With The fourth and the fifth Contribution by Peter Herz, with The first Contribution by Franz Xaver Schütz, with The Contribution by John Bodel, and with The second Contribution by Angelo Geißen; Introduction; at Section XIV. Further new research: F. Chausson's (2001) idea that the Hadrianeum was possibly dedicated to Divus Hadrianus and to Diva Sabina, and recent discussions of this hypothesis. With The second Contribution by Angelo Geißen : *Zum 'Hadrianeum' auf Münzen des Antoninus Pius*.*

**On 16th of May 2022, Claudia Valeri accompanied me to the two headless cuirassed statues in the Musei Vaticani, Museo Chiaramonti (inv. nos. 1250 and 1254), the possible portraits of Domitian (inv. no. 1254; here Fig. 6, right) and of Vespasian or Titus (inv. no. 1250; here Fig. 6, left), which, as already mentioned above, we had already in vain planned to study together on 9th March 2020.**

On that occasion, Claudia provided me also with a publication, in which both statues (here Fig. 6, left and right) have been discussed; cf. Maria Grazia Picozzi ("Le antichità", in: C. PIETRANGELI (ed.), *Palazzo Ruspoli*, 1992, p. 246 with n. 54 (when in this collection, these statues were identified with Hadrian and Antoninus Pius), p. 248 with n. 67, p. 251, with ns. 105-108).

See below, at *The second Contribution by Claudia Valeri on the two headless cuirassed statues of Flavian emperors at the Museo Chiaramonti (inv. nos. 1250; 1254; cf. here Fig. 6, left and right);* and in Chapter *Preamble*, at Sections II. and III.; in *A Study on Hadrian's portrait-statue from Hierapydna (cf. here Fig. 29);* and *infra*, in volume 3-2, at *Appendix IV.c.2.) The Ogulnian monument (a statue group representing the she-wolf suckling Romulus and Remus, standing underneath the sacred fig tree ficus Ruminalis), and she-wolf suckling Romulus and Remus on a headless cuirassed statue of a Flavian emperor (Domitian?) in the Vatican Museums (cf. here Fig. 6, right) and on Hadrian's cuirassed statue from Hierapydna at Istanbul (cf. here Fig. 29). Exactly like the statue of the ficus Ruminalis on the Anaglypha Hadriani (cf. here Figs 21; 22), the lupa and the twins on those cuirasses symbolize Rome's claim to eternal power and divine mission, and that it was the task of the Roman emperor to fulfill this obligation (cf. C. Parisi Presicce 2000, 28, 29). With a discussion of the meaning of the lupa and the twins on the "Rilievo Terme Vaticano" (cf. here Fig. 31).*

**My thanks are also due to our good friend Laura Gigli in Rome, who has been studying the area of the Piazza Capranica in the *Campus Martius* for a very long time, and with whom I could discuss from 19th June to 12th July 2022 the following ideas on the telephone and in E-mail conversations.**

First of all I asked Laura to take photographs, if possible, of the two shafts of cipollino columns, inserted into the west- and east-walls of the courtyard of the Palazzo della Confraternità del Rosario (cf. here Fig. 62.6), which have been documented on Nolli's map (cf. here Figs. 62; 62.1; 62.1.A; 62.2), that I was studying at that time. This palazzo stands on the south-side of Piazza Capranica and has today the mailing address 'Piazza Capranica number 78'.

Laura, who, despite the great heat in Rome at that time, was kind enough to go several times for us to this palazzo, found out the following by discussing the matter with people, whom she met there: the impressive portal of the Palazzo della Confraternità del Rosario on Piazza Capranica, through which, at Nolli's time, this cortile had obviously been accessible, still exists, but the cortile itself not (cf. here **Fig. 62**, Nolli's index number 328; cf. **Figs. 62.6; 66**, labels: Piazza Capranica; Palazzo della Confraternità del Rosario). Nowadays there are only two very small 'chiostri di servizio', which also appear in the current cadastre/ the photogrammetric data (cf. here **Fig. 62.3**). Laura was also kind enough to take photographs of the cipollino column on the Vicolo della Spada d'Orlando for us (here **Fig. 62.7**), also documented on Nolli's map.

And when I sent Laura a first draft of my relevant text, *inter alia* accompanied by a photo of the buildings standing on the south-side of Piazza Capranica, published by Ferruccio Lombardi (1992, 120), she realized that this image must have been taken from the Torre Capranica within Palazzo Capranica, which stands on the north-side of Piazza Capranica (cf. here **Fig. 66**). Laura was kind enough to contact for me, on her own account, Dott. Richard Sasson of "A World Apart", which is accommodated at the Torre Capranica. To the effect that, thanks to Laura's energetic initiative, and thanks to the great kindness of Dott. Richard Sasson, and of the photographer of this splendid image, Signora Francesca Maiolino, I may publish here this photograph from his own collection, which shows the entire Piazza Capranica, as seen from the Torre Capranica (!), looking south-west (cf. here **Fig. 62.6**).

For discussions of all this; cf. *infra*, in volume 3-2, at:

*A Study on the consequences of Domitian's assassination : Nerva is forced to adopt Trajan and Trajan creates Domitian's negative image to consolidate his own reign. With Hadrian's adoption manquée in late October or at the beginning of November of AD 97, his 20-year long road to his accession and his thanksgivings for it, his Temple complex in the Campus Martius.*

*Or : The wider topographical context of the Arch of Hadrian alongside the Via Flaminia which led to the (later) Hadrianeum and to Hadrian's Temples of Diva Matidia (and of Diva Sabina?). With discussions of Hadrian's journey from Moesia Inferior to Mogontiacum (Mayence) in order to congratulate Trajan on his adoption by Nerva, and of Hadrian's portrait-type Delta Omikron ( $\Delta o$ ) (cf. here **Fig. 3**). With The fourth and the fifth Contribution by Peter Herz, with The first Contribution by Franz Xaver Schütz (cf. here **Fig. 77**), with The Contribution by John Bodel, and with The second Contribution by Angelo Geißen;*

*Introduction; at Section III. The Precinct and Temple of Diva Matidia: my new research, motivated by Francesca Dell'Era's (2020) critique of my first reconstruction of the Temple of Diva Sabina ?*

**Hans-Ulrich Cain, who has himself recently studied the area of the *Campus Martius* in his already mentioned article ("Dynastischer Memorialraum und Herrschernekropole - das römische Marsfeld im 2. Jahrhundert n. Chr.", 2021), was kind enough to discuss with me in telephone- and E-mail conversations between 4th and 19th July 2022 my own ideas presented here: he has read the *Introduction* of the relevant *Study*, as well as several of the other *Chapters*, and has written me his comments.**

*Cf. infra*, in volume 3-2, at *A Study on the consequences of Domitian's assassination ... Or: The wider topographical context of the Arch of Hadrian alongside the Via Flaminia which led to the (later) Hadrianeum and to Hadrian's Temples of Diva Matidia (and of Diva Sabina?)*.

**On 4th July 2022, Hans-Ulrich Cain sent me another of his publications ("Der sterbende Gallier im Kapitol - heroischer Elitekrieger oder rabiater Barbar?", 2022). Here he discusses the article by Alexander Heinemann ("Jupiter, die Flavier und das Kapitol oder: Wie man einen Bürgerkrieg gewinnt", 2016), which is, of course, also of great importance to this *Study*, and that I had managed to overlook so far. - And on 27th July 2022, Alexander Heinemann was kind enough to send me his article of 2016.**

See below, in Chapter *Preamble*; Section III.; at point 1.); and *infra*, in volume 3-2, at *Appendix I.a*); and at *Appendix I.b*).

**As another result of our conversations, Hans-Ulrich Cain sent me on 19th July 2022, on request, his own article ("Die Bildhauerkunst zur Zeit der antoninischen Kaiser (138-192 n. Chr.)", 2019), in which he too discusses Hadrian's Delta Omikron ( $\Delta o$ ) portrait-type (here Fig. 3), and that I had also overlooked so far. I am glad to say that independently of him and for different reasons, I have come in my relevant text to exactly the same conclusions concerning the date and meaning of the marble copies of this portrait-type.**

For a discussion, see below, at Chapter *The major results of this book on Domitian; and infra*, in volume 3-2, at *A Study on the consequences of Domitian's assassination ... Or: The wider topographical context ...*; at Chapter VI.2. *Hadrian's portrait-type Delta Omikron ( $\Delta o$ )*; at Chapter VI.2.3. *My own interpretation of Hadrian's portrait-type Delta Omikron ( $\Delta o$ ) (cf. here Figs. 3)*; and at Chapter VI.2.3. *Why does Hadrian's portrait-type Delta Omikron ( $\Delta o$ ) appear on his aurei of AD 138 with his DIVIS PARENTIBVS on the reverses (here Fig. 139)? The answer is provided by a comparison of those aurei with Hadrian's tetradrachma (cf. here Fig. 138), issued at Alexandria in AD 137/ 138 to commemorate his adoption of the future Antoninus Pius on 25th February AD 138.*

*With a discussion of the observations by H.-U. Cain (2019, 1-2) concerning Hadrian's portrait-type Delta Omikron ( $\Delta o$ ) (cf. here Fig. 3), and concerning the portrait-types of his successors, all adopted in AD 138: the portrait-type of the future Antoninus Pius, created on the occasion of his adoption by Hadrian, which intentionally shows great similarities with Hadrian's own later portraits; and of the portrait-types of the future Marcus Aurelius and Lucius Verus, created on the occasion of their adoptions by Antoninus Pius, that are intentionally very similar as Hadrian's youthful portrait-type Delta Omikron ( $\Delta o$ ) (here Fig. 3) (for these portrait-types of Antoninus Pius, Marcus Aurelius and Lucius Verus; cf. H.-U. CAIN 2019, 1-2, Abb. 1-3). Cain (2019, 2) writes that Hadrian "in seinen letzten Lebensjahren 136–138 n. Chr. sein eigenes Jugendbildnis [here Fig. 3] aktualisieren ließ, als ihm die Nachfolgeregelung zu einem vordringlichen Anliegen geworden war".*

**Discussing (again) with Laura Gigli the various excavations, conducted at the *Porticus Octaviae*, she was kind enough to send me on 5th October 2022, by request, the article by the late architect Giuliano Sacchi.**

Cf. Giuliano Sacchi ("Un palazzo patrizio del tardo Cinquecento nel Rione Sant'Angelo : sopravvivenze medievali e antichi resti del lato nord-orientale della *Porticus Octaviae* ; contributo alla conoscenza del manufatto e documenti di cantiere : con appendice di Pier Nicola Pagliara ; il palazzo Patrizi a Santa Caterina dei Funari", 1995 [1996]).

**And Giuseppina Pisani Sartorio, with whom I likewise discussed again the excavations conducted at the *Porticus Octaviae* by the late Paola Ciancio Rossetto, published 2017, sent me on 7th October 2022, on her own account, two more publications by Ciancio Rossetto on the following subjects ("*Porticus Octaviae: fase augustea*", 2018; and *ead.*, "*Porticus Octaviae: fase severiana*", 2021).**

In addition to this, Giuseppina Pisani Sartorio sent me, on 11th October 2022, on her own account, the last article, written by Paola Ciancio Rossetto on the *Porticus Octaviae* ("Il portico d'Ottavia all'inizio del III secolo. Dall'analisi archeologica e architettonica nuovi elementi per la ricostruzione tridimensionale", 2022). Ciancio Rossetto's last article on this subject has in the meantime (posthumously) appeared in the Proceedings of a conference, held at Caen in 2019, and edited by Philippe Fleury and Sophie Madeleine (*Topographie et urbanisme de la Rome antique Actes du colloque organisé à Caen (11-13 décembre 2019)*, 2022).

And on 25th October 2022, Francesca Deli, Assistant Librarian of the British School, was kind enough to send me, on request, a scan of the following publication for me: Paola di Manzano ("Via Cavalletti", 1989-1990). Together with Giuliano Sacchi, the archaeologist Paola di Manzano had excavated finds in the basements of Palazzo Patrizi Clementi at the Via Cavalletti that belong to northern part of the *Porticus Octaviae*.

Paola Ciancio Rossetto (2017-2022) writes in all her articles that the architectural finds, excavated in the basements of Palazzo Patrizi Clementi, which belong to the *Porticus Octaviae*, are not accessible any more.

Those finds had been excavated and documented in exemplary fashion by the director of this excavation, the architect Giuliano Sacchi (1995); see also the publications by his colleagues, the archaeologists Paola di Manzano (1989-1990; cf. *ead.* 1990), and Roberto Giustini (1990). Ciancio Rossetto (2022, p 270, n. 91) writes also that the entire original documentation of this excavation, directed by Giuliano Sacchi, which, according to Ciancio Rossetto, had been kept in the archive of the Superintendency of the State at Palazzo Altemps, had disappeared, when she went there in order to consult these documents (!).

On 3rd November 2022, Paola di Manzano was kind enough to write me an E-Mail. Laura Gigli had found her address for me, telling her that I would like to send her my text, in which I have discussed her excavation at the *Porticus Octaviae*. As I had hoped, di Manzano still has her own documentary material of this excavation, since she had always hoped to publish herself the *Porticus Octaviae*. In this E-mail, di Manzano kindly offered me to send me her material. I thanked her for her generous offer, but because I do not know the relevant architectural finds in the basements of Palazzo Patrizi Clementi from autopsy, where she, Giuliano Sacchi and other colleagues had excavated, and because there is no chance right now that she and I could visit the site together, I rather refrain for the time being from such a research project. I have, therefore, suggested to her to donate her own material, that refers to the excavation of the *Porticus Octaviae*, to one of the Superintendencies of Rome: hoping that other scholars will be able to study it, who wish to pursue research on the *Porticus Octaviae*. On 8th November 2022, Paola di Manzano has kindly granted me the permission by E-mail to mention here the generous offer she has made me.

For a discussion of all that; cf. *infra*, in volume 3-2, at *A Study on the consequences of Domitian's assassination ... Or: The wider topographical context of the Arch of Hadrian alongside the Via Flaminia which led to the (later) Hadrianeum and to Hadrian's Temples of Diva Matidia (and of Diva Sabina?) ...*; Introduction; at Section I. *The motivation to write this Study: W. Eck's (2019b) new interpretation of the inscription CIL VI 40518 (cf. here Fig. 91.1), the decision to correct my own relevant errors in my earlier Study (2017), and the subjects discussed here, as told by the accompanying figures and their pertaining captions.*

**Francesca Deli made on 25th October 2022 also a scan of the following publication for me: Maria Teresa D'Alessio ("Il Tempio di Adriano nel Campo Marzio nuove proposte ricostruttive", 2014), for which I am very grateful.**

Cf. *infra*, in volume 3-2, at *A Study on the consequences of Domitian's assassination: ... The wider topographical context of the Arch of Hadrian alongside the Via Flaminia Or: The wider topographical context of the Arch of Hadrian alongside the Via Flaminia which led to the (later) Hadrianeum and to Hadrian's Temples of Diva Matidia (and of Diva Sabina?) ... With The fourth and the fifth Contribution by Peter Herz, with The first Contribution by Franz Xaver Schütz, with The Contribution by John Bodel, and with The second Contribution by Angelo Geißen*;  
Introduction; at Section XIV. *Further new research: F. Chausson's (2001) idea that the Hadrianeum was possibly dedicated to Divus Hadrianus and to Diva Sabina, and recent discussions of this hypothesis. With The second Contribution by Angelo Geißen : Zum 'Hadrianeum' auf Münzen des Antoninus Pius.*

**On 28th October 2022 Emanuele M. Ciampini kindly informed me by E-mail that the paper, prepared by himself and by the Egyptologist Federica Pancin, had been accepted for a Conference in January of 2023.**

This Conference had the following title: *The Damned Despot : Rethinking Domitian and the Flavian World*", and was held at Rome from 18-21 January 2023. This Conference was organized by Antony Augoustakis, Emma Buckley, Nathalie de Haan, Eric Moormann, Maria Paola del Moro, Massimiliano Munzi, Claudio Parisi Presicce, Aurora Raimondi Cominesi, and Claire Stocks.

In their paper, Ciampini and Pancin presented the results of their current research on the Egyptian inscriptions, created at Rome in the Flavian period, comprising those on Domitian's obelisk. The title of the paper by Emanuele M. Ciampini and Federica Pancin was:

"**And may the land be prosperous in the time of the dynasty whose name is Flavii'. Thoughts on the Egyptian Domitian** [my emphasis]". The first part of the title of their paper is a quote from Domitian's obelisk; cf. E.M. Ciampini (2004,159, H.7). Cf. *supra*, at *What this Study is all about?*; and *infra*, in Chapter *Preamble*; Section *III.*; at point 5.).

**On 20th November 2022 reached me an Email by Peter Herz, who was kind enough to send me the review by Frederick Naerebout (2022) of Raymond Marks and Marcello Mogetta, *Domitian's Rome and the Augustan Legacy* (2021).**

Naerebout discusses among other things the notorious, but unjustified reproach in ancient literary sources, also followed by authors of this volume, according to which Domitian had demanded to be addressed as '*dominus et deus*', not only in official ceremonies at Rome, but also in official texts. This has already been refuted by John Pollini (2012, 103 with n. 167, quoted *verbatim infra*, in Chapter *I.2.*, at n. 227).

Cf. below, in Chapter *Preamble*; at Section *II.*; and *infra*, in volume 3-2, in *Appendix VI.*; at Section *I.*

**Hans Rupprecht Goette was kind enough to send me, on his own account, two more recent publications by Werner Eck ("B. Bar-Kochba-Aufstand" and "E. Jüdischer Krieg", in: *Militär-geschichte der griechisch-römischen Antike, Der Neue Pauly, Supplemente Band 12, 2022*).**

Contrary to his earlier publications (cf. W. ECK, P. HOLDER, and A. PANGERL 2010; and W. ECK 2012), Eck (2022, Sp. 485, 486) expresses in his most recent publication on the subject doubts that Hadrian had himself led a campaign to suppress the Bar Kokhba Revolt.

Cf. *infra*, at *A Study on Hadrian's portrait-statue from Hierapydna* (cf. here Fig. 29); in Chapter *The visualization of the results of this book on Domitian on our maps*; and *infra*, in volume 3-2, at *A Study on the consequences of Domitian's assassination ...*

*Or: The wider topographical context of the Arch of Hadrian alongside the Via Flaminia which led to the (later) Hadrianeum and to Hadrian's Temples of Diva Matidia (and of Diva Sabina?)...; at Chapter III. Was Hadrian himself present at the suppression of the Bar Kokhba Revolt?; and infra, in volume 3-2, at Appendix IV.c.2.).*

**In the autumn of 2022, I have realized that I would be unable to publish my entire book on Domitian on our Webserver by the end of this year.**

I have, therefore, prepared two more Previews for this book on Domitian for our Webserver, published there in December of 2022. Namely the Chapters "What this *Study* is all about", and the closely related Chapter "The visualization of the results of this book on Domitian on our maps". In order to explain the delay of the publication of this book, I have written E-mails to those scholars, who had been so generous as to write *Contributions* for this book and to other colleagues and friends, providing them with links to those two texts.

In her reply to my E-mail Laura Gigli has discussed a remark in my text "The visualization of the results of this book on Domitian on our maps", in which I follow a hypothesis of Giandomenico Spinola, which he had kindly told me on 24th September 2018, and which is quoted *infra*, in Chapter *III.*. See also below, at *The Contribution by Giandomenico Spinola on the Cancellaria Reliefs.*

Like myself, Spinola (*op.cit.*) is convinced that Frieze B of the Cancellaria Reliefs showed from the beginning the Emperor Vespasian and his younger son Domitian (*i.e.*, the togate youth standing in front of Vespasian; cf. here **Figs. 1 and 2 drawing, figures: 14** [Vespasian]; **12** [Domitian]). Spinola suggests that Vespasian's gesture to lay his lifted right hand on Domitian's left shoulder means the "legittimazione" of Domitian's

(future) reign as emperor (in reality, Vespasian's hand does not touch Domitian's shoulder, but from a distance it looks like this). For a detailed discussion; cf. *infra*, at Chapter *The major results of this book on Domitian*. Laura Gigli wrote me her comments on this hypothesis in an E-mail of 27th December 2022; and because I find her comments very interesting, she has kindly allowed me to publish them here.

**See below, at *The second Contribution by Laura Gigli : Il Potere dell'immagine*.**

On 31st December 2022 an E-mail by Maria Paola Del Moro reached me, whom I had asked to tell me the editors of their exhibition catalogue on Domitian. Maria Paola Del Moro was kind enough to provide me with this information. The full reference to this catalogue is: Claudio Parisi Presicce, Massimiliano Munzi and Maria Paola Del Moro (a cura di), *Domiziano Imperatore. Odio e amore* ([Roma:] Gangemi Editore 2023).

On 1st January 2023, I could again discuss with Andrew Stewart in an E-mail correspondence the 'Relief Ruesch' (here **Fig. 7**) and the Alexander Mosaic. Cf. *infra*, in Chapter *Preamble; Section III.; at point 5.*; and *infra*, in Chapter *The major results of this book on Domitian*.

**After we had published a Preview of the Chapter *The major results of this book on Domitian* (cf. *infra*) on our Webserver, Alexander Heinemann has asked me in an E-mail of 26th January 2023, whether I could provide him with publications, in which it has been demonstrated that the labyrinth in the great 'Peristyle' of Domitian's Palace on the Palatine, the 'Domus Flavia' / *Domus Augustana* (cf. here **Figs. 8.1; 58**), which in its current state is heavily restored, is actually ancient.**

Franz Xaver Schütz was kind enough to make a special research on the Internet, finding an article by Staffan Lundén ("The Palatine Labyrinth. Was it built in the 1<sup>st</sup> or 20<sup>th</sup> Century?", 2004), who believes that this labyrinth was 'invented' by its excavator Giacomo Boni. Lundén quotes *inter alia* 'La Rocca 1994'. Discussing Lundén's article (2004) with Alexander Heinemann and Eugenio La Rocca, La Rocca was kind enough to answer my relevant questions by E-mail on 18th February 2023. He provides evidence which proves beyond any doubt that this labyrinth, which Boni had excavated and later restored, is indeed ancient. With La Rocca's kind consent, I may publish here his E-mail as his second *Contribution* to this volume.

**See below, at *The second Contribution by Eugenio La Rocca : Una nota sul labirinto del Palatino*.**

Cf. *infra*, in Chapter *Preamble: Domitian's negative image; Section III. My own thoughts about Domitian. With The second Contribution by Eugenio La Rocca: Una nota sul labirinto del Palatino; at point 4.*; and *infra*, in volume 3-2, at *Appendix IV.d.4.b Domitian's building project comprising the Campus Martius, the Capitoline Hill and the sella between Arx and Quirinal. With detailed discussion of the Templum Pacis, and some remarks on Domitian's Villa, called Albanum*.

On 16th February 2023 Hans Rupprecht Goette was kind enough to send me, by his own account, the following publication by Werner Eck ("Iudaea/Syria Palaestina und seine militärische Besatzung: Ein Beispiel für Römische Realpolitik", 2022a).

Cf. *infra*, at Chapter *The visualization of the results of this book on Domitian on our maps*.

Peter Herz, with whom I had been discussing from the very beginning all subjects revolving around ancient Rome's new commercial riverport, at *La Marmorata* in the quartiere 'Testaccio', was kind enough to send me on 25th February 2023 the sixth *Contribution* to this volume. In this text, Herz describes the great difficulties to supply the city of Rome with all kinds of goods needed for its already in antiquity more than one million inhabitants.

**See below, at *The sixth Contribution by Peter Herz : Rom. Strukturen der Versorgung*.**

Cf. *infra*, at *A Study on the colossal portrait of Hadrian (now Constantine the Great) in the courtyard of the Palazzo dei Conservatori at Rome* (cf. here **Fig. 11**). With The Contribution by Hans Rupprecht Goette on the reworking of the portrait of Hadrian (now Constantine the Great); at Part II. *Ancient Rome's new commercial river port, at La Marmorata. With discussions of the 'Porticus Aemilia' (in reality identifiable as Navalìa) and of the Horrea Aemiliana.* With The sixth Contribution by Peter Herz : Rom. Strukturen der Versorgung; and with The second Contribution by Franz Xaver Schütz : Wie schwer war der ägyptische Obelisk, der heute auf der Piazza di S. Giovanni in Laterano in Rom steht?

The following publications have reached me so late that I could not discuss them in this *Study* any more, but I wish at least to mention them here, and have also added those references to the relevant *Chapters*.

**Patrizio Pensabene, with whom I had discussed on the telephone and in an E-mail correspondence the publication on our Webserver of the Chapter *The major results of this book on Domitian*, was kind enough to tell and write me on 25th March 2023 that he and Francesca Caprioli are about to finish a book on the 'Domus Flavia' on the Palatine (*Par domus caelo est* [Mart. 8,36,12], in press).**

**Pensabene sent me on 25th March 2023, in addition to this, two of his recent publications; cf. Pensabene and Javier Domingo ("Capitolo I L'area della Basilica e del Convento e il Tempio di Claudio", in: Franco Astolfi and Alia Englen: *Caelius II Tomo 2 Pars Superior La Basilica dei Santi Giovanni e Paolo e il Tempio di Claudio*, 2022), as well as the article by Pensabene, which has been published in the same volume ("5. Recupero e riuso dell'antico nei SS. Giovanni e Paolo: gli elementi architettonici", 2022).**

As already mentioned above, Patrizio Pensabene and Javier Domingo (2022) discuss in their article not only the Temple of the divinized Claudius, but also the enormous "aula absidata" as they refer to it, called by other scholars the *Augusteum*, that was located in the southern portico, surrounding the *Claudianum*, which is represented on the Severan Marble Plan.

For this *Augusteum*, where she suggests that the statues discussed by her were possibly on display (or alternatively within the *Claudianum*); cf. Emilia Talamo (in: E. LA ROCCA *et al.* 2011, 230-231, cat. no. "3.7 Statua di Agrippina minore come orante"), Roma; Musei Capitolini, Centrale Montemartini (inv. no. 1882), "Grovacca del Wadi Hammamat (Egitto)"; this torso is restored with a plaster cast of the statue's head in the Ny Carlsberg Glyptotek at Copenhagen; cf. p. 232, cat. no. "3.8 Statua di fanciullo togato", Britannicus (?), Firenze, Galleria degli Uffizi (inv. no. 1914). As already mentioned above, I myself wonder, whether the head of this statue actually belongs to the statue; cf. Häuber (2014a, 395-399).

We have also heard above, that John Pollini has now dedicated a study to the portrait-type of Claudius's son Britannicus ("New Observations on the imperial reliefs from the Sebasteion at Aphrodisias and the portraiture of Claudius, Britannicus, and the young Nero", 2021). But Pollini (2021) does not consider in his article the "Statua di fanciullo togato", Britannicus (?), Firenze, Galleria degli Uffizi (inv. no. 1914), discussed by Talamo (2011).

According to Pensabene and Domingo (2022, 54) this enormous "aula absidata"/ the *Augusteum*, located in the southern portico surrounding the *Claudianum*, accommodated a cult of members of the Flavian dynasty, and that Vespasian, who had built this phase of the *Claudianum*, thus had aimed to 'add' a cult of his own dynasty to that of the Iulio-Claudians. Pensabene and Domingo (2022, 54) suggest that the statues of Claudius's family (thus referring to the just-mentioned portrait-statues of Agrippina *minor* and of the presumed Britannicus ?), were possibly on display within the Temple of *Divus Claudius*: "... la definizione dell'ampliamento del recinto porticato della piazza [surrounding the *Claudianum*] nella fase vespasiana, ha consentito di approfondire la funzione di alcune strutture segnalate dalla FUR [*i.e.*, the Forma Urbis Romae, the Severan Marble Plan] sul portico del lato sud, in particolare quella di un'enorme aula absidata molto probabilmente destinata al culto dei membri della famiglia flavia, che si aggiunse a quella dei giulio-claudi le cui statue dovevano forse trovarsi nel tempio centrale".

We have also heard above that Thorsten Opper (2021, 128 Fig. 144 "Statua of Agrippina performing a sacrifice") suggests that this portrait-statue is carved from basanite (*basanites*) instead.

Pensabene and Domingo (2022), who have studied the fragmentary architectural marbles from both the *Templum Pacis* and the Vespasianic phase of the *Claudianum*, convincingly stress the great similarities of both buildings. The great "aula absidata"/ the *Augusteum* in the southern portico surrounding the *Claudianum* actually occupied the same position as the Temple of Pax within the *Templum Pacis* (cf. for both here **Fig. 58**). Finally I found Pier Luigi Tucci's recent article on the *Templum Pacis* ("Il Tempio della Pace : ricostruzioni e istruzioni per l'uso", 2022), which, in my opinion, should be considered in this context as well.

**In future studies all these above-summarized new observations concerning the *Claudianum* and the *Templum Pacis* will hopefully be considered together.**

And provided, this could actually become a new research project, also the above-mentioned new findings by Francesco Paolo Arata should be considered as well. Arata (2012) has discussed an excavation at the Casina Salvi on the western slope of the Caelian, where Domitianic foundations were found, which Arata (convincingly) attributes to the pillars of Domitian's branch of the *Aqua Claudia*, built by the emperor from the Caelian to the Palatine in order to provide his Palace 'Domus Flavia' / *Domus Augustana* with water. As Arata is able to demonstrate, the building history of the *Aqua Claudia* on the Caelian is closely related to the building history of the *Claudianum*.

**In addition to this, we should not forget a fundamental problem that Riccardo Santangeli Valenzani has recently reminded us of that everyone faces, who publishes his or her ideas on the just-mentioned subjects.**

In his review of Pier Luigi Tucci's book on the *Templum Pacis* (2017), **Santangeli Valenzani observes** (2018, quoted *verbatim* in more detail *infra*, in volume 3-2, at *Appendix IV.d.4.b*): "**that in some cases the book [i.e., P.L. TUCCI 2017] has already been outdated by the results of the latest research ... [listing in the following some examples for this fact]. Naturally these lacunae cannot be attributed to Tucci (except for the choice of publishing a monograph on a monument that is still being excavated) [my emphasis]**".

For discussions of all those subjects; cf. below, in Chapter *Preamble*; Section III.; at point 3.); in Chapter IV.1.1.g) *The controversy concerning the "ARCUS AD ISIS" that is visible on a relief from the Tomb of the Haterii* (cf. here **Figs. 89; 90**): it cannot be identified with the *Arco di Camilliano* to the east of the *Iseum Campense*, but stood instead near the Temple of Isis et Serapis in Regio III. With a summary of Domitian's 'pharaonic project', called 'Colosseum city'; and *infra*, in volume 3-2, at *Appendix IV.d.4.b*) *Domitian's building project comprising the Campus Martius, the Capitoline Hill and the sella between Arx and Quirinal. With detailed discussion of the Templum Pacis, and some remarks on Domitian's Villa, called Albanum; and in Appendix VI.; at Section XII.*

**On 27th March 2023 reached me the article by Eugenio La Rocca and Lorenzo Kosmopoulos ("Il Templum Gentis Flaviae", 2023), published in the exhibition-catalogue, edited by Claudio Parisi Presicce, Massimiliano Munzi and Maria Paola Del Moro, *Domiziano Imperatore. Odio e amore*, which I had asked La Rocca to provide me with.**

Cf. below, in Chapter IV.1.1.h) *The new findings by B.E. Borg (2019) concerning the Templum Gentis Flaviae support the hypothesis suggested here that Domitian's obelisk* (cf. here **Fig. 28**) *was commissioned for the Iseum Campense. With some observations concerning the Temple of Divus Traianus at Italica, and concerning the Marble Forum at the Colonia Augusta Emerita (Mérida) in Spain. With The Contributions by Eric M. Moormann, Mario Torelli, and Walter Trillmich, and with The second Contribution by Jörg Rüpke; cf. also infra, in volume 3-2, in Appendix VI.; at Sections II.; and XII.*

**On 29th March 2023, Stephan Faust was kind enough to send me his exhibition-catalogue (*Im Angesicht der Gottheit. Kultbilder in Religion und Gesellschaft der Antike*, 2022).**

In this publication, which I fortunately received 'right in time', Faust presents, among many other famous sculptures, two cult-statues with excellent illustrations that are also discussed in this book. With Faust's kind consent, I have, therefore, decided to reproduce his figures also in this book. The first example is the cult-statue of Zeus in his temple at Olympia. Faust (2022, 9-10, Abb. 1 [= here **Fig. 14**]) has chosen the reconstruction by Antoine Chrysostôme Quatremère de Quincy, a coloured lithography, which the author published in his book *Le Jupiter olympien* (1815). A digital version of this book is provided by the "Universitätsbibliothek Heidelberg digital, Quatremère de Quincy, *Le Jupiter olympien* 1815, Frontispiz". The second example is the already above-mentioned bronze statuette of 'Jupiter Capitolinus', datable to the 1<sup>st</sup> or 2<sup>nd</sup> century AD, which is kept in the Metropolitan Museum of Art at New York; cf. Faust (2022, 22-24, Abb. 4 [= here **Fig. 20.1**]).

Cf. *infra*, at *A Study on the colossal portrait of Hadrian (now Constantine the Great) in the courtyard of the Palazzo dei Conservatori at Rome* (cf. here **Fig. 11**)...; at Part I. *The statue of Hadrian (now Constantine the Great) in the courtyard of the Palazzo dei Conservatori* (cf. here **Fig. 11**), the inscription (CIL VI 974 = 40524; cf. here **Fig. 29.1**), and the cult-statue of *Divus Vespasianus* in the Temple of *Divus Vespasianus*. With The Contribution by Hans Rupprecht Goette on the reworking of the portrait of Hadrian (now Constantine the Great); and at *A Study on Domitian's cult-statue of Iuppiter Optimus Maximus Capitolinus* (cf. here **Fig. 10**); at Part II. *The Capitoline Triad in statuette format at Guidonia Montecelio (Roma), Museo Civico Archeologico 'Rodolfo Lanciani'* (cf. here **Fig. 13**) and the colossal statue of Jupiter at the Hermitage (cf. here **Fig. 10**).

On 31st March 2023, an E-mail by Filippo Coarelli reached me, who wrote me, by request, the reference to the catalogue of the exhibition on Alexander the Great, which he is preparing: Filippo Coarelli and Eugenio Lo Sardo (a cura di), *Alessandro Magno e l'Oriente. La scoperta e lo stupore*, to be opened on 29th May 2023 at the Museo Archeologico Nazionale, Napoli.

Cf. *infra*, in Chapter *Preamble*; Section III.; at point 5.).

**Claudia Valeri was kind enough to send me, by request, on 5th April 2023 her Contribution to the exhibition-catalogue *Domiziano Imperatore. Odio e amore*, edited by Claudio Parisi Presicce, Massimiliano Munzi and Maria Paola Del Moro ("La Villa di Domiziano sul lago di Albano", 2023).**

Cf. *infra*, in volume 3-2, at *Appendix IV.d.4.b) Domitian's building project comprising the Campus Martius, the Capitoline Hill and the sella between Arx and Quirinal*. With detailed discussion of the *Templum Pacis*, and some remarks on Domitian's Villa, called Albanum.

**Also Eric M. Moormann sent me, by request, on 7th April his Contributions to the catalogue *Domiziano Imperatore. Odio e amore* (cf. *id.*, "Il riordinamento di Roma sotto Domiziano", 2023), and, written together with Nathalie de Haan, Aurora Raimondi Cominesi and Claire Stocks ("La Memoria Sepolta di Domiziano e una sua rivalutazione nelle mostre di Leiden e Roma", 2023), for which I am very thankful.**

Cf. *infra*, in Chapter *Preamble*; Sections II. and III.; at points 3.) and 5.); and in Chapter IV.1.1.h) *The new findings by B.E. Borg (2019) concerning the Templum Gentis Flaviae support the hypothesis suggested here that Domitian's obelisk (cf. here Fig. 28) was commissioned for the Iseum Campense*. With some observations concerning the Temple of *Divus Traianus at Italica*, and concerning the *Marble Forum at the Colonia Augusta Emerita (Mérida) in Spain*. With The Contributions by Eric M. Moormann, Mario Torelli, and Walter Trillmich, and with The second Contribution by Jörg Rüpke; and in Chapter *The major results of this book on Domitian*.

**T.P. Wiseman has kindly suggested to me in an Email of 19th April 2023 that my German term 'Verwaltungsgenie' (with which I try to explain, why Domitian's government was so successful) can be translated into English as 'administrative genius': for this help I am very grateful indeed.**

Cf. *infra*, in Chapter *Preamble*; Section III.; at point 5.).

On 16th May 2023 an E-mail by Francesca Deli, Assistant Librarian of the British School at Rome, reached me, who was kind enough to send me, on request, a scan of the article by Filippo Magi ("Notiziario"; Section: "Zona della Cancelleria", 1939).

**My thanks are also due to Michaela Fuchs, who sent my, by request, by Email on 20th May 2023 the photo of the fragmentary building inscription CIL VI 40518 (illustrated in her article of 2014, S. 137, Abb. 20 [= here Fig. 91.1]), that I may publish here with her kind consent.**

In my *Study* of 2017, I had followed Michaela Fuchs's interpretation of this inscription, who was first to attribute it to the Arch of Hadrian alongside the *Via Flaminia*, the entrance gate of the (later) *Hadrianeum*. As mentioned above, Werner Eck (2019b) has rejected Michaela Fuchs's hypotheses (2014) concerning this inscription, and because I find some of Eck's arguments convincing, I decided to correct in this *Study* on Domitian my own relevant errors of 2017. - Fortunately, this turned out to be a very good decision.

**Because writing this text had for me the unforeseen result to learn that Domitian's still prevailing negative image had been intentionally created at the order of the Emperor Trajan.**

Cf. *infra*, in volume 3-2, at *A Study on the consequences of Domitian's assassination*:

*Nerva is forced to adopt Trajan and Trajan creates Domitian's negative image to consolidate his own reign. With Hadrian's adoption manquée in late October or at the beginning of November of AD 97, his 20-year long road to his accession and his thanksgivings for it, his Temple complex in the Campus Martius.*

*Or: The wider topographical context of the Arch of Hadrian alongside the Via Flaminia which led to the (later) Hadrianeum and to Hadrian's Temples of Diva Matidia (and of Diva Sabina?)...;*

*Introduction; at Section I.; at Chapter II.; and at Chapter IV.*

See also below, in Chapter *Preamble: Domitian's negative image*;

at Section I. 'The intentional creation of Domitian's negative image', here presented by discussing relevant text passages from Markus Handy ("Strategien zur Legitimierung der Ermordung des Domitian", 2015) and from Peter L. Viscusi (Studies on Domitian, 1973); at Section II. *Conclusions: Domitian's representations of his military successes and his claims to be of divine descent and to possess a divine nature*; and at Section III. *My own thoughts about Domitian. With The second Contribution by Eugenio La Rocca: Una nota sul labirinto del Palatino.*

On 27th May 2023 reached me an E-mail by Angelo Geißen, who was kind enough to send me the first draft of his text on coins, issued by Antoninus Pius in AD 150-151, that I had asked him to study for me. On 5th July he should send me the final version of his text. See below, at *The second Contribution by Angelo Geißen: Zum 'Hadrianeum' auf Münzen des Antoninus Pius*. To this I will come back below.

On 2nd June 2023, Hans Rupprecht Goette was kind enough to send me his just appeared article ("Lesefrüchte? Vom Nutzen gründlicher Autopsie und guter Photodokumentation bei der Untersuchung von Portrait-Umarbeitungen", 2020/2021).

And on 6th June 2023, I managed to pursue a discussion with Paul Scheduling in a telephone conversation that had begun on 21st December 2022 : on the *opus incertum* building at the Testaccio/ *La Marmorata*, the enormous 'Porticus Aemilia'/ *Navalia*. Scheduling told me that this building has been discussed in Martin Tombrägel's book (*Die republikanischen Otiumvillen von Tivoli*, 2011), and in Dominik Maschek's (2013) review of it, both of which I had managed to overlook so far.

On 13th June 2023, I could discuss with Peter Herz in a telephone conversation the decline of Rome in the 5<sup>th</sup> century AD, that has now been very well documented for the area of the Testaccio/ *La Marmorata* by the excavators of the *opus incertum* building there, Gert-Jan Burgers (*et al.* 2014b, 815).

I admit to have expected what Herz then told me : he has, of course, already himself dedicated an essay to this fact ("Rom in der Spätantike. Der Niedergang einer ehemaligen Hauptstadt", 2012) (!). In this context. Herz was also kind enough to alert me to the book by Oliver Schmitt (*Constantin der Große (275-337) Leben und Herrschaft*, 2007).

For discussions of all that; cf. *infra*, at *A Study on the colossal portrait of Hadrian (now Constantine the Great) in the courtyard of the Palazzo dei Conservatori at Rome (cf. here Fig. 11) ...*; at Part I. *The statue of Hadrian (now Constantine the Great) in the courtyard of the Palazzo dei Conservatori (cf. here Fig. 11), the inscription (CIL VI 974 = 40524; cf. here Fig. 29.1), and the cult-statue of Divus Vespasianus in the Temple of Divus Vespasianus. With The Contribution by Hans Rupprecht Goette on the reworking of the portrait of Hadrian (now Constantine the Great); and at Part II. Ancient Rome's new commercial river port, at La Marmorata. With discussions of the 'Porticus Aemilia' (in reality identifiable as Navalìa) and of the Horrea Aemiliana. With The sixth Contribution by Peter Herz : Rom. Strukturen der Versorgung; and with The second Contribution by Franz Xaver Schütz : Wie schwer war der ägyptische Obelisk, der heute auf der Piazza di S. Giovanni in Laterano in Rom steht?*

On 21st June 2023, reached me an E-mail by Paolo Liverani, who was kind enough to send me, by request, his following article ("Antinoo a Roma: l'obelisco e la tomba", 2022). And Hans Rupprecht Goette sent me, on his own account, on 29th June 2023 his recently made photographs of the portrait-statue of Hadrian from Hierapydna at Istanbul, which I may publish here with his kind consent (cf. here Fig. 29). For those photographs I am very grateful indeed.

For both subjects; cf. *infra*, at *A Study on Hadrian's portrait-statue from Hierapydna (cf. here Fig. 29)*.

In addition to this, Hans Rupprecht Goette sent me, on 29th June 2023, the article by Theodosia Stefanidou-Tiveriou ("Hadrian's Himation: Eigenart eines philhellenischen Kaisers oder Ausdrucksform einer innovativen Politik?", 2022), because the author discusses in this essay also Hadrian's portrait-type Delta Omikron ( $\Delta o$ ) (cf. here Fig. 3).

Cf. also *infra*, in volume 3-2, at *A Study on the consequences of Domitian's assassination ... Or: The wider topographical context of the Arch of Hadrian alongside the Via Flaminia which led to the (later) Hadrianeum and to Hadrian's Temples of Diva Matidia (and of Diva Sabina?). With discussions of ... Hadrian's portrait-type Delta Omikron ( $\Delta o$ ) (cf. here Fig. 3) ...*; at Chapter VI.2. *Hadrian's portrait-type Delta Omikron ( $\Delta o$ )*.

**Stefanidou-Tiveriou (2022) quotes, in addition to this, an article by Andreas Schmidt-Colinet, that I had managed to overlook so far. Fortunately on 1st July 2023 reached me also this essay by Andreas Schmidt-Colinet ("Des Kaisers Bart: Überlegungen zur Propagandageschichte im Bildnis des römischen Kaisers Hadrian", 2005), that he was so kind as to send me by request, and in which he addresses many topics that are also discussed in this Study.**

See below, in Chapters I.1.; II.3.3; II.3.3.a); and V.1.i.3.b); at Section III.; and *infra*, in volume 3-2, at *A Study on the consequences of Domitian's assassination ... With discussions of ... Hadrian's portrait-type Delta Omikron ( $\Delta o$ ) (cf. here Fig. 3) ...*; at Chapter III. *Was Hadrian himself present at the suppression of the Bar Kokhba Revolt?*; and at Chapter VI.2. *Hadrian's portrait-type Delta Omikron ( $\Delta o$ )*.

**When we take the recent results obtained in the research on Hadrian's portrait-type Delta Omikron ( $\Delta o$ ) (here Fig. 3, summarized in this Study) together with Andreas Schmidt-Colinet's observations concerning the portraits of the Emperor Hadrian (cf. *id.* 2005, who himself does not discuss Hadrian's youthful portrait-type here Fig. 3 though) - we arrive at a very surprising result.**

Already in his earliest portrait-type Delta Omikron ( $\Delta\omicron$ ; here **Fig. 3**), which, in my opinion, shows him when he was circa 20 years old, Hadrian has presented himself 'as a soldier'. At that stage he was an officer, and his wearing a beard and a baldric in this portrait-type shows that he wanted to be seen that way.

Hadrian would also become the first *emperor* wearing a beard (cf. here **Figs. 11; 29**). Schmidt-Colinet (2005) is able to demonstrate that Hadrian chose to present himself in his portraits, which he commissioned as emperor, as wearing the short-cut beard typical of soldiers and officers. So far it had been taken for granted that the Emperor Hadrian, by wearing a beard, had propagated his philhellenism - erroneously, as Schmidt-Colinet points out, because he (rightly) assumes that Hadrian had been wearing a beard long before his first documented stay in Greece in AD 112, when he was already 36 years old.

As we have seen above, Schmidt-Colinet's (2005) objection against this assumption is certainly true, because Hadrian had already presented himself in his first portrait-type as bearded (cf. here **Fig. 3**).

The Emperor Hadrian thus turns out to have presented himself since his first portrait-type 'as a soldier' (cf. here **Fig. 3**), and throughout his reign as (the first) 'Soldatenkaiser' (cf. here **Fig. 29**) - as I myself should like to call him therefore (*avant la lettre* obviously, and, as we should also add, with very different coiffures than the later *real* 'Soldatenkaiser').

For the term 'Soldatenkaiser'; cf. Matthias Haake ("Zwischen Herrschertypus und Epochenbegriff. Eine begriffsgeschichtliche und wissenschaftsgeschichtliche Archäologie des Burkhardtschen Pseudoneologismus 'Soldatenkaiser'", 2022).

**Editing my bibliographies has never been my favourite pastime, because they were never complete. This was, of course, always my own fault.**

Already in the middle of my research for this *Study*, Hans Rupprecht Goette, on his own account, had been so kind as to add missing information to my bibliography (!). And at the very end of this work, I have been saved by my good friend Eugenio La Rocca, who was kind enough to scan for me the last missing references in a publication (that is not available in Germany), which he then sent me on 1st July 2023 (!). I am very grateful indeed to both scholars for this important help.

**On 5th July 2023 reached me the long waited for final version of Angelo Geißen's second *Contribution to this Study on Domitian*, in which he discusses those *sestertii*, issued by the Emperor Antoninus Pius, which, according to many recent scholars, represent the *Hadrianeum*.**

**See below, at *The second Contribution by Angelo Geißen : Zum 'Hadrianeum' auf Münzen des Antoninus Pius*.**

Along with his *Contribution*, Angelo Geißen was kind enough to send me the article by Domenico Palombi ("Antoninus Pius and Rome: sobrius, parcus parum largiens", 2017), for which I am also very grateful.

For discussions of all that; cf. *infra*, in volume 3-2, at *A Study on the consequences of Domitian's assassination: ... With The fourth and the fifth Contribution by Peter Herz, with The first Contribution by Franz Xaver Schütz, with The Contribution by John Bodel, and with The second Contribution by Angelo Geißen; Introduction*; at Section XIV. *Further new research: F. Chausson's (2001) idea that the Hadrianeum was possibly dedicated to Divus Hadrianus and to Diva Sabina, and recent discussions of this hypothesis. With The second Contribution by Angelo Geißen : Zum 'Hadrianeum' auf Münzen des Antoninus Pius.*

**Finally, on 15th July of 2023, reached me a wonderful surprise : the exhibition-catalogue, edited by Claudio Parisi Presicce, Massimiliano Munzi and Maria Paola Del Moro (*Domiziano Imperatore. Odio e amore*, 2023), an indeed very generous present, which Eugenio la Rocca has sent me from Rome (!).**

Franz Xaver Schütz and I had already dated on that day (for the first time) the "Vorwort der Herausgeber" in this volume, since I had finished writing my text. But because in this exhibition-catalogue on Domitian many subjects are discussed that are also addressed in this *Study*, I decided to integrate also at least some of these other new observations into my own text that I had not been able to read before (cf. *supra*). Thanks to those accounts, I could improve my own text and have even been saved from several errors (!).

**On 17th July 2023, Francesco Buranelli sent me, by request, the photograph of the Capitoline Triad, kept in the Museo 'Rodolfo Lanciani' at Guidonia Montecelio, which he has published in his exhibition-catalogue (*L'Arte di Salvare l'Arte. Frammenti di storia d'Italia. Mostra organizzata in occasione del 50° anniversario dell'istituzione del Comando Carabinieri Tutela Patrimonio Culturale 1969 - 2019, 2019*).**

Francesco Buranelli had been kind enough to contact for me the *Comando Carabinieri Tutela Patrimonio Culturale* in Rome, from whom he had received this photo. When I asked the *Comando* to grant me the permission to publish their photo of this Capitoline Triad, I received on 21st July a very kind answer by Tenente Colonnello Massimiliano Quagliarella, *Capo Ufficio Comando Carabinieri Tutela Patrimonio Culturale*. He informed me that the *Comando* does not own the copyright of the photo, Buranelli (2019) had published, but rather the Museo Civico "Rodolfo Lanciani" at Montecelio. Unfortunately, the publication of this photograph was not possible, which is why we publish here the photo of our **Fig. 13**, which is available under CC licence.

As already said, this Capitoline Triad (here **Fig. 13**) is nothing less than one of only two so far known replicas in statuette format of the cult-statues of Domitian's (fourth) Temple of Iuppiter Optimus Maximus Capitolinus. In 1992, this Capitoline Triad had illegally been 'excavated', but in 1994 it could be saved from being sold abroad by members of the *Comando Carabinieri Tutela Patrimonio Culturale*.

For discussions of all that; cf. *infra*, at *A Study on Domitian's cult-statue of Iuppiter Optimus Maximus Capitolinus* (cf. here **Fig. 10**); at Part I. *The wall painting 'Aldobrandini Wedding' in the Vatican Museums and the statuette of the 'Euripides' in the Louvre* (cf. here **Fig. 12**), which has been discussed together with it.

Cf. also here **Fig. 13. Statuette of the Capitoline Triad, marble. Guidonia Montecelio (Roma), Museo Civico Archeologico 'Rodolfo Lanciani' (inv. no. 80546). Cf. Z. Mari, in: F. Buranelli (2019, 73: "20. Triade Capitolina Fine del II-inizi III secolo. Scultura a tutto tondo in marmo lunense, quasi integra (parzialmente mancanti alcuni arti delle figure e attributi); lungh. cm 119, largh. cm 53, h. max. cm 80. Dal Comune di Guidonia Montecelio (Rm), loc. Tenuta dell'Inviolata - Quarto Campanile, Guidonia Montecelio, Museo Civico Archeologico "Rodolfo Lanciani" (già nel Museo Nazionale di Palestrina fino al 2012). Inv. no. 80546. Furto 1992 (scavi clandestini), Guidonia Montecelio (Roma). Recupero: 1994, Livigno (Sondrio))".**

**Photo: Triade Capitolina, Museo Civico Archeologico Rodolfo Lanciani, Guidonia Montecelio Author: Sailko, CC BY 3.0 Deed (<https://creativecommons.org/licenses/by/3.0/deed.en>).**

I then discussed again with Peter Herz on the telephone the journey of Hadrian and his companions in November of AD 97 from *Moesia Inferior* to Mogontiacum in order to congratulate Trajan on his adoption by Nerva. My question was, whether he could mention similar travels that have allowed him to calculate how many kilometres Hadrian and his companions could have covered every day, which is actually the case. Herz, therefore, decided to write an addition to his *Contribution*, in which all this is explained in more detail than before, and was kind enough to send me his resulting "Nachtrag" to his *Contribution* on 23rd July 2023.

**See below, at *The fifth Contribution by Peter Herz : Der Ritt Hadrians nach Mogontiacum*.**

Immediately after receiving this very last *Contribution* by another scholar to this *Study*, Franz Xaver Schütz and I have now definitely dated the "Vorwort der Herausgeber" in this volume - on "23. Juli 2023".

Writing in a foreign language is not only difficult but always a great risk and without the help of friends and colleagues, who are native speakers, I would never have dared to try anything like that at all. It has two great advantages though. One is obvious: once one of those native speakers has corrected my English, these texts reach (in theory) many more people, but the other advantage should not be underestimated either : given my limited language capacity in English, the prose of these texts is much less complicated than had I written them in German.

It takes of course someone who is not only a native speaker, but who is himself or herself a scholar, who is studying the same period or even exactly the same topic. This ideal person for the subject discussed here I found in Colonel Rose Mary Sheldon, Professor Emerita at the Virginia Military Institute, and I am very grateful to her. She has read great parts of this manuscript and wrote me her very useful comments, which are mentioned in the text, and was also so kind as to correct my English. It is by no means the first time that Rose Mary has helped me in this respect, since we know each other since 1979 and have been discussing our research projects ever since. But only in this *Study*, in which I have for the first time tried to understand 'historical reliefs', have I ventured into a field, in which she is herself a great expert : military history.

Apart from the described practicality of writing in English, I am also a great admirer of the generosity, with which some scholars, whose native language it is, appreciate in their publications the help they have received from others. Since it is also true for this *Study* that I have not personally met all those, whose work I have discussed, I allow myself to borrow a passage from the chapter 'Acknowledgements' in the recent book by Rose Mary Sheldon (*Kill Caesar! Assassination in the Early Roman Empire*, 2018, pp. XVIII-XIX):

"To all the scholars whom I have not met but whose work I have used in this book, I hope I have quoted them correctly, accurately portrayed their views, and been gracious in my disagreements".

This text has gradually grown to its final size, and (at least for some time) the last *Chapters* I decided to integrate were the five Appendices.

*For the Appendices I.-VI., to which we will now turn; cf. infra, in volume 3-2.*

The first Appendix was added as a result of the discussion (in *infra*, in Chapter V.1.h.1.)), which magistrates could possibly have received a new emperor in an *adventus*-ceremony. The reason being the (in my opinion erroneous) suggestion, made by Tonio Hölscher (2009a, 58) that the togate youth on Frieze B of the Cancellaria Reliefs (cf. here **Figs. 1; 2; Figs. 1 and 2 drawing: figure 12**), in my opinion the 18 year old Domitian, should be identified as the *praefectus urbi*.

Cf. *infra*, at **ns. 182-189**, in Chapter I.1., in Chapter I.1.1., at **ns. 357 and 358**, in Chapter II.3.3., at **n. 471**, in Chapter VI.1.; and at Chapter *The major results of this book on Domitian*.

I, therefore, wished to give an example for the usual age and stance of a man, who would have been entrusted by an emperor with the office of his representative, the *praefectus urbi*.

Cf. *infra*, in volume 3-2, at Appendix I. The *praefectus urbi* T. Flavius Sabinus, Domitian's escape from the Capitol on 19th December AD 69, which happened on the festival of the Opalia, one day of the Saturnalia, and the 'Isis ship', shown in the processions of the Saturnalia at Cologne. See also: Appendix I.a) The *praefectus urbi* T. Flavius Sabinus. With a summary of the recent discussion concerning the locations of the buildings that belonged to the *praefectura urbis* over time. - The latter Chapter was added, after Filippo Coarelli had been so kind as to present me with his above-mentioned book (*Statio. I luoghi dell'amministrazione nell'antica Roma*, 2019a). Into Appendix II., I have integrated a text the first draft of which I had been advised by Valentino Gasparini to 'abandon' in June of 2013. Thanks to the research conducted for this book, I have now better understood, what this enigmatic 'relief from Ariccia' (cf. here **Fig. 111**) may possibly represent.

Cf. *infra*, in volume 3-2, at *Appendix II. Again on the Egyptianizing marble relief allegedly from Ariccia at the Museo Nazionale Romano, Palazzo Altemps (Fig. 111) - a representation of the Egyptian festival of New Year?*

But I had pursued research on the relief **Fig. 111** ever since I had 'abandoned' this part of my text that is now published in *Appendix II*. On 4th March 2014, I had again the chance, to study this relief at the Palazzo Altemps in Rome, and I am very grateful to Laura Acampora and Letizia Rustico of this museum, who were so kind as to accompany me, as well as to Franz Xaver Schütz and the Egyptologists Rafeed El-Sayed and Konstantin Lakomy, who joined me as well. We could use a ladder to look closely at the relief, and a lamp, and my thanks are due to all of them for the interesting discussions.

Before, I had already the chance to study the relief (here **Fig. 111**) : I was able also on those occasions to use a ladder to look closely at the relief, as well as a lamp, and thank Miriam Taviani (November 15th, 1999), and Letizia Rustico and Mauro Borgia (December 19th, 2012) for accompanying me and for the interesting discussions : the upper, the lower and right-hand side edge of the relief are preserved and the marble slab is very thin, these facts preclude that the fragment was originally part of a sarcophagus, as has been suggested.

Given its findspot (in secondary context "come copertura di una tomba a inumazione rinvenuta ad Albano Laziale, nei pressi dell'antico tracciato della via Appia"; cf. Palazzo Altemps Guida 2011, 61 [L. RUSTICO], suggested date : 100 AD), Letizia Rustico, who was kind enough to present me on December 19th, 2012 with a copy of this catalogue, suggested to me that it could originally have been part of the marble revetment of a small tomb on the Via Appia.

*Appendix III* tries to answer the following question: *When was the Iseum Campense first built?* It is an attempt to add some topographical observations to the current controversial debate of this question.

The next *Appendix* has been developed out of a note in *Appendix I*. and has the following title:

*Appendix IV. D. Filippi (1998) has convincingly identified the 'first gate of the Capitolium' (Tac., Hist. 3,71,1-2) with the remains of an arch, excavated by A.M. Colini in the 1940s, with the Porta Pandana, and with the arch, visible on the 'burning of debt records' relief of the here-so-called Anaglypha Hadriani (Figs. 21; 22). With some new ideas concerning the Anaglypha Hadriani; and discussions of the colossal statue of Hadrian (now Constantine the Great) in the courtyard of the Palazzo dei Conservatori (cf. here Fig. 11); of the inscription (CIL VI 974 = 40524; cf. here Fig. 29.1), belonging to a statue of Hadrian; of two cuirassed statues of Flavian emperors (Titus or Vespasian? and Domitian?) in the Vatican Museums (cf. here Fig. 6, left and right); and of Hadrian's cuirassed statue from Hierapydna at Istanbul (cf. here Fig. 29).*

After having read the above-mentioned publications by Pollini (2017b) and Wiseman (2019), a fifth *Appendix* became necessary, because my updated map here **Fig. 73** contains toponyms, which are relevant to the passages of both scholars discussed here, but those toponyms had so far not been explained.

These toponyms, which are located on the Palatine and in its immediate surroundings, were described in the manuscript of my book on the *Mons Oppius* (2014a), but I had been advised by Eugenio La Rocca to cut the relevant sections out. This I did, announcing their publication in my bibliography as forthcoming; cf. Häuber (2014a, 10, n. 65, p. 908).

See below, in volume 3-2, at *Appendix V. Explanations concerning the ancient toponyms of the Palatine and its immediate surroundings, between the Velabrum and the Caelian, as marked on my map Fig. 73*, into which these updated text passages have now been integrated.

Also the next *Appendix* was written as a result of reading Wiseman's book (2019) and has the following title:

*Appendix VI. A digression on Domitian's intention to emulate Augustus and Nero.* This text was written for volume 3-1 and called Chapter II.3.1.d), following Chapter II.3.1.c) *Domitian's building policy: praising the gens*

Flavia, *emulating Augustus and Nero*. It was conceived as a response to E.M. Moormann's observation (2018, 163-164, quoted in more detail *verbatim* in Chapter II.3.1.c): "From Golden House to Public Space - Nero's memory was not entirely obliterated in the *Domus Flavia* and *Domus Augustana* ... ". Gradually, this Chapter II.3.1.d) outgrew the size of a normal chapter, which is why I decided, not to publish this text in volume 3-1 any more, but instead in volume 3-2, where it will appear, under the same title, as *Appendix VI*.

**Last, but not least, my thanks are due to my husband, Franz Xaver Schütz. He not only listened very patiently to all my many scholarly problems that occurred while I was writing this book, but, competently as ever, has helped me to solve them.**

*Inter alia* by finding publications for me, all of which turned out to be crucial for the understanding of the subjects discussed here. For example Filippo Magi (1939; cf. *infra*, at Chapters I.1.; and IV.1.), but also Sven Hansel (2009), and Marina De Franceschini and Giuseppe Veneziano (2019).

For a discussion of the latter publications; cf. *infra*, in volume 3-2, at *Appendix I.f.2.) The procession, which Domitian joined, the festival of the Opalia on 19th December, the Saturnalia, the festival of Fors Fortuna on 24th June, and the 'Isis ship', shown in the processions of the Saturnalia at Cologne.*

**In addition to this, Franz discussed, and realized along with me our visualization of the Cancellaria Reliefs 'in situ'. See here Figs. 1 and 2 of the Cancellaria Reliefs, drawing, 'in situ'. This reconstruction, although not providing a definitive proof, adds another argument in favour of Pentiricci's suggestion (2009; cf. *infra*, at Chapter I.3.2.) to identify the Cancellaria Reliefs as the horizontal panels in the bay of one of Domitian's lost arches.**

**Cf. also *infra*, at Chapters V.1.d); and at *The major results of this book on Domitian*.**

Franz was also able to translate a passage in Suetonius (*Dom.* 1) correctly, and realized that the day of Domitian's escape from the *Capitolium*, 19th December of AD 69, the *Opalia*, was celebrated within the *Saturnalia*, which lasted from December 17th through the 23rd or 25th (depending, which calendar one uses). In addition to this, Franz found the information that in the processions of the *Saturnalia* at Cologne in Germany a 'ship of Isis' used to be exhibited (cf. *infra*, in volume 3-2, at *Appendix I.f.2.))*.

**When I doubted that some of Flavius Sabinus' companions and men, who, 'hidden between baggage', fled from the *Capitolium* (Tac., *Hist.* 3,73,1), could possibly have been 'hidden between baggage', carried on the backs of horses or donkeys, Franz told me that he has seen in movies that precisely such operations have actually been performed by mules. On 3rd September 2019, Franz was so kind as to take photographs of the monument of a mule (cf. here Fig. 41), created by Pietro Canonica (1937), and called "'Monumento all'Umile Eroè'" ('monument to a modest hero') by the artist; cf. Bianca Maria Santese (2017, 20, 48). This statue of a mule belongs to the "monumento agli Alpini" of the artist, which carries an inscription in "dialetto valdostano". On 4th September 2019, our good friend Laura Gigli was so kind as to translate this inscription into Italian for us.**

**See below, at *The first Contribution by Laura Gigli* in this volume.**

For discussions of all that cf. *infra*, in volume 3-2, at *Appendix I.d.1.)*.

**Franz conducted also a special research on the internet concerning the people called *Piroustae/ Piroustoi*, a representation of whom appears at "*Le Colonnacce*" at Domitian's *Forum/ Forum Nervae/ Forum Transitorium* at Rome (cf. here Fig. 49), and provided me, in addition to this, with the following relevant publications, which turned out to be crucial for the understanding of Domitian's design of this *Forum*. And that in turn has helped to date the Cancellaria Reliefs (cf. here Figs. 1; 2).**

Cf. Carl Patsch ("Archäologisch-epigraphische Untersuchungen zur Geschichte der römischen Provinz Dalmatien, 1899), Géza Alföldy ("Einheimische Stämme und civitates in Dalmatien unter Augustus", 1963), Dragana Grbić ("Augustan Conquest of the Balkans in the light of triumphal monuments", 2011), and Alfred Hirt ("Dalmatians and Dacians - Forms of Belonging and Displacement in the Roman Empire", 2019). Since I had asked Rose Mary Sheldon for advice concerning the *primus pilus* Statius Marrax, she had alerted me to a publication, in which the relevant inscription is discussed, and Franz found it on the Internet; cf. Hans Krummrey (2003; Review: Marco Buonocore, *L'Abruzzo e il Molise in età romana tra storia ed epigrafia*, Vol. I-II (Deputazione Abruzzese di Storia Patria. Studi e Testi 21/1-2, 2002).

Cf. below, in Chapter *The major results of this book on Domitian*; at *The second Contribution by Peter Herz: Anmerkungen zu Statius Marrax*; and *infra*, in volume 3-2, at *Appendix IV.d.2.e) Did Domitian intentionally represent the Piroustae in his Forum/ Forum Nervae/ Forum Transitorium? With The second Contribution by Peter Herz*; and at *Appendix IV.d.2.f) Domitian's choice to represent the Piroustae in his Forum/ Forum Nervae/ Forum Transitorium and the date of the Cancellaria Reliefs* (cf. here **Figs. 1; 2**).

As a consequence of all these enquiries, Franz has created a visualization of the area in question.

**See below, at *The first Contribution by Franz Xaver Schütz : Zur kartographischen Visualisierung historischer Landschaftselemente zwischen Rhein und Schwarzem Meer von Augustus bis Hadrian* (cf. here **Fig. 77**).**

The purpose of the map here **Fig. 77** is to support research that tries to understand the movements of the three men within this area, who are discussed in this *Study*: Arminius, Domitian and Hadrian.

Our first protagonist is Arminius, who was "war-chief of the Cherusci"; cf. Arnaldo Momigliano, Theodore John Cadoux (?) and Barbara M. Levick ("Arminius (*RE* 1, with Suppl. 1. p 139), born c.[*irca*] 19 BC ... He had Roman citizenship, and served long in the auxiliary forces, attaining equestrian rank ... Arminius was killed by his own kinsfolk [soon after AD 19]"), in *OCD*<sup>3</sup> (1996) 173.

More recent studies, for example by Rose Mary Sheldon (2020, that will be summarized *infra*, in volume 3-2, at *Appendix IV.d.2.d*)), have shown that Arminius moved from (what would later become) Germania *inferior* towards Illyricum. There, in his capacity as a Roman officer, he joined the army under the command of Tiberius, who, from 6-9 AD, fought *inter alia* against the people called *Piroustae*, in an area that in AD 9 would become the Roman province of Dalmatia. Arminius was accompanied by soldiers, who were his compatriots, and who stayed with him. Later in AD 9, in the *saltus Teutoburgiensis* ('Teutoburger Wald'), now under Arminius's command, the experiences of all these men in Illyricum were instrumental for their own successful insurrection against P. Quinctilius Varus.

Both Domitian and Hadrian moved back and forth within the area, shown on **Fig. 77**. - As already mentioned above, also for Domitian the people called *Piroustae* had a very special importance.

In the case of Hadrian all that began with his famous *Parforceritt* in November of AD 97 from Moesia *Inferior* to Mogontiacum (Mayence, Mainz) in Upper Germany, in order to congratulate Trajan on his adoption by Nerva. Exactly like Arminius in his capacity as a Roman officer, this action became crucial for Hadrian's own career. But Hadrian moved within the area shown on **Fig. 77** in the *opposite* direction, when compared with Arminius.

**For Arminius**; cf. *supra*, at Chapter *What this Study is all about*; and *infra*, at *The major results of this book on Domitian*; and *infra*, in volume 3-2, at *Appendix IV.c.1.*; *Appendix IV.c.2.*; and especially at *Appendix IV.d.2.d) The meaning of the representation of the Piroustae within Augustus's Porticus ad Nationes at Rome. With H. Wiegartz's (1996) observations concerning the Piroustae and their representations; and a summary of the revolt of Arminius in Germany, which he planned because he had fought under Tiberius to suppress the revolt of the Pannonian-Dalmation tribes, inter alia of the Piroustae.*

**For Domitian's wars in the Balkans** and the question of why the people called *Piroustaie* were also of importance for him; cf. *infra*, in volume 3-2, at Appendix IV.d), *passim*, especially at Appendix IV.d.2.) *The 'Province' Reliefs from the Hadrianeum* (cf. here Fig. 48), *the Piroustoi in a labelled relief in the Sebasteion at Aphrodisias*, *the Piroustaie in Domitian's Forum/ Forum Nervae/ Forum Transitorium* (cf. here Figs. 50; 49), and *the answer to the question: Does the presence of the 'nation' Piroustaie in Domitian's Forum provide a date for the Cancellaria Reliefs* (cf. here Figs. 1; 2)?; at Appendix IV.d.2.e) *Did Domitian intentionally represent the Piroustaie in his Forum/ Forum Nervae/ Forum Transitorium?* With The second Contribution by Peter Herz; and at Appendix IV.d.2.f) *Domitian's choice to represent the Piroustaie in his Forum/ Forum Nervae/ Forum Transitorium and the date of the Cancellaria Reliefs* (cf. here Figs. 1; 2); see also below, at *The second Contribution by Peter Herz : Anmerkungen zu Statius Marrax*.

As we shall see, the fact that Domitian ordered a female representation of the *Piroustaie* (cf. here Fig. 49) to appear in the sculptural decoration of his *Forum/ the Forum Nervae/ Forum Transitorium* at Rome, finally allows us to answer the question, for which of his military campaigns Domitian was actually leaving on Frieze A of the Cancellaria Reliefs (cf. here Figs. 1 and 2 drawing; figure 6: Domitian, now with the facial traits of Nerva).

The reason being that recent scholars have shown that the Cancellaria Reliefs have been created by the same workshop that was also active in Domitian's *Forum/ the Forum Nervae/ Forum Transitorium* and in Domitian's Palace on the Palatine '*Domus Flavia*'/ *Domus Augustana*. For that; cf. *infra*, at Chapter V.3.; and at Chapter *The major results of this book on Domitian*, at point 2.).

In my opinion what this panel A of the Cancellaria Reliefs shows is Domitian's *profectio* in Rome in the spring of AD 89 to Pannonia. This campaign resulted in victories that he would celebrate with his (last) triumph at Rome over the Chatti and the Dacians, in November/ December of the same year.

Cf. *infra*, in Chapter *Preamble: Domitian's negative image*; at Section II. *Conclusions: Domitian's representations of his military successes and his claims to be of divine descent and to possess a divine nature*; and *infra*, in volume 3-2, at Appendix IV.d.2.e); and Appendix IV.d.2.f).

The latter fact, in its turn, provides a *terminus post quem* for the date, at which Domitian may have commissioned the Cancellaria Reliefs (i.e., 'post AD 89').

**For Hadrian**; cf. below, at *A Study on the colossal portrait of Hadrian (now Constantine the Great) in the courtyard of the Palazzo dei Conservatori at Rome* (cf. here Fig. 11). With The Contribution by Hans Rupprecht Goette on the reworking of the portrait of Hadrian (now Constantine the Great); at *A Study on Hadrian's portrait-statue from Hierapydna* (cf. here Fig. 29);

and *infra*, in volume 3-2, at *A Study on the consequences of Domitian's assassination ... Or: The wider topographical context of the Arch of Hadrian alongside the Via Flaminia which led to the (later) Hadrianeum and to Hadrian's Temples of Diva Matidia (and of Diva Sabina?)*. With discussions of Hadrian's journey from Moesia Inferior to Mogontiacum (Mayence) in order to congratulate Trajan on his adoption by Nerva, and of Hadrian's portrait-type Delta Omikron ( $\Delta o$ ) (cf. here Fig. 3). With The fourth and the fifth Contribution by Peter Herz; with The first Contribution by Franz Xaver Schütz; with The Contribution by John Bodel, and with The second Contribution by Angelo Geißen; at Chapter VI.1.; at *Trajan's adoption by Nerva and Hadrian's Parforceritt from Moesia Inferior to Mogontiacum to congratulate Trajan on his adoption*.

Franz found also Statius (*silv.* 4,3,17) and Suetonius (*Aug.* 94,8) for me on the Internet.

In addition to this, Franz took the photographs that are illustrated on here Figs. 4.1.1.; 8.2; 11; 28; 40; 41; 42; 45; 49; 85; 86; 101; 101.1.; 102.6; 115; 120; 123; 124; 125; 126; 127; 128; and 154, created the map here Fig. 77, and the illustrations here Figs. 1 and 2 drawing; Figs. 1 and 2 Cancellariareliefs, drawing, '*in situ*'; Figs. 8.1; 8.3; 58.1; 58.2; 62; 62.2; 62.3; 62.4, right; 62.5; 62.11; 63; 64.1; 66.1; 66.2, 66.3; and 119, all of which he kindly allowed me to publish here.

Franz found a photograph on the Website of the Hermitage at St. Petersburg and an explanatory text of the colossal acrolithic statue of Jupiter (cf. here **Fig. 10**), which is kept in this museum, that are both published here. Franz found also the famous book by Johann Jacob Bernoulli for me on the internet (*Römische Ikonographie Zweiter Teil Die Bildnisse der römischen Kaiser II. Von Galba bis Commodus*, 1891).

For all that; cf. *infra*, at Chapter IV.1.1.h); and at *A Study on Domitian's cult-statue of Iuppiter Optimus Maximus Capitolinus* (cf. here **Fig. 10**); at Part II. *The Capitoline Triad in statuette format at Guidonia Montecelio (Roma), Museo Civico Archeologico 'Rodolfo Lanciani'* (cf. here **Fig. 13**) and the colossal statue of Jupiter at the Hermitage (cf. here **Fig. 10**).

In addition to this, Franz copied for me from the Internet the review by R.R.R Smith (1983) of Mario Torelli's book (*Typology & Structure of Roman Historical Reliefs*, 1982). Searching for a photograph of the Chatsworth Relief, Franz found the following blog on the Internet: The early reforms and economic policies of Hadrian (#Hadrian1900), July 24, 2018. Online at: <<https://followinghadrian.com/2018/07/24/>>. The author is unfortunately not indicated, but thanks to her or him, who quoted from his account, Franz found Mason Hammond's article on the Anaglypha Hadriani on the Internet ("A Statue of Trajan Represented on the 'Anaglypha Traiani'", 1953).

For all that; cf. *infra*, in volume 3-2, at Appendix IV.b) Similarly as some of the hypotheses, already published by M. Hammond (1953), M. Fuchs (2019) suggests that the therefore here-so-called Anaglypha Hadriani (cf. here **Figs. 21; 22**) celebrate Hadrian's achievements, and that Hadrian's burning of debt records in AD 118 occurred at two sites: the burning of the debt records of the *fiscus* in the Forum Traiani (represented on the Chatsworth Relief), and the burning of the debt records of the *Aerarium publicum populi Romani* in the Forum Romanum (represented on one of the Anaglypha Hadriani; cf. here **Fig. 22**). With a discussion of the *suovetaurilia* that appear on both Anaglypha Hadriani (cf. here **Figs. 21.A; 22.A**), and with The third Contribution by Peter Herz.

See also below, at *The third Contribution by Peter Herz: Der Übergang von Trajan auf Hadrian und das erste Regierungsjahr Hadrians*.

And when I was studying Domitian's *Naumachia*, Franz found on the Internet a publication, in which this is discussed: Stefan Rudolf Beck (*Ferrum est quod amat. Das Amphitheater in der lateinischen Literatur des ersten und zweiten Jahrhunderts unter politischen und gesellschaftskritischen Aspekten*, 2016).

Cf. *infra*, in volume 3-2, at Appendix IV.d.4.b) Domitian's building project comprising the Campus Martius, the Capitoline Hill and the sella between Arx and Quirinal. With detailed discussion of the *Templum Pacis*, and some remarks on Domitian's Villa, called Albanum.

Of equal importance was that Franz found on the Internet Analina Caló Levi's article ("Hadrian as King of Egypt", 1948; cf. here **Fig. 129**), and on 30th January 2021 on the Internet Vespasian's IVDAEA CAPTA *sestertius* (cf. here **Fig. 130**) and Titus's IVDAEA CAPTA *sestertius* (cf. here **Fig. 131**), with which both commemorated their victories in *Judaea*. Conducting research in the Internet on the inscription CIL VI 974 = CIL VI 40524 (cf. here **Fig. 29.1**), Franz found also the publication by Caroline Barron ("Dedication for a statue of Hadrian near the Temple of Vespasian and Titus (CIL VI, 974 = CIL VI, 40524)", 2018).

For all that; cf. *infra*, at *A Study on Hadrian's portrait-statue from Hierapydna* (cf. here **Fig. 29**).

When looking for publications concerning the inscription CIL VI 40518 (here **Fig. 91.1**), and especially Pietro Romanelli ("Roma. Via della Torretta. Cippi del Pomerio", 1933) who reported on its find, Franz found that Romanelli's article is discussed by Carlos F. Noreña ("Medium and Message in Vespasian's *Templum Pacis*", 2003), which turned out to be of great importance for many of the subjects discussed in this book.

Cf. especially *infra*, in volume 3-2, at Appendix IV.d.4.b)).

And when trying to find publications on the Bar Kokhba Revolt, Franz found Menahem Mor ("What does Tel Shalem have to do with the Bar Kokhba Revolt?", 2013) on the Internet. And when Peter Herz, in the course of discussing Hadrian's *Parforceritt* from Moesia Inferior to Mogontiacum with me, had alerted me to this dissertation, Franz found also Angela Kühnen (*Die imitatio Alexandri als politisches Instrument römischer Feldherren und Kaiser in der Zeit von der ausgehenden Republik bis zum Ende des dritten Jahrhunderts n.Chr.*, 2005) on the Internet for me.

For all that; cf. *infra*, in volume 3-2, at *A Study on the consequences of Domitian's assassination ... Or: The wider topographical context of the Arch of Hadrian alongside the Via Flaminia which led to the (later) Hadrianeum and to Hadrian's Temples of Diva Matidia (and of Diva Sabina?). With a discussion of Hadrian's portrait-type Delta Omikron ( $\Delta o$ )* (cf. here **Fig. 3**). With The fourth and the fifth Contribution by Peter Herz; with The first Contribution by Franz Xaver Schütz; with The Contribution by John Bodel, and with The second Contribution by Angelo Geißen; Introduction; at Section I. *The motivation to write this Study: W. Eck's (2019b) new interpretation of the inscription CIL VI 40518* (cf. here **Fig. 91.1**), *the decision to correct my own relevant errors in my earlier Study (2017), and the subjects discussed here, as told by the accompanying figures and their pertaining captions;* at Chapter II. *W. Eck's (2019b) critique of the hypotheses published by M. Fuchs (2014) concerning the inscription CIL VI 40518* (cf. here **Fig. 91.1**) *and the Arch of Hadrian discussed here;* and at Chapter IV. *Summary of my own research (2017) of this Arch of Hadrian, updated with W. Eck's (2019b) new findings concerning this subject;* at Chapter VI.1. *My 2. Conclusion: In this context it is interesting to analyse the process by which Hadrian finally became himself emperor;* at *Trajan's adoption by Nerva and Hadrian's Parforceritt from Moesia Inferior to Mogontiacum to congratulate Trajan on his adoption;* and at Chapter VI.2.2. *Additional information that is of importance for the discussion of Hadrian's portrait-type Delta Omikron ( $\Delta o$ )* (cf. here **Fig. 3**).

See also below, at *The fifth Contribution by Peter Herz: Der Ritt Hadrians nach Mogontiacum*.

Franz also found Verena Schulz for me ("Nero und Domitian bei Cassius Dio. Zwei Tyrannen aus der Sicht des 3.Jh. n.Chr.", 2014), and the entire volume, in which this article has appeared: Sophia Bönisch-Meyer, Lisa Cordes, Verena Schulz, Anne Wolfsfeld and Martin Ziegert (eds.), *Nero und Domitian. Mediale Diskurse der Herrscherrepräsentation im Vergleich* (= *Classica Monacensia* 46, 2014). Franz found also D.C.A. Shotter ("The Principate of Nerva: Some Observations on the Coin Evidence", 1983) in the Internet for me, as well as Trajan's coin, mentioned by Shotter, on which Nerva gives him the globe 'of world rule' (here **Fig. 140**).

Cf. *infra*, in Chapter *Preamble: Domitian's negative image;* at Section I. and II.; and *infra*, in volume 3-2, at *A Study on the consequences of Domitian's assassination ...;* at Chapter VI.1. *My 2. Conclusion: In this context it is interesting to analyse the process by which Hadrian finally became emperor;* at *The circumstances that had brought Trajan to Mogontiacum and Domitian's negative image, created by Tacitus and Pliny at the order of Trajan to legitimize his own accession;* and at Chapter VI.2.3. *How adoptions could be visualized on coins: Nerva/Trajan, Trajan/Hadrian, Hadrian/Aelius Caesar, Hadrian/ Antoninus Pius, Antoninus Pius/Marcus Aurelius*.

When we were discussing Domitian's (fourth) Temple of Iuppiter Optimus Maximus Capitolinus, Franz found the following publications for me: Ernst Schulze ("Über die Giebelgruppe des capitolinischen Jupitertempels (hierzu Taf. 57) des Tempels des Hercules an der Porta trigemina (hierzu Taf. 58)", 1873); cf. here **Figs. 16-18**; and Antonio Maria Colini ("Indagini sui frontoni dei Templi di Roma Parte I. I Frontoni meglio noti. Capitolo I. I frontoni del Tempio di Giove Capitolino", 1925).

Cf. *infra*, at *A Study on Domitian's cult-statue of Iuppiter Optimus Maximus Capitolinus* (cf. here **Fig. 10**).

Franz found also the article Volker Michael Strocka ("Beobachtungen an den antiken Attikareliefs des severischen Quadrifrons von Lepcis Magna"), in which he discusses the Cancellaria Reliefs.

Cf. *infra*, at Chapter V.1.b) *The Cancellaria Reliefs under Nerva - as reconstructed by S. Langer and M. Pfanner (2018) and my own comments on their conclusions. With some remarks on the efforts of Septimius Severus to legitimize his reign.*

Next, Franz found Giuseppe Antonio Guattani's book for me on the Internet (*Monumenti antichi ovvero notizie sulle antichità e belle arti di Roma per l'anno 1805, 1805*); cf. here **Fig. 10.1**.

Cf. *infra*, at *A Study on Domitian's cult-statue of Iuppiter Optimus Maximus Capitolinus* (cf. here **Fig. 10**); at Part II. *The Capitoline Triad in statuette format at Guidonia Montecelio (Roma), Museo Civico Archeologico 'Rodolfo Lanciani'* (cf. here **Fig. 13**) and the statue of Jupiter at the Hermitage (cf. here **Fig. 10**).

Franz helped me also to use my reader's pass of the Bayerische Staatsbibliothek in order to download the following publication: John Bintliff and Keith Rutter (*The Archaeology of Greece and Rome. Studies in honour of Anthony Snodgrass*, 2016), which contains *inter alia* the article by Rolf Michael Schneider ("Context Matters: Pliny's Phryges and the Basilica Paulli in Rome", 2016).

Cf. *infra*, in volume 3-2, at *Appendix IV.b*.

In addition to this, Franz found on the Internet Francesca De Caprariis (2018) review of Fedora Filippi (2015), and Johannes Lipps's (2020) review of T.P. Wiseman's book ("The House of Augustus A Historical Detective Story, 2019), with Comments by T.P. Wiseman.

Cf. *infra*, in volume 3-2, at *A Study on the consequences of Domitian's assassination ...*

Or: *The wider topographical context of the Arch of Hadrian alongside the Via Flaminia which led to the (later) Hadrianeum and to Hadrian's Temples of Diva Matidia (and of Diva Sabina?) ...* ; at Chapter VI. *The results of this discussion of this Arch of Hadrian and my 2. Conclusion. This is based on the topographical context of this Arch of Hadrian and on some considerations concerning Hadrian's accession and is in my opinion the preferable scenario*; at *The Templum Divae Matidiae ('Precinct of Diva Matidia') with Hadrian's Temple complex discussed here. With the correct location of the Temple of Diva Matidia* (cf. here **Figs. 67; 67.1**), and new findings concerning the "Tempio di Siepe" and concerning the inscription TEM PL[...], which is recorded by fragment 36b of the Severan Marble Plan (cf. here **Figs. 132- 134**) and refers to a Templ(um) of Diva Sabina?, a 'Precinct of Diva Sabina?' or a Temple of Diva Sabina?; and in *Appendix VI.*; at Section. I.

Franz found also the volume, edited by Fritz Mitthof und Günther Schörner on the Internet (*Columna Traiani - Traianssäule Siegesmonument und Kriegsbericht in Bildern. Beiträge der Tagung in Wien anlässlich des 1900. Jahrestages der Einweihung*, 2017).

Cf. below, in Chapter *Preamble: Domitian's negative image*; at Section III.; at Chapter *The major results of this book on Domitian*; and *infra*, in volume 3-2, at *A Study on the consequences of Domitian's assassination ...; Introduction*; at Section XI.; and at Chapter VI.2.4. A. Claridge (2013) has identified the head of the "Stonethrower" in the battle Scene LXXII on Trajan's Column (here **Figs. 4; 4.1**) as a copy of Hadrian's portrait-type Delta Omikron ( $\Delta$ ). Since all four of Hadrian's known marble portraits of this type (here **Fig. 3**) show him turning to his left, and the "Stonethrower" (here **Figs. 4; 4.1**) turns to his left as well, we may wonder, provided Claridge's identification is correct, whether we have in this relief for the first time a representation of Hadrian's complete statue-type Delta Omikron. But we shall see that further research on this subject has led to a surprising result, opening new questions related to Hadrian's Delta Omikron ( $\Delta$ ) portrait-type (cf. here **Fig. 3**).

Franz found also the article by Richard Bruce Parkinson on the Internet ("Imaginary Histories: Ancient Egypt in the writings of Marguerite Yourcenar and Philippe Derchain", 2019).

Cf. below, at *A Study on Hadrian's portrait-statue from Hierapydna* (cf. here **Fig. 29**); at *The research published in my earlier Study (2017): on the tomb of Antinous at Antinoopolis, on his (alleged) tomb at Hadrian's Villa near Tivoli, on his cenotaph at Rome, and on the two pertaining Antinous Obelisks.*

In addition to this, Franz found the article by Matthias Grawehr on the Internet ("Travertine in Rome: Its Style and Meaning", 2022), who discusses the architectural fragments on display at the Porticus of the Dei Consentes (cf. here **Fig. 125**), which have been excavated by Antonio Nibby in 1832-1834. Franz was also able to find all the publications on the Internet that are of importance for a judgement of those architectural fragments : Antonio Nibby (*Roma nell'anno MDCCCXXXVIII, Parte I.II Antica and Parte I.II Moderna*, 1838, 1839, and 1839, 1841); Richard Delbrueck (*Hellenistische Bauten in Latium I-II*, 1907-1912); Pier Luigi Tucci ("Where high Moneta leads her steps sublime". The Tabularium and the Temple of Juno Moneta", 2005); Tucci ("A new look at the Tabularium and the Capitoline Hill", 2013-2014); as well as Luca Contrafatto ("Il Tabularium di Roma. Per una revisione delle prove archeologiche", 2019).

For a discussion of all that; cf. *infra*, in volume 3-2, at *Appendix I.e*) *It is conceivable that Vitellius* (cf. *Suet., Vit. 15,3*), on December 19th AD 69, could actually have watched the fighting on the Capitolium, while staying at the 'Domus Tiberiana' on the Palatine.

And when we were discussing the location of the former Arco di Portogallo on the *Via Flaminia/ Via Lata/ Via del Corso*, which was destroyed in 1622, Franz has made a relevant research and found a hitherto not recognized representation of the former Arco di Portogallo on Antonio Tempesta's bird's-eye-view map of Rome (1593; cf. here **Fig. 64.1**). For the former Arco di Portogallo; cf. Häuber (2017, 64-65, Fig. 3.5.1): Some scholars regard the former Arco di Portogallo as a gate in the sacred boundary of Rome, the *pomerium*; cf. Häuber (2017, 111, n. 56, pp. 351-352 with n. 136, pp. 583-584, n. 306).

Cf. below, in Chapter *V.1.i.3.b*); at Section *IV.*; and *infra*, in volume 3-2, at *A Study on the consequences of Domitian's assassination ...; Introduction*; at Section *XIV.*; and at Chapter *I*.

**Franz found also the first volume of the *Bullettino Comunale* for me in the Internet. There (cf. *BullCom 1, 1872-1873, 229*), Rodolfo Lanciani has announced the find of the colossal portrait of Titus (here **Fig. 53**), not a colossal head of Vespasian, as has erroneously been asserted.**

**To my great surprise, Lanciani was thus first to identify the site, where this head of Titus had come to light, with the area of the *Templum Gentis Flaviae*.**

Cf. below, in Chapter *IV.1.1.h*.

In addition to this, Franz found on the Internet the book by Patrizio Pensabene, in which the inscriptions *CIL VI 301 and 410* are discussed (*Le vie del marmo: I blocchi di cava di Roma e di Ostia: Il fenomeno del Marmo nella Roma Antica*, 1994).

Cf. *infra*, at *A Study on the colossal portrait of Hadrian (now Constantine the Great) in the courtyard of the Palazzo dei Conservatori at Rome* (cf. here **Fig. 11**). With The Contribution by Hans Rupprecht Goette on the reworking of the portrait of Hadrian (now Constantine the Great); at Part *II. Ancient Rome's new commercial river port, at La Marmorata. With discussions of the 'Porticus Aemilia' (in reality identifiable as Navalìa) and of the Horrea Aemiliana. With The sixth Contribution by Peter Herz : Rom. Strukturen der Versorgung; and with The second Contribution by Franz Xaver Schütz : Wie schwer war der ägyptische Obelisk, der heute auf der Piazza di S. Giovanni in Laterano in Rom steht?*

Fortunately Franz found on the Internet a quotation from the article by Francesca dell'Era ("Il complesso di Matidia nel Campo Marzio", 2020), in which the author rejects the northern part of my first reconstruction of

the Temple of *Diva Sabina* ? (2017). I have now corrected my reconstruction of the Temple of *Diva Sabina* ? accordingly (cf. here **Fig. 66**).

Franz managed also to find the volume at the Bayerische Staatsbibliothek, München, in which Dell'Era's article (2020) has appeared. Cf. Rafael Hidalgo, Giuseppina E. Cinque, Antonio Pizzo and Alessandro Viscogliosi (*Adventus Adriani Investigaciones sobre Arquitectura Adrianea*, 2020). This is the only copy of this volume in a German library - it contains, in addition to his, the article by Giorgio Ortolani ("`A Viterbo un tempio che serve per bagno`": l'edificio termale del Bacucco", 2020), discussing the "Tempio di Siepe".

For discussions of all that; cf. below, in Chapters *The major results of this book on Domitian*; and in *The visualization of the results of this book on Domitian on our maps*; and *infra*, in volume 3-2, at *A study on the consequences of Domitian's assassination ...*

Or: *The wider topographical context ...; Introduction*; at Sections II.; III.; VIII.; XII.-XIV.; and at Chapter VI. *The Templum Divae Matidiae ('Precinct of Diva Matidia') with Hadrian's Temple complex discussed here. With the correct location of the Temple of Diva Matidia (cf. here Figs. 67; 67.1), and new findings concerning the "Tempio di Siepe" and concerning the inscription TEM PL[...], which is recorded by fragment 36b of the Severan Marble Plan (cf. here Figs. 132-134) and refers to a Templ(um) of Diva Sabina?, a 'Precinct of Diva Sabina'? or a 'Temple of Diva Sabina?'; and at To whom was the second temple (seemingly) within the Templum Divae Matidiae (the 'Precinct of Diva Matidia') dedicated: to Diva Sabina or to Diva Plotina? (cf. here Figs. 66; 135; 136).; and at The "Tempio di Siepe" (cf. here Figs. 69.1; 69.2).*

In addition to this, Franz managed to find the volume by Andrea Carandini and Emanuele Papi (*Adriano Roma e Atene*, 2019) at the Bayerische Staatsbibliothek, München, to which I have been alerted thanks to a quotation of a contribution to this volume by Maria Cristina Capanna (2019) in the article by Claudio Parisi Presicce (2021).

Cf. *infra*, in volume 3-2, at *A Study on the consequences of Domitian's assassination :*

*Nerva is forced to adopt Trajan and Trajan creates Domitian's negative image to consolidate his own reign. With Hadrian's adoption manquée in late October or at the beginning of November of AD 97, his 20-year long road to his accession and his thanksgivings for it, his Temple complex in the Campus Martius.*

Or: *The wider topographical context of the Arch of Hadrian alongside the Via Flaminia which led to the (later) Hadrianeum and to Hadrian's Temples of Diva Matidia (and of Diva Sabina?) ...;*

*Introduction*; at Section XIV. *Further new research: F. Chausson's (2001) idea that the Hadrianeum was possibly dedicated to Divus Hadrianus and to Diva Sabina, and recent discussions of this hypothesis. With The second Contribution by Angelo Geißen : Zum 'Hadrianeum' auf Münzen des Antoninus Pius.*

As a further result of all these discussions, Franz found volume 11 of the *Bullettino della Commissione Archeologica Comunale di Roma (BullCom)* 1883 for me in the Internet, with the article by Rodolfo Lanciani ("La basilica Matidies et Marcianes dei Cataloghi Tav. I-II", 1883a). And because Lanciani quotes in this article a publication by Faustino Corsi without precise reference, Franz found also the following two editions of the book by Faustino Corsi in the Internet for me, which turned out to contain precisely that information which I had been looking for (*Delle pietre antiche trattato di Faustino Corsi Romano. Edizione seconda in alcune parti corretta in molte accresciuta con l'aggiunta dell'indicazione e descrizione di tutte le colonne e raggiungevoli massi di pietre antiche che sono in Roma*, 1833; and *Delle pietre antiche trattato di Faustino Corsi Romano. Edizione terza con notevole aggiunta al terzo libro in cui sono indicate e descritte tutte le colonne ed alcuni massi di pietre antiche ragguardevoli per grandezza o per rarità esistenti in Roma*, 1845).

Franz found also the following article by Maria Pia Muzzioli in the Internet ("Tra Piranesi e Canina: ricerche topografiche e piante di Roma antica", 2018), as well as: Giambattista Piranesi (*Le Antichità Romane*, vol. 1. 1756), The volume *Notizie degli Scavi* 26 (1972) with the article by Elisa Lissi Caronna ("Roma, Rinvenimenti in piazza Capranica 78"), the volume of *Römische Mitteilungen* 1899, with the article by Christian Huelsen ("Das angebliche Templum Matidiae bei Piazza Capranica"), the volume *ATTA* 27 (2017), with the article by

Paola Ciancio Rossetto ("*Porticus Metelli: riflessioni*"), and the article by Raffaele Leonardi, Stefano Pracchia, Stefano Buonaguro, Matteo Laufato and Nicoletta Saviane ("*Sondaggi lungo la Tratta T2. Caratteri ambientali e aspetti topografici del Campo Marzio in epoca romana*", 2010).

I have taken all this as a chance to discuss again the "Tempio di Siepe", my reconstructions of the Temple of *Diva Matidia* and of *Diva Sabina* ?, as well as many other subjects of my earlier *Study* of 2017 that relate to the *Campus Martius*.

Cf. *infra*, in volume 3-2, at *A Study of the consequences of Domitian's assassination ... . Or: The wider topographical context of the Arch of Hadrian alongside the Via Flaminia which led to the (later) Hadrianeum and to Hadrian's Temples of Diva Matidia (and of Diva Sabina?) ...; passim*.

Franz found also the exhibition-catalogue (*La Roma dei Re*, 2019), with several articles by Sabina Zeggio that I have discussed *infra*, in volume 3-2, in *Appendix V.*; at *Section I.*; and in *Appendix VI.*; at *Section XII*.

In addition to his, Franz found the volume, edited by Mark Heerink and Esther Meijer (*Flavian Responses to Nero's Rome*, 2022), with the article by Eric Moormann ("Some Observations on the Templum Pacis - a Summa of Flavian Politics" (discussed *infra*, in volume 3-2, at *Appendix IV.d.4.b*) *Domitian's building project comprising the Campus Martius, the Capitoline Hill and the sella between Arx and Quirinal. With detailed discussion of the Templum Pacis, and some remarks on Domitian's Villa, called Albanum*) - and with the article by Aurora Raimondi Cominesi ("Flavian Architecture on the Palatine: Continuity or Break", 2022); cf. below, in Chapter *The major results of this book on Domitian*.

Franz found for me on the Internet also the *Katalog Fischer I (1936) Sammlung Arnold Ruesch 1882 –1929, Zürich. Griechische, etruskische und römische Altertümer. Auktion in Luzern, Galerie Fischer, 1.– 21.9.1936*, and Staffan Lundén ("The Palatine Labyrinth. Was it built in the 1<sup>st</sup> or 20<sup>th</sup> Century? Originally published in *Caerdroia* 34 (2004), p. 7-14"), as well as Clifford H. Moore, *Tacitus. The Histories with an English translation by Clifford H. Moore of Harvard University. The Annals with an English Translation by John Jackson, in four volumes, I The Histories, Books I-III (Loeb Classical Library 1962); H.S.J. Thackeray, Josephus with an English translation by H. St. J. Thackeray, volume III The Jewish War, books IV-VII (Loeb Classical Library 1961); Alexander Thomson, The Complete Works of Suetonius. The twelve Caesars, translation by Alexander Thomson (Delphi Classics 2016); as well as Barbora Chabrečková (*The Imperial Cult during the Reign of Domitian*, 2017).*

For discussions of all that; cf. *infra*, in Chapter *Preamble: Domitian's negative image*; at *Section III. My own thoughts about Domitian*. With The second Contribution by Eugenio La Rocca: *Una nota sul labirinto del Palatino*; and in Chapter *The major results of this book on Domitian*.

Franz found also the article by Gerhard Koepfel for me on the Internet ("Profectio und Adventus", 1969).

Cf. below, in Chapters *I.2.1.b*); *I.2.1.c*); and at **n. 416**, in Chapter *III*.

Fortunately, Franz found also right in time the following publication on the Internet: *ARCHAEOLOGIEONLINE DE Metallurgischer Fingerabdruck weist Legion des Varus in Kalkriese nach. Neue wissenschaftliche Methode bestätigt Kalkriese als Ort der Varusschlacht. 21.11.2022*.

Online at <<https://www.archaeologie-online.de/nachrichten/metallurgischer-fingerabdruck-weist-legion-des-varus-in-Kalkriese-nach-5466/>>.

Cf. *supra*, at Chapter *What this Study is all about*; and *infra*, in volume 3-2, at *Appendix IV.c.1.*).

Franz found also the following publications on the Internet: Maurizio del Monte, Paola Fredi, Alessia Pica, and Francesca Vergari ("Geosites within Rome City Center (Italy): A mixture of Cultural and

Geomorphological Heritage", 2013); Dominik Maschek's (2013) review of Martin Tombrägel's book (*Die republikanischen Otiumvillen von Tivoli*, 2011); and Klaus M. Girardet (*Der Kaiser und sein Gott. Das Christentum im Denken und in der Religionspolitik Konstantins des Großen*, 2010).

For all that; cf. below, in *A Study on the colossal portrait of Hadrian (now Constantine the Great) in the courtyard of the Palazzo dei Conservatori at Rome* (cf. here **Fig. 11**)...; at Part I. *The statue of Hadrian (now Constantine the Great) in the courtyard of the Palazzo dei Conservatori* (cf. here **Fig. 11**), the inscription (CIL VI 974 = 40524; cf. here **Fig. 29.1**), and the cult-statue of Divus Vespasianus in the Temple of Divus Vespasianus. With The Contribution by Hans Rupprecht Goette on the reworking of the portrait of Hadrian (now Constantine the Great); and at Part II. *Ancient Rome's new commercial river port, at La Marmorata. With discussions of the 'Porticus Aemilia' (in reality identifiable as Navalía) and of the Horrea Aemiliana*. With The sixth Contribution by Peter Herz : Rom. Strukturen der Versorgung; and with The second Contribution by Franz Xaver Schütz : Wie schwer war der ägyptische Obelisk, der heute auf der Piazza di S. Giovanni in Laterano in Rom steht?

In addition to this, Franz found the following publication in the Bayerische Staatsbibliothek, edited by Peter Schäfer (*The Bar Kokhba War Reconsidered*, 2003).

Cf. below, in *A Study on Hadrian's portrait-statue from Hierapydna* (cf. here **Fig. 29**).

Luckily, Franz found also just in time the following books in the Bayerische Staatsbibliothek, of which there are in both cases only two copies in German libraries: Antonio Pizzo and Riccardo Montalbano (eds.) (*Tra le pendici de Quirinale e il Campo Marzio in memoria di Emilio Rodríguez Almeida*, 2022); and Dunia Filippi (ed.) (*Rethinking the Roman City. The Spatial Turn and the Archaeology of Roman Italy*, 2022).

Cf. *infra*, in volume 3-2, at *Appendix V. Explanations concerning the ancient toponyms of the Palatine and its immediate surroundings, between the Velabrum and the Caelian, as marked on my map Fig. 73*.

I regard it as a great privilege to live in walking distance to a magnificent library such as the Bayerische Staatsbibliothek München, the 'STABI'. It is always a delight to go there, not only because of its superb collection of books, but especially thanks to the excellent service of all the members of its staff.

Franz found also Riccardo Santangeli Valenzani's review (2018) of Pier Luigi Tucci's book on the Internet (*The Temple of Peace in Rome, I. Art and Culture in Rome; II. Remodelings, Conversions, Excavations*, 2017).

Cf. *infra*, in volume 3-2, at *Appendix IV.d.4.b Domitian's building project comprising the Campus Martius, the Capitoline Hill and the sella between Arx and Quirinal. With detailed discussion of the Templum Pacis, and some remarks on Domitian's Villa, called Albanum*.

Especially fortunate was Franz's find of Jona Lendering's texts on the Internet (dated 1995-2023) that relate to the Great Jewish Revolt or War, because Lendering adds information concerning the reasons for the outbreak of this revolt that were so far unknown to me; cf. Jona Lendering ("Livius.org; Jewish War (66-70); Causes of the War of 66-70").

Cf. below, in Chapter *Preamble; Section III.*; at point 2.).

Luckily Franz found also right in time the following volume, written by mediaevalists, who have studied exactly the same area on the Esquiline and Caelian as Franz Xaver Schütz and I myself: Claudia Barsanti, Roberta Flaminio and Alessandra Guiglia (*La Diocesi di Roma; Tomo Settimo, La III Regione Ecclesiastica, Corpus della Scultura Altomedievale VII*, Collana diretta da Letizia Pani Ermini e Adriano Peroni, *Introduzione topografica di Lucrezia Spera, Note epigrafiche di Ottavio Bucarelli e Giorgio Crimi* (Fondazione Centro Italiano di Studi sull'Alto Medioevo Spoleto, 2015).

Cf. below, in Chapter *IV.1.1.g*).

Especially important turned out to be Franz's find of Patrizio Pensabene and Enrico Gallochio's article on the Internet ("Neue Forschungen zum augusteischen Komplex auf dem Palatin", 2017).

This essay was published in the following volume, that Franz then found in the Bayerische Staatsbibliothek München: Manuel Flecker, Stefan Krmnicek, Johannes Lipps, Richard Posamentir und Thomas Schäfer (eds., *Augustus ist tot – Lang lebe der Kaiser!, Internationales Kolloquium anlässlich des 2000. Todesjahres des römischen Kaisers vom 20. - 22. November 2014 in Tübingen*, 2017). This volume contains *inter alia* also the following essays: by Vibeke Goldbeck ("Architekturkopien? Terminologische Überlegungen zur Rezeption von Bauwerken und ihrer Ausstattung bei den Römern. Untersucht am Beispiel des Forum Augustum und der Porticus ad Nationes", 2017), and by Thomas Schäfer ("Das Tropaeum Augusti von Lugdunum Convenarum: Skylla, Sex. Pompeius und Oktavian", 2017).

Another find of Franz in the Internet was Jens Fischer's article ("Augustus und Apollon. Notizen zu den Hintergründen einer 'göttlichen' Beziehung", 2020), along with the entire volume, to which it belongs: Jessica Bartz, Martin Müller and Rolf Frank Sporleder (eds., *Augustus immortalis. Aktuelle Forschungen zum Princeps im interdisziplinären Diskurs, Beiträge des interdisziplinären Symposiums an der Humboldt-Universität zu Berlin, 25.–27. Oktober 2019*, 2020). This volume contains *inter alia* also the article by Vibeke Goldbeck ("Die Rezeption der stadtrömischen Monumente des Augustus im Imperium Romanum", 2020).

Franz found also the following volume for me in the Bayerische Staatsbibliothek München: Katja Piesker and Ulrike Wulf-Rheidt (*Umgebaut: Umbau-, Umnutzungs- und Umwertungsprozesse in der antiken Architektur*, 2020), because it contains, apart from the contributions by Hans Rupprecht Goette (2020a) and Karoline Manfrecola (2020), which I had already discussed a long time ago, the essay by Nicole Röring ("Von einer Basilika (?) zu einem rezipierten Augustusforum. Das Marmorforum von Mérida", 2020).

The articles by Patrizio Pensabene (2017) and Jens Fischer (2020) are discussed *infra*, in volume 3-2, in *Appendix VI. A digression on Domitian's intention to emulate Augustus and Nero*.

The articles by Vibeke Goldbeck (2017; *ead.* 2020) and by Nicole Röring (2020) are discussed below, in *Chapter IV.1.1.h*); at *The Marble Forum at the Colonia Augusta Emerita (Mérida) in Spain*; below, at *The major results of this book on Domitian*; at *The Contribution by Walter Trillmich on the headless marble togati found in the so-called Marble Forum at Mérida in Spain, one of which looks like the togate youth on Frieze B of the Cancellaria Reliefs*; and *infra*, in volume 3-2, at *Appendix IV.d.2.*).

And the essay by Thomas Schäfer (2020) is discussed below, at *A Study on the colossal portrait of Hadrian (now Constantine the Great) in the courtyard of the Palazzo dei Conservatori at Rome (cf. here Fig. 11)*. With The Contribution by Hans Rupprecht Goette on the reworking of the portrait of Hadrian (now Constantine the Great); at Part II. *Ancient Rome's new commercial river port, at La Marmorata. With discussions of the 'Porticus Aemilia' (in reality identifiable as Navalía) and of the Horrea Aemiliana*. With The sixth Contribution by Peter Herz : *Rom. Strukturen der Versorgung*; and with The second Contribution by Franz Xaver Schütz : *Wie schwer war der ägyptische Obelisk, der heute auf der Piazza di S. Giovanni in Laterano in Rom steht?*

One of the very last publication that Franz found on the Internet for me was the review by Klaus Fittschen (2018 [2019]) of the volume edited by Friederike Fless, Stephanie Langer, Paolo Liverani and Michael Pfanner (*Vatikanische Museen. Museo Gregoriano Profano ex Lateranense: Katalog der Skulpturen IV: Historische Reliefs*, 2018).

Cf. below, in Chapters I.-VI.; and in Chapter *The major results of this book on Domitian*.

Franz found also the following publications on the Internet for me: Waldemar Haberey ("Römische Brandgräbergruppe an der Ecke Adolfstraße - Im Krausfeld zu Bonn. Hierzu Taf. 40-42", 1960); Ernest Nash (*Pictorial Dictionary of Ancient Rome*, 1961); and Robert Turcan ("*Templum gentis Flaviae*", 2000).

Cf. below, in Chapter V.1.i.3.a); and *infra*, in volume 3-2, in *Appendix I.g.3.*) A sestertius, issued by Domitian in AD 95/96 (cf. here **Fig. 30**), and the Flavian date of the "Rilievo Terme Vaticano" (cf. here **Fig. 31**), both of which possibly represent Domitian's *Templum Gentis Flaviae*. With The first Contribution by Claudia Valeri; and in *Appendix VI.*; at Sections II. and XII.

See also here **Fig. 30. Sestertius of Domitian, issued AD 95/96, representing a decastyle temple, which M. Torelli (1987) has identified with the *Templum Gentis Flaviae*. BMC, p. 406, n. 12, R.H. Darwall-Smith (1996, 281, Plate XVIII, Fig. 30). From W. Haberey (1960, Taf. 42, Abb. 1: "Bronzemedaille des Domitian vom Jahre 95-96 n. Chr. aus Grab I"). Cf. R. Paris (1994b, 26, Fig. 14). From: E. Nash (1961, 371, Fig. 452: "Sestertius of the 17th consulate of Domitian (95/96 A.D.)".**

Finally Franz found two reviews on the Internet: Parrish Elizabeth Wright's review (2020) of T.P. Wiseman's book (*The House of Augustus. A Historical Detective Story*, 2019), and Niccolò Mugnai's review (2023) of the book, published by Patrizio Pensabene, Patrizio Fileri and Enrico Gallochio (*Il complesso di Augusto sul Palatino: nuovi contributi all'interpretazione delle strutture e delle fasi*, 2021)

Cf. below, in Chapter V.1.i.3.a); and *infra*, in volume 3-2, in *Appendix I.c*); *Appendix I.e*); *Appendix IV.c*); *Appendix V.*; at Section IX.; and in *Appendix VI.*; at Sections I.; III.; IV.; V.; VI.; IX., and XI.

Franz found for me also the article "Götterkleid" by Rosel Pientka-Hinz and Astrid Nunn, in: *Das Wissenschaftliche Bibellexikon im Internet* (www.wibilex.de), 2018.

Cf. *infra*, at *A Study on the colossal portrait of Hadrian (now Constantine the Great) in the courtyard of the Palazzo dei Conservatori at Rome* (cf. here **Fig. 11**) ...; at Part I. *The statue of Hadrian (now Constantine the Great) in the courtyard of the Palazzo dei Conservatori* (cf. here **Fig. 11**), the inscription (CIL VI 974 = 40524; cf. here **Fig. 29.1**), and the cult-statue of Divus Vespasianus in the Temple of Divus Vespasianus. With The Contribution by Hans Rupprecht Goette on the reworking of the portrait of Hadrian (now Constantine the Great).

The last publication, Franz has alerted me to was the article by Massimiliano Moscatelli, Sabatino Piscitelli, Salvatore Piro, Francesco Stigliano, Alessandro Giocoli, Daniela Zamuner, and Fabrizio Marconi ("Integrated geological and geophysical investigations to characterize the anthropic layer of the Palatine hill and Roman Forum", 2014). And the *very* last publication that Franz found for me on the Internet was Paolo Carafa and Daniela Bruno ("Il Palatino messo a punto", 2013).

For discussions of all that; cf. *infra*, in volume 3-2, in *Appendix VI A digression on Domitian's intention to emulate Augustus and Nero*; at Section III.

Franz presented me also with a copy of the book by Ranuccio Bianchi Bandinelli and Mario Torelli (*Etruria. Roma. L'Arte dell'Antichità Classica*, 2, 1976) that I had in vain tried to find for a very long time.

Cf. *infra*, **n. 208**, in Chapter I.1.1.; at Chapter IV.1.; in Chapter V.1.i.3.b); at Section IV.; and at **n. 475**, in Chapter VI.3.

In addition, Franz purchased a copy of another book that is of great importance for many of the subjects, discussed in this *Study* (*L'Urbs. Espace urbain et histoire Ier siècle avant J.-C.-IIIe siècle après J.-C.*, 1987).

Finally Franz presented me with a copy of the following rare book:

Filippo Magi (*I rilievi flavi del Palazzo della Cancellaria in Roma con prefazione di Bartolomeo Nogara*, 1945).

Cf. here **Figs 1 and 2 drawing**; and **Figs. 1 and 2 Cancellaria Reliefs, drawing, 'in situ'**; and below, in Chapter *The major results of this book on Domitian*.

Thanks to the generous help of all my aforementioned former university teachers and superiors, my colleagues and friends, and especially to Franz, this whole enterprise, though extremely challenging, has been a very rewarding experience.

See also *infra*, in volume 3-2, at Chapter *Introductory remarks and acknowledgements*, which is an addition to this Chapter: there are mentioned the publications, which have reached me after 23rd July 2023 and that are discussed in the second volume of this book on Domitian.

***Preamble: Domitian's negative image***

This Chapter is divided into three Sections:

I. 'The intentional creation of Domitian's negative image', here presented by discussing relevant text passages from Markus Handy ("Strategien zur Legitimierung der Ermordung des Domitian", 2015) and from Peter L. Viscusi (*Studies on Domitian*, 1973)

II. Conclusions: Domitian's representations of his military successes and his claims to be of divine descent and to possess a divine nature

III. My own thoughts about Domitian. With *The second Contribution by Eugenio La Rocca: Una nota sul labirinto del Palatino*

***Preamble; Section I. 'The intentional creation of Domitian's negative image', here presented by discussing relevant text passages from Markus Handy ("Strategien zur Legitimierung der Ermordung des Domitian", 2015) and from Peter L. Viscusi (Studies on Domitian, 1973)***

Domitian's negative image is the result of the conscious creation of that image by Trajan in order to legitimize his own accession. The relevant, very influential texts were written by Tacitus and Pliny the Younger. Trajan, at the beginning of his reign, regarded this as necessary since those who, in the crisis of AD 97, had favoured the accession of M. Cornelius Nigrinus Curiatius Maternus instead, were still very powerful. Nigrinus had instigated an uprising of the Praetorian Guard, aiming to overthrow Nerva, rehabilitate Domitian, and to become emperor himself.

I have arrived at the above-given summary by reading the article by Markus Handy ("Strategien zur Legitimierung der Ermordung des Domitian", 2015).

Because I am myself not an ancient historian, I am happy to say that many subjects discussed in this *Study* that relate to Domitian, receive a better explanation when we read Markus Handy's (2015) relevant analyses. I myself would have been unable to provide these analyses myself, although having felt for quite some time that such a 'preamble' would be very useful as a 'backdrop', on which the findings, presented in this *Study* on Domitian, could be 'projected'. Markus Handy's article reached me after the manuscript of this entire *Study* was almost finished (as I erroneously thought at the time), and my thanks are due to Peter Herz for sending me on 16th April 2021 a copy of this text.

Rose Mary Sheldon, whom I had asked to correct the English of my comments in this *Preamble*, was also kind enough to write to me in an E-mail of 25th April 2021 her comments on its content. I, therefore, took advantage of her expertise as an ancient historian, by referring in the following to the manuscript of her book, in which she discusses those procedures, and of which she was kind enough to send me at that stage a relevant paragraph; cf. Sheldon (*Guarding the Caesars. Roman Internal Security under the Flavian Dynasty*).

After having (this time indeed) almost finished writing this *Study*, Rose Mary Sheldon sent me, on her own account, on 12th April 2023, the following part of the manuscript of book (2023, in press; Chapter 7: "Domitian: Reigning in Rome"), in which she discusses many subjects that will also be addressed in this *Preamble*; in addition, she addresses subjects concerning Domitian, that I have not discussed in this *Study*. With her kind consent, I have decided to quote in this *Preamble* some passages from Rose Mary's Chapter 7.

When I first read Markus Handy's article (2015), the subject 'denigration of a predecessor' (when discussed in regard to *ancient* individuals !), was completely new to me. Both as a phenomenon, and especially in the case of those procedures that interest me in this *Preamble*, "the idea that Pliny and Tacitus denigrated Domitian to legitimize Trajan's usurpation", as Rose Mary Sheldon commented on those events in her E-mail

of 25th April 2021 to me. I have, therefore, quoted in the following the relevant passages from Handy's article (2015), which I chose because the author refers to precisely those passages from Tacitus and Pliny the Younger that I had already studied in this book - only that I had so far not understood the 'deeper meaning' of Tacitus's and Pliny's relevant texts.

Thanks to a footnote in Handy's (2015) discussion of Dio Cassius, I have been alerted to the following volume, in which subjects like the 'denigration of a predecessor' loom large as well: Sophia Bönisch-Meyer, Lisa Cordes, Verena Schulz, Anne Wolfsfeld and Martin Ziegert (*Nero und Domitian. Mediale Diskurse der Herrscherrepräsentation im Vergleich*, 2014). Some of the contributions to this volume have made me add another *Section* to this already finished *Preamble*, namely *Section II. Conclusions: Domitian's representations of his military successes and his claims to be of divine descent and to possess a divine nature*.

Even after that I received on 18th May 2021 from Eric M. Moormann the digital version of the volume, edited by Aurora Raimondi Cominesi, Nathalie de Haan, himself and Claire Stocks (*God on Earth: Emperor Domitian. The re-invention of Rome at the end of the 1<sup>st</sup> century AD*, 2021), for which I am likewise very thankful.

Many of the contributors to Raimondi Cominesi *et al.* (2021) are interested in the same subjects as those, who published articles in the volume, edited by Bönisch-Meyer *et al.* (2014), and some of the former discuss the latter's work. Almost all authors of both volumes are interested in the bad image of Domitian, created by Tacitus, Plinius the Younger, Suetonius and Dio Cassius, especially Aurora Raimondi Cominesi, Nathalie de Haan, Eric M. Moormann and Claire Stocks ("Introduction: Domitian, the Neglected Emperor Who Wished to Be God", 2021), as well as Antony Augoustakis and Emma Buckley ("Man and God : Literature", 2021), two articles, to which I will come back below. Augoustakis and Buckley refer also to their earlier publication: Antony Augoustakis, Emma Buckley and Claire Stocks (eds., *Undamning Domitian? Reassessing the last Flavian princeps*, 2019).

**But, as already mentioned, these publications reached me only after this I. Section of this Preamble was already written. None of the authors of Raimondi Cominesi *et al.* (2021) addresses Handy's (2015) and Viscusi's (1973) relevant findings, which will be presented here. Also I myself have refrained from trying to provide a complete coverage of this part of the discussion on Domitian, for example by mentioning systematically in Section I. of this Preamble, who of all those modern commentators has referred to the slander of the above-mentioned ancient authors that will be discussed in detail in the following.**

Apropos 'complete coverage of a subject', or the aim at reaching this ideal. As will be said again below (cf. *infra*, in Chapter VI.1.), in regard to the scholarly discussion of the Cancellaria Reliefs (here **Figs. 1; 2; Figs. 1 and 2 drawing**), the absence of even the attempt to reach this goal characterizes the scholarly production concerning those panels, and, when considering the other subjects looked at in this *Study* - this is true almost throughout. My own texts included. Let me give you an example right here.

It is, of course, important to know that the same observations, that I first found in Handy's article (2015), have already been made some time ago by other scholars, whom Handy himself does not mention in his account. I thank Rose Mary Sheldon for alerting me in her E-mail of 25th April 2021 to those publications, whom she discusses in her own book (*ead.*, 2023, in press) in detail; cf. John D. Grainger (2003; D. KIENAST 1968, R.P. LONGDON 1936, C. MICHAEL 2002; E.S. RAMAGE 1989 and R. SYME 1983).

Rose Mary Sheldon alerted me in this E-mail also to another observation that I found in Markus Handy (2015). My relevant comment was written for another *Chapter*, but I anticipate it here:

'Geza Alföldy and Helmut Halfmann (1973) were able to identify the man, who was Trajan's competitor for the emperorship, with M. Cornelius Nigrinus Curiatius Maternus, and thanks to Karl-Heinz Schwarte (1979) we know also that it had been Nigrinus who instigated the uprising of the Praetorian Guard against Nerva in AD 97; cf. Handy (2015, 42-44)'.

Cf. *infra*, in volume 3-2, in *A Study of the consequences of Domitian's assassination : Nerva is forced to adopt Trajan and Trajan creates Domitian's negative image to consolidate his own reign ...*; at Chapter VI.1.

Handy (2015, 42-44) thus summarizes the findings of previous scholars concerning M. Cornelius Nigrinus Curiatius Maternus and has come to the above-mentioned conclusion that I have followed here. Rose Mary Sheldon alerted me in her E-mail of 25th April 2021 to the fact that this hypothesis, which I had taken for fact, is instead debated. It is neither clear "that Maternus was trying to foment a coup against Nerva, nor is it proven that Maternus was the leader", as Rose Mary Sheldon wrote me, quoting for her relevant findings: A. Berriman and M. Todd ("A Very Roman Coup: The Hidden War of Imperial Succession, A.D. 96-98", 2001).

Be all that as it may !

Even later than the article by Markus Handy reached me the dissertation by Peter L. Viscusi (*Studies on Domitian*, 1973), which offers, in my opinion, an excellent, coherent picture of what the emperor had actually intended with his campaigns in Germany and on the Danube, and what he had achieved. - I have again decided to quote in the following *verbatim* from this account, because Viscusi discusses precisely those events in his book to which I myself have referred in this *Study*, again - before reading Viscusi's book - without understanding the 'deeper meaning' of the relevant events so far. I am happy to acknowledge that Rose Mary Sheldon has sent me a copy of his dissertation right in time to be incorporated here.

As we shall see throughout this volume, Markus Handy's and Peter L. Viscusi's results are, of course, of importance whenever Domitian as a person is mentioned, or else his actions or his achievements. Among the topics discussed here, for which the findings of both scholars are especially important are: Domitian's escape from the *Capitolium* on 19th December AD 69 (cf. below in Section III.; at point 1.); and *infra*, in volume 3-2, at *Appendix I.*), Domitian's military campaigns and victories, and Domitian's buildings projects at Rome (cf. *infra*, at n. 232, in Chapter I.2.; and *infra*, in volume 3-2, at *Appendix IV.d.*), especially *Appendix IV.d.2.a* - *Appendix IV.d.2.f*); and *Appendix IV.d.4.a* - *Appendix IV.d.4.c*).

**As the title of his essay indicates, Markus Handy (2015) himself is predominantly interested 'in the strategies of legitimization of Domitian's assassination'. By analysing the rôles of Tacitus, Plinius the Younger and Trajan in this context, Handy is able to demonstrate that these 'strategies' consisted in the systematic creation of that negative image of Domitian which is even nowadays still the prevailing one. With the - at least for me - surprising result that Markus Handy is able to demonstrate that these 'strategies' served the purpose of legitimizing Trajan's own accession.**

Markus Handy's results are, therefore, also of great importance to those subjects discussed in this *Study* that are related to Nerva's, Trajan's and Hadrian's reigns, and especially to those events which followed the crisis in Nerva's reign of AD 97. This crisis was caused by an uprising of the Praetorians Guard - according to some authors instigated by the governor of Syria, M. Cornelius Nigrinus Curiatius Maternus - in order to rehabilitate Domitian, overthrow Nerva, and to become himself emperor. Nerva reacted very prudently by installing Trajan, Nigrinus's competitor for the emperorship, as governor of Germania *Superior* and by shortly afterwards adopting Trajan as his son, co-emperor and successor. This move saved Nerva's life and because he died three months later, Trajan became the next emperor. Trajan's accession was thus, thanks to Nerva's adoption, legal.

But because some earlier scholars (cf. *supra*) and Markus Handy (2015) have been able to demonstrate that Domitian's negative image is a result of Trajan's conscious propaganda, in which the texts, written by Tacitus and Pliny the Younger, discussed by Handy in the below quoted passages, play a very important part, the following conclusions seem to me inevitable - provided the assumption is true that Nigrinus, the highest decorated general of the Flavian period and former protégé of Domitian, as soon as he learned that Trajan was installed as governor of Germania *Superior*, had given up his attempts to overthrow Nerva. Nevertheless

those, who had supported Nigrinus's aims (provided that were true at all) to rehabilitate Domitian and to become himself emperor, were obviously still very strong even after Trajan's accession.

**Otherwise I find it impossible to imagine, why Trajan felt a) the need to legitimize his own accession, and b) to do this by creating that negative image of Domitian which we still know so well, and that Markus Handy (2015) analyses for us.**

For the above-mentioned events in AD 97/ 98; cf. *infra*, in volume 3-2, at *A Study on the consequences of Domitian's assassination : Nerva is forced to adopt Trajan and Trajan creates Domitian's negative image to consolidate his own reign...*; at Chapter VI.1.

My just-formulated hypothesis seems now to have been corroborated by research, conducted by Werner Eck (2022b), but to which I have only been alerted when I had finished writing this entire *Preamble*. See below, Section III., at point 5.). I anticipate, therefore, in the following the relevant passage:

**'See now Gian Luca Gregori and Valerio Astolfi ("La damnatio memoriae di Domiziano. Iscrizioni e monumenti di Roma", 2023, 159): ...**

**Ma anche in altre iscrizioni di Roma (come pure d'Italia e delle province) il nome del principe [i.e., Domitian] non fu sempre scalpellato [with n. 5]. Nell'Urbe la percentuale delle iscrizioni domizianee erase sarebbe solo del 21%, in Italia scenderebbe al 15% [with n. 6], mentre nelle province, in particolare in quelle orientali, salirebbe oltre il 40% [with n. 7]" ...**

In their **note 7**, they write: "**L'alta percentuale nelle province potrebbe dipendere dalle nomine di governatori vicini a Traiano nel 97: Eck 2022 [i.e., here W. ECK 2022b; my emphasis]"**.

**See the title of Werner Eck's (2022b) relevant essay: "La crisi di potere dell'imperatore Traiano nella Renania romana nell'anno 97/98 sulla base dei diplomi militari [my emphasis]"**.

**Let's now turn to the relevant passages in Markus Handy's account.**

At the beginning of his article, Handy (2015, 19) asks, how Domitian's assassination could be justified:

"Ist die Beseitigung des Domitian ein legitimes Mittel zur Befreiung der Bürger von einem furchtbaren Tyrannen? Welche Möglichkeiten sind vorhanden, um die Ermordung dieses Kaisers zu legitimieren?"

I myself do not discuss Domitian's assassination in this volume, to which Handy turns in the following. Of greater interest to the subjects discussed in this *Study* are Handy's next following observations. They concern the creation of Domitian's negative image in Roman literature; in this context Handy discusses in great detail Tacitus and Pliny the Younger.

Cf. Markus Handy (2015, 30):

#### **"Das Domitian-Bild in der römischen Literatur**

Diesem Vorhaben entsprechend wollen wir auch die Geschichte vom Ende des Domitian unter dem Aspekt seiner Rezeption in der öffentlichen Meinung Roms sehen. Es bietet sich daher ein Blick auf das literarische Oeuvre von zwei Zeitgenossen an. Es sind dies P. Cornelius Tacitus und C. Plinius Secundus, deren Biographien und Werke im Kontext ihrer "Domitianerlebnisse" [with n. 65] im Folgenden zu thematisieren sind".

In his **note 65**, Handy writes: "Zum Begriff "Domitianerlebnis" vgl. *Nesselhauf*, Tacitus und Domitian [1952], S. 222".

Next, Markus Handy (2015, 31-32) turns to the first of those ancient authors which he wants to discuss, Tacitus, and states that the author wrote his *Agricola* not only in order to celebrate the man of this name, his father-in-law, but that this text may also be regarded as Tacitus's literary account of Domitian's principate:

### "Tacitus

Betrachten wir zunächst den Fall des P. Cornelius Tacitus: Über sein Leben ist wenig bekannt. Glücklicherweise lässt sich dessen *cursus honorum* rekonstruieren. [with n. 66] In den frühen Regierungsjahren Domitians wird er wahrscheinlich Volkstribun. Danach bekleidet er um 88 n.Chr. die Prätur. [with n. 67] Anschließend übernimmt er vielleicht die Statthalterschaft in einer Provinz oder das Kommando über eine Legion, jedenfalls weilt er eine längere Zeit fern von Rom. **Im Jahre 97 n. Chr. wird er Konsul, wobei wir davon ausgehen können, dass ihm dieses Amt bereits von Domitian versprochen worden ist.** [with n. 68] **Wie wir in den Annalen selbst lesen können, ist er ein Mitglied der *decemviri sacris faciundis*, [with n. 69] womit er eine Priesterfunktion ausübt, deren Bekleidung für gewöhnlich hochrangigen Senatoren vorbehalten ist und viel Prestige verleiht.** [with n. 70] **Tacitus, der selbst eingesteht, seine Karriere sei von Domitian gefördert worden, kann demnach kaum als Gegner Domitians gelten.** [with n. 71]

**Nichtsdestotrotz ist die Beurteilung Domitians bei Tacitus fast ausnahmslos negativ.** Zwar ist es bereits seit geraumer Zeit bekannt, dass sein literarisches Schaffen nicht ohne Ereignisse aus der eigenen Zeit zu deuten ist, [with n. 72] **jedoch fragt man sich, ob wir in Anbetracht der Begünstigung, die Tacitus vom letzten Flavier erhielt, tatsächlich von jenem negativen "Domitianerlebnis" [with n. 73] sprechen können, das die Triebfeder für dessen literarisches Schaffen sein soll. Leider fehlen uns jene Teile der Historien, die den Prinzipat des Domitian zum Inhalt hatten und die taciteische Sichtweise zu diesem Herrscher ergänzen würden.** Da darüber nur spekuliert werden [page 32] kann, erübrigt sich eine eingehende Erörterung in diesem Fall. [with n. 74]

**Bereits im Jahre 98 n. Chr. oder auch ein wenig später veröffentlicht Tacitus die Biographie seines Schwiegervaters Agricola, [with n. 75] worin wir mit den Worten von Karl Christ "Tacitus' persönlichstes Werk" [with n. 76] sehen wollen. [with n. 77] Die Schrift dient aber nicht nur der Anerkennung der Leistungen des Agricola, einem Heerführer in flavischer Zeit, [with n. 78] oft wird darin auch eine literarische Abrechnung des Autors mit dem Prinzipat des Domitian gesehen. [with n. 79; my emphasis]."**

In his note 66, Handy writes: "Eine seit längerem bekannte Inschrift (CIL VI 1574) gilt mittlerweile als Epitaph für den bekannten Schriftsteller (vgl. Geza Alföldy, Bricht der Schweigsame sein Schweigen?, in: Mitteilungen des Deutschen Archäologischen Instituts. Römische Abteilung 102 (1995), S. 252-368; Anthony R. Birley, The Life and Death of Cornelius Tacitus, in: Historia 49 (2000), S. 230-247) [my emphasis]."

In his note 67, he writes: "Vgl. Birley, The Life and Death of Cornelius Tacitus [2000], S. 235, 237".

In his note 68, he writes: "Vgl. John Percival, Tacitus and the Principate, in: Greece & Rome 27 (1980), S. 119 - 133, 128; Birley, The Life and Death of Cornelius Tacitus [2000], S. 238".

In his note 69, he writes: "Tac. ann. 11,11".

In his note 70, he writes: "Vgl. Percival, Tacitus and the Principate [1980], S. 128-129; Birley, The Life and Death of Cornelius Tacitus [2000], S. 237".

In his note 71, he writes: "Tac. hist. 1,1,3; vgl. Karl Strobel, Plinius und Domitian: Der willige Helfer eines Unrechtssystems, in: Luigi Castagna, Eckard Lefèvre (Hrsg.), Plinius der Jüngere und seine Zeit (= Beiträge zur Altertumskunde 187) (München, Leipzig 2003), S. 303-314, 309 [my emphasis]."

In his note 72, he writes: "Vgl. Nesselhauf [1952], Tacitus und Domitian, S. 222".

In his note 73, he writes: "Nesselhauf, Tacitus und Domitian [1952], S. 222.

In his note 74, he writes: "**Hier können wir verschiedene Positionen finden, wovon eine von Herbert Nesselhauf stammt, nämlich, "[...] dass die ganze spätere Überlieferung über Domitian von der uns verlorenen Darstellung der Historien beeinflusst ist."** (Nesselhauf, Tacitus und Domitian [1952], S. 224).

**Einen anderen Weg schlägt Karl-Heinz Schwarte ein: Er geht von zwei verschiedenen taciteischen Domitian-Bildern aus: Während die verlorenen Teile der Historien den letzten Flavier korrekt und authentisch wiedergeben würden, hätten wir es im Falle des Domitian, wie er in der Biographie des Agricola gezeichnet wird, mit einer literarischen Kunstfigur zu tun, die als negatives Gegenbild zu**

**Agricola konstruiert werde** (vgl. **Karl-Heinz Schwarte, Trajans Regierungsbeginn und der `Agricola´ des Tacitus**, in: *Bonner Jahrbücher* 179 (1979), S. 139-175, 140) [my emphasis]".

In his **note 75**, he writes: "Tac. Agr. 9,6".

In his **note 76**, he writes: "Karl *Christ*, Tacitus und der Prinzipat, in: *Historia* 27 (1978), S. 449-487, 453".

In his **note 77**, he writes: "Was die Datierung der Schrift betrifft, gilt das, was Dieter Flach feststellt: Nervas Leistungen werden in der Vergangenheit erwähnt, während Traians Tun in der Gegenwartsform geschildert wird (Tac. Agr. 3,1; vgl. *Flach*, *Römische Geschichtsschreibung* [1998], S. 192)".

In his **note 78**, he writes: "Vgl. *Nesselhauf*, Tacitus und Domitian [1952], S. 226".

In his **note 79**, he writes: "**Wie Karl-Heinz Schwarte überzeugend betont, gab es eine `Präponderanz der antidomitianischen Polemik´ in der Schrift** (vgl. [vergleiche] *Schwarte, Trajans Regierungsbeginn* [1979], S. 141); vgl. [vergleiche] dazu *Sven Lorenz*, Von Gespenstern und Denunzianten: Die Herrschaft Domitians und Trajans bei Plinius und weiteren zeitgenössischen Autoren, in: *Rolf Kussl* (Hrsg.), *Antike im Dialog* (Speyer 2011), S. 238-260, 238f. [my emphasis]".

**Cf. Markus Handy (2015, 34-35), where he discusses the fact that Tacitus, in his *Agricola*, denies Domitian's military successes in Germany:**

**"An anderer Stelle steht das Bemühen im Vordergrund, die militärischen Erfolge des Domitian in Germanien wenn nicht komplett zu ignorieren, so wenigstens doch klein zu reden.** [with n. 90] Tacitus erzählt von den gewaltigen Siegen des Agricola, die, so Tacitus, zur vollständigen Eroberung Britanniens geführt haben. **Als Vorbild unübertroffen, habe der Feldherr den persönlichen Kampfeinsatz nicht gescheut**, neue Völkerschaften in das Römische Reich eingegliedert und die Herrschaft in Britannien auf Jahre hinweg gefestigt. Fast gewinnt man den Eindruck, als ob Tacitus die Verleihung des Britannicus-Siegerbeinamens an seinen Schwiegervater nur allzu gerecht empfunden hätte. [with n. 91] **Diesem real erfochtenen Erfolg im Feld wird die erlogene und keineswegs in die Tat umgesetzte Sieghaftigkeit des Domitian gegenübergestellt.** Hier wird also die Intention des Autors sehr deutlich sichtbar, den Erfolgen des letzten Flaviers ihre Echtheit abzuerkennen und [page 35] **die Leistungen Agricolas als Statthalter deutlich zu übertreiben.** [with n. 92] Dies ist aber umso verwunderlicher, als das Vorgehen des Schwiegervaters des Tacitus in Britannien im Schrifttum der domitianischen Zeit kaum Erwähnung findet. **Auch auf den Bildern der Reichsprägungen werden wir vergeblich nach einem Echo dieser Kämpfe suchen.** [with n. 93] Wir werden demnach nicht fehlgehen, wenn wir Tacitus' Version von der segensreichen Feldherrntätigkeit des Agricola als befangen ansehen. Domitian muss im Text dieser Schrift als eine Art Negativfolie erhalten, seine Leistungen und sein Verhalten werden stets mit jenem des Agricola kontrastiert [my emphasis]".

In his **note 90**, Handy writes: "Tac. Agr. 39,1; vgl. *Birley*, *The Life and Death of Cornelius Tacitus* [2000], S. 240. **Zu Domitian und dem Nachweis seiner *virtus imperatoria* im Chattenkrieg und zur Bedeutung der Annahme von *Germanicus* als Siegesbeiname für römische Kaiser** vgl. [vergleiche] *Strobel*, *Kaiser Traian* [2010], S. 79f., 84f. [my emphasis]".

In his **note 91**, he writes: "Vgl. *Nesselhauf*, Tacitus und Domitian [1952], S. 228-230".

In his **note 92**, he writes: "**Tacitus könnte hier die Darstellung bei Cassius Dio beeinflusst haben, wo ähnlich negativ über Domitians Kriege geurteilt wird (Cass. Dio 67,7,2-4); zu Domitians Feldzügen im Bericht des Cassius Dio vgl.** [vergleiche] *Schulz*, *Nero und Domitian bei Cassius Dio* [2014], S. 417". - For this subject: cf. also *Verena Schulz* (2014, 418 with n. 58).

In his **note 93**, he writes: "Vgl. *Nesselhauf*, Tacitus und Domitian [1952], S. 233".

For Domitian's achievements in Britain; cf. now *Barbara Birley and Frances McIntosh* ("Material Culture in Britannia under Domitian; a Northern Focus", 2021). They mention also Agricola (on p. 57), but do not address the above-mentioned problems concerning Tacitus and Agricola, discussed by Handy (2015, 31-35).

*In the following, I allow myself a digression on the persecutions of Christians, allegedly ordered by Nero and by Domitian*

To Markus Handy's (2015, 34-35) just-quoted discussion of Tacitus's denigration of Domitian's successful military campaigns in Germany, I should like to add another observation.

**As Brent D. Shaw (2015) has demonstrated, Tacitus (*Ann.* 15,38-44) is also the first ancient author who asserts that the Emperor Nero had started the persecutions of Christians: according to Tacitus, many of whom were "punished by Nero as the culprits responsible for the Great Fire" of AD 64; cf. Shaw (2015, 79). Also Domitian has been blamed by ancient authors for the persecutions of Christians. For both emperors this is not true.**

See Brent D. Shaw ("The Myth of the Neronian Persecution", 2015, 78-81 and *passim*, for Nero. On pp. 97-98, he discusses Domitian's likewise alleged persecutions of Christians, providing references). - I thank Peter Herz for this reference.

Shaw (2015, 97, n. 113) writes: "That there is reliable evidence to support the frequently asserted claims of a persecution under the emperor Domitian is summarily dismissed (and rightly so) by Barnes 2010 : 37; for the details see 'Domitian and the Christians', ch.[apter] 3, in Cook 2010, 112-37 ... [my emphasis]".

The article by Shaw (2015) has not been discussed by the authors of the volume, edited by Aurora Raimondi Cominesi *et al.* (*God on Earth: Emperor Domitian*, 2021). The editors, Aurora Raimondi Cominesi, Nathalie de Haan, Eric M. Moormann, and Claire Stocks write for example in their ("Introduction: Domitian, the Neglected Emperor Who Wished to Be God", 2021, 14) :

"The number of exhibitions centred around Nero (three only in the last decade) [with n. 1, providing references] reflects a die-hard interest in the emperor who more than any other incarnated all sorts of misbehaviours as he was presented as the opponent of Christianity and the embodiment of the iconic 'bad emperor' [my emphasis]".

See also Maria Paola Del Moro ("Domitian's Damned Memory in the Fourth and Fifth Centuries", in: A. RAIMONDI COMINESI *et al.* 2021, 186-188; *ead.* 2023, 169), who comments on the literary sources of the 4th and the 5th centuries that stress Domitian's (alleged) cruelty and assert likewise that Domitian had persecuted Christians.

To Domitian's (alleged) cruelty, I will come back below in Section III. of this *Preamble*; at point 3.). Del Moro (*op.cit.*) herself is unaware of the fact that both reproaches: Domitian's (alleged) cruelty and his (alleged) persecution of Christians, are both unfounded.

The same is true for some literary sources of the Middle Ages, which Nine Miedema has analysed ("An Enemy of God' on the Imperial Throne? The Reception of Domitian During the Middle Ages", in: A. RAIMONDI COMINESI *et al.* 2021, *passim*). Also Miedema does not realize that the reproach, according to which Domitian had persecuted Christians, is not true.

Concerning the (unjustified) assertion that (Nero and) Domitian had persecuted Christians, Frederick G. Naerebout ("Domitian and Religion", in: A. RAIMONDI COMINESI *et al.* 2021, 150), who bases his discussion on different modern commentators, comes nevertheless to the same conclusion as Shaw 2015:

"Domitian has gone down as the second persecutor of the Christians, Nero being the first. In fact, there is no shred of evidence [with n. 42, quoting: "Speigl 1970"; my emphasis].

Nevertheless, Nathalie de Haan, Eric M. Moormann, Aurora Raimondi Cominesi and Claire Stocks, in the Italian version of their English text ("La Memoria Sepolta di Domiziano e una sua rivalutazione nelle mostre di Leiden e Roma", 2023, 15-16) (erroneously) still call the Emperor Nero the :

"... **oppositore per eccellenza del Cristianesimo** e l'incarnazione ormai iconica della figura del cattivo imperatore", adding to this a passage, which the English text (2021) does not contain: "**L'esempio di Nerone mostra come a una pessima reputazione, persino a una *damnatio memoriae*, non faccia necessariamente seguito una caduta nell'oblio. Viene dunque da chiedersi perché le stesse sanzioni, applicate agli atti e alla memoria dell'imperatore Domiziano, ebbero invece successo, o certamente più successo di quello applicato al suo predecessore [i.e., Nero]. Proprio questa domanda forma la base del progetto di ricerca scaturito nella mostra *God on Earth. Emperor Domitian*, tenutasi al Rijksmuseum van Oudheiden di Leiden dal 17 dicembre 2021 al 22 maggio 2022 e incentrata sulla complessità della memoria e sulla [page 16] controversa eredità di questo imperatore [i.e., Domitian]. Per la prima volta, Domiziano viene considerato come uomo, sovrano e (quasi) dio offrendo un ritratto ricco di sfacciatte (fig. 1) [my emphasis]**".

To the above-quoted passage from de Haan, Moormann, Raimondi Cominesi and Stocks (2023, 15-16), I should like to add two comments:

**a) note that the Senate did by no means decree in the case of Nero a *damnatio memoriae*** (as indeed in the case of Domitian), as de Haan, Moormann, Raimondi Cominesi and Stocks (2023, 15) (erroneously) assert; cf. M.P. Charlesworth, G.E.F. Chilver and M.T. Griffin ("Nero (Nero Claudius Caesar ...) ... Roman emperor AD 54-68 ... The praetorians were told that Nero had already fled abroad and were bribed by C. Nymphidius Sabinus, one of the prefects, to declare for Galba. **The senate followed suit, decreeing Nero a public enemy** [my emphasis]", in: *OCD*<sup>3</sup> [1996] 1038).

See also Diane Atnally Conlin ("Master and God: Domitian's Art and Architecture in Rome", in: A. RAIMONDI COMINESI *et al.* 2021, 153; the context is the birth of Domitian): "**... there must have been little anticipation that the child of Sabine heritage born that autumn day would inherit the imperial scepter of Rome, and even less expectation that young Domitian would become the first emperor to suffer an official damnation by the Senate following his assassination in 96** [my emphasis]";

**b)** also Rose Mary Sheldon has studied in her book (*Guarding the Caesars. Roman Internal Security under the Flavian Dynasty*, 2023, in press; Chapter 7), some of the questions posed by the organizers of the recent exhibition *God on Earth: Emperor Domitian*, and mentioned by de Haan, Moormann, Raimondi Cominesi and Stocks (2023, 15-16) in the above-quoted passage. Cf. below, in the II. and III. Sections of this *Preamble*, where the relevant passages from Rose Mary Sheldon's book (2013, in press) are quoted *verbatim*.

**Let's now turn to Markus Handy's (2015, 35) discussion of Plinius the Younger's relationship with Domitian :**

### "Plinius

Kommen wir nun zur Figur des C. Plinius Secundus: Auch er ist ein weiterer wichtiger Zeuge von Domitians Herrschaft. **Als *homo novus* verdankt er seine Tätigkeiten in der Reichsverwaltung zu einem überwiegenden Teil der Förderung durch Domitian.** [with n. 94] Demnach ist er um 82 n. Chr. Militärtribun in Syrien, um etwa 88/89 n. Chr. *quaestor Augusti*. **In dieser Funktion bekundet er vielleicht dem Kaiser Domitian anlässlich dessen Sieges über die Germanen seinen Beifall.** [with n. 95] Etwa 92 n. Chr. ist er dann Volkstribun, und in einem der Folgejahre erhält er die Prätur. **Zur Zeit des Herrscherwechsels von Domitian zu Nerva dient er als *praefectus aerarii militaris* (von 95-97 n. Chr.) und ist für die Verwaltung der Kasse zuständig, aus der ausgediente Legionäre ausbezahlt werden. Da die Versorgung und Besoldung der Truppen für jeden Kaiser wichtige Anliegen sind, können wir daraus folgern, dass sich Plinius in seiner Laufbahn der besonderen Förderung des Domitian erfreut hat.** [with n. 96]".

In his **note 95**, Handy writes: "Vgl. *Strobel* [2003], *Plinius und Domitian*, S. 304".

In his **note 96**, he writes: "Vgl. *Strobel*, *Plinius und Domitian* [2003], S. 303f., 308; Lorenz, *Von Gespenstern und Denunzianten* [2011], S. 255f.". - For the location of the *aerarium militare* on the *Capitolium*, at the Temple of Ops Opifera in *Capitolio*; cf. *infra*, in volume 3-2, at *Appendix I.d.2.*).

Markus Handy (2015, 37-38) then describes, how Pliny, in his *Panegyricus* on Trajan, creates Trajan's positive image by constantly contrasting him with Domitian, who is throughout characterized as *malus princeps*:

**"Das überschwängliche Lob für Traian bedingt den Verriss Domitians als *malus princeps*, der nicht als Mensch, sondern als schreckliches Ungeheuer den edelsten Bürgern Tod und Verderben gebracht habe. [with n. 104] Es ist bemerkenswert, dass Plinius dem Domitian gar keine positiven Eigenschaften zugesteht: Selbst die Siege, die Domitians Truppen im Feld errungen hatten, seien erlogen gewesen. [with n. 105] Man kann daraus schließen, dass sich die Legitimierung der Ermordung des letzten Flavierkaisers und der Machtübernahme des Kreises um Traian sich wie ein Leitfaden durch die Rede zieht. [with n. 106] Obgleich Plinius insgesamt den Unrechtscharakter der Herrschaft Domitians und dessen Tyrannentum, wenn auch meist unter der Bezeichnung eines *malus princeps*, stark betont, hat er diesem Kaiser zu dessen Lebzeiten jedoch nicht nur als loyaler Helfer, sondern mitunter sogar als Täter gedient. [with n. 107] Höchst seltsam erscheint uns daher eine Bemerkung dieses Autors, er habe sein Karrierestreben gerade dann unterbrochen, als Domitian im Begriff gewesen sei, sich zum Gewalt- [page 38] herrscher zu entwickeln. [with n. 108] Man darf daher Karl Strobel's Einschätzung von Plinius als Karrieristen und Opportunisten einiges abgewinnen. [with n. 109] Nach Domitians Ermordung entwickelt sich Plinius zu einem Wendehals, der mit seiner programmatischen Legitimierung des Kaisermordes maßgeblich zur Herauentwicklung der verheerenden *imago* des letzten Flaviers beiträgt. [with n. 110; my emphasis]"**.

In his **note 104**, Handy writes: "Plin. paneg. 95,3; vgl. *Strobel*, *Plinius und Domitian* [2003], S. 310f."

In his **note 105**, he writes: "Plin. paneg. 11,4,2-5; 12,2; 16,3; 17,1; 17,3 -4; 82,4; dazu vgl. [vergleiche] Tac. Agr. 39; ebenso vgl. [vergleiche] *Strobel*, *Plinius und Domitian* [2003], S. 312".

In his **note 106**, he writes: "Vgl. *Strobel*, *Plinius und Domitian* [2003], S. 305f."

In his **note 107**, he writes: "Vgl. *Strobel*, *Plinius und Domitian* [2003], S. 312".

In his **note 108**, he writes: "Plin. paneg. 95,3-4; vgl. *Strobel*, *Kaiser Traian* [2010], S. 124".

In his **note 109**, he writes: "Vgl. *Strobel*, *Plinius und Domitian* [2003], S. 304; *Strobel*, *Kaiser Traian*, S. 125".

In his **note 110**, he writes: "Vgl. *Strobel*, *Plinius und Domitian* [2003], S. 312".

**In his final conclusion, Markus Handy (2015, 48-50) suggests that the negative images of Domitian and Nerva, created for Trajan by Tacitus and Pliny in their works discussed above served the purpose of legitimizing Trajan's accession :**

### **"Resümee**

**Die vorhin angestellten Überlegungen lassen sich folgendermaßen zusammenfassen: Es kann kein Zweifel daran bestehen, dass Tacitus und Plinius ihre oben vorgestellten Werke vor dem Hintergrund der Herrschaft Domitians schreiben. Obgleich beide Autoren unter Domitian Karriere gemacht haben, zeichnen sie das Bild eines grausamen und menschenverachtenden Despoten ... [page 49]**

Mit ihren Ausführungen zu den Ereignissen von Domitians Ermordung bis zu Traians Thronbesteigung schufen Tacitus und Plinius ferner auch eine Zäsur, die vielleicht bislang in der Altertumswissenschaft ein wenig unbemerkt geblieben ist: Die Texte der beiden Autoren erwecken nämlich den Anschein, als ob eine Trennlinie zwischen den Prinzipaten von Nerva und dessen Adoptivsohn Traian gezogen wird. **Nervas Laufbahn und Vita ist eng mit dem Flavierhaus verbunden, sodass Traian in seiner Selbstdarstellung einen Aufbruch in eine neue Zeit signalisieren muss. Dies mag auch der Grund sein, warum Nerva im plinianischen Panegyricus als schwacher Herrscher in Erscheinung tritt. Man weiß von**

seiner Nähe zum Flavierhaus, was nach offizieller traianischer Sicht kaum einem Qualitätsmerkmal entsprechen kann. Allerdings lässt sich Nervas Rolle als Adoptivvater kaum ignorieren, sodass sich Plinius mit sporadischen Bemerkungen, die Nervas Fähigkeit zum Herrschen anzweifeln, begnügt. [with n. 175] Auch die Gunst und die [page 50] Förderung, die Nigrinus, Traians Rivale um die Macht, von Domitian erhalten hat, sowie die spezielle Lage des Jahres 97 n. Chr., als es auf Grund der Proteste der Prätorianer scheint, dass die Erinnerung an diesen Kaiser wieder wachgerufen wird, zwingen Traian dazu, Domitian zu jenem bekannten Bild eines *malus princeps* zu verhelfen und auch die Distanz zum flavierfreundlichen Nerva zu wahren. Von sich selbst erzeugt der Ulpier das Bild eines leutseligen Herrschers, der jede Art von autokratischem Gehabe vermissen lässt. Obgleich militärisch kaum ausgewiesen, vermittelt er von sich die Vorstellung eines erfahrenen Kriegsmannes, dessen Erfolge, anders als die des Domitian, real existieren.

Auf der Basis dieser Vorgaben, nämlich der ``Erneuerung der *damnatio memoriae*'' [with n. 176] des letzten Flaviers, der Charakterisierung Nervas als altersschwachen Greises und der Auszeichnung Traians mit dem Image eines *vir militaris*, kreieren nun Tacitus und Plinius ihre Version der Ereignisse. Dass beide eine profunde rhetorische Ausbildung genossen haben, ist dabei ganz sicher kein Nachteil, zumal damals die Legitimation von Tyrannenmord als gängiges Thema in der Schulrhetorik bekannt ist. [with n. 177; my emphasis]".

In his **note 175**, Handy writes: "Plin. paneg. 6,1-4; 8,5-6; 10,1; vgl. *Strobel*, Zu zeitgeschichtlichen Aspekten im 'Panegyricus' des jüngeren Plinius [1985], S. 28. An anderer Stelle dieses Artikels (S. 32) schreibt Karl *Strobel*: ``Aber offenkundig war es für Trajan wichtiger und vorteilhafter, die Rechtfertigung seiner Herrschaft gerade von der Person und der Entscheidung Nervas so weit wie möglich unabhängig zu machen.'' Eine Distanzierung zu Nerva sieht auch Dietmar *Kienast* (vgl. *Kienast*, Nerva und das Kaisertum Trajans [1968], S. 62-65)".

In his **note 176**, he writes: "*Schwarte*, Trajans Regierungsbeginn [1979], S. 155".

In his **note 177**, he writes: "Barbara Patzek, Art.[ikel] Tyrannenmord, in: *Der Neue Pauly* 12/1 (2002), S. 946".

**Concerning Handy's (2015, 49) above-quoted text, accompanied by his note 175, in which he asserts that Trajan distanced himself from Nerva, I should like to add a comment by anticipating a passage that was written for another Chapter in this book.**

Cf. *infra*, in volume 3-2, at *A Study on the consequences of Domitian's assassination ...* ; at Chapter VI.1. My 2. Conclusion: In this context it is interesting to analyse the process by which Hadrian finally became emperor; at The circumstances that had brought Trajan to Mogontiacum and Domitian's negative image, created by Tacitus and Pliny at the order of Trajan to legitimize his own accession:

'D.C.A. Shotter (1983, 225) states: "Trajan's accession issue [*i.e.*, the coin here **Fig. 140**] shows Nerva handing Trajan a globe with the legend PROVID P M TR P COS II [with n. 67; my emphasis]". Cf. p. 226: "Nerva's memory in Trajan's reign was correctly observed. Trajan assumed Nerva into his nomenclature: indeed, his portrait on his early coins [cf. here **Fig. 140**] passes through as ``Nerva'' phase [with n. 68; my emphasis].

In his **note 67**, D.C.A. Shotter writes: "P. V. Hill, *The Undated Coins of Rome, A. D. 98-148* (London 1970), 23f.". In his **note 68**, he writes: "*Ibid.* 22".

By issuing the coin (here **Fig. 140**), which celebrates his adoption by Nerva, Trajan showed his gratitude towards his adoptive father and predecessor - to whose facial traits Trajan's portrait has even been assimilated on this coin (!). This conclusion seems to be inevitable and is in so far a surprising result as scholars often stress Trajan's lack of gratitude in regard to Nerva; cf. C.C.A. Shotter (1983, 225) ...'.

### Let's now turn to Suetonius.

But not only Tacitus and Pliny the Younger wrote texts, on which Domitian's negative image is based. Also Suetonius was involved in this process; cf. *infra*, in Section III. of this *Preamble*; at n. 232, in Chapter I.2; and *infra*, in volume 3-2, at *Appendix I.b*); *Domitian's escape from the Capitolium - Introduction*; and at *Appendix I.c*).

**As we shall see in more detail below, according to Frederick G. Naerebout (2021, 151): "Suetonius ... has contributed more than any other author to the black legend about Domitian" (!).**

But, as I only realized after this *Section I.* of Chapter *Preamble* was written so far, that fact has already been observed and discussed in great detail by Robert Sablayrolles (1994, 137-138, and *passim*), whose article has not been discussed by the contributors to the volumes edited by Bönisch-Meyer *et al.* (2014), nor by the contributors to the volume edited by Raimondi Cominesi *et al.* (2021), or by the scholars, who wrote essays for the *Cat. Domiziano Imperatore. Odio e amore*, edited by Claudio Paris Presicce *et al.* (2023) I thank Rose Mary Sheldon for providing me with a copy of Sablayrolles's article. To Sablayrolles's observations I will come back below, and again, in Sections II. and III. of this *Preamble*.

I will not repeat Suetonius's discussion of Domitian here, that (as already mentioned) is analysed elsewhere in this *Study* in great detail, but find it useful, similarly as Markus Handy (2015) has done in the above-quoted passages about Tacitus and Pliny the Younger, to add at this point some information about Suetonius *himself*.

**We know for example that, thanks to his patron Pliny the Younger, and to his friend C. Septicius Clarus, one of Hadrian's praetorian prefects, Suetonius gained the support of both, Trajan and Hadrian (needless to say that also Pliny and Septicius Clarus were closely related).**

**Suetonius even became Hadrian's *ab epistulis* ('personal secretary'), but due to his own luckless conduct, he was unable to stay in Hadrian's favour.**

Anthony R. Birley (1996, 663) wrote about Hadrian and the man who was for three years his *ab epistulis* ('personal secretary'), Suetonius: "In 119 he [*i.e.*, Hadrian] was consul for the third and last time, and changed guard prefects. One new prefect was Septicius Clarus, to whom the younger Pliny had dedicated his Letters; C. Suetonius Tranquillus, protégé of Pliny and Septicius' friend, became *ab epistulis* ... In 122 he [*i.e.*, Hadrian] crossed to Britain, taking his friend Platorius Nepos ... The empress Sabina, the prefect Septicius, and Suetonius also went. An obscure imbroglio involving these three led to the men's dismissal [my emphasis]".

For this "imbroglio", mentioned by Birley (1996, 663); cf. also Nihal Tüner Önen (2013, 97-98, wo quotes for that: "Aelius Spartianus, SHA; Hadrian XI 2-6"). But note that Tüner Önen does not assume that the empress Sabina, Septicius Clarus and Suetonius had *accompanied* Hadrian on this trip to Britain in AD 122, but rather that Hadrian had left his wife Sabina and these two gentlemen behind in Rome (!). - I thank Hans Rupprecht Goette for the reference.

Be all that a it may !

I can imagine that a Roman emperor could easily have travelled 'abroad' without his wife - but also without his personal secretary? Let alone without one of his regularly two guard prefects, "since one prefect usually travelled with the emperor on campaign"; cf. John Brian Campbell and John F. Matthews ("*praefectus praetorio*", in: *OCD*<sup>3</sup> [1996] 1238).

Cf. Birley (1996, 1451): "From the correspondence of the younger Pliny (2), he [*i.e.*, Suetonius] appears already to have attracted attention in Rome as an author and scholar by c.[irca] AD 97 [when Suetonius, born around AD 70, was circa 27 years old] ... he secured through Pliny's patronage a military tribunate in

Britain c.[irca] 102, which in the event he declined to hold; c.[irca] AD 110, however, he probably travelled with Pliny to Bithynia as a member of the provincial governor's [*i.e.*, Pliny's] retinue, gaining soon after, again through Pliny's intercession, the *ius trium liberorum* ... In the late years of Trajan's reign and under Hadrian, Suetonius held three important posts in the imperial administration, the secretaryships *a studiis*, *a bibliothecis*, and *ab epistulis* ... As *ab epistulis* he is likely to have accompanied Hadrian to Gaul, Germany and Britain in AD 121-2, but then for unknown reasons was dismissed from office when Hadrian simultaneously deposed as praetorian prefect ... C. Septicius Clarus, the dedicant of Suetonius' collection of imperial biographies, the *Caesares* [my emphasis]" (!).

Frederick G. Naerebout (2021, 151), after mentioning one of Suetonius's (*Dom.* 8.5) accounts about Domitian comes to very interesting conclusions concerning Suetonius and Domitian:

"Is there any reason to trust these words of Suetonius who has contributed more than any other author to the black legend about Domitian? Yes, there is: Suetonius is here speaking about the years before the emperor supposedly turned tyrant, and wants us to see the good, and godly, emperor. The tyrant of legend is contrasted with the pious *cultor deorum* - with an eye for detail and a severe disposition: for all we know, that is the real Domitian".

**Let's now turn to the relevant passages in Peter L. Viscusi's account, that relate to the intentional creation of Domitian's bad image.**

Peter L. Viscusi (1973, 53-55, in his "Chapter V Domitian and the Roman Frontiers"; Section: "I. Domitian vs. [versus] the Chatti") writes about Domitian's achievements in Germany:

**"In January of 89 A.D., Lucius Antonius Saturninus, the governor of Upper Germany, was hailed as emperor by the two legions stationed at Mogontiacum, XXI Rapax and XIV Gemina.** The would-be emperor was expecting aid from "barbarian allies" across the Rhine. These "barbarian allies" would most probably have been Chatti. The expected aid, according to Suetonius did not arrive because the thawing of the Rhine prevented any crossing [with n. 23] and the revolt was promptly crushed by L. Appius Maximus Norbanus, governor of Lower Germany. [with n. 24] In keeping with a Claudian precedent, Domitian rewarded the loyalty of the legions from Lower Germany by bestowing upon them the additional title of pia fidelis Domitiana. [with n. 25] ... [page 54] ...

**Upper and Lower Germany were officially organized as provinces by the year 90 A.D.** An inscription from Nedinum (Dalmatia) states that the famous jurist Javolenus Priscus had been the legate of the province of Upper Germany. [with n. 29] Prior to their being raised to the status of provinces, Upper and Lower Germany were administratively attached to the province of Gallia Belgica although the armies of [page 55] these two German areas were operationally independent. [with n. 30] **The establishment of Upper and Lower Germany as provinces says much for the pacification programs of Domitian. As Lepper so aptly stated: "On the Rhine little probably remained for Trajan to do in 97/8 but to inspect and appreciate the work of Domitian, which had been well done."** [with n. 31; my emphasis]".

In his **note 23**, Viscusi writes: "Suetonius, Domitian, 6, 2.

In his **note 24**, he writes: "Henderson [1927], p. 111; Dio Cassius, LXVII, 11.1."

In his **note 25**, he writes: "Syme, "Rhine and Danube Legions" [1928] p. 44".

In his **note 29**, he writes: "MW, 309 = ILS, 1015".

In his **note 30**, he writes: "Henderson [1927], p. 114".

In his **note 31**, he writes: "F. A. Lepper, Trajan's Parthian War [1948], p. 110".

For L. Antonius Saturninus; cf. Dietmar Kienast, Werner Eck and Matthäus Heil (2017, 113).

Peter L. Viscusi (1973, 72, "Chapter V Domitian and the Roman Frontiers"; Section: "II. Domitian on the Danube Frontier") comes to an equally concise, and likewise very positive conclusion concerning Domitian's campaigns 'on the Danube Frontier', as in the case of Domitian's campaigns in Germany:

**"As Lepper [1948] has observed: ``Only in their scale do the Dacian [with n. 90] Wars of Trajan differ from the various Flavian successes ... If one were to compare the respective frontier policies of Trajan and the Flavians, with particular emphasis on Domitian, it would become abundantly clear that Trajan is ``the active and successful executor of the Flavian legacy, unfairly credited no doubt with [with n. 91] some of their achievements because of his greater popularity ... [my emphasis]".**

In his **note 90**, Viscusi writes: "Lepper [1948], p. 110".

In his **note 91**, he writes: "Ibid."

I completely agree with Lepper's (1948) and Viscusi's (1973) above-quoted judgements. But because of the lies, told by Tacitus and Dio Cassius in their writings discussed here, that will be quoted below and again in several other *Chapters* of this *Study*, I have decided to quote in the following also some more passages from Viscusi's dissertation, in which he discusses *inter alia* Dio's account (67,7.2-7.4) concerning 'the Dacian truce of AD 89' and Domitian's double triumph over the Chatti and the Dacians of AD 89. Viscusi (1973) is able to demonstrate that Dio's (67,7.2-7.4) assertions are certainly not true. As we have already heard above; cf. Markus Handy (2015, 35, n. 92, on Cass. Dio 67,7,2-4), Dio's assertions 'may be influenced by Tacitus's negative image of Domitian'. - In my opinion, this is definitely true.

**But before quoting more passages from Peter L. Viscusi's dissertation (1973), I should like to mention, to which conclusion Aurora Raimondi Cominesi and her colleagues have come concerning the judgement of Domitian's 'military skills' (so RAIMONDI COMINESI *et al.* 2021, 16, quoted below).**

Aurora Raimondi Cominesi, Nathalie de Haan, Eric M. Moormann and Claire Stocks (2021, 16) write: "Scholars nowadays acknowledge the fact, for example, that Domitian's military skills were good [my emphasis]". And Nathalie de Haan, Eric M. Moormann, Aurora Raimondi Cominesi and Claire Stocks (2023, 17), write in the Italian version of this text: "**Gli studiosi oggi riconoscono, per esempio, il fatto che Domiziano possedesse buone capacità militari** [my emphasis]".

Let's now return to the discussion of Viscusi's findings.

**Peter L. Viscusi (1973, 58-60) describes Domitian's Dacian wars between AD 86 and 89 that ended in 89 with a great victory of the Roman army at Tapae, celebrated by Domitian with a double triumph at Rome over the Chatti and the Dacians in November/ December of AD 89.**

As I tentatively suggest in this *Study*, Frieze A of the Cancellaria Reliefs (cf. here **Fig. 1; Figs. 1 and 2 drawing: figure 6**) shows Domitian's *profectio* to his Second Dacian war in the spring of AD 89 that ended with this victory; cf. *infra*, **n. 232**, in Chapters *I.2.*); below, at *The major results of this book on Domitian*; and *infra*, in volume 3-2, at *Appendix IV.d.2.e*); and *Appendix IV.d.2.f*).

I, therefore, summarize in the following in some detail passages from Viscusi's (1973, 58-63) account that relate to Domitian's actions in AD 89.

After that victory over the Dacians at Tapae, and still in AD 89, the Romans fought against tribes on the Danube and suffered a defeat. To avoid further difficulties with those tribes all along the Danube, Domitian agreed to come to terms with the Dacian king Decebalus, as the king had suggested for quite some time already, resulting in 'the Dacian truce of AD 89'.

To explain Domitian's policy in regard to the Dacians, Viscusi (1973, 69) follows Ronald Syme: by making Decebalus a client king, Domitian aimed at securing the Danube frontier, since the Dacians were supposed to 'control the tribes on either side of the Danube'. In the course of the ceremonies, surrounding 'the Dacian truce of AD 89', Domitian crowns Diegis, a "substitute for the absent Decebalus"; cf. Viscusi (1973, 62). Viscusi (1973, 62) also observes that the victory at Tapae is enough to prove that "Domitian had conquered the Dacians". Because Domitian crowned Diegis, which, according to Viscusi, was common practice in the case of client kings, this meant that Decebalus thus acknowledged that Domitian had won this war against the Dacians. Dio Cassius (LXVII, 7.2-7.4) continues his narrative by writing that Domitian then sends a letter and envoys of Decebalus to the Senate of Rome and the Roman People; cf. Viscusi (1973, 60-61), but Dio adds that there were rumours that Domitian had written this 'letter of Decebalus' himself. Dio further asserts that Domitian, instead of exhibiting war booty from Dacia in his triumphal procession, showed furniture of the imperial household.

Viscusi (1973, 62) refutes Dio's first assertion by stating that *a*) writing such a letter was usual practise of client kings under such circumstances, *b*) that it would have been impossible for Domitian to forge such a letter of Decebalus, because the king had sent his own envoys to the Senate, and *c*) "that it seems that Domitian was only following normal procedure in forwarding the Dacian envoys and a letter from their king to the Senate in Rome"; cf. Viscusi (1973, 62).

But because Dio says explicitly (67,7.2-7.4) that Domitian "sent" Decebalus's letter *and* his envoys to Rome, this may, in my opinion, perhaps be interpreted as follows, *1.*) that Decebalus, presumably after having discussed the whole procedure with him, sent his envoys with his letter, addressed to the Senate, first to Domitian, to give the emperor the chance to read his letter, and *2.*) that Domitian, thus "following normal procedure", as Viscusi (1973, 62) suggests, offered Decebalus's envoys (who carried Decebalus's letter) that they could travel to Rome by using the *cursus publicus* - a service that Decebalus himself could *not* have used. If so, Decebalus's envoys and his letter would thus have arrived much earlier at the Roman Senate than had Decebalus sent those envoys himself, a result that would also have been in Domitian's own interest, of course.

For the blessings of the *cursus publicus*; cf. below, at *The fifth Contribution by Peter Herz : Der Ritt Hadrians nach Mogontiacum*; as well as *infra*, in volume 3-2, at *A Study on the consequences of Domitian's assassination ..*; at Chapter VI.1. My 2. Conclusion: In this context it is interesting to analyse the process by which Hadrian finally became emperor; and at *Trajan's adoption by Nerva and Hadrian's Parforceritt from Moesia Inferior to Mogontiacum to congratulate Trajan on his adoption*.

Viscusi (1973, 62) adds that Dio's (67,7.2-7.4) assertions concerning Domitian's double triumph of AD 89, in which the emperor allegedly exhibited the furniture of the imperial household are likewise unjustified. As we shall see below, Tacitus (*Agr.* 39; cf. *infra*, n. 232, in Chapter I.2.; and quoted *verbatim* and discussed *infra*, in volume 3-2, in *Appendix I.c*)) had already asserted something very similar concerning exactly the same triumph of Domitian.

**Let's now look at Peter L. Viscusi's (1973, 58-61) account of Domitian's wars against the Dacians in detail, with special attention to the events that led to Domitian's double triumph of AD 89 :**

"In the summer of 86 A.D., Cornelius Fuscus, Domitian's appointed commander of the Dacian War, crossed the Danube to punish the Dacians for their previous attacks. When Decebalus, the Dacian king, learned of Fuscus' movements he sent an embassy to Domitian  
... with the insulting proposal to make peace with the emperor, on condition that every Roman should elect to pay two obols to Decebalus each year; otherwise, he declared, he would make war and inflict great ills upon the Romans. [with n. 44: "Dio Cassius, LXVII, 6.5".]

Indeed it was not long before Fuscus was met by the Dacians and killed in battle. [with n. 45] The Romans lost a legion, probably V Alaudae, [with n. 46] along with its standard, [with n. 47] a particularly great dishonor. [page 59]

**While leaving Fuscus to conduct the war in Moesia, Domitian returned to Rome in time to begin the Capitoline Games in the summer of 86 A.D.** The news of Fuscus' defeat did not cause the emperor despair but only hardened his resolve to redouble his efforts. The Dacians seemed content with their victory of 86 A.D. and so there was a respite from war in 87 A.D. while both sides marshalled their forces. Domitian ordered the transfer of II Adiutrix from Britain [with n. 48] to Moesia to replace V Alaudae. **The war began anew in 88 A.D. and lasted into 89 A.D.. The careful planning of Domitian paid off in a great Roman victory. The Roman legions, under the command of Tettius Julianus, engaged the enemy at Tapae where there was such a great slaughter that the Dacians were utterly defeated.** [with n. 49]

**The celebration of the victory over the Dacians in 89 A.D. was marred by the rebellion of the governor of Upper Germany, Lucius Antonius Saturninus.** This rebellion was apparently timed to take the most advantage of the Roman military difficulties. The armies of Rome could not very well leave the Danube front within so brief a time after the Dacian defeat. Problems were compounded for Domitian in that the Parthians were now supporting the claims of a false Nero in the East and war seemed imminent. **Syme suggests the possibility that Decebalus had been in contact with the Parthian King Pacorus II so that the two enemies of Rome could operate in concert.** [with n. 50] **Acting decisively, Domitian ordered VII Gemina, under the command of the future emperor Trajan, to march from Spain to Upper Germany.** [with n. 51; page 60] In the meantime, the emperor himself went to Northern Italy with the Praetorian Guard. [with n. 52] The revolt of Saturninus ended as quickly as it had begun. The legions of Lower Germany remained loyal and crushed the usurper's forces. [with n. 53] Domitian, however, continued his march to Upper Germany where he proceeded to punish Saturninus' accomplices. It has been suggested by Syme that Sallustius Lucullus, governor of Britain, was executed at this time for alleged complicity in Saturninus' plot. [with n. 54] **Later in 89 A.D., Domitian celebrated a double triumph for his victories over the Chatti and the Dacians.** [with n. 55]

After dealing with the problem of Saturninus, Domitian resolved to punish several of the Trans-Danubian tribes that were subject to Rome for failing to aid him in his war with the Dacians. The Germanic Marcomanni and Quadi and the Sarmatian Iazyges [with n. 56] sent an embassy to Domitian to discuss peace terms but they were executed by order of the emperor. [with n. 57] Our sources do not reveal the reasons for Domitian's actions. The war against these tribes did not go well and the Romans suffered a defeat. [with n. 58] This defeat had greater ramifications than just being a small border skirmish. The entire Rhine-Danube frontier could be ablaze with war if it appeared to the barbarians that the Romans were weakening. Domitian, therefore, realized that he would have to break off his war with the Dacians and consolidate his position. He sent messages to Decebalus and [follows a quotation from Dio Cassius] :

*... induced him to make a truce, though he himself had hitherto refused to grant one in response to the frequent requests of Decebalus. And so Decebalus accepted his overtures, for he had suffered grievous [page 61] hardships; yet he did not wish to hold a conference with Domitian personally, but instead sent Diegis with the men, to give him the arms and a few captives, who, he pretended, were the only ones that he had. When this had been done, Domitian placed a diadem on the head of Diegis, just as if he had truly conquered and could give the Dacians anyone he pleased to be their king. To the soldiers he granted honours and money. And, just as if he had won a victory, he sent to Rome, among other things, envoys from Decebalus and also a letter from the king, as he claimed, though rumour declared that he had forged it. He graced the festival that followed with many exhibits appropriate to a triumph, though they came from no booty that he had captured; on the contrary, the truce had cost him something besides his losses, for he had given large sums of money to Decebalus on the spot as well as artisans of every trade pertaining to both peace and war, and had promised to keep on giving large sums in the future. The exhibits which he displayed really came from the store of imperial furniture ...* [with n. 59: "Dio Cassius LXVII, 7.2-7.4".]

**The Dacian truce of 89 A.D. and the events immediately following it have been the subject of much debate. As can be seen in the quotation from Dio Cassius, Domitian is the one who is seeking the truce although Decebalus also wanted a cessation of hostilities because ``he had suffered grievous hardships ...'' [my emphasis].**

In his **note 44**, Viscusi writes: "Dio Cassius, LXVII, 6.5".

In his **note 45**, he writes: "Martial, VI, 76; Juvenal, 4, 111-112".

In his **note 46**, he writes: "Syme, ``Rhine and Danube Legions'' [1928], p. 47".

In his **note 47**, he writes: "Dio Cassius, LXVIII, 9.3. Syme suggests, however (C.A.H., XI [1936], p. 171, n. 1) that it is possible that the standard to which Dio Cassius was referring was that of the Praetorian Guard".

In his **note 48**, he writes: "MW, 371 = ILS, 9193".

In his **note 49**, he writes: "Dio Cassius, LXVII, 10.2".

In his **note 50**, he writes: "Syme, C.A.H., XI [1936], p. 144".

In his **note 51**, he writes: "Pliny the Younger, Panegyricus, 14.1".

In his **note 52**, he writes: "Syme, C.A.H., XI [1936], p. 173".

In his **note 53**, he writes: "Dio Cassius, LXVII, 11.1".

In his **note 54**, he writes: "Syme, C.A.H., XI [1936], p. 174".

In his **note 55**, he writes: "Suetonius, Domitian, 6, 1".

In his **note 56**, he writes: "Syme, C.A.H., XI [1936], p. 175".

In his **note 57**, he writes: "Dio Cassius, LXVII, 7.1".

In his **note 58**, he writes: "Ibid., 7.2".

In his **note 59**, he writes: "Ibid., 7.2-7.4".

**Next Peter L. Viscusi's (1973, 62-63) discusses Dio Cassius's (67,7.2-7.4) assertion that Domitian had allegedly forged the letter, written by Decebalus to the Roman Senate and to the Roman People and that Domitian had allegedly shown in his double triumph over the Chatti and Dacians of AD 89 instead of war booty furniture from the imperial household:**

"Dio Cassius states that ``Domitian placed a diadem on the head of Diegis, just as if he had truly conquered and could give the Dacians anyone he pleased to be their king''. Domitian was obviously not crowning Diegis as king but was treating him only as a substitute for the absent Decebalus who ``did not wish to hold a conference with Domitian personally ...'' Decebalus did not want to put himself in the position where he could be held captive by the Romans. With regard to whether or not Domitian had conquered the Dacians, the battle at Tapae is sufficient testimony. [page 63] It is said that Domitian then sent Decebalus' envoys to Rome and forwarded a letter from the Dacian king. Dio Cassius gives the rumor that this letter was forged by Domitian but adds no reason why the emperor would want to do such a thing. The presence of the Dacian envoys would seem to preclude the possibility that Domitian could have revealed anything untrue about Decebalus or his intentions in this allegedly forged letter. With the rumor of the forged letter put aside, it seems that Domitian was only following normal procedure in forwarding the Dacian envoys and a letter from their king to the Senate in Rome. The letter from Decebalus undoubtedly contained expressions of friendship and goodwill for the Senate and the Roman People. This would be in keeping with traditional statements made by nations and tribes that had been defeated by the Romans. The sheer fact that Diegis is crowned for Decebalus by Domitian clearly shows the Dacians in the role of a client-kingdom.

The statements that Domitian exhibited his own imperial furniture as booty hardly deserve comment. The occasion of the slaughter at Tapae and the free and unhindered movement of Roman troops within Dacia would have provided ample opportunity for the accumulation of war booty".

**Peter L. Viscusi (1973, 69) follows Ronald Syme in suggesting that Domitian's policy in regard to the Dacians aimed at securing the Danube frontier, since the Dacians were supposed to `control the tribes on either side of the Danube': "If Domitian's grants of money and artisans to the Dacians were not the result of Roman weakness, and they were not harmful to Roman interests, what were the emperor's motives for these**

generous gifts? [G.A.T.] Davies suggests that Domitian had hoped that these two grants would eventually bring the Dacians around to the Roman way of thinking. By being generous and showing the Roman arts (stressing the peaceful arts), it was hoped that the Dacians would see the worth of Romanization. This general procedure had worked in Gaul and Britain and there was every reason to believe that it would work again in Dacia. The fact that this procedure did not succeed in Dacia is hardly the fault of Domitian. [with n. 76]

Domitian may very well have hoped for the gradual Romanization of Dacia, but he would have been more likely concerned about the practical application of military power. Syme maintains that Domitian used the Dacians as a means of keeping the tribes on either side of Dacia under control. The kingdom of Dacia was thus used in the same way that Trajan was later to use his province of Dacia. [with n. 77] This view has much to be said for it".

In his **note 76**, Viscusi writes: "G.A.T. Davies, "Trajan's First Dacian War," *Journal of Roman Studies*, VII (1917), pp. 86-87".

In his **note 77**, Viscusi writes: "Ronald Syme, "The Lower Danube under Trajan", *Journal of Roman Studies*, XLIX (1959), p. 31".

**Let's now conclude this survey of Domitian's bad image, created by Tacitus, Pliny, Suetonius and Dio Cassius, as analysed by Handy (2015), Viscusi (1973), and by myself in this Study.**

After finished writing the I. Section of this *Preamble*, I read the article by Antony Augoustakis and Emma Buckley ("Man and God : Literature", 2021), who address among other subjects the bad image of Domitian, created by Tacitus, Pliny, Suetonius and Dio Cassius; adding to this also Martial's texts, which the author published *after* Domitian's assassination, and that have so far not been discussed here.

**Augoustakis and Buckley do not quote Handy's (2015) and Viscusi's (1973) accounts and base their results on the judgements of different modern commentators than Handy and Viscusi. Since Augoustakis and Buckley arrive at basically the same results as Handy and Viscusi before them, this allows the conclusion that, since quite some time, a great number of scholars is interested in this topic. - For example also the already mentioned Robert Sablayrolles (1994), who does not discuss Viscusi (1973), and who, in his turn, has been overlooked by Handy (2015), Augoustakis and Buckley (2021).**

Still other scholars, likewise not discussed by Augoustakis and Buckley (2021), or by any other contributor to the volume, edited by Raimondi Cominesi *et al.* (2021), who have contributed further important findings to the same subject, are discussed *infra*, in volume 3-2, at *A Study on the consequences of Domitian's assassination : Nerva is forced to adopt Trajan and Trajan creates Domitian's negative image to consolidate his own reign ...*; at Chapter VI.1. My 2. Conclusion: *In this context it is interesting to analyse the process by which Hadrian finally became emperor*; and at *The circumstances that had brought Trajan to Mogontiacum and Domitian's negative image, created by Tacitus and Pliny at the order of Trajan to legitimize his own accession.* - To this I will come back below.

Concerning those just-mentioned ancient writers, who have created Domitian's bad image, Augoustakis and Buckley (2021, 165), similarly like Handy (2015, 31-50) in the above-quoted passages, come to the following, in my opinion very convincing, conclusion:

**"Modern scholars, in particular, have cautioned us to remember that the denigration of Domitian in the voices of Martial, Pliny, and Tacitus is at the same time an 'unwriting' of their own previous selves, and a sophisticated self-fashioning for a new era [my emphasis]".**

**Aurora Raimondi Cominesi, Nathalie de Haan, Eric M. Moormann and Claire Stocks ("Introduction: Domitian, the Neglected Emperor Who Wished to Be God", 2021, 15) have come to a similar judgement :**

"The memory sanctions bestowed upon him [*i.e.*, the Emperor Domitian] by the Senate, and the blackest-possible portrait immortalised in writing by his contemporaries are proof of this mechanism of

power. **Tacitus, Pliny the Younger, or Suetonius, were all eager to wash away any memory of their own entanglements with his rule** [*i.e.*, of Domitian; my emphasis]".

And Nathalie de Haan, Eric M. Moormann, Aurora Raimondi Cominesi and Claire Stocks ("La Memoria Sepolta di Domiziano e una sua rivalutazione nelle mostre di Leiden e Roma", 2023, 17) write in the Italian version of their article of 2021:

"Le sanzioni alla memoria imposte dal Senato e il ritratto più cupo possibile reso per iscritto dai suoi [*i.e.*, Domitian's] contemporanei sono la prova di questo meccanismo di potere. **Tacito, Plinio il Giovane e Svetonio erano ansiosi di mondarsi d'ogni ricordo dei loro stessi intrecci con il governo di Domiziano** [my emphasis]".

**Contrary to Handy (2015) and Augoustakis and Buckley (2021), Raimondi Cominesi, de Haan, Moormann and Stocks (2021; *id.* 2023) mention also Suetonius in this context - but Suetonius was certainly not personally 'entangled with Domitian's rule' as these authors (erroneously) assert.**

As we have seen above, Suetonius (born circa AD 70), became only known as an author and scholar by AD 97, that is to say, *after* Domitian's assassination. Suetonius was closely connected with Trajan, which can explain that (and why) Suetonius created his negative image of Domitian; Suetonius was also closely connected with Hadrian. See for Suetonius also *infra*, in volume 3-2, at *Appendix I.b*) *Domitian's escape from the Capitolium - Introduction*.

An earlier book, edited by Antony Augoustakis, Emma Buckley and Claire Stocks has already been mentioned above (*Undamning Domitian? Reassessing the last Flavian princeps* [my emphasis]", 2019). Together with further partners, these scholars have recently, under a similar title, organized the following Conference at Rome:

#### **The Damned Despot : Rethinking Domitian and the Flavian World.**

This Conference was organized by Antony Augoustakis, Emma Buckley, Nathalie de Haan, Eric Moormann, Maria Paola Del Moro, Massimiliano Munzi, Claudio Parisi Presicce, Aurora Raimondi Cominesi, and Claire Stocks, and took place from 18th-21st January 2023, at the Capitoline Museums, the Royal Netherlands Institute (KNIR), and the British School (BSR), concurrently with the exhibition *Domiziano Imperatore. Odio e amore* (13 July 2022-29 January 2023), on display at the Capitoline Museums, Villa Caffarelli, which followed the exhibition *Emperor Domitian. God on Earth/ Keizer Domitianus God op aarde* at the National Museum of Antiquities in Leiden (17 December 2021-22 May 2022).

**After having finished writing the entire manuscript of the first volume of this *Study on Domitian*, reached me the exhibition-catalogue *Domiziano Imperatore. Odio e amore* (2023).**

The editors of this catalogue, Claudio Parisi Presicce, Massimiliano Munzi and Maria Paola Del Moro ("*Domiziano imperatore. Odio e amore*", 2023, 9-10) describe their own motivation and that of the scholars, attached to the exhibition on Domitian at the Museum in Leiden, to create this exhibition together.

They mention also that the new exhibition space of their museum, the 'Villa Caffarelli' has added a very special quality to their exhibition, by presenting Domitian 'in context', since the Villa Caffarelli was in part erected 'on top of' Domitian's (fourth) Temple of Iuppiter Optimus Maximus Capitolinus' [for a visualization of this fact; cf. the map here **Fig. 74**] :

"**Domiziano oggi**

...

**A seguito del rinnovato interesse per la famiglia imperiale dei Flavi, manifestatosi a partire dalle celebrazioni del bimillenario della nascita di Vespasiano, culminate a Roma nella mostra *Divus***

*Vespasianus* (2009-2010) e nei convegni *La Lex de imperio Vespasiani e la Roma dei Flavi* (2008), *Vespasiano e l'impero dei Flavi* (2009) e *L'Italia de Flavi* (2012) [with n. 1], sono emerse nuove linee di ricerca che hanno portato alla revisione della figura autocratica trasmessa dalla tradizione, filtrandola attraverso le lenti delle forze sociali che si rapportavano con l'imperatore. Ne è risultata un'immagine più complessa, in un certo senso bifronte: alla rappresentazione negativa, tramandata dalla storiografia antica filosenatoria, è venuta sempre più giustapponendosi una rivisitazione dai forti connotati positivi, che fa riferimento alle percezioni di Domiziano imperatore da parte della *familia*, dell'esercito e del popolo romano. La prova migliore di tale articolata complessità e antinomia percettiva è costituita proprio dal non generalizzato espletamento della *damnatio memoriae* [with n. 2].

Proprio per fare il punto sull'evoluzione degli studi e dunque sulla rinnovata valutazione del personaggio Domiziano è stato ideato il ciclo di mostre a lui dedicate a Leiden e a Roma.

### Una mostra contestuale: Domiziano e il colle Capitolino

... [page 10] ...

Quella [*i.e.*, the exhibition] romana è poi certamente una mostra contestuale. La sede espositiva capitolina rimanda direttamente e in modo significativo alla presenza di Domiziano. Il Campidoglio infatti non solo era l'*arx* della città, che dominava dall'alto con l'imponente tempio dedicato a Giove Ottimo Massimo, a Giunone e a Minerva, ma costituiva uno dei luoghi più cari all'ultimo dei Flavi, che qui avrebbe avuto per la prima volta prova del favore che gli era accordato dagli dei, trovando scampo dal sanguinoso attacco dei seguaci di Vitellio grazie al travestimento da sacerdote del tempio di Iside. La profonda dedizione per gli dei e, insieme, il sentimento religioso che lo portò a sentire su di sé la loro protezione, soprattutto quella di Minerva, ne determinarono il comportamento di attenta cura delle cerimonie e degli edifici sacri, la cui espressione più alta fu la lussuosa ricostruzione del tempio capitolino arso nell'incendio dell'80 d.C., ricordata e rivendicata dall'iscrizione incisa sull'architrave del portale: un gesto d'amore per gli dei e per la città che li onorava, in risposta all'amore ricevuto dagli dei e dalle persone amiche che lo protessero e lo aiutarono a fuggire e a nascondersi dall'odio dei sostenitori di Vitellio. Di questo fortissimo legame personale di Domiziano con i luoghi capitolini si è dunque tenuto conto nella scelta dello spazio espositivo di Villa Caffarelli, costruita sul Campidoglio ed impostata in parte proprio sulle fondamenta del Tempio di Giove [my emphasis].

In their **note 1**, Parisi Presicce, Munzi and Del Moro write: "[here is missing: "F. Coarelli 2009a"]; Acta Flaviana 1-3: Capogrossi Colognesi, Tassi Scandone 2008 [*corr.*: 2009] e 2009 [*corr.*: 2012]; Capogrossi Colognesi, Lo Cascio, Tassi Scandone 2012 [*corr.*: 2016]."

In their **note 2**, they write: "Tra gli ultimi: Gregori, Spinelli 2019".

In their **note 3**, they write: "de Haan, Moormann 2021; Raimondi Cominesi *et al.* 2021".

**To the above quoted passage of Parisi Presicce, Munzi and Del Moro (2023, 9-10), I should like to add some comments.**

*a)* As we have seen above, the editors of the essay volume (*God on Earth: Emperor Domitian. The re-invention of Rome at the end of the 1<sup>st</sup> century AD*, 2021) that accompanied the exhibition on Domitian at the Museum in Leiden, Nathalie de Haan, Eric M. Moormann, Aurora Raimondi Cominesi and Claire Stocks, name in the Italian version of their English text (cf. *id.* 2023, 15-16) different motivations for the joint exhibitions in Leiden and Rome than their Roman partners Parisi Presicce, Munzi and Del Moro (2023, 9-10).

That there was a difference between both projects is also apparent because of another fact: the exhibitions on Domitian at the National Museum of Antiquities in Leiden and at the Musei Capitolini, Villa Caffarelli in Rome, had *different* titles. Those differences are all the more remarkable, since eight of the 27 essays (published in English) of the volume accompanying the exhibition in Leiden (2021), have been re-published in Italian in the Roman exhibition catalogue of 2023, in most cases even unchanged. Apart from the 'Domitianic context', which only the Roman exhibition could provide, the exhibition projects at Leiden

and Rome, as explicitly stated by Aurora Raimondi Cominesi (*et al.* 2021, 15-16), and by Claudio Parisi Presicce (*et al.* 2023, 9) were based on different sets of previous publications on Domitian.

My own research on the recent revision of 'Domitian's bad image' was based on a third nucleus of research. Those publications were not considered by the scholars attached to the exhibition in Leiden, and very few of them by the scholars attached to the exhibition in Rome. This is also true for the scholars, whom I had at first consulted (myself included): in part for chronological reasons they could not yet consider the research, on which the exhibition in Leiden was based, nor did they consider (part of) the work that became the motivation to create the exhibition in Rome. I say 'part of', since Filippo Coarelli (*Divus Vespasianus*, 2009a) had kindly invited *me* to write a contribution for this exhibition-catalogue; cf. Häuber (2009).

As already mentioned above, I have summarized my relevant research not only in this Section I. of the Chapter *Preamble*, but also in a Chapter that is published *infra*, in volume 3-2, at *A Study on Domitian's assassination ...*; Chapter VI.1.; at *The circumstances that had brought Trajan to Mogontiacum and Domitian's negative image, created by Tacitus and Pliny at the order of Trajan to legitimize his own accession*.

My own relevant research was at first only based on: Peter L. Viscusi (1973), Helmut Halfmann (1979), Karl-Heinz Schwarte (1979), Geza Alföldy (1995), Karl Strobel (1985; 2003; 2010; 2019), Werner Eck (2000; 2002; 2007b; 2017), Markus Handy (2015) and Dietmar Kienast, Werner Eck and Matthäus Heil (2017). Compared with the other nuclei of publications, on which the scholars of the projects on Domitian in Leiden and in Rome have based their research, the approach of the scholars, whom I had at first consulted, differs in one respect. As the titles of my relevant Chapters indicate: these scholars are able to demonstrate that Domitian's bad image was intentionally created at the order of the Emperor Trajan.

After having now seen all three nuclei of new research on Domitian, I maintain my earlier judgement, at which I had arrived after having studied only two of those nuclei: the research, on which the 'scholars attached to the Leiden exhibition' had based their project, and the research that I myself had consulted. The scholars, on whose publications I have myself at first based, had begun their work much earlier, but, independently of them, the 'scholars attached to the exhibition on Domitian in Leiden' arrived at (almost) the same conclusions. This is also true for the 'scholars attached to the exhibition on Domitian in Rome'.

b) Parisi Presicce, Munzi and Del Moro (2023, 10, with n. 1) do not provide a reference for their statements concerning Domitian's dedicatory inscription on the architrave of the entrance of his (fourth) Temple of Iuppiter Optimus Maximus Capitolinus:

**"... il sentimento religioso [of Domitian] che lo portò a sentire su di sé la loro protezione, soprattutto quella di Minerva, ne determinarono il comportamento di attenta cura delle cerimonie e degli edifici sacri, la cui espressione più alta fu la lussuosa ricostruzione del tempio capitolino arso nell'incendio dell'80 d.C., ricordata e rivendicata dall'iscrizione incisa sull'architrave del portale: un gesto d'amore per gli dei e per la città che li onorava, in risposta all'amore ricevuto dagli dei e dalle persone amiche che lo protessero e lo aiutarono a fuggire e a nascondersi dall'odio dei sostenitori di Vitellio [my emphasis]"**.

Note that Stefano De Angeli (nor any other scholar known to me) does *not* provide the dedicatory inscription on the architrave of the entrance of Domitian's (fourth) Temple of Iuppiter Optimus Maximus Capitolinus, to which Parisi Presicce, Munzi and Del Moro (2023, 10) nevertheless refer. Cf. Stefano De Angeli ("Iuppiter Optimus Maximus Capitolinus, Aedes (fasi tardo-repubblicane e di età imperiale)", in: *LTUR* III [1996] 148-153). - I am mentioning De Angeli (1996) here, because Claudio Parisi Presicce and Eloisa Dodero (2023, 63 with n. 1) quote him themselves for Domitian's Temple of Iuppiter Optimus Maximus Capitolinus.

**Unfortunately, none of the dedicatory inscriptions on public buildings, erected by Domitian, has survived; cf. Gian Luca Gregori, Valerio Astolfi ("La damnatio memoriae di Domiziano. Iscrizioni e monumenti di Roma", 2023, 160) :**

**"Ben diverso invece il destino delle iscrizioni esposte sulla facciata dei numerosi edifici pubblici eretti a Roma da Domiziano e di cui effettivamente non sopravvivono esempi: il decreto senatorio di damnatio trovò in questo caso i suoi esiti più evidenti [with n. 12; my emphasis]"**.

In their **note 12**, Gregori and Astolfi write: "Suet. *Dom.* 5. Gregori, Spinelli 2019, pp. 245-248; Moormann in questo volume, pp. 57-62; de Haan 2021; Atnally Conlin 2021; sugli interventi urbanistici vd. [vedi] Cavalieri 2005 e Astolfi 2020/21".

**Addendum:** archaeological evidence from the Netherlands that supports what we have learned above from Peter L. Viscusi (1973, 53 with n. 25) concerning Domitian's decision to add the title *pia fidelis Domitiana* to the name of the legions stationed in Lower Germany, a passage that I repeat here again:

"In January of 89 A.D., Lucius Antonius Saturninus, the governor of Upper Germany, was hailed as emperor by the two legions stationed at Mogontiacum, XXI Rapax and XIV Gemina ... the revolt was promptly crushed by L. Appius Maximus Norbanus, governor of Lower Germany. In keeping with a Claudian precedent, Domitian rewarded the loyalty of the legions from Lower Germany by bestowing upon them the additional title of pia fidelis Domitiana. [with n. 25; my emphasis]".

Jasper de Bruin (2021, 63: "Domitian and the Lower German *Limes* (The Netherlands)"; Section: "Introduction") writes: "... recent research has also led o a reappraisal of the previously negative assessments of the Emperor Domitian in this area. Fairly recently, archaeological research in The Netherlands has provided more detailed information on the effects of Domitian's reign here".

Cf. de Bruin (2021, 68, Section: "Domitian and the Lower German *Limes*):

"Other building activities under Domitian took place in the auxiliary fort in De Meern near Utrecht, based on brick stamps of the *cohors I Classica* showing the honorary titles *pia fidelis Domitiana*, dated between 89 and 96 (fig. 5). These building activities suggest, again, that auxiliary units might have been 'rewarded' with new barracks. More evidence for a large scale refurbishment of the Lower German *limes* can be obtained from another rich source of information: constructions made from oak wood that are preserved under the high groundwater level in The Netherlands. There is a significant cluster of dendrochronological datings between 89 and 93 from heavily constructed quay works along the Lower Rhine (fig. 6) and even the first phase of the road that connected the forts (the *limes* road) can be dated to this period. [with n. 21] Erik Graafstal sees these activities in the light of the strategic completion of the *limes* along the Lower Rhine, as a conscious policy to strengthen this area before the Roman military could turn its attention to *Dacia*. [with n. 22] Graafstal's suggestion that Trajan executed these building programmes before he became emperor and that he was responsible for its completion after Domitian's death seems plausible. [with n. 23] **It implies that it was Domitian who laid the foundation for the successful reign of Trajan** [my emphasis]".

In his **notes 21-23**, de Bruin provides references.

Cf. der Bruin (2021, 68, Section: "Concluding Remarks"):

"It is clear, that archaeological research can provide a better understanding of the impact of Domitian's imperial policies at the Lower German *limes*, down to the level of individual forts and even rural settlements. It shows how increasingly entangled Rome had become with its frontier regions during the Flavian period. Moreover, the evidence suggests that up until the end of Domitian's reign, his foreign policy remained intact. **Although it is not clear if the emperor was personally involved in every decision, he also made no attempt to change this policy, indicated by the large-scale military building campaigns between 89 and 96. Therefore, the archaeological evidence is additional proof that the rehabilitation of Domitian as a competent emperor is indeed justified** [my emphasis]".

***Preamble; Section II. Conclusions: Domitian's representations of his military successes and his claims to be of divine descent and to possess a divine nature***

In Section I. of this *Preamble* has been summarized - at least part of - the scholarly discussion that relates *a*) to the various facets of Domitian's bad image, and *b*) to the questions, why and how that image was created. To this I have added *c*) the efforts of some modern commentators to find out the truth concerning points *a*) and *b*).

To come myself to an overall judgement of Domitian's actions, I will in the following add some information to Peter L. Viscusi's (1973) observations concerning Domitian's military campaigns that can hopefully further help us to understand Domitian's relevant decisions - at least in this sector of his 'professional duties' as Roman emperor.

In addition will be discussed the reproaches by some ancient authors that Domitian, with the way how he defined his relationship with the gods, and how he defined himself in regard to the divine, had transgressed what was regarded at his time as befitting an emperor.

***Domitian's military successes, as documented by his coin issues and by his official title***

Concerning Domitian's military successes, it is worth while to consider in the first place, how the emperor himself had decided to officially comment on this.

Domitian did this *a*) by his coinage: from AD 84-85 onwards, he issued his *GERMANIA CAPTA* series; cf. Anne Wolfsfeld (2014, 202, quoted *verbatim infra*). See also Reinhard Wolters and Martin Ziegert (2014, 55, 59-60).

But not only that, Domitian was *b*) also the first Roman emperor who added the victory name 'GERMANICUS' to his official title, 'which referred to Domitian's personal participation in a larger, victoriously ended military campaign'; Domitian's relevant innovation was continued by later emperors; cf. Sophia Bönisch-Meyer and Christian Witschel (2014, 161):

"Andere Titulaturbestandteile [of Domitian's official title] waren zwar tatsächlich innovativ, wurden aber von späteren Kaisern fortgeführt, so etwa der unter Domitian erstmals verwendete Siegerbeiname Germanicus, der auf die persönliche Teilnahme des Kaisers an einer größeren, erfolgreich abgeschlossenen militärischen Operation verwies".

It is well known, and has also been discussed by Wolters and Ziegert (2014, 59) and Wolfsfeld (2014, 203 with n. 113), that Vespasian had based his accession on his own victories in *Judaea* and those of his elder son Titus. We know, in addition to this, that Domitian should represent these facts and his own military victories again and again in countless monuments all over Rome.

In his own buildings, Domitian has constantly commemorated Vespasian's and Titus's victories.

Cf. Emmanuelle Rosso (2007, 140, quoted *verbatim infra*, at Chapter VI.3. *Summary of my own hypotheses concerning the Cancellaria Reliefs presented in this Study; Addition: My own tentative suggestion, to which monument or building the Cancellaria Reliefs may have belonged, and a discussion of their possible date*).

And for Domitian's constant commemoration of all the victories of his family, comprising his own victories; cf. Eugenio Polito (2009, 506, quoted *verbatim infra*, at Chapter V.1.i.3.b); at Section III.); see also *infra*, in volume 3-2, at *Appendix IV.d.4.b*).

### *The meaning of Domitian's cuirassed statues*

Anne Wolfsfeld (2014) adds to all this something else that I myself have not tackled in great detail in this *Study*, namely a discussion of Domitian's cuirassed statues, which, as Wolfsfeld is able to demonstrate, were likewise ubiquitous at Rome.

I have only discussed the two headless cuirassed statues of Flavian emperors (cf. here **Fig. 6, left and right**) the torso on **Fig. 6, right** is a possible portrait of Domitian).

For a discussion; see below, at *A Study on Hadrian's portrait-statue from Hierapydna* (cf. here **Fig. 29**); at *The second Contribution by Claudia Valeri Valeri on the two headless cuirassed statues of Flavian emperors at the Museo Chiaramonti* (inv. nos. 1250; 1254; cf. here **Fig. 6, left and right**); and *infra*, in volume 3-2, at *Appendix IV.c.2.*

**Of special interest in the context of this *Study* is the small fragment of a cuirassed statue of Domitian, published by Wolfsfeld (2014, 200 with n. 92, Fig. 6) [= here Fig. 5], which I did not even know before. This colossal marble portrait of Domitian was according to Klaus Stemmer (1971) originally 8 m high and was, in Wolfsfeld's opinion, 'presumably found on the Palatine or in its vicinity'.**

In the passages, quoted in the following *verbatim*, Anne Wolfsfeld (2014) comes to two convincing conclusions. First Domitian's military successes were absolutely crucial on a factual basis, since Domitian was the Roman emperor and precisely that was expected of any emperor by the contemporaries of that period. Second Domitian needed his actual military successes because of his 'personal "Siegesprogrammatik"', as Wolfsfeld (2014, 203) refers to the emperor's attitude to this subject.

As I should like to demonstrate with the following remarks, Wolfsfeld's relevant observations are corroborated by the results that I myself have obtained in this *Study*, independently of her research, and concentrating myself on totally different subjects.

But before turning to those subjects, I would like to illustrate Wolfsfeld's observation that his 'personal "Siegesprogrammatik"' was very typical of Domitian.

Wolfsfeld (2014, 2021) believes that the fragment of Domitian's colossal cuirassed marble statue (cf. here **Fig. 5**) was 'presumably found on the Palatine'.

In Anne Wolfsfeld's recently appeared book (*Die Bildnisrepräsentation des Titus und Domitian*, 2021, 130-131 with ns. 808-813 and Taf. 94,3 [= here **Fig. 5**]; Taf. 94,4 [= here **Fig. 5.1**], pp. 308-310, Nr. K4 with ns. 2063-2076) she repeats, in part *verbatim*, what she has already published in her text of 2014, discussed above, as well as in the following. - My thanks are due to Hans Rupprecht Goette for providing me with the relevant pages of Wolfsfeld's book (2021).

**Fig. 5. Fragment of a colossal cuirassed marble statue of 'Domitian as Iuppiter' (102 x 90 cm). This statue was, according to K. Stemmer (1971), hollow and, provided Domitian was represented standing, it was originally circa 8 m high, and because of the huge *gorgoneion* on the chest of his cuirass, it showed the emperor assimilated to the god Jupiter.**

This fragment is on display in the left hand one of the 'Trofei Farnese' in the cortile of Palazzo Farnese at Rome (cf. here **Fig. 5.1**). It may belong to Francesco Bianchini's finds (excavated 1720-1726, published 1738) within the 'Aula Regia' in Domitian's Palace on the Palatine, the 'Domus Flavia' / *Domus Augustana*. This has already been suggested by K. Stemmer (1971, 566, 579-580) on the basis of the documentation that is available for this fragment. See also F. Bianchini's (1738, 48-68, with Tab. II; Tab. VIII = both here **Fig. 8**) own documentation of his excavations comprising measured plans, and S. Cosmo's (1990, **Fig. 8** = here **Fig. 39**) findings concerning Bianchini's excavations.

For the photos illustrated here; cf. K. Stemmer (1971, **Abb. 3-6**); Photos: G. Singer; D-DAI-ROM-71.175-71.178. K. Stemmer's (1971, 571, **Abb. 7**) reconstruction drawing of this colossal cuirassed portrait of 'Domitian as Jupiter' is here reproduced after A. Wolfsfeld (2014, 215, **Abb. 6**).

**Fig. 5.1. The two 'Trofei Farnese' in the cortile of Palazzo Farnese at Rome. These are two ensembles of architectural fragments, mostly found by Francesco Bianchini in his excavations (1720-1726; published 1738) on the Palatine, within the 'Aula Regia' of Domitian's Palace 'Domus Flavia' / Domus Augustana. Cf. K. Stemmer (1971, Abb. 1 [here on the left], with the fragment of the colossal cuirassed marble statue of 'Domitian as Jupiter'; here Fig. 5), Photo: J. Felbermeyer, D-DAI-Rom 35.566. Cf. K. Stemmer (1971, Abb. 2 [here on the right], with a fragment of one of the slabs with a representation of a 'province', from the porticos of the Hadrianeum at Rome; cf. here Fig. 48), Photo J. Felbermeyer, D-DAI-Rom 35.567.**

Nevertheless Wolfsfeld (2014) does not discuss this sculpture in the context of Domitian's *Domus Augustana*, the Palace which the emperor had erected on the Palatine. - And that, although she herself, as I only noticed at a second moment; cf. Wolfsfeld (2014, 200, n. 92), indicates the current whereabouts of this fragment of a colossal portrait-statue of Domitian (here Fig. 5) as follows: "**Rom, Palazzo Farnese (verbaut in eine dekorative Fragmentkomposition u. a. [unter anderem] aus Architekturteilen vom Palatin ...** [my emphasis; cf. here Fig. 5.1, the so-called 'Trofei Farnese']". - The fragment of Domitian's colossal marble statue (here Fig. 5) appears on the 'dekorative Fragmentkomposition' in the left hand niche (cf. here Fig. 5.1, the photo on the left).

As we shall see below, the western part of Domitian's Palace, the so-called 'Domus Flavia' within his *Domus Augustana*, contained the 'Aula Regia', a grandiose reception hall. Francesco Bianchini (1738; cf. *infra*, at Chapter V.1.i.3.b); at Section II.; and at *The major results of this book on Domitian*) excavated the 'Aula Regia', drew measured ground-plans of it (cf. his Tab. II.; VIII. = both here Fig. 8) and discussed and illustrated his finds in exemplary fashion; his publication is available open access on the Internet. And because Bianchini documented in great detail the marble decoration of this hall (cf. F. BIANCHINI 1738, Tab. III.; IV. = here Fig. 9; cf. *infra*, at Chapter V.1.i.3.b); at Section III.), we know also that the major theme of the 'Aula Regia' was the celebration of Domitian's military victories; so Eugenio Polito (2009, 506, quoted *verbatim infra*, at Chapter V.1.i.3.b); at Section III.). Some of the fragments of the marble decoration of the 'Aula Regia', excavated by Bianchini, were assembled in decorative manner and are on display in the cortile of Palazzo Farnese at Rome. And because these finds contain the friezes illustrating trophies, that Bianchini had found within the 'Aula Regia', these marble fragments are in many scholarly publications referred to as the 'Trofei Farnese' (here Fig. 5.1); cf. Eugenio Polito (2009, 506) and François de Polignac (2009, 507). - To those publications I will come back below.

Wolfsfeld (2014, 200, n. 92) thus herself provides the information that the fragment of Domitian's colossal cuirassed statue (here Fig. 5) belongs to the famous 'Trofei Farnese'.

On 20th October 2021, Carlo Gasparri, who has published the sculptures once owned by the Farnese family (*Le Sculture Farnese. Storia e documenti*, 2007) was kind enough to answer my question concerning the 'Trofei Farnese' as they are sometimes called, since I was not sure whether the architectural fragments (cf. here Fig. 5.1) that are on display in the Cortile of Palazzo Farnese at Rome, and which I am discussing here, are those that are sometimes referred to by that name - which is actually the case, as Carlo told me.

Besides, (almost) all sculptural fragments which the 'Trofei Farnese' comprise, were certainly found in the excavations of the Farnese (1724-1730) on the Palatine, and most probably even likewise within the 'Aula Regia'; cf. François de Polignac (2009, 507, quoted *verbatim infra*, at Chapter V.1.i.3.b); at Section III.). That in reality not all of those finds, assembled in the 'Trofei Farnese' (here Fig. 5.1) come from the Palatine, has been discussed in detail by Klaus Stemmer (1971, 565, 579-580). This is especially clear in the case of those 'Trofei Farnese' (here Fig. 5.1, right; cf. K. STEMMER 1971, Fig. 2), which comprise one of the slabs with representations of 'provinces' from the porticos that surrounded the *Hadrianeum* in Rome (cf. here Fig. 48). For a list of all those reliefs, comprising this one; cf. Claudio Parisi Presicce (2005, 88, 91, note 54, who quotes M. SAPELLI 1999, 28-43, nos. 1-6). For the entire group of those reliefs; cf. Parisi Presicce (2005, 88-99, Figs. 17-22, plus colour photos of one of these fragments on p. 115).

But note that Stemmer (1971) himself suggests that the fragment of Domitian's colossal cuirassed statue (cf. here **Fig. 5**) may actually have been found *within* Domitian's 'Aula Regia' (!). To this I will come back below.

*Let's now turn to Domitian's overall theme of his 'Aula Regia', the reception hall within his 'Domus Flavia' / Domus Augustana: the celebration of his own military victories*

As Mario Torelli (1987, 578-579, quoted *verbatim* below, in Chapter *The major results of this book on Domitian*); and again *infra*, in volume 3-2, in *Appendix VI.*; at Section *VI.*, has rightly pointed out, it was not by chance that a temple of Iuppiter stood right in front of the façade of Domitian's 'Domus Flavia' / *Domus Augustana* on the Palatine, the epithet of which is debated. - I myself follow those scholars who identify this temple with that of Iuppiter Invictus; cf. *infra*, in volume 3-2, in *Appendix VI.*; at Sections *IV.*; *VII.*; *IX.*; and *X.* For a summary; cf. below, at Chapter *The major results of this book on Domitian*.

I am saying 'not by chance' because, according to the belief of the Romans themselves, it was their god Jupiter, who granted them their victories (cf. *infra*, at n. 431, in Chapter *III.*): 'At Jupiter's orders and under his guidance the Romans fought their wars, and to him they consequently attributed their military victories'.

To Domitian's very special relationship with Jupiter I will come back below. As we have already seen above, this fact has now also been stressed by Claudio Parisi Presicce, Massimiliano Munzi and Maria Paola Del Moro (2023, 10, quoted *verbatim supra*, in Section *I.* of his *Preamble*).

Another fact should likewise be considered in this context, and we may wonder, which one of the two was more important. Namely, that the welfare of the Roman state/ the Roman People could be regarded as directly depending on the most important 'state god' of the Romans, as he is sometimes called, namely Iuppiter Optimus Maximus Capitolinus, and, by implication, on the physical state of his temple. That the latter was actually believed became evident when, during the civil war, in the course of the siege of the *Capitolium* by the Vitellians on 18th/ 19th December AD 69, the (second) Temple of Iuppiter Optimus Maximus Capitolinus was completely destroyed by fire. For the (second) Temple of Iuppiter Optimus Maximus, dedicated by Q. Lutatius Catulus (cf. *infra*, at n. 181, in Chapter *I.1.*; and *infra*, in volume 3-2, at *Appendix I.c*); and at *Appendix I.d*); see now also C. PARISI PRESICCE and E. DODERO 2023, 68).

For the relevant events of AD 69, summarized in the following, as well as for Domitian's (fourth) Temple of Iuppiter Optimus Maximus Capitolinus; cf. now also Friderike Senkbeil (2022, 196-237).

As a result of this, "**the Gauls mistakenly believe that the destruction of the [second] Temple of Jupiter [Optimus Maximus] portends the end of Rome** [with n. 20; my emphasis]"; cf. Trevor Luke (2018, 198). In his **note 20**, Luke quotes for this statement Tacitus, *Hist.* 4,54. See also Flavius Josephus (*BJ* 7,4,2) for the uprising of some Germanic tribes in AD 70, likewise as a result of this civil war. For a discussion of both; cf. *infra*, in volume 3-2, at *Appendix I.c*).

Therefore, Vespasian hastened to restore this sanctuary by building the (third) Temple of Iuppiter Optimus Maximus Capitolinus (cf. *infra*, in volume 3-2, at *Appendix I.d*)).

Ernst Schulze (1873,1) has, therefore, aptly commented on this precarious situation as follows: "Im Jahre 70 [*corr.*: 69] n. Chr., ging während des Kampfes des Sabinus gegen die Vitellianer dieser zweite Tempel in Flammen auf. **Vespasian ließ es nach Wiederherstellung der Ordnung seine erste Sorge sein, den Tempel, das Unterpfand des Reiches, wiederherzustellen** ['it was Vespasian's first care to restore the Temple of Iuppiter Optimus Maximus Capitolinus, the pledge of the Roman Empire']; my emphasis]".

In the great fire of AD 80 also this (third) temple of Jupiter perished. Domitian built the (fourth) Temple of Iuppiter Optimus Maximus Capitolinus, and that, as we know now through the research of Claudio Parisi Presicce and Alberto Danti (2016; cf. *infra*, in volume 3-2, at *Appendix I.e*)), on a much larger scale than the first three temples, but at exactly the same site.

Previously, it had (erroneously) been taken for granted *that all four* Temples of Iuppiter Optimus Maximus Capitolinus had been erected at the gigantic scale which the extant remains seemed to indicate, which belong to its "platea di fondazione del Tempio di Giove Capitolino" ('the foundation platform of the Temple of Iuppiter Optimus Maximus Capitolinus', labelled on here **Fig. 74**: Temple of IOM). For that; cf. Claudio Parisi Presicce (2019, 33, Fig. 30). The (wrong) assumption that all four temples of Iuppiter Optimus Maximus had those gigantic proportions was seemingly corroborated by our relevant ancient literary sources. But as the recent excavations, conducted by Claudio Parisi Presicce and Alberto Danti (2016) have shown, all that was obviously *not* true.

Domitian's cult-statue in his (fourth) Temple of Iuppiter Optimus Maximus Capitolinus was copied very frequently in antiquity, not only in Italy, but especially so in the provinces, and there even in colossal format. Also the famous *Jupitersäulen*, so typical of the German provinces, are topped by statues of the god that are copies of the statue-type "Iuppiter Capitolinus"; cf. Martin Bossert (2000). Cf. *infra*, at *A Study on Domitian's cult-statue of Iuppiter Optimus Maximus Capitolinus* (cf. here **Fig. 10**).

**What was said above proves, in my opinion, more than anything else that the Roman emperor, so in this case Domitian, had to guarantee both, not only the welfare of the Roman Empire/ the Roman People, but also the *pax deorum*, because the former depended directly on the latter. And as if that were not complicated enough, the *pax deorum* was dependent of an additional condition - caused, as we have just seen, by the belief of some contemporaries that the gods could only act in the desired way, provided their temples were in excellent physical state (!).**

**The underlying assumption was obviously that the Roman emperor - in this case Domitian - could only guarantee all this because of his personal military prowess. No wonder, then, that Domitian himself propagated exactly the same doctrine.**

To this doctrine of the 'invincibility' of the Roman emperor, and Domitian's acceptance of it, I will come back below, in Section III. of this *Preamble*, and in Chapter *The major results of this book on Domitian*.

So far, this is also what Anne Wolfsfeld (2014) expresses in her below-quoted passages. - But that is by no means all what can be said about Domitian's self-representation. To this topic I will come back below, after quoting *verbatim* the text passages from Wolfsfeld (2014), to which I have referred to above. Those further findings relate to Domitian's escape from the *Capitolium* on 19th December AD 69, and concern Domitian's close relationship with Iuppiter Optimus Maximus Capitolinus.

**Only after having finished writing this Section II. of the *Preamble* so far, did I realize that Alexander Heinemann (2014, 240) has already commented on all these events as well.**

After mentioning Domitian's escape from the *Capitolium*, the destruction of the (second) and of the (third) Temple of Iuppiter Optimus Capitolinus, and of Domitian's erection of the (fourth) temple of Jupiter Capitolinus, Heinemann, in my opinion convincingly, connects all these events with Domitian's inauguration of the *Capitolia*, games in honour of Iuppiter Optimus Maximus Capitolinus, which as we have already heard above (cf. *supra*, in Section I. of this *Preamble*), Domitian had started in AD 86.

To this we may add an interesting information: the Roman branch of the famous association of Greek athletes, the *iera xystike synodos ton peri ton Heraklea athleton*, is documented in Rome from AD 46 until about 370; as is well known, their performances were related to the imperial cult. We know also that they were supported by Domitian and that they performed at his *Capitolia*; cf. Häuber (2014a, 673, 675-676).

**Finally, by characterizing the 'dedication, management and iconography of the *Capitolia*', Heinemann (2014, 250) comes to a similar conclusion as Ernst Schulze (1873, 1) and myself (as mentioned above) concerning the importance of Jupiter Capitolinus and of Domitian, by stating that: 'the dedication, management and iconography of the *Capitolia* confirm the undisputed positions of Jupiter Capitolinus and of the emperor as guarantors of the Roman Empire'.**

See also the title, which Andrea Carandini has chosen for a recent book: *Giove custode di Roma. Il dio che difende la città* (2016).

Alexander Heinemann (2014, 240; cf. p. 239), by referring to the above-mentioned events (*i.e.*, Domitian's escape from the *Capitolium*, the destructions of the (second) and of the (third) Temples of Iuppiter Optimus Maximus Capitolinus, and Domitian's erection of the (fourth) Temple of Jupiter), comments on Domitian's foundation of the *Capitolia* as follows: "Es ist kaum vorstellbar, dass die Gründung der Spiele [*i.e.*, of the *Capitolia*] zu Ehren des kapitolinischen Jupiter nichts mit diesen Ereignissen zu tun haben sollte, und in der Tat werden die dynastischen Bezüge durch die Einbindung der *sodales Flaviales* als Teil des zeremoniellen Leitungsgremiums explizit gemacht".

Cf. Heinemann (2014, 250) on the *Capitolia* and on the importance of Iuppiter Optimus Maximus Capitolinus and of the Roman emperor [Domitian]: "**Die *Capitolia* sind konzipiert für ein zunehmend vernetztes Reich ... An den entscheidenden Stellen - Zueignung, Leitung und Ikonographie der Spiele - formulieren sie die unangefochtene Stellung des Jupiter Capitolinus und des Kaisers als Garanten römischer Herrschaft** [my emphasis]".

Domitian presided the *Capitolia*, a festival he had inaugurated in honour of the most important state god of the Romans, Iuppiter Optimus Maximus Capitolinus, "in imposing Greek-style dress"; cf. Carole E. Newlands (2014, 322), a fact which has interested her, Alexander Heinemann (2014, 138-139, 250), and many other scholars. See for example Robert Sablayrolles ("Domitien, l'Auguste ridicule", 1994, 124, 125), according to whom the emperor's design of his games called *Capitolia* proved that 'Domitian, like Augustus before him, felt that it was the obligation of the emperor to care for all parts of the Empire':

"Ainsi fit-il [*i.e.*, Domitian] **inscrire des compétitions athlétiques et musicales de tradition grecque dans le programme des Jeux qu'il créa en l'honneur de Jupiter Capitolin, dieu romain par excellence** (Suétone, Domitien, 4). Le nouveau Stade et le nouvel Odéon abritaient ainsi une cérémonie célébrée en l'honneur du dieu le plus vénérable de Rome, **mais, dans ce cadre à la grecque, l'empereur présidait à cette liturgie profondément romaine en costume grec, comme le souligne perfidement Suétone qui décrit l'empereur et les flamines en sandales et en toge grecques mais coiffés d'une couronne d'or portant la triade capitoline**"; cf. p. 125: "**Même alliance de l'Orient et de l'Occident que dans les Jeux Capitolins à la grecque. Ce désir d'englober dans une perspective unique toutes les parties de l'empire et de ne pas limiter à Rome la sollicitude impériale est encore un trait de ressemblance entre Domitien et Auguste** [my emphasis]".

Domitian's *Capitolia*, as so many other of his innovative initiatives, turned out to be very successful indeed. The last epigraphic evidence for a winner in the *Capitolia* dates to AD 338 or 342; cf. Paolo Vigliarolo (2023, 104 with n. 26). - To the *Capitolia* I will come back below.

#### *Let's now turn to Anne Wolfsfeld's (2014) findings concerning Domitian's cuirassed portraits*

Anne Wolfsfeld (2014, 200) writes about the fragment of the colossal cuirassed statue of Domitian from the Palatine (cf. here **Fig. 5**) and other cuirassed portrait-statues of Domitian formerly on display there:

##### "5. Domitian im Panzer

Mit Domitian ist eine weitere Veränderung im Befund festzuhalten: die Panzerdarstellungen finden sich in einem erweiterten Repertoire an öffentlichen und privaten Bildträgern. **Nachdem weder für Vespasian noch für Titus lebenszeitliche Statuen kolossalen Ausmaßes bekannt sind, kann ein vermutlich vom Palatin oder seiner Umgebung stammendes Bruchstück mit einer in der Rekonstruktion ca. [circa] acht Meter hohen Panzerstatue Domitians (Abb. 6 [= here Fig. 5]) assoziiert werden.** [with n. 92] **Dafür sprechen sowohl die Monumentalität der Darstellung, die vermutete Herkunft vom Palatin und die stilistische Einordnung mittels der Ornamentik in flavische Zeit.** [with n. 93] **Martial erwähnt außerdem zahlreiche Statuen des Princeps am Aufgang zum Palatin** [with n. 94] **und auch einen *Palatinus colossus*,** [with n. 95] **der zumindest eine kolossale Statue Domitians auf dem Palatin voraussetzt. Zudem ist nach dem**

**neronischen Sonnenkoloss erst wieder mit dem *equus Domitiani* (s.[siehe] die Rekonstruktion Abb. 7) eine zu Lebzeiten eines Princeps errichtete, kolossale Statue gesichert.** [with n. 96; my emphasis]".

In her **note 92**, Wolfsfeld writes: "**Rom, Palazzo Farnese (verbaut in eine dekorative Fragmentkomposition u. a. [unter anderem] aus Architekturteilen vom Palatin [= here Fig. 5.1]). Ruck (2007) 172. 280 Nr. 7 Taf. 15,3f.; Kreikenbom (1992) 106. 218 Nr. III 101; Stemmer (1971) 563-580 Abb. 1. 3-8 [my emphasis]**".

In her **note 93**, she writes: "Ruck (2007) 172 Anm. 772; Stemmer (1971) 573f."

In her **note 94**, she writes: Mart. 1,70,5f."

In her **note 95**, she writes: "Mart. 8,60".

In her **note 96**, she writes: "Die Überlieferung basiert auf Stat. Silv. 1,1 in Verbindung mit einem Sesterz-Revers von 95/96 n. Chr. (RIC II.1 797 [Domitian]); zur Rekonstruktion s. Coarelli (2009) 81-83 Abb. 19-21; Bergemann (1990) 164-166; Stemmer (1971) 575-579; zum *equus* bei Statius s.[siehe] in diesem Band den Beitrag von Cordes S. 346-355".

**To Wolfsfeld's (2014, 200) following passage, I should like to add a comment :**

"Martial erwähnt außerdem zahlreiche Statuen des Princeps am Aufgang zum Palatin [with n. 94] und auch einen *Palatinus colossus*, [with n. 95, quoting: "Mart. 8,60"] der zumindest eine kolossale Statue Domitians auf dem Palatin voraussetzt".

**See now Jane Fejfer (2021, 78 with n. 22), who, after discussing Domitian's colossal *Equus Domitiani*, mentions Domitian's *Palatinus colossus*, known from Martial (8,60), suggests that the marble fragment (here Fig. 5) had possibly belonged to this *colossus* :**

"Another Domitian statue of enormous proportions in Rome, the *Palatinus colossus*, is lost as well, apart from a possible related fragment of its cuirass. [with n. 22]".

In her **note 22**, Fejfer writes: "Wolfsfeld 2014, 200 with fig. 6 [= here Fig. 5]". Cf. Fejfer (2021, 80): "We do not know how Domitian's portrait of the *Equus Domitiani* and the *Palatinus colossus* looked [like], whether they showed the Emperor in a now lost pathetic three-dimensional portrait type".

**One of Wolsfeld's (2014, 200, with n. 96) above-quoted statements is not true, namely that "nach dem neronischen Sonnenkoloss [ist] erst wieder mit dem *equus Domitiani* (s.[siehe] die Rekonstruktion Abb. 7) eine zu Lebzeiten eines Princeps errichtete, kolossale Statue gesichert".**

This had already been asserted by Klaus Stemmer (1971, 574-575), but in the meantime Mario Torelli (1987, 579), Cécile Evers (1991, 796 with note 66), both quoted *verbatim* below, in Chapter *The major results of this book on Domitian*); and again *infra*, in volume 3-2, in *Appendix VI.*; at Section VI.; and Claudia Lega ("Colossus: Nero", in: *LTUR I* [1993] 296), have reminded us of the fact that, according to Dio Cassius (66,15,1), Titus had ordered that Nero's *colossus*, the portrait features of Nero Vespasian had ordered to change into the features of the Sun god, were now again changed - into a portrait of Titus (!).

If so, Domitian's *Equus Domitiani*, depending on how high that was, must **a**) either even have looked 'modest', when compared with the near-by 36 m high gilded (?) bronze *colossus* of Titus which, when sparkling in the sunshine, must have been a spectacular sight; or **b**) may intentionally have 'counterbalanced' the *colossus* of Nero/ Titus, as has already been suggested by some other scholars; cf. *infra*, at Chapter *The major results of this book on Domitian*.

For further discussion of the *colossus* of Nero/ Titus; cf. Häuber (2014a, 704 with n. 100); and most recently Pier Luigi Tucci (2022, 224-225, with Fig. 20, Section: "Il Colosso").

See also *infra*, in *A Study on the colossal portrait of Hadrian (now Constantine the Great) in the courtyard of the Palazzo dei Conservatori at Rome (cf. here Fig. 11) ...*; at Part I. *The statue of Hadrian (now Constantine the Great) in the courtyard of the Palazzo dei Conservatori (cf. here Fig. 11), the inscription (CIL VI 974 = 40524; cf. here Fig. 29.1), and the cult-statue of Divus Vespasianus in the Temple of Divus Vespasianus. With The Contribution by Hans Rupprecht Goette on the reworking of the portrait of Hadrian (now Constantine the Great); summarized below, in Chapter *The major results of this book on Domitian*.*

**In the following, Wolfsfeld (2014, 202-204) continues her discussion of Domitian's other cuirassed statues:**

"Die Münzprägung hilft dieses gattungswise disparate Bild der dreidimensionalen Panzerdarstellung zu konkretisieren. Vor Regierungsantritt taucht Domitian im Panzer nur sehr zurückhaltend gegenüber der militärischen und sieghaften Darstellungen der Judäa-Sieger auf, da er, anders als sein Bruder Titus, an diesem Erfolg nicht beteiligt war ...

Neben diesen nur isoliert auftretenden Panzerdarstellungen werden die militärischen Leistungen Domitians auf dem Revers schon in den frühen Jahren seiner Herrschaft thematisiert. Bereits 84-85 n. Chr. werden die ersten Bronzemünzen mit dem militärisch aktiven Kaiser und die erste *Germania-Capta*-Serie geprägt. [with n. 110] Ab 85 n. Chr. scheinen sich vier auf die Germanensiege bezogene Reversmotive mit dem Princeps im Panzer in der stadtrömischen Sesterzprägung etabliert zu haben und wie- [page 203] derholen sich jährlich bis zum Ende seiner Regierungszeit. [with n. 111] ...

Die zwei vermutlich vor Regierungsantritt entstandenen, aus Nero umgearbeiteten Panzerstatuen suggerieren entgegen der raren Münzzeugnisse eine auch für Domitian als 'Prinz' übliche Darstellung im Panzer. Es lässt sich hingegen ein Mangel an Büsten, Kameen und Militaria konstatieren, **so dass sich die erhaltenen Panzerdarstellungen mehrheitlich auf den öffentlichen Raum konzentrieren. Die Panzerfigur scheint sich dort nun vollends etabliert zu haben.**

**Augenscheinlich ist die hauptsächlich in der Münzprägung durch Abhebung auf militärische Aktivität und die damit verbundenen Erfolge zu Tage tretende Siegesprogrammatische Domitians.** Die misenische Reiterstatue und die anhand des erhaltenen Bestands anzunehmende hohe Anzahl von Panzerstatuen stützen diese These für die öffentliche Repräsentation; das Relieffragment aus Castel Gandolfo **und die kolossale Statue vom Palatin** [cf. here Fig. 5] **ließen den Aspekt der militärischen *virtus* des Kaisers dann auch in den weniger öffentlichen Bereichen in Erscheinung treten.** Der gleichzeitig Sieg und Frieden verkörpernde *equus Domitiani* beanspruchte und dominierte zudem den zentralen Platz Roms in der Mitte des alten republikanischen Forums. **Der klar nach außen getragene militärische Aspekt der Herrschaft setzte nunmehr eine umfassende Akzeptanz dieser kaiserlichen Rolle - und ein massives Bedürfnis nach ihr bei den Auftraggebern von Ehrungen - voraus, die durch die Leistungen der flavischen Vorgänger vorbereitet wurde. Der Katalysator für die einschlägig militärische Repräsentation der Flavier war sicherlich der herrschaftslegitimierende Sieg über Judäa.** [with n. 113] Domitian spielte in dieser Zeit gegenüber dem älteren Bruder eine untergeordnete Rolle, **was sich dann nach seinem Regierungsantritt mit kontinuierlichen militärischen** [page 204] **Expeditionen, seiner persönlichen Anwesenheit an der Front und vier in Rom gefeierten Triumphen änderte.** Die Nachfolge von Titus zu Domitian verlief zwar unproblematisch, aber **offenbar bestand nun ein besonders hoher Bedarf, die höchste Position im Prinzipat durch militärische Leistungen zu untermauern** [my emphasis]".

In her **note 110**, Wolfsfeld writes: "RIC II.1 205 (Domitian); *Germania Capta*: RIC II.1 274 (Domitian), das Reversmotiv wiederholt sich in den Folgejahren bis 88-89 n. Chr."

In her **note 111**, she writes: "Exemplarisch für die vier Motive: RIC II.1: 1) 278; 2) 279; 3) 470; 4) 474 (Domitian). Diese vier Reversmotive kehren in den Buntmetall-Emissionen von 85-96 n. Chr. als Set oder einzeln wieder".

In her **note 113**, she writes: "Zur Rolle Judäas in der Repräsentation der Flavier s.[iehe] Coarelli (2009 [*i.e.*, here F. COARELLI 2009b]) 68-97; Eck (2006) 570-578; Millar (2005) 102-128; Beard (2003) 543-558; Pfanner (1983) 99-102; zu den *Iudaea Capta*-Prägungen s.[iehe] exemplarisch: RIC II.1 163-169. 233-236 (Vespasian)".

*So what is still missing in the analysis of Domitian's self-advertisement, as asserted above? We need, in my opinion, to add Domitian's relationship with the gods and his (only alleged?) belief to be himself divine*

Domitian had, for example, the personal patron goddess Minerva, whose son he propagated to be (cf. *infra*, at **n. 240**, in Chapter I.2.). Not by chance, therefore, Wolters and Ziegert (2014, 54-55, 60) stress the at times

overwhelming number of Domitian's coin-types that show representations related to Minerva. Considering Domitian's 'personal "Siegesprogramm", so Wolfsfeld (2014, 203), it does not surprise at all that Domitian may have equated himself with Jupiter, a possibility suggested or even taken for granted by previous scholars, that Wolters and Ziegert (2014, 62), and Bönisch-Meyer and Christian Witschel (2014, 147) have therefore discussed again, but without finding any definite positive results. Other contributors to the same volume judge this subject differently. - To this we will now turn.

**Take for example Lisa Cordes (2014, 355-356), who analyses "die Inszenierung der Göttlichkeit des Princeps [i.e., of Domitian]", and precisely, his "Parallelisierung mit Jupiter".**

I have chosen Cordes's above-mentioned example to be quoted below *verbatim* for the following reasons. Cordes (2014, 355-356) discusses Statius (*Silvae* 1,6, called *Saturnalia principis*), in which the poet describes a spectacular event, which Domitian, in December of AD 89, during the *Saturnalia*, had staged at the Colosseum. Domitian had invited the people of Rome not only to an exuberant banquet, he presented them also with very generous gifts. - By the way, both of which typical customs at the *Saturnalia* (cf. *infra*). Cordes (2014, 356 with n. 48) suggests that Domitian may thus have celebrated his double triumph of AD 89, which, because of the date of this triumph 'November/ December AD 89', sounds perfectly possible.

I am especially interested in Cordes's (2014, 355-356) example, because I suggest in this *Study* that Domitian, on Frieze A of the Cancelleria Reliefs (cf. here **Fig. 1**), may be represented in his *profectio* ceremony at Rome at the beginning of AD 89, after which he had left for *this war*. In addition, the decoration of Domitian's *Forum/ Forum Nervae/ Forum Transitorium* may likewise commemorate (possibly *inter alia*) Domitian's triumph of AD 89. The latter hypothesis has already been suggested by Amanda Claridge (2010, 169).

For a discussion; cf. *infra*, at Chapter VI.3. *My own tentative suggestion, to which monument or building the Cancelleria Reliefs may have belonged, and a discussion of their possible date; below, at Chapter The major results of this book on Domitian; and infra, in volume 3-2, at Appendix IV.d.2.f).* As mentioned above, Domitian celebrated this triumph in November/ December of AD 89.

We may wonder, why Domitian had chosen a date in December of AD 89 (instead of choosing rather one in November) to celebrate his triumph together with the people of Rome, inviting them to this extraordinary banquet, which Statius (*Silvae* 1,6) has 'documented' for us. Before suggesting my own idea, let me add another observation by Lisa Cordes, who analyses such acts of euergetism under the perspective, which guides all the contributors of the volume, edited by Bönisch-Meyer *et al.* (2014): namely the transgressions of both Nero and Domitian, and how they can be defined in detail.

Cordes adds to this spectrum of transgressions her analyses of panegyric texts, written to praise Nero and Domitian. Interestingly these panegyric texts all start with actual facts, namely that during the reign of both emperors building activities and acts of euergetism had reached dimensions that by far exceeded what had been usual before. In contrasting both emperors with these achievements, the panegyric authors then intentionally blur the differences between these emperors and the gods, as Cordes suggests, to the effect that she comes to the following conclusion: one of the central themes of these panegyric texts, dedicated to Nero and Domitian, is to assert that both emperors possess a divine nature.

**Lisa Cordes (2014, 341) begins her Section 1. on panegyric texts, which were written to praise Nero and Domitian, as follows :**

"1. Die Ambivalenz des Herrscherlobes

In der literarischen Panegyrik für Nero und Domitian spielt das Motiv der Erweiterung und Transgression von Grenzen eine zentrale Rolle. Die Dichter preisen die Entfaltung einer nie dagewesenen Pracht in der Bautätigkeit und im Euergetismus, sie beschreiben die Imposanz der Spektakel bei Spielen und Volksfesten und verwischen oder negieren bei der Darstellung des Herrschers die Grenzen zwischen Mensch und Gott. So werden Kolossalität und Glanz in der panegyrischen Dichtung ebenso wie in der bildenden Kunst

wichtige ästhetische Kategorien; [with n. 1] die Monumentalisierung des beschriebenen Gegenstandes und **die Inszenierung der Göttlichkeit des Kaisers sind zentrale Gestaltungsprinzipien des neronischen und domitianischen Herrscherlobes** [my emphasis]".

In her **note 1**, Cordes writes: "Cancik (1965), (1990)".

Instead of using such texts as arguments 'against' Domitian (or Nero), we should, in my opinion, ask ourselves: *what else* we might expect from a panegyric text than 'hyperbolic praise'? Interesting seems to me, therefore, quite a different question: do we have such panegyric texts for *all* Roman emperors, or only for a few, and are the latter, because they allowed authors to praise them in this way, *therefore* judged negatively by modern commentators? - As we shall see below, Klaus Stemmer (1971) and Claire Stocks (2021), to mention only those two scholars, judge these panegyric texts, written to praise Domitian, very differently.

**Lisa Cordes (2014, 355-356), in her Sections 3. and 3.1., comments on Domitian's Saturnalia principis, described by Statius (Silvae 1,6), as follows :**

"3. Die positive Kodierung von Göttlichkeit: Statius' *Silvae* 1,6

Als Beispiel für die Inszenierung und positive Kodierung von Göttlichkeit [in the case of Domitian] soll im Folgenden das sechste Gedicht aus Statius' erstem Silvenbuch betrachtet werden. [with n. 47] Darin beschreibt der Dichter die *Saturnalia principis* (82), ein opulentes Fest, das Domitian an den Kalenden des Dezember wohl im [page 356] flavischen Amphitheater [*i.e.*, the Colosseum] für die Hauptstadtbevölkerung ausrichtete. [with n. 48] **Neben der Darstellung der unermesslichen Fülle an Speisen und Geschenken, die der Kaiser in der Arena verteilen lässt, steht im Gedicht die Inszenierung der Göttlichkeit des Princeps im Vordergrund. Diese basiert auf seiner Parallelisierung mit Jupiter.** Mit den Ambivalenzen, die eine solche Darstellung birgt, geht Statius auch hier bemerkenswert offensiv um und tritt negativen Lektüren derselben explizit entgegen.

3.1. Lenkung des Lesers zum *preferred reading* einer Metapher

**In den Versen 9-27 beschreibt Statius die Geschenke, die Domitian von einem über das Theater gespannten Seil auf die Besucher fallen lässt, [with n. 49] mit dem Bild des Regens. Die Metapher dient zum einen dazu, die Fülle der gebotenen Gaben anschaulich darzustellen, zum anderen ermöglicht sie die Inszenierung von Domitians Göttlichkeit, die in der Benennung des Princeps als *Iuppiter noster* (27) gipfelt** [my emphasis]".

In her **note 47**, Cordes writes: "Zu diesem Gedicht vgl. Cancik (1965) 100-108; Nauta (2002) 397-402; Newlands (2002) 227-259; Leberl (2004) 181-199; Elm (2012) 243-246".

In her **note 48**, she writes: "Möglicherweise fand das beschriebene Ereignis im Rahmen der Feierlichkeiten zu Domitians Doppeltriumph über die Chatten und Daker im Jahr 89 statt. Vgl. Nauta (2002) 396f. [my emphasis]".

In her **note 49**, she writes: "Vgl. 10: *iam bellaria linea pluebant*. Dazu Vollmer (1898) 305: "Die Näschereien fielen von einem über das Amphitheater gespannten Seile unter das Volk", mit Hinweis auf Mart. 8,78,7f. Killeen (1959) hält die *linea*, die Martial erwähnt, für eine Art Hängematte".

**Most recently, Daniëlle Sloopjes ("Entertainment and Spectacles during Domitian's Rule", 2021, 121 with n. 18; ead. 2023, 88 with n. 18) has commented on the Saturnalia principis (Statius, Silvae 1,6).**

Sloopjes (*op.cit.*) comes, in my opinion, to the convincing conclusions that Domitian himself liked to organize such events, at which he was always present, presiding the spectacles, and that he was especially good in showing the People of Rome his commitment to them. The People of Rome, in their turn, had, therefore, very much appreciated the way the emperor had entertained them :

**"Domitian seems to have liked public spectacles as he ``constantly gave grand and costly entertainments, both in the amphitheatre and in the Circus ... Besides he gave hunts of wild beasts, gladiatorial shows at**

night by the light of torches, and not only combats between men but between women as well." [with n. 18] **Notably, Domitian was personally engaged by being present even "amid heavy rains," by presiding at competitions or by showering the people with gifts.** [with n. 19] **Similar to the case of Augustus, personal imperial engagement and an attentive attitude of Domitian towards the audience and performers seems to have been presented and valued as an advantageous characteristic of a ruler ...**

This overview of the way in which Suetonius presented the first twelve Caesars and their organization of public spectacles has shown that **the emperors used it in particular to offer the people of Rome pleasant and even spectacular performances in various venues as an expression of their relationship with their subjects.** As the last of Suetonius' Caesars, **Domitian was presented in this respect in similar fashion as his predecessors. He behaved as an emperor was supposed to act in his attempt to secure his subject's respect and loyalty. Even more, his personal attention and interest at public shows gives the reader the impression that he was particularly good at showing his people his commitment to them [my emphasis]."**

In her **note 18**, Sloopjes writes: "Suet. *Dom.* 4. Cf. Statius, *Silv.* 1.6.51-56, *Kalendae Decembres*. For a modern study on female gladiators, see McCullough 2008".

In her **note 19**, she writes: "Suet. *Dom.* 4".

*Let's now turn to my own interpretation of Domitian's choice  
to invite the people of Rome to a banquet during the Saturnalia of AD 89*

Because Domitian had himself serious personal reasons to celebrate the *Saturnalia* anyway, it is tempting to believe that he, in December of AD 89, had thus decided to celebrate, together with the People of Rome, his double triumph together with something else: the *Vicennalia* of his famous escape from the *Capitolium*.

**I argue that, because of these experiences in December of AD 69, Domitian had this close relationship with Iuppiter Optimus Maximus Capitolinus, of which also many contributors to the volumes, edited by Bönisch-Meyer *et al.* (2014) and by Raimondi Cominesi *et al.* (2021), are convinced. So, by the way, also Frederick G. Naerebout (2021, 148). But because these authors approach this subject differently, as we shall see below, I find it worth while to present here in the following my own relevant results.**

**See now also Claudio Parisi Presicce, Massimiliano Munzi and Maria Paola Del Moro (2023, 10, quoted *verbatim supra*, in Section I. of this *Preamble*), whose exhibition-catalogue on Domitian reached me only after this entire *Preamble* had already been written. For similar reasons as suggested here, they too believe that Domitian had a close relationship with Jupiter Capitolinus.**

But note that Parisi Presicce, Munzi and Del Moro (2023, 10) do not explicitly state, to which summit of the Capitoline Hill Flavius Sabinus and his men (comprising Domitian) had withdrawn on 18th December AD 69. Consequently, they do not suggest, the *aedituus* of which temple on the Capitoline Hill had saved Domitian from the Vitellians. The same is true for the essay, written by Claudio Parisi Presicce and Eloisa Dodero for this catalogue ("*Il Campidoglio di Domiziano*", 2023), which is why these authors come to very different conclusions concerning all these subjects than suggested in this *Study* by myself. In addition to this, they assume the (wrong) date 17th/ 18th December for the siege of the Vitellians of the Capitoline.

For a discussion of the hypotheses of Claudio Parisi Presicce and Eloisa Dodero (2023); cf. *infra*, in *A Study on Domitian's cult-statue of Iuppiter Optimus Maximus Capitolinus* (cf. here **Fig. 10**); at Part II. *The Capitoline Triad in statuette format at Guidonia Montecelio (Roma), Museo Civico Archeologico 'Rodolfo Lanciani'* (cf. here **Fig. 13**) and the colossal statue of Jupiter at the Hermitage (cf. here **Fig. 10**).

**We owe to Parisi Presicce and Dodero (2023, 63), in addition to this, the following, very convincing judgement concerning Domitian's (fourth) Temple of Iuppiter Optimus Maximus Capitolinus:**

"L'occasione di questo intervento [to erect the fourth Temple for Jupiter Capitolinus] è il devastante incendio dell'80 d.C., **preziosa opportunità per l'imperatore [i.e., Domitian] ``maniaco della costruzione''** [with n. 6] **di plasmare Roma a propria immagine e somiglianza** [my emphasis]".

In their **note 6**, Parisi Presicce and Doderò write: "Plut. *Publ.* 15, 5-6".

*Let's now turn to Domitian's experiences on 18th and 19th December of AD 69.*

On 18th/ 19th December AD 69, the soldiers of the Emperor Vitellius (*i.e.*, the Vitellians) had laid siege on the *Capitolium*, where Vespasian's brother, the *praefectus urbi* Flavius Sabinus and his men, comprising Domitian (henceforth: the Flavians), had found refuge on 18th December. Concerning the controversy, to which summit of the Capitoline Hill Sabinus and his men had withdrawn, to the *Arx* or to the *Capitolium*, I hope to have found additional evidence to support the old conviction that Sabinus and his men were staying within the *area Capitolina* - *i.e.*, the sacred precinct of the (second) Temple of Iuppiter Optimus Maximus Capitolinus - on the *Capitolium* proper, when the Vitellians laid siege on this citadel. But I have, of course, also discussed in detail the hypotheses of those scholars, who believe that Flavius Sabinus and his men had withdrawn to the *Arx* instead.

For all that, see below, Section III. of this *Preamble*; at point 1.) and *infra*, in volume 3-2, at *Appendix I.d) Domitian's escape from the Capitolium on 19th December AD 69, which happened on the festival of the Opalia, one day of the Saturnalia*; at *Appendix I.f.1.) The procession, which Domitian joined, the festival of the Opalia on 19th December, the Saturnalia, and the festival of Fors Fortuna on 24th June*; at *Appendix II.a)*; and at *Appendix IV.*

*My own hypothesis concerning Domitian's escape from the Capitolium on 19th December AD 69*

We know that Flavius Sabinus and his men (comprising Domitian) withdrew to the Capitoline on 18th December AD 69. I follow those, who believe he had found refuge within the *Area Capitolina*, the sacred precinct of Iuppiter Optimus Maximus Capitolinus on the *Capitolium* proper (cf. here **Figs. 58; 73**). We know also that Domitian's escape from the Capitoline occurred on 19th December, and that the Temple of Ops Opifera in *Capitolio* stood within the *Area Capitolina*. I myself suggest that a procession marched each 19th December (so also in AD 69) from the Temple of Ops Opifera in *Capitolio* down to the *Forum Romanum*; and because Domitian had been advised to join this procession, he could escape from the Capitoline.

My hypothesis is based on the following observations: the Egyptologist Alfred Grimm (1997, 128) has rightly observed that 19th December was *not* a festival of Isis but the day of the *Opalia*, and that Ops could be equated with Isis. Grimm (1997, 123, quoted *verbatim* and discussed *infra*, in volume 3-2, at *Appendix I.c)*; and at *Appendix I.d)*) writes also that the "Saturnali[a] ... erano altrettanto legati alle cerimonie isiache".

As Franz Xaver Schütz has pointed out to me, the *Opalia* were part of the *Saturnalia*. The *Opalia* were celebrated at a cult place called 'Ops ad Forum', also called *sacellum* of Dis Pater (Saturn) and Proserpina (Ops), which stood next to the Temple of Saturn in the *Forum Romanum*, and that was also called *Mundus* (cf. here **Figs. 58; 71**). Ops and Saturn were believed to be spouses and were both related to the golden age.

Since Saturn was equated with Dionysus/ Osiris, and Osiris in his turn with Serapis, Saturn's close connection to Ops/ Isis becomes understandable. As already mentioned, the Temple of Ops Opifera in *Capitolio* stood within the *Area Capitolina*, the sacred precinct of the Temple of Iuppiter Optimus Maximus Capitolinus. We also know that behind the Temple of Ops in *Capitolio* there stood an altar of Isis *deserta*.

I, therefore, suggest:

a) that on each 19th December there was a procession of the priests and adherents of Ops in *Capitolio* and of Isis *deserta* that went in the morning down to the *Forum Romanum* in order to join the festival of the *Opalia*;

b) that this procession was usually joined by the priests and adherents of Isis *Capitolina*, whose temple stood on the near-by *Arx*;

c) that Domitian had been advised by the freedman of the *aedituus* of the Temple of Iuppiter Optimus Maximus Capitolinus, who had hidden Domitian in his house next to the temple of Jupiter in the night of 18th/19th December, to join on the following morning this procession in the guise of an *Isiacus* or of a priest of Isis; and -

d) that Domitian had done this, clad in the garments of an *Isiacus* or of a priest of Isis, and (possibly also) with his head shaven.

Cf. below, in Section III. of this *Preamble*, at point 1.); and *infra*, in volume 3-2, at *Appendix I.b) - Appendix I.d)*; and at *Appendix I.i)*.

Already Erika Simon had asserted (1963, 10, quoted *verbatim infra*, at n. 181, in Chapter I.1) that Domitian had allegedly written an epos >Kampf um das Kapitol<. According to Eric M. Moormann (2022, 150), Domitian, before himself becoming emperor, had actually written some literary texts. In his **note 93**, Moormann writes: "See, for example, Coleman (1986); Nauta (2002) 328 ...". See also *infra*, in Section III. of this *Preamble*; below, at Chapter I.1.; and *infra*, in volume 3-2, at *Appendix I.d.1.a)*; and at *Appendix IV.d.4.b)*.

Even provided Domitian had also *himself* the intention to be compared with Jupiter at this banquet in December of AD 89, described by Statius (*Silvae* 1,6,27, who calls Domitian: "*Iuppiter noster*"; but see below) - this could possibly somehow be explained with his escape from the Capitoline precisely 20 years earlier. Jupiter had 'himself' rescued Domitian on 18th/19th December AD 69 : since the *aedituus* of the Temple of Iuppiter Optimus Maximus Capitolinus had hidden Domitian overnight in his house that stood close to the Temple of Jupiter, and his freeman had given Domitian the decisive advice to join the procession of the priests and adherents of Ops in *Capitolio*, of Isis *deserta* and of Isis *Capitolina* the next morning (cf. *supra*).

Because of all this, Domitian had at first styled himself as 'protected by Jupiter', or as 'the son of Jupiter', and that by means of the design of the cult-statue of his Temple of Jupiter Custos. Under the reign of his father Vespasian, Domitian had already built at the former site of the house of this *aedituus* of Iuppiter Optimus Maximus Capitolinus his 'modest *sacellum*', dedicated to Iuppiter Conservator, and, as soon as he had himself become emperor, his 'huge temple of Iuppiter Custos'. Here Domitian had ordered a representation of himself which proclaimed that he was 'protected by Jupiter', or that he was 'the son of Jupiter': I am suggesting this, because the cult-statue of this temple was a seated Jupiter, who held a portrait of Domitian on his lap. For all of this; cf. Tacitus (*Hist.* 3,74,1; discussed *infra*, in volume 3-2, at *Appendix I.d)*).

Many contributors to the volumes, edited by Bönisch-Meyer *et al.* (2014) and by Raimondi Cominesi *et al.* (2021) discuss Domitian's escape from the *Capitolium* and his erection of a *sacellum*, dedicated to Iuppiter Conservator and of a Temple of Iuppiter Custos, but without addressing the controversy, where the Vitellians had laid siege on Sabinus, on the *Arx* or on the *Capitolium*. - These scholars thus mention the dedications of these shrines as an explanation for their own conviction that Domitian had a very close relationship with Iuppiter Optimus Maximus Capitolinus, but without addressing the question, why Domitian had thanked *Jupiter* at all for his salvation by building first this *sacellum*, and later this huge temple.

**The only exception of all these scholars being Frederick G. Naerebout (2021, 148), who rightly states: "Because Jupiter had saved Domitian's life in 69, when an *aedituus*, sacristan, of the Capitoline Temple hid him from the Vitellian forces"; quoted in more detail and discussed *infra*, in volume 3-2, at *Appendix I.b) Domitian's escape from the Capitolium - Introduction*.**

See now also Claudio Parisi Presicce, Massimiliano Munzi and Maria Paola Del Moro (2023, 10, quoted *verbatim supra*, in Section I. of this *Preamble*), who have arrived at a similar conclusion as Naerebout (2021, 148), and now also myself, by assuming that Domitian was convinced 'that the gods had saved his life'. But note that, contrary to Naerebout (2021, 148), neither Parisi Presicce, Munzi and Del Moro (2023, 10), or Parisi Presicce and Dodero (2023) explicitly state, to which summit of the Capitoline Hill Flavius Sabinus and his

men (comprising Domitian) had withdrawn on 18th December AD 69. Consequently, they do not explicitly suggest, the *aedituus* of which temple on the Capitoline Hill had saved Domitian.

Among those scholars, whose contributions are published in the essay-volume, that accompanied the exhibition on Domitian at Leiden, Eric M. Moormann's (2021, 47-48) interpretation of Domitian's escape is significantly different from my own. Moormann (*op.cit.*) follows those authors, who have suggested that Domitian must have been hiding at the house of the *aedituus* of the Temple of Isis *Capitolina*, which stood on the *Arx*. Those scholars, whom Moormann follows, argue as follows:

- a) otherwise Domitian could not have disguised himself as a priest of Isis; consequently they assume -
- b) that Flavius Sabinus and his men must have found refuge on the *Arx*; they assume -
- c), in addition to this, that Domitian had (allegedly) later built a new Temple for Isis *Capitolina*.

For a discussion of this controversy; cf. *infra*, in volume 3-2, at Appendix I.d).

Besides, when reading the accounts of Domitian's escape from the *Capitolium* on 19th December AD 69, even those written by authors who were hostile to Domitian, for example Tacitus and Suetonius, it does not come as a real surprise that Domitian was convinced to 'enjoy the favour of Iuppiter Optimus Maximus Capitolinus'. - For all that; cf. *infra*, in volume 3-2, at Appendix I.

I, therefore, anticipate here a passage that was written for Appendix I.d): 'Many scholars, who have discussed the Cancellaria Reliefs, have stressed Domitian's close relationship not only with Minerva, but also with Jupiter; according to T.P. Wiseman (1978, 175), the latter fact was already stressed by Suetonius (*Dom.* 5,4). I therefore quote here in the following the version of these events, as reported by Tacitus (*Hist.* 3.74.1), because he provides a good explanation for Domitian's relevant feelings for Jupiter ...'.

Apropos, Lisa Cordes's (2014, 355-356) remark concerning Statius (*Silvae* 1,6): "... **die Inszenierung von Domitians Göttlichkeit, die in der Benennung des Princeps als Iuppiter noster (27) gipfelt**".

Claire Stocks (2021, 91), by referring to the same panegric texts, written by Martial and Statius in order to praise Domitian, remarks as follows on the comparison in these texts of Domitian with the gods: "... **or to make humorous comparisons between the Emperor and the gods** [my emphasis]".

Klaus Stemmer (1971, 576), in his detailed discussion of Statius's texts, comes to the following conclusion: "Die Silven ... sind also zugleich **Begriff der Kaiserreligion** ... [with note 70a; my emphasis]".

For the term 'Kaiserreligion', which was by no means coined to characterize texts that intended to praise Domitian; cf. Mario Torelli, who already used the term: "teologia imperiale" (cf. *id.*: "Providentiae, Ara", in: *LTUR* IV [1999], 166); and Häuber (2014a, 720 with n. 284, p. 721 with ns. 301-305, p. 728).

**Since we have just discussed Domitian's escape from the Capitoline Hill on 19th December AD 69 (as I believe from the *Capitolium* proper; cf. here Figs. 58; 73), I was surprised to find that it seems still to be debated, who had been first to locate the Temple of Iuppiter Optimus Maximus Capitolinus right there.**

**I, therefore, allow myself in the following a digression on this subject: It was Rodolfo Lanciani who, in 1876, published three times his (correct) observation that the Temple of Iuppiter Optimus Maximus Capitolinus stood on the southern summit of the Capitoline Hill, the *Capitolium*.**

I anticipate in the following some passages, written for and discussed in more detail *infra*, in volume 3-2, at Appendix I.e) *It is conceivable that Vitellius (cf. Suet., Vit. 15,3), on December 19th AD 69, could actually have watched the fighting on the Capitolium, while staying at the 'Domus Tiberiana' on the Palatine :*

'In his 'Notes from Rome' of "April 1st, 1876, Vol. 2527, 470-1", published in the English journal *The Athenaeum*, Lanciani wrote: " ... Let us start from the Capitol where the S.E. [south-east] corner of the

platform of the Capitolium [*i.e.*, of the Temple of Iuppiter Optimus Maximus Capitolinus] was found, the other day, in building the new stables of the German Embassy. The horses of his Excellency Herr von Keudell fed in the very cella of Jupiter Capitolinus! Shades of Tarquinius, of Catulus, of Augustus, of Vespasian, and Domitian! such is the fate of the most venerable sanctuary of the Roman World, which you built or restored. Arminius is not yet satisfied, and the threatening words against the Latin race, pronounced lately by an Imperial personage in the forest of Teutoburg, are not a vain boast of national pride". Cf. Anthony L. Cubberley (1988, 9-10) ...

Lanciani did not tell the readers in his just quoted 'Notes from Rome' of "April 1st, 1876 ...", that he had himself only shortly before identified the true location of the Temple of Iuppiter Optimus Maximus Capitolinus; this question was hotly debated at the time and most scholars assumed this temple on the *Arx* instead. Lanciani recognized in the architectural remains that occurred in the building site of the 'Sala ottagonata', that was to open on February 25th, 1876, the Temple of Iuppiter Optimus Maximus. The 'Sala ottagonata' was a new wooden exhibition hall of the Musei Capitolini (which existed from 1876-1903), erected at the site of the former 'kitchen garden' (called: Giardino Romano) of the Palazzo dei Conservatori, which was located between that Palazzo and the Palazzo Caffarelli. For the 'Sala ottagonata'; cf. also Alberto Danti (2001, 329 with n. 17).

Lanciani announced his important findings concerning the Jupiter temple in his opening speech of this new pavilion. - Today the Equestrian statue of Marcus Aurelius is on display in a new hall of the Capitoline Museums that was erected at the site of the former Giardino Romano/ 'Sala ottagonata'.

Cf. Lanciani (1876, 1-2) - this is his printed opening speech, delivered on February 25th, 1876, when the 'Sala ottagonata' was inaugurated. In March of 1981, Eugenio La Rocca was so kind as to give me access to the copy owned by the library of the Musei Capitolini; cf. Häuber (1991, 17 with n. 59). Maddalena Cima (2008, 139-140, quoted *verbatim infra*), reports on (obviously later) conducted excavations, for which parts of the Palazzo Caffarelli had been destroyed in the hope to find more remains of the Temple of Iuppiter Optimus Maximus; those finds were, as she writes, at the time neither officially announced, nor published. To those excavations, and to the most recent ones, conducted in the area from 2008-2014 by Claudio Parisi Presicce and Alberto Danti, and published in the exhibition-catalogue *Campidoglio mito, memoria, archeologia* (2016), I will come back below.

**Concerning Lanciani's spectacular identification of the true location of the Jupiter temple, I have written elsewhere:**

"Es war das erklärte Ziel der Städtischen Archäologischen Kommission Roms, mit dem 'Provisorium' der Sala ottagonata an die Öffentlichkeit zu appellieren, rasch einem Museumsneubau für die Funde aus den Ausgrabungen zuzustimmen [with n. 299]. **Dieses Ziel wurde nicht erreicht, aber es gehört zu den wissenschaftlichen 'Triumphen' im Leben des rührigen '1. Sekretärs' der Kommission, R. Lanciani, daß bei der Fundamentierung der Sala ottagonata Reste des Jupiter Optimus Maximus Tempels zutage kamen, die er umgehend publizierte, und deren (korrekte) Identifizierung er gegen heftige Widerstände erfolgreich verfochten hat** [with n. 300; my emphasis]". Cf. Häuber (1991, 81).

Cf. my **note 299**: "R. Lanciani 1876, 20f". Cf. my **note 300**: "BullCom 3, 1875, 165-189, Taf. 16-18; 4, 1876, 32f.; ders. in: *The Athenaeum* Nr. 2516 vom 15.1.1876; Cubberley ... [*i.e.*, here A.L. CUBBERLEY 1988] 1f. [quoted *verbatim infra*]; ders. ebd. [ebenda] 2527 vom 1.4.1876; Cubberley ebd. [ebenda] 9f. [this is the passage quoted above]".

**Claudio Parisi Presicce and Eloisa Dodero (2023, 63, n. 1) do not give Lanciani credit for having been first to recognize the correct location of the Temple of Iuppiter Optimus Maximus Capitolinus on the Capitolium proper, and for having proven this hypothesis. The authors write instead: "... sui primi tentativi di localizzazione [of the Temple of IOM] ancora fondamentale Jordan 1885, pp. 8-35 [my emphasis]**".

Since Lanciani was able to identify the Temple of Iuppiter Optimus Maximus 'thanks to Domitian', I quote here also the relevant passage from his very first letter, which Lanciani wrote to *The Athenaeum*.

In his 'Notes from Rome' of "January 15th, 1876, Vol. 2516, 96-7", Lanciani wrote:

"The place of honour belongs at the moment to the discovery of the temple of Jupiter Capitolinus. On the 7th of last November, while digging was going on for the foundation of a new hall [*i.e.*, the 'Sala ottagonata'] of the Museum of the Capitol, in the garden [*i.e.*, the Giardino Romano] which separates the Palazzo dei Conservatori, from the palazzo Caffarelli (the German Embassy), **a fragment was brought to light of a colossal column of Pentelican marble**, as well as part of the substructure of a temple, constructed of squared stones, placed one on top of the other, without mortar, and in quite archaic style. **Such a find, taken by itself, would have no great importance, but taken along with other discoveries on the same spot, made on previous occasions, it proves, beyond doubt, that the Temple of Jupiter Capitolinus was on the western summit - Monte Caprino.** We know from Dionysius Halicarnassus that the basement of the temple was 207 ½ feet long, 192 ½ broad; secondly, from Livy, that the platform on which the sanctuary rose was surrounded [!] by a gigantic substructure, classed by the elder Pliny among the marvels of Rome; **and from Plutarch, that the temple rebuilt by Domitian for the fifth and last time was of Pentelic marble** [my emphasis]. - **In the following, Lanciani described many other fragments of the temple's marble decoration that had been recorded in previous centuries;** cf. Anthony L. Cubberley (1988, 1-2).

Thus not only 'thanks to Domitian', Lanciani had been able to identify the Jupiter temple, but, of course, also because he was working at the time on his monumental work 'Storia degli Scavi di Roma e Notizie intorno le Collezioni Romane di Antichità'; cf. Lanciani (1902-1913, I-IV; id. 1989-2000, I-VII), in which he has documented those earlier finds.

Apropos, Domitian's Temple of Iuppiter Optimus Maximus. Contrary to what Lanciani wrote in the above-quoted passage, it is currently believed that Domitian built the fourth (not the fifth) temple; cf. Lawrence Richardson Jr. (1992, 223), who, like Lanciani, mentioned also Augustus: "Augustus restored it [*i.e.*, the 2. temple] at great expense, but without the addition of his name (Augustus, RG 20)"; cf. Suetonius (*Dom.* 5,4, and *supra*, n. 181 and at n. 182, in Chapter I.1.) ...

As we have heard above, Lanciani, in his 'Notes from Rome' of "January 15th, 1876, Vol. 2516, 96-7", had mentioned "a colossal column of Pentelican marble", that (taken together with earlier finds in the same area) had led him to locate Domitian's (fourth) Temple of Iuppiter Optimus Maximus Capitolinus right there.

Alberto Danti (2016, 215-217: "cat. III.2,9,11,12" and "figg. 7, 8; cat. III.2.10,12,13") has now published all the fragments of colossal columns found in this area, which, because of their proportions and their material 'Pentelic marble', Danti likewise attributes to Domitian's Temple of Iuppiter Optimus Maximus Capitolinus (and I wonder whether Lanciani's column is among those fragments) ... Danti (2016, 215) does not say that this fragment of a shaft of a column of Pentelic marble (his Fig. 8), which was found in 1875, as Danti writes, was perhaps the one that had led Lanciani in his 'Notes from Rome' of "January 15th, 1876, Vol. 2516, 96-7", to locate Domitian's (fourth) Temple of Iuppiter Optimus Capitolinus in this area - as I ask myself.

Also Claudio Parisi Presicce and Eloisa Dodero discuss now the just-mentioned fragmentary column shaft, carved from Pentelic marble, that was published by Alberto Danti (2016, 216, his Fig. 8); cf. Parisi Presicce and Dodero (2023, 66 with n. 30):

"Vd. [vedi] in particolare Danti 2016, pp. 215-217"; cf. p. 67, Fig. 2. The caption of this illustration reads: "Fig. 2: Roma, Musei Capitolini, depositi. Frammento di rocchio di colonna, marmo pentelico, età domiziana (da Danti 2016, p. 216, fig. 8) (Sovrintendenza Capitolina ai Beni Culturali, Musei Capitolini, foto Zeno Colantoni) [my emphasis]"'. .

*Let's now return to our main subject, the list of reproaches, made by ancient authors, who were hostile to Domitian, and that concern Domitian's relationship with the gods and his (only alleged?) belief to be himself divine*

*The most famous among those reproaches was that Domitian had demanded to be addressed in public as 'dominus et deus'*

The well-known reproach of the ancient 'anti-Domitian' literary sources, according to which Domitian had demanded to be addressed as '*dominus et deus*', not only in official ceremonies at Rome, but also in official texts, has already been refuted by John Pollini (2012). Sophia Bönisch-Meyer and Christian Witschel (2014, 118-121), after carefully discussing the available ancient evidence, have come to the same conclusion.

I anticipate here the quote from John Pollini: "... Although it has been asserted that Domitian wished to represent himself as a living god on earth, including the demand that he be called *Dominus et Deus* ('Lord and God'), no evidence in official art or documents substantiates this claim. Domitian was, however, the first living Princeps to be represented in official monuments accompanied by Olympian gods, as in Panel A of the Cancelleria Reliefs in the Vatican's Museo Gregoriano Profano [cf. here Fig. 1; Figs. 1 and 2 drawing]. Only in nonofficial literature and art was Domitian directly compared to or equated with the gods, following a long-standing private encomiastic tradition ... [my emphasis]". Cf. *infra*, at Chapter I.2., with n. 227: "Cf. J. POLLINI 2012; the quote is from ... p. 452, n. 153, which refers to p. 438."

Bönisch-Meyer and Witschel (2014, 118) write concerning the reproach that Domitian had demanded to be officially addressed as '*dominus et deus*': "... soll Domitian darüber hinaus einen gänzlich neuen und ungewöhnlichen Titulaturbestandteil eingeführt haben, nämlich die Anrede des Herrschers als 'Herr und Gott' (*dominus et deus*) – und dies auch in offiziellen Schriftstücken. Das behaupten zumindest die Domitian feindlich gesonnenen, nach seinem Tod entstandenen literarischen Quellen, insbesondere Sueton [my emphasis]", quoting in the following Sueton (*Dom.* 13,1-2). - Cf. p. 121, where the authors refute this reproach.

Already in his earlier essay, Frederick G. Naerebout ("Domitian and Religion", in: A. RAIMONDI COMINESI *et al.* 2021, 150) has stated the following:

"Domitian is also said to have suggested, or decreed according to later authors, that he should be addressed henceforth as *dominus et deus*, which would mean that he entertained extreme ideas about his own divinity, but it is unlikely to be true. [with n. 41; my emphasis]".

In his note 41, Naerebout writes: "Dominik 1994, 158-159, Witulski 2010, 71. On all aspects of deification under Domitian: Chabrečková, 2017".

Most recently Frederick G. Naerebout (2022) has discussed the untestified reproach, according to which Domitian had demanded "to be addressed in public as *dominus et deus*" (in his review of R. MARKS and M. MOGETTA 2021) :

"[Egidio] Incelli's paper is the only one to deal with Domitian's policies from an institutional/legal point of view, especially his relationship with the Senate. The title of his paper, 'An Ambiguous Attitude' could also describe his own appraisal of Domitian: a worthy successor to Augustus in outsmarting the Senate, but ever more authoritarian and isolated, and thus digging his own grave. Incelli's analysis is generally finely balanced, but he still buys the black legend about Domitian, most obviously by accepting unquestioningly that he wanted to be addressed in public as \*dominus et deus\* (249). If Domitian was in so many respects a new Augustus, why would he have neglected Augustus' important (life-saving) lesson on postponing divinity until after death (at least in Rome)? [my emphasis]".

But not only some other scholars, who have contributed to the essay volume, edited by Aurora Raimondi Cominesi (*et al.*, *God on Earth: Emperor Domitian*, 2021), follow the untestified reproach that Domitian demanded to be addressed in public as *'dominus et deus'*; this is also true for some scholars, who have written articles for the exhibition-catalogue *Domiziano Imperator. Odio e amore*, edited by Claudio Parisi Presicce (*et al.* 2023). To the statements of those scholars we will now turn.

André Lardinois and Ineke Sluiter, who have written the preface to the essay volume *God on Earth: Emperor Domitian* ("Preface: Anchoring a New Emperor", 2021, 10) write for example:

**"Domitian started 'new traditions' and found legitimation in them. One area in which this is apparent is religion. Some of his innovations in this area were more successful than others. In presenting his role as that of god on earth, he extended the familiar post mortem deification (bestowed, e.g., on Caesar and Augustus) beyond the acceptable and relatable [my emphasis]"**.

Lardinois and Sluiter, although adding footnotes to other subjects in their preface, do not provide references for the most important of their statements, according to which Domitian (allegedly) presented "his role as that of god on earth".

In my opinion, also the editors of the essay volume *God on Earth: Emperor Domitian* (2021), Aurora Raimondi Cominesi, Nathalie de Haan, Eric M. Moormann and Claire Stocks, do not provide a proof for the assertion, which the title of this volume implies, according to which 'Domitian presented his rôle as that of god on earth', to borrow the phrasing of Lardinois and Sluiter (2021, 10).

See Aurora Raimondi Cominesi, Nathalie de Haan, Eric M. Moormann and Claire Stocks ("**Introduction: Domitian, the Neglected Emperor Who Wished to Be God** [my emphasis]", 2021, pp. 13-17).

Raimondi Cominesi, de Haan, Moorman and Stocks (2021, 16) explain in their *Introduction* the design of their essay volume: "**Section Five ('Man and God')** considers how we should respond to an emperor who actively marketed himself as a god on earth. We consider this from three approaches: **Frederick G. Naerebout** focuses on religion under the Flavians, whilst **Diane A. Conlin** investigates how the divine and imperial intersect in the art and architecture of Domitian's reign. Finally, **Antony Augoustakis and Emma Buckley** consider the literary sources on Domitian both during and after his reign, and the effect that this has had upon how the emperor has been received [my emphasis]"

As we have seen above and shall also see below, I myself have likewise studied the articles of those three scholars, mentioned by Raimondi Cominesi, de Haan, Moormann and Stocks (2021, 16), but have come to completely different conclusions concerning their results than they themselves.

1.) **Frederick G. Naerebout** (2021, 155), in his *Contribution to God on Earth: Emperor Domitian*, and even more explicitly so in his article of 2022 (both quoted *verbatim supra*), **regards the assertion, that Domitian had demanded to be addressed in public as *dominus et deus*, as being "unlikely to be true [my emphasis]"**;

2.) **Diane A. Conlin** (2021, 157, quoted in more detail *infra*) **asserts that, after AD 89, "Domitian embraced the responsibilities of his role as sole *imperator* and master (*dominus*) of Rome [my emphasis]"**. - But, in my opinion, she does not provide proofs for this assertion;

3.) **Antony Augoustakis and Emma Buckley** (2021, 165) state: "**it is clear that Domitian's distinctive personality, his comfort with autocracy and his desire to be divine does catalyse new modes of literature of and for the Emperor [my emphasis]"**. In my opinion, this is not true, for two reasons:

a) Lisa Cordes (2014, 341, quoted *verbatim infra*) has demonstrated that these "new modes of literature of and for the Emperor", to use the phrasing of Augoustakis and Buckley (2021, 165), which, in their opinion, were (allegedly) developed under Domitian, had already been applied for the Emperor Nero;

b) Augoustakis and Buckley (2021, 162; cf. p. 165, quoted in detail *verbatim infra*) thus refer to the judgements of Domitian by: "Martial, Statius and the Flavian epicists". But this type of literature cannot possibly prove that Domitian had demanded to be addressed *in public* as *dominus et deus*.

See John Pollini (2012, 452, n. 153, quoted in more detail above): "**Only in nonofficial literature and art was Domitian directly compared to or equated with the gods, following a long-standing private encomiastic tradition ...** [my emphasis]".- To this I will come back below.

The four editors of *God on Earth: Emperor Domitian* have also themselves contributed essays to this volume. But only Nathalie Haan (2021, 118, quoted in more detail *verbatim infra*) refers in her own essay explicitly to the reproach, according to which Domitian wanted to be addressed in public as *dominus et deus*. In her discussion of Domitian's Palace on the Palatine, de Haan (2021, 118) even suggests that Domitian actually *was* '*dominus et deus*': "**he [i.e., Domitian] was no longer the *princeps civium* but rather *dominus et deus*** [my emphasis]". - As said above, this reproach is, in my opinion, unjustified.

Let's now turn to those scholars in detail, who have written contributions for the essay volume *God on Earth : Emperor Domitian* (2021) and who have addressed this subject.

Jane Fejfer ("The Image of the Emperor: Seeing Domitian 2021, 73) writes: "Through biography people have engaged with and made sense of a portrait, today and in the past: does Domitian look like an emperor, or does he come across as a ruler who demanded that his subjects address him as *dominus et deus*?". Cf. Fejfer (2021, 74): "And does his [i.e., Domitian's] portrait image provide evidence which supports the traditional reading of Domitian as an Emperor who radically converted the imperial office from principate to monarchy, and of the Emperor from being *primus inter pares* to *dominus et deus*? Cf. Fejfer (2021, 81): "**A variety of sources, material and written touch upon Domitian's religious innovations and divine ambitions: Statius comments on Domitian's divine look in the *Equus Domitiani*, as discussed above, other authors that he demanded to be addressed as *dominus et deus*.** [with n. 44; my emphasis]".

In her **note 44**, Fejfer writes: "Bönisch-Meyer/Witschel 2014, 121".

But note that Jane Fejfer's statement is in a certain sense misleading, since she leaves out the judgement of those authors: Sophia Bönisch-Meyer and Christian Witschel (2014, 118-121) discuss in great detail the reproach in some ancient literary sources, according to which 'Domitian had demanded to be addressed in public as *dominus et deus*'. But note that, as a result of their analyses, Bönisch-Meyer and Witschel (2014, 121), which Fejfer (2021, 73, n. 44) refers to, *refute* this reproach.

Nathalie De Haan ("Between Magnificence and Misery: Living Conditions in Metropolitan Rome", 2021, 118) writes: "Grand scale building in the public sphere was one thing, but commissioning a palace with the dimensions and opulence in decoration such as Domitian's residence on the Palatine was another. The unconcealed splendour of his private dwelling showed from a far distance already that he was no longer the *princeps civium* but rather *dominus et deus*". - In the Italian version of her article (2023), this passage has not been repeated.

Diana Atnally Conlin ("Master and God: Domitian's Art and Architecture in Rome", 2021, 157) writes: "During his fourteenth consulship and soon after completing his second campaign on the Danube against the Dacians in 89, Domitian embraced the responsibilities of his role as sole *imperator* and master (*dominus*) of Rome".

Antony Augoustakis and Emma Buckley ("Man and God: Literature", 2021, 162) write: "Martial consistently visualizes Domitian's power as divine, the impact of his presence as awe-inspiring, and the effects of his presence as miraculous. The Emperor is featured as the most noble conqueror of Rome's enemies even from a young age (*Ep.* 2.2), a true god (*deum*, 5.3), and on occasion as 'master and god' (*dominus et deus*) [with n. 22]".

In their **note 22**, Augoustakis and Buckley write: "E.g. 5.8.1, 7.34.8, 8.2.6".

Augoustakis and Buckley (2021, 165), after analysing the ancient literary sources that discuss Domitian (at his lifetime and after his assassination), come to the following conclusions, parts of which have already been quoted *verbatim supra*, in Section I. of this *Preamble*:

**"The sharp distinctions between 'Domitian' and 'after Domitian'; the construction of Domitianic silence and slavery, versus post-Domitianic *libertas*; the extent to which imperial policies, imperial panegyric and even imperial self-representation changed very much after Domitian, is still up for debate. Modern scholars, in particular, have cautioned us to remember that the denigration of Domitian in the voices of Martial, Pliny, and Tacitus is at the same time an 'unwriting' of their own previous selves, and a sophisticated self-fashioning for a new era. At the same time, it is clear that Domitian's distinctive personality, his comfort with autocracy and his desire to be divine does catalyse new modes of literature of and for the Emperor. Domitian's own father Vespasian had downplayed imperial associations with divinity, joking on his deathbed, so Suetonius tells us, "Oh dear, I think I'm becoming a god." [with n. 39] Augustus, the first Emperor and exemplary model for all who came after, claimed status only as 'first citizen' (*princeps*), and 'first among equals' (*primus inter pares*). Nero, the last Julio-Claudian Emperor and avowed 'anti-type' for the Flavian dynasty, at least set out (again, as Suetonius tells us) claiming to rule by the watchwords of generosity, mercy, and affability (*comitas*). Such efforts to level citizen and emperor are conspicuously lacking in evocations of Domitian in Martial, Statius and the Flavian epicists. A new vision of imperial power is embodied, one that aims to get close – but not too close - to a new conceptualization of the Emperor as god on earth. [with n. 40; my emphasis]"**

In their **note 39**, Augoustakis and Buckley write: "*Vesp. 23.4: uae, puto deus fio*".

In their **note 40**, they write: "For further reading, see Augoustakis/Buckley [corr.: Buckley]/Stocks 2019, Jones 1992, Leberl 2004, König/Whitton 2018, Ley 2016, Nauta 2002".

**To the above-quoted conclusion of Augoustakis and Buckley (2021, 165): "it is clear that Domitian's distinctive personality, his comfort with autocracy and his desire to be divine does catalyse new modes of literature of and for the Emperor [my emphasis]", I should like to add some comments :**

Neither Raimondi Cominesi, de Haan, Moormann and Stocks (2021, 13-17), or Augoustakis and Buckley (2021, 159-165) discuss the *Contributions* to the following volume: *Nero und Domitian. Mediale Diskurse der Herrscherrepräsentation im Vergleich* [my emphasis], edited by Sophia Bönisch-Meyer, Lisa Cordes, Verena Schulz, Anne Wolfsfeld and Martin Ziegert (2014).

As already mentioned: in this volume, Sophia Bönisch-Meyer and Christian Witschel (2014, 118-121), exactly like Augoustakis and Buckley (2021, 159-165), discuss in great detail the reproach in some ancient literary sources, according to which 'Domitian had demanded to be addressed in public as *dominus et deus*'. As a result of their analyses, Bönisch-Meyer and Witschel (2014, 121) refute this reproach. I myself have followed above the relevant judgement of Bönisch-Meyer and Witschel (2014, 118-121), but realize now that, in the opinion of Augoustakis and Buckley (2021, 165), this entire complex of subjects, "is still up for debate".

Also after reading the account by Augoustakis and Buckley (2021), I maintain my earlier judgement to follow Bönisch-Meyer and Witschel (2014) in this respect. But because Augoustakis and Buckley (2021) have overlooked the volume, edited by Bönisch-Meyer (*et al.* 2014), in my opinion only scholars, who have studied *this entire discussion*, will be able to say, whether or not my relevant judgement is correct.

Let's now turn to my comments on Augoustakis and Buckley (2021, 165) in detail:

1.) Augoustakis and Buckley (2021, 165) mention only Augustus's 'official' image, according to which Augustus claimed nothing more than the status "'first citizen' (*princeps*), and 'first among equals' (*primus inter pares*)".

Contrary to that 'official' image, we shall see below, that already Augustus had been identified with Jupiter; cf. Häuber (2014a, 727 with n. 64; cf. p. 741; p. 738 with n. 102; *ead.* 2017, 343 with n. 105, with references and discussion). This is, by the way, also true for Vespasian (cf. his coins here **Figs. 112; 113**, that will be discussed below). As I have only realized now, also Ovid (*Tr.* 3.1.33–8) identified Augustus with Jupiter; cf. Wiseman (2022, 9 with n. 42, mentioned again below and quoted *verbatim infra*, in volume 3-2, in *Appendix VI.*; at Section I.). Cf. also *infra*, in volume 3-2, in *Appendix II.a*).

2.) Augoustakis and Buckley (2021, 165) mention only Nero's 'official' image, according to which Nero "at least set out ... claiming to rule by the watchwords of generosity, mercy, and affability (*comitas*). Such efforts to level citizen and emperor are conspicuously lacking in evocations of Domitian in Martial, Statius and the Flavian epicists".

**In my opinion, the following statement by Augoustakis and Buckley (2021, 165) is not true: "it is clear that Domitian's distinctive personality, his comfort with autocracy and his desire to be divine does catalyze new modes of literature of and for the Emperor [my emphasis]". And that for the following reason.**

In the volume, edited by Bönisch-Meyer (*et al.* 2014), Lisa Cordes has written the following contribution ("*Preferred Readings: von Seneca bis Statius*"), in which she compares in detail the panegyric texts that were written under Nero with those, written under Domitian.

From Cordes's analyses emerge that all the characteristics, which, according to Augoustakis and Buckley (2021, 165) have (allegedly) only been invented for the imperial panegyric under Domitian, had already been applied in the imperial panegyric under Nero.

I, therefore, repeat here again, what was written above, for Section II. of this *Preamble*, at *So what is still missing in the analysis of Domitian's self-advertisement, as asserted above? We need, in my opinion, to add Domitian's relationship with the gods and his (only alleged?) belief to be himself divine:*

"Lisa Cordes (2014, 341) begins her Section 1. on panegyric texts, which were written to praise Nero and Domitian, as follows:

#### **"1. Die Ambivalenz des Herrscherlobes**

**In der literarischen Panegyrik für Nero und Domitian spielt das Motiv der Erweiterung und Transgression von Grenzen eine zentrale Rolle. Die Dichter preisen die Entfaltung einer nie dagewesenen Pracht in der Bautätigkeit und im Euergetismus, sie beschreiben die Imposanz der Spektakel bei Spielen und Volksfesten und verwischen oder negieren bei der Darstellung des Herrschers die Grenzen zwischen Mensch und Gott. So werden Kolossalität und Glanz in der panegyrischen Dichtung ebenso wie in der bildenden Kunst wichtige ästhetische Kategorien; [with n. 1] die Monumentalisierung des beschriebenen Gegenstandes und die Inszenierung der Göttlichkeit des Kaisers sind zentrale Gestaltungsprinzipien des neronischen und domitianischen Herrscherlobes [my emphasis]".**

In her **note 1**, Cordes writes: "Cancik (1965), (1990)".

Let's now turn to the scholars, who have written *Contributions* for the exhibition-catalogue *Domiziano Imperatore. Odio e amore* (2023), and who have likewise addressed the reproach in some ancient literary sources, according to which Domitian had demanded to be addressed in public as *dominus et deus*.

The editors of this catalogue, Claudio Parisi Presicce, Massimiliano Munzi and Maria Paola Del Moro, mention in one of the "Introduzioni" to this volume ("*Domiziano imperatore. Odio e amore*", 2023, 9)

the reproach that Domitian had demanded to be addressed in public as *dominus et deus* (and several other reproaches against Domitian, to which I will come back below, in Section III. of this *Preamble*; at point 3.):

"Noto per la severa attività legislativa in campo amministrativo, economico, sociale e religioso e allo stesso tempo tacciato dalla storiografia senatoria di autoaffermazione come *dominus et deus* e "dio sulla terra" e dipinto dalla stessa come sospettoso e crudele, Domiziano raggiunse Gaio (Caligola) e Nerone come *exemplum* del pessimo imperatore, galleria in seguito ulteriormente arricchita da personaggi anch'essi oltremodo esemplari quali Commodo ed Eliogabalo".

Serena Guglielmi (2023, 25 with n. 3) still follows this reproach: "... lui [*i.e.*, Domitian] che amava essere chiamato "signore e dio"', quoting in her **note 3**: "Cass. Dio 67,4,7; Suet., *Dom.* 12,5".

Note also that two more authors, who have contributed essays to the exhibition-catalogue *Domiziano Imperatore. Odio e amore* (2023), still take for granted that "Domitian wanted to be addressed in public as '*dominus et deus*', to borrow the phrasing of Frederick G. Naerebout (2022).

See Roberta Alteri ("La reggia del *Dominus et Deus* sul Palatino: cenni sul linguaggio architettonico", 2023, 29), who writes: "Il palazzo di Domiziano si configurava pertanto come un grandioso complesso architettonico nel cuore dell'*Urbs*, degno di un *dominus et deus*, che si sviluppava verticalmente fino a 50 metri di altezza ed era percepito dai suoi abitanti "par domus est caelo" (Mart. 8, 36, 12)". See also Paolo Vigliarolo ("Domiziano *Dominus, Deus* e *agonothètes*: il rapporto dell'imperatore con le arti", 2023), who mentions '*Dominus et Deus*' in the title of his essay, but without referring to it in his text.

*As we have seen above, the reproach that Domitian had demanded to be addressed in public as 'dominus et deus' has, in my opinion, turned out to be unfounded.*

*Nevertheless Domitian had obviously transgressed the limits of what Romans accepted as 'normal' behaviour of one of their emperors - and that, in my opinion, not by chance concerning the way how he presented himself in relation to the gods and to the divine*

To this topic refer Sophia Bönisch-Meyer, Lisa Cordes, Verena Schulz and Anne Wolfsfeld (2014, 448) in their article: "Schlussfolgerungen: Herrscherrepräsentation in synchroner und diachroner Perspektive":

"Schließlich unterliegen auch die Elemente in Domitians Repräsentation, die auf seine Göttlichkeit verweisen, einer negativen Verformung. Denn sie werden von Plinius im *Panegyricus* als inhaltslos dechiffriert und als *Hybris* gewertet (S. 359-361 [referring to the article by L. CORDES]). Das ist insofern bemerkenswert, als in Münzen und Inschriften einige für Domitian zum ersten Mal genutzte Elemente der Repräsentation, die der Sakralisierung des Kaisers dienen, gerade unter Trajan weiterhin präsent sind (S. 62, 70 [referring in both cases to the article by R. WOLTERS and M. ZIEGERT], 140 [referring to the article by S. BÖNISCH-MEYER and C. WITSCHHEL]) [my emphasis]". To one of Domitian's coin-types, discussed by Reinhard Wolters and Martin Ziegert (2014, 62, Abb. 20), I will come back below in Section III. of this *Preamble*; at point 5.).

To these statements by the above-quoted scholars can be added some further observations, made in other published accounts, for example concerning the question, whether or not Domitian had assimilated himself to Jupiter, or had been assimilated by others to the god. Besides, it is generally assumed that, since Augustus, the Roman emperors had :

- 1.) identified themselves with Iuppiter, and/ or had -
- 2.) been identified with Jupiter by others, and that those emperors had -
- 3.) regarded themselves as sons of Jupiter.

For the second assumption, the identification of Augustus and other Roman emperors with Jupiter; cf. Häuber (2014a, 727 with n. 64; cf. p. 741; p. 738 with n. 102; *ead.* 2017, 343 with n. 105, with references and discussion). See also Ovid (*Tr.* 3.1.33–8), who identifies Augustus with Jupiter; cf. Wiseman (2022, 9 with n. 42, quoted *verbatim infra*, in volume 3-2, in *Appendix VI.*; at Section I.). Cf. also *infra*, at *Appendix II.a*).

The third assumption rests on the 'idea of divine sonship', as Henry Stuart Jones (1926) wrote in his discussion of the bust of Commodus as Hercules Romanus in the Palazzo dei Conservatori at Rome (which belongs to the Musei Capitolini), and this in its turn was *the* prerequisite for the emperor in question to be himself deified after his death:

**"This assimilation to Jupiter, which is the essential characteristic of the dogma of Imperial deification, rests on the idea of divine sonship, which had been latent in the cult of the ruler at least since Alexander [my emphasis]".** Cf. Häuber (2014a, 717 with n. 250, quoting: "H. STUART JONES, *Pal. Cons.* [1926], p. 139, Ort. Lam. 20: 'Bust of Commodus', pl. 48".

Add to the relevant results obtained by Wolters and Ziegert (2014, 62), and Bönisch-Meyer and Christian Witschel (2014, 147), also Klaus Stemmer (1971, 577, 579-580), whose article they themselves have not discussed. Stemmer has stressed the fact that Domitian had -

- a) a close relationship with Jupiter, and -
- b) that Domitian (in K. STEMMER's opinion according to his own wishes) had also undoubtedly been identified with Jupiter, discussing the relevant works of the Flavian poets for both assertions in detail.

To this point I will come back below, when discussing Vespasian's *sestertius* (cf. here **Figs. 112; 113**).

Also Licia Luschi (2015, 14) writes: "... **Domiziano, a cui i poeti di corte (Stazio, Marziale) alludono come ad un Giove terrestre** [my emphasis]".

Caroline Vout ("Portraiture and Memory Sanctions [of Domitian]", 2021, 176-177 with n. 17) mentions also the works of the Flavian poets, referred to by Stemmer (1971) and Luschi (2015), in which Domitian had been "**cast as Jupiter's earthly equivalent**", as she writes:

"Elsewhere, in Asia Minor, **someone saw fit to scratch Domitian's face, name and title off a bronze coin**, leaving his wife Domitia, who had been eyeball to eyeball with him, to stare into the abyss. **On the reverse [illustrated as her Fig. 2], a seated Zeus holding a sceptre and sacrificial dish reminds us of the power he [i.e., Domitian] used to wield: whether on coins or in the [page 177] works of the Flavian poets, he had been cast as Jupiter's earthly equivalent (fig. 2).** [with n. 17]".

In her **note 17**, Vout writes: "Varner 1995, 203 and 2004, 115, and, on Domitian's affiliation with Jupiter, Jones 1992, 99-100". For illustrations of the coin, mentioned by Vout, with Domitian's erased portrait, and of another copy of the same coin-type, with his portrait opposite Domitia; cf. *Cat. Domiziano Imperatore. Odio e amore* (2023, 23, *opere* nos. 14 and 13).

Concerning this point, also Claudio Parisi Presicce and Eloisa Dodero (2023, 67 with n. 33) have come to the same conclusion as Klaus Stemmer (1971), Licia Luschi (2015), and Caroline Vout (2021): "... **Giove, con cui, Domiziano amava identificarsi** [my emphasis]", quoting in their **note 33**: "Mart. 9,39,1; 9, 91".

Also Eugenio La Rocca (in: E. La ROCCA and L. KOSMOPOULOS 2023, 131) has come to the same conclusion as Stemmer (1971), Luschi (2015), Vout (2021), and Parisi Presicce and Dodero (2023): "**Per poter fondare una dinastia imperiale, Domiziano poteva contare sia sul suo costante riferimento a Giove, di cui si presentava come emissario in terra** [with n. 53] ... [my emphasis]".

In his note 53, La Rocca writes: "Fishwick 2009, pp. 344-347; Escámez De Vera 2016, pp. 5-6, 67-87. Per la monetazione, vd. [vedi] nota 18".

In addition to this, Caroline Vout (2021, 178) provides further support for Klaus Stemmer's hypothesis that the colossal cuirassed marble statue, of which the fragment here **Fig. 5** survives, represented 'Domitian as Iuppiter': "Ruling for just over a year, **the aged emperor [Nerva]** barely had time to go it alone .... Unpopular with the military, his best chance was for change within continuity, **even if this meant having his portrait put onto a Jupiter body of the kind that Domitian had so controversially coveted.** [with n. 26]".

In her **note 26**, Vout writes: "Varner 2004, 115-117".

Also Olivier Hekster (2021, 24) is interested in the subject discussed here. He writes: "**Roman emperors were responsible for a proper relationship with the divine and could be supported by gods. Augustus had highlighted his special relationship with Apollo.** Nero did the same, though on a larger and perhaps more personalised scale [my emphasis]".

For 'the special relationship, which Augustus had with Apollo', to borrow Hekster's (2021, 24) phrasing; cf. now Jens Fischer ("Augustus und Apollon. Notizen zu den Hintergründen einer 'göttlichen' Beziehung", 2020). Fischer (2020, 133 with n. 18) convincingly explains this 'special relationship' with the fact that Octavian had been since 37 BC *quindecimvir*, that is to say, a *priest of Apollo* (!).

But precisely concerning the point 'that they could be supported by gods', to borrow Hekster's (2021, 24) phrasing, all Roman emperors since Augustus had a fundamental problem. As Rose Mary Sheldon has observed, also the members of the Senate, with many of whom for example Domitian should have a very bad relationship, believed that 'they were supported by gods'.

Sheldon (2018, 173) writes about the resulting struggle of the senators with the emperors: "**They [i.e., the senators] believed that their fathers and grand-fathers had put together an empire by the valor of their arms and the favor of the gods and that the empire had been taken away from them by a tyrant [i.e., the emperor] who now maintained his power with the help of their social inferiors** [my emphasis]".

This passage will be quoted in more detail *infra*, in Chapter *Preamble*; Section; *III.*; at point 3.).

Let's, therefore, again turn to the games called *Capitolia*, inaugurated by Domitian in honour of Iuppiter Optimus Maximus Capitolinus - because Domitian had 'a special relationship with this god', to borrow again Hekster's (2021, 24) phrasing, or because 'Domitian used to present himself as Jupiter's agent on earth', as La Rocca (in: E. LA ROCCA and L. KOSMOPULOS 2023, 131) suggests, or, according to Vout (2021, 177): 'as Jupiter's earthly equivalent, as he had been presented'.

As was already mentioned above, Alexander Heinemann (2014) discusses Domitian's *Capitolia* in detail; see also Carole E. Newlands (2014, 321-323) and Onno van Nijf, Robin van Vliet and Caroline van Toor ("Domitian and the Capitolia", 2021).

Van Nijf, van Vliet and van Toor (2021, 125) comment on those games as follows: "... **one of the most remarkable initiatives of Domitian: the institution in 86 of the *Capitolia*, a Greek-style contest with athletic, musical, equestrian and literary competitions** ... [my emphasis]".

Newlands (2014), exactly like all the other contributors to the volume, edited by Bönisch-Meyer *et al.* (2014), analyses the fact that Domitian was constantly compared with Nero. Concerning the subject, in which she herself is interested in, namely Domitian's own literary production, there are obviously two 'myths': according to one group of ancient authors, Nero was by far the better poet than Domitian, other ancient authors assert instead that Domitian's epic texts were excellent (and that at the expense of Nero). Newlands does not decide herself, which one of these 'myths' should be true.

Considering the literary *agon* of Domitian's *Capitolia*, and that of the *Quinquatria Minervae* (cf. *infra*), of course also discussed by Newlands (2014) herself, there can, in my opinion, be no doubt that Domitian had a personal interest in this subject. - To this question I will come back below, when discussing the hieroglyphic texts of Domitian's Obelisk.

Claire Stocks (2021, 92) writes concerning this controversy: "Certainly Domitian took a keen interest in the literary production of his day, evidenced not only through the authorial aspirations of his youth, but from his continued interest in poetry and the arts throughout his time as Emperor, which included the institution of several literary competitions as part of his *Capitolia* games in Rome and also the Alban Games in honour of Minerva, which were held annually at his villa in the Alban Hills. [with n. 6, providing references]"

For the *Quinquatria Minervae*, celebrated by Domitian at his *Albanum*, as well as the observation that Domitian emulated the Attic hero and king Theseus and modeled his *Albanum* on the Acropolis of Athens, see also Licia Luschi (2015, 13 n. 115, p. 14 n. 116, page 197).

Cf. *infra*, at Section III. of this *Preamble*; at point 4.); and *infra*, in volume 3-2, at *Appendix IV.d.4.b*) *Domitian's building project comprising the Campus Martius, the Capitoline Hill and the sella between Arx and Quirinal. With detailed discussion of the Templum Pacis, and some remarks on Domitian's Villa, called Albanum.*

**To conclude this point. Because of what was said above, Stemmer (1971, 579-580), in my opinion, convincingly suggests that in Domitian's colossal portrait-statue from the Palatine (cf. here Fig. 5), the fact that the emperor's cuirass is decorated with a very large gorgoneion clearly indicates that Domitian is here equated with Jupiter.**

Apropos, 'the meaning of wearing the *gorgoneion*': in AD 71, Vespasian issued two *sestertii* (here **Figs. 113; 112**), on both of which his naked portrait bust is decorated with an *aegis* in a way that it seems to be part of his own body. By means of this iconography, Vespasian has clearly been equated with Jupiter.

**Fig. 113. *Sestertius* of Vespasian, AE, Rome, AD 71. On the obverse we see a naked portrait bust of Vespasian, as if he were a god or a dead hero, crowned with a laurel wreath like a *triumphator*, in addition to this, we see Jupiter's *aegis* on Vespasian's chest. By means of his *aegis*, Vespasian is equated with Jupiter, and that in a very peculiar iconography. Vespasian is wearing Jupiter's *aegis* similarly as Minerva does on Frieze A of the Cancelleria Reliefs (cf. here Fig. 1; Figs. 1 and 2 drawing; figure 5), but without attaching it to a garment or a cuirass, it rather seems, as if the *aegis* were part of his own body. On the reverse is represented the Temple of Isis at the Iseum Campense in Rome. As L. Bricault and R. Veymiers (2018, 142) were able to demonstrate, this is the Temple of Isis, commissioned by Vespasian. Cf. M.J. Versluys *et al.* (2018, 158-159). © Münzkabinett, Staatliche Museen zu Berlin.**

For a discussion of the coins here **Figs. 112 and 113**; cf. *infra*, in volume 3-2, at *Appendix II.a*).

**Fig. 112. *Sestertius*, issued by Vespasian in AD 71, Rome. With the *Dea Roma* on the reverse, seated on Rome's 'seven hills', thus referring to the *Septimontium* festival, which Vespasian had revived. Cf. A. Fraschetti ("Montes", in: *LTUR* III (1996) 285, Fig. 186: "Sesterzio di Vespasiano del 71 d. C. *RIC* II, 69 N. 442"). From: The British Museum. Obverse: IMP CAESAR VESPASIANVS AVG P M T P P P COS III; reverse: S C ROMA; *RIC* 2.1, 108, p. 67: "Roma seated right on the seven hills; to left wolf and twins; to right, River Tiber". © The Trustees of the British Museum.**  
**Online at: <[https://www.britishmuseum.org/collection/object/C\\_1872-0709-477](https://www.britishmuseum.org/collection/object/C_1872-0709-477)> [last visit: 7-V-2023].**

For a discussion of the coin here **Fig. 112**; cf. also below, in Chapter *V.1.i.2*).

Also Hadrian did not feel 'only' like the 'son of Mars' - as any one of his Roman soldiers - the iconography of his cuirassed portrait-statue from Hierapydna in Crete (here **Fig. 29**) even assimilates Hadrian to the god.

According to Michaela Fuchs (2014, 129-130 with ns. 40-44, Fig. 7 [cf. here **Fig. 129**]) this is proven by coins, issued by the emperor, which show Hadrian in the pose of Mars Ultor, and this pose is exactly the same as that of this portrait-statue (here **Fig. 29**). In her discussion of Hadrian's cuirassed statues, dedicated, in her opinion, to Hadrian after his victory in the Bar Kokhba Revolt (*inter alia* here **Fig. 29**), Michaela Fuchs (2014, 130), therefore, speaks of an "Angleichung" (assimilation) of the emperor to Mars. This fact has already been observed by other scholars in different contexts; cf. Michaela Fuchs (2014, 130, n. 44).

For a discussion; cf. below, at *A Study on Hadrian's portrait-statue from Hierapydna* (cf. here **Fig. 29**).

Eugenio La Rocca has suggested a similar, and likewise very convincing hypothesis concerning the colossal portrait of Constantine the Great in the cortile of the Palazzo dei Conservatori (cf. here **Fig. 11**, which was originally a portrait of Hadrian). **La Rocca writes that, because Constantine's portrait was modelled on a statue-type of Jupiter, the emperor here was not only meant as "commandante vincitore", but also as "deus praesens** [my emphasis]".

Cf. La Rocca (2000, 25), followed by Claudio Parisi Presicce (2005, 147; *id.* 2006b, both quoted *verbatim infra*, in volume 3-2, at *Appendix IV.c.1.*); and at *Appendix IV.c.2.*). Cf. also *infra*, at *A Study on the colossal portrait of Hadrian (now Constantine the Great) in the courtyard of the Palazzo dei Conservatori at Rome* (cf. here **Fig. 11**) ...; at Part I. *The statue of Hadrian (now Constantine the Great) in the courtyard of the Palazzo dei Conservatori* (cf. here **Fig. 11**), the inscription (CIL VI 974 = 40524; cf. here **Fig. 29.1**), and the cult-statue of *Divus Vespasianus* in the Temple of *Divus Vespasianus*. With The Contribution by Hans Rupprecht Goette on the reworking of the portrait of Hadrian (now Constantine the Great).

If Domitian actually felt *himself* that way, and/ or provided a colossal cuirassed statue of Domitian, like here **Fig. 5** could have been understood by himself or by his contemporaries as 'Domitian as Jupiter', we have a problem though: if so, Domitian himself, or any contemporary, seems not to have had any problems with Domitian's claims: **a**) to be the *son* of Minerva, and **b**) to be at the same time Minerva's *father*, Jupiter (!).

Ad **a**); cf. *infra*, at **n. 240**, in Chapter *I.2.*); and Häuber (2014a, 792-798: "**B32.**) The *Arcus ad Isis* and the goddess Minerva-Isis worshipped by Domitian").

Anne Wolfsfeld (2014, 200), in her discussion of Domitian's cuirassed statues, does not analyse the possible meanings of the very elaborate iconographies of the relief decorations of such cuirasses. For example Claudio Parisi Presicce's (2000) findings concerning the two headless cuirassed statues of Flavian emperors at the Museo Chiaramonti in the Musei Vaticani, one of which (here **Fig. 6, right**) may have been a portrait of Domitian.

For a discussion of those sculptures; cf. *infra*, at *The second Contribution by Claudia Valeri on the two headless cuirassed statues of Flavian emperors at the Museo Chiaramonti* (*inv. nos. 1250; 1254*; cf. here **Fig. 6, left and right**); and *infra*, in volume 3-2, at *Appendix IV.c.2.*).

As stated in the title of *Appendix IV.c.2.*), and later in the same *Chapter* in a commentary on this title:  
'... Exactly like the statue of the *ficus Ruminalis* on the *Anaglypha Hadriani* (cf. here **Figs. 21-22.**), the *lupa* and the twins on those cuirasses [cf. *inter alia* here **Fig. 6, right**, a possible portrait of Domitian] symbolize Rome's claim to eternal power and divine mission, and that it was the task of the Roman emperor to fulfill this obligation (cf. Claudio Parisi Presicce 2000, 28, 29). - To the just-quoted claim I will come back below, in Section *III.* of this *Preamble*; at point 5.)

This statement in the title of *Appendix IV.c.2.*) was deliberately formulated this way, because *this* was also one of the foremost obligations of the Egyptian Pharaoh (cf. *infra*, in volume 3-2, at *Appendix. II.c*)'.

*Also Sheldon (2023, in press) addresses Domitian's relationship with the divine by analysing his promotion of the imperial cult all over the Roman Empire. She suggests that Domitian needed this for his claim to imperial legitimacy. Domitian's promotion of the imperial cult explains his bad relationship with the Senate. Since I do not address this fact in my Study, I quote here Sheldon's relevant observations verbatim*

Like all other scholars, who have been discussed in this II. Section of Chapter Preamble so far, also Sheldon addresses the question, whether or not Domitian believed to possess a divine nature, which, according to her, was not the case.

Sheldon herself concentrates on a different fact, namely that Domitian used the imperial cult, comprising the cults of *Divus Vespasianus* and *Divus Titus*, to legitimize his own reign as emperor.

Sheldon (*Guarding the Caesars. Roman Internal Security under the Flavian Dynasty*, 2023, in press; Chapter 7; Section: "Imperial Cult") writes:

**"Part of the Senate's disdain for the Flavians concerned their lack of heralded ancestry.** Vespasian could not change his lineage or rewrite his family history ...

Domitian now had two deified emperors in his family tree and could compensate for his family's lack of nobility by promoting their achievements and honoring them with religious piety ... **By highlighting the connection to his father and brother, he promoted the Flavian family and his own imperial credentials.** [with n. 94] **Domitian used the imperial cult to lay claim to imperial legitimacy, despite the disregard of many in the Senate.** [with n. 95] ...

**Domitian did not institute a new role for the imperial cult.** He simply connected it to his own imperial fortune. **He used it and emphasized it in ways that reflected his own unique position as an emperor who was the son of an emperor and a brother of an emperor seeking the legitimacy denied him by the old vanguard within the Senate.** The imperial cult included building projects, statues, rituals, eulogy, highly emotional language, social constructs, and the culture of the respective provinces which made it an ideal conduit to appeal for, and receiving, expressions of loyalty. [with n. 101]

As Pontifex Maximus, he [*i.e.*, Domitian] had general oversight of the Roman state religion and his attention to religion apparently surpassed the previous Flavians. He took his duties seriously and seems to have performed them conscientiously. [with n. 102] **His interest in religion was far more than casual politics. The imperial cult was a means of underlying power for all emperors** [with n. 103]. **The imperial cult implied the divine right to rule.** Preservation of personal authority and preservation of the state were closely intertwined, and outward appearance was everything. Deification and worship of dead ancestors was an accepted procedure with an established history, and Domitian was just following the pattern. **Scott believed that Domitian was responsible for the establishment of the Flavian cult throughout the Roman world, and that worship was kept going until the close of the second century in spite of the fact that Domitian suffered *damnatio memoriae*.** [with n. 104] The Flavian *gens* had its own temple in Rome and its own cult with priests to observe worship. There is considerable epigraphic evidence for the activities of the priests of the Flavian cult. [with n. 105] ...

**Scholars have actually debated whether he [*i.e.*, Domitian] believed in himself as divine. Certainly, he did not believe he was a living god, son of Minerva, associate of Jupiter.** [with n. 110] **These were roles he played to augment his position and, as some have suggested, to bolster his rather weak ego. Although Vespasian had used the same mechanism to shore up his power, no one ever accused him of believing in his own divinity. There is no reason to believe Domitian did, either, and those who argue that he did would also have to seriously discuss his sanity. His devotion to Minerva was no more sincere than Caesar's to Venus ...**

Instead, he [*i.e.*, Domitian] determined to renew respect for the Principate and raise the office to the glorious heights achieved under Augustus. The imperial cult helped him toward his goal. [with n. 111] **Domitian's attention to the Flavian family most certainly included the intention of raising his own status as emperor, but his approach to elevating his own status came through his relationship to his family and his elevating them through the cult rather than on direct claims of deity for himself.** [with n. 112]

**This was a masterstroke. By using the imperial cult as a means to secure a recognized legitimacy, Domitian was able to place the Senate in a dilemma. Since the cult was attached in practice to the local religions throughout the empire and to the goddess Roma herself, at least in theory, the Senate could not disregard it. By emphasizing the imperial cult, and the Flavian cult in particular, Domitian utilized all the emotion of political loyalty and religious fervor that even the Senate could not suppress. The imperial cult emphasized Domitian and limited the gravity and influence of the Senate. [with n. 113] The imperial cult was, therefore, less of a statement about the relationship of emperors and gods than it was an expression of the relationship between the people of the empire and the current emperor. There need not be a choice between religion and politics. It was both. [with n. 114; my emphasis]"**.

To Rose Mary Sheldon's observations concerning Domitian's bad relationship with the Senate, I will come back below, in Section III. of this *Preamble*; at point 3.).

In her **note 94**, Sheldon writes: "Rhodes (2014), 85-86".

In her **note 95**, she writes: "Rhodes (2014), 86".

In her **note 101**, she writes: "Rhodes (2014), 87-88. Stewart (1994), 309 has shown how Juvenal's *Satires* can be used as important evidence for the function of traditional ritual as part of the rhetoric for legitimizing imperial power".

In her **note 102**, she writes: "Murison (1999), 219; Scott (1975), 61; Rhodes (2014), 88-89".

In her **note 103**, she writes: "See Sheldon (2018), 41; Lendon (1997), 10 on the part the cult played in helping the emperor to rule. On the cult under the Flavians, see Fishwick (2009), 344-347. On the cult under Domitian, see Chabrečková (2017), *passim*; Fernandez Uriel (2016), 97-101".

In her **note 104**, she writes: "**The cult included most members of the Flavian gens including *Diva Domitilla* Vespasian's daughter: *ILS 6692* and *Julia: ILS 6487* [my emphasis]"**.

In her **note 105**, she writes: "Epigraphical evidence from the empire: Scott (1936), 79-82. The very abundance of inscriptions causes problems with terminology. There were *sodales Flaviales*, *sodales Flaviales Titiales* and *seviri Flaviales*. It is not known whether these represented successive amalgamations of the college of priests as first Vespasian and then Titus were deified or whether they were different colleges all observing worship at the same time".

In her **note 110**, she writes: "On Vespasian's use of the imperial cult, see Waters (1969), 397; Viscusi (1973), 91. Inhabitants of the eastern provinces of the empire were accustomed to ruler worship and were perfectly willing to subscribe to the worship of a living Roman emperor. For those who believe Domitian was aiming at a divine monarchy, see Boyle (2003a [*i.e.*, here A.J. BOYLE 2003]), 20 and Newlands (2014), 499-522".

In her **note 111**, she writes: "Rhodes (2014), 100".

In her **note 112**, she writes: "Rhodes (2014), 101".

In her **note 113**, she writes: "Rhodes (2014), 121".

In her **note 114**, she writes: "See Rhodes (2014), 196-97 discussing the theories of Friesen (1993)".

For a discussion of Rose Mary Sheldon's statement in her above-quoted **note 104**, that: "The cult [of the *gens Flavia*] included most members of the Flavian gens including *Diva Domitilla* Vespasian's daughter"; cf. *infra*, at *Chapter IV.1.1.h*).

*The design of the volume, edited by Sophia Bönisch-Meyer, Lisa Cordes, Verena Schulz, Anne Wolfsfeld and Martin Ziegert (2014)*

The volume: *Nero und Domitian. Mediale Diskurse der Herrscherrepräsentation im Vergleich* (2014), edited by Sophia Bönisch-Meyer, Lisa Cordes, Verena Schulz, Anne Wolfsfeld and Martin Ziegert, from which some contributions have been discussed so far in this *Section 'II. Conclusions'* of this *Preamble* - and also elsewhere in this *Study* - contains the results of several interdisciplinary research projects and pertaining conferences. The contributions to this volume were written by 15 authors, who are interested in many subjects that are also discussed in this *Study*, although their general focus is very different from my own.

Sophia Bönisch-Meyer, Lisa Cordes, Verena Schulz and Anne Wolfsfeld (2014, 437) define in the final Chapter: "Schlussfolgerungen: Herrscherrepräsentation in synchroner und diachroner Perspektive" the focus of their research, and mention the fields, from which the contributors to their book come:

"Abschließend soll nun versucht werden, den eingangs (15-18) angesprochenen Kommunikationsprozess zwischen Princeps und Untertanen, der sich in der Repräsentation zeigt, an prägnanten Beispielen ausgehend von den Ergebnissen der Einzelstudien greifbarer zu machen. **Da dazu eine Betrachtung dieser Repräsentation in allen fassbaren medialen Formen nötig ist**, sollen nun die Untersuchungen aus der **Archäologie, Alten Geschichte, Numismatik, Epigraphik, Philologie und Theologie** zusammengeführt werden [my emphasis]".

### *The design of my own Study on Domitian published here*

My aim, in this *Study*, was to better understand certain aspects concerning Domitian's life, his achievements and wars, as well as the artefacts and buildings commissioned by Domitian. In order to reach this aim I have, in addition to studying Domitian himself, also concentrated on the life, portraits, achievements and wars of other emperors, as well as on artefacts and buildings commissioned by those emperors. To attain the overall goal of documenting and discussing all this in this *Study*, I have asked other scholars for advice, and seventeen of them have even written (in most cases very short) *Contributions* to this book.

This advice and the written contributions came from scholars of the following fields: **Ancient History, Art History, Classical Archaeology, Egyptology, Geography, History of Architecture, Latin Epigraphy, Numismatics, Military History, Philology, Theology and History of (‘pagan’) Religions.**

I myself, being by training a geographer and a classical archaeologist, have added cataster-based digital maps of Rome, in which the buildings, discussed in this *Study*, are marked. Those maps have been created in close cooperation with my husband, the geographer Franz Xaver Schütz, who has also contributed one of his own maps (here **Fig. 77**). Creating these maps, we have used methods of applied Geographic Information Science (GIS).

There is, therefore, a great difference between the design of my own *Study* on Domitian and the concept of those, whose work has resulted in the volume, edited by Bönisch-Meyer *et al.* (2014): I am referring here to those scholars, who decided, from which disciplines should be asked scholars to collaborate in the relevant research projects, and who should publish articles in this book.

**Contrary to them, I myself have regarded from the beginning of my research on Domitian the collaboration with scholars specializing in the fields Egyptology and geography as indispensable.**

**Although I had not anticipated this myself, I was lucky enough to receive, in addition to this, the competent relevant advice of the military historian Rose Mary Sheldon, to whom this *Study* is dedicated.**

With the ‘collaboration with Egyptologists’, I refer to the discussions about subjects concerning this field in Egypt, the Near East and in Rome with Rafeed El-Sayed and Konstantin Lakomy, with Nicola Barbagli, Alessandro Roccati, Emanuele M. Ciampini and Friedhelm Hoffmann (here named in chronological order since I have collaborated with them), that were decisive for this *Study*. I am especially grateful to all of them for alerting me to, and even providing me with publications, and that they took the time to read my own relevant texts that are published in this *Study*, and that they corrected them. With the ‘collaboration with a scholar specializing in geography’, I refer, as already mentioned, to the discussions about the geography of Rome and of the entire Roman Empire with the geographer Franz Xaver Schütz that were of equal importance to this *Study*, and to my maps that accompany this book, which were created in close cooperation with him.

Note also that Bönisch-Meyer *et al.* (2014, 437), in the above-quoted passage, write themselves explicitly that, in their efforts to analyse Nero's and Domitian's self-representations they have regarded it as necessary to consider 'all available medial forms' in their relevant reasoning ("Da dazu eine Betrachtung dieser Repräsentation in allen fassbaren medialen Formen nötig ist [my emphasis]").

We have heard above of Lisa Cordes's (2014, 355-356) analyses of panegyric texts, written by other authors in order to praise Domitian's deeds and achievements as emperor, and in which Domitian was, for example, referred to by Statius (*Silvae* 1,6,27) as "*Iuppiter noster*" ('our Jupiter'). We have also learned from Carole E. Newlands (2014, 334 with n. 51) that, although Domitian had been an epic poet himself, only one single quotation from one of his own works is known.

This means that the authors of the volume, edited by Bönisch-Meyer (*et al.* 2014, 437) have not considered any texts in their reasonings that had been written on the subjects they are interested in by Domitian himself. This is, by the way, also true for the authors, who have contributed to the volume, edited by Aurora Raimondi Cominesi (*et al.* 2021), as well as for the authors, who have contributed to the exhibition-catalogue *Domiziano Imperatore. Odio e amore*, edited by Claudio Parisi Presicce (*et al.* 2023).

The assertion that 'only one single quotation from one of Domitian's own works is known' is obviously true for Domitian's Latin (and Greek?) texts. But it is not true for texts, either written, or at least closely supervised by Domitian himself, but 'published' in Egyptian, and at the same time 'translated' into pharaonic phraseology by those Egyptians, with whom Domitian collaborated in the relevant project.

Considering the topic 'Domitian's relationship with the divine', which is discussed in this final part of this Section II. *Conclusions* of this *Preamble*, I anticipate in the following a passage that was written for below, Chapter VI.3., because that defines the important contribution of the field Egyptology to this topic and, by implication, to my entire *Study* on Domitian. And that for the reason that the content of the Egyptian texts on Domitian's obelisk (cf. here Fig. 28) was defined by Domitian himself:

*It is in these inscription on Domitian's obelisk (cf here Fig. 28),  
and only there,  
where Domitian himself claims his divine origin and nature*

'In his text, which the Egyptologist Emanuele Marcello Ciampini was kind enough to write for this *Study* (cf. below, *The first Contribution by Emanuele M. Ciampini: La regalità domiziana: una nota egittologica*), we learn that there is not only in one section of the hieroglyphic texts of Domitian's obelisk a reference to the legitimization of Domitian's reign and to his own divine nature - as I, being not an Egyptologist myself, had suspected (cf. *infra*, at Chapter IV.1.) - but in fact in three different passages of those inscriptions'.

Cf. *infra*, at Chapter IV. Frieze B of the Cancellaria Reliefs (cf. here Fig. 2) and the Obeliscus Pamphilius/ Domitian's obelisk (cf. here Fig. 28); at Chapter IV.1. A letter by Giandomenico Spinola concerning the Cancellaria Reliefs (cf. here Figs. 1; 2) and the Obeliscus Pamphilius/ Domitian's obelisk (cf. here Fig. 28); below, at Chapter VI.3. Summary of my own hypotheses concerning the Cancellaria Reliefs presented in this *Study*; Addition: My own tentative suggestion, to which monument or building the Cancellaria Reliefs may have belonged, and a discussion of their possible date; and below, at *The first Contribution by Emanuele M. Ciampini : La regalità domiziana: una nota egittologica*.

Ciampini (at *The first Contribution by Emanuele M. Ciampini: La regalità domiziana: una nota egittologica*) has analysed the above-mentioned three Egyptian text passages on Domitian's obelisk (cf. here Fig. 28).

In the following, I quote from the *Introductory remarks* of Ciampini's first *Contribution* to this volume, as well as from his *Conclusions*: especially interesting in the context discussed here is the fact that in these three Egyptian text passages on Domitian's obelisk Domitian's "*natura divina*" is claimed.

**And because Ciampini also states that the "cancellaria domiziana" was responsible for the content of the inscriptions on Domitian's obelisk, we can be sure that Domitian himself, supported by his Egyptian consultants, had written the texts that appear on his obelisk.**

**But that is not all. According to Ciampini, these hieroglyphic texts are therefore so remarkable because they 'translate' Domitian's self-advertisement and the propaganda concerning his own reign into the phraseology of classical pharaonic texts, and that formulated in Egyptian and in a way that, from the perspective of philology, the results look like texts from the Pharaonic period. Ciampini even defines Domitian's Egyptian consultants as "'faraonicamente' ineccepibile" ('impeccable what their ability is concerned to create 'pharaonic' texts) (!).**

To Ciampini's surprising results, I allow myself to add something else: If anything can prove that Domitian was indeed himself interested in writing texts, then this superb quality of the hieroglyphic texts of his obelisk. Which is, by the way, paired by the equally excellent workmanship of the sculptural execution of Domitian's obelisk.

**Emanuele M. Ciampini writes in his *Introductory remarks* :**

"Nello studio del complesso rapporto tra Roma e l'Egitto, il profilo di Domiziano offre numerosi spunti di riflessione: esponente dell'ultima 'dinastia' imperiale (intesa come sequenza di Imperatori legati tra loro da vincoli di parentela), favorì in modo significativo la diffusione di culti e di modelli egizi nell'Urbe. Di questo particolare rapporto ci possono dare testimonianza anche le fonti epigrafiche in lingua egizia, prodotte a Roma con l'intento di cementare questo rapporto esclusivo tra la famiglia imperiale e la cultura faraonica [with n. 1]; la ragione di questo legame può trovarsi in un chiaro intento politico: legittimare la dinastia, e nel caso particolare Domiziano, attribuendogli una natura divina che gli deriva dall'essere discendente diretto degli dei [*i.e.*, of *Divus Vespasianus* and of *Divus Titus*].

La fonte più importante per questa celebrazione della divinità imperiale si ha nei testi dell'Obelisco Pamphyli [*i.e.*, Domitian's obelisk; here **Fig. 28**], nei quali la cancellaria domiziana riesce a fondere aspetti ideologici e dogmatici della tradizione faraonica con quegli che meglio rispondono ai modelli imperiali. I temi che meglio possono esprimere questi concetti sono quelli riconducibili alla nascita divina e alla legittimazione della dinastia [with n. 2] ...

Tre passaggi nelle iscrizioni dell'obelisco sono di particolare interesse per la definizione 'faraonica' della legittimità dinastica e la natura divina del sovrano regnante / imperatore [*i.e.*, Domitian]".

**And in his *Conclusions*, Ciampini writes :**

"Pur nella loro sintenticità, i tre passaggi qui analizzati permettono di riconoscere la ricezione attiva di elementi pertinenti all'ideologia faraonica da parte di Domiziano: si tratta di un processo che dà voce, in modo coerente e organico, al concetto di trasmissione dinastica del potere. Ciò che stupisce in queste iscrizioni, è il loro essere un prodotto 'egizio' che traduce, in una fraseologia di tradizione, quelli che sono gli elementi dell'ideologia domiziana. Dobbiamo ipotizzare pertanto la presenza, a Roma, di un gruppo di specialisti di origine egiziana che hanno saputo interpretare e costruire quei modelli essenziali nell'ideologia del tempo; e questo aspetto è tanto più importante, se confrontiamo l'abilità dei compositori del testo nel realizzare una formulazione 'faraonicamente' ineccepibile, con l'ampio programma decorativo in santuari faraonici, promosso da Domiziano in Egitto; si può quindi postulare la particolare vivacità delle cerchie di specialisti della scrittura, che sanno produrre modelli efficaci, in grado di svilupparsi e affermarsi anche nei contesti egizi dell'Urbe".

In his **notes 1 and 2**, Ciampini provides references.

See below at *The first Contribution by Emanuele M. Ciampini: La regalità domiziana: una nota egittologica.*

Between these two above-quoted paragraphs of his first *Contribution*, Ciampini quotes and translates these three text passages of Domitian's obelisk and adds his comments to them.

For the importance of Ciampini's relevant research to this *Study*; cf. *supra*, at the Chapters *What this Study is all about*; and at *Introductory remarks and acknowledgements*; and *below*, at *Chapter IV.*; and at Chapter *The major results of this book on Domitian*; and *infra*, in volume 3-2, at *Appendix II*.

To Ciampini's thoughts concerning Domitian's personal involvement in the creation of the hieroglyphic texts of his obelisk (here **Fig. 28**), I will come back below in Section *III.* of this *Preamble*; at point 5.).

*Preamble; Section III. My own thoughts about Domitian*

In the following, I will try to characterize Domitian by concentrating on five extraordinary subjects:

- 1.) Domitian's escape from the *Capitolium* proper on 19th December AD 69;
- 2.) Domitian's meeting with Vespasian in AD 70 at Beneventum;
- 3.) Domitian's building projects in Rome and the airport Berlin Brandenburg;
- 4.) Domitian identified himself with Romulus and Theseus, exactly as Augustus before him;
- 5.) Domitian's emulation of Alexander the Great.

After the discussion of those five points, I will formulate my own judgement about Domitian.

**Ad 1.) Domitian's escape from the *Capitolium* proper [so my own hypothesis] on 19th December AD 69**

Of the following 5 points, this subject is the most difficult to judge, because the available literary sources do not agree on several important details that concern the reported events. In addition to this, the scholarly debate concerning this subject is very complex.

Scholars do not agree for example, to which summit of the Capitoline Hill Flavius Sabinus and his men, the Flavians, had withdrawn on 18th December AD 69: to the northern summit, the *Arx*, or instead to the *Capitolium* proper, the southern summit. As a consequence of this, the two shrines, built by Domitian as thanksgivings for his salvation, the *sacellum* for Iuppiter Conservator and his Temple for Iuppiter Custos, have been located both on the *Arx* and on the *Capitolium*. I myself follow those scholars, who believe that Flavius Sabinus had withdrawn to the *Capitolium* and that he was besieged there by the soldiers of Vitellius, the Vitellians, and hope to have added new observations to this discussion, which support this view.

Cf. *infra*, in volume 3-2, in *A Study on the consequences of Domitian's assassination ...; Introduction*; at Section I.; at *Appendix I.* and at *Appendix IV.*, where I have also summarized the relevant scholarly debate.

For the toponyms, that are of importance in connection with the events that took place between the 18th and 21st December AD 69, on the Quirinal, the Palatine, the Capitoline Hill (with the *Arx* and the *Capitolium* proper), the *Velabrum* and Trastevere, that will be discussed below, and in more detail *infra*, in volume 3-2, at *Appendix I.*; cf. here: **Fig. 58**, labels: QUIRINAL; COLLIS QUIRINALIS; Servian city Wall; S. The two following itineraries were in part quoted from *Appendix I.* (cf. *infra*, in volume 3-2), but because this is a summary of this very long *Appendix I.*, I have added to my following text many more details in order to be understandable for readers, who are not familiar with this entire scholarly debate.

But before turning to those two short itineraries, I begin with some detailed passages, written for *infra*, volume 3-2, at *Appendix I.b) Domitian's escape from the Capitolium - Introduction* :

The starting point of my research was one of the very vivid stories, told by the ancient historian Stephan Türr back in 1972, to which I will come back below, and, in addition to this, some observations made by the Egyptologist Alfred Grimm (1997, 128), all of which (as I erroneously believed) had not as yet been considered by those scholars, who studied Domitian's escape from the Capitoline Hill so far. Grimm (1997, 128) rightly observed that the date of this escape, 19th December, is not a festival of Isis, but the day of the *Opalia*, celebrated in honour of the Roman goddess Ops, who could be equated with Isis. In addition to this, Grimm (1997, 128) expressed his disbelief that Domitian could have escaped by disguising himself as an *Isiacus* or as a priest of Isis, because of the precedent of Marcus Volusius (as I see now, this story was already known to A. HEINEMANN 2016, 209, n. 70). Elsewhere, Grimm (1997, 123) added the observation that the *Saturnalia* "erano altrettanto legati alle cerimonie isiache". In my opinion, this point is important in the context discussed here.

I have combined Grimm's observations (1997, 123, 128) with the following information: *a*) the results of my earlier research on the *Area Capitolina*, the sacred precinct of the Temple of Iuppiter Optimus Maximus Capitolinus on the *Capitolium* proper, which was surrounded by walls and had entrance gates that could be closed and were watched; *b*) my findings concerning the Temple of Ops Opifera in *Capitolio* ("la portatrice di aiuto" (!); cf. J. ARONEN 1996, 36): most scholars (as I only realize now: convincingly) assume the Temple of Ops Opifera in *Capitolio* within the *Area Capitolina*. For both subjects; cf. Häuber (2005, 18-50); *c*) T.P. Wiseman's mentioning (1978, 174, n. 49) of an altar, dedicated to Isis *deserta* behind the Temple of Ops Opifera within the *Area Capitolina*; *d*) Filippo Coarelli's kind explanation of Isis's epithet '*deserta*' to me (meaning 'abandoned'), which refers to the widowed and mourning Isis, who, after the assassination of her husband Osiris, is in search of him; and *e*) Franz Xaver Schütz's likewise very important observation that the festival of the *Opalia* on 19th December was part of the *Saturnalia*.

To all this I have added ... that the *Opalia* were celebrated at the sanctuary of the goddess Ops, called Ops *ad Forum*: this was a *sacellum*, dedicated to Saturnus and Ops, which was located in the Roman Forum, next to the Temple of Saturn, likewise called *ad Forum*. Both gods were regarded as spouses and Saturnus could be equated with Osiris, and Ops with Isis. Both gods were also equated with Dis Pater and Proserpina, and their *sacellum*, where the *Opalia* were celebrated, was regarded as the *mundus*, and was also called *umbilicus urbis*.

The festival of the *Saturnalia* lasted from December 17th through the 23rd or 25th (depending, on which calendar one uses) and were *inter alia* celebrated with processions, which came from all over the city of Rome down to the Temple of Saturn in the *Forum Romanum*; cf. Marina De Franceschini and Giuseppe Veneziano (2011, 64).

I, therefore, suggest that Domitian, on 19th December AD 69, joined a procession, organized by the priests and adherents of Ops Opifera in *Capitolio*, those of Isis *deserta*, and possibly also those of Isis *Capitolina*, who went down to the *sacellum* of Ops *ad Forum* to join the celebrations of the *Opalia*. And because I follow the "orthodox view" (so T.P. WISEMAN 1978, 173 with n. 38) that Flavius Sabinus and his men (and later Domitian) found refuge on the *Capitolium* proper, within the *Area Capitolina*, I, therefore, believe that the *aedituus*, who saved Domitian by hiding him in his lodging, was the guardian of the Temple of Iuppiter Optimus Maximus Capitolinus. In my opinion, this explains why Domitian later dedicated the *sacellum* and the temple, which he built as thanksgivings for his salvation, to *Jupiter*.

... I believe that Domitian hid in the lodging of the *aedituus* of the Temple of Iuppiter Optimus Maximus Capitolinus, and that the freedman of this man had suggested that Domitian disguise himself with appropriate garments, and leave the *Capitolium* on 19th December with an Isis procession. All this could be understood as Iuppiter Optimus Maximus Capitolinus *himself* saving Domitian's life. Contrary to Heinemann (2016, 206), I find it, therefore, more than appropriate that Domitian would later dedicate his modest *sacellum* to Iuppiter *Conservator*.

Because of all this, I follow Christoph Reusser (1993a, 34, Abb. 4, Nr. 2, p. 38 with ns. 25-31, pp. 207, 208, 214; cf. *id.* 1993b, 114, Fig. 64, Nr. 2; *id.* 1996, 131, Fig. I 64, Nr. 2), who suggests that the Temple of Iuppiter Custos, built by Domitian, may be identified with architectural finds belonging to a huge building and dating to the imperial period that have occurred on the *Capitolium*, at the Tesoreria Comunale. By erecting this building Domitian, in Reusser's opinion (*op.cit.*), had enlarged the area of the *Area Capitolina* towards the east (cf. here **Fig. 75**). And because those finds are located immediately adjacent to the south-east corner of Domitian's gigantic (fourth) Temple of Iuppiter Optimus Maximus Capitolinus, I have also followed Reusser's (*op.cit.*) further suggestion, according to which Domitian had erected his likewise huge Temple of Iuppiter Custos at the site of his earlier modest *sacellum* ... we learn from Tacitus (*Hist.* 3,74,1) that Domitian, immediately after his salvation, when he was still Caesar, had erected his *sacellum*, dedicated to Iuppiter Conservator, at the former site of the lodging of the *aedituus*, who had saved his life.

Given the facts that I am 1.) convinced that Flavius Sabinus and his men (and later Domitian) found refuge within the *Area Capitolina*; and 2.) that the *aedituus* of the Temple of Iuppiter Optimus Maximus Capitolinus had hidden Domitian in his lodging, I do not believe that it was the Flavians, who were responsible for the burning down of the Temple of Iuppiter Optimus Maximus Capitolinus - at least I cannot imagine that they would have done that intentionally ...'

**Contrary to all other recent scholars discussed *infra*, in volume 3-2, at Appendix I., I believe that we are explicitly told by Flavius Josephus (BJ 4,11,4) and by Suetonius (Vit. 15,3), where Flavius Sabinus and his men found refuge and where they were besieged by the Vitellians - namely on the *Capitolium* proper.**

And that ``for the following reasons. When reporting on the fighting of the Vitellians with the Flavians on the morning of 19th December, Flavius Josephus, by referring to the Flavians, calls them "those that held the temple [translation: W. WHISTON 1737; thus obviously referring to the (second) Temple of Iuppiter Optimus Maximus Capitolinus on the *Capitolium* proper]". This assumption is, in my opinion, corroborated by the way Suetonius (*Vit.* 15,3) describes the events discussed here, who reports the following. Vitellius, who was staying at that time at the '*Domus Tiberiana*' on the Palatine, feasting, drove first of all the Flavians "*in Capitolium*", then ordered his Vitellians to burn the Temple of Iuppiter Optimus Maximus Capitolinus, and then watched the fighting of his Vitellians with the Flavians and the burning of the temple.

When trying to find out, whether Vitellius could have watched from the '*Domus Tiberiana*' on the Palatine the battle of his Vitellians with the Flavians, as Sueton (*Vitr.* 15,3) writes, provided Flavius Sabinus and his men had withdrawn to the *Arx* and were besieged by the Vitellians there, Franz Xaver Schütz and I found out that Vitellius could not possibly have been able to see this. The reason being that Vitellius's sightline was interrupted by the buildings standing on top of the '*Tabularium*'. If, on the other hand, this battle had occurred on the *Capitolium*, as I believe, Vitellius could very well have watched these proceedings. Franz Xaver Schütz has documented with photographs, what we can see, when looking ('with Vitellius') from the '*Domus Tiberiana*' towards the *Capitolium* (distance circa 300 m), and what is visible, when we look ('with Vitellius') from there to the *Arx* (distance circa 400 m. For both; cf. here **Fig. 123**).

**Fig. 123. Views of the *Capitolium* and of the *Arx*, seen from the area of the '*Domus Tiberiana*' on the Palatine. Marked are from left to right: the Basilica of St. Peter, the Synagogue, the *Capitolium*, with: the former Archäologisches Institut des Deutschen Reiches (the '*Laspeyres-Bau*'), the '*Casa Tarpea*' (the former '*Protestantisches Krankenhaus*' and immediately below it in the valley the Church of S. Maria della Consolazione), the former Istituto di Corrispondenza (the '*Knapp-Bau*'), the southern terrace of the Palazzo Caffarelli (built on top of the Temple of Iuppiter Optimus Maximus Capitolinus), the Palazzo Caffarelli, the '*Tabularium*' (with the Palazzo Senatorio, built on top of it), and the *Arx*, with the Campanile of the Church of S. Maria in Aracoeli, and the Monument for Victor Emanuel II. Photos: Franz Xaver Schütz (26-VIII-2019)''.**

I happily acknowledge, why I had the idea to investigate the question, whether or not Vitellius could have seen such details, when looking from the '*Domus Tiberiana*' on the Palatine towards the *Capitolium*. I am referring to a story, told our group of students of the Kunstseminar at the Universität Duisburg by our

professor of history, Dr. Stephan Türr, in September of 1972, when visiting the Capitoline Hill and looking 'in the opposite direction', namely from the former "Protestant hospital" (Casa Tarpea) over to the Palatine.

Stephan Türr (Budapest 27th January 1927-25th September 2016 Duisburg) told us that the French excavations of the 19<sup>th</sup> century on the Palatine had been watched from the *Capitolium*. The people in question were either the foreign guests of the 'Istituto di Corrispondenza Archeologica', the predecessor of the German Archaeological Institute, or else German recipients of scholarships of the 'Istituto di Corrispondenza'. All these people resided at the former "Protestantisches Krankenhaus" on the *Capitolium*, also referred to as 'German hospital', 'ospedale teutonico', or as 'Casa Tarpea' (cf. here Fig. 73), where guest were accommodated from 1836 until 1877 - the loggias on the south-east-side of this building were possibly also accessible for guests from 1877 until 1915.

See Maria Antonietta Tomei ("Gli scavi di Pietro Rosa per Napoleone III (1861-1870)", 1990); and Alberto Danti (2016, 209), who writes that Pietro Rosa's excavations on the Palatine (cf. here Fig. 39) were conducted "su incarico di Napoleone III".

Besides, standing with Stephan Türr at the 'Casa Tarpea' on this sunny afternoon in September of 1972, we could perfectly well see the Palatine in front of us in great detail (cf. here Figs. 122; 124). - Note also that we were standing in the cortile of the 'Casa Tarpea', immediately to the south-west of the building, which opens to the Via del Tempio di Giove, whereas the views from the loggias on the south-east-side of the 'Casa Tarpea' are certainly even better than that.

**Fig. 122.** "Erstes Institutsgebäude auf dem Kapitol, Sitz des Instituts 1836 bis 1877. Architekt Johann Michael Knapp. Giebelskulpturen Emil Wolff. Ansicht in idealer Umgebung. Titelvignette der Monumenti inediti publicati dall'Istituto di Corrispondenza Archeologica, Vol. II, Roma e Parigi 1834/38"; cf. A. Rieche (1979, caption of her cat. no. 20; the name of the artist, who drew this "Titelvignette" is not indicated). This Vignette appears also on the cover of this catalogue, from where it was copied for this illustration; cf. p. 8 (Impressum): "Umschlagfoto: Helmut Schwanke, DAI Rom". In the background on the right of this drawing Pietro Rosa's excavations on the Palatine (1861-1870) are visible.

**Fig. 124.** Views of the 'Casa Tarpea', the 'Knapp Bau' (former Istituto di Corrispondenza Archeologica), and the 'Domus Tiberiana' on the Palatine, seen from the southern terrace of the Palazzo Caffarelli on the *Capitolium*, which was erected 'on top of' the Temple of Iuppiter Optimus Maximus Capitolinus. Photos: Franz Xaver Schütz (26-VIII-2019).

See our map here Fig. 74, which shows intentionally the cadastre (with the ground-plan of Palazzo Caffarelli) 'on top of' the "platea di fondazione del Tempio di Giove Capitolino" ('the foundation platform of the Temple of Iuppiter Optimus Maximus Capitolinus', labelled on Fig. 74: Temple of IOM). For that; cf. Claudio Parisi Presicce (2019, 33, Fig. 30).

For a discussion; cf. *infra*, in volume 3-2, at Appendix I.e) It is conceivable that Vitellius (cf. Suet., Vit. 15,3), on December 19th AD 69, could actually have watched the fighting on the Capitolium, while staying at the 'Domus Tiberiana' on the Palatine.

Let's now turn to the two above-mentioned itineraries.

#### **The itinerary of the *praefectus urbi* Flavius Sabinus and his men on 18th December AD 69.**

On that day, Flavius Sabinus, the elder brother of Vespasian and *praefectus urbi* (i.e., the representative of the Emperor Vitellius) went from his *domus* on the Quirinal to Emperor Vitellius, who was residing in the 'Domus Tiberiana' on the Palatine, in order to negotiate with the emperor the final details of his abdication.

Already on the 1st July of AD 69, Flavius Sabinus's younger brother Vespasian had been hailed by the legions at Alexandria as (the new) emperor, and at that very moment (on 18th December AD 69), the Flavian troops under Marcus Antonius Primus and Gaius Licinius Mucianus were approaching Rome from the North, where they would arrive only two or three days later, respectively.

In order to negotiate this contract with Emperor Vitellius, Flavius Sabinus was accompanied by a fairly large group of men, even women joined him (cf. Tacitus, *Hist.* 3,69), but unfortunately we do not know their precise number.

Alexander Heinemann (2016, 191) characterizes this group as follows:

"Am gleichen Tag [*i.e.*, on 18th December AD 69] kommt im Haus des Flavius Sabinus auf dem Quirinal (Abb. 3 Nr. 3) eine größere Menschenmenge zusammen, einflußreiche Ritter und Senatoren, sowie die amtierenden Konsuln C. Quintius Atticus und Cn. Caelius Simplex, ferner Offiziere der *cohortes urbanae* und der *vigiles*, jener Einheiten also, die dem Stadtpräfekten direkt unterstellt sind".

When they had reached the *Lacus Fundani* at the *Fons Cati* on the Quirinal, they were all of a sudden attacked by Vitellius's German guards (so Dio Cass. 64,17.1-4). Then 'Vitellius chased Flavius Sabinus and his men in *Capitolium*', as Suetonius (*Vit.* 15,3) writes, which, in my opinion, is enough to prove that Flavius Sabinus and the other Flavians withdrew to the *Capitolium* proper (as already explained in more detail above), the southern summit of the Capitoline Hill, where they were besieged by the Vitellians.

In the night of 18th December, also Domitian was brought to his besieged uncle Flavius Sabinus on the *Capitolium*, who, as I believe, had withdrawn to the *Area Capitolina*, the sacred precinct of the Temple of Iuppiter Optimus Maximus Capitolinus, which was surrounded by walls, the gates of which could be closed and that were watched.

On the morning of 19th December, the Vitellians, now broken into this citadel, took Flavius Sabinus captive (who was unarmed, as Tacitus *Hist.* 3,73,2 writes), and killed many of his men, others could escape (some of them disguised). The Vitellians brought Flavius Sabinus and some of the other Flavians to Vitellius on the Palatine, later Flavius Sabinus and these men were killed there by the Vitellians. On 20th December, the Flavian troops under Antonius Primus conquered Rome, on 21st December, also Mucianus and his troops reached the City. On 20th (or on 21st ?) December, Vitellius was killed by soldiers (so D. KIENAST, W. ECK and M. HEIL 2017, 100). - To this I will come back below.

#### **Domitian's escape from the *Capitolium* on the morning of 19th December AD 69.**

Disguised as an *Isiacus* or as a priest of Isis, Domitian was able to join a procession of adherents of Isis, as Tacitus (*Hist.* 3,74,1) writes, that left the *Capitolium* on 19th December AD 69.

I believe that Domitian spent the night of 18th December (as Sueton, *Dom.* 1 says) in the lodging of the *aedituus* (in my opinion, of the Temple of Iuppiter Optimus Maximus Capitolinus), located within the sacred precinct of the temple, the *Area Capitolina*, and we are told by Tacitus (*Hist.* 3,74,1) that a freedman of this *aedituus* had advised him to join a procession (with Isis priests) that would leave the *Capitolium* - on the following morning, as Sueton (*Dom.*1) says. - To the differences of Tacitus's and Suetonius's reports concerning these details I will come back below.

Because on 19th December was the festival of the *Opalia*, which belonged to the *Saturnalia*, I suggest that this procession was organized each year by the priests and adherents of the Temple of Ops Opifera in *Capitolio* (who was equated with Isis), and by the priests of Isis *deserta*, and that it was possibly joined by the priests and adherents of Isis *Capitolina* on the *Arx*. Also the Temple of Ops in *Capitolio* stood within the *Area Capitolina*, the sacred precinct of the Temple of Iuppiter Optimus Maximus on the *Capitolium* proper (where Flavius Sabinus and his men had found refuge), and the altar of Isis *deserta* stood right behind the Temple of Ops in *Capitolio*. 'Isis *deserta*' means 'abandoned' Isis, 'having lost her husband Osiris', as Filippo Coarelli was so kind as to explain to us this epithet of the goddess on 26th September 2019 at Rome, a fact which I myself had previously not realized; cf. now Coarelli (2019b, 29-31).

According to my hypothesis, this procession of 19th December went down from the Temple of Ops Opifera in *Capitolio* to the *sacellum* of Ops *ad Foro*, where the *Opalia* were celebrated. This *sacellum* stood in front of the Temple of Saturn, also called *ad Foro*, and was dedicated to Saturn and Ops (Saturn was

identified with Serapis, and Serapis in his turn with Osiris, and Ops with Isis), and was also called *sacellum* of Dis Pater and Proserpina. This *sacellum* was also identified with the *mundus* and with the *umbilicus urbis*.

After his escape from the *Capitolium* on 19th December, Domitian was hiding somewhere in Trastevere or in the *Forum Boarium*, but the Vitellians were unable to detect him (so Suetonius, *Dom.* 1.2).

After Vitellius's death, 'Vespasian obtained his recognition as emperor from the Senate', so Rose Mary Sheldon (2007, 141).

Barbara Levick (2021, 34) writes that this occurred on 21st December: "Antonius Primus entered Rome on 20th December and the Senate met on the following day to confer on Vespasian all the necessary powers". Although this conclusion sounds reasonable, it is contradicted by Tacitus (*Hist.* 3,86; cf. *infra*).

According to Heinemann (2016, 192 n. 12), Vitellius died already on 20th December AD 69. This has already been suggested by Guy Edward Farquhar Chilver and Barbara M. Levick: "Vespasian (Titus Flavius (*RE* 206) *Vespasianus*), emperor AD 69-79, in: *OCD*<sup>3</sup> (1996) 1590; quoted *infra*, n. 171, in Chapter 1.1.).

This assumption sounds reasonable, when we consider that Domitian should leave his hiding place already on 21st December, and that Tacitus (*Hist.* 3,86) comments on this fact that at that stage 'Domitian did not have to fear any enemies [any more]' (cf. *infra*). Dietmar Kienast, Werner Eck and Matthäus Heil (2017, 101) suggest instead that Vitellius died only on the 21st or 22nd December.

On 21st December, Domitian came out of his hiding place and presented himself to the Flavian leaders. After reporting on Vitellius' death (cf. *Hist.* 3,85), Tacitus (*Hist.* 3,86) mentions the moment, when Domitian leaves his hiding place: "**The day hurried to its close. It was impossible to summon the senate because the senators had stolen away from the city or were hiding in their clients' houses. Now that he had no enemies to fear, Domitian presented himself to the leaders of his father's party** [translation: Clifford H. Moore 1925; my emphasis]".

Mucianus organized that, on this occasion, Domitian was saluted as *Princeps iuventutis* (cf. *infra*, n. 189, in Chapter 1.1.), as the "heir presumptive to the Empire" (so M.C. TOYNBEE 1957, 8 with n. 11). After this ceremony, the Flavian soldiers escorted Domitian to the *domus* of his father Vespasian on the Quirinal, where Domitian was born. When emperor, Domitian should erect at this site the *Templum Gentis Flaviae*.

I believe, contrary to Levick (2021, 34), that the Senate did *not* meet on 21st December in order "to confer on Vespasian all the necessary powers", as she writes, but that this was only possible on 22nd December. The reason being the statement by Tacitus (*Hist.* 3,86) that on the evening of 21st December AD 69 "It was impossible to summon the senate because the senators had stolen away from the city or were hiding in their clients' houses [translation: Clifford H. Moore 1925]".

Cf. Dietmar Kienast, Werner Eck and Matthäus Heil (2017, 101 [on Vespasian]): "Wichtige Einzeldaten 21./(22.?) Dez.[ember] 69 Bestätigung durch den Senat".

Let's now discuss some details of the events that had preceded this - at least for Domitian - 'happy end'. In the night of the 18th December, the Vitellians did not watch the place efficiently, where Flavius Sabinus and his men had found refuge, which is why Flavius Sabinus managed to organize that his own sons and Domitian were brought to this place. Sabinus could also send messengers to the Flavian leaders Antonius Primus and Mucianus, who were approaching Rome from the North, describing his precarious situation and asking them for help, and on the morning of 19th December he sent another messenger to Vitellius.

**Concerning these events, there are several more open questions, which we cannot answer with certainty:**

a) Tacitus (*Hist.* 3,69) reports that in the night of 18th December the sons of Flavius Sabinus and Domitian could be brought to the besieged Flavius Sabinus to the *Capitolium*, and that Flavius Sabinus himself managed that night to send the above-mentioned messengers to the Flavian leaders. Tacitus, therefore, adds that Flavius Sabinus and the other Flavians could also themselves have easily left the citadel that night; modern commentators have likewise asked themselves, why they did not do this;

b) Tacitus (*Hist.* 3,73,2) tells us that Flavius Sabinus and the suffect consul Q. Atticus were unarmed, which is why they did not fight with the Vitellians on the morning of December 19th, when those broke into the citadel. The Vitellians took Flavius Sabinus, the consul Q. Atticus and some of the other Flavians captive and brought them in chains to Vitellius on the Palatine;

c) interestingly, our sources differ in describing, *when* Domitian stayed at the lodging of the *aedituus* (of the Temple of Iuppiter Optimus Maximus Capitolinus, as I believe): already in the night of 18th December (so Suetonius, *Dom.* 1), or only on the morning of 19th December, when the Vitellians had already broken into the citadel, and the pitched battle of the Vitellians and the Flavians had begun (so Tacitus, *Hist.* 3,74,1);

d) whereas Sueton (*Dom.* 1) writes that it had been Domitian's *own idea*, to secretly spend the night of 18th December at the lodging of the *aedituus*, Tacitus (*Hist.* 3,74,1) asserts that Domitian *was hidden* by the *aedituus*;

e) because I follow those scholars, who believe that Domitian was hidden by the *aedituus* of the Temple of Iuppiter Optimus Maximus Capitolinus, we can deduce the following. Since we learn from Tacitus (*Hist.* 3,74,1) that a freedman of this *aedituus* gave Domitian on the morning of 19th December the good advice to join a procession of adherents of Isis on that day (in appropriate disguise: Tacitus writes that Domitian was clad "in a linen robe", translation: Clifford H. Moore 1962), this garment had first of all to be *brought* to this place (from the priests of Isis *deserta?* or of the Temple of Isis *Capitolina* on the *Arx?*). Sueton (*Dom.* 1) writes that Domitian, clad as an *Isiacus*, joined on the morning of 19th December a procession of Isis priests.

Tacitus (*Hist.* 3,71) not only mentions explicitly to have asked eye-witnesses concerning these events, he also reports (*Hist.* 3,73,1) that, when they realized that the Vitellians would soon manage to break into the citadel, many of the Flavian defenders, like Domitian, escaped by applying similar ruses: some of them were smuggled out by their clients 'between baggage', some changed their attires with those of their slaves, others could escape from the *Capitolium*, because they had found out the passwords of the Vitellians.

Besides, we should not forget another fact. The representatives of the Senate, who would meet with Vespasian and Titus at the *Porticus Octaviae* on the morning (!) of their triumphal procession in June of AD 71, informed them only at that very late moment that the Senate had decided to grant *all three men a separate triumph*: Vespasian and Titus for their victories in the Great Jewish War, and Domitian for his actions at Rome during the absence of Vespasian and Titus - as we are informed by Flavius Josephus (*BJ* 7,5,3). Cf. *infra*, at point 3.) of Section III. in this *Preamble*; and at Chapter *The major results of this book on Domitian*.

One thing is clear: of the Flavians only those survived this attack of the Vitellians, who were able to leave the place before the fighting on the morning of 19th December began - in disguise, or because they knew the passwords of the Vitellians. These were the above-mentioned Flavians, Domitian, who disguised himself as an *Isiacus* or as a priest of Isis (cf. *infra*), and the younger son of Flavius Sabinus.

Flavius Josephus (*BJ* 4,11,4) understandably defined the salvation of Domitian and of those Flavians, who could escape from the *Capitolium* on the morning of 19th December, as "miraculous".

Most of the other Flavians were killed in this battle, whereas Flavius Sabinus, the consul Q. Atticus, and those of the Flavians, who were brought in chains to Vitellius on the Palatine, were killed there by the Vitellians; cf. Barbara Levick (2021, 34); and Friderike Senkbeil (2022, 264, on Tacitus, *Hist.* 3, 73,2; 3, 74,1).

Some scholars have doubted that Domitian had disguised himself as an *Isiacus* or as a priest of Isis, as reported by Suetonius (*Dom.* 1: disguised as an *Isiacus*, he joined a procession of Isis priests), and Tacitus (*Hist.* 3,74,1), who says that Domitian "then through the cleverness of a freedman he was dressed in a linen robe and so was able to join the crowd of devotees [not mentioning of which divinity] without being recognized and to escape ...", translation: Clifford H. Moore 1962).

For a detailed discussion; cf. *infra*, in volume 3-2, at *Appendix I.c*) *The precise date of Domitian's escape from the Capitolium, M. Volusius' disguise as an Isis priest in 43 BC, and the hypothesis that because of this alleged precedent, Domitian's disguise on 19th December 69 as a priest of Isis should therefore be regarded as an invention.*

For those doubts; cf. also Eric M. Moormann (2021, 47 with n. 25; and *id.* 2023, 60 with n. 26).

**Also Laurent Bricault and Richard Veymiers (2018, 140-141) doubt that the story told by Suetonius (*Dom.* 1) and Tacitus (*Hist.* 3,74,1) about Domitian's disguise is true.**

After mentioning the story about Marcus Volusius, they comment (page 141) on Domitian's escape from the *Capitolium* as follows:

**"Intervenant quelques semaines après l'élection de Vespasien par Sarapis en son sanctuaire alexandrin [with n. 79], la coïncidence est heureuse. On est en droit de se demander si l'on n'aurait pas d'affaire ici à l'une des composantes fictionnelles d'un récit littéraire visant à montrer avec force la protection accordée par les divinités isiacques à la famille flavienne [with n. 80; my emphasis]"**.

This passage is quoted in more detail and discussed *infra*, in volume 3-2, at *Appendix I.c*).

I myself believe this story is true :

*a*) because Tacitus and Suetonius report on it, who, contrary to the assumption of Bricault and Veymiers (2018, 140-141), had on principle no intention to flatter Domitian, because both were hostile to him. Besides, their texts do not contain any 'actions' of the relevant gods, which would be typical for accounts of such a kind. Tacitus does not mention, with the garments of which cult Domitian disguised himself, and Suetonius (although stating that Domitian managed to escape disguised as an *Isiacus*, joining a procession of Isis priests) goes so far as to express his contempt of the Isis religion in this context. Neither does Suetonius explicitly say that those priests were instrumental for Domitian's escape. For detailed analyses of Tacitus's and Suetonius's accounts; cf. *infra*, in volume 3-2, at *Appendix I.b*); *Appendix I.c*); and *Appendix I.d*); and -

*b*) because Domitian's obviously likewise successful stratagems (in German: 'Kriegslisten') in Germany were recorded by Frontinus in his book *Strategemata*, 'who may have accompanied Domitian during his German campaign in 82/3', as we learn from John Brian Campbell and Nicholas Purcell (1996, 785).

**After having finished writing this Chapter, I found the essay by Valentina Musella ("`et incendium Romae per triduum totidemque noctes'" (Suet. *Tit.* 8, 3). Un focus sull'incendio dell'80 d.C.", 2023, 51 with ns. 2; 3), who has come to similar conclusions concerning Domitian's escape as I suggest here.**

Also Musella (2023, 51) believes that Domitian, before his escape, had stood at (or near) the Temple of Iuppiter Optimus Maximus Capitolinus, and that he disguised himself as a priest of Isis:

"Nell'arco della sua vita l'imperatore si trovò a fronteggiare tre grandi incendi. Sedici anni dopo l'incendio che sotto Nerone devastò tre quarti di Roma per sette giorni e sette notti [with n. 1] – a cui il futuro Cesare assistette con gli occhi di un ragazzo tredicenne – il fuoco tornò ad abbattersi su un'altra porzione della città nell'80 d.C.. **Oltre a questi due grandi roghi Domiziano era rimasto coinvolto anche in quello che scoppiò sul colle capitolino nel 69 [with n. 2], quando si salvò dal Tempio di Giove in fiamme fuggendo camuffato da sacerdote di Iside [with n. 3], la dea che da allora venerò con tanta devozione [my emphasis]"**.

In her **note 1**, Musella writes: "Tac. *ann.* 15, 40".

In her **note 2**, she writes: "Tac. *hist.* 3, 71".

In her **note 3**, she writes: "Suet. *Dom.* 1".

## **Ad 2.) Domitian's meeting with Vespasian in AD 70 at Beneventum**

Currently it is assumed that Vespasian, after his victories in the Great Jewish War and in the Civil War of 68-69, arrived at Rome for the first time as emperor 'in the first half of October AD 70' (cf. *infra*, at Chapter I.1.1., with n. 195: "so D. KIENAST, W. ECK and M. HEIL 2017, 101-102").

Domitian, who went from Rome circa 250 kilometres down to Beneventum to meet Vespasian already there, was at that stage 18 years old. The meaning of this meeting for Domitian has been discussed several times in this *Study*. In the following, I anticipate some passages, written for *infra*, volume 3-2, at *Appendix IV.d.4.b*), in which the relevant observations have been summarized :

**''I agree with [Eric M.] Moormann (2018, 168) that Domitian with his 'all-embracing-mega-forum' [i.e., the later Forum of Trajan] wanted to outdo Augustus, and that for two reasons ...**

As stated for the first time ... {below; cf. *infra*, at Chapter II.3.1.c)}, already in the first half of October AD 70, at the age of 18, being after all Caesar, *Princeps Iuventutis* and *praetor urbanus*, Domitian had not contented himself in only emulating Augustus, but had rather aimed at outdoing him. - I repeat in the following, what was written ... [below; cf. *infra*, in Chapter II.3.1.c):

"Irene Bragantini (2018, 246-247, quoted *verbatim* ... [*infra*, at Chapter V.1.i.3.]) has aptly compared Domitian's reception of Vespasian at Beneventum with Augustus' famous description of a delegation, led by the consul, who had come all the way down to Campania to greet him already there, when he returned from Spain and Gaul, the *ire obviam*, an unprecedented honour, as Augustus proudly stated in his *Res gestae* (12).

Bragantini's example (*op.cit.*), in my opinion, does not sound as if Domitian contented himself in merely 'emulating Augustus' example here, or, as [Stefan] Pfeiffer (2009, 62) writes, that Domitian's objective was, 'sie [i.e., the Flavian dynasty] auf diese Weise mit dem julisch-claudischen Kaiserhaus gleichzusetzen'. In my opinion, since Domitian himself went to Beneventum, and Mucianus and some other dignitaries even down to Brundisium (circa 500 kilometres distant from Rome), where Vespasian landed, coming back from Alexandria, they clearly aimed at 'outdoing the Augustan example'".

### **Apropos Domitian's choice to meet Vespasian at Beneventum.**

**Modern commentators have wondered, why Domitian received Vespasian at Beneventum instead of joining Mucianus and the others. When considering the lasting effects of Domitian's relevant decision -**

**a)** that our available literary source (Dio Cassius 65,9,3, quoted *verbatim* ... [*infra*, at Chapter V.1.i.3.]) mentions only Domitian, when describing the first meeting of Vespasian and his younger son after four years of separation, and -

**b)** the fact that Domitian, when himself emperor, generously supported the major cults at Beneventum, *inter alia* the Temple of Isis there; cf. Marina R. Torelli (2002; cf. C. HÄUBER 1983, 206; cf. *ead.* 2014a, 796 with n. 34; cf. also ... [below, at Chapter V.1.i.3.]) -

**my guess is that Domitian regarded his 'exclusive' meeting with Vespasian as precisely the great success he had planned and hoped it to be. Considering the alternative scenario, namely that Domitian had first met Vespasian at Brundisium - together with all the other dignitaries, and especially Mucianus - Domitian could only 'have played second fiddle'.**

**And I myself, like many others, believe that Domitian was not exactly good at that.** My thanks are due to Rose Mary Sheldon, with whom I could discuss this point [my emphasis]''.

*In the following, I allow myself a digression on the question, whether one detail of the story, told about Domitian's meeting with Vespasian at Beneventum, could possibly be true.*

Jocelyn M.C. Toynbee (1957, 5-7), therefore, referred to this meeting as: "The unpleasant encounter of father and son at Beneventum, when the former rebuked the latter sharply for his outrageous conduct [my emphasis]".

We should not forget the following detail of this story of Domitian's meeting with Vespasian at Beneventum, that has likewise been reported by Dio Cassius (65,9,3). I, therefore, anticipate here the relevant detail from a passage, written by Jocelyn M.C. Toynbee (1957, 5-7), and first quoted *infra*, in Chapter I.1.1., with n. 208. Following Filippo Magi (1945), Toynbee identified the togate youth on Frieze B of the Cancellaria Reliefs (cf. here Figs. 1 and 2 drawing: figure 12) with Domitian:

"Finally, in the foreground [on Frieze B] between the Senate and the *Genius Populi Romani* we see the young Domitian, togate and slightly whiskered, turned three-quarters towards his father [*i.e.*, Vespasian]. **There he stands, the pivot of the whole scene, composed, confident, and somewhat aloof, accepting as though it were his natural right the gesture of approval with which the Emperor [*i.e.*, Vespasian] greets him. The unpleasant encounter of father and son at Beneventum, when the former rebuked the latter sharply for his outrageous conduct, is over and forgotten;** and it would seem that Domitian was publicizing here his own version - not so much a wholly false, as a 'rose-coloured' version - of his situation as Caesar in Rome at the time of his father's accession, as the recipient of congratulations on the 'vice-regency' exercised by him in the capital while Vespasian was still absent in the East. **Thus the scene portrays the first public occasion on which Domitian, as a youth of nineteen, played a significant part in the crucial hour of the founding of the Flavian dynasty. It is almost an illustration of the saying which Suetonius attributes to him: 'patri se et fratri imperium dedisse, illos sibi reddidisse'** [with n. 1; my emphasis] [and with my own n. 208]" .

In my note 208, I write: "J.M.C. TOYNBEE 1957, 5-6. In her note 1 on p. 6, she quotes: 'Suetonius, *Domit.* 13'. TOYNBEE, *op.cit.*, does not say that already H. LAST 1948, 12, had suggested the latter: "There is much that might be added about this panel [*i.e.*, Frieze B], for instance it invites consideration of the passage in which Suetonius (*Dom.* 13,1) asserts of Domitian that '*principatum ... adeptus, neque in senatu iactare dubitavit et patri se et fratri imperium dedisse, illos sibi reddidisse ...*'. This was also discussed by M. BERGMANN 1981, 19-20; and by H. MEYER 2000, 136: "Die alte Deutung des Frieses B ist gewiß zutreffend, sagt doch Sueton: >>Als [Domitian] dann zur Herrschaft gelangt war, hatte er die Stirn, vor dem Senat zu prahlen, er sei es gewesen, der seinem Vater wie seinem Bruder den Thron gegeben, sie hätten ihm diesen nur zurückgegeben<< [with n. 431: "Suet. *Dom.* 13". H. MEYER 2000, 136, is quoted in more detail *infra*, in n. 272, at Chapter I.3.2.]" . - For that very influential idea, cf. also *infra*, at n. 456, in Chapter III. Similarly also R. BIANCHI BANDINELLI and M. TORELLI (1976, ARTE ROMANA, *scheda* 105, quoted *verbatim infra*, in Chapter IV.1." . - There, also the above-quoted passage from Toynbee (1957, 5-6) is quoted again.

Apropos Toynbee's (1957, 5-6) suggestion in the above-quoted passage that Domitian was "a youth of nineteen" at the ceremony represented on Frieze B of the Cancellaria Reliefs (here Fig. 2; Figs. 1 and 2 drawing). Since we know now that Vespasian arrived at Rome in the first half of October AD 70 (cf. *infra*, n. 195, in Chapter I.1.1.), it follows that Domitian was still 18 years old at that stage.

We have learned above, in Section I. of this *Preamble*, that Dio Cassius and Suetonius belong, together with Tacitus and Pliny the Younger, to those ancient authors, who have created Domitian's bad image. We could, therefore, think that those two above-quoted reproaches (by Dio Cassius 65,9,3 und Suetonius, *Dom.* 13,1) are not true either. And I actually consider this possibility, at least in the case of Dio Cassius's assertion (65,9,3).

For the following reason. Fortunately not only Dio Cassius reports on Vespasian's return from Alexandria to Rome, but also Flavius Josephus (*Bj* 7,2; 7,4,1); both accounts are quoted *verbatim infra*, in Chapter V.1.i.a).

We know from Josephus' own writings, which have been discussed by T.P. Wiseman (2013, XI-XIII, quoted *verbatim infra*, n. 201, at Chapter I.1.1.) that he, although in the meantime among Vespasian's favourites (so T.P. WISEMAN 2013, XIII), was not present at Vespasian's arrival at Rome in October of AD 70, since he had stayed all the time with Titus in Jerusalem. We also know that Vespasian and Titus had commissioned Josephus to write his book *Bellum Judaicum*, which was finished by AD 81. This means that Josephus described in his book, how Vespasian and Titus *saw* those events. Interestingly, Josephus does not mention at all, to borrow Toynbee's (1957, 5-6) phrasing, "The unpleasant encounter of father [Vespasian] and son [Domitian] at Beneventum, when the former rebuked the latter sharply for his outrageous conduct".

Apart from the fact that remarks like that would, in my opinion, not have suited the purpose of Josephus's book *Bellum Judaicum*, I should like to add to this a personal comment, which is, of course, not provable.

After four years of separation, and after both had survived the civil war, Vespasian and Domitian met each other for the first time in Beneventum at the beginning of October (?) in AD 70. This is why I rather believe that they were overwhelmed by the fact to be reunited again.

### *Apropos, Vespasian's and Domitian's 'four years of separation'*

We know that Vespasian was *comes Neronis* in *Achaea* (AD 66/67), and *legatus Augusti pro praetore exercitus* in *Judaea* (AD 67-69); cf. Dietmar Kienast, Werner Eck and Matthäus Heil (2017, 101). This means Vespasian had left Rome already in AD 66, together with the Emperor Nero, when the latter embarked for his 'concert tour' in Greece, and that Nero (in 67) "entrusted him with suppressing the rebellion in Judaea" (cf. G.E.F. CHILVER and B.M. LEVICK: "Vespasian (Titus Flavius (RE 206) Vespasianus), emperor AD 69-79, in: *OCD*<sup>3</sup> (1996) 1590; quoted *infra*, n. 171, in Chapter I.1.). For the details of this war; cf. *infra*, n. 404, in Chapter III.).

Only after this entire *Preamble* had been written, have I read two publications, which allow the conclusion that the Emperor Nero had actually *himself*, if not caused, at least 'helped to precipitate' (so H.H. SCULLARD 1996; cf. *infra* this "rebellion in Judaea", to borrow Chilver's and Levick's (1996) phrasing.

Werner Eck, 2022, Sp. 494, Section: "E. Jüdischer Krieg") writes:

"Die Gründe für die Revolte eines Teils des jüdischen Volkes werden sehr unterschiedlich gesehen. **Sie reichen von massiven sozialen Spannungen zwischen Großgrundbesitzern und verarmten Bauern über den Einfluss messianischer Vorstellungen und die Provokationen insbesondere der römischen Präfekten** bis zur Ansicht, das jüdische Gemeinwesen sei grundsätzlich mit der Herrschaft Roms nicht vereinbar gewesen. **Zuletzt wurde argumentiert [7], entscheidend seien die letzten Jahre vor dem Aufstand unter dem Präfekten Gessius Florus gewesen, als die veränderte Politik Neros zu einer stärkeren Ausplünderung des Landes und in Caesarea zur Explosion der Spannungen zwischen der jüdischen Bevölkerung und der paganen Mehrheit, u. a. den Auxilien des Präfekten, führte** [my emphasis]".

In his **note [7]**, Eck writes: "S. Mason, A History of the Jewish War, A. D. 66–74, 2016".

Franz Xaver Schütz, who had already alerted me to Werner Eck's (2022, Sp. 494) above-quoted passage, found on the Internet also the following account: "Livius.org; Jewish War (66-70); Causes of the War of 66-70". Cf. online at: <<https://www.livius.org/articles/concept/roman-jewish-wars/roman-jewish-wars-3/>>. The author of the texts (dated 1995-2023), that are published on this Website, is Jona Lendering. Cf. online at: <<https://www.livius.org/contributor/jona-lendering/>>.

Jona Lendering (*op.cit.*) describes Nero's relevant decisions in more detail, to which Eck (2022, Sp. 494) refers in the above-quoted passage:

**"In 66, the Roman emperor Nero needed money, and ordered his representative in Judaea, Gessius Florus, to confiscate the Temple treasure.** The governor was not amused when some Jewish jokers passed the hat around for "that poor procurator Florus". He demanded their punishment, but when his policemen could not find the mockers, he had some passersby arrested and crucified.

Of course this was tactless and brutal, but it would not have led to the destruction of Jerusalem and the Temple if there had not been one or two deeper causes. The obvious reason why this incident led to war was the religious tension between the Jewish populace and the Roman government ...

**The deepest cause of the war was the impoverishment of the Jewish peasantry. Sixty years of Roman taxation had meant only one thing, the Jews had to pay money, which was spent in Italy and on the border ... [my emphasis]**".

See also Howard Hayes Scullard ("**Gessius Florus**, Roman knight from Clazomenae, married Cleopatra, a friend of Poppaea Sabina, and thus gained the favour of **Nero who in AD 64 appointed him procurator of Judaea which Gessius proceeded to govern ruthlessly**. Although Josephus' account of his villainies may be exaggerated, **he certainly inflamed Jewish feeling[s] (e.g. a demand for 17 talents from the Temple treasury led to rioting and bloodshed) and helped to precipitate the great insurrection of 66"**, in: *OCD*<sup>3</sup> [1996] 635 [my emphasis]).

When Nero came back from his 'concert tour' to Rome in the Spring of AD 68, the *Porta Capena* was (allegedly) torn down in his honour, because of his victories in Greece. Domitian has (according to the *Chronogr. a.* 354, 146, quoted *verbatim infra*, in Chapter IV.1.1.g)), allegedly therefore, restored the *Porta Capena*; cf Häuber (2014a, 286 with ns. 386-389; and *infra*, in volume 3-2, at *Appendix IV.d.4.b*).

**Other scholars are convinced that the ancient authors said the truth, who reported on the "friction" of Domitian with his father Vespasian, or on the "rift" between the two, as Sheldon (2023, in press) refers to those (alleged?) feelings, that would result in the (alleged?) "unpleasant encounter of father [Vespasian] and son [Domitian] at Beneventum", to borrow Toynbee's (1957, 5-6) above-quoted phrasing.**

See the summary of the scholarly discussion concerning the Cancellaria Reliefs provided by Rose Mary Sheldon (*Guarding the Caesars. Roman Internal Security under the Flavian Dynasty*, 2023, in press; Chapter 7; Section: "The Cancellaria Reliefs") :

"Frieze A

**Frieze A originally depicted Domitian as he prepared to depart for a campaign against the Chatti. [with 64; providing references] Contemporary authors such as Suetonius alleged that Domitian's military endeavors were largely a failure, motivated by a quest for personal glory rather than necessity. The scene depicted on Frieze A seems to counter such accusations by presenting Domitian as a reluctant general, spurred on by the gods Mars, Minerva and Roma, who are pictured on the far left, to defend his home country ...**

Frieze B

**Frieze B depicts Vespasian's reconciliation with Domitian following the civil war, in 69 mentioned above. Domitian seems to be reassuring his father that Rome had been governed well in his absence, and that their relations are good. Once again, ancient authors paint a different picture of the events presented in the Frieze B. According to both Tacitus and Suetonius, Domitian's conduct during Mucianus' interim government was less than satisfactory; they allege he [*i.e.*, Domitian] was overzealous in distributing political offices and eager to take part in unwarranted military campaigns. This caused friction with his father. Frieze B may have been intended to dispel popular rumors that there was a rift between the two. Neither interpretation can be established with certainty, although Jones favors a straightforward account in which Vespasian's reconciliation with Domitian was indeed amicable. [with n. 67] Domitian is seen receiving his father in Rome in 70 without any reference to Titus and with himself as true heir of Vespasian. [with n. 68] The reliefs were probably meant by Domitian to justify two events in his career which were subject to criticism: his conduct in Rome in 69/70, here represented as approved by Vespasian, and his wars, here approved by the tutelary deities of Rome. [with n. 69; my emphasis]**".

In her **note 67**, Sheldon writes: "Jones (1992), 18. Flower (2001), 634".

In her **note 68**, she writes: "Hammond (1956), 84, n. 122".

In her **note 69**, she writes: "**As argued by Last (1948), 9-14** [my emphasis]".

In this *Study*, I have discussed, but not followed the just-quoted opinions of some of those scholars, whom Rose Mary Sheldon (*Guarding the Caesars. Roman Internal Security under the Flavian Dynasty*, 2023, in press; Chapter 7; Section: "The Cancellaria Reliefs") refers to in this passage.

In the following, I will add some comments to those of her statements that I have emphasized above:

**a) What does Frieze A of the Cancellaria Reliefs represent ? (cf. here Fig. 1; Figs. 1 and 2 drawing)**

In my opinion, Frieze A did not originally show Domitian's *profectio* to his war against the Chatti, but instead his *profectio* in the Spring of AD 89 to his Second Dacian War.

Cf. *infra*, at Chapters I.2.; and V.1.i.3.). The reasons for my dating of the Cancellaria Reliefs and for my suggestion to which war Domitian (**Fig. 1; Figs. 1 and 2 drawing; figure 6**) is leaving on Frieze A are summarized below, in Chapter *The major results of this book on Domitian*.

In Chapter I.2. is discussed the assertion that Domitian is represented on Frieze A of the Cancellaria Reliefs as "a reluctant general", as Sheldon (2023, in press) writes.

This hypothesis has already been refuted by Jocelyn M.C. Toynbee (1957, 9-10, quoted *verbatim infra*, **n. 233**, in Chapter I.2.: *contra* P.G. Hamberg [1945, 53], who was first to suggest this hypothesis [and *contra* the hypothesis of H. LAST 1948, 9ff.]), by stating that state reliefs never represented anything 'negative' (*i.e.*, showing in this case, so to say, the Emperor Domitian, unwillingly performing his foremost duty, that of defending the Roman Empire).

Concerning the somewhat enigmatic representation of Domitian in Frieze A, who is standing composedly, with both soles of his feet planted firmly on the ground, I myself follow instead Gerhard Koeppel's suggestion (1969, 141-143; quoted in more detail *infra*, **n. 222**, in Chapter I.2.).

Koeppel explained, why the artists represented Domitian on Frieze A this way (see also *infra*, in Chapter I.2.1.a), and why they showed him as performing a gesture with his right hand, called by ancient literary sources "*dextra elata*" and "*ingens dextra*". Cf. Koeppel (1969, 142): "Wie Franz Cumont gezeigt hat, findet sich dieser Gestus erstmals im Kult der alten semitischen Völker [with n. 30, with reference: 'oriental' Sun gods, like Sol '*Invictus*', perform this gesture]. So hat sich bereits Vespasian darstellen lassen [with n. 32, with reference]. In der gleichen Haltung wie Vespasian erscheint Helios-Sarapis in domitianischer Zeit auf alexandrinischen Münzen [with n. 33, with reference]".

Koeppel (1969, 143) wrote: "*Ingens dextra* ist also in domitianischer Zeit gleichbedeutend mit *magnus dux* ... Die *ingens dextra* des Kaisers im Relief A von der Cancellaria wird Verderben über seine Feinde bringen, die er, wie Victoria zeigt, besiegen wird ('*ingens dextra* has, therefore, in the Domitianic period the same meaning as *magnus dux* ... The *ingens dextra* of the emperor will cause the ruin of his enemies, whom he will defeat, as *Victoria* on Frieze A indicates')". - To the gesture, Domitian is making on Frieze A with his right hand, I will come back below.

Cf. also *infra*, **n. 222**, in Chapter I.2.; in Chapter I.2.1.a), especially at **ns. 246; 247**; and in Chapter V.1.g) *The gestures that the two emperors on both friezes (cf. here Figs. 1; 2; Figs. 1 and 2 drawing) perform with their right hands*.

In Chapter I.2. are also discussed the negative statements by Tacitus (*Hist.* 4,68,85,86) and Suetonius (*Dom.* 2), which concern Domitian's military 'adventure' (so J.M.C. TOYNBEE 1957, 21) as Caesar in AD 70 (to this I will come back below), as well as the negative statements by Tacitus (*Agr.* 39) and Suetonius (*Dom.* 6) concerning the wars, which Domitian conducted as emperor.

Cf. *infra*, at **ns. 229-232**, in Chapter I.2., and *infra*, in volume 3-2, at *Appendix I.c*).

As we have seen above, in Section I. of this *Preamble*, it has in the meantime been proven by scholars like Peter L. Viscusi (1973) and Markus Handy (2015) that the negative assertions by Tacitus, Suetonius and Dio Cassius concerning the wars which Domitian conducted as emperor, are *not* true;

**b) Was there a "friction" or "rift" between Vespasian and Domitian, which could justify the assumption that Frieze B of the Cancellaria Reliefs shows their "reconciliation" ? (so R.M. SHELDON 2023, in press)**

As already said, I myself take Flavius Josephus's report (BJ 7,2; 7,4,1) as Vespasian's and Titus's 'official' version of the relevant events - and there nothing of the sort is mentioned. We cannot regard this as a proof, that, in reality, *such feelings did not exist*. But the fact remains that they are not mentioned in the 'official' report of those events, commissioned by Vespasian and Titus, and written by Flavius Josephus in his *Bellum Judaicum*. This allows, in my opinion, the conclusion that this "friction" or "rift" (in case such feelings existed at all) were likewise *not* represented in state art, as for example in Domitian's Cancellaria Reliefs.

I agree with Hugh Last (1948, 9-14), quoted by Sheldon (2023, in press), that the gesture, Vespasian is making with his right hand on Frieze B (cf. here **Figs. 1 and 2 drawing: figure 14**), has a positive meaning. But concerning the interpretation of Vespasian's gesture, I follow Giandomenico Spinola (who, in his turn, follows in this respect H. FUHRMANN 1940, Sp. 471-472; *id.* 1941, Sp. 544-545; and F. MAGI 1945, both quoted *verbatim infra*, in Chapter IV.1.), according to whom Vespasian thus expresses the (future) *investiture*, or the "legittimazione" (so G. SPINOLA) of Domitian as emperor.

Cf. below, at *The Contribution by Giandomenico Spinola on the Cancellaria Reliefs*.

The reason for my relevant decision are the results obtained by comparing the contents of Frieze B of the Cancellaria Reliefs (here **Fig. 2; Figs. 1 and 2 drawing**) with those of Domitian's obelisk (here **Fig. 28**). For discussions of this point; cf. *supra*, at Chapter *What this Study is all about*; and below, at Chapter V.1.g) *The gestures that the two emperors on both friezes (here Figs. 1; 2; Figs. 1 and 2 drawing) perform with their right hands*; and at Chapter *The major results of this book on Domitian*;

**c) Why is Titus not represented on Frieze B of the Cancellaria Reliefs (here Fig. 2; Figs. 1 and 2 drawing) ?**

We know that Vespasian arrived in Rome for the first time as emperor in the first half of October AD 70. We know also that, on that occasion, such an *adventus* ceremony, performed by Domitian and Vespasian, as purportedly 'documented' by Frieze B of the Cancellaria, did not take place; cf. *infra*, at Chapter V.1.i.3.).

Because of this date, we cannot expect Titus to be represented in this scene as well. Because Titus, as already mentioned above, was at that stage in Jerusalem. For a discussion of this point; cf. *infra*, in Chapters *The major results of this book on Domitian*; and *The visualization of the results of this book on Domitian on our maps*.

Apropos, the belief that Frieze B shows Domitian "as true heir of Vespasian", as Sheldon (2023, in press) writes. This refers to another of Suetonius's reproaches (*Dom.* 2). But see the comments by Häuber (2014a, 794-795, with n. 16): Suetonius's relevant assertion "seems to be contradicted by Suetonius (*Tit.* 9,3), who reports that Titus, from the beginning of his reign, had declared Domitian *consors* and *successor imperii*";

**d)** Sheldon (*Guarding the Caesars. Roman Internal Security under the Flavian Dynasty*, 2023, in press; Chapter 7; Section: "The Cancellaria Reliefs") concludes: "**The reliefs were probably meant by Domitian to justify two events in his career which were subject to criticism: his conduct in Rome in 69/70, here represented as approved by Vespasian, and his wars, here approved by the tutelary deities of Rome**", with n. 68: "As argued by Last (1948), 9-14" [my emphasis]).

To those assumptions, I should like to comment the following. First of all we need to ask ourselves, whether these 'two events in his [*i.e.* Domitian's] career were indeed subject to criticism' - already in Domitian's lifetime (!) - namely: *e*) 'his conduct in Rome in 69/70', and *f*) 'his wars', as Sheldon (2023, in press) writes.

*Ad e)* Jocelyn M.C. Toynbee (1957, 16) wrote: "At any rate, we are here presented with two pictures [*i.e.*, the Cancellaria Reliefs] of undoubted biographical significance - [and referring to Frieze B :] **Domitian's holding of Rome for Vespasian at a moment of crisis in the fortunes of the Flavian House ...** [my emphasis]".

Rita Paris (1994b, 80-83; cf. *infra*, in Chapter V.1.i.3.a): the quote is from p. 82), who addresses also the reproaches of Tacitus ("*Hist.* V, 51,2") and Dio Cassius ("epitome libro LXV, 2, 3") against Domitian, explains in great detail that "Il ruolo di Domiziano [in AD 68-70 at Rome] è stato fondamentale in assenza del padre".

Also in my own opinion, until the time, when Domitian may have commissioned the Cancellaria Reliefs, it was certainly not true that 'Domitian's conduct in Rome in 69/70 was subject to criticism', to borrow Sheldon's phrasing (2023, in press). And that for the reasons already mentioned above:

On the morning of their triumph in June of AD 71, representatives of the Senate should meet with Vespasian and Titus in the *Porticus Octaviae*. According to Flavius Josephus, these representatives told Vespasian and Titus that the Senate had granted all three men, Vespasian and Titus (for their victories in the Great Jewish War) and Domitian (for his contemporary actions at Rome - and/ or for his military 'adventure' in Gaul and Germany in AD 70 ?) three *separate* triumphs. But we know that Vespasian, Titus and Domitian decided to celebrate only one triumph - *together* (cf. Josephus, *BJ* 7,5,3). Cf. Häuber (2017, 191-202).

**Since Vespasian, the reigning emperor, did not prevent the Senate from granting Domitian this triumph, Domitian must have done something noteworthy at the time; cf. *infra*, in volume 3-2, at Appendix I.c).**

We even have a representation of this fact, commissioned by Domitian himself. In the 'spoils relief' of the Arch of *Divus Titus*, built by Domitian on the *Velia* (here Fig. 120) shortly after AD 81, we see on the far right the *Porta Triumphalis*, through which the triumphal procession of June AD 71 is marching. On the attic of this arch appear what seem to be sculptures representing *the three Flavian triumphatores*. The centre of those sculptures is occupied by Domitian on horseback, accompanied to his left by his walking patron goddess Minerva, flanked on either side by the two triumphal quadrigas of Vespasian and Titus, each of which are pulled by four horses. Cf. *infra*, in Chapter V.1.i.3.b); at Section III., and the caption of here Fig. 120.

For further discussions of this point see also *infra*, in Chapter I.2., at ns. 241 and 242; in Chapter III., with n. 458; in Chapters V.1.i.3.); Chapter *The major results of this book on Domitian*; and *infra*, in volume 3-2, in *A Study on the consequences of Domitian's assassination ...; Introduction*; at Section I.; and at Appendix I.c). For Domitian's military 'adventure' in Gaul and Germany in AD 70; cf. *infra*, at Chapters I.1.; I.2., with ns. 229; 230; n. 458 in Chapter III.; in Chapter V.1.i.3.a); and *infra*, in volume 3-2, at Appendix I.c).

*Ad f)* We know now that the military campaigns, conducted by Domitian when he was emperor, were very successful. As already said above, the assertions by Tacitus, Suetonius and Dio Cassius, all of whom have denigrated these military successes, are definitely *not* true.

For a detailed discussion of this point; cf. *supra*, at Section I. in this *Preamble*.

**In addition to this, we should not forget that Tacitus and Suetonius wrote their negative accounts about Domitian and his wars only *after* Domitian's assassination;**

**g) and most importantly: I myself follow the above-mentioned statement by Jocelyn M.C. Toynbee (1957, 9-10, quoted *verbatim infra*, n. 233, in Chapter I.2.), according to which we cannot possibly expect Domitian to represent a negative statement about himself in any of his state reliefs, for example in the Cancellaria Reliefs.**

**To conclude.** After what was said above, the Cancellaria Reliefs cannot have been meant "by Domitian to justify two events in his career which were subject to criticism", as Sheldon (2023, in press) writes, who quotes for this statement Hugh Last (1948, 9-14). **The reason being that both points of critique have only been invented after Domitian's death.**

For discussions of Domitian's meeting with Vespasian in AD 70 at Beneventum; cf. *infra*, in volume 3-2, at Appendix IV.d.4.b) *Domitian's building project comprising the Campus Martius, the Capitoline Hill and the sella between Arx and Quirinal. With detailed discussion of the Templum Pacis, and some remarks on Domitian's Villa, called Albanum*; below at Chapter II.3.1.c) *Domitian's building policy: praising the gens Flavia, emulating Augustus and Nero*; and at Chapter V.1.i.3.) *My own hypotheses concerning the design, manufacture, and meaning of both friezes of the Cancellaria Reliefs, the structure to which they may have belonged, and the reason, why this structure was destroyed.*

*Post scriptum*

to `the summary of the scholarly discussion concerning the Cancellaria Reliefs, provided by Rose Mary Sheldon (*Guarding the Caesars. Roman Internal Security under the Flavian Dynasty*, 2023, in press; Chapter 7; Section: "The Cancellaria Reliefs")`

Only after having finished writing my comments on Rose Mary Sheldon's summary of the scholarly discussion of the Cancellaria Reliefs, did I read Paolo Liverani's (2021) relevant conclusions. I will quote them in the following, because they are so different from what we have just heard above. Contrary to myself, Liverani (2021) is of the opinion that the portrait of Vespasian on Frieze B of the Cancellaria Reliefs (cf. here **Fig. 2; Figs. 1 and 2 drawing: figure 14**) has been reworked from a portrait of Domitian. Apart from this detail, I very much agree with Liverani's conclusions.

Paolo Liverani (2021, 87) writes:

"In this case, too [*i.e.*, Frieze B of the Cancellaria Reliefs], the original Emperor must be recognized as Domitian ... **The two friezes of the Cancellaria Reliefs complement each other: the military *profectio* and the civic *adventus* allude to the military virtues and good fortune of the Emperor [*i.e.*, Domitian]. At the same time, they demonstrate the legitimacy of the Emperor's [here Liverani obviously refers again to Domitian, but this is also true for Vespasian] power displayed before one of the most prestigious priestly colleges of Rome, the Vestal Virgins, and before Rome itself [does Liverani only want to say: 'before the *Dea Roma*', or does he also mean: *and the Genius Senatus, and the Genius Populi Romani* = together the 'SPQR'?; my emphasis]". - For the same passage in the Italian version of this article; cf. now Liverani (2023, 118).**

*Post scriptum*

to the gesture Domitian is making  
with his right hand on Frieze A of the Cancellaria Reliefs

For this representation of Domitian on Frieze A of the Cancellaria Reliefs; cf. here **Fig. 1; Figs. 1 and 2 drawing: figure 6**. When looking at the coins, which represent the *Equus Domitiani*, I have the impression, that in this portrait-statue Domitian was making the same gesture with his right hand as on Frieze A of the Cancellaria Reliefs, the (possible) meaning of which we have discussed above. For the coins, representing the *Equus Domitiani*; cf. Filippo Coarelli (2009b, 79, Fig. 17, p. 81 with ns. 140, 141). Fortunately in the case of the *Equus Domitiani*, we have a description of this gesture by Statius (*Silv.* I,1), as well as his interpretation of it.

Jane Fejfer ("The Image of the Emperor: Seeing Domitian", 2021, 78) writes about the *Equus Domitiani*:

"**Depicted on coins and praised, as mentioned above by Statius, it [*i.e.*, the *Equus Domitiani*] showed the emperor as military commander holding in his left hand a figure of his patron goddess Minerva while raising his right arm in a *vetat pugnas* (banning battles) gesture [my emphasis]**". For this gesture, Domitian is making in this portrait-statue; cf. also Cairoli F. Giuliani ("Equus: Domitianus", in: *LTUR* II [1995] 228).

Antony Augoustakis and Emma Buckley ("Man and God: Literature", 2021, 161) comment on Statius' description of the gesture, Domitian is making with his right hand in the *Equus Domitiani*, as follows:

"**The first poem [by Statius] does not gaze at Domitian directly .... focusing in particular on a colossal equestrian statue of the Emperor [*i.e.*, the *Equus Domitiani*] erected in the Forum Romanum to celebrate Domitian's military victories over the Dacians and Chatti. [with n. 15, providing references] ... Statius blurs statuary with human form to describe a godlike Domitian whose peace-demanding posture quells further war but retains clear martial menace [with n. 16] :**

*dextra uetat pugnas, laeuam Tritonia uirgo non grauat et sectae praetendit colla Medusae, ceu stimulis accendit equum; ...*

**Your right hand bans battles.** The Tritonian maiden (sc. Minerva) is no burden to your left as she holds out severed Medusa's neck as though to spur the horse forward [my emphasis]".

In their **note 16**, Augoustakis and Buckley write: "*Silvae* 1.1.37-44".

### **Ad 3.) Domitian's achievements as emperor and the airport Berlin Brandenburg**

In connection with his research on Trajan's Column, it was first Martin Beckmann ("Planning and Execution of the Frieze of Trajan's Column: the Case of Scene CXII", 2017), who has mentioned the airport Berlin Brandenburg in connection with this ambitious project - which, in its turn, belonged to the enormous building site of the Forum of Trajan. In the meantime it has been realized that this mega-building site, which should result in the Forum of Trajan, had been connected from its very beginning with the likewise huge building-site of the (future) Baths of Trajan, and that both buildings had been planned and begun by Domitian. - To this I will come back below.

**I, therefore, borrow here Beckmann's (2017) idea to compare Domitian's building projects in Rome with the Flughafen Berlin Brandenburg.**

After analysing the obvious planning problems concerning the Frieze of Trajan's Column, Beckmann (2017) convincingly states that such mismanagements of great building-projects, as the one discussed by him, are by no means rare. And because at the time, when he was writing this article, this mega-project was much discussed, Beckmann mentioned as a contemporary example the airport Berlin Brandenburg.

Beckmann (2017, 83 with n. 25) quotes critical voices concerning the management of this huge building site airport Berlin Brandenburg, which I will quote *verbatim* in the following.

**I am mentioning the example of the mismanagement of the airport Berlin Brandenburg here, because, when comparing this airport with the sheer number and size of Domitian's building projects at Rome, it becomes clear that Domitian's management of his building sites was obviously *excellent*.**

**Domitian reigned for 15 years, from AD 81-96. The decision to erect the airport Berlin Brandenburg was made in 1996, but the airport could only be opened on 31st October 2020, that is to say, 24 years after first planning it, and after its opening had to be postponed for seven times.**

**After having analysed the design and execution of the spiral Frieze of Trajan's Column in great detail, Martin Beckmann (2017, 83) concludes that this project had obviously been planned very badly :**

"This suggests the lack of comprehensive, detailed planning for the frieze [of Trajan's Column] ... Though the evidence for such a scenario is strong ... it is still difficult for a modern observer to imagine that such a complex task as carving the frieze of Trajan's Column could be approached without minute planning. But this should not come as a great surprise, since such a situation is hardly unknown in the field of architecture. Even the largest and most complicated projects can be undertaken with incomplete or insufficient planning, sometimes resulting in significant problems. Most recently, planners of the new Berlin Brandenburg airport have been accused of completing only 10% of their work before the start of construction. [with n. 25]"

In his **note 25**, Beckman writes: "An den ausführenden Bauunternehmen liege die Verzögerung nicht, betonen die beiden großen Interessenverbände der Bauwirtschaft. Stattdessen hätten fehlende Planung und mangelnde Sachkompetenz auf Seiten des Auftraggebers zu diesem Chaos geführt. **Wenn zu Baubeginn von geschätzten 6000 Einzelplänen nur rund 10 Prozent fertig waren, ließ das nur einen Schluss ziehen: Der Bauherr wusste nicht genau, was er haben wollte - außer vielleicht, dass es ein Flughafen sein sollte**", sagt Felix Pakleppa, Hauptgeschäftsführer des Zentralverbandes Deutsches Baugewerbe. "Frankfurter Allgemeine Zeitung, Wed. 9 Jan. 2013, "Das Aushängeschild Berliner Flughafen wird zum Schandmal" [my emphasis]"

**On the Website of the 'Flughafen Berlin Brandenburg Willy Brandt' we find the information that in 1996 was decided to erect this airport and that it was opened on 31st October 2020.**

Cf. online at:

<<https://corporate.berlin-airport.de/de/unternehmen-presse/historie/flughafen-berlin-brandenburg-willy-brandt.html>>. Visited 4th April 2023.

" 2000 – 2004: Planfeststellungsverfahren mit Auslegung der Unterlagen und öffentlichen Anhörungen.

1999: Unterzeichnung der Verträge zur Umsiedlung der Gemeinde Diepensee und der Teilumsiedlung der Gemeinde Selchow.

1997 – 2003: Verhandlungen über die Privatisierung des Bauvorhabens und Vergabeverfahren. Die Privatisierung wird schlussendlich nicht umgesetzt und die Planungsunterlagen gehen an die Flughafengesellschaft über.

1996 – 1999: Planung des Flughafens und Einreichung des Planfeststellungsantrags

1996: Konsensbeschluss der Gesellschafter Berlin, Brandenburg und Bund: Die Gesellschafter verzichten auf den Neubau eines Flughafens für die Region. Stattdessen soll der bereits existierende Flughafen Schönefeld zum Airport Berlin Brandenburg International BBI ausgebaut werden. Die innerstädtischen Flughäfen Tegel und Tempelhof sollen geschlossen werden.

Einfach aufmachen: Am 31. Oktober 2020 ist das Terminal 1 des Flughafens Berlin Brandenburg Willy Brandt (BER) mit der Ankunft der ersten beiden Flugzeuge von easyJet und Lufthansa eröffnet worden ...".

**But note that other scholars judge the Column of Trajan very differently than Martin Beckmann (2017).**

See the exhibition-catalogue, edited by Giovanni Di Pasquale: *L'arte di costruire un capolavoro: la colonna Traiana* (2019).

**In this Study, Domitian's building projects in Rome have been discussed in great detail.**

Cf. *infra*, in volume 3-2, at *Appendix IV.d.4.) Domitian's building projects at Rome, discussed in this Study*;

at *Appendix IV.d.4.a) Domitian's building project 'Colosseum City'*;

at *Appendix IV.d.4.b) Domitian's building project comprising the Campus Martius, the Capitoline Hill and the sella between Arx and Quirinal. With detailed discussion of the Templum Pacis, and some remarks on Domitian's Villa, called Albanum*;

at *Appendix IV.d.4.c) Domitian's building projects at Rome. Conclusions arrived at in Appendix IV.d. With The first Contribution by Eugenio La Rocca.*

As a result of this Chapter it seems to be clear that Domitian, who destroyed the sella between the Quirinal and the Arx, in order to erect his huge forum there (the later 'Forum of Trajan'), had used this excavated material to fill in a valley on the Mons Oppius. This finding invited the further assumption that already Domitian had planned to erect at this site great public baths, the now so-called 'Baths of Trajan'. The confirmation that Domitian had actually started building those baths, reached me only afterwards;

See also below, at *The first Contribution by Eugenio La Rocca.*

**See most recently for the fact that Domitian had started his Mega-Forum which should become the Forum Traiani:** Antonella Corsaro and Beatrice Pinna Caboni (in: A. CORSARO, B. PINNA CABONI and C. PARISI PRESICCE, "Domiziano, Nerva e il loro Foro", 2023, 70), and Gian Luca Gregori and Valerio Astolfi ("La damnatio memoriae di Domiziano. Iscrizioni e monumenti di Roma", 2023, 161 with ns. 19-20).

**And concerning the Baths of Trajan, Gregori and Astolfi (2023, 161) write :** "La medesima operazione di appropriazione da parte di Traiano potrebbe riconoscersi nel complesso termale della *regio III* (colle Oppio), che secondo le fonti letterarie sarebbe stato edificato da Domiziano [with n. 21]".

In their **note 21**, Gregori and Astolfi write: "Anderson 1983, pp. 102-104; Packer 1997, pp. 3-4".

Domitian rebuilt/ restored great parts of Rome, which had been destroyed by the fire on the *Capitolium* on 19th December 69, and again in the great fire of AD 80. Concerning his building projects at Rome, I have

come to conclusions that are summarized *infra*, in Chapter: *The major results of this book on Domitian*. In the following, I anticipate the essential results from the Chapter *The major results of this book on Domitian*:

**1.) Domitian's enterprises [*inter alia* concerning his building projects at Rome] were without any doubt important accomplishments for the public good.**

**2.) Thanks to Domitian's enterprises and those of his family, Rome is still nowadays basically a Flavian city.**

I have borrowed the formulation of my 2.) point from the two epigraphs of Eric M. Moormann's article ("Domitian's remake of Augustan Rome and the Iseum Campense", 2018, 161), which read: "A visitor to Rome today cannot avoid the Flavians" [with n. 1], and: "To the modern visitor the centre of Rome presents itself as essentially a Flavian city" [with n. 2]. In his **note 1**, Moormann writes: "Darwall-Smith 1996, 17 ...". In his **note 2**, he writes: "Boyle 2003, 29 ...".

In his most recent discussion of this subject; cf. Moormann ("Domitian's Reshaping of Rome", 2021, 43-44), he even writes: "**Due to Titus' [page 44] premature death in September 81, Domitian could shape the town into a real Domitianopolis** without trespassing the ambitions of his father and brother (fig. 1) [with n. 4, providing references; my emphasis]".

In his note 1, Moormann (2021, 43) mentions the essay by Katherine E. Welch ("Neropolis", 2018).

For 'Neropolis'; cf. also T.P. Wiseman (2019, 35).

In the Italian version of this article, Moormann ("Il riordinamento di Roma sotto Domiziano", 2023, 62) has made a relevant addition to his final statement: "**Tutte queste attività edilizie mostrano come Domiziano abbia meticolosamente ancorato i suoi progetti ai programmi costruttivi di Augusto e Nerone**, evitando tuttavia, accuratamente, di essere indicato come un tiranno, come invece era accaduto al pur ancora ammirato Nerone [with n. 38, providing references], **per sottolineare, invece, l'importanza degli edifici di pubblica utilità, come già fatto da Vespasiano e Tito nei decenni immediatamente precedenti. E così creò davvero la sua "Domizianopoli"** [my emphasis]".

After what was said so far in this point 3.), I recommend that the reader, who looks at the above-mentioned *Chapters* of this *Study* that are dedicated to Domitian's building projects in Rome, should keep in mind the following. The airport Berlin Brandenburg was erected in 24 years, whereas Domitian succeeded in 'rebuilding/ restoring great parts of the entire city of Rome' in the short period of the 15 years of his reign.

**In the following, I wish to alert the reader to some important observations concerning the subjects discussed here, made by Sablayrolles (1994), whose account has been overlooked by most scholars, who have discussed Domitian recently; I myself have likewise only been alerted to it after all my above-quoted *Chapters* had already been written. Sablayrolles adds many more observations to my point 1.) Domitian's enterprises were without any doubt important accomplishments for the public good'.**

I myself concentrate in this *Study* predominantly on Domitian's *visible* buildings at Rome, erected anew or restored after the devastating fires of AD 69 and 80, and in some cases also on their (former) sculpture decorations. Concerning this point, I have come to the following conclusion, written for *infra*, Chapter I.2.:

'One thing is clear, Domitian provided superb chances for marble workers and all kinds of people, who collaborated with them. **Their results are especially noteworthy, as pointed out by Francesca Ghedini [1986, 299, 291-292] and John Pollini [2012, 103; both quoted *verbatim infra*, in Chapter I.2., at n. 227], in the vast field of politically motivated iconographies. It therefore seems, as if Domitian not only commissioned new buildings at Rome at a truly 'pharaonic' scale - as Julius Caesar's relevant activities have aptly been characterized by Eugenio La Rocca [with n. 228] - but also, that Domitian's relevant initiatives, by creating an atmosphere of artistic experimentation and innovation, are nothing less than pioneering [my emphasis]'.**

To this I should like to add some further observations concerning the innovations that characterize the marble reliefs, commissioned by Domitian. Already Diana E.E.Kleiner (1992, 183) describes as "one of the hallmarks of Domitianic art" that, on the Nollekens Relief (here **Fig. 36**), "the human emperor interacts with divinities and personifications"; in addition to this, she observes "that the figures [of this relief] are almost frontal".

In the following, I, therefore, anticipate another passage, written for *infra*, Chapter *V.1.i.3.a*):

**“What then are the innovative ideas that characterize the relief here Fig. 33 from Domitian's *Templum Gentis Flaviae*, which represents Vespasian's *adventus* into Rome in the first half of October AD 70 ?**

1.) As was already mentioned above: the application of a ‘hierarchy of scale’, which is therefore proven to have already started under Domitian, a fact which was previously unknown. Or rather: this innovation was earlier (erroneously) attributed to Trajanic/ Hadrianic art [cf. *infra*, in Chapter *II.3.3.*, and here **Fig. 46**: the reliefs from the Arch of Trajan at Beneventum]; 2.) Vespasian in the relief from the *Templum Gentis Flaviae* (here **Fig. 33**), who is accompanied by an entourage, ‘faces’ the beholder, who thus becomes himself or herself one part of the receiving party. There is no better way to ‘integrate’ a beholder into a composition than by this seemingly simple decision’.

From Claudio Parisi Presicce we learn that also the design of Domitian's arches became standard ("The Arch of Titus in the Circus Maximus", 2021a, 53; cf. *id.* 2023, 110, the Italian version of this essay): "Under Domitian, in Rome the practice to frame the archway with a pair of columns set against the pillars, came into being ... The Arch of Titus [here **Fig. 121**] in the Circus Maximus displayed, for the first time in Rome, the type with four entirely round columns on the front sides - two on the outside and two in the middle between the central major passage and the two lateral ones - completely detached from the body of the structure. This scheme ... would become standard in the three-arched arches of the middle Empire [my emphasis]". He discusses also the Arch of *Divus Titus* on the *Velia* (here **Fig. 120**) and the "ARCUS AD ISIS" on the relief from the tomb of the Haterii (here **Figs. 89; 90**), both of which are Domitianic. Cf. below, in Chapter *IV.1.1.g*).

Apropos, the innovations, created by Domitian's artists. In this context, I wish to anticipate, in addition to this, a passage from a text that was written for *infra*, Chapter *V.1.i.3.b*); at Section *III*.

The following are Roberta Alteri's (2023, 34 with n. 21) observations concerning the architectural marbles of Domitian's Palace on the Palatine: "**Questa ricchezza e particolarità delle varianti** [of the applied architectural marbles] **presenti nella residenza domiziana** [*i.e.*, his Palace on the Palatine] **assurgeranno a modello e diventeranno prototipo delle botteghe dei periodi successivi, che ripeteranno lo stile di Domiziano, specialmente quello palaziale, ancora nel II e nel III secolo d.C.** [with n. 21; my emphasis]".

In her **note 21**, Alteri writes: "**Pensabene, Caprioli 2009; Caprioli 2021** [my emphasis]”.

Let's now return to our main subject.

Contrary to my own just-quoted main interest pursued in this *Study*, I have addressed Domitian's great efforts concerning the supply of the people of Rome only *infra*, in volume 3-2, at *Appendix IV.d.4.b*) on Domitian's building projects in Rome, and in my *Chapter* on *La Marmorata* (to which I will come back below).

**Sablayrolles (1994) on the other hand, is, in addition to this, interested in Domitian's likewise gigantic projects concerning the restoration of great parts of the City's (in part invisible) infrastructure, which had also been destroyed in the fire of AD 80, and concerning the supply of the people of Rome with all goods needed. I am happy to admit that these achievements of Domitian are also grandiose and admirable, and, in reality, at least of equal importance as his very famous and (in part) still visible buildings.**

Sablayrolles (1994, 113) reminds us of the following facts. Domitian's *damnatio memoriae* had dramatic effects on the visible structures and statues, built and erected by the emperor in Rome, especially on his inscriptions. In the *fistulae aquariae*, on the other hand, Domitian's name could, of course, not be erased, because those water conduits were built underground, and were, therefore, *not visible*. As a matter of fact, Domitian's name appears on the *fistulae aquariae*, found at Rome, much more frequently than that of any other emperor, for example the names of the Emperors Trajan and Hadrian, which proves in Sablayrolles's convincing opinion Domitian's very important care for this part of Rome's infrastructure :

"Si la *damnatio memoriae* fut à la mesure de l'oeuvre accomplie, radicale et gigantesque, l'archéologie n'en confirme pas moins les données littéraires, lorsqu'elle rend compte des vestiges conservés, par hasard ou par nécessité, de l'oeuvre urbaine de Domitien. **Ainsi, comme le remarquait déjà justement S. Gsell, la marque de Domitien sur les conduites d'eau en plomb de la ville - qui échappèrent par leur position souterraine à la fureur iconoclaste des briseurs de statues et d'inscriptions - est la plus fréquente dans le corpus des *fistulae plumbeae*, avant celles de Trajan et d'Hadrien, témoignage concret, significatif - et conservé, à la différence d'autres - de l'ampleur des travaux de l'empereur [i.e., of Domitian; my emphasis]**".

In his **note 3**, Sablayrolles writes: "S. Gsell, *Essai sur le règne de Domitien*, Paris, 1892, p. 117. A s'en tenir au seul index du *CIL XV*, on recense 16 exemples de marques appartenant à Domitien, pour 10 à Trajan et 10 à Hadrien".

For those *fistulae aquariae*, which carry the names of Domitian, Trajan and Hadrian; cf. also Christer Bruun (1991, 33-34), who lists also the names of all the other emperors. Bruun's documentation proves that Gsell (1892) and Sablayrolles (1994) were right in asserting that by far the most *fistulae aquariae* with a name of an emperor, that were so far found at Rome, are those of Domitian.

See now also Christer Bruun (2022) for the point discussed in the following: the supply of the City of Rome with all goods needed that were transported on the Tiber (to this I will come back below).

Sablayrolles (1994, 115) writes that Domitian and his consultants concentrated on three essential problems of urban life in ancient Rome: security, supply and water : "L'empereur et ses conseillers en la matière s'attaquèrent à trois problèmes essentiels de la vie urbaine antique : la sécurité, l'approvisionnement, l'eau [my emphasis]".

To Sablayrolles's (1994, 115) statement concerning Domitian's care for the supply of Rome with water, I should like to add the observations, made by Francesco Paolo Arata concerning the branch of the *Aqua Claudia*, built by Domitian from the Caelian to the Palatine to supply his '*Domus Flavia*'/ *Domus Augustana* with water. Arata is able to document the precise course of this branch that was previously incorrectly reconstructed (cf. *id.*, "L'acquedotto della *Claudia* tra il Celio e il Palatino alcune note", 2012).

Since AD 62, the aqueduct *Aqua Claudia* did not deliver water to the Caelian any more. Vespasian and Titus started a huge project to repair the *Aqua Claudia*, finished by Domitian, who also built its extension to the Palatine. This branch of the *Aqua Claudia* was carried by the imposing, partly extant aquaeduct, it comprised 3-4 storeys, and was 300 m long and circa 37 m high. Cf. *infra*, in volume 3-2, in *Appendix VI.*; at Section *XII*.

Sablayrolles (1994, 115), after mentioning the fact that the fire of AD 80 had destroyed important parts of Rome's infrastructure, lists in the following Domitian's measures that aimed at preventing such great fires in the future: *inter alia* by founding at Rome's port Ostia the barracks of a new fire brigade :

"Sur le plan administratif, Domitien renforça l'organisation des cohortes de vigiles destinées par leurs rondes permanentes à prévenir le déclenchement du sinistre. La construction d'une caserne de vigiles à Ostie prouve qu'à partir de cette époque y frut expédiée régulièrement une *vexillatio* de vigiles pour surveiller le port".

We shall see in this *Study* that this decision of Domitian and his consultants was especially far-sighted, because Tacitus (*Ann.* 15,18,2, who does not say when exactly all this had happened) tells us the following. On one occasion, 200 ships (with goods from abroad) had been destroyed during a thunderstorm at the *Portus Augusti*, and on another occasion, 100 ships (also with goods from abroad) had been destroyed by a fire. Those ships had been docked over night, one next to the other, somewhere on the banks of the Tiber between Ostia and Rome.

Cf. *infra*, in the *Chapter* on *La Marmorata*; Section I. *Introduction*, and below, at *The sixth Contribution* by Peter Herz : *Rom. Strukturen der Versorgung*. See also the essay, dedicated to the same subject by Christer Bruun ("Approvvigionamento, infrastruttura, trasporti", 2022), referred to in Section IV. of this *Chapter*, which I have only found when this volume was about to be sent to the press.- To this I will come back below.

**To Sablayrolles's (1994, 115) remarks concerning Domitian's care for the *vigiles*, we can now add further observations, made by Valentina Musella (2023, 55). She, in my opinion convincingly, tentatively suggests that Domitian's interest in the *Vigiles* may be explained with his personal positive experiences with them during the Civil War :**

"Inoltre, tra le attività di protezione dagli incendi Domiziano mise in atto diversi interventi [with n. 22], influenzato, forse, anche dal proprio vissuto. L'imperatore ripagò infatti la lealtà del corpo dei *Vigiles*, che si era schierato con la famiglia Flavia durante il *Bellum Vitellianum*, quando egli, a soli 18 anni, aveva rischiato di morire, tenendolo in grande considerazione. Promosse un progetto di prevenzione mantenendo le sette coorti e i quattordici *excubitoria* [with n. 23], aumentando il numero del personale, dotandoli di nuove caserme [with n. 24] e coinvolgendoli nelle celebrazioni rituali come i *Volcanalia*, ed erigendo, finalmente, le *Arae incendii Neroniani* [with n. 25]. Circondate da un recinto rituale delimitato da cippi e da una cancellata metallica, le are, erette per scongiurare il propagarsi di nuovi incendi, furono dedicate da Domiziano a Vulcano, dio del fuoco distruttore, per portare a compimento il *votum* contratto da Nerone e mai mantenuto (fig. 4) [my emphasis]".

In her note 22, Musella writes: "22 Già Nerone, dopo aver emanato le *Ignibus reprimendis* che stabilivano accorgimenti tecnici volti a scongiurare nuovi incendi, come la realizzazione di strade più larghe, un'altezza limite per gli edifici, l'apertura di piazze e il divieto di utilizzo del legno, consapevole che per assicurarsi la protezione dagli incendi era necessario riottenere il favore delle divinità, consultò ``i libri sibillini e ricorse ad un insieme di riti espiatori rivolti a Vulcano, Cerere e Proserpina`` (Tac. *ann.* 15, 43-44)".

In her note 23, she writes: "Sulle sedi dei vigili *LTUR* I, pp. 292-294, s.v. *Vigiles* [A.M. Ramieri]".

In her note 24, she writes: "Ramieri 1990, p. 27; Sablayrolles 1996, pp. 49, 791; Astolfi 2021, p. 106 e nota 50".

In her note 25, she writes: "Note anche come *Arae Incendii Neronis*, con un latinismo riduttivo e fuorviante (Closs 2014 [corr.: V.M. CLOSS 2013], p. 229), le are riportano le iscrizioni *CIL* VI 30837a (dal Vaticano), *CIL* VI 30837b (dal Quirinale) e *CIL* VI 30837c (dall'Aventino). Di questi altari dedicati a Vulcano sono stati rinvenuti due esemplari *in situ*, presso l'Alta Semita sul Quirinale (per Coarelli l'esemplare del Quirinale è lo stesso di quello non *in situ* rinvenuto nell'area vaticana, Coarelli 2014a [*i.e.*, here F. COARELLI 2014], p. 267) e alle pendici orientali dell'Aventino, e uno in giacitura secondaria (forse 14 se si considera un esemplare per ogni *regio*), ma ne dovevano esistere altri".

**These so-called *Arae Incendii Neronis*, erected by Domitian, are also in so far of interest in the context discussed here, because on their inscriptions, the name of Domitian and his title has *not* been erased.**

Cf. Gian Luca Gregori, Valerio Astolfi ("La *damnatio memoriae* di Domiziano. Iscrizioni e monumenti di Roma", 2023, 159-160): "Un caso interessante è costituito, tra le iscrizioni sacre, dai cippi di delimitazione di aree colpite dall'in- [page 160] cendio neroniano e che menzionano lo scioglimento di un voto da parte di Domiziano, la prescrizione di riti per Vulcano (il 23 agosto) e il divieto di commerciare e stazionare nell'area [with n. 10]".

In their **note 10**, Gregori and Astolfi write: "*CIL VI 30837a = EDR177974; CIL VI 30837b = EDR177975; CIL VI 30837c = EDR177976: tre iscrizioni identiche, ma solo quella rinvenuta nel 1640 presso S. Andrea sul Quirinale e oggi dispersa, conservava il nome e la titolatura di Domiziano: CIL VI 30837b = EDR177975; vd. Coarelli 2014a [i.e., here F. COARELLI 2014], pp. 264-267; Lauro 2019; Scheid 2019, pp. 55-59; Astolfi 2021 [my emphasis]*".

For further discussion of this subject; cf. also Virginia Closs ("*Neronianis Temporibus: the So-Called Arae Incendii Neroniani and the Fire of A.D. 64 in Rome's Monumental Landscape*", 2016).

Cf. also *infra*, in volume 3-2, at *Appendix IV.d.4.b) Domitian's building project comprising the Campus Martius, the Capitoline Hill and the sella between Arx and Quirinal. With detailed discussion of the Templum Pacis and some remarks on Domitian's Villa, called Albanum.*

Sablayrolles (1994, 116) then turns to Domitian's measures that aimed at the supply of the people of Rome with food and comes to the (in my opinion convincing) conclusion that Domitian and his consultants had developed a grandiose master-plan to control each step of this very complex process :

"Dans le domaine de l'approvisionnement, Domitien fit preuve de la même *diligentia*, assurant le support architectural et urbanistique indispensable à toutes les étapes du processus. Nous avons déjà rappelé que c'est à lui qu'Ostie devait une protection identique à celle de la capitale par l'installation d'une *vexillatio de vigiles*. Située à proximité du quartier de l'approvisionnement en blé (la place des corporations), la caserne assurait de toute évidence en priorité la sécurité des *horrea*. A Rome, le Chronographe de 354 rappelait la reconstruction des *horrea piperataria*, à l'emplacement de la future basilique de Constantin sur le Forum et des *horrea Vespasiani*, dont la localisation est inconnue [their location is now known; cf. *infra*]. Les études archéologiques récentes faites sur le Champ de Mars près de San Paolo alla Regola confirment cette activité édilitaire en matière de stockage [with n. 11]. L. Quilici a montré que ces constructions s'inséraient dans un vaste complexe d'*horrea*, qui devait couvrir toute la partie orientale du quartier, le long du Tibre [with n. 12]. Même en matière d'édifices utilitaires, la politique de Domitien ne perdait pas son aspect grandiose et le fonctionnel s'accordait en la circonstance avec le gigantesque; les solutions architecturales étaient à la mesure du problème. C'est aussi dans le cadre de la reconstruction du champ de Mars après l'incendie de 80 que prirent place les travaux de la *Porticus Minucia Vêtus* mentionnés par le chronographe de 354. Certes, la *Minucia Vêtus*, identifiée justement par F. Coarelli avec l'*area sacra* du Largo Argentina, est à distinguer de la *Minucia Frumentaria* qui lui était cependant attenante, comme en témoignent les fragments 322 et 35 ee de la *Forma Urbis* [i.e., the Severan Marble Plan] tels qu'ils ont été replacés par L. Cozza [with n. 13]. L'ampleur de l'incendie de 80, qui détruisit les trois édifices encadrant la *Minucia Frumentaria* (*Diribitorium* et *Theatrum Balbi* selon Dion Cassius, *Minucia Vêtus* selon le Chronographe de 354) ne laisse aucun doute sur la réalité du sinistre [with n. 14]. De la source d'approvisionnement à Ostie jusqu'à la distribution des rations aux ayant droit en passant par les aires de stockage, Domitien et ses conseillers avaient donc eu soin d'assurer l'infrastructure indispensable à l'approvisionnement de la cité. Ces réalisations révèlent une analyse globale du problème, un plan cohérent de solutions et une exécution à la dimension tout à la fois des difficultés de l'entreprise et du génie organisateur de l'équipe impériale [my emphasis]

In his **note 11**, Sablayrolles writes: "Ces découvertes ponctuelles, faites en 1914-1915 et 1929 lors de travaux de restauration du Ministerio [!] di Grazia e Giustizia, via di S. Paolo alla Regola, n'ont fait l'objet que de publications peu connues et peu accessibles (G. Parisi, *S. Paolo alla Regola*, Rome, 1931, p. 29-31), selon L. Quilici qui a repris l'ensemble des données dans un article récent : Roma. Via di S. Paolo alla Regola. Scavo e reapero [!] di edifici antichi e medioevali, dans *Notizie degli Scavi di Antichità*, 8ème série, XL-XLI, 1986-1987 (1990), p. 175-416. Voir en particulier, sur ces découvertes précises, p. 190 et note 27".

In his **note 12**, he writes: "L. Quilici, *article cité* note 11, p. 403".

In his **note 13**, he writes: "L. Cozza, *Pianta Marmorea Severiana : nuove ricomposizioni di frammenti*, dans *Quaderni dell'Istituto di Topografia Antica dell'Università di Roma*, V, 1968, p. 9-20. Pour l'identification de F.

Coarelli, voir F. Coarelli, U. Nyberg, M. Steinby, *L'Area Sacra di Largo Argentina*, 1, Rome, 1981, p. 32 et F. Coarelli, L'identificazione dell'Area Sacra dell'Argentina, dans *Palatino*, 12, 1968, p. 365-373".

In his **note 14**, he writes: "Le seul avis contraire est celui de F. Castagnoli, selon qui, seule, la *Minucia Vêtus* aurait brûlé (*Il Campo Marzio nell'antichità, Memorie dell'Accademia dei Lincei*, s. VIII, vol. I, 4, 1946, p. 93-113, et p. 176-177). La localisation de la *Minucia Vetus* sur les vestiges de l'*Area Sacra* montre qu'elle encadrait, avec le théâtre de Balbus et le *Diribitorium*, la *Minucia Frumentaria*. L'incendie qui touchait ces trois édifices ne pouvait donc pas épargner le quatrième".

For the controversy, (in part) summarized by Sableyrolles (1994, 116), which revolves around the identifications/ locations of the *Porticus Minucia Vetus* and of the *Porticus Minucia Frumentaria*, built by Domitian; cf. also Häuber (2017, 20, 59-60); Coarelli (2019a, 229-267), and below, at Chapter II.3.1.c); and at *A Study on the colossal portrait of Hadrian (now Constantine the Great) in the courtyard of the Palazzo dei Conservatori at Rome* (cf. here Fig. 11). With The Contribution by Hans Rupprecht Goette on the reworking of the portrait of Hadrian (now Constantine the Great); at Part II.; Section III.

On our maps also the other buildings, mentioned by Sableyrolles (*op.cit.*) are marked; cf. here **Figs. 58; 59**, labels: DIRIBITORIUM; Largo Torre Argentina; Republican temples; IUTURNA; FORTUNA HUIUSCE DIEI; FERONIA; LARES PERMARINI; Via delle Botteghe Oscure; PORTICUS MINUCIA FRUMENTARIA; AEDES: NYMPHAE.; THEATRUM BALBI.

And for the location of the *Horrea Vespasiani*, mentioned by Sableyrolles (1994, 116); cf. Emanuele Papi ("Horrea Vespasiani", in *LTUR* III [1996] 49-50, Figs. 33-34; V [1999] 263); and here **Fig. 71**, labels: SACRA VIA; VELIA; HORREA VESPASIANI.

**Also Eric M. Moormann (2018, 173) observes the fact that the *Campus Martius*: "was an emblem of the emperor's [i.e., Domitian's] goodness, as shown in the distribution of grain and oil ... [my emphasis]", thus referring to the *Porticus Minucia Frumentaria*, built by Domitian.**

For further discussion of this point; cf. *infra*, at Chapter II.3.1.c).

**As mentioned above, part of Domitian's master-plan to supply the people of Rome with all goods needed, as described by Sableyrolles (1994, 116), has also been discussed in this Study.**

For example by trying to answer the question, how not only those goods, but also how the enormous masses of building material, needed for Domitian's building projects at Rome, had reached the City. This I have done by concentrating on ancient Rome's new commercial river port to the south of the Aventine, in the quartiere Testaccio, at *La Marmorata* (cf. here **Figs. 102; 102.4; 103**). This place was called like this because of the incredible quantities of building material, brought there in antiquity, which has been extracted in this area in past centuries.

Not surprisingly, recent excavations at *La Marmorata* have shown that most of those marble blocks, imported in antiquity from far away marble quarries all over the Mediterranean, that carry consular dates, had been brought there under Domitian; cf. Pensabene and Domingo (2016-2017, 573 with n. 161).

Also Domitian 'himself' was involv'd in this documentation of the marble trade on the Tiber: he commissioned for the new Iseum Campense, which he built after the great fire of AD 80 had destroyed the earlier sanctuary, two colossal marble statues of the River gods Tiber and Nile (here **Fig. 104**), which were on display in the water basin in front of Domitian's Temple of Serapis (cf. here **Figs. 58; 59; 61; 82**); these statues are in the Vatican Museums and in the Louvre, respectively. On the plinth of the River God Tiber appears a relief, showing three small ships on the Tiber (here **Figs. 105; 106**). The ship in the middle is transporting a huge block of marble and this is actually the only extant representation of the marble trade on the Tiber.

Cf. *infra*, at *A Study on the colossal portrait of Hadrian (now Constantine the Great) in the courtyard of the Palazzo dei Conservatori at Rome (cf. here Fig. 11)*. With The Contribution by Hans Rupprecht Goette on the reworking of the portrait of Hadrian (now Constantine the Great); at Part II. *Ancient Rome's new commercial river port, at La Marmorata. With discussions of the 'Porticus Aemilia' (in reality identifiable as Navalia) and of the Horrea Aemiliana*. With The sixth Contribution by Peter Herz : Rom. Strukturen der Versorgung; and with The second Contribution by Franz Xaver Schütz : Wie schwer war der ägyptische Obelisk, der heute auf der Piazza di S. Giovanni in Laterano in Rom steht?; at Section I. *Introduction*; and at Section II. *Ships in the Portus Augusti (here Figs. 98; 99) and on the Tiber (here Figs. 105; 106), which supplied the city of Rome with goods from all over the Empire, and the men, who provided these services*. See also below, at *The sixth Contribution by Peter Herz : Rom. Strukturen der Versorgung*.

Sablayrolles (1994, 125), who compares in this article Domitian with Augustus, comes to the conclusion that there were many parallels between the two men. Domitian was for example, intentionally, as Sablayrolles suggests, 'like Augustus, a prudent administrator' :

"Les rapprochements entre Auguste et Domitien sont, on le constate, nombreux. Conséquences, certes, d'identités de vues et de choix politiques dans bien des domaines - **Domitien, comme Auguste, fut un administrateur avisé** - , ils sont aussi le fruit d'une politique délibérée de l'empereur flavien [my emphasis]". Also Vignia Closs (2016, 116) writes about Domitian: "A **capable administrator, Domitian** augmented Rome's aggressive taxation measures, and his ambitious building programme is still apparent today in the city's landscape [with n. 62, providing references and further discussion; my emphasis]".

Of a different opinion concerning this point are Aurora Raimondi Cominesi, Nathalie de Haan, Eric M. Moormann and Claire Stocks (2021, 16):

"Scholars nowadays acknowledge the fact, for example, that "**his [i.e., Domitian's] grip on the empire's administration was no worse than [that of] many of the emperors before or after him** [my emphasis]".

And Nathalie de Haan, Eric M. Moormann, Aurora Raimondi Cominesi and Claire Stocks (2023, 17), write in the Italian translation of this text: "Gli studiosi oggi riconoscono, per esempio, il fatto che **Domiziano ... e che il suo modo di condurre l'amministrazione dell'impero non fosse tutto sommato peggiore di quello della maggioranza degli imperatori che l'avevano preceduto né di quelli che vennero dopo di lui** [my emphasis]".

Finally Sablayrolles (1994, 135) discusses (like many other scholars before and after him), whether Domitian had financial problems at the end of his reign, given his enormous building projects.

Cf. *infra*, in volume 3-2, at *Appendix IV.d.4.b*), where I have asked the same question. Quoting different modern commentators than Sablayrolles (*op.cit.*), I have come like him to the conclusion that this was *not* the case, and that Domitian's confiscations at the end of his reign were politically motivated.

In the following, Sablayrolles (199, 135), summarizes Domitian's achievements concerning his gigantic building projects at Rome.

Then he asks, whether in reality 'the famous *Pax Romana*' under the Antonine emperors had not already been achieved by Domitian, thanks to his excellent government. Sablayrolles points out all aspects of the consequences Domitian's government, his building projects at Rome, the economy of the Roman Empire, its society and its institutions. At the end of this discussion Sablayrolles, therefore, (in my opinion understandably) asks why this period is *not* called 'the age of Domitian', similarly as we are used to speak of 'the age of Augustus', and of 'the age of Pericles'. Sablayrolles himself answers this question as follows: Because Domitian ended as Augustus had begun, 'with a violent and bloody tyranny', Domitian's opponents have, as Sablayrolles suggests, therefore, consequently 'intentionally wiped out from history the memory of Domitian's achievements' :

"Si Domitien fut capable de réaliser, sans grands problèmes financiers, une entreprise aussi gigantesque d'urbanisme, plus que les difficultés du Trésor ne faut-il pas souligner les possibilités de l'empire quelles qu'elles aient été ? En d'autres termes, la *Pax Romana*, pourvoyeuse d'une richesse et d'une sérénité propices aux créations en tout genre, cette *Pax Romana* dont on fait le symbole du II<sup>ème</sup> siècle dit des Antonins n'est-elle pas plutôt la caractéristique essentielle du règne de Domitien, la raison première de son éclat, le fondement de son histoire ? Domitien, homme de son temps, aurait ainsi été l'instrument opératoire, l'élément cristallisateur qui aurait donné vie et forme à l'*Urbs* que, seule, rendait possible la prospérité d'un empire arrivé à un stade d'équilibre et de maturité sur le plan de l'économie, de la société, des institutions. **Pourquoi alors cette période, où se trouvaient réunies les conditions d'un classicisme triomphant, ne porte-t-elle pas le nom de Siècle de Domitien, comme il y eut un Siècle d'Auguste ou un Siècle de Périclès?** Parce que, bien sûr, **Domitien finit par là où Auguste avait commencé : une tyrannie violente et sanguinaire, ponctuée d'exils, d'emprisonnements et de meurtres. Parce qu'aussi une machiavélique réaction, à la mesure du despotisme de l'empereur, s'employa à rayer de l'histoire l'oeuvre accomplie avec le nom du Prince** [my emphasis]".

**Concerning the achievements of Domitian's reign, pointed out by Sablayrolles (1994, 135), Aurora Raimondi Cominesi, Nathalie de Haan, Eric M. Moormann and Claire Stocks (2021, p. 16) have come to a likewise positive conclusion :**

"Rome benefitted from his [*i.e.*, Domitian's] building policy, and arts and literature flourished. Economy performed well under his governance, which one sees reflected in the prospering towns and countryside of the Mediterranean in these years". And Nathalie de Haan, Eric M. Moormann, Aurora Raimondi Cominesi and Claire Stocks (2023, 17), write in the Italian translation of this text: "Roma trasse vantaggio della sua [*i.e.*, Domitian's] politica edilizia; le arti e la letteratura fiorirono, l'economia si mantenne prospera, come testimoniato dalle ricchezze di città e campagne".

**For Domitian's 'bloody and violent tyranny' at the end of his reign, mentioned by Sableyrolles (1994, 135), I anticipate here a passage written for *infra*, volume 3-2, at *Appendix IV.d.4.b*) :**

'Neither should we neglect what is to be found under: "Domitian, tyranny of", in the index of T.P. Wiseman's book (*The House of Augustus: A Historical Detective Story*, 2019), namely an explanation of Tacitus's attitudes to Augustus and Domitian. Commenting on Tacitus (*Ann.* 1,8,6), Wiseman (2019, 163) writes: "... Tacitus' point of view is perfectly understandable. He was a distinguished senator. During the late years of Domitian he had seen the Senate terrorised and men like himself subjected to arbitrary arrest and execution". This was quoted in more detail ... [*infra*, in *Appendix I.c*)).

**For a detailed discussion of Tacitus's attitude to Domitian; cf. T.P. Wiseman ("Domitian and the Dynamics of Terror in Classical Rome. The Saddam Hussein of the Roman Empire? Peter Wiseman offers some intriguing thoughts on the world of the emperor Domitian - its traumas and its terrors - to mark the 1900th anniversary of his assassination [my emphasis]", September 1996).**

My thanks are due to Rose Mary Sheldon for providing me with a copy of this article'.

For this subject; cf. also Barbara Levick (2009, 23). - As we shall see in a minute, it is worth while to consider the findings of T.P. Wiseman (1996), Barbara Levick (2009), and Maria Paola Del Moro (2021, 186 with n. 3; *ead.* 2023, 167 with n. 4) together with the additional observations, made by Rose Mary Sheldon (2023, in press), to which we will now turn.

**The reason why I had suddenly doubts concerning this question was Frederick G. Naerebout's (2021, 151) statement : the "years before the emperor [*i.e.*, Domitian], supposedly turned tyrant". I have, therefore, asked Rose Mary Sheldon for advice.**

Rose Mary Sheldon is of exactly the same opinion as Naerebout (*op.cit.*), and answered me by E-mail of 12th April 2023 the following, which I may publish here with her kind consent:

"... Here is my answer to your question. The same people who invented Domitian's ``monstrous tyranny'' were those who invented a financial crisis to explain his behavior. They are both imaginary. I explain this in my Chapter 7: ``Domitian: Reigning in Rome'' (attached) starting on p. 5. Was Domitian an autocrat? Of course, all Roman emperors were. The Principate is the rule of ONE. Could he be dictatorial at times. Yes, so could most emperors. But what gets them labeled as ``tyrants'' is when they start killing off senators. Remember that Domitian was assassinated which means he got a lot of people angry. But I see no reason to believe he ran out of money and the works cited in my footnotes for the relative argument in Chapter 7 argue the same, including Sablayrolles and Wiseman.

Mostly, this is a matter of semantics. How ``tyrannical'' a tyrant is depends on who is making the judgement. In the case of Roman emperors, it is usually the people who killed him that write the history afterwards so they always portray him as an out-of-control maniac ...".

Attached to this E-mail of 12th April, 2023, Rose Mary Sheldon was kind enough to send me that Chapter of her book (*Guarding the Caesars. Roman Internal Security under the Flavian Dynasty*, 2023, in press; Chapter 7: "Domitian: Reigning in Rome"), in which the subjects, mentioned by Sablayrolles (1994, 135) in the above-quoted passage, are discussed in great detail.

**I quote in the following the relevant passages from Sheldon's book (2023, in press; Chapter 7), in which she addresses also Domitian's possible motives to act in these specific ways.**

As mentioned in Section II. of this *Preamble*, I find especially significant Sheldon's observations concerning Domitian's bad relationship with the Senate, a subject that I myself have not addressed in this *Study*. From Sheldon's text it is clear - as she had already written to me in her E-mail of 12th April 2023 - that after Domitian's assassination, *this* has become another reason (that is to say: apart from Trajan's personal motivation, discussed in Section I. of this *Preamble*) for the creation of Domitian's bad image: simply because some of the authors of this bad image (Tacitus, Pliny the Younger, and Dio Cassius) were *themselves* senators.

For the fact that Dio Cassius was a senator (cf. *infra*, n. 201, in Chapter I.1.1.). We have already heard above from T.P. Wiseman (2019, 163), that Tacitus "was a distinguished senator" (for Tacitus; cf also *infra*, in volume 3-2, at *Appendix I.b*). For the fact that also Pliny the Younger was a senator; cf. A.N. Sherwin-White and Simon R.F. Price ("**Pliny (2) the Younger** (c.[irca] AD 61-c.[irca] 112) Gaius Plinius Caecilius Secundus ...", in *OCD*<sup>3</sup>, 1198 [the emphasis is by the authors themselves]).

**Concerning the reproach that Domitian, in the later years of his reign, turned into a tyrant, Sheldon (2023, in press; Chapter 7; Section: "A Good beginning") writes :**

"... Later authors wrote that Domitian actually *had* eliminated a large number of people, but there is no evidence for this".

**In her Section: "Domitian's Building Program", Rose Mary Sheldon (2023, in press; Chapter 7) writes :**

"... Domitian's determination to make Rome a capital that would be the pride of the empire was among his greatest achievements, and his building program created a very different city than that which existed before him. There were some fifty structures either erected, restored, or completed by Domitian in a massive and spectacular program of public building hardly equaled by any other emperor. [with n. 28] ... Some scholars have interpreted his extensive building as a need to build in a "pharaonic manner," that is, as extension of his delusions of grandeur. [with n. 30] **The problem is that Domitian's building only becomes ``monstrous'' after the history writers made it so. The same people who created the ``Reign of Terror'' concept for Domitian's last years also see his buildings as a reflection of his madness - which they created.** [with n. 31; my emphasis]".

In her **note 28**, Sheldon writes: "Jones (1992), 79, who also provides a summary of the sources (82-84) and a list of the buildings divided into four categories: 1) structures erected by Domitian, 2) structures restored by Domitian, 3) structures completed by Domitian and structures attributed to Domitian. Platner and Ashby (1929), 587-89 give a chronological list of imperial buildings, in which Domitian has the most entries after Augustus. On this, see Sablayrolles (1994), 113-44. He has slightly more than Nero and as many as Trajan and Hadrian combined. Cf. Blake (1959), 99-124".

In her **note 30**, she writes: "The term *''Bauwut''* ('building rage') is an expression coined by Stephanie Langer and Michael Pfanner (2018), 41 with n. 23. The term *Bauwut* suggests Domitian's motivation to build in such a grand style came from very strong, but 'irrational' feelings. Torelli (1987), 575 refers to Domitian's building activities on the Capitoline as *''il faraonico programma''*. See Häuber (2021 [(/ 2023, volume 3-2]), App. IV.d.4.a. Frederick (2003), 203. Edwards (1993), 137-72 for the condemnation of building as a *topos* in Roman rhetoric".

In her **note 31**, she writes: "**D'Ambra (1993), 10 on the error being a myth created for the Trajanic faction to condemn Domitian and to conceal the reality that Trajan continued Domitian's policies. Cf. Vinson (1989), 449. Domitian's only real crime was being the last Flavian. Jones (1992), 160-63 [my emphasis]**".

**In her Section: "The Economy", Rose Mary Sheldon (2023, in press; Chapter 7) writes :**

**"One of the biggest criticisms of Domitian as emperor is that he bankrupted the state and left an empty treasury.** Opinions range from Gsell, who believed he did not try to restore the economy that Titus had compromised, to Syme who believed that he left a surplus. And there are many opinions in between [with n. 134]. Gsell's accusation cannot be substantiated. [with n. 135] There is little positive evidence that Domitian was short of money in his later years. Suetonius accuses Domitian of spending more than he received but it is impossible to calculate the state income under Domitian because of lack of solid evidence. [with n. 136] ...

**Domitian inherited an administrative and financial system that worked well, and he involved himself meticulously in the details. The evidence seems to point to a balanced economy for the greater part of his reign.** [with n. 142; my emphasis]".

In her **note 134**, Sheldon writes: "Gsell (1894), 334. Syme (1930), 55-70. Part of the debate centered on a supposed decline in Domitian's building at the end of his reign. According to Jones (1992), 79 this decline is illusory. See refutations by Sutherland (1935), 150-62, who argues that Domitian was neither *''bankrupt, nor did he leave a surplus''* (161). Robathan (1942), 103-4 on the building program, 130-44. Garzetti (1974), 281-4. For conclusions based on coin evidence: Carradice (1983), 153-72. Rogers (1984), 60-78 draws up a balance sheet of Domitian's reign with estimates of his expenditures and income. See also Häuber (2021[ / 2023, volume 3-2]), Appendix IV.d.4.c".

In her **note 135**, she writes: "Syme (1930), 55".

In her **note 136**, she writes: "Suet., *Dom.* 3.2.12".

In her **note 142**, she writes: "On the treasury being empty, see Gsell (1894), 333-34, who argued that it was bankrupt. Syme (1930), 55-70 stressed Domitian's intelligence and capabilities and argued that there was sufficient money left in the treasury for Nerva to squander. Sutherland (1935), 150-62 restated the case for financial disaster at the end of Domitian's reign. Garzetti (1974), 281-4 stressed Domitian's efficient revenue collection which yielded more than enough for him to spend on his various projects. Rogers (1984), 77 concluded that the treasury was not full when Nerva took over, but that Domitian had settled all accounts, Syme(1983), 121-46".

**In her Section "The Coinage", Rose Mary Sheldon (2023, in press; Chapter 7) writes :**

**"Domitian's reign was one of the most important in the history of Roman imperial coinage.** [with n. 156] It was an area where he was determined to reverse the policies of his brother Titus. Titus, like his father Vespasian, left the coinage in a reduced quality to give himself more spending power. [with n. 157] **Domitian restored the coinage and maintained it at a level of purity that it had seldom reached before and was never to reach again.** [with n. 158] ...

**Some scholars have suggested, for example, that a decline of his relationship with sections of the aristocracy can be assigned to the period immediately after the devaluation of 85, but none have shown that the prosecutions of the later part of his reign were motivated by a need for money.** [with n. 167] It is charged that Domitian confiscated properties to remain solvent. Syme argued that the confiscations were politically motivated, but the goods and the estates of the victims were not given away or sold in order to raise money; they remained in the imperial possession. [with n. 168] In fact, the property was later restored, sold, or given away by Nerva and by Trajan [my emphasis]".

In her **note 156**, Sheldon writes: "Jones (1992), 74. Carradice (1983), 5. Carradice's study provides a detailed numismatic analysis. On the Flavians in general, see Ranucci (2009), 358-67".

In her **note 157**, she writes: "Carradice (1979), 102".

In her **note 158**, she writes: "Syme (1930), 70. On the comparison of the coinage of Nero and Domitian and the role it played in legitimation, see Wolters/Ziegert (2014), 43-80".

In her **note 167**, she writes: "On prosecutions Pliny, *Epis.* 1.5.5; 3.9.31, 33. 4.9.2. See Jones (1992), 78. Suet., *Dom.* 7.2, 14.2. Cf. Levick (1982), 69-72".

In her **note 168**, she writes: "Syme (1930), 66-67. Carradice (1983), 165 stresses the moral and legal aspects. Rogers (1984), 62, 71, 76 n. 63 thinks there were both financial and political motives. He believed the confiscations provided considerable income, and that Domitian used the money so raised for public necessities in Rome".

**In her Section: "Domitian and the Senate", Rose Mary Sheldon (2023, in press, Chapter 7) writes :**

"... **He [i.e., Domitian] spoke himself of ``assembling excellent men from both orders.''** [with n. 196] **His administrators, whether freedmen, equestrian or senatorial, generally proved themselves to be exceedingly competent. The fact that his successor kept so many of them in office after his death speaks volumes.** [with n. 197; my emphasis]".

In her **note 196**, Sheldon writes: "This was from August 82 in a published judgment from his *consilium* concerning squatters. For the complete document and translation, see Jones (1984a), 171-72". - Because 'Jones 1984a' does not appear in Sheldon's bibliography, I asked her for help. She was kind enough to write me that this quote is from Jones's book on Titus; cf. here 'B.W. JONES 1984'.

In her **note 197**, she writes: "Bennett (2001), 27".

**In her Section: "Eliminating the Opposition", Rose Mary Sheldon (2023, in press; Chapter 7) mentions the reasons for Domitian's bad relationship with the Senate :**

"Domitian's elimination of people was not always judicious. Two of his known fourteen consular colleagues perished at his hand - his kinsman, the two brothers T. Flavius Sabinus. [with n. 235] and T. Flavius Clemens, father of the two boys Domitian had chosen as his heirs. [with n. 236] In the end, this would hurt Domitian more than anything else since he was left without heirs. What had Clemens done that would cause Domitian to leave himself with no successors? ...

**Domitian's growing cruelty has been attributed to rapacity, but suppose it was fear? Domitian might have fought the Senate and killed or exiled senators, but they were for reasons other than financial. The fact is that Domitian faced a continued opposition.** If he allowed leniency, as the Senate defined it, he would possibly allow collaborators in a conspiracy to grow in number and lose his life as well as his rule. If he punished the known conspirators, though it was just, it placed him in opposition to a Senate which already disliked him.

**Finally, after repeated conspiracies he confiscated the goods of his enemies because this was the punishment for disloyalty and because it was his most valuable weapon. Domitian, the grandson of a tax-collector from Reate, knew exactly what he was doing - he hit his enemies where it hurt. There is no need to assign motives that are either frivolous or sinister. Yet this is precisely what made him hated and feared and his successors would brand him a monster, but he was never a fool or a madman.** [with n. 239; my emphasis]".

In her **note 235**, Sheldon writes: "Cos. Ord. 95, husband of Julia. Suet., *Dom* 10.4".

In her **note 236**, Sheldon writes: "Cos. Ord. 95, Suet., *Dom* 15.1; *RE* 6.2536-2539. Suppl. 12.379. *PIR*<sup>2</sup> F 240. For the length of time Clemens survived into Domitian's reign, see Passerini (1940), 159-163. Townend (1961), 57, who thinks he was exiled rather than killed".

In her **note 239**, she writes: "Syme (1930), 67, who points out that even when Tacitus speaks of his Reign of Terror, he never accuses Domitian of rapacity or there being financial straits causing his behavior".

**In her Section: "Domitian as Emperor", Rose Mary Sheldon (2023, in press; Chapter 7) addresses again Domitian's bad relationship with the Senate :**

"... Rather than making concessions to the Senate he [*i.e.*, Domitian] chose to oppose them and thus distinguished himself and his imperial authority from those of the weakened Senate. The results were impressive. He was a meticulous administrator, a reformer of the economy and the coinage, and designed a building program that ensured the Roman Empire had a capital worthy of envy. He became a micromanager who involved himself in the minutiae of running the empire. [with n. 254] And, if one can get beyond the diatribes leveled against him, one has to admit he was responsible for far-reaching changes in domestic administration and foreign policy most of which were happily adopted by his successors. [with n. 255] ...

As suspicion grew, Domitian attempted to pacify the more radical element in the Senate with offices and titles. This ploy would not work since **they were not interested in honors, they wanted power**. There was nothing he could do to appease them short of stepping aside, and he was not about to abdicate. **This was not a fight between the maniacal actions of an evil emperor and an innocent Senate. Domitian was fighting for his survival, and they were fighting against a system that condemned them to irrelevancy.**[with n. 267; my emphasis]".

In her **note 253**, Sheldon writes: "Although, see Saller (2000), 4-18, who believes there is no documentary evidence to support the interpretation that Domitian was an attentive, if severe, administrator. On his accomplishments and his reputation see Sablayrolles (1994), 113-44".

In her **note 255**, she writes: "Bennett (2001), 28".

In her **note 267**, she writes: "Rhodes (2014), 83".

Apropos, Rose Mary Sheldon's (2023, in press) observation in the above-quoted passage, in which she refers to Domitian's bad relationship with some members of the Senate: "**they were not interested in honors, they wanted power** [my emphasis]". I, therefore, quote in the following in more detail from an earlier of her publications, that was already quoted above, in Section II. of this *Preamble*: here Sheldon has addressed this fundamental problem of the Principate in more detail.

Rose Mary Sheldon (*Kill Caesar! Assassination in the Early Roman Empire*, 2018, 172-173; Chapter: "8 The End of the Julio-Claudians") writes:

"It took nearly a century of struggle with the princeps for the former ruling class to find a place in the new order as civil servants. The tension caused by these two incompatible sources of power fighting each other ensured that the task of ruling the empire could never simply be a case of issuing commands and expecting them to be obeyed without question. What ensued was due in no small part to the disappearance of the old republican nobility with their hereditary principles and their outmoded ideas regarding the Senate's functions. They had to resign themselves to the new reality - the monopoly of power in the hands of emperors and the administrative concentration in the hands of freedmen and slaves. Senators who chafed under this new imperial restriction and mourned their lost "freedom" were not talking about democracy but were talking about what they thought of as their immemorial right to compete within their own exclusive circle for the great offices of state, which they could use to enrich themselves and their families. They believed that their fathers and grand-fathers had put together an empire by the valor of their arms and the favor of the gods and that the empire had been taken away from them by a tyrant who now maintained his power with the help of their social inferiors ... [my emphasis]".

**See now Simone Pastor (2023, 97-100), who lists in his article more reasons, why Domitian's relationship with the Senate was so bad.**

In Pastor's opinion, this finally led to Domitian's assassination (cf. *id.*, "Esercizi e trasmissione del potere: l'ascesa della *gens Flavia*, l'*imperium* di Domiziano e il principe *polokrátor*", 2023). Pastor (2023, 97-100) analyses Cn. Domitius Corbulo's rising influence during the reign of Nero and the importance of the "establishment corbuloniano" (p. 98) for Vespasian's accession and for Domitian's career, since the latter had married in AD "70-71" Corbulo's daughter, Domitia Longina. Pastor suggests that the death of the son of the couple, born "nel 79", "Tito Flavio Cesare", who died in his childhood (again because of this powerful "establishment corbuloniano" in the Senate), turned out to be of great importance for Domitian's deteriorating relationship with the Senate.

For Domitia Longina, her marriage with Domitian and their son, whom they call: "T. Flavius Caesar?", cf. Dietmar Kienast, Werner Eck and Matthäus Heil (2017, 112), who suggest different dates than those stated by Pastor (2023): "70 Heirat mit Domitian, 73 Geburt eines Sohnes ... gest.[orben] vor 28. Aug.[ust] 83. Consecratio als DIVUS CAESAR [providing references]".

#### **Ad 4.) Domitian identified himself with Romulus and Theseus, exactly as Augustus before him**

Domitian built his Palace on the Palatine, not by chance called '*Domus Augustana*', at the site of the (real) House of Augustus (which stood at the presumed site of Faustulus's hut, where Romulus had grown up), and where already Nero had built his *Domus Aurea* for the same reasons as Augustus. In addition to this, Domitian (like Nero) had actually rebuilt Rome after a great fire (in AD 64 and 80, respectively), which is why Domitian *felt*, in addition to this, like Romulus. For discussions of all those subjects; cf. *infra*, in volume 3-2, at *Appendix VI*.

See now also the sub-title of the essay volume, edited by Aurora Raimondi Cominesi, Nathalie de Haan, Eric M. Moormann and Claire Stocks (*God on Earth: Emperor Domitian. The re-invention of Rome at the end of the 1<sup>st</sup> century AD*, 2021 [my emphasis]).

**Domitian's relevant propaganda has also been addressed by Licia Luschi in her article ("Un gruppo di Teseo con il Minotauro dell'*Albanum Domitiani*. Origine e dispersione delle antichità Barberini", 2015).**

Luschi (2015) discusses the fact that Domitian had at his Villa, called *Albanum*, two sculpture groups, the originals of which had been dedicated on the Acropolis at Athens : Myron's Athena and Marsyas and a group of Theseus and the Minotaur. Luschi (2015, 13 n. 115), therefore, follows an (unpublished) idea of Paolo Liverani, according to which, by copying those famous artworks, and putting them on display at his *Albanum*, 'these two sculpture groups could have created together "il modello dell'Acropoli ateniese"'.

Luschi suggests, in addition to this, that Domitian had also another copy of this group of Theseus and the Minotaur on the Palatine, where these sculptures decorated the labyrinth fountain of the 'Peristyle' of his '*Domus Flavia*' / *Domus Augustana*. Because of all this, Luschi (2015, 197, quoted in more detail *verbatim infra*), suggests that Domitian 're-used well known symbols of the Augustan period: the Athenian acropolis, its patron goddess Athena and Theseus, and identified himself with the mythical king of Athens, Theseus'.

For Domitian's Palace on the Palatine '*Domus Flavia*' / *Domus Augustana* with this labyrinth fountain; cf. here **Figs. 8.1; 8.2; 58**, labels: PALATINE; "DOMUS FLAVIA"; "PERISTYLE" [the octagonal ground-plan of this fountain is marked on those maps], and **Figs. 108-110**, and *infra*, at Chapters V.1.i.3.b) J. Pollini's discussion (2017b) of the allegedly 'lost' Nollekens Relief (cf. here **Fig. 36**), which he compares with the Cancellaria Reliefs (cf. here **Figs. 1; 2**) and Domitian's '*Domus Flavia*' / *Domus Augustana*. With The Contribution by Amanda Claridge; and at Chapter *The major results of his book on Domitian*.

**Fig. 8.2. Domitian's Palace on the Palatine, his 'Domus Flavia' / Domus Augustana. In the foreground we see the 'Peristyle' with the labyrinth fountain. Looking to the north-east (compare for the orientation of this photo the map here Fig. 73), we see what is left of the southern walls of the 'Aula Regia'. The Church in the background is the Chiesa di S. Bonaventura. Photo: Franz Xaver Schütz (1-III-2015).**

In my discussion of Domitian's *Villa*, called *Albanum* (cf. *infra*, in volume 3-2, at *Appendix IV.d.4.b*)), I have followed Luschi's (2015) hypothesis concerning this labyrinth fountain in Domitian's Palace on the Palatine. Before following such a hypothesis, we should, of course, on principle first of all investigate, whether this labyrinth fountain had already existed at Domitian's time (!).

This I had so far not done, as I must confess, taking for granted that this is the case, because Luschi (2015, 8) writes:

**"Al centro dell'immenso peristilio è situata infatti una grande fontana di forma ottagonale (fig. 23); i muretti in laterizi che la costituiscono (in gran parte di restauro moderno, ma ricostruiti sull'antico) non delimitano in realtà ottagonali concentrici, come appare nella maggior parte delle piante dell'area, fortemente semplificate, ma disegnano per l'appunto un labirinto.**

Gli appunti di Giacomo Boni (degli anni 1912-1914, ma più probabilmente relativi alla campagna del 1914) parlano di condutture e tubi di diramazione che penetrato di base a qualche delfino od altro animale di bronzo, per uno dei numerosi getti d'acqua che tra una nicchia e l'altra animavano il perimetro dell'impluvium". [with n. 70; my emphasis].

In her **note 70**, Luschi provides references and further discussion, but does not address her assertion that this labyrinth is certainly ancient, which in reality it is. - To this I will come back below.

But because this labyrinth is heavily restored, I am very glad that Alexander Heinemann has asked me in an E-mail of 26th January 2023, whether I could provide him with publications, in which it has been demonstrated that this labyrinth is actually *ancient*.

I answered Heinemann that this labyrinth is obviously indeed Domitianic, as Natascha Sojc's recent plan of Domitian's Palace shows, in which she has also marked the 'Peristyle' with its labyrinth fountain; cf. Sojc ("Archaeological Evidence from Domitian's Palatine", 2021, 132, Fig. 2. "Overview of the nucleus of Domitian's palace with names given to individual wings and rooms by archaeological research for better orientation, but with no correspondence to ancient terminology. Rome, Palatine (A. Reeder after instructions by the author)"; label: 4 (= "Peristyle with fountain").

When discussing this problem with Franz Xaver Schütz, he, on his own account, searched for a discussion of the matter on the Internet and found an article by Staffan Lundén ("The Palatine Labyrinth. Was it built in the 1<sup>st</sup> or 20<sup>th</sup> Century?", 2004), who believes instead that this labyrinth was 'invented' by its excavator Giacomo Boni.

Lundén quotes in his article *inter alia* "La Rocca 1994". Fortunately I had the chance to discuss Lundén's article (2004) with Alexander Heinemann and with Eugenio La Rocca. La Rocca told me that he neither edited the relevant volume, quoted by Lundén (2004), nor that he contributed an essay to it. He was, in addition to this, kind enough to send me the article by Alessandra Capodiferro in this publication of 1994, which Lundén (2004, 1 n. 2) refers to as "ed. La Rocca 1994". Capodiferro (1994, 73) mentions the labyrinth fountain.

La Rocca also answered my relevant questions, first in several telephone conversations, then by E-mail on 18th February 2023, providing evidence which proves beyond any doubt that this labyrinth (here **Fig. 8.2**), which Boni had excavated and later restored, is indeed ancient. With La Rocca's kind consent I may publish here his E-mail as his second *Contribution* to this volume.

**See below, at *The second Contribution by Eugenio La Rocca : Una nota sul labirinto del Palatino*.**

Let's now return to a discussion of Licia Luschi's observations (2015).

Luschi (2015, 197) writes in her English abstract: "... **In Domitian[']s propaganda a number of factors seem to support the choice of the archetypal image of the labyrinth and of Theseus as an exemplary hero: the resurgence of analogous Augustean symbols, Alexandrian models, allusions to the Athens acropolis and its patron goddess. It is therefore possible to propose the existence of a parallel between Domitian and Theseus - both favourites of Athena, the goddess of *Metis*, both presented as civilizing heroes, both seeking the reappropriation and legitimization of power that had initially been denied them [my emphasis]**".

Cf. Jan N. Bremmer ("**Metis**, intelligence personified. According to Hesiod (*Theog.* 886-900), she was the wife of Zeus, who swallowed her when she was pregnant, since he knew that she would first bear Athena and then another child, who would become the ruler of the universe ...The myth explains the close connection of Zeus and Athena with *metis*", in: *OCD*<sup>3</sup> [1996] 969 [the emphasis is by the author]").

With her statement: "both [Theseus and Domitian] seeking the reappropriation and legitimization of power that had initially been denied them", Luschi (2015, 197) obviously refers to an (alleged) remark by Domitian at the beginning of his reign; cf. Suetonius (*Dom.* 13: *patri se et fratri imperium dedisse, illos sibi reddidisse*), that has already been discussed above, at point 2.) in Section III. of this *Preamble*, and that will also be discussed below, in Chapter I.1.1., with n. 208.

I have chosen Luschi's (2015, 197) just-quoted passage as the second epigraph of this book on Domitian; cf. *infra*, at Chapter I.1. From Luschi's (2015, 197) observations it becomes clear why Domitian felt himself to be a new Theseus. We know, in addition to this, that he stressed at the same to be a new Romulus and the Pharaoh of Egypt. Seen from our perspective today, not only the constructions of Romulus and Theseus had a lot in common, this was even true for the constructions of these three, at first glance seemingly very different rôles - which is, of course, understandable since all three are the constructions of ideal kings or of ideal government.

**Concerning his emulation of Romulus and Theseus, Domitian followed Octavian/ Augustus, as Luschi (2015, 10, 11, 197) has observed.**

Luschi (2015, 10) writes about the emulation of Augustus with Theseus: "... **(Romolo e Teseo sono paralleli nella fondazione della regalità, nonché entrambi figure di riferimento per Augusto [with n. 87] ... Del resto le imprese di Teseo sono state riconosciute da tempo come uno dei temi fondamentali della propaganda augustea [with n. 90], in particolar modo quella del recupero degli *gnorismata* [with n. 91], tema allusivo all'eredità cesariana e alla legittimità del potere di Ottaviano, sembra avere avuto valore politico rilevante [my emphasis]**".

In her **note 87**, Luschi writes: "V.[edi] *infra* nota 91".

In her **note 90**, she writes: "Sul rapporto fra Apollo e il labirinto cfr. E. Simon, *Apollon und die Labyrinth*, in 'Thetis', 11-12, 2005, pp. 7-10. **Vedi come Plutarco istituisca il parallelo Teseo/ Romulo e come Augusto si paragoni, come è noto, a Romulo. Sull'uso politico delle immagini da parte di Augusto: P. Zanker, *Augusto e il potere delle immagini*, Torino 2006 [my emphasis]**".

In her **note 91**, she writes "**Per il ciclo di Teseo utilizzato in funzione propagandistica nell'età augustea vedi almeno: E. La Rocca, *Amazzonomachia. Le sculture frontonali del tempio di Apollo Sosiano*, Roma 1985; F. Ghedini, *Il mito di Teseo nella propaganda di Augusto*, in *Archeologia Veneta*, 15, 1992, pp. 85-93 [my emphasis]**".

Luschi mentions Domitian's labyrinth fountain in the 'Peristyle' of his 'Domus Flavia/ Domus Augustana on the Palatine (cf. L. LUSCHI 2015, 12, Figs. 22; 23; and here **Fig. 8.2**), where she, therefore, assumes another copy of the statue group representing Theseus's defeat of the Minotaur, of which Domitian had also a copy at his *Albanum*, and the original of which stood on the Acropolis at Athens.

Luschi (2015, 16) comes at the end of her article to the following conclusions: "Il paragone Teseo/Domiziano poi è avvincente: entrambi pupilli di Atena, si presentano come eroi civilizzatori, vincitori di bestiali, barbarici avversari, che rappresentano viceversa la primitività, la forza bruta che va a scapito della civiltà. L'immagine archetipica del labirinto rinvia metaforicamente ad un cosmo ordinato e contrapposto al *chaos*, presentando al centro l'eroe ordinatore che ha ragione delle forze ctonie. [with n. 126, providing references] ... Domiziano, assistito come Teseo (e come Ulisse) da Atena *Ergane* – dea degli *erga*, della razionalità, del ginnasio, del labirinto, del palazzo, la divinità regale – vince sull'animalità, recuperando nel contempo la legittima sovranità insidiata. Il potere riacquisito contro chi aveva tentato di sottrarlo fa tutt'uno con la lotta della civiltà contro le forze oscure della natura".

Licia Luschi (2015, 8-16) discusses Domitian, his *Villa*, called *Albanum*, the meaning of the representation of labyrinths in Roman *Villas* in general, and of the labyrinth fountain in Domitian's Palace on the Palatine. Considering Luschi's findings (2015), Domitian's labyrinth fountain (with the sculpture group of Theseus and the Minotaur ?) in his Palace on the Palatine was ideally located immediately after visitors had entered his Palace on its west side, and signalled the following message :

*here lives the man, who protects his people - like Theseus, who rescued his compatriots from the Minotaur.*

Luschi (2015, 16), by writing: "**L'immagine archetipica del labirinto rinvia metaforicamente ad un cosmo ordinato e contrapposto al *chaos*, presentando al centro l'eroe ordinatore che ha ragione delle forze ctonie** [my emphasis]", applying this image of Theseus to Domitian, who, as "l'eroe ordinatore" fights successfully against the "*chaos*", unwittingly thus mentions the foremost obligation that was also demanded by the Egyptians of their Pharaohs.

The Egyptians called the desired resulting ideal state of affairs - the re-establishment of order on earth and in the realm of the gods (!) - Ma'at. According to Egyptian theology, only the king was capable of establishing Ma'at and of maintaining it, this was his most important obligation. Without the Pharaoh there would be no Ma'at, but instead its contrary: *chaos*.

For a discussion of how the Egyptians believed that their Pharaoh was able to establish this very complex state of affairs, called by them Ma'at; cf. *infra*, in volume 3-2, at *Appendix II.c) My own interpretation of the relief Fig. 111: datable in the Hadrianic period, and representing a sanctuary of Isis at Rome or elsewhere in Italy, it possibly shows the celebrations on the day of the Egyptian festival of New Year.*

To the meaning of the statue group 'Theseus and the Minotaur' at Domitian's *Villa*, called *Albanum*, I will come back below. There will also be discussed the (in my opinion convincing) suggestion of Hans Rupprecht Goette, according to which the overall design of Domitian's *Albanum* 'may have been inspired by the south slope of the Acropolis at Athens', as he was kind enough to suggest to me in an E-mail of 17th June 2022; cf. now Goette (2022).

Cf. *infra*, in volume 3-2, at *Appendix IV.d.4.b). Domitian's building project comprising the Campus Martius, the Capitoline Hill and the sella between Arx and Quirinal. With detailed discussion of the Templum Pacis, and some remarks on Domitian's Villa, called Albanum.*

For the possible meaning of the labyrinth fountain in the 'Peristyle' of Domitian's Palace (here **Figs. 8.1; 8.2; 58; 73**) that was erected at the site of the (real) House of Augustus; cf. *infra*, in volume 3-2, in *Appendix VI.*; at Section I., at *Also I myself should like to add an observation concerning the (real) House of Augustus.*

**Apropos, 'Domitian and the Acropolis at Athens': Domitian never had the chance to visit Athens himself. Nevertheless, Domitian's interest in the Acropolis at Athens was obviously very strong.**

Fortunately Ilaria Romeo (2020) has studied the statue-type 'Athena in corsa', known from a coin, issued by Domitian (cf. here **Fig. 84**), which shows an (unidentified) Temple of Minerva, and that Romeo (2020), like many other scholars before and after her (erroneously) identifies with Domitian's (alleged) Temple of

Minerva Chalcidica. That Domitian built a Temple of Minerva Chalcidica, has also (erroneously) been suggested by Frederick G. Naerebout (2021, 149 with n. 18), and by Diane Atnally Conlin (2021, 158).

But, as Mario Torelli (2003; 2004a) was able to demonstrate, Domitian's 'Minerva Chalcidica' was instead a monumental fountain, named after a colossal statue of a *standing* Minerva *promachos* (cf. here **Figs. 59; 60; 61**, labels: ISEUM; SERAPEUM; Piazza Collegio Romano; Former site of S. Marta and of the Monastero d'Agostiniane; Fountain: MINERVA CHALCIDICA).

**Fig. 84. Denarius, issued by Domitian, BMC 241 (undated), allegedly showing the round Temple of Minerva Chalcidica, within which its cult-statue is visible. In reality this temple is not identified. Cf. R.H. Darwall-Smith (1996, 125, 280, Fig. 33 on Plate XX); cf. LTUR III (1996) 476, Fig. 174: "... Denario di Domiziano del 94-96 d.C. BMCEmp II, 346 N. 241 tav. 67.7". The represented statue-type is called 'Athena in corsa'.**

The statue-type 'Athena in corsa' is also known from a colossal marble statue in the Museo Capitolino, Museo Nuovo (inv. no. 654); cf. Ilaria Romeo ("Un'Athena capitolina, il puteale di Madrid e il frontone Est del Partenone", 2020). Romeo convincingly suggests that the statue-type 'Athena in corsa' copies the Athena from the Eastern pediment of the Parthenon at Athens, which shows the 'birth of Athena'. In addition to this, we owe to Romeo (2020, 850 with n. 53) the important observation that the figure of Minerva on Frieze A of the Cancellaria Reliefs (cf. here **Figs. 1; Figs. 1 and 2 drawing; figure 5**) is modelled on this statue-type 'Athena in corsa' (!).

As I only realized much later, all of Romeo's just-mentioned findings have already been observed by Werner Fuchs ("Statue der Athena", in: *HELBIG*<sup>4</sup> II [1966] 199-201, no. 1395), whose relevant observations Romeo (2020) addresses, of course, herself as well.

Torelli's (2003; 2004a) observations concerning Domitian's Fountain of Minerva Chalcidica, and the findings of Werner Fuchs (1966) and of Ilaria Romeo (2020) concerning the figure of Minerva on Frieze A of the Cancellaria Reliefs are discussed and quoted *verbatim infra*, in volume 3-2, at *Appendix I.g.1.) The shrines built by Domitian as a thanksgiving for his escape from the Capitolium (sacellum of Iuppiter Conservator, Temple of Iuppiter Custos, and in a certain sense also his [fourth] Temple of Iuppiter Optimus Maximus Capitolinus), and some other of his buildings in Rome, which are documented on his coins.*

**To conclude.** The three rôles, propagated by Domitian as being incorporated by himself (Romulus, Theseus, Pharaoh of Egypt), had the additional advantage of being immediately understood by three different parts of the population of the Roman Empire - Domitian's subjects. Interestingly, none of Augustus's and Domitian's *Identifikationsfiguren*, like Romulus and Theseus, came from the West of the Roman Empire. And that although it is conceivable that also there existed myths, believed by great parts of the relevant populations, in which ideal kings like Romulus and Theseus were described.

#### **Ad 5.) Domitian's emulation of Alexander the Great**

Dietrich Willers (2021, 81, 86-87 with n. 40, Taf. 11,1 [= here **Fig. 7**]), in his discussion of the 'Relief Ruesch', which shows Domitian in a battle scene, without wearing a helmet, points out that not wearing a helmet (as Domitian on the relief here **Fig. 7**), has been interpreted by ancient and modern commentators *inter alia* as follows: Alexander the Great and other commanders, who followed his model, thus stressed their invincibility.

Above, in Section II. of this *Preamble*, we have discussed in detail, what Anne Wolfsfeld (2014, 203) calls 'Domitian's personal "Siegesprogramm"'. From what was said there it seems obvious that Domitian, apart from emulating Romulus, Theseus and the Pharaohs of Egypt (as we have seen above at point 4.) of

Section III. in this *Preamble*), and will discuss again below, must also have cherished the idea of emulating Alexander the Great.

Besides, already Reinhard Wolters and Martin Ziegert (2014, 62 with ns. 67-70, Abb. 20) have suggested this as a result of their analysis of one the coin-types, issued by Domitian:

**"Spektakulärer im Hinblick auf Grenzverletzungen erscheinen demgegenüber die Reversbilder, die Nero und Domitian götterähnlich zeigten ... Die Entwicklung wurde bei Domitian fortgeführt: Er wurde ab 85 n. Chr. mit dem Blitzbündel als Attribut des Jupiter in der Hand und von Victoria bekränzt werdend dargestellt (Abb. 20). [with n. 67] Der Panzer signalisiert, dass es sich um den Kaiser und nicht um den Göttervater selbst handelt. Hierarchisch gesehen wurde Jupiter auch nicht von Victoria bekränzt: Trotz des Blitzsymbols bestand keine Gleichstellung des Kaisers mit dem obersten Gott.**

Möglicherweise geht die Bildidee auf das berühmte Alexanderbild des Apelles im Artemision von Ephesos zurück, das kurz zuvor etwa noch Plinius der Ältere in seiner Naturgeschichte beschrieben hatte. [with n. 68] Eine Abbildung dieser Alexanderdarstellung mit Blitzbündel und Speer, wie er von einer fliegenden Nike bekränzt wird, liegt vielleicht in den noch zu seinen Lebzeiten ausgeprägten Dekadrachmen des Taxiles vor (Abb. 21). [with n. 69] **Sollte es sich bei dem Revers Domitians um eine bewusste Anlehnung an dieses Bild des Apelles handeln, dann wäre weniger der Vergleich mit Jupiter die entscheidende Aussage, als jener mit Alexander dem Großen.** [with n. 70; my emphasis]"

In their **notes 67-70**, Wolters and Ziegert provide references

Let's now turn to the 'Relief Ruesch'.

On 14th of October 2021, Hans Rupprecht was kind enough to send me, on his own account, an article by Dietrich Willers, in which the author discusses the 'Relief Ruesch', a marble relief that represents a cavalry battle of Romans against Germanic troops ("Relief mit Reiterschlacht", 2021, with his Taf. 11; 13 [= here **Fig. 7**]). Willers (2021) reports that the collector Arnold Ruesch (1882-1929), best known for the '*Guida Ruesch*' (1908; 1911), the excellent guide of the Museo Archeologico Nazionale, Napoli, which he edited, had acquired the 'Relief Ruesch' in 1920 at an art dealer's in Rome. Ruesch himself, as Willers writes, had already realized that the design of the central group on the 'Relief Ruesch', a cuirassed Roman *imperator*, wearing the *paludamentum*, and a German immediately opposite him, both on horseback, shows striking similarities with the two protagonists on the famous Alexander Mosaic from the 'Casa del Fauno' in Pompeii, now at the Museo Archeologico Nazionale, Napoli. This extraordinary fact led Bernard Andreae (1956) to assert that the 'Relief Ruesch' must be a modern forgery, to the effect that henceforth this relief was not discussed by archaeologists any more. As a matter of fact, I myself had not even known of this relief.

Willers (2021) reports that Ruesch had built a villa at Zürich to accommodate his collection. After his death his antiques were sold and dispersed, and in 1977 his villa was destroyed. Fortunately in 2019 the Antikensammlung Bern of the Universität was able to acquire as loans from private collectors some of the antiques formerly in Ruesch's collection (comprising the 'Relief Ruesch', here **Fig. 7**), in addition, the owner of the 'Relief Ruesch' had obviously agreed that it could recently be restored.

This restoration of the 'Relief Ruesch' has proven that already in antiquity the face of the Roman *imperator* on the 'Relief Ruesch' had deliberately been destroyed. Willers (2021, 79, 83-84, 89, 94), who is able to disprove that the 'Relief Ruesch' can possibly be a modern forgery, follows the judgement of earlier scholars by dating it Domitianic, *inter alia* by convincingly comparing it with the Cancellaria Reliefs (here **Figs. 1; 2; Figs. 1 and 2 drawing**). And, as already suggested by Arnold von Salis (1947, 99-100),

Willers (2021, 89-90, Taf. 11; Taf. 13, 2-5 [= here **Fig. 7**]) is able to demonstrate that the head of this rider was originally a portrait of Domitian, whose face had obviously been destroyed as a result of the emperor's

*damnatio memoriae*. Domitian is fighting against Germanic soldiers, identified by Willers (2021, 90) with the Chatti, whom Domitian defeated in AD 83, as Willers writes.

**Fig. 7. 'Relief Ruesch', ex collection Arnold Ruesch (Zürich), who bought it in 1920 at an art dealer's in Rome (provenance unknown). Cavalry battle of a Roman *imperator* (Domitian) against Germanic soldiers (the Chatti?). Marble, 74 x 108,8 cm. Domitian's head was defaced because of his *damnatio memoriae*, but the relief has nevertheless been re-used in antiquity. Private collection. On loan at the Antikensammlung Bern of the Universität. From D. Willers (2021, Taf. 11; Taf. 13,1: detail of the *imperator*, Taf. 13,2-4: details of the head of the *imperator*; Taf. 13,5: right profile of the bust of Domitian, Rome, Musei Capitolini, inv. no. MC 1156).**

Apropos, the striking similarities of the composition of the 'Relief Ruesch' and of the Alexander Mosaic. I am, of course, aware of the fact that, for chronological reasons, Domitian and his artists could not possibly have known the Alexander Mosaic at Pompeii, but rather either its prototype, a famous painting, which Willers (2021, 81) dates to around 300 BC, or else other copies of this prototype.

Between February 4th and 24th 2022, and again on 1st January 2023, I could discuss with Andrew Stewart in E-mail correspondences the 'Relief Ruesch' (here Fig. 7) and the Alexander Mosaic. As Stewart wrote me, the prototype of this mosaic was a (now lost) painting, which, being a "four-colour-painting", is clearly datable in the fourth century BC, and was, in his opinion, still created in Alexander's lifetime. Later it was brought by the Romans as war booty from Macedonia to Rome, "after 168 or after 148 BC", as Stewart suggests, where it was henceforth copied in a variety of media; cf. Stewart (1993, 133 with n. 37).

Andrew was also kind enough to provide me with his relevant publication; cf. Stewart (*Faces of Power: Alexander's image and Hellenistic politics*, 1993, 130-150, Chapter: "2. The Alexander Mosaic: A Reading"). On 1st January 2023 I had again written Stewart asking him, whether the date "after 148 BC" could mean that he assumed that this Greek painting had been on display at the *Porticus Metelli* (the later *Porticus Octaviae*), but Andrew Stewart was kind enough to answer me immediately that he himself has not suggested this.

I had asked Andrew Stewart this question, because we know that in 146 BC Metellus Macedonicus had brought to Rome and put on display in his *Porticus Metelli* the famous statue group *turma Alexandri*, which Alexander the Great had dedicated in the sanctuary of Zeus at Dion in Macedonia. *The turma Alexandri* showed Alexander the Great together with those of his *hetairoi* fallen at the Granikos (334 BC): a group of 25 equestrian bronze statues and further nine infantrymen, all by Lysippos; cf. Häuber (2014a, 532). To Alexander the Great and his *hetairoi* I will come back below.

Cf. *infra*, in this Section III.; and in volume 3-2, at *A Study on the consequences of Domitian's assassination ...; Introduction; Section I., at 4.) Hadrian's Parforceritt in November AD 97 from Moesia Inferior to Mogontiacum (Mainz). The discussion of this 'itinerary' of Hadrian brings us another time back to the Porticus Octaviae, because there was on display the famous turma Alexandri; and at Chapter VI.1.*

On 14th January 2023, I was told by Kris Seaman that Andrew Stewart had passed away the day before. What his own scholarly production is concerned, which was thus prematurely interrupted, this clearly means a great loss to the entire scholarly field of archaeology. But this loss is especially felt by his friends and colleagues, who had the privilege of knowing him personally, and with whom Andrew used to share his vast knowledge so generously.

Likewise since February 2022, I had the chance to discuss with Filippo Coarelli the 'Relief Ruesch' (which he actually knew, but of which he ignored, of course, its current whereabouts) and the Alexander Mosaic. Coarelli told me that he is in the course of preparing an exhibition on Alexander the Great, organized by the Museo Archeologico Nazionale, Napoli; the Alexander Mosaic will be restored on this occasion.

On 31st March 2023, Coarelli was kind enough to write me the reference of the catalogue of this exhibition, that will be opened on 29th May 2023 at the Museo Archeologico Nazionale, Napoli: Filippo Coarelli and Eugenio Lo Sardo (a cura di), *Alessandro Magno e l'Oriente. La scoperta e lo stupore*.

I am not a specialist in *militaria*, but I wish at least to mention a fact that other scholars, more knowledgeable in this field, might like to study in more detail. I am referring to the soldier, to the right of Amanda Claridge's (alleged) Hadrian (of his portrait-type Delta Omikron ( $\Delta$ ); here **Fig. 3**) in Scene LXXII of Trajan's Column (here **Figs. 4; 4.1**), who (like Willers's Chatti on the 'Relief Ruesch'; here **Fig. 7**) is only wearing long trousers and is armed with a shield. This soldier on Trajan's column (here **Figs. 4; 4.1**) according to Karl Strobel (2017, 318) may be identified as a "Markomanne" or as a "Quade", who, in Trajan's First Dacian War (in 102 AD), which is represented in Scene LXXII, belonged to Rome's auxiliary troops.

To this relief and to Hadrian's portrait-type (here **Figs. 4?; 4.1?; 3**) I will come back below.

If those Germanic soldiers on the 'Relief Ruesch' (**Fig. 7**) really were Marcomanni or Quadi, not Chatti, those were Germanic tribes, whom Domitian had only to deal with in AD 89, as we have learned above from Peter L. Viscusi (1973, 53-63), who discusses also the fact that Domitian celebrated in AD 89 a double triumph over the Chatti and the Dacians. If the Germanic soldiers, visible on the 'Relief Ruesch', were those of the later war, this relief could be dated 'after AD 89', exactly as, in my opinion, the Cancellaria Reliefs (here **Figs. 1; 2**), with which Willers (2021) himself compares the 'Relief Ruesch'.

For Domitian's campaign against the Marcomanni and Quadi (AD 89), and Domitian's double triumph over the Chatti and the Dacians in AD 89; cf. *supra*, in Chapter *Preamble: Domitian's negative image*; at Section I. 'The intentional creation of Domitian's negative image', here presented by discussing relevant text passages from Markus Handy ("Strategien zur Legitimierung der Ermordung des Domitian", 2015) and from Peter L. Viscusi (Studies on Domitian, 1973).

Dietrich Willers (2021, 74 n. 1) writes that the Antikensammlung Bern der Universität is planning "eine Sonderausstellung mit Dauerleihgaben aus dem einstigen Bestand der Sammlung Ruesch". And in an E-mail on 20th October 2021, he mentioned to me that he has sent an offprint of his article (2021) to Bernard Andreae, who answered Willers that he agrees with him that the 'Relief Ruesch' (here **Fig. 7**) is ancient. On 24th October 2021, Willers has kindly granted me the permission to mention our correspondence here.

**In addition, Willers (2021, 84, 91, 93, 98) convincingly points out that the 'Relief Ruesch' proves that still another artistic innovation, commonly attributed to Trajan (or rather Hadrian?), had already been invented at the order of Domitian - as we might perhaps not otherwise expect, after having read this entire Study. - Willers thus refers to the famous relief representing a battle scene that shows Trajan in exactly the same iconography as Domitian is represented on the 'Relief Ruesch' (here **Fig. 7**).**

For "The Great Trajanic Frieze. Trajan [now Constantine] on horseback, early Hadrianic. Rome, Arch of Constantine ...", also for the other relief, inserted into the opposite side of this central passageway of the Arch of Constantine, representing the *adventus* of Trajan/ now Constantine; cf. Diana E.E. Kleiner (1992, 222, Figs. 185 [= here **Fig. 7.1**]; 186). For 'The Great Trajanic Frieze', Trajan [now Constantine] on horseback; cf. also Willers (2021, 84 with n. 21); and R.R.R. Smith (2021, 24-25 with n. 97).

**Fig. 7.1. The 'Great Trajanic Frieze', Constantine on horseback. Rome, Arch of Constantine. The relief had originally shown Trajan, whose portrait was recut into one of Constantine the Great. In the central passageway of the Arch of Constantine the inscriptions LIBERATORI VRBIS and FVNDA TORI QVIETIS were added to these reliefs of Trajan/ Constantine, which refer to Constantine (in recognition of his defeat of Maxentius at the Pons Mulvius in AD 312). Photo: C. Faraglia, Neg. D-DAI-Rom 37.328. - Diana E.E. Kleiner (1992, 222, Fig. 185) dates both reliefs: "early Hadrianic".**

Cf. Ian Archibald Richmond, Donald Emrys Strong and John Robert Patterson ("pons Mulvius", in: *OCD*<sup>3</sup> [1996] 1219 [the emphasis is by the authors themselves]).

**R.R.R. Smith (2021, 24-25 with n. 97) convincingly points out that the representation of Trajan in 'The Great Trajanic Frieze' (here Fig. 7.1), when compared to the 'real actions' of an emperor during a war, turns out to be extremely unrealistic.**

My thanks are due to Bert Smith for sending me on 11th January 2022 the above-quoted article ("*Maiestas Serena: Roman Court Cameos and Early Imperial Poetry and Panegyric*", 2021).

**I myself would call the iconography of Roman emperors, as pictured on (Figs. 7; 7.1), as that of 'a dashing hero on horseback, like Alexander the Great'.**

Smith (2021, 24-25 with n. 27) writes: "The cameos are quite different in their visual system from the **monumental imperial reliefs in marble, such as those that decorated altars, arches, bases and columns, in which the emperor acts out real public roles of his office, as consul, priest, or general.** Those reliefs and their narratives were public and rooted in what could be, and their literary cognates were in prose of the kind preserved for us in Pliny the Younger's Panegyric of Trajan ... **Although they are, of course, not** [page 25] **precise historical records, modern focus on their 'propaganda' has obscured a central feature of such marble reliefs, namely that, like Pliny's Panegyric, they rarely represent the emperor doing something he did not do in real life.** [with n. 97; my emphasis]".

In his note 97, Smith writes: "**The Great Trajanic Frieze (re-used on the Arch of Constantine [= here Fig. 7.1]), with the emperor leading a cavalry charge in battle himself, is a rare example of a clearly 'unreal' monumental narrative:** Touati 1987. On such public narratives of imperial action, Fittschen 1972; Hölscher 2003; 2019: ch.[apter] 4 [my emphasis]".

*In the following, I allow myself a digression on Scene LXXII of Trajan's Column (here Figs. 4; 4.1) and on Hadrian's portrait-type Delta Omikron (Δο) (here Figs. 4?; 4.1?; 3)*

That Smith (2021, 25, n. 27) is certainly right with his above-quoted remark is clear, when we consider for example the many representations of Trajan on the spiral frieze of Trajan's Column (dedicated by Trajan in AD 113): here the emperor and his entourage are, without exception, standing 'beside', at the beginning of, or at the far end of a scene, obviously engaged in discussions of some kind, and are certainly not looking at the large scenes which the beholders see in the foreground. This is even true in the case of the few battles that are depicted on this frieze (cf. here Fig. 4.1).

Nevertheless all the scholars, who have commented on these images, and whose observations will be summarized below, are of the opinion that Trajan is actually shown (or meant?) as supervising the relevant events, that the large scenes represent.

See for example the above-mentioned Scene LXXII (here Figs. 4; 4.1). Amanda Claridge (2013, 12) comments on this scene as follows: "**Band 11: lxxii Trajan surveys the last battle of the First [Dacian] War. Focal point: Stonethrower** [my emphasis]".

Claridge (2013, 13 with n. 80, pp. 14, 15, her plate 15 [= here Fig. 4]) tentatively identifies this "Stonethrower" on here Figs. 4; 4.1 with Hadrian, represented in the here-so-called portrait-type Delta Omikron (Δο) (cf. here Fig. 3).

**Although the head of this man strikingly resembles portraits of Hadrian of this portrait-type (here Fig. 3), I do not follow Claridge's (2013) identification. Scene LXXII of Trajan's Column (here Fig. 4.1) represents the decisive third battle in the third campaign of Trajan's First Dacian War that took place in AD 102.**

Hadrian was a senator, who, if represented on Figs. 4; 4.1, should have been depicted as wearing the *calcei patricii*; he had served from AD 96 on as senatorial tribune of *Legio V Macedonica* in *Moesia Inferior*, and from

November AD 97 until January 98 as senatorial tribune of *Legio XXII Primigenia* at Mogontiacum (Mainz) in Upper Germany. Since AD 100, Hadrian was married to Trajan's great-niece Sabina, in Trajan's First Dacian war, he was Trajan's *comes expeditionis Dacicae* (since 101 AD), and would earn the *dona militaria* in this war.

The "Stonethrower", as Claridge refers to this man on **Figs. 4; 4.1**, is fighting bare-headed and with bare feet. I follow those scholars, who identify him as a slinger from the *Baleares*, a man from Rome's *foederati*, of whom altogether four are represented on the entire frieze (cf. here **Figs. 4; 4.1; 4.2; 4.3**) - all of them fighting bare-headed and with bare feet.

For discussions of all those subjects; cf. *infra*, in volume 3-2, at

*A Study on the consequences of Domitian's assassination : Nerva is forced to adopt Trajan and Trajan creates Domitian's negative image to consolidate his own reign. With Hadrian's adoption manquée in late October or at the beginning of November of AD 97, his 20-year long road to his accession and his thanksgivings for it, his Temple complex in the Campus Martius.*

*Or: The wider topographical context of the Arch of Hadrian alongside the Via Flaminia which led to the (later) Hadrianeum and to Hadrian's Temples of Diva Matidia (and of Diva Sabina?). With discussions of Hadrian's journey from Moesia Inferior to Mogontiacum (Mayence) in order to congratulate Trajan on his adoption by Nerva, and of Hadrian's portrait-type Delta Omikron ( $\Delta$ ) (cf. here **Fig. 3**). With The fourth and the fifth Contribution by Peter Herz, with The first Contribution by Franz Xaver Schütz, with The Contribution by John Bodel, and with The second Contribution by Angelo Geißen;*

at *Introduction*; Sections IX.; XI.; and at Chapter VI.2.4. Amanda Claridge (2013) has identified the head of the "Stonethrower" in the battle Scene LXXII on Trajan's Column (here **Figs. 4; 4.1**) as a copy of Hadrian's portrait-type Delta Omikron ( $\Delta$ ) .... For a summary of all this; cf. *infra*, in Chapter *The major results of this book on Domitian*.

***In addition to this, I allow myself in the following a digression on another question: why did Domitian order to be represented on the 'Relief Ruesch' in this 'Alexander iconography' ?***

Considering that Domitian for the 'Relief Ruesch' (here **Fig. 7**) chose for himself the iconography of 'a dashing hero on horseback, like Alexander the Great', and that Hadrian (?) chose the same iconography for Trajan in 'the Great Trajanic Frieze' (here **Fig. 7.1**), the following conclusions seem to be inevitable.

When discussing above, in Chapter *Introductory remarks and acknowledgements* Hadrian's portrait-statue from Hierapydna at Istanbul (**Fig. 29**), in which Hadrian sets his left foot on the neck of a tiny defeated 'enemy', we have seen that Eugenio La Rocca (1994) has been able to demonstrate that Hadrian's artists had copied archaic 'oriental' models for this merciless representation of a defeated opponent. These models, paintings and reliefs, had been commissioned by Near-Eastern and Egyptian kings, who, like the Romans, had at times conquered and governed large Empires.

**Such archaic representations of Near-Eastern and Egyptian state art had been dedicated by these kings in the temples of their gods, and comprised *inter alia* 'documentations in image and text' of how these kings had successfully suppressed the revolts of their own subjects (!).**

I, therefore, follow Cornelius C. Vermeule (1981, 24-25), who was first to suggest that this portrait-statue of Hadrian from Hierapydna (**Fig. 29**) commemorates Hadrian's suppression of the Bar Kokhba Revolt (132-135 AD). So, independently of Vermeule (1981), also Michaela Fuchs (2014), who, in her turn, follows the relevant suggestion of still other scholars. To this I will come back below.

Vermeule (1981) had based this hypothesis on some important findings of Annalina Caló Levi (1948; cf. here **Fig. 129**; to which I will come back below). If so, the defeated 'enemy', on whose neck Hadrian sets his left foot (here **Fig. 29**), may possibly be identified as a representation of *Judaea*, which since AD 6 was a Roman Province (!).

La Rocca's (1994) survey of the relevant state paintings and reliefs of these archaic Near-Eastern and Egyptian kings has also shown that to the self-representation of these kings had belonged various multifigured iconographic schemes, which show 'the king smiting his enemies'.

**In my opinion, of these archaic multifigured scenes the design of Hadrian's portrait-statue (Fig. 29) could be regarded as an 'abbreviation', reduced to its 'essentials'. The most important message of these archaic Near-Eastern and Egyptian multifigured compositions, presenting 'the king smiting his enemies', to borrow Smith's (2021, 25, n. 97) above-quoted observation,**

**'is that these kings had been leading their victorious battles *themselves*'.**

When considering Domitian's self-presentation as a whole, which is discussed in the Sections II. and III. of this *Preamble*, it does not come as a real surprise that the emperor chose precisely that kind of iconography for himself in the 'Relief Ruesch' (Fig. 7).

**Interestingly, without considering the 'Relief Ruesch' as an intermediary step in the development of this iconography, we could not possibly prove that Hadrian's (?) representation of Trajan, in 'the Great Trajanic Frieze' (Fig. 7.1), has been developed after the portrait of Alexander in the (lost original of the) Alexander Mosaic, which showed the young Macedonian king in his decisive battle against the Persian Great King, Darius (in German: Dareios) III.**

For a discussion of the Alexander Mosaic; cf. Willers (2021, 80-81, Abb. 2). Concerning the date of the Greek prototype of this mosaic, Willers (2021, 81), by comparing its composition with the 'Relief Ruesch', writes:

"In dem erheblich grösseren, figurenreicheren Mosaik ist bekanntlich das eigentliche Thema das dramatisch tragische Aufeinandertreffen von Alexander und dem persischen Grosskönig Dareios III., eine musivische Nachbildung, d. h. [das heißt] eine hervorragende und anerkanntermassen getreue Kopie nach einem griechischen Gemälde aus der Zeit um 300 v. Chr."

As already mentioned above, Andrew Stewart (1993, and in 2022) was instead of the opinion that this painting had still been created in the fourth century BC, and in Alexander the Great's own lifetime.

None of the above-mentioned iconographic schemes of these archaic Near-Eastern and Egyptian kings, which, in their entirety, have aptly been documented and commented by Eugenio La Rocca (1994), show these kings on horseback, of course, since that way of fighting was at their time not as yet invented.

I suggest that Domitian's innovative idea to represent himself like this on the 'Relief Ruesch' (here Fig. 7), nevertheless, *cum grano salis*, can only be explained with these 'oriental' precedents. - But, of course, only via the direct iconographic forebear of the 'Relief Ruesch', the original painting, which was *inter alia* copied by the Alexander Mosaic.

I am suggesting this here since it is the 'essence' of the self-representations of those archaic Near Eastern and Egyptian kings, which, if true, Domitian would thus intentionally have applied to himself, a doctrine, which we could express with the following slogan:

**'the king himself leads his battles' - which are, therefore, victorious**

*Nota bene*, I am suggesting here three things:

a) that Domitian, with the 'Relief Ruesch' (Fig. 7), by intentionally replacing Alexander's likeness on the (original of the) Alexander Mosaic with his own portrait, consciously emulated Alexander the Great - this suggestion is certainly true;

*b*) that the iconography of the portrait of Alexander in the (original of the) Alexander Mosaic, in its turn, and in a certain sense, is consciously modelled on the archaic iconographic schemes of the Near-Eastern and Egyptian kings, discussed above.

The resulting new iconography, of which we do not know, whether it had been created at Alexander's own order, is documented for us in the Alexander Mosaic, the prototype of which, as we learn from Willers (2021, 81), was created around 300 BC; or, according to Andrew Stewart (1993 and 2022), still in the fourth century, and in Alexander the Great's lifetime.

Here, the representation of Alexander was adapted to the current modes of warfare, so that 'king Alexander, smiting his enemy Darius III', is, therefore, shown as riding on horseback.

The hypothesis suggested here makes, of course, only sense, provided the mode of representing Alexander on the Alexander Mosaic in the iconography chosen, reflected consciously the fact that Alexander had been victorious in this battle.

A premise which, I think, we can confidentially assume, not least because of the date 'circa 300 BC' (so D. WILLERS 2021) / or else in the 4<sup>th</sup> century and 'still in Alexander's lifetime' (so A. STEWART 1993 and 2022) of the prototype of the Alexander Mosaic.

As, in my opinion, is on principle true of all comparable products of state art (whenever produced), for example also of the Cancellaria Reliefs (**Figs. 1; 2; Figs. 1 and 2 drawing**);

*c*) that Domitian and his artists, when creating the 'Relief Ruesch', in which they copied consciously the (original of the) Alexander Mosaic and carved instead of Alexander's portrait that of Domitian, were themselves clearly aware of points *a*) and *b*), and that they also knew that Domitian was very much interested in the iconographies of at least one group of those Eastern kings, namely the Egyptian Pharaohs.

I assume all this for the following reasons.

Ad *b*): this assumption presupposes that Alexander the Great identified himself somehow with 'those Great Kings of the Near East of the past', whose iconographies were mentioned above.

We happen to know that Alexander did this, at least in a certain sense: he actually emulated one of the most important archaic kings of the Near East (albeit none of that specific time of the archaic period, whose iconographic schemes were discussed above). Countless Roman generals were eager to compete with Alexander, but we also know that Alexander himself had very similar ideas.

We learn about Alexander the following:

**'Alexander the Great regarded the Persian Great King Cyrus the Great as his model. When in Pasargadae in Persia, he visited the King's tomb and venerated Cyrus by spreading his mantle over the king's tomb, a gesture, which meant Alexander's investiture - as king of Persia [my emphasis]'.**

When I wrote this in my earlier *Study*, I had summarized the relevant findings auf Paul Rehak and John Young (2006, 50-51); cf. Häuber (2017, 481). - To this I will come back below.

For Alexander the Great's above-mentioned 'hero'; cf. Pierre Briant: "Cyrus (1) the Great ... who became circa 557 BC king of the small kingdom of Anshan in Persia ", in *OCD*<sup>3</sup> (1996) 423.

**This ceremony in Cyrus the Great's tomb at Pasargadae proves that Alexander 'identified himself with this Great King of Persia of the past'. To this we may add that Alexander's choice of *this* model for**

**himself is very well understandable: like Alexander 'the Great', also Alexander's 'hero', Cyrus 'the Great', 'had conquered for himself his huge Empire'.**

For Cyrus the Great, and the Palace at Pasargadae, where the investiture of some of the *Achæmaenid* Great Kings had probably been celebrated; cf. Florian S. Knauß (2021, 75-76, Abb. 3.3), who writes that some of the marvellous achievements that had earlier been attributed to this king, cannot possibly be true.

For discussions of all that; cf. *infra*, in volume 3-2, at *A Study on the consequences of Domitian's assassination ... Or: The wider topographical context of the Arch of Hadrian alongside the Via Flaminia which led to the (later) Hadrianeum and to Hadrian's Temples of Diva Matidia (and of Diva Sabina?) ...*; at Chapter VI.1. My 2. Conclusion: In this context it is interesting to analyse the process by which Hadrian finally became himself emperor; at Section Trajan presented Hadrian in AD 106 with the signet-ring that he himself had received on the occasion of his adoption by Nerva. With a discussion of the meaning of this gesture; at Chapter VI.2.2. Additional information that is of importance for the discussion of Hadrian's portrait-type Delta Omikron ( $\Delta\omicron$ ) (cf. here Fig. 3); at **Hadrian and Alexander the Great**; at Chapter VI.2.3. **My own interpretation of Hadrian's portrait-type Delta Omikron ( $\Delta\omicron$ ) (cf. here Fig. 3).** Concerning the 1.) question, I suggest that Hadrian (who, in my opinion, looks in this portrait-type like a man who is circa 20 years old) commissioned his Delta Omikron portrait-type at an unknown date. **He thus either wished to commemorate his circa 1800 km long Parforceritt in November of AD 97 from Moesia Inferior to Mogontiacum (Mainz), which he undertook (together with some 'companions') to congratulate Trajan on his adoption by Nerva, or else the beginning of the resulting 20 year-long cooperation with Trajan (that ended with his adoption? by Trajan, and with his own accession : on the 9th and 11th August of AD 117, respectively).** Concerning the 2.) question, I suggest that Hadrian ordered the marble copies of this portrait-type (here Fig. 3) as part of the propagation of his providentia for the *continuitas imperii* : Hadrian's adoption on 25th February AD 138 of Antoninus Pius (immediately after Antoninus Pius, in his turn, had adopted Marcus Aurelius and Lucius Verus). I suggest this because Hadrian commemorated his adoption of Antoninus Pius also with his tetradrachma, issued at Alexandria in 137/ 138 (here Fig. 138). I regard, therefore, the assumption as plausible, although it is currently not provable that, as a part of this propagation, Hadrian had still himself issued in AD 138 the aurei with this portrait-type and his adoptive parents ('DIVIS PARENTIBVS'), Trajan and Plotina (here Fig. 139). These aurei, like the marble portraits (here Fig. 3), apart from hinting at the fact that Hadrian had now himself adopted a son, hinted also at Hadrian's own adoption *manquée* (his own 'missed' adoption: by Trajan, immediately before Nerva had adopted Trajan) in late October or at the beginning of November of AD 97. **And because of 'the turn to their left' of those portraits (here Fig. 3), a possible Alexander imitatio, Hadrian may also have claimed to have decided (in November of AD 97), at the age of 21, 'to conquer for himself his Roman Empire', similarly as Alexander (together with his *hetairoi* - and his soldiers) had conquered his, starting at the age of 20 [my emphasis].**

Ad c): throughout this volume we will see that Domitian and Hadrian had great interest in Egyptian Pharaohs and their art.

### Let's begin with Hadrian.

In the case of Hadrian this will be discussed in the context of the portrait-statue of Hadrian from Hierapydna in Crete at Istanbul (here Fig. 29).

Annalina Caló Levi (1948), followed by Vermeule (1981), has realized that this statue-type is (*inter alia*) based on a representation of the emperor on a coin, issued by Hadrian at Rome ('not earlier than AD 134'; cf. here Fig. 129), which shows him, in an almost identical iconography, but setting his left foot, not on a human figure (as in the statue, here Fig. 29), but on a crocodile (!).

This is the Egyptian iconography of Horus, who fights the evil (here Fig. 129.1), or in other words, this coin Fig. 129 shows 'Hadrian as King of Egypt', to quote the title of Levi's article (1948).

**As we have heard above, in Section II. of this Preamble, Michaela Fuchs interprets Hadrian's coins (here Fig. 129) and his portrait-statue (here Fig. 29) differently. According to Michaela Fuchs (2014, 129-130, Fig. 7 [cf. here Fig. 129])) those coins show Hadrian 'in the pose of Mars'.**

Against the 'Egyptian interpretation' of those coins, Michaela Fuchs (2014, 130) objects that: "Das Parazonium in der Linken des Kaisers scheint jedoch auf von Legionen errungene Siege hinzuweisen, ein Aspekt, der sich nur schlecht mit der ägyptischen Perspektive vereinbaren läßt". In her discussion of Hadrian's cuirassed statues, dedicated, in her opinion, to Hadrian after his victory in the Bar Kokhba Revolt (*inter alia* here Fig. 29), Michaela Fuchs (2014, 130), therefore, speaks of an "Angleichung" (assimilation) of the emperor to Mars.

**Caló Levi (1948, 33) herself believed that the iconography of Hadrian's portrait-statue from Hierapydna (here Fig. 29) could "refer to the victorious power of the emperor in general", or, in other words, to the doctrine of the emperor's 'invincibility', the discussion of which looms large in this Study (cf. *infra*).**

For these observations by Michaela Fuchs (2014) and Annalina Caló Levi (1948), and the fact that the *virtus* 'invincibility' was on principle demanded of all Roman emperors; cf. *infra*, in *A Study on Hadrian's portrait-statue from Hierapydna* (cf. here Fig. 29); and in Chapter *The major results of this book on Domitian*.

Concerning the just-mentioned *virtus* 'invincibility', I have written elsewhere:

**"The Hellenistic king and the Egyptian Pharaoh had in common that their rule was legitimized by religion [with n. 255]; Babet Edelmann observes that "Sieghaftigkeit" ('invincibility') was characteristic of both ruler types. But there was an important difference: according to Hellenistic ideology, the gods endowed the king with "Sieghaftigkeit" which the king was forced to prove in reality [with n. 256], Patrizio Pensabene speaks of a "teologia della Vittoria" of the Hellenistic monarchies [with n. 257]. The "Sieghaftigkeit" of the Egyptian Pharaoh was a result of the "Horusaspekt seiner Natur" [with n. 258] ('a result of the fact that he was Horus'); cf. B 27" [my emphasis]; cf. Häuber (2014a, 718).**

In my **note 255**, I write: "Cf. on the Roman "Kaiserherrschaft", Zanker 2004 [*i.e.*, here P. ZANKER 2004a], p. 69: "Jedes monarchische System muß sich letztlich religiös legitimieren"".

Cf. **note 256**: "Cf. on the "agonale >Siegerideologie<" of Hellenistic "Dynasten", Lehmann 2012, p. 204 and *passim*".

Cf. my **note 257**: "Pensabene 2007, p. 336".

Cf. my **note 258**: "Edelmann 2007, p. 327 with 591 (with references); cf. B 27".

**Let's now turn to Domitian.**

In the case of Domitian, his affinity to Egyptian Pharaohs and their art will be discussed in this *Study* predominantly in context of Domitian's obelisk (here Fig. 28).

Cf. *supra*, at Chapter *What this Study is all about*; *infra*, at Chapter IV.; below at *The first Contribution by Emanuele M. Ciampini: La regalità domiziana: una nota egittologica*; and *infra*, in volume 3-2, at *Appendix II.* and *Appendix III.*

But before turning to Domitian's obelisk, let me alert you to something else. When discussing in this *Study* Hadrian's portrait-statue of Hierapydna (here Fig. 29), and Hadrian's coin (here Fig. 129), issued at Rome, which presents the emperor in the 'pose of Horus' (*i.e.*, in the Egyptian iconography of Horus, who fights the evil; here Fig. 129.1), and therefore as 'King of Egypt', we shall see that Hadrian himself and/ or his consultants and artists were very well aware of these archaic constructions of kingship. And, most surprising of all, the coin here Fig. 129 proves that not only Egyptians in Egypt, but also the People of Rome

*understood* the relevant message. In Hadrian's case, these archaic iconographies, and especially the archaic construction of the king of Egypt, were only 'borrowed' for Hadrian. We also know that Hadrian had travelled extensively in Egypt and in the Near East. In the past, the kings of those countries had filled the temples of their gods with paintings and reliefs that celebrated their victories - applying precisely the archaic iconographies discussed here (*i.e.*, 'the king smiting his enemies').

For detailed discussions of all that; cf. E. LA ROCCA 1994); and below, at *A Study on Hadrian's portrait-statue from Hierapydna* (cf. here Fig. 29).

In Egypt, temples with such iconographies still survive today, and we know that Hadrian had actually been given guided tours through temples in Egypt. Contrary to all other contemporaries, he could enjoy this privilege, because as Roman emperor he was also the Pharaoh of Egypt, and the kings of Egypt were allowed to enter the temples of the gods. - I thank Rafeed El-Sayed for this information.

For Hadrian's guided tour in the Temple of Min at Panopolis; cf. Rafeed El-Sayed (pp. 58-60, Section: "3.3 Panopolis - Alexandria - Rom"; p. 60, at: "Panopolis and Rome", in: *id.*, Konstantin C. Lakomy, Elisabeth Ehler, Cäcilia Fluck, Anne Herzberg-Beiersdorf and Olivia Zorn (*Akhmîm Ägyptens vergessene Stadt*, 2021); English edition: *Akhmîm Egypt's forgotten city*:

"After founding the Middle Egyptian city of Antinoopolis a year later, Hadrian reached Panopolis, some 200 km to the south, where he had the temple of Min shown to him. The priest of Min Pa-di-Hor-neb-khem ('the one given by Horus-of-Letopolis'), who guided the emperor through the temple, is also considered the original author of the text written for the Antinous obelisks, one of which is still in Rome today. [with n. 11]".

This passage is quoted in more detail and discussed *infra*, at *A Study on Hadrian's portrait-statue from Hierapydna* (cf. here Fig. 29); at *The research published in my earlier Study (2017): on the tomb of Antinous at Antinoopolis, on his (alleged) tomb at Hadrian's Villa near Tivoli, on his cenotaph at Rome, and on the two pertaining Antinous Obelisks*.

Concerning my above-mentioned assertion, I asked Rafeed El Sayed, whether he could provide me with examples of temples in Egypt, where reliefs representing the archaic iconography of 'the king smiting his enemies' are indeed still preserved (apart from the example of Domitian that will be discussed below). El-Sayed was kind enough to answer me by E-mail on 30th April 2023:

"Ja, z.B. auf den Tempeln des Neuen Reichs in Karnak und auch den ptolemäischen und römischen Tempeln, von denen ja noch einige aufrecht stehen. Die Darstellungen sind gerne auf den Pylonen (Horus-Tempel von Edfu aus der Ptolemäerzeit) aber auch an anderen Außenwänden angebracht".

El-Sayed has also kindly provided me with the following references: Sylvia Schoske, *Das Erschlagen der Feinde. Ikonographie und Stilistik der Feindvernichtung im alten Ägypten* (Diss. Heidelberg 1982 [cf. also S. SCHOSKE 1994]); and Günther Hölbl, *Altägypten im Römischen Reich*, I (2000, S. 2): showing a relief representing the Emperor Trajan in the archaic iconography of 'the king smiting his enemies'.

**Domitian, on the other hand, did not have the chance to travel himself to Egypt, but contrary to even Hadrian, we happen to know that Domitian was actually *himself* represented in Egypt in the archaic iconography of 'the king smiting his enemies'.**

Olaf E. Kaper (2021, 184, Chapter: "Domitian and the Temples of Egypt"; Section: "Domitian's *Damnatio Memoriae* in Egypt") writes: "After Domitian's death his name and images were affected by a *damnatio memoriae* that was imposed by the Senate [with n. 19, providing references]. In contrast to other parts of the

Roman world, many images of Domitian have survived in Egypt. The *damnatio* only rarely affected his name in Egyptian texts and in Greek inscriptions in Egypt and never his images as Pharaoh (fig. 4)". Cf. Kaper (2021, 183, Fig. 4). The caption of this illustration, a photo of a relief from the temple at Esna, showing Domitian in the archaic iconographic scheme 'the king smiting his enemies', reads:

**"Relief on the outer wall of the temple at Esna, depicting Domitian as Pharaoh smiting his enemies. This relief has symbolic and no historical significance, but it is illustrative of the major work of decoration undertaken at some temples under Domitian, which survived despite the *damnatio memoriae* (photo O.E. Kaper) [my emphasis]"**.

Most recently Maria Iride Pasquali ("Domiziano faraone sui rilievi dei templi egizi", 2023) has discussed the at first glance remarkable fact that in some temples in Egypt have survived reliefs, which represent Domitian, and she is also able to explain, why these reliefs have not been destroyed.

Let's now turn to Domitian's obelisk (here **Fig. 28**).

Miguel John Versluys (2021, 170-171, Fig. 3 [cf. here **Fig. 28**]: "*Fontana dei Quattro Fiumi* by Bernini on Piazza Navona with the obelisk from the *Iseum Campense* ...") writes about Domitian's obelisk: "The obelisk re-used by Gian Lorenzo Bernini as the centrepiece of his *Fontana dei Quattro Fiumi* on Piazza Navona comes from the *Iseum Campense* (fig. 3). It might [page 171] well have decorated the central courtyard of the complex. **On this obelisk, Domitian presented himself in hieroglyphs as divine pharaoh to the Roman People** [my emphasis]"

**According to Emanuele M. Ciampini in his first *Contribution* to this volume ("La regalità domiziana: una nota egittologica"), the hieroglyphic texts of this obelisk (here Fig. 28) were composed by Egyptian specialists in close collaboration with Domitian himself. In the resulting texts, Domitian stresses three statements, which are closely interconnected, and that we could regard as his 'Credo' :**

- a) the legitimacy of the reign of all three emperors of the Flavian dynasty in general; this statement is expressed in these inscriptions by using formulations that derive from old Egyptian theological constructions of kingship;
- b) the legitimacy of Domitian's own reign as Pharaoh of Egypt and as the Roman emperor; and -
- c) his own divine nature.

Domitian's reign as Roman emperor is legitimate, because he has received his reign from his natural father, the Emperor *Divus Vespasianus*, and from his natural brother, the Emperor *Divus Titus*. At the same time Domitian stresses his divine nature, because he is descended directly from gods: *Divus Vespasianus* and *Divus Titus*.

As I have understood through E-mail- and telephone conversations on the subject with Emanuele Ciampini on 4th and 5th February 2022, whom I had asked for further advice - not being an Egyptologist myself - these hieroglyphic texts of Domitian's obelisk are indeed very special, as Ciampini himself has also stated in his first *Contribution* to this volume ("La regalità domiziana: una nota egittologica"). Namely in so far, as these texts 'amalgamate' in a very specific way these old Egyptian theological constructions of kingship with Domitian's own ideas about himself as Pharaoh of Egypt and as Roman emperor. I do hope that Ciampini will find the time to publish also these additional thoughts, which he was kind enough to share with me in these conversations, and which he has allowed me to mention here.

Cf. *supra*, at *Preamble: Domitian's negative image*; at *Section II. Conclusions: Domitian's representations of his military successes and his claims to be of divine descent and to possess a divine nature*; See also *infra*, at *Chapter IV. Frieze B of the Cancellaria Reliefs* (cf. here **Fig. 2**) and *the Obeliscus Pamphilius/ Domitian's obelisk* (cf. here **Fig. 28**); and below, at *The first Contribution by Emanuele M. Ciampini : La regalità domiziana: una nota egittologica*.

See now also Emanuele M. Ciampini and Federica Pancin (forthcoming): "**And may the land be prosperous in the time of the dynasty whose name is Flavii'. Thoughts on the Egyptian Domitian** [my emphasis]".

As already mentioned above, the first part of the title of their article is, of course, a quote from Domitian's obelisk; cf. E.M. Ciampini (2004,159, H.7).

Let's now return to the 'Relief Ruesch'.

Much debated in the past, and also discussed by Willers (2021, 79 n. 6, pp. 93-94), is the fact that the 'Relief Ruesch' (Fig. 7), although fragmentary, and with Domitian's portrait defaced, was nevertheless re-used in antiquity. This assumption is based on two facts: the breaks of the relief were smoothed and the great holes, one of them in the middle of the relief, which were made in antiquity, but at a second moment (*i.e.*, in the course of the reworking), were created in a way that the figure of Domitian, and of the horse he is riding, remained intact.

Willers (2021, 80 with n. 9, p. 94 with n. 82) is able to disprove the hypothesis of earlier scholars, according to whom the 'Relief Ruesch' had been *created* as a "Brunnenverkleidung" ('a decoration of a fountain'), apart from its iconography, which does not suit such a purpose, its holes were obviously made at a second moment. Most importantly, the 'Relief Ruesch' was definitely not exposed to water, because that would clearly be visible; cf. Willers (2021, 80): "Spuren von fließendem Wasser sind auf der Reliefseite der Platte nicht vorhanden".

Willers does not discuss the suggestion, formulated in the sales catalogue of the Collection Ruesch, *Katalog Fischer 1936* (which he quotes), where the 'Relief Ruesch' has the catalogue number 238. The author suggests: "Nachträgliche Verwendung dieses Reliefs als Brunnenverkleidung" ('secondary use as decoration of a fountain'), which I find (in theory) plausible, although the fact remains that the relief does not show any traces of such a use. Willers himself, who, as already mentioned, convincingly compares the 'Relief Ruesch' with the Cancellaria Reliefs (Figs. 1; 2; Figs. 1 and 2 drawing), concludes that we ignore for both (*i.e.*, the Cancellaria Reliefs and the 'Relief Ruesch'), to which buildings they may originally have belonged.

Willers (2021, 94), therefore, ends his article with an admonition regarding 'Domitian's Rome':

**"Es bleibt die Aufgabe, die Begehungen des domitianischen Roms zu intensivieren** [my emphasis]".

I can only agree and have chosen Willers's phrase as the first epigraph of this *Study* on Domitian cf. *infra*, at Chapter I.1.

Contrary to Willers, who does not suggest where the building may have stood, to which the 'Relief Ruesch' originally belonged, nor what its purpose was, when the relief was re-used, I myself have an idea concerning both subjects. Since I follow Filippo Coarelli (2009b, 88; *id.* 2012, 283, 286-291, 481-483, 486-491) in assuming that the Domitianic arch in front of Domitian's 'Domus Flavia' / *Domus Augustana* on the Palatine was possibly dedicated to *Divus Vespasianus*, I suggest that the Cancellaria Reliefs decorated either the opposite walls in the passageway of this arch, or, because of the content of both Friezes, possibly rather a passageway of the Arch of Domitian, which Coarelli postulates at the "Porta principale" of Domitian's Palace *Domus Augustana* on the Palatine.

Cf. here Figs. 1; 2; Figs. 1 and 2 of the Cancellaria Reliefs, drawing, 'in situ'; Figs. 71; 58; 8.1, labels: Arch of DIVUS TITUS; PALATIUM; VICUS APOLLINIS? / "CLIVUS PALATINUS"; ARCUS DOMITIANI / DIVI VESPASIANI ?; "DOMUS FLAVIA"; DOMUS AUGUSTANA; "Porta principale", Arch of Domitian ? / Cancellaria Reliefs ?

Cf. *infra*, at Chapter I.3. Were the Cancellaria Reliefs (cf. here **Figs. 1; 2**) the horizontal panels in the bay of an arch, built by Domitian?; at Chapter I.3.2. A discussion of the question, whether the Cancellaria Reliefs (cf. here **Figs. 1; 2**) and the architectural finds from the area of the Palazzo della Cancellaria could have belonged to an arch, built by Domitian (cf. here **Figs. 1 and 2 of the Cancellaria Reliefs, drawing, 'in situ'**); at Chapter V.1.d) The reconstruction, in my opinion erroneous, of the length of Frieze B of the Cancellaria Reliefs by S. Langer and M. Pfanner (2018) (cf. here **Figs. 1 and 2 drawing**) and the correct reconstruction of the length of Frieze B by F. Magi, whom I am following here (cf. here **Figs. 1; 2; and Figs. 1 and 2 of the Cancellaria Reliefs, drawing, 'in situ'**). With a discussion of how many Vestal Virgins we might expect to appear at public ceremonies, such as the one shown on this panel (cf. here **Fig. 2**), and with The first Contribution by Jörg Rüpke; at Chapter V.1.h.1.) The passages of Langer and Pfanner (2018), in which they discuss the togate youth on Frieze B (in my opinion Domitian; cf. here **Figs. 1 and 2 drawing: figure 12**); at Chapter V.1.i.3.) My own hypotheses concerning the design, manufacture and meaning of both friezes of the Cancellaria Reliefs (cf. here **Figs. 1; 2**), the structure, to which they may have belonged, and the reason, why this structure was destroyed; at Chapter V.1.i.3.b); at Section III.; at Chapter VI.3. Summary of my own hypotheses concerning the Cancellaria Reliefs (cf. here **Figs. 1; 2**) presented in this Study; Addition: My own tentative suggestion, to which monument or building the Cancellaria Reliefs may have belonged, and a discussion of their possible date; at Chapters The major results of this book on Domitian; and at The visualization of the results of this book on Domitian on our maps; and *infra*, in volume 3-2, at Appendix IV.d.2.f)).

**Provided my hypothesis is true that the Cancellaria Reliefs decorated one of Domitian's two arches on the Palatine, and considering at the same time Willers's (2021, 79 n. 6, p. 83, n. 18) observation that the Cancellaria Reliefs (here Figs. 1; 2) and the 'Relief Ruesch' (here Fig. 7) show great stylistic similarities, I suggest, as a working hypothesis, that the 'Relief Ruesch' (the provenance of which is not recorded) may originally also have belonged to the sculpture decoration of Domitian's Palace on the Palatine.**

Only after this Chapter had been written so far, did I realize that Willers (2021, 84) mentions the fact that on the Palatine has been found a fragmentary relief with the representation of a horse (cf. here **Fig. 4.1.2**) that looks very similar as Domitian's horse on the 'Relief Ruesch': "Bloesch hat seinerzeit auf die enge Verwandtschaft des Feldherrnpferdes auf unserem Relief [cf. here **Fig. 7**] mit dem Pferd eines fragmentierten Reliefblocks vom Palatin aufmerksam gemacht [with n. 25]".

In his **note 25**, Willers writes: "Bloesch 1943, 204; [von] Blanckenhagen 1940 [65, I. f], Taf. 20 Abb. 58".

Cf. Peter Heinrich von Blanckenhagen (1940, 65, I. f): "Friesstück, Fragment einer Platte; Teil einer Ranke mit Tier, "Peristyl", Taf. 20 Abb. 58 des Flavienpalastes. Photo: Dr. Fuhrmann".

Cf. *infra*, in Chapter V.1.i.3.b); at Section III; and in Chapter *The major results of this book on Domitian*.

*As is well known, Domitian had friends, who remained faithful to him after his assassination*

In my opinion, one such proof of fidelity is Domitian's famous portrait in the Musei Capitolini, Palazzo dei Conservatori (inv. no. MC 1156; cf. here **Fig. 7**). For this hypothesis; cf. Häuber (2017, 167).

This portrait of Domitian has been chosen for the cover of the essay volume *God on Earth : Emperor Domitian*, edited by Aurora Raimondi Cominesi, Nathalie de Haan, Eric M. Moormann and Claire Stocks (2021), and appears also on the cover of the exhibition catalogue *Domiziano imperatore. Odio e amore*, edited by Claudio Parisi Presicce, Massimiliano Munzi and Maria Paola Del Moro (2023).

Elsewhere, I have identified the findspot of this bust of Domitian, which was previously unknown: in the Via Rattazzi on the Esquiline, a cross-road of the Via Principe Amedeo. Interestingly it came to light at a site, where also the following portraits in the Musei Capitolini were found: of *Diva Matidia* (MC S 889), of Hadrian (MC S 890), of Sabina (MC S 848), and possibly also a portrait of *Faustina maior* (MC S 851).

Cf. Häuber (1991, 57-58 with n. 251: I have identified this bust of Domitian with find reports in *NSc* 1898, 391: "In via Principe Amedeo, facendosi alcun lavori stradali ... busto marmoreo dell'imperatore Domiziano ... in parte danneggiato mancano del tutto le spalle", and *BullCom* 26, 1898, 350; cf. p. 351: "Tutti gli oggetti di questa sezione sono conservati nel Magazzino Archeologico all'Orto Botanico; cf. *HELBIG*<sup>4</sup> II (1966) Nr. 1752, "Fragmentierte Büste des Domitian" (H. v. HEINTZE): "Gefunden wahrscheinlich auf dem Esquilin zwischen 1894 und 1904. Erst im Antiquarium auf dem Caelius, dann im Konservatorenpalast, Sala degli Arazzi 3").

Dietrich Willers (2021, Taf. 13, 2-5 [= here Fig. 7]) has compared a photo of this portrait of Domitian with the head of the Roman *imperator* on the 'Relief Ruesch', in order to prove that the protagonist of this relief is likewise Domitian.

**Diana Atnally Conlin (2021, 157) writes about Domitian's portrait (here Fig. 7) :**

**"Reflection and innovation were also combined in the design of Domitian's mature portraits.** Created around 88, his official imperial portrait was a curious blend of familiar Flavian facial similarities reborn with inventive details that curiously correspond to unusual physical traits of earlier emperors (fig. 5 [cf. here Fig. 7]). In sculpture, Domitian continued to resemble his father and brother, but his adult portraits were also distinct and individualized. For most images based on Domitian's officially sanctioned third portrait type - an official image which appears to have remained relatively unchanged for the rest of his reign - **the artists retained a realistic rendering of his facial features while also adding idiosyncratic attributes, such as the protruding upper lip (similar to Gaius Caligula) and an artfully coifed hairstyle of thick curls (similar to Nero's Helios-inspired tiara hairdo), this despite Domitian's notorious baldness.** In portraiture, Domitian's likeness had evolved into a visual amalgamation of both the Julio-Claudian and Flavian dynasties. His public visage represented the venerated past and the superior present simultaneously. [with n. 9; my emphasis]".

In her **note 9**, Atnally Conlin writes: "See on portraits, Jane Fejfer and Caroline Vout in this volume".

**To Diana Atnally Conlin's (2023, 157) above-quoted passage, I should like to add a comment :**

**Diana E.E. Kleiner (1992, 191) has, in my opinion, correctly identified the head of the togate youth on Frieze B of the Cancellaria Reliefs (cf. here Fig. 2; Figs 1 and 2 drawing: figure 12) as a portrait of the young Domitian, identifying him *inter alia* because of his "slightly protruding upper lip [my emphasis]".**

For a discussion; cf. below, at **n. 394**, in Chapter *III*.

In the exhibition-catalogue *Domiziano Imperatore. Odio e amore* (2023, 19), this bust of Domitian (here Fig. 7) has the following *opera*-number [*i.e.*, in the sense of 'exhibited object'] :

"[Opera] 1. Busto-ritratto di Domiziano

Marmo pentelico

Alt. cm 53, con peduccio cm 79; largh. cm 26

Età domiziana (81-96 d.C.)

Da Roma, Esquilino, via Principe Amedeo: 1898

Roma, Musei Capitolini, Palazzo dei Conservatori, inv. MC S 1156".

**The discussion of this bust of Domitian (cf. here Fig. 7) leads us to Domitian's *damnatio memoriae*.**

Because, as already said above, the 'survival' of this bust proves, in my opinion, that the decree by the Senate to damn Domitian's memory, had obviously not been followed by private individuals - for example not by the owner of this bust, who lived on the Esquiline.

See now Gian Luca Gregori and Valerio Astolfi (*La damnatio memoriae di Domiziano. Iscrizioni e monumenti di Roma*, 2023, 159).

Gregori and Astolfi discuss both, portraits of Domitian in Rome, which have survived, and inscriptions in Rome, in which, in spite of his *damnatio memoriae*, his name has not been erased:

**"In questa sede si vuole portare l'attenzione non già sui documenti che presentano l'erosione totale o parziale del nome e della titolatura di Domiziano, quanto piuttosto su quei casi, più numerosi di quanto non si pensi, in cui essa non ebbe luogo, a cominciare dai commentarii dei Fratelli Arvali [with n. 1]. Negli atti ufficiali di questo collegio sacerdotale d'estrazione senatoriale, esposti presso il lucus della Dea Dia alla Magliana, il nome del principe non è stato mai cancellato. Il sospetto è che vi sia stata una precisa volontà politica di risparmiare il nome dell'ultimo dei Flavi. Il sospetto è che vi sia stata una precisa volontà politica di risparmiare il nome dell'ultimo dei Flavi. Diversi fattori sembrano suggerire l'esistenza di uno stretto rapporto tra gli Arvali e Domiziano, sotto il cui Principato furono condotti lavori nel lucus, come la costruzione di un tetrastilo per ospitare le statue dei Divi e dello stesso Domiziano [with n. 2] ...**

**Ma anche in altre iscrizioni di Roma (come pure d'Italia e delle province) il nome del principe non fu sempre scalpellato [with n. 5]. Nell'Urbe la percentuale delle iscrizioni domiziane erase sarebbe solo del 21%, in Italia scenderebbe al 15% [with n. 6], mentre nelle province, in particolare in quelle orientali, salirebbe oltre il 40% [with n 7; my emphasis]". Cf. Gregori and Astolfi (2023, 160): "Sembra pertanto difficile seguire Svetonio, secondo cui il popolo avrebbe accettato con indifferenza la morte del principe [with n. 15] e le manifestazioni di gioia, soprattutto nelle province, non possono considerarsi rappresentative dei sentimenti generali, in special modo della plebe di Roma e dei soldati, che sappiamo essere stati fino all'ultimo fedeli a Domiziano [with n. 16; my emphasis].**

In their **note 1**, Gregori and Astolfi write: "Per il tema della *damnatio domiziana* nelle fonti letterarie e nella ritrattistica vd. [vedi] ora i contributi nel volume di Raimondi Cominesi et al. 2021 (Stocks 2021, pp. 91-95; Augoustakis, Buckley 2021, pp. 159-165), ma anche Augoustakis, Buckley, Stocks 2019".

In their **note 2**, they write: "Scheid 1990, p. 131; Marcattili 2013, pp. 51-55; Broise, Scheid 2020".

In their **note 5**, they write: "Kajava 1995, p. 208".

In their **note 6**, they write: "Per la *damnatio* nelle iscrizioni sempre utili Martin 1987; Martin 2007 e Pailler, Sablayrolles 1994, che nelle percentuali non conteggiano gli Atti degli Arvali, l'*instrumentum domesticum*, le titolature della moglie Domizia e le iscrizioni in cui il nome di Domiziano è integrato dagli editori a causa del danneggiamento della pietra. Cfr. anche Bianchi 2014, pp. 48-51 e per un aggiornamento Gregori, Romano 2022".

In their **note 7**, they write: "**L'alta percentuale nelle province potrebbe dipendere dalle nomine di governatori vicini a Traiano nel 97: Eck 2022 [i.e., here W. ECK 2022b; my emphasis]**".

In their **note 15**, they write: "Suet. Dom. 23, 1"

In their **note 16**, they write: "Philostr. VS 1, 7, 2; Plut. *Mor.* 828 A; D. Chr. *Or.* 18. Nei diplomi militari d'età domiziana, essendo esse copie private di documenti ufficiali, non è testimoniata alcuna erosione del nome di Domiziano; del tutto eccezionale il caso di *AE* 1969/70, 583 [my emphasis]".

**To the above-quoted observations of Gregori and Astolfi (2023, 159) I should like to add some comments :**

The title of Werner Eck's article (2022b), quoted by Gian Luca Gregori and Valerio Astolfi (2023, 159, n. 7), is: "**La crisi di potere dell'imperatore Traiano nella Renania romana nell'anno 97/98 sulla base dei diplomi militari** [my emphasis]". As already mentioned above, at the very beginning of Section I. of this *Preamble*, Werner Eck's essay (2022b) leads us precisely to those historical events, which are discussed there.

**Also to the following remark by Gregori and Astolfi (2023, 159), I should like to add a comment :**

"Negli atti ufficiali di questo collegio sacerdotale [*i.e.*, the "fratelli Arvali"] d'estrazione senatoriale, esposti presso il *lucus* della Dea Dia alla Magliana, il nome del principe non è stato mai cancellato". - As is well known, Domitian and Titus were themselves members of the Arval brethren.

See below, at: *The first Contribution by Peter Herz on the inscription (CIL VI 2059.11), which reports on a meeting of the Aroel brethren on 7th December 80 at the Temple of Ops in Capitolio, among them Titus and Domitian: Titus vows to restore and dedicate what would become Domitian's (fourth) Temple of Iuppiter Optimus Maximus Capitolinus; and infra, in volume 3-2, at Appendix I.g.4.) Domitian's sacellum of Iuppiter Conservator, his Temple of Iuppiter Custos, and his (fourth) Temple of Iuppiter Optimus Maximus Capitolinus (cf. here Fig. 83). With The first Contribution by Peter Herz.*

*Another proof that Domitian had friends is his nurse Phyllis,  
who even secured Domitian a burial in his Templum Gentis Flaviae.  
Phyllis buried Domitian there, together with his beloved Diva Iulia Titi' -  
the daughter of his brother Titus - in the same cinerary urn (!)*

Phyllis had educated both Domitian and Iulia Titi (Suet., *Dom.* 17; 22); *Diva Iulia Titi* was the first member of his family, whom Domitian buried in his *Templum Gentis Flaviae*. Phyllis cremated Domitian's corpse in her *Villa* on the *Via Latina*; she then secretly carried Domitian's ashes to the *Templum Gentis Flaviae*, where she mixed them with those of Iulia Titi (cf. Suet., *Dom.* 17).

Cf. Filippo Coarelli ("Gens Flavia, Templum", in: *LTUR* II [1995] 368); Maria Cristina Capanna (2008, 173 n. 5); Coarelli (2009b, 94 with n. 309); IV.1.1.h); J.-C. Grenier (2009, 238): "esso [the *Templum Gentis Flaviae*] era dedicato al culto della *gens Flavia* in quanto tomba dinastica: le ceneri di Vespasiano e di Tito vi erano state deposte (Mart. IX,34,7 e Stat. *Silv.* V,1,240-241) ed esso ospitava quelle di Domiziano che qui furono mischiate a quelle della beneamata Giulia, la figlia di Tito (Suet. *Dom.* 17 e 22)"; Eugenio La Rocca (2009, 228 with n. 45); Coarelli (2014, 204 with n. 471); Häuber (2017, 167; cf. below, at Chapter IV.1.1.h); Eric M. Moormann (2021, 46 with n. 16; *id.* 2023, 59 with n. 17); Diane Atnally Conlin (2021, 158 with n. 14); Caroline Vout (2021, 176 with n. 5); Maria Paola Del Moro (2021, 185 with n. 2; *ead.* 2023, 167 with n. 2); Eugenio La Rocca (in: E. LA ROCCA and L. KOSMOPOULOS 2023, 121, with n. 8, p. 124, with ns. 28, 29); and Rose Mary Sheldon (2023, in press; Chapter 7, with n. 81). Dietmar Kienast, Werner Eck and Matthäus Heil (2017, 109) comment on Domitian's death and burial as follows: "18. Sept.[ember] 96 *Tod*: Ermordet (Suet. *Domit.* 17, 3). **Heimliche Beisetzung im templum gentis Flaviae** [my emphasis]".

I, therefore, add something else to my working hypothesis concerning the 'Relief Ruesch' (here Fig. 7). For the time being we cannot know, whether the person, who re-used the 'Relief Ruesch', knew that, in its original state, it had represented Domitian. Nor, if so, whether or not this person was hostile to Domitian. Although all of this is so far unknown, the following possibility remains. Perhaps it was another person, faithful to Domitian, who took the 'Relief Ruesch', after Domitian's portrait had been defaced, thus possibly preventing its complete destruction, kept it as a memory of Domitian, and, by means of those holes, put it on display somewhere.

For discussions of all this; cf. *supra*, at *Preamble: Domitian's negative image*; at Section II. *Conclusions: Domitian's representations of his military successes and his claims to be of divine descent and to possess a divine nature*; and below, at Chapter IV.1.1.h). *The new findings by B. E. Borg (2019) concerning the Templum Gentis Flaviae support the hypothesis suggested here that Domitian's obelisk (cf. here Fig. 28) was commissioned for the Iseum Campense. With some observations concerning the Temple of Divus Traianus at Italica, and concerning the Marble Forum at the Colonia Augusta Emerita (Mérida) in Spain. With The Contributions by Eric M. Moormann, Mario Torelli, and Walter Trillmich, and with The second Contribution by Jörg Rüpke.*

**Conclusions concerning the five points discussed in the III. Section of this Preamble.**

1.) Domitian's escape from the *Capitolium*  
on 19th December AD 69

We do not know, whether he was only lucky, or whether this was the predictable result of his *own* prudent decision to disguise himself, as suggested to him by the freedman of the *aedituus*. But Domitian *profited* from this experience, because Frontinus wrote in his *Strategemata* that Domitian had also applied excellent stratagems in his war against the Chatti

2.) Domitian's meeting with Vespasian at  
Beneventum in AD 70

This was definitely Domitian's own, very prudent decision

3.) Domitian's achievements as emperor  
and the airport Berlin Brandenburg

Of Domitian's projects, commissioned by him as emperor, some of his gigantic buildings at Rome have (only in part) survived until the present day. Interestingly, this had the effect that 'thanks to Domitian's enterprises and those of his family, Rome is still nowadays basically a Flavian city'. Domitian's projects discussed in this *Study* turned out to be so extraordinarily successful and far-sighted, because of his ability - among many other relevant decisions - to choose excellent collaborators. All this taken together proves that Domitian was, what I should like to call, a *Verwaltungsgenie* (an 'administrative genius'). Especially when we consider that **a)** all three Flavian emperors together reigned for less than 30 years, and Domitian for only 15 years; and **b)** that Domitian had a bad relationship with the Senate (or should we rather say that Domitian was *therefore* so successful?)

4.) Domitian's emulation of  
Romulus and Theseus

Like Domitian's emulation of Augustus this shows his very personal interest in 'ideal' rulers

5.) Domitian's *Alexander imitatio*

By ordering to be represented on the 'Relief Ruesch' (here **Fig. 7**) in the same iconography as Alexander the Great, Domitian demonstrated that he had accepted the doctrine 'invincibility' for himself. This *virtus* was on principle demanded of all Roman emperors (being the *conditio sine qua non* to guarantee the desired *continuitas imperii*)

Points 3.), 4.) and 5.) prove that Domitian took his 'job Roman emperor' very seriously; point 1.) proves that Domitian, already at the age of 18, was capable of adjusting himself to a very dangerous situation and to accept a solution, suggested to him by someone else, which saved his life; point 2.) proves that Domitian, still 18 years old, was also capable of planning himself a scenario that was completely to his own advantage.

My thanks are due to T.P. Wiseman for suggesting to me in an Email of 19th April 2023, how my above-suggested term '*Verwaltungsgenie*' could be translated into English.

Apropos, Domitian took his 'job Roman emperor' seriously. In my opinion, this is further supported by :

**a)** what Robert Sablayrolle (1994, 125) writes about Domitian's design of his games called *Capitolia*. According to Sablayrolles, '**Domitian, like Augustus before him, felt that it was the obligation of the**

**emperor to care for all parts of the Empire**: "Même alliance de l'Orient et de l'Occident que dans les Jeux Capitolins à la grecque. **Ce désir d'englober dans une perspective unique toutes les parties de l'empire et de ne pas limiter à Rome la sollicitude impériale est encore un trait de ressemblance entre Domitien et Auguste** [my emphasis]". - This was already quoted *supra*, in Section III. of his *Preamble*; and -

b) what Claudio Parisi Presicce writes about the iconography of the headless cuirassed statue in the Museo Chiaramonti (a possible portrait of Domitian; cf. here **Fig. 6, right**) - tacitly assuming that Domitian accepted also that doctrine for *himself*, which is represented by means of the iconography of this portrait:

Cf. *infra*, in volume 3-2, the title of *Appendix IV.c.2.*): `... **Exactly like the statue of the *ficus Ruminalis* on the Anaglypha Hadriani** (cf. here **Figs. 21-22**), **the *lupa* and the twins on those cuirasses** [cf. *inter alia* here **Fig. 6, right, a possible portrait of Domitian**] **symbolize Rome's claim to eternal power and divine mission, and that it was the task of the Roman emperor to fulfill this obligation** (cf. Claudio Parisi Presicce 2000, 28, 29 [my emphasis])'.

*Personally, I prefer the following judgements about Domitian by other scholars :*

by Robert Sablayrolles (1994, 116, who, discussing Domitian's government, mentions his "*diligentia*" - circumspection; and p. 125, where he states that Domitian was an "administrateur avisé" - a prudent administrator); by Barbara Levick (2009, 23): "il suo governo fu acuto e attento"; by Alexander Heinemann (2014, 250): "Die *Capitolia* sind konzipiert für ein zunehmend vernetztes Reich ... An den entscheidenden Stellen - Zueignung, Leitung und Ikonographie der Spiele - formulieren sie die unangefochtene Stellung des Jupiter Capitolinus und des Kaisers [*i.e.*, Domitian] als Garanten römischer Herrschaft"; by Daniëlle Sloopjes (2021, 121): "Domitian seems to have liked public spectacles ... his personal attention and interest at public shows gives the reader the impression that he was particularly good at showing his people his commitment to them"; by Frederick G. Naerebout (2021, 151): "the pious *cultor deorum* - with an eye for detail and a severe disposition: for all we know, that is the real Domitian"; by Claudio Parisi Presicce, Massimiliano Munzi and Maria Paola Del Moro (2023, 10): "La profonda dedizione [*i.e.*, of Domitian] per gli dei e, insieme, il sentimento religioso che lo portò a sentire su di sé la loro protezione, soprattutto quella di Minerva, ne determinarono il comportamento di attenta cura delle cerimonie e degli edifici sacri, la cui espressione più alta fu la lussuosa ricostruzione del tempio capitolino arso nell'incendio dell'80 d.C."; by Nathalie de Haan, Eric M. Moormann, Aurora Raimondi Cominesi and Claire Stocks (2023, 17): "Roma trasse vantaggio della sua [*i.e.*, Domitian's] politica edilizia; le arti e la letteratura fiorirono"; by Roberta Alteri (2023, 34): "Questa ricchezza e particolarità delle varianti [of the applied architectural marbles] presenti nella residenza domiziana [*i.e.*, Domitian's Palace on the Palatine] assurgeranno a modello e diventeranno prototipo delle botteghe dei periodi successivi, che ripeteranno lo stile di Domiziano, specialmente quello palaziale, ancora nel II e nel III secolo d.C."; by Eric M. Moormann (2023, 62): "Tutte queste attività edilizie mostrano come Domiziano abbia meticolosamente ancorato i suoi progetti ai programmi costruttivi di Augusto e Nerone ... E così creò davvero la sua "Domizianopoli"; by Claudio Parisi Presicce and Eloisa Doderò (2023, 63): "L'occasione di questo intervento [to erect the fourth Temple for Jupiter Capitolinus] è il devastante incendio dell'80 d.C., preziosa opportunità per l'imperatore [*i.e.*, Domitian] "maniaco della costruzione" [with **note 6**: "Plut. *Publ.* 15, 5-6"] di plasmare Roma a propria immagine e somiglianza"; by Gian Luca Gregori and Valerio Astolfi (2023, 160): "Sembra pertanto difficile seguire Svetonio, secondo cui il popolo avrebbe accettato con indifferenza la morte del principe [*i.e.*, Domitian] ... in special modo della plebe di Roma e dei soldati, che sappiamo essere stati fino all'ultimo fedeli a Domiziano"; and by Rose Mary Sheldon (2023, in press; Chapter 7): "Rather than making concessions to the Senate he [*i.e.*, Domitian] chose to oppose them and thus distinguished himself and his imperial authority from those of the weakened Senate. The results were impressive ... He ... designed a building program that ensured the Roman Empire had a capital worthy of envy ... he was responsible for far-reaching changes in domestic administration and foreign policy".

Also most of these judgements have already been quoted before in this *Preamble*.

*I like best, of course, that Sablayrolles (1994, 135) has asked, why this period is not called  
`the age of Domitian´,  
similarly as we are used to speak of `the age of Augustus´, and of `the age of Pericles´.*

This passage was already quoted in more detail *supra*, in Section III. of his *Preamble*; at point 3.).

Below I quote some of these and another statement about Domitian by other scholars in more detail.

Sablayrolles (1994, 125), who compares in this article Domitian with Augustus, comes to the conclusion that there were many parallels between the two men. Domitian was for example, intentionally, as Sablayrolles suggests, 'like Augustus, a prudent administrator':

**"Les rapprochements entre Auguste et Domitien sont, on le constate, nombreux. Conséquences, certes, d'identités de vues et de choix politiques dans bien des domaines - Domitien, comme Auguste, fut un administrateur avisé - , ils sont aussi le fruit d'une politique délibérée de l'empereur flavien [my emphasis]"**.

This passage was already quoted *supra*, in Section III. of his *Preamble*; at point 3.).

For Barbara Levick's statement; cf. Häuber (2017, 166, 167), where I have quoted Barbara Levick (2009, 23):

**"In addition to that, Domitian's reign may actually be judged - in retrospect - as a time of excellent government, the achievements of which should last for a very long time (!). See the comments by Barbara Levick (2009, 23) [quoted on p. 167; my emphasis]"**.

Barbara Levick (2009, 23) writes :

"Domiziano si sarebbe lamentato che le province erano difficilmente in grado di sostenere il costo dell'impero. Sembra che "il Calvo Nerone [*i.e.*, Domitian]" avesse lasciato le finanze statali in buone condizioni. Nei suoi difetti erano anche i suoi pregi : il suo governo fu acuto e attento, e Svetonio riferisce che i governatori delle province si comportarono particolarmente bene ...

Svetonio dice che il popolo, a differenza dei soldati, la cui paga era stata aumentata da Domiziano, ne accolse l'uccisione con indifferenza. I senatori erano contenti della sua caduta, ma il contributo di Domiziano ai successi dei Flavi fu particolare e paradossale: egli ridusse il Senato a un luogo di conversazioni prudenti e caute che soddisfacevano le ambizioni dei provinciali e forniva agli imperatori degli amministratori coscienziosi. Non avrebbe più creato loro problemi. Fu questo a rendere possibili i regni, relativamente tranquilli, di Traiano, Adriano e degli Antonini. Soprattutto, il giudizio finale di Svetonio sulla dinastia fu di riservata approvazione: essi presero in mano l'impero e gli diedero rinnovata forza. I difetti personali dei Flavi erano superati dai pregi politici che vennero trasmessi ai loro successori nel secolo seguente [my emphasis]"

Eric M. Moormann (2018, 173) writes that the *Campus Martius* :

"was an emblem of the emperor's [*i.e.*, Domitian's] goodness, as shown in the distribution of grain and oil ... [my emphasis]", thus referring to the *Porticus Minucia Frumentaria*, built by Domitian.

This passage was already quoted *supra*, in Section III. of this *Preamble*; at point 3.).

Daniëlle Slootjes (2021, 121 with n. 18; *ead.* 2023, 88 with n. 18) writes :

**"Domitian seems to have liked public spectacles** as he "constantly gave grand and costly entertainments, both in the amphitheatre and in the Circus ...". Notably, Domitian was personally engaged by being present even "amid heavy rains," by presiding at competitions or by showering the people with gifts. Similar to the case of Augustus, personal imperial engagement and an attentive attitude of Domitian towards the audience

and performers seems to have been presented and valued as an advantageous characteristic of a ruler ... As the last of Suetonius' Caesars, **Domitian was presented in this respect in similar fashion as his predecessors. He behaved as an emperor was supposed to act in his attempt to secure his subject's respect and loyalty. Even more, his personal attention and interest at public shows gives the reader the impression that he was particularly good at showing his people his commitment to them** [my emphasis]". - The *verbatim* quotes are from Suet., *Dom.* 4.

This passage was already quoted in more detail *supra*, in Section II. of this *Preamble*.

Cf. **Frederick G. Naerebout (2021, 151)**. After mentioning one of Suetonius's (*Dom.* 8.5) accounts about Domitian, Naerebout comes to very interesting conclusions concerning Suetonius and Domitian:

"Is there any reason to trust these words of Suetonius who has contributed more than any other author to the black legend about Domitian? Yes, there is: **Suetonius is here speaking about the years before the emperor supposedly turned tyrant, and wants us to see the good, and godly, emperor. The tyrant of legend is contrasted with the pious *cultor deorum* - with an eye for detail and a severe disposition: for all we know, that is the real Domitian** [my emphasis]".

This passage was already quoted *supra*, in Section I. of this *Preamble*.

**Claudio Parisi Precissce, Massimiliano Munzi and Maria Paola Del Moro (2023, 10)** write :

"Il Campidoglio infatti non solo era l'*arx* della città ... ma costituiva uno dei luoghi più cari all'ultimo dei Flavi [*i.e.*, Domitian], che qui avrebbe avuto per la prima volta prova del favore che gli era accordato dagli dei, trovando scampo dal sanguinoso attacco dei seguaci di Vitellio grazie al travestimento da sacerdote del tempio di Iside. La profonda dedizione per gli dei ... ne determinarono il comportamento di attenta cura delle cerimonie e degli edifici sacri, **la cui espressione più alta fu la lussuosa ricostruzione del tempio capitolino arso nell'incendio dell'80 d.C.** [my emphasis]".

This passage was already quoted in more detail *supra*, in Section I. of this *Preamble*.

**Nathalie de Haan, Eric M. Moormann, Aurora Raimondi Cominesi and Claire Stocks (2023, 17)**, write :

"Roma trasse vantaggio della sua [*i.e.*, Domitian's] politica edilizia; le arti e la letteratura fiorirono, l'economia si mantenne prospera, come testimoniato dalle ricchezze di città e campagne [my emphasis]".

This passage was already quoted *supra*, in Section III. of this *Preamble*; at point 3.).

**Roberta Alteri (2023, 34 with n. 21)** writes :

"Questa ricchezza e particolarità delle varianti [of the applied architectural marbles] presenti nella residenza domiziana [*i.e.*, Domitian's Palace on the Palatine] **assurgeranno a modello e diventeranno prototipo delle botteghe dei periodi successivi, che ripeteranno lo stile di Domiziano, specialmente quello palaziale, ancora nel II e nel III secolo d.C.** [with n. 21; my emphasis]".

In her note 21, Alteri writes: "**Pensabene, Caprioli 2009; Caprioli 2021** [my emphasis]".

This passage was already quoted *supra*, in Section III. of this *Preamble*; at point 3.).

**Eric M. Moormann (2023, 62)** writes :

"Tutte queste attività edilizie mostrano come Domiziano abbia meticolosamente ancorato i suoi progetti ai programmi costruttivi di Augusto e Nerone ... per sottolineare, invece, l'importanza degli edifici di pubblica utilità, come già fatto da Vespasiano e Tito nei decenni immediatamente precedenti. E così creò davvero la sua "Domizianopoli" [my emphasis]".

This passage was already quoted *supra*, in Section III. of this *Preamble*; at point 3.).

**Gian Luca Gregori and Valerio Astolfi (2023, 160)** write :

"Sembra pertanto difficile seguire Svetonio, secondo cui il popolo avrebbe accettato con indifferenza la morte del principe [*i.e.*, Domitian] e le manifestazioni di gioia, soprattutto nelle province, non possono considerarsi rappresentative dei sentimenti generali, **in special modo della plebe di Roma e dei soldati, che sappiamo essere stati fino all'ultimo fedeli a Domiziano** [my emphasis]".

This passage was already quoted in more detail *supra*, in Section III. of this *Preamble*; at point 5.).

**And Rose Mary Sheldon, in her Section: "Domitian as Emperor" (2023, in press; Chapter 7) writes:**

**"... Rather than making concessions to the Senate he [*i.e.*, Domitian] chose to oppose them and thus distinguished himself and his imperial authority from those of the weakened Senate. The results were impressive.** He was a meticulous administrator, a reformer of the economy and the coinage, and designed a building program that ensured the Roman Empire had a capital worthy of envy. He became a micromanager who involved himself in the minutiae of running the empire. [with n. 254] And, if one can get beyond the diatribes leveled against him, one has to admit **he was responsible for far-reaching changes in domestic administration and foreign policy most of which were happily adopted by his successors.** [with n. 255] ...

As suspicion grew, Domitian attempted to pacify the more radical element in the Senate with offices and titles. This ploy would not work since they were not interested in honors, they wanted power. There was nothing he could do to appease them short of stepping aside, and he was not about to abdicate. **This was not a fight between the maniacal actions of an evil emperor and an innocent Senate. Domitian was fighting for his survival, and they were fighting against a system that condemned them to irrelevancy.**[with n. 267; my emphasis]".

In her **note 254**, Sheldon writes: "Although, see Saller (2000), 4-18, who believes there is no documentary evidence to support the interpretation that Domitian was an attentive, if severe, administrator. On his accomplishments and his reputation see Sablayrolles (1994), 113-44".

In her **note 255**, she writes: "Bennett (2001), 28".

In her **note 267**, she writes: "Rhodes (2014), 83".

This passage was already quoted in more detail *supra*, in Section III. of this *Preamble*; at point 3.).

These judgements about Domitian, voiced by other scholars, have led me to compare their observations with my own hypotheses concerning the reliefs, commissioned by Domitian, which are discussed in this *Study*, and on which he is himself represented:

The above-quoted scholars describe Domitian as an emperor, who took legal and religious prescriptions *very* seriously. The Cancellaria Reliefs (cf. here **Figs. 1; 2; Figs. 1 and 2 drawing**), on the other hand, originally decorated an arch (?), commissioned by Domitian.

Interestingly, the unique design of those two panels, seen under *that* perspective, may be regarded as illustrating this peculiarity of Domitian's character in perfect fashion (for this hypothesis; cf. *infra*, in Chapters V.1.d); and V.1.i.3.). Provided that were true, this assumption may also be applied to the likewise unusual composition of the Nollekens Relief, ordered by Domitian for the 'Aula Regia' of his Palace on the Palatine, the 'Domus Flavia' / *Domus Augustana* (cf. here **Figs. 36; 8.1; 58; 73** and *infra* in Chapter V.1.i.3.b)).

## I. A survey of the scholarly discussion of the Cancellaria Reliefs

### I.1. The discussion of the Cancellaria Reliefs, or the story of a dilemma: 'wrong shoes' or wrong interpretations?

"Es bleibt die Aufgabe, die Begehungen des domitianischen Roms zu intensivieren".

Dietrich Willers (2021, 94).

Dietrich Willers's statement is discussed *supra*, in Chapter *Preamble: Domitian's negative image; Section III.*; at point 5.); and *infra*, in Chapter *The major results of this book on Domitian.*

"In Domitian[']s propaganda a number of factors seem to support the choice of the archetypal image of the labyrinth and of Theseus as an exemplary hero: the resurgence of analogous Augustan symbols, Alexandrian models, allusions to the Athens acropolis and its patron goddess. It is therefore possible to propose the existence of a parallel between Domitian and Theseus - both favourites of Athena, the goddess of Metis, both presented as civilizing heroes, both seeking the reappropriation and legitimization of power that had initially been denied them".

Licia Luschi (2013, 197, English abstract).

Licia Luschi's observations are quoted in more detail and discussed *supra*, in Chapter *Preamble : Domitian's negative image; Section III.*; at point 4.); and *infra*, in volume 3-2, at *Appendix IV.d.4.b) Domitian's building projects comprising the Campus Martius, the Capitoline Hill and the sella between Arx and Quirinal. With detailed discussion of the Templum Pacis, and some remarks on Domitian's Villa, called Albanum.*

As already mentioned, on 26th August 2018, my good friend Rose Mary Sheldon has asked me to consult her on artworks and buildings dating to the Flavian period that she will discuss in her book related to the Flavians, mentioning in this context the Cancellaria Reliefs to me (cf. here **Figs. 1; 2; Figs 1 and 2 drawing**).

Rose Mary's book has the title: *Guarding the Caesars. Roman Internal Security under the Flavian Dynasty* (2023, in press)<sup>1</sup>.

The 'Cancellaria Reliefs' consist of two marble friezes (cf. here **Figs. 1; 2; Figs. 1 and 2 drawing**) that are kept at the Musei Vaticani, Museo Gregoriano Profano (Inv. 13389-13391 [Frieze A]; 13392-13395 [Frieze B]); Frieze A: 5,08 x 2,06 m [this is the original height of both friezes]; Frieze B: 6,06 m [this is the original length of both friezes] x 2,06 m; cf. E. SIMON 1963. According to M. PENTIRICCI 2009, 61, the original length of the friezes was precisely 6,058 m; for a different (but, in my opinion, erroneous) reconstruction of their lengths

<sup>1</sup> See also R.M. SHELDON 2018.

by S. LANGER and M. PFANNER, cf. *infra*, in Chapter V.1.d); cf. Chapter V.2. The labs (A1- [A 1 is missing] A4 and B1-B4; cf. here **Figs. 1 and 2 drawing**), belonging to the two panels of the Cancellaria Reliefs (here **Figs. 1; 2**), were found in 1937-1939 (cf. *infra*, at n. 113):

Both friezes were sculpted from four slabs of uneven lengths, in the case of Frieze A the slab on the far left is missing (*i.e.*, slab A1; cf. here **Figs. 1 and 2 drawing**). F. MAGI 1945, Tav. I, in his monumental *editio princeps* of the Cancellaria Reliefs, published photographs of both of them together, which show them in their entirety and at the same scale, thus demonstrating how much of both friezes is actually missing. M. PENTIRICCI 2009, 57, Figs. 26; 27, has illustrated both friezes in the same way (cf. also here **Figs. 1; 2**). Originally, the average thickness of the slabs was 20 cm; cf. F. MAGI 1945, 13. The thickness of slab A 4 was originally 21,8 -22,5 cm; cf. M. PFANNER 1981, 514-515, Abb. 1 (a reconstruction drawing of slab A4 *in situ*).

After the reliefs had been carved, the remaining average thickness of the slabs was only 10 cm; cf. F. MAGI 1945, 13; and according to H. MEYER 2000, 125, only circa 8 cm. Originally these panels were also painted; cf. P. LIVERANI 2014, 26 with Fig. 26 (quoted *verbatim, infra*, at n. 448, in Chapter III.).

Interestingly, both friezes were designed in a way that a thin 'frame' surrounded the drawings of the processions those panels were supposed to show, which, in the process of carving the reliefs, was 'preserved' in such a way that now - at those parts of both friezes, where this 'frame' is still extant - a plastically rendered borderline, cut into profiles, enhances the represented scenes, which represents the former thickness of those slabs; cf. F. MAGI 1945, 13: this "cornice" is on average 4 cm wide.

Jocelyn M.C. Toynbee described this feature as follows: "both [friezes] are framed by identical projecting ledges"<sup>2</sup>. It would be interesting to understand the function and/ or meaning of this 'frame', and I suspect that it can help us to reconstruct the building, for which those friezes were commissioned. Paolo Liverani was kind enough to write me that such a "cornice" is by no means rare in Roman reliefs.

As I was only able to realize much later (cf. *infra*, in Chapter II.), M. PFANNER's (1981, 514-515, Abb. 1) reconstruction drawing that I have just mentioned, which shows a section of the building with slab A 4 *in situ*, has also demonstrated the function of this 'frame'.

Pfanner has found out that Frieze A had protruded by 6-6,5 cm from the wall, into which it was inserted. He refers to what we are calling here the 'frames' as profiles that surrounded the reliefs on all sides. Pfanner's reconstruction drawing shows the position of a dowel hole on the lower edge of slab A 4 (for the numbered slabs of both panels; cf. here **Figs. 1 and 2 drawing**).

The choice of the position of this dowel hole demonstrates, that the marble, from which this profile was carved, had in the first place been preserved in order to allow the dowel holes to be cut into the lower and upper edges of the slabs. By means of the pertinent dowels, as well as with clamps, the friezes had been fixed to the monument.

In my *Vorlesung* on the imperial period, held at the Archäologisches Institut of the Universität Tübingen in the Sommersemester of 2009<sup>3</sup>, I followed the interpretations of Tonio Hölscher (2009a) concerning both Cancellaria Reliefs, but without making the effort to look anew at the friezes myself. In the following, I cannot possibly myself summarize the *status quaestionis* of the scholarly discussion concerning the Cancellaria Reliefs in all its ramifications, but will instead summarize Hölscher's account (2009a) and Giandomenico Spinola's findings (cf. *infra*, in Chapter III).

See also below, at *The Contribution by Giandomenico Spinola on the Cancellaria Reliefs*), and will also refer to the hypotheses published by the following scholars:

---

<sup>2</sup> J.M.C. TOYNBEE 1957, 3.

<sup>3</sup> C. HÄUBER 2009b, 168-171.

Antonio Maria Colini (1938; published 1939)<sup>4</sup>, Siegfried Fuchs (1938; *corr.*: 1937)<sup>5</sup>, Bartolomeo Nogara (1939), Filippo Magi (1939)<sup>6</sup>, Heinrich Fuhrmann (1940), Fuhrmann (1941)<sup>7</sup>, Nogara (1941)<sup>8</sup>, Magi (1945)<sup>9</sup>, Per Gustaf

<sup>4</sup> A.M. COLINI (ed.) 1938 [1939], pp. 269-270 ("Notiziario: Sepolcro di Aulo Irzio", with TAV. AGG. F), written by Colini himself. The article "Notiziario", edited by Colini, appeared in the 4th fascicle of *BullCom* 66, 1938, which, as the title page of this fascicle shows, was printed in 1939. COLINI (1938 [1939] 270) refers to the meeting of the Pontificia Accademia di Archeologia 'December last year [on 1st December 1938]', at which Bartolomeo Nogara and Filippo Magi had reported on the find of the Cancellaria Reliefs, what Colini now summarizes in his "Notiziario" (quoting *verbatim* a text on those finds that Magi had kindly provided him with, together with a photo, Colini's TAV. AGG. F): "Queste interessanti scoperte sono state illustrate dal Prof. Nogara e dal Dott. Magi nella seduta dello scorso dicembre nella Pontificia Accademia di Archeologia, e verranno dagli stessi quanto prima pubblicate. Della straordinaria scoperta di rilievi [*i.e.*, of the Cancellaria Reliefs] ed elementi architettonici referibili ad un arco trionfale fatta successivamente [*i.e.*, after the find of the reliefs of the so-called Ara dei Vicomagistri; cf. Colini's TAV. AGG. E] nello stesso luogo diremo nel prossimo Notiziario". For the publications of the Cancellaria Reliefs by Nogara and Magi, announced by COLINI (1938 [1939] 270); cf. B. NOGARA (1939, 8, 106, 115-116, 227; cf. below, at n. 6); and F. MAGI 1939; 1945 (cf. below, at ns. 6; 9). R. HORN (1938, Sp. 686, quoted *verbatim infra*, n. 145) informs us about the date of this meeting of the Pontificia Accademia di Archeologia: 1st December 1938, to which COLINI (1938 [1939] 270) refers.

<sup>5</sup> The publication in question is (but only allegedly): 'S. FUCHS 1938'. Unfortunately the reference mentioned here, quoted for this publication by S. FUCHS after H. MEYER 2011, 175 n. 5, has turned out to be wrong. The (alleged) relevant finding of S. FUCHS concerning the Cancellaria Reliefs was mentioned by FUHRMANN 1940, Sp. 472: "Wohl als erster hat S. Fuchs in dem Kopf des älteren Togatus [on Frieze B] statt eines alten Tiberius das Portrait des Kaisers Vespasian erkannt". The author in question was called "Siegfried Fuchs" by A. RUMPF 1955-56, 112 n. 2 (quoted *verbatim infra*, n. 113), who referred to FUHRMANN *op.cit.*; also M. BERGMANN 1981, 28 n. 48, mentioned "Fuchs"; as well as M. PENTIRICCI 2009, 57, n. 409 ("... in quanto non risolvevano l'indiscutibile contraddizione originata dal fatto che il ritratto rilavorato di Nerva veniva ad assumere caratteri stilistici del tutto analoghi a quelli **del ritratto di Vespasiano del fregio B ritenuto invece originario e riconosciuto come tale per primo da S. Fuchs**" [my emphasis]). None of these four scholars provided a reference for S. FUCHS's (alleged) relevant publication (for discussions; cf. *infra*, at the Section: *The Siegfried-Fuchs-Saga*, and ns. 113; 191). S. LANGER and M. Pfanner 2018, 21-27, do not mention a publication by 'S. Fuchs'.

But note that already F. MAGI 1939, 205, had recognized that the head of the emperor on Frieze B here Fig. 2 (called by him "pannello A" in this article, cf. his Fig. 14) is a portrait of Vespasian; MAGI'S publication of 1939 (cf. *infra*, n. 6) has not been mentioned by FUHRMANN 1940, RUMPF 1955-56, BERGMANN 1981 and PENTIRICCI 2009. But FUHRMANN 1941, Sp. 544 n. 3 (quoted *verbatim infra*, in Chapter IV.1.), has quoted F. MAGI 1939.

H. MEYER 2011, 175 with n. 5, asserted knowing the missing publication by Siegfried Fuchs: it is, according to MEYER (*op.cit.*), S. FUCHS 1938, 270ff. - But this reference is wrong. H. MEYER'S relevant discussion is quoted *verbatim infra*, at the Section: *The Siegfried-Fuchs-Saga*, and in n. 113. Michaela Fuchs was kind enough to check for me on 30th/31st January, 2020, whether she could find the article by Siegfried Fuchs among Hugo Meyer's notes. She found out that this article by S. FUCHS had already appeared in *Pantheon* vol. XX 1937, but this article does not contain any remarks on the Cancellaria Reliefs. - Not surprisingly, since at that time the slabs B3 and B4 of Frieze B of the Cancellaria Reliefs (here Fig. 2), on which the portrait of Vespasian appears (here Figs. 1 and 2 drawing; figure 14), was not as yet excavated; those slabs should only occur in 1938 (cf. *infra*, n. 113).

<sup>6</sup> B. NOGARA (1939, 227) writes that F. Magi had reported on the Cancellaria Reliefs in the "Adunanza [of the Pontificia Accademia di Archeologia] del 26 gennaio 1939". Cf p. 8: **in this meeting, Nogara reported that these "sculture [*i.e.*, the Cancellaria Reliefs] che il dott. Magi reputa possono avere appartenute ad un arco neroniano** [my emphasis]; cf. pp. 105-106, report on the "Adunanza del 22 giugno 1939". See p. 105: **in this meeting, Nogara had reported, that "in uno di questi frammenti è sicuramente rappresentato l'imperatore Vespasiano ... Riceve l'imperatore un giovane", who has been identified with the young Domitian** [my emphasis]. Cf. p. 106, where Nogara reports that all the interpretations of the Cancellaria Reliefs, presented by him, are those of Filippo Magi, who also suggests that they "avevano ornato l'attico" of one of Domitian's many arches in Rome. See also *supra*, n. 4.

Cf. F. MAGI 1939, 205-206 (quoted *verbatim infra*, n. 112), who repeats in detail, what Nogara 1939, 8, 105-106 had reported about his hypotheses. I thank Franz Xaver Schütz for the reference. This publication was only mentioned by the author himself; cf. F. MAGI 1945, 51 n. 1; by H. FUHRMANN 1941, 544-545, n. 3, by J. MÜHLENBROCK 2003, 150 n. 1319; by G. ALFÖLDY 1996, 4462, at *CIL* VI, 40543, and now by S. LANGER and M. PFANNER 2018, 21. See also F. MAGI 1945, that will be discussed in this book in Chapters I.-VI.

<sup>7</sup> H. FUHRMANN 1940, Sp. 460-476: "Cancellaria"; on p. 462, he referred to an earlier report on those finds in *AA* 1938, Sp. 686-692, Abb. 29-31. = R. HORN 1938, but that is only dedicated to the so-called Ara dei Vicomagistri (cf. *infra*, n. 145), since the Cancellaria Reliefs discussed here had not as yet been excavated within the time period, on which FUHRMANN 1940 reported; cf. Sp. 467-472 (for FUHRMANN'S discussion of the Cancellaria Reliefs). Cf. H. FUHRMANN 1941, Sp. 542-545, which I have found in the bibliography of S. LANGER and M. PFANNER 2018, 22.

<sup>8</sup> B. NOGARA 1941, 15-17, quoted here after M. PENTIRICCI 2009, 57 with n. 409.

<sup>9</sup> F. MAGI 1945. The Cancellaria Reliefs "were found leaning against the walls of the republican Tomb of Aulus Hirtius"; cf. D.E.E. KLEINER 1992, 191 (cf. also *infra*, n. 113). For the graffiti, written on this enclosure, cf. A. DEGRASSI 1942-1943. See also L. RICHARDSON Jr. 1992, 356 s.v. Sep. A. Hirtii: "the bustum of the consul of 43 B.C., victim of the Battle of Modena, in the Campus Martius. It was found in 1938 under the northwest corner of Palazzo della Cancellaria, a simple enclosure of brick-faced concrete with a plain travertine coping and with travertine cippi, some of them inscribed with his name, at the corners (*ILLRP* 419). This is the more impressive because he was awarded a state funeral by vote of the senate (Livy, *Epit.* 119; Vell. Pat. 2.62.4)"; F. COARELLI: "Sepulcrum: A. HIRTIUS", in: *LTUR* IV (1999) 290, Figs. I, 120, 126; II, 87-88; cf. *infra*, n. 42. For further maps, cf. *infra*, n. 66.

Cf. H. MEYER 2011, 177: Hirtius was the author of book 8 of Julius Caesar's *Bellum Gallicum*.

For the importance of the tomb of Aulus Hirtius for the dating of the *Euripus*; cf. V. GASPARINI 2018, 90 with ns. 71, 72, Fig. 11, discussed *infra*, at n. 294, in Chapter I.3.2.

R. SABLAYROLLES 1994, 131 writes: "Les reliefs de la Chancellerie pourraient avoir constitué les panneaux d'un autre de ces édifices triomphaux, peut-être l' *arcus Tiburi* ou *arcus Diburi* du Moyen Age, entrée monumentale et triomphale de la *Porticus Divorum* élevée par Domitien sur le Champ de Mars en l'honneur de Titus et Vespasien [with n. 44]".

In his **note 44**, R. SABLAYROLLES writes: "Sur l'*arcus Diburi*, voir Platner Ashby, *Topographical Dictionary of Ancient Rome* [1926], p. 38-39. L'attribution des reliefs de la Chancellerie à un monument du Champ de Mars - qui pourrait être par conséquent l'arc triomphal de l'entrée de la *Porticus Divorum* - est une hypothèse suggérée par J. Toynbee dans un compte-rendu de l'ouvrage de F. Magi, *I rilievi Flavi della Cancellaria*, Rome, 1945 (J. Toynbee, Review of F. Magi, *I rilievi Flavi del Palazzo della Cancellaria*, dans *The Journal of Roman Studies*, 36, 1946 [*i.e.*, here J.M.C. TOYNBEE 1946a], p. 187-191 et en particulier p. 189)". See below, at **n. 74**: also D. ATNALLY CONLIN 2021, 157, suggests this hypothesis, but without providing a reference.

Filippi (2015b) discusses the hypothesis of PENTIRICCI (2009, 15-75, 138-144, Fig. 33, p. 207 Fig. 4), to identify the ancient structure, found at the Church of San Lorenzo in Damaso underneath the Palazzo della Cancellaria ("edificio A1") with remains of the *stabulum Factionis Prasinæ*, one of the "Stabula III Factionum: the stables of the four companies that owned and trained the horses for the races in the circus" (cf. L. RICHARDSEN JR. 1992, 366), as well as contradictory opinions; cf. F. FILIPPI 2015b, 396 with n. 11, p. 426 with ns. 97-99 (quoting in her n. 99 different opinions), pp. 427, 430 with n. 123 (quoting the opinion of another scholar, who identifies those ancient structures as the remains of a *domus*), p. 432, Fig. 65 "Carta della Area del Campo Marzio. Topografia degli *Stabula* Circensi, sulla base dei dati archeologici": the ancient structures, found underneath Palazzo della Cancellaria, are marked and are labelled "(A)", the ancient structures, found underneath the Museo Barracco are marked and labelled: "9"; cf. pp. 434-435 with n. 149 (*prasina* means: "Verde"); cf. p. 436 with n. 163 (on the structure "n. 9" on her map Fig. 65: "È incerta e discussa l'identificazione di strutture pertinenti a *stabula* circensi, nel sito dell'attuale Museo Barracco, oggi ridotte a una pavimentazione di lastre di marmo [with n. 163] (n. 9)"; cf. her n. 163: "CIMINO - LE PERA 1998, pp. 153-158. Si tratterebbe di una fase precedente la privatizzazione dell'area con l'insediamento di una *domus* di IV sec." (For those ancient structures underneath the Museo Barracco, likewise interpreted by her as remains of the *stabula*, see also S. LE PERA 2004, 193-194 with n. 28); further for the *stabula Factionis Prasinæ*, cf. pp. 437-438.

For a map of the entire *Campus Martius* which contains those ancient structures, cf. F. FILIPPI 2015a, map Tavola II in the end pocket of this volume: "Planimetria dei nuovi dati con ipotesi ricostruttive (scala 1:4000) di A. Blanco, D. Nepi, A. Vella". This map shows the *Euripus*, the tomb of Hirtius, as well as all the other the ancient structures, found underneath the Palazzo della Cancellaria and underneath the Museo Barracco immediately to the east of the Palazzo della Cancellaria (both Palazzi are not labelled on this map). Here were excavated the ancient structures, archaeological and architectural finds, to which the publications, here listed in ns. 4-74, refer; cf. C.L. FROMMEL and M. PENTIRICCI 2009a, volumes I and II.

For maps of the area, cf. also C. HÄUBER 2017, 212, 483, cf. p. 69, map Fig. 3.7 [= here Fig. 59], labels: Corso Vittorio Emanuele II, Palazzo della Cancellaria; SEPULCRUM: AULUS HIRTIUS; Palazzo Le Roy/ Farnesina ai Baullari/ Museo Barracco. S. BALBI DE CARO 2018b, 84 (Fig.): "Rilievo B [*corr.*: A] della Cancellaria, particolare con la Dea Rom, 81-96 d.C., Musei Vaticani, Città del Vaticano". I thank Giuseppina Pisani Sartorio for the reference.

K. FITTSCHEN 2018 [2019] 405-406 writes in his review of F. FLESS *et al.* 2018: "Die Reliefs sind erst nach Versetzen der Platten am (weiterhin unbekanntem) Bau ausgeführt worden. **In beiden Friesen fehlt mindestens eine Platte**, weswegen es nicht möglich ist, ihr Thema eindeutig und endgültig zu benennen. Zwar neigen die Autoren zur Deutung des Frieses **A als Profectio** (S. 76) und des Frieses **B als Adventus** (S. 78), **heben aber den betont zivilen Charakter dieses letzteren Reliefs hervor ... Die beiden Kaiserköpfe sind beide aus einer Umarbeitung hervorgegangen. Bei dem [page 406] Kopf des Nerva auf Fries A war das nie strittig; für den Kopf Vespasians auf Fries B ist dieser Befund nun eindeutig dokumentiert (Kap. 2.9.4). Wenn die Frieße A und B zusammengehören, was ja nicht feststeht, was die Autoren aber trotz beträchtlicher Unterschiede für wahrscheinlich halten, war das Vorgängerporträt Vespasians ebenfalls eines des Domitian. Für eine von manchen Forschern behauptete zweifache Umarbeitung der Kaiserköpfe haben sich dagegen keine Indizien finden lassen. Der Kopf des Togatus Nr. 12 auf Fries B ist kein Porträt, vielmehr ein Genrekopf wie die der meisten anderen Figuren (Taf. 50, 4-5), also auch kein jugendlicher Domitian [my emphasis]**".

Cf. E.M. MOORMANN 2019, 269. E.M. MOORMANN 2020a, 277, writes in his review of Friederike Fless, Stephanie Langer, Paolo Liverani and Michael Pfanner 2018: "**Relief B** lacks military connotations and includes the Vestals as well as some *genii* circling around the emperor in an act of *adventus*. **The fact that the young man in front of the emperor, Vespasian, cannot be satisfactorily explained, although Domitian is the most likely candidate if we may follow Magi (and Chrystina Häuber with whom I discussed the relief in late 2019), makes a sound interpretation impossible.** The - plausible, cautiously formulated - conclusion is that we have pendants, showing the emperor's military and civil virtues expressed in a departure and arrival scene (p. 80) [my emphasis]".

J. POLLINI 2020, 243-244 with n. 2, Abb. 1a.-b.

I. ROMEO 2020 convincingly suggests that the statue-type 'Athena in corsa' copies the Athena from the Eastern pediment of the Parthenon at Athens, which shows the 'birth of Athena'. In addition to this, we owe Romeo (2020, 850 with n. 53) the important observation that the figure of Minerva on Frieze A of the Cancellaria Reliefs (cf. here **Figs. 1; Figs. 1 and 2 drawing; figure 5**) is modelled on this statue-type 'Athena in corsa' (!). As I only realized at a second moment, all of ROMEO's just-mentioned findings had already been observed by W. FUCHS: "Statue der Athena", in: *HELBIG* 4 II (1966) 199-201, no. 1395 (!). Those facts are, of course, also mentioned by I. ROMEO 2020 herself. Cf. *supra*, in Chapter *Preamble*; at Section *III*.; and *infra*, n. 239, in Chapter *I.2*. W. FUCHS's (1966) and I. ROMEO's (2020) findings are discussed and quoted *verbatim infra*, in volume 3-2, at *Appendix I.g.1.*)

C. PARISI PRESCICCE 2021a, 56.

P. LIVERANI 2021, 86-87, Figs. 2; 3 [= here **Figs. 1; 2**], who writes on p. 87, after mentioning the almost undisputed fact that the face of the emperor on Frieze A (here **Fig. 1**) has been reworked from a portrait of Domitian into that of Nerva, writes about the togate youth of Frieze B (here **Fig. 2**) in front of Vespasian (in my opinion Domitian), about the (alleged) missing slab of Frieze B, and about Vespasian himself: "**In front of him [i.e., Vespasian] is a young togate figure, whose identity has been hotly debated. Many have proposed to interpret him as the young Domitian, but his traits are generic and he must rather be identified as a magistrate or a similar institutional personage. The left group consists of the Vestal Virgins ... Some more figures were portrayed on the missing slab in the middle of the group of the priestesses. The portrait of the Emperor [i.e., of Vespasian] is stylistically very different from the other heads and also a little smaller: there is the strong suspicion it, too, was reworked, even if in a more accurate and mimetic way than on frieze A. In this case, too the original Emperor must be recognized as Domitian ...** [my emphasis]".

F.G. NAEREBOUT 2021, 148, n. 34.

N. DE HAAN and E.M. MOORMANN (2021, 54-55) write about the (alleged) missing slab of Frieze B, about the togate youth on Frieze B (in my opinion Domitian, and about the portrait of Vespasian): "**Reliëf B meet 209,4 x 611,6 cm en mist ook een plaat en delen van de bovenzijde ... Op reliëf B is de derde figuur van rechts onmistkenbaar Vespasianus. Ook zijn gezicht is het resultaat van een bewerking van een portret van Domitianus. Aan de rechterzijde zet Victoria ... De twee jongemannen links von hem [i.e., Vespasian] zijn allebei als Domitianus geïnterpreteerd, maar hebben [page 55] geen specifieke gezichtskenmerken** [my emphasis]".

D. ATNALLY CONLIN 2021, 157: "The Cancellaria reliefs depicting Vespasian's *adventus* and Domitian's *profectio* may have originally adorned an arch attached to or with[in] the Divorum complex". The author does not say that this is the hypothesis of J.M.C.

The (at the time) most recent contributions, dedicated to the Cancellaria Reliefs, and to the architectural fragments, found together with them, by Stephanie Langer and Michael Pfanner (2018), Markus Wolf (2018), and Klaus Stefan Freyberger (2018) appeared only when this part of this *Study*, which is dedicated to the Cancellaria Reliefs, was almost finished. To avoid the creation of entirely new footnotes, I have not integrated their ideas into the here following text, but have contented myself in adding references to their work by using already existing notes (with one exception: my **note 480** in Chapter VI.3., which was at that stage my very last one). I have written additional Chapters comprising summaries of their work (cf. *infra*, at Chapters V.1.-V.3.).

Taken together, the detailed accounts of all these scholars, mentioned above, summarize what seems to be the complete discussion of the Cancellaria Reliefs - but they discuss also the self-presentation and the building policy of the emperor, who commissioned these panels, Domitian, as well as the *Iseum Campense* and its sculpture decoration, where Domitian had erected his obelisk (cf. here **Fig. 28**; cf. *infra*, at Chapter IV.1.1.), the hieroglyphic texts of which are discussed here together with Frieze B of the Cancellaria Reliefs. See also below, at *The first Contribution by Emanuele Ciampini : La regalità domiziana: una nota egittologica*.

Most authors, who have studied the Cancellaria Reliefs so far, are interested in the scenes that are presented, and try to understand the represented historical actions of the relevant emperors being represented - or else their virtues - as well as the possible function of the monument or building, to which those panels belonged. Other studies concentrate on the stratigraphy of the excavations, where those friezes occurred in 1937-1939, together with ancient structures and many other architectural fragments as well as archaeological finds. Some discuss the findspot of those panels in relation to the topography of the area of the Palazzo della Cancellaria and its immediate surroundings in order to find out their possible date, and that of the structure, which they had adorned. Still other scholars mentioned here have studied the ancient structures that extended from the area of the Palazzo della Cancellaria to the east comprising also the area of the Museo Barracco.

Some of the scholars mentioned here base their conclusions on analyses not only of the excavated structures found within the area of the Palazzo della Cancellaria, combined with thorough analyses of the many excavations undertaken there, but also of all other relevant archaeological and architectural finds from this area in the *Campus Martius*, seen in their individual stratigraphic and topographical contexts.

Already Colini (1938 [1939]), following the relevant suggestions by Filippo Magi and Bartolomeo Nogara<sup>75</sup>, had suggested that the Cancellaria Reliefs "ed elementi architettonici riferibili" had all belonged to a triumphal arch, built by Domitian. Like many other scholars who have come after, I myself likewise follow them in assuming that the Cancellaria Reliefs were commissioned by Domitian. According to Giandomenico

<sup>75</sup> cf. *supra*, ns. 4; 6.

Spinola, the Cancellaria Reliefs are datable in the late Domitianic period, see his E-mail, written to me on October 15th, 2018 (cf. below, at *The Contribution by Giandomenico Spinola on the Cancellaria Reliefs*).

As we know from Magi's publications (1939 and 1945), and those of Pentiricci, Cima, and Carignani and Spinola (all 2009), as well as other scholars, Colini (1938 [1939]) was thus *inter alia* referring to curved soffit blocks, column capitals, and a block of an architrave, carrying part of a dedicatory inscription<sup>76</sup>; those architectural fragments were all found in the same area as the Cancellaria Reliefs. Some of the architectural fragments, found together with the Cancellaria Relief, are according to Freyberger (cf. *infra*, in Chapter V.3.) likewise datable in the late Domitianic period.

Following the hypothesis of Bendinelli (1949)<sup>77</sup>, Pentiricci (2009)<sup>78</sup> has further developed the idea of Magi and Nogara (1939; cf. *supra*, n. 6), and Colini (1938 [1939]; cf. *supra*, n. 4), by suggesting that the Cancellaria Reliefs are to be identified as the horizontal panels in the bay of an arch.

Finally, Wolf (2015)<sup>79</sup> published his reconstruction of an "arco monumentale", defined by him as "arco onorifico isolato", which he dates in the Domitianic period; his reconstruction integrates the Cancellaria Reliefs as the horizontal panels into its central bay; the width of which he was able to reconstruct on the basis of the above-mentioned curved soffit blocks: it was circa 5,10 m wide. But Wolf (2015) has also drawn the reconstruction of "un'entrata con volta a botte in un edificio domiziano con colonne addossate" ('an arched entrance to a Domitianic building with engaged columns'), to which the same architectural fragments (but *not* the Cancellaria Reliefs) have belonged. He is thus, understandably, of the opinion that *a*) the curved soffit blocks and the other architectural fragments, on which his reconstructions are based, certainly belonged to an arch, but that we do not know for sure *b*) that the Cancellaria Reliefs had necessarily originally belonged to the same monument or building. In the case of his "arco onorifico isolato", Wolf, like

<sup>76</sup> for this architrave, carrying an inscription, cf. F. MAGI 1939, 206; F. MAGI 1945, 42-43, 44, 51 with n. 1, FIGS. 37, *q* and *r*; 38, *q* and *r*; 40, *q* and *r*; cf. H. FUHRMANN 1940, Sp. 473.

Cf. G. ALFÖLDY 1996, 4462-4463, at *CIL* VI, 40543; p. 4462: "Tit.[ulus] operis publici ab imperatore dedicati ..."; p. 4463: "Fuisse videtur aedis fortasse numini cuidam ab imperatore dedicatae. Ex formis litterarum oblungarum accuratissime insculptarum circ[iter] Hadriani vel potius Antonini Pii aetati attribuendum opinor. Puncta aedem fere forma extant in titulo aedis Divae Faustinae Divoque Antonino Pio dicatae, cf. supra titulum n. 1005 [providing a reference]. Dedicatus fortasse inter a. 139 (cf. supra titulum n. 40541) et a. 161".

Cf. A. CARIGNANI and G. SPINOLA 2009, 528-529, cat. no. 40: "Blocco di trabeazione decorato e iscritto (figg. 46-47), Musei Vaticani, inv. 16173" (they quote for this block: H.G. WIGGERS 1983, 154-157, Taf. 20,5-21).

Cf. pp. 542-543 ("Considerazioni conclusive"): "... Ad un altro complesso architettonico della fine del I secolo d.C. - o forse a più edifici all'incirca coevi - sono referibili una serie di quattro capitelli corinziegganti (cat. nn. 23, 24, 25, 26 [add to those: M. CIMA 2009, 78, cat. no. 5, "Capitello corinzio di colonna (fig. 11), Antiquarium Comunale del Celio, inv. 29113"] - provenienti dagli scavi effettuati nel 1937 nel Cortile del Palazzo (cfr. nel I volume: PENTIRICCI, Cap. 3, p. 85) - ed una trabeazione con parte di un'iscrizione (cat. n. 40); all'incirca dello stesso periodo, oltre ai frammenti di soffitto a cassettoni (cat. n. 41); sono altre cornici decorate (cfr. cat. nn. 42, 43, 44, 45 e, forse, 46) ... Dall'area del sepolcro di Irzio - in possibile relazione con le botteghe di marmorari della fine del I - prima metà del II secolo d.C. - provengono alcune opere che mostrano tracce di ri-lavorazione o appaiono non finite o mancanti della rifinitura finale; tra queste ovviamente si dovranno inanzitutto ricordare le lastre che compongono i rilievi flavii [i.e., the Cancellaria Reliefs] e la c.d. [cosiddetta] Ara dei Vicomagistri. Oltre ai rilievi sopra menzionati anche la testa femminile (cat. n. 2 [for that unfinished head, cf. *infra*, n. 287, in Chapter I.3.2.]) attualmente non più reperibile, potrebbe giungere dalle botteghe di uno scultore, presentandosi priva di alcune parti e dell'allessitura finale [my emphasis]".

Cf. M. CIMA 2009, 76-78, cat. 4: "Capitello corinzio di lesena", Figs. 4; 10), Antiquarium Comunale del Celio, inv. 2663; p. 78, cat. no. 6: "Soffitto a lacunari (fig. 12), Antiquarium Comunale del Celio, inv. 29114"; p. 80, cat. 7: "Soffitto a lacunari (fig. 13), Antiquarium Comunale del Celio, inv. 29110". She refers also to the fragments in the Vatican Museums, Carignani and Spinola, cat. no. 41, and concludes: this fragment of a curved soffit block "permette di ipotizzare la sua pertinenza ad un arco ... La possibilità di attribuire ad un arco la destinazione originaria dei grandi rilievi della Cancellaria e per di più la coincidenza nelle datazioni ha fatto avanzare già nella prima notizia edita dei ritrovamenti (così Colini in *BCom* [i.e., *BullCom*], 66 [1938], p. 270) la proposta di attribuire materiali architettonici e fregi figurati ad un medesimo monumento ..."; cf. PENTIRICCI 2009, 61-62 with ns. 422-432; M. WOLF 2015, *passim*, cf. *infra*, ns. 79-81. Cf. now M. WOLF 2018 and K.S. FREYBERGER 2018 (cf. *infra*, at Chapters V.2.; and V.3.)

<sup>77</sup> G. BENDINELLI 1949 (cf. *supra*, n. 16).

<sup>78</sup> M. PENTIRICCI 2009, 61 with n. 426.

<sup>79</sup> M. WOLF 2015, 317, 319, cf. p. 320, Fig. 8 ("Ricostruzione arco monumentale, [scale:] 1: 350"); cf. p. 318: "Ambedue i pezzi di soffitto hanno la stessa curvatura di una volta a botte con un raggio di circa 2,55 m e appartengono dunque a un passaggio arcuato di circa m 5,10 m. Questo corrisponde circa alla luce dell'arco di Tito dove l'apertura raggiunge 5,44 m [mit Anm. 4, mit Literatur]". For the "blocco di trabeazione A 1", cf. pp. 318-319, Figs. 6; 7; cf. next note.

Magi, Nogara, Colini, Pentiricci, and Cima before him, bases his reconstruction on the Cancellaria Reliefs, the curved soffit blocks, a "capitello di lesena"<sup>80</sup>, and on the block of an architrave, which carries the far right end of a dedicatory inscription: *PP FECIT* (CIL VI, 40543)<sup>81</sup>.

We know that Domitian received the title *pater patriae* already in AD 81, after October 30th<sup>82</sup>. Provided the dedicatory inscription just mentioned had belonged to an arch, built under Domitian, and considering the content of this inscription, only the emperor himself could have commissioned this arch. Markus Wolf (2015; cf. *supra*, n. 81 - but cf. *infra*, in Chapter VI.3) has also arrived at this conclusion. According to Dio Cassius (68,1,1), after Domitian's death and *damnatio memoriae*, his arches, which were 'of very great number', were torn down<sup>83</sup>. If the Cancellaria Reliefs, these curved soffit blocks and this dedicatory inscription had actually belonged to the same arch, the aforementioned scholars, in their combined efforts, have thus collaborated in the reconstruction of one of those lost arches, erected by Domitian.

Provided this arch (or whatever other monument or building) had indeed carried the Cancellaria Reliefs, its dedicatory inscription unfortunately does not help us to date those panels with more precision than what was already known before the recent research of Pentiricci, Cima, Carignani and Spinola (2009), and Wolf (2015). The scene represented on Frieze A (cf. here Fig. 1) had shown in its first carving phase a *profectio* (others believe: an *adventus*) of Domitian that had either occurred in 83 or in 92(-93) AD, as earlier scholars have suggested; I myself believe that we witness on Frieze A Domitian's *profectio* of AD 89 (cf. *infra*, n. 232, in Chapter I.2.; in Chapter *The major results of this book on Domitian*; and *infra*, in volume 3-2, at Appendix IV.d.2.f).

Magi<sup>84</sup> himself had dated the Cancellaria Reliefs between 83 and 85 AD. Since the portrait-type of Domitian, used for Frieze A (the face of his portrait was later recut into that of Nerva), has been identified as his last portrait-type, we know for sure that Domitian had only commissioned the building that comprised the Cancellaria Reliefs when he was himself emperor (from 14th September AD 81)<sup>85</sup>. This prevents us from considering the possibility, as Bendinelli had done, that Frieze A might show the *profectio* to a much earlier one of Domitian's military campaigns, known from literary sources, which he had conducted when still being

<sup>80</sup> M. WOLF 2015, 317, Figs. 1; 2; 8; 9. M. PENTIRICCI 2009, 61, with ns. 428 and 430, has discussed this "capitello di lesena" as well: "lo studioso [H. KÄHLER 1950], nel tentativo di ricostruire le dimensioni dello spazio che doveva ospitare i rilievi prendeva in esame anche uno dei pezzi architettonici rinvenuti nello scavo, in particolare il grande capitello di lesena, scoperto nel 1937 presso la lastra A 4 [of the Cancellaria Reliefs] citato da Magi", with n. 428: "Magi 1945, pp. 42-43; COLINI *Appunti* [1998] II, p. 159; PENTIRICCI, CAP. 3. p. 95 sulle modalità del ritrovamento e, nel II volume, CIMA, n. 4 per l'analisi del frammento"; in his note 430, he quotes, in addition to this: "MAGI 1945, p. 51"; cf. *infra*, n. 256, in Chapter I.3.1.

<sup>81</sup> The find of this inscription was already reported by F. MAGI 1839, 206, quoted *verbatim infra*, n. 112.

M. WOLF 2015, 318: "[...] *p(ater) p(atriciae) fecit*", with n. 7 (quoting CIL VI 40543 = G. ALFÖLDY 1996; *supra*, ns. 48, 76); cf. pp. 319-320, where he convincingly writes: "problematica è l'iscrizione *p(ater) p(atriciae) fecit*, che fa pensare piuttosto a una fondazione dell'edificio da parte dell'imperatore stesso che ad un arco in onore dell'imperatore"; cf. pp. 320-321, for his second reconstruction, which he calls on p. 320: "un'entrata con volta a botte in un edificio domiziano con colonne addossate Fig. 10)", and in the caption of Fig. 10: "Ricostruzione ingresso monumentale". Cf. now M. WOLF 2018. This text is written in German and his publication of 2015 is an Italian translation of almost exactly the same text (cf. *infra*, at Chapter V.2.).

<sup>82</sup> D. KIENAST, W. ECK and M. HEIL 2017, 109: "Domitian (14. Sept.[ember] 81-18. Sept.[ember] 96) *Geb.[oren]*: 24. Okt.[ober] 51 in Rom. Sohn des T. Flavius Vespasianus (s.[iehe] oben) und der Flavia Domitilla (s.[iehe] oben). Name: T. FLAVIUS DOMITIANUS.

Wichtige Einzeldaten: ... 73 (?) frater Arvalis. 81 Imperatorische Akklamation durch die Prätorianer (13. Sept.[ember]). Übertragung des Augustus-Namens durch den Senat (14. Sept.[ember] = dies imperii): IMP. CAESAR DOMITIANUS AUGUSTUS ... PONT. MAX. und PATER PATRIAE (nach 30. Okt.[ober]). Herbst 83 Triumph über die Chatten; Siegername GERMANICUS ... 85 ... Aufenthalt in Mösien (Winter 85/86?). 86 Triumph über die Daker ... 89 ... Aufenthalt in Pannonien, Triumph über Daker und Germanen in Rom (Nov.[ember]/Dez.[ember]). 92 Erneuter Aufenthalt in Pannonien. Jan.[uar] 93 Ovatio de Sarmatis (vgl. Martial 8, 8, 5) ... 18. Sept.[ember] 96 *Tod*: Ermordet (Suet., Domit. 17,3). Heimliche Beisetzung im templum gentis Flaviae. *Damnatio memoriae*". Cf. *infra*, n. 232, in Chapter I.2.; and in Chapter V.1.i.3.b); Section III.

For a discussion of Domitian's last years as emperor and his assassination; cf. T.P. Wiseman 1996: "Domitian and the Dynamics of Terror in Classical Rome"; and R.M. SHELDON (2023, in press)

For Domitian; cf. also *infra*, at n. 189 and n. 304, in Chapter II.1.b).

<sup>83</sup> cf. C. HÄUBER 2014a, 786 with n. 37 (quoting Dio Cassius 68,1,1).

F. MAGI 1945, 141ff; F. MAGI 1955-56, 309 n. 1. Cf. *infra*, in Chapter V.1.i.3.b); at Section III.

<sup>85</sup> so also M. BERGMANN 1981, 19. For this portrait type, cf. *infra*, n. 302, in Chapter II.1.b); for Domitian's *dies imperii*, cf. *supra*, n. 82.

Caesar<sup>86</sup> (for that campaign, cf. *supra*, in Chapter *Preamble*; Section *III.*, at point 2.); and at **ns. 229, 230**, in Chapter *I.2.*).

Wolf (2015), in discussing his reconstruction of the "arco onorifico isolato", which comprises the Cancellaria Reliefs and the dedicatory inscription *p(ater) p(atriciae) fecit*, attributes this inscription to Domitian. Because of the content of this inscription, considering at the same time the, in the following discussed, new findings concerning the topography of the area, the findspots of the Cancellaria Reliefs and of this dedicatory inscription, the historical situations at which those friezes underwent their first and their second carving phase, and the fact that at the time of Domitian's death this building was not entirely finished (for all that, cf. below and *infra*, in Chapter *II.*), in theory not only Domitian, but also Nerva<sup>87</sup> could have commissioned the inscription *PP FECIT* (*CIL VI*, 40543), because both Domitian and Nerva held the title *pater patriae*.

*To put it mildly, the scholarly discussion of the Cancellaria Reliefs is very lively*

This I have already tried to indicate by mentioning above that Magi, who excavated those friezes, wrote not only the first monograph on this subject, but also refuted in five later articles (1945-1977) some of the theories that, in the meantime, had been published by other scholars. Before his monograph, he had already announced his finds in a short note, which has so far not attracted the interest it deserves (1939; quoted therefore *verbatim* in **n. 112**). Magi maintained in his five publications, published between 1945 and 1977, all the hypotheses, first aired in his monograph, but took also the chance to explain them in more detail in those articles. Simon, on the other hand, who appears with three contributions in the above-listed bibliography (1960-1985), had changed most of her earlier ideas by the time of her last publication.

When today trying to judge the results of these efforts, regarded as a whole and in retrospect, the first impression one gets, is that of their extraordinary diversity. The reasons for this are clear: there is a lack of agreement on almost all counts, as the following summary will show, and there is a variety of reasons, why that is the case. I will mention those reasons *after* the summary.

As an introduction to all this, it is perhaps useful to anticipate what all modern commentators (before Langer and Pfanner 2018) so far known to me, who have published interpretations concerning these famous panels, agreed upon:

1.) the Cancellaria Reliefs currently consist of two marble friezes of originally equal size that originally belonged together (so first MAGI 1939 and NOGARA 1939; cf. *supra*, **n. 6**; and COLINI 1938 [1939], 270; cf. *supra*, **n. 4**). The latter assumption is *inter alia* proven by the above-mentioned profiles, which frame the friezes on all four sides, and by the fact that (originally), both panels showed 17 figures<sup>88</sup>; 2.) Scholars also

<sup>86</sup> cf. G. BENDINELLI 1949; quoted after J.M.C. TOYNBEE 1957, 21-22, who had refuted Bendinelli's relevant hypothesis.

<sup>87</sup> cf. D. KIENAST, W. ECK and M. HEIL 2017, 114: "Nerva (18. Sept. 96-27. [?] Jan. 98) ... 18. od. 19. Sept. 96 Erhebung zum Kaiser (dies imperii): IMP. NERVA CAESAR AUGUSTUS, PONT. MAX., PATER PATRIAE ... Ende Okt. 97 Adoption Trajans ... Germanicus Nov. 97". Cf. *infra*, **n. 322**, in Chapter *II.1.d*).

<sup>88</sup> so first R. BIANCHI-BANDINELLI 1946-48, 259; then suggested by H. LAST 1948, 9; followed by J.M.C. TOYNBEE 1957, 3; she added the remark that both panels "are of Luna (Carrara) marble". Cf. J. POLLINI 2012, 309, n. 1 (on p. 358): "... The marble has not been tested, but it is likely to be lunar (Carrara)".

Cf. S. LANGER and M. PFANNER 2018, 27: "2.4 Material: Die Beurteilung erfolgte nur optisch: mittel- bis grobkristalliner weißer Marmor, teilweise mit grauen Schlieren durchsetzt, wohl aus Luni (s. Abb. 6a und 6b). Bei Relief B wirkt der Stein etwas heller, bei A leicht bräunlich".

Also G.M. KOEPEL 1984, 28, Fig. 11, pp. 29-30, cat. no. 7. "Profectio des Domitian" [= Frieze A], gives the represented figures the nos. 1-17; so likewise in the case of the other panel: pp. 31-32, cat. no. 8. "Adventus des Vespasian" [= Frieze B]. Cf. S. LANGER and M. PFANNER 2018, 19, Abb. 2 (here the figures on Frieze A and B are numbered).

Cf. ad point 1.): S. LANGER and M. PFANNER 2018 reconstruct both friezes of the Cancellaria Reliefs differently than Magi (cf. *infra*, at Chapter *V.1.d*); cf. ad 5.) S. LANGER and M. PFANNER 2018 are, in addition to this the only scholars, who question that the site, where the panels were found, may be identified as the deposit of a sculptor's workshop; cf. S. LANGER and M. PFANNER 2018, 20; quoted *verbatim infra*, at Chapter *V.1.a*).

agree that these panels have been reworked at the order of Nerva (so MAGI 1945, 130-131)<sup>89</sup>; 3.) that Frieze A shows (in its reworked phase) a portrait of Nerva (so MAGI 1945, 60-69); 4.) that the emperor on Frieze B is Vespasian (so first MAGI 1939, 205); and 5.) that the reliefs, after having been dismantled from their monument, had been brought in antiquity to the deposit of what we call here the 'Second sculptor's workshop', where they were excavated (so MAGI 1945, 138-140). All 5 points will be discussed in detail in the following (for this 'Second sculptor's workshop'; cf. *infra*, in Chapters I.3.1.; and V.1.a.1.))

Note that of the 5 points of agreement, nos. 2.)-5.), that is to say, altogether four, were first suggested by Magi (!). - As we shall see below at n. 113, this is actually true.

Now, as I only found out much later, only three of those points of agreement were certainly first published by Magi, since Siegfried Fuchs (1938, 270ff.) was - but as we shall see below: only allegedly - first to write that the emperor on Frieze B is Vespasian (cf. *infra*, at n. 113).

There is no more *consensus*, since it is already debated, 6.) how many friezes may have belonged to the original monument<sup>90</sup> (cf. below and *infra*, in Chapters II.; and III.). The next points of disagreement concern the questions 7.), which Roman emperor had originally commissioned the friezes, although most scholars assume Domitian<sup>91</sup>; and 8.), why the reworking process of the reliefs, started by Nerva, was not finished, although Nerva's short reign seems to be the most probable reason<sup>92</sup>. Point 8.) has kindly been pointed out to me by Eugenio la Rocca. The latter fact had already been mentioned by Hugo Meyer and by Massimo Pentiricci<sup>93</sup>.

On both panels a procession outside Rome is represented which moves from right to left (but, as we shall see below at n. 271, in Chapter I.3.2., this assumption is not quite true) and which depicts, as many modern commentators agree, an area either in Rome or in the immediate vicinity of the City<sup>94</sup>. Likewise in both friezes we see as the most important figure a Roman emperor<sup>95</sup>. In Frieze A scholars agree that the portrait of this emperor has been reworked<sup>96</sup>, all recent scholars currently agree that the visible 'second' portrait is that

<sup>89</sup> so M. PENTIRICCI 2009, 57-58 with n. 410; cf. p. 57 with n. 409.

As I have realized only after this Chapter was written so far, PENTIRICCI 2009, 57-60 with ns. 409-421, has summarized the complete relevant early scholarship related to the Cancellaria Reliefs, that I have summarized in my text that relates to ns. 88-107 in Chapter I.1., as well as in Chapter I.1.1., but note that Pentiricci judges some of these scholarly opinions differently as is suggested here.

Cf. H. MEYER 2000, 128 with n. 409. B. FEHR 1998, 717 with n. 4, pp. 720, 724, 727-731, follows M. BERGMANN 1982 [*i.e.*, 1981, 22, 24, 25], who has suggested that Nerva had ordered the recutting of the allegedly original portrait of Domitian on Frieze B into a portrait of Vespasian. Fehr himself (cf. *op.cit.*, *passim*) offers a summary of the meanings that have been suggested for the alleged two carving phases of Frieze B.

<sup>90</sup> that more than the two extant friezes may have belonged to the Cancellaria Reliefs, have for example suggested J.M.C. TOYNBEE 1957, 3; and M. BERGMANN 1981, 31. This question is also discussed by S. LANGER and M. PFANNER 2018, 84; cf. S. LANGER and M. PFANNER 2018, 20; quoted *verbatim infra*, at Chapter V.1.a).

Cf. Langer and Pfanner (2018, 60), quoted *verbatim infra*, at Chapter III., add another judgement concerning the Cancellaria Reliefs, which is in their opinion *communis opinio*.

<sup>91</sup> H. MEYER 2000, 128.

<sup>92</sup> so J.M.C. TOYNBEE 1957, 20; and E. SIMON 1963, 9; cf. H. MEYER 2000, 139, and *infra*, at Chapter V.1.c).

<sup>93</sup> cf. H. MEYER 2000, 139. Already A.M. MCCANN 1972, 260, observed that we need to find out, why in Frieze A the portrait of Domitian had been recut into a portrait of Nerva, whereas on Frieze B the portrait of the young Domitian is still extant. To this I will come back below.

For the re-carving of Domitian's portrait on Frieze A (cf. here Fig. 1) into one of Nerva, and the fact that this 'second carving phase' of Relief A was *not* completed; cf. already M. PENTIRICCI 2009, 57-58, n. 409.

<sup>94</sup> for some locations at Rome, where, according to different scholars, the processions, visible on these friezes, are staged, cf. M. PENTIRICCI 2009, 60 with n. 420. Cf. *infra*, at ns. 181, 182, for the suggestions that the scene, represented on Frieze B, is staged on the *Forum Romanum*, the Capitoline and the *Campus Martius*.

<sup>95</sup> both emperors are at least the tallest figures on both friezes, cf. MCCANN 1972, 251. To this we may add, that no other figure overlaps those two: but this is also true for the togate youth on Frieze B. This way of representing these *three* figures on both friezes thus stresses their importance. As we shall see in the following, this is also apparent because of some other characteristics of the compositions of both friezes.

<sup>96</sup> so first F. MAGI 1945, 60-69; cf. A.M. MCCANN 1972, 251 n. 7.

of Nerva<sup>97</sup>, and most scholars agree that the original portrait represented Domitian<sup>98</sup>, but Hölscher (2009a) writes that it has also been suggested that the relief originally showed a portrait of Nero, a hypothesis which he himself rejects<sup>99</sup> (to this I will come back below, in Chapter II.4.). Before Magi had recognized the portrait of the head of the emperor on Frieze A as that of Nerva, recut from a portrait of Domitian, this head had been identified as Domitian<sup>100</sup>.

Hölscher<sup>101</sup> does not discuss the fact that the head of the emperor on Frieze A, now recut as Nerva, had been previously identified by McCann<sup>102</sup> as a portrait of Hadrian. She observed: "a distinct swelling on either side of the upper lip [of Nerva] terminating in a point ... which has not been completely erased by the recutting (Pl. 115,1)", and interpreted these shapes as remains of a moustache. This observation, combined with the result of her analysis of the style of the Cancelleria Reliefs, led her to believe that these friezes were originally commissioned by Hadrian (to this I will come back below in Chapter II.4.). McCann's dating of the Cancelleria Reliefs into the Hadrianic period has been refuted by Magi, a judgement followed also by other scholars<sup>103</sup>. Already some scholars before McCann had dated the Cancelleria Reliefs to the Hadrianic period<sup>104</sup>.

McCann, in her turn, had reported on still another lesser known hypothesis, related to the emperor on Frieze A: that already in the original phase of Frieze A the emperor represented was a portrait of Nerva. McCann commented on this hypothesis: "If the recut head can, in truth, be identified with Nerva, as most scholars believe, it would not be likely that the original portrait represented the same man"<sup>105</sup>. In this case, McCann had simply misunderstood the relevant discussion. Schefold, to whom she referred with her critique, had, contrary to what McCann understood (erroneously) suggested that the extant portrait of Nerva on Frieze A should be regarded as the original state of this relief (*i.e.*, as a result of the first carving phase), instead of acknowledging Magi's correct observation that Nerva's portrait on Frieze A is the result of the recutting of the *face*<sup>106</sup> of the original head of Domitian<sup>107</sup>.

I have intentionally mentioned McCann's misunderstanding here, because it is the complex phenomenon of possible 'errors', which we need to consider when studying the scholarly discussion related to the Cancelleria Reliefs - and, especially, when adding oneself another interpretation, as I endeavour to do here.

<sup>97</sup> so first F. MAGI 1945, 60-69; cf. A.M. MCCANN 1972, 253, 256 n. 28; M. BERGMANN 1981, 20, Taf. 8; 10; M. BERGMANN and P. ZANKER 1981, 388-389; M. PENTIRICCI 2009, 57 with n. 409.

<sup>98</sup> so first F. MAGI 1945, 67-69; cf. A.M. MCCANN 1972, 253; H. MEYER 2000, 128; M. PENTIRICCI 2009, 57 with n. 409.

<sup>99</sup> T. HÖLSCHER 2009a, 56 with n. 44. He quotes for this opinion H. MEYER 2000, 125-140. Cf. M. PENTIRICCI 2009, 60 with n. 420, who discusses the accounts by H. HERZOG 2001 and L.E. BAUMER 2007 and refutes them; see also pp. 59-60 with ns. 417, 419; cf. *infra*, ns. 130-132, 451, at Chapter III., for M. PENTIRICCI's discussion (2009) of the hypotheses of H. MEYER 2000, which he likewise refutes.

H. MEYER 2000 and H. HERZOG 2001 wrote their publications obviously independently of each other (so explicitly H. MEYER 2011, 175, quoted *verbatim infra*, n. 374, at Chapter II.4.). L.E. BAUMER 2007, 94-95, refuted the hypotheses of H. MEYER 2000 and H. HERZOG 2001; H. MEYER 2011, 175-177; in his turn, refuted the hypotheses of L.E. BAUMER 2007.

S. LANGER and M. PFANNER 2018, 60, erroneously assert that the hypotheses of H. MEYER and H. HERZOG have not been discussed so far.

<sup>100</sup> so B. NOGARA 1941, 15-17, quoted after M. PENTIRICCI 2009, 57 with n. 409 (cf. *supra*, n. 8).

<sup>101</sup> T. HÖLSCHER 2009a.

<sup>102</sup> A.M. MCCANN 1972, 255 pl. 115,1; for the alleged Hadrianic style of the Cancelleria Reliefs, cf. pp. 264, 265, 266, 269, 271.

<sup>103</sup> F. MAGI 1973; followed by M. BERGMANN 1981, 22 with n. 12. T. HÖLSCHER 2009a does not even mention MCCANN's hypothesis.

<sup>104</sup> cf. H. MEYER 2000, 128, n. 408, who refers back to his bibliography on p. 125, n. 396.

<sup>105</sup> A.M. MCCANN 1972, 256 with ns. 26, 27, referring back to her n. 15: "... Cf. Schefold, *Orient, Hellas und Rom* [1949], who believes the head was originally intended to be Nerva and never recut". Also H. MEYER 2000, 135 n. 424, had mentioned this identification. For a discussion of MCCANN's hypotheses, cf. also M. PENTIRICCI 2009, 57 n. 409.

<sup>106</sup> and only that, cf. M. BERGMANN 1981, 20 with Taf. 8; 10.

<sup>107</sup> cf. M. BERGMANN 1981, 21, with n. 9, who quotes for this earlier opinion not only K. SCHEFOLD, *Atlantis* 1949, H. 12, 546ff; K. SCHEFOLD 1949, 189; but also A. RUMPF 1955/56, 112f. F. MAGI 1955-56, 310-312, Taf. 37-41, himself had refuted the hypotheses of SCHEFOLD 1949 and RUMPF 1955/56, cf. *infra*, at n. 137.

Remembering the constant danger of errors is certainly, on principle, a good idea, whenever we wish to understand other scholars' ideas, but in the case of those panels, this kind of precaution seems to have special importance. Because, when we try to interpret the represented scenes on the Cancellaria Reliefs, let alone to reconstruct the various phases of their lifetime in antiquity, we come across contributions, written by scholars who do not only come from different disciplines, but who, even though they belong to the same discipline, pursue very different avenues of research, and therefore apply very different methodologies.

**Consequently, while reading the resulting scholarly production, we need to judge the observations of scholars with very different kinds of expertise than our own, knowledge that, regarded as a whole, none of us can presumably boast to actually possess all himself /herself<sup>108</sup>.**

As for the interpretation of Frieze A, scholars disagree, whether it represents a *profectio*<sup>109</sup> scene or rather an *adventus*<sup>110</sup> (cf. *infra*, in Chapter III.). Although it is, therefore, already not exactly easy to find out the meanings of all phases of Frieze A throughout its lifetime in antiquity, Frieze B is even more difficult to interpret, because of the following reasons.

In the case of Frieze B, not only the identification of one protagonist is controversial, as in Frieze A, but instead that of both protagonists. In addition, it is debated, in which one of the (alleged) two carving phases of Frieze B the heads of these figures were carved. They are the represented emperor and a togate youth, standing in the front of him. All current commentators agree that the emperor in Frieze B is Vespasian, but they disagree whether or not this is the result of a reworking process<sup>111</sup>: Magi was of the (in my opinion correct) opinion that Frieze B had already in the first carving phase shown the still extant portrait of Vespasian (cf. *infra*, n. 112).

Let me anticipate here an information that I should come across only after this Chapter I.1. had been completed. As we shall see below (cf. *infra*, at Chapter V.1.h.1.), Stephanie Langer and Michael Pfanner (2018, 60 with n. 52) have observed that Marianne Bergmann's (1981, 24; cf. *supra*, n. 111) very influential hypothesis, has been rejected. According to this hypothesis, which has been followed by many scholars (cf. *infra*, at Chapter I.1.1.), the emperor on Frieze B had originally been Domitian, whose head was allegedly reworked into the extant portrait of Vespasian. The scholars who, according to Langer and Pfanner (2018, 60, n. 52), have refuted either McCann's hypothesis (1972, 251, with n. 8; cf. *supra*, n. 111) that the head of Vespasian has been re-cut from the portrait of another emperor (in McCann's opinion: Trajan), or Bergmann's hypothesis (1981), that the head of Vespasian has been reworked from the portrait of Domitian, are: Gauer (1973, 350), Darwall-Smith (1996, 172), and Varner (2004, 119f. n. 62).

### *The Siegfried-Fuchs-Saga*

Some scholars have, erroneously, as we shall see, asserted that Siegfried Fuchs was first to identify the head of the emperor on Frieze B (here **Fig. 2**) as a portrait of Vespasian, but did not mention, on which kind of evidence their assertions was based.

<sup>108</sup> cf. *infra*, at Chapter VI.; and at Chapter VI.1.

<sup>109</sup> so J.C.M. TOYNBEE 1957, 9-12, 16; G. M. KOEPEL 1969, 138-144 Fig. 3, pp. 190-194; cf. M. PENTIRICCI 2009, 58 with n. 412.

<sup>110</sup> so first F. MAGI 1945, 98-195; so also F. MAGI 1954-55. Magi's interpretation of Frieze A as representing an *adventus* was refuted by J.M.C. TOYNBEE 1957, 11-12. For *adventus*, cf. G.M. KOEPEL 1969, *passim*.

<sup>111</sup> so first A.M. MCCANN 1972, 251 with n. 8 (who credits for this idea "Prof. [Diether] Thimme"), pls. 112,1-113,2. For a publication of 'D. Thimme's unpublished thoughts' on this subject, cf. the bibliography in H. MEYER 2000, 125, n. 396: they were published by J.M.C. TOYNBEE 1957, 22-24.

Also M. PENTIRICCI 2009, 57-58, with n. 409 (cf. *infra*, n. 115), who follows MC CANN (*op.cit.*) and M. BERGMANN's (1981; cf. *infra*, n. 190) (in my opinion wrong) assertions, believes that the portrait of Vespasian on Frieze B is the result of a reworking-process.

Also K. FITTSCHEN 2018 [2019] 406, quoted *verbatim supra*, in n. 74, believes that the portrait of Vespasian on Frieze B is the result of a reworking process.

These scholars do not discuss the fact that Magi<sup>112</sup>, already in his first publication on the Cancellaria Reliefs of 1939, had identified this head as a portrait of Vespasian. Because I have not been able to find a relevant publication by Siegfried Fuchs so far, I have suggested above, for the time being, that Magi was also first in recognizing this fact. Ranuccio Bianchi Bandinelli (1946-48) has also given Magi credit for this identification, not mentioning any other scholar, who might have suggested this *before* Magi (cf. *supra*, n. 112). - As we shall see below, this is actually true.

Fortunately, when I had almost given up on that point, almost at the very end of my relevant studies, I consulted the contribution on the Cancellaria Reliefs by Hugo Meyer (2011), who, as I only later observed, erroneously asserted to have been able to identify the missing publication by Siegfried Fuchs (1938), in which the author had (allegedly) been first to recognize that the emperor on Frieze B is Vespasian. I, therefore, allow myself in the following a digression on that subject.

*The wrong assertion that Siegfried Fuchs (1938) was allegedly first to realize that the emperor of Frieze B of the Cancellaria Reliefs was from the beginning Vespasian.*

Hugo Meyer (2011, 175) had commented on the relevant finding of Siegfried Fuchs as follows:

"Der Kaiser [Vespasian on Frieze B] hatte sich, sozusagen, schon von Anfang an proteushaft 'geriert', war er doch von den ersten nachantiken Betrachtern - vielleicht unter dem Eindruck der schon vorher gefundenen

---

<sup>112</sup> F. MAGI 1939, 205 (Chapter "Notiziario"), writes:  
"ZONA DELLA CANCELLERIA ...

Il pannello che chiameremo A [since his monograph of 1945, MAGI called this panel 'Frieze B' instead, cf. here **Fig. 2; Figs. 1 and 2 drawing**] (Fig. 14) rappresenta a sinistra Roma in trono che ha davanti le Vestali fra due *apparitores*, e sembra attendere, per riceverlo, l'imperatore Vespasiano, il quale avanza da destra fra i suoi littori, mentre la Vittoria che vola dietro di lui regge sopra il suo capo una corona di quercia. Tra i due gruppi ve n'è un terzo, pressoché al centro della composizione, in cui campeggia una figura giovanile che è con ogni probabilità il figlio minore dell'imperatore, il ventenne [in reality Domitian was 18 years old at that stage] Domiziano del quale sappiamo che prese parte all'*adventus* del padre nell'anno 70; nello sfondo e ai suoi lati sono i Geni del Senato e del Popolo Romano rivolti verso Vespasiano.

La indiscutibile preminenza che ha il giovane Domiziano, piuttosto che l'imperatore, in questo primo pannello, fa legittimamente supporre che il monumento al quale questo e il corrispondente pannello B [since his monograph of 1945, MAGI called this panel 'Frieze A' instead; cf. here **Fig. 1**] (Fig. 15) appartengono fosse in onore di Domiziano ... [therefore, MAGI argued in the following, although the portrait of the emperor, depicted on Frieze A, does not look like the usual portraits of Domitian, this "condottiere" should be Domitian] ... "nel momento nel quale parte o torna per una spedizione militare, il cui esito vittorioso è comunque assicurato dalla Vittoria che vola in testa al corteo e dalla presenza e cordiale compartecipazione degli dei della guerra Marte e Minerva, nonché del Valore impersonato da una figura amazzonica; oppure si presenta strettamente unito con la sua dea protettrice Minerva in una specie di parata trionfale ...". Contrary to identifying the amazon-like figure on Frieze A with "Valore", MAGI, in his monograph of 1945 identified this amazon-like figure with *Dea Roma* instead; cf. F. MAGI 1939, 206: "Che i due pannelli ornassero l'attico di un giano domiziano è ipotesi molto attendibile ... [my emphasis]".

The latter hypothesis had presumably been suggested by Bartolomeo Nogara (cf. *supra*, n. 8), who should publish this hypothesis in 1941, as we learn from M. PENTIRICCI 2009, 57 with n. 409, possibly in the talk on the finds at the Palazzo della Cancellaria, which Nogara and Magi had delivered at the Pontificia Accademia on 1st December 1938; for that cf. R. HORN 1938, Sp. 686, quoted *verbatim infra*, n. 145. But note that in a second moment I should find out that Nogara (1939, 8; 105-106, 227; cf. *supra*, n. 6) had given Magi credit for this idea (!).

Finally MAGI 1939, 206, mentioned also the block of an architrave, carrying the inscription *CIL VI 40543: P.P. FECIT*. For that, cf. *supra*, ns. 76; 81.

Cf. MAGI 1945, 57-60, 149, 167, Tav. XXIV, p. 149, where he repeated his identification of the head of the emperor on Frieze B with Vespasian.

Cf. R. BIANCHI BANDINELLI 1946-48, 259: "Il Magi [1945] ha proposto, come interpretazione del rilievo B ... l'*adventus* di Vespasiano nel 70 d. E. v. [dell'Era volgare], e l'incontro con il figlio Domiziano, che il 24 ottobre di quell'anno compieva i 19 anni ... resta acquisita con certezza l'identificazione in B, di un ritratto fortemente idealizzato di Vespasiano e di un ritratto giovanile di Domiziano".

That F. MAGI (1939; 1945) was right with his assumption that the emperor on Frieze B was from the beginning Vespasian, has been proven by R. PARIS 1994b, 81-82, because she realized the meaning of the *corona civica*, with which *Victoria* is shown as crowning Vespasian (cf. here **Figs. 1 and 2 drawing; figures 14** [Vespasian] and **16** [*Victoria*]) because, apart from Augustus, this highest decoration for a military victory was only appropriate in the case of Vespasian, because both emperors had been able to put an end to civil wars; cf. *infra*, in Chapters V.1.i.3.b; at *The major results of this book on Domitian*; and at *The visualization of the results of this book on Domitian on our maps*.

Vicomagistri - Platten [with n. 3] für eine Wiedergabe des betagten Tiberius gehalten worden. Diesem Irrtum aber hatte sogleich Siegfried Fuchs entgegengewirkt [with n. 4], der damals über Tiberius arbeitete [with n. 5], und für Vespasian votiert, **welche Deutung Magi übernommen hat** [with n. 6; my emphasis]".

In his **note 3**, Hugo Meyer (2011) wrote: "s.[iehe] R. Horn, AA 1938, 690, Abb. 30.31 ...". Cf. his **note 4**: "Vgl. [vergleiche] H. Fuhrmann, AA 1940, 472: >>Wohl als erster hat S. Fuchs in dem Kopf des älteren Togatus statt eines alten Tiberius das Porträt des Kaisers Vespasian erkannt<<". Cf. his **note 5**: "S. Fuchs, Pantheon 1938 IX, 270ff.". Cf. his **note 6**: "Bei Magi [i.e., here MAGI 1945] findet sich kein Hinweis darauf, was allerdings die verschiedensten Gründe haben kann"<sup>113</sup>.

Contrary to Hugo Meyer (2011, 175 with n. 6), I see no reason to assume that Magi had "übernommen" ('taken over') the relevant finding of Siegfried Fuchs, as Meyer expressed himself. Since Magi (1945, 111) had not quoted Siegfried Fuchs (1938), as Hugo Meyer rightly observed - a query that I have myself likewise pursued (cf. *infra*, n. 191) - Meyer thus reproached Magi in his above quoted text for plagierism, whereas in his pertaining **note 6**, he admitted the following: the fact that Magi did not mention Fuchs's relevant finding, 'may have had various reasons'. Already Rumpf (1955-56, 112, quoted *verbatim supra*, n. 113), by asserting that Siegfried Fuchs had been first to recognize Vespasian's portrait as such on Frieze B, had thus 'between the lines' expressed his thought that Magi (1945) should have given Siegfried Fuchs credit for this identification.

**But note that neither Hugo Meyer (2000; 2011), nor Rumpf (1955-56), who discussed only Magi (1945), had realized the fact that Magi had already identified the emperor on Frieze B with Vespasian in his publication of 1939** (quoted *verbatim supra*, n. 112).

Besides, Magi (1955-56, 310-312; cf. *infra*, at n. 137) had immediately responded to Rumpf's article in the next fascicle of the same periodical, because Rumpf (1955-56) had rejected many ideas of Magi (1945), but in this article Magi did not address the point discussed here. - For Magi's own discussion of the above-mentioned scholars; cf. also Massimo Pentiricci (2009, 56-57, with ns. 405-409).

As we have seen above, the accusations put forward by Andreas Rumpf (1955-56, 112; cf. *supra*, n. 113) and by Hugo Meyer (2011, 175 with n. 6) were unfounded. They expressed 'between the lines' that they had uncovered Magi being guilty of plagiarizing an idea first published by Siegfried Fuchs, that the emperor on Frieze B had always been Vespasian. At first, I wondered, whether one part of their error could be explained similarly by the following story. - But we shall see below that, in the case of Magi's alleged plagiarism, this assumption is also wrong.

<sup>113</sup> H. MEYER 2011, 175 with ns. 3-6. My thanks are due to Michaela Fuchs, for discussing this point with me on 12th April 2019 in München.

For S. FUCHS, cf. *supra*, n. 5. Cf. A. RUMPF 1955-56, 112: "Die gegenwärtig fast allgemein angenommene Datierung [of the Cancellaria Reliefs] nahm ihren Ausgang davon, daß Siegfried Fuchs in dem als Togatus dargestellten Kaiser der einen Plattenreihe (Taf. 17, unten [i.e., Frieze B, here Fig. 2; Figs. 1 and 2 drawing: figure 14]), der zunächst für Tiberius gehalten worden war, vielmehr Vespasian erkannte [with n. 2]", quoting in n. 2: "Arch. Anz. 1940, 472". - But that is the article of H. FUHRMANN 1940, Sp. 472 (cf. *supra*, n. 5, quoted *verbatim infra*, in Chapter IV.1.), who himself had only mentioned S. FUCHS's (alleged) relevant finding, without providing a reference. H. FUHRMANN 1940, Sp. 472, himself identified the emperor on Frieze B with Vespasian, the togate youth with Domitian, and the *Genius Senatus*, the *Genius Populi Romani*, as well as the *Dea Roma*, as such. Cf. also H. FUHRMANN 1941, Sp. 542-545, quoted *verbatim infra*, in Chapter IV.1.).

The slabs A1 (which is missing) -A4 and B1-B4 that belong to the two panels of the Cancellaria Reliefs (here **Figs. 1; 2**) were found 1937-1939; cf. for detailed find reports: E. SIMON 1963, 8-9; M. PENTIRICCI 2009, 56-57, with ns. 405-408, Figs. 26-28; and S. LANGER and M PFANNER 2018, 18, 20, who write:

"Die Fundumstände waren wie folgt: Im November 1937 fand man in einer Tiefe von 5,4 Metern unter dem Corso Vittorio Emanuele vor der Front des Palazzo [della] Cancellaria die Platte A4, und zwar mit der Schauseite nach oben [with n. 2, providing references]. Im Juli 1938 stieß man an der NW [Nordwest]-Ecke des Palazzo unmittelbar vor der Gartenfront in ungefähr 5,7 Metern Tiefe auf das Grabmal des Aulus Hirtius ... [page 20] ... An der Ostmauer dieses Grabbaues entdeckte man fünf weitere Platten der Cancellariareliefs ... Direkt an der Mauer stand die Platte A3, an welcher die Platten B3 [with the left hand half of the figure of Vespasian], B1 and A2 lehnten. Die stark fragmentierte Platte B4 [with th right hand half of the figure of Vespasian] war an der Mauer einzeln abgestellt. Die siebente Platte B2 entdeckte man erst im Juli 1939 ca. [circa] 1 Meter nordwestlich des Grabbaus ... (s.[iehe] Abb. 4 [see also their Abb. 3b - both reproduced from F. MAGI 1945, pp. 43, 38])". - For the numbering of the slabs of the Cancellaria Reliefs; cf. S. LANGER and M. PFANNER 2018, 19, Abb. 2 (compare here **Figs. 1 and 2 drawing**).

Hugo Meyer (2000) and Horst Herzog (2001) have both published the idea that it was not Domitian, but instead Nero, who commissioned the Cancellaria Reliefs in the first place. Because of this fact, Meyer had obviously asked himself the same kind of question, as the one just mentioned (concerning Magi's alleged plagiarism), since Hugo Meyer (2011, 175) that he had, in the meantime, taken the chance to discuss the matter with Herzog: only to find out, that both scholars, independently of each other, had had the same idea at about the same time (cf. *supra*, n. 99, and quoted *verbatim infra*, n. 374, in Chapter II.4.).

I had written this passage so far, when on 10th May 2019, I had the chance to check in the Library of the British School at Rome the reference, given by Hugo Meyer (2011, 175 with n. 5): "S. Fuchs, *Pantheon* 1938 IX, 270ff." - which turned out to be wrong. But I still hope to find the relevant article by Siegfried Fuchs in the end, somewhere ...

After this digression had been written, I asked Michaela Fuchs on 30th January 2020 for advice, hoping that she might be able to find among Hugo Meyer's notes the correct quotation of Siegfried Fuchs's article. She actually found this publication on the following day: at the *Bibliothek des Zentralinstituts für Kunstgeschichte in München*, and I confess that I would never have been able to find this missing information myself. - That is because of the following reasons.

As I checked myself on 14th February 2020, Siegfried Fuchs's article, found for me by Michaela Fuchs, has the title: "Ein Neues Bildnis des Kaisers Tiberius", and is published in the periodical *Pantheon* Band XX (1937) 270-273. In this article, Siegfried Fuchs does not mention the Cancellaria Reliefs at all - as Michaela Fuchs had already mentioned to me on 31st January 2020 in a telephone conversation. 'Not by chance', I explained to her, because in 1937 Frieze B of the Cancellaria Reliefs (cf. here **Fig. 2**), on which the portrait of Vespasian appears (cf. here **Figs. 1 and 2 drawing: figure 14**), was not as yet excavated. And because I knew the date of the relief's discovery (*i.e.*, 1938; cf. *supra* n. 113), I myself would *never* have dreamt of looking, whether or not Siegfried Fuchs's relevant article might already have appeared in the *Pantheon* of 1937 (!). So, what I learn from this example is: one should indeed on principle check *everything*. See the prudent advice by Lucos Cozza, which he has given me a long time ago; cf. Häuber (2014a, 1 with n. 4).

#### **Now that Michaela Fuchs has found Siegfried Fuchs's 1937 article, Magi is rehabilitated.**

Magi could definitely not have "übernommen" ('taken over'; so H. MEYER 2011, 175) Siegfried Fuchs's alleged observation, according to which the emperor on Frieze B represents Vespasian, because Siegfried Fuchs (1937) did not (and could not) have written anything like that. We may, therefore, conclude that this important finding was Magi's own idea (cf. *id.* 1939, 205; quoted *verbatim supra*, n. 112). Fuhrmann's relevant assertion (1940, Sp. 472; cf. *supra*, n. 5, quoted *verbatim infra*, in Chapter IV.1.), who gave "S. Fuchs" credit for the identification of the emperor on Frieze B with Vespasian, is therefore wrong.

And because Siegfried Fuchs (1937) could not possibly reject an alleged earlier identification, according to which the emperor on Frieze B represented 'an old Tiberius', as Fuhrmann (1940, Sp. 472) had likewise asserted, we need now to find out, whose hypothesis *that* could have been.

Fuhrmann's (1940) alleged information concerning "S. Fuchs" has been repeated uncritically by some later scholars (for those; cf. likewise *supra*, n. 5, and *infra*, n. 191). The entire story reminds me of a famous book by Carl Robert, to which my late supervisor Andreas Linfert had alerted me many years ago - the title of which has become proverbial:

*Archaeologische Maerchen aus alter und neuer Zeit* (1886) ('Archaeological fairy tales from old and new times').

To all this I will come back below, in Chapters IV.1.; and at *The major results of this book on Domitian*.

Let's now return to our main subject.

If instead the head of the emperor on Frieze B has indeed been recut, the original carving phase of Frieze B had supposedly represented Trajan<sup>114</sup>, or likewise Domitian<sup>115</sup> (as on Frieze A), or Nero<sup>116</sup>.

Especially interesting is the scholarly debate related to the togate youth on Frieze B (cf. here **Fig. 2; Figs. 1 and 2 drawing; figure 12**). Magi (1939; 1945)<sup>117</sup> had identified its still extant head as a portrait of Domitian, carved in the first phase of the relief (this is in my opinion correct, cf. below and *infra*, in Chapters III.; V.1.h.1.); V.1.i.3.); and VI.3; summarized in Chapter *The major results of this book on Domitian*).

This was followed *inter alia* by Fuhrmann (1940; 1941; cf. *supra*, ns. 5; 7; 113), Lugli (1946; cf. *supra*, n. 10); Bianchi Bandinelli (1946-48; cf. *supra*, n. 112), Bendinelli (1949; cf. *supra*, n. 16), Hammond (1953; cf. *supra*, n. 18), Toynebee (1957)<sup>118</sup>, Simon (1960; 1963)<sup>119</sup>, Hanfmann (1964; cf. *supra*, n. 23), Béranger (1964, cf. *supra*, n. 24), Daltrop (1966)<sup>120</sup>, Keller (1967)<sup>121</sup>, Koepfel (1969)<sup>122</sup>, Andreae (1973, cf. *supra*, n. 31), Bandinelli and Torelli (1976, ARTE ROMANA, scheda 105; cf. *supra*, n. 32), Lochin (1990, cf. *supra*, n. 46), Kleiner (1992; cf. *infra*, n. 129), Kuhoff (1993, cf. *supra*, n. 47), Ramage and Ramage (1996; cf. *supra*, n. 49), Pfeiffer (2009; cf. *supra*, n. 59), Pollini (2017b; cf. *supra*, n. 72), Chabrečková (2017; cf. *supra*, n. 73), and Sheldon (2023, in press; cf. *supra*, n. 74), Claudia Valeri and Giandomenico Spinola (cf. *supra*, in Chapter *Introductory remarks and acknowledgements; infra*, in Chapter III.; and in *The major results of this book on Domitian*; and below at *The Contribution of Giandomenico Spinola*), and myself.

Other scholars identified the youth's head as a portrait of Nerva<sup>123</sup>, or as a portrait of Hadrian<sup>124</sup>. Rumpf<sup>125</sup> denied that the head of this youth is a portrait of Domitian, was of the opinion that it isn't a portrait at all, but rather an 'ideal' head, and suggested to recognize in this figure another allegorical representation, the *Ordo Equester* (to this I will come back below). Bergmann<sup>126</sup> likewise denied that this head is a portrait of Domitian and suggested also that this head was not a portrait at all. According to Bergmann<sup>127</sup>, some

<sup>114</sup> so McCANN 1972, 275: "While a missing link in the reconstruction of the original iconography of Frieze B remains the identification of the emperor ... in the light of the historical and numismatic evidence discussed is it not probable that Frieze B commemorated to the world Hadrian's right to the imperial office through his adoption by Trajan? The original of the head of Vespasian would therefore have been Trajan who is shown with his hand upon his selected successor". MCCANN's hypothesis was refuted by M. BERGMANN 1981, 22 with ns. 12, 13.

<sup>115</sup> so first M. BERGMANN 1981, 23-24, Taf. 11; 12; 9, p. 25; followed by M. PFANNER 1981, 518 with n. 17; B. FEHR (cf. *supra*, n. 89); T. HÖLSCHER 2009a, 56; and M. PENTIRICCI 2009, 57-58 with n. 409.

S. LANGER and M. PFANNER 2018, 60 with n. 52, who likewise suggest that Vespasian's portrait is a result of a recutting process, state that the relevant assertions by McCANN 1972 and BERGMANN 1981, have been rejected by W. GAUER 1973, 350, R.H. DARWALL-SMITH 1996, 172, and E.R. VARNER 2004, 119f. n. 62. They themselves suggest the head of Vespasian proves to be reworked because of a different reason (for a discussion of their hypothesis, cf. *infra*, at Chapter V.1.h.2.). See the summary of this *infra*, in Chapter *The major results of this book on Domitian*.

<sup>116</sup> so H. MEYER 2000, 131-132, Figs. 243; 242; refuted by T. HÖLSCHER 2009a and by M. PENTIRICCI 2009 (cf. *supra*, n. 99).

<sup>117</sup> F. MAGI 1939, 205, Fig. 14; F. MAGI 1945, 70-72, Tav. XXIII. MAGI 1955-56, 309 with n. 1, in his refusal of A. RUMPF hypothesis 1955-56, in which the author, *contra* MAGI 1945, suggested to date the Cancellaria Reliefs in the Hadrianic period instead, had himself stated: "Lo stesso Rumpf (p. 112) è costretto a constatare che il riconoscimento di Domiziano nei due fregi (e quindi la loro datazione in età flavia [suggested by MAGI 1945]) è stato accettato da quasi tutti gli studiosi che si sono occupati della questione".

<sup>118</sup> J.M.C. TOYNEBEE 1957, 4, 5-8, 23.

<sup>119</sup> E. SIMON 1960, 134-135; E. SIMON 1963, 9. But see E. SIMON 1985, 549 with n. 27, quoted *verbatim infra*, at n. 181.

<sup>120</sup> G.M.A. HANFANN [1964], 108; cf. *supra*, n. 22 (quoted *verbatim infra*, at Chapter IV.1.); G. DALTRÖP 1966, 41 Taf. 31.

<sup>121</sup> E. KELLER 1967, 215 (quoted *verbatim infra*, n. 177).

<sup>122</sup> G. KOEPEL 1969, 172 with n. 157 (quoted *verbatim infra*, at n. 173), Fig. 16. But see G.M. KOEPEL 1984, 7, 31-33 (quoted *verbatim infra*, at n. 416, in Chapter III.).

<sup>123</sup> by K. SCHEFOLD 1949, 190; quoted after MCCANN 1972, 260 with ns. 46-47, who herself rejects this hypothesis.

<sup>124</sup> so A.M. MCCANN 1972, 260-261, 266, 271 (because she dates the Cancellaria Reliefs to the Hadrianic period, and because the youth is bearded).

<sup>125</sup> A. RUMPF 1955-56, 114-116.

<sup>126</sup> M. BERGMANN 1981, 20, 22, 24 with ns. 19-22, pp. 25-29.

<sup>127</sup> M. BERGMANN 1981, 29 with n. 52. Since she does not mention, who those 'manche' scholars are, who have allegedly suggested the identification of the here-so-called *Genius Senatus* with the *Ordo Equester*, I have at first asked myself, whether or not she may have had in mind A. RUMPF's hypothesis (cf. *supra*, n. 125, quoted *verbatim infra*, n. 172) - but RUMPF 1955-56, 114, had suggested

scholars have instead suggested that the here-so-called *Genius Senatus* of Frieze B should be identified with the *Ordo Equester*. Bergmann's<sup>128</sup> hypothesis, not to identify the togate youth on Frieze B with the young Domitian, was followed by many other scholars (but cf. *infra*, at Chapters I.1.1.; V.1.h).

**One thing is, of course, certain: if Marianne Bergmann's (1981) hypothesis should be true that the head of Vespasian on Frieze B has been recut from a head of Domitian, the togate youth standing in front of this presumed Domitian (now Vespasian) cannot possibly represent Domitian as well.**

Diana E.E. Kleiner<sup>129</sup>, who discusses Marianne Bergmann's (1981) hypotheses, nevertheless identifies the head of this youth on Frieze B as the young Domitian, so did Hugo Meyer, and so does Giandomenico Spinola (cf. *infra*, in Chapter III.; and below, at *The Contribution by Giandomenico Spinola on the Cancellaria Reliefs*), as well as Claudia Valeri, and myself.

Cf. *supra*, at Chapter *Introductory remarks and acknowledgements*; and *infra*, at Chapter *The major results of this book on Domitian*.

The other above-mentioned scholars, who identify the togate youth with Domitian (S. PFEIFFER 2009; cf. *supra*, n. 59, J. POLLINI 2017b; cf. *supra*, n. 72, B. CHABREČKOVÀ 2017; cf. *supra*, n. 73, and R.M. SHELDON 2023, in press; cf. *supra*, n. 74) do not explicitly discuss neither Magi's (1945), or Bergmann's (1981) hypotheses in their accounts.

Hugo Meyer<sup>130</sup> is so far the only scholar to have (in my opinion erroneously, cf. *infra*, at Chapter II.4.) suggested that also the head of the togate youth on Frieze B was recut in antiquity: in his opinion, this head was first a portrait of king Tiridates of Armenia<sup>131</sup>, that was later recut into the still extant portrait of the

to identify the togate youth on Frieze B with the *Ordo Equester*. Later I have realized that also the discussion of G.M. KOEPEL 1984, 7 (quoted *verbatim infra*, ns. 150, 172) of the here-so-called *Genius Senatus* implies that this figure has been identified with the *Ordo Equester*; but neither KOEPEL, *op.cit.*, provides a reference for this hypothesis.

<sup>128</sup> so for example H.-W. RITTER 1982, 30; G.M. KOEPEL 1984, 7, 33 (quoted *verbatim infra*, at n. 416, in Chapter III.; E. SIMON 1985, 549 with n. 27 (quoted *verbatim infra*, at n. 181); F. GHEDINI 1986, 298 (quoted *verbatim infra*, at n. 181); B. FEHR 1998, 725 with ns. 37, 38, cf. p. 720;

M. PENTIRICCI 2009, 57 with n. 409, follows the suggestion by M. BERGMANN 1981, 22-24, that the extant portrait of Vespasian on Frieze B was recut from an original portrait of Domitian; p. 58 with n. 414: he identifies the here-so-called *Genius Senatus* likewise as such; p. 58 with n. 414: he states that the togate youth on Frieze B is much discussed, but does not suggest himself, which function he may have, nor, what the scene on frieze may represent; pp. 58-59 with n. 415, p. 61: he identifies the here-so-called *Dea Roma* on Frieze B likewise as such; p. 60, n. 417: he adds as an argument against the identification of the togate youth on Frieze B as Domitian: "... non si comprende per quale motivo il ritratto dell'imperatore, dopo il sua assassinio, non sarebbe stato eliminato dal pannello come è avvenuto nel fregio A".

So already M. BERGMANN 1981, 20: "Es war schwer zu erklären, warum nicht auch das Porträt Domitians in Fries B gelöscht worden war", with n. 2. For a possible explanation, cf. *infra*, at Chapter II; summarized *infra*, in Chapter *The major results of this book on Domitian*.

The hypothesis of BERGMANN (1981), concerning the togate youth on Frieze B, was also followed by T. HÖLSCHER 2009a, 57, 58, quoted *verbatim infra*, at n. 182, and in n. 391, at Chapter III. The hypotheses of M. BERGMANN 1981, H.-W. RITTER 1982, G.M. KOEPEL 1984, E. SIMON 1985, F. GHEDINI 1986, B. FEHR 1998, M. PENTIRICCI 2009, 57-58, with ns. 409-414; and T. HÖLSCHER 2009a mentioned here are discussed in detail in the following, and are summarized *infra*, in Chapter I.1.1. All seven scholars, who are listed here after BERGMANN 1981, follow also her assertion (cf. M BERGMANN 1981, 22-24), that the extant portrait of Vespasian on Frieze B was recut from an original portrait of Domitian. So also most recently M. LANGER and PFANNER 2018 (for a discussion, cf. *infra*, at Chapter V.1.h).

<sup>129</sup> D.E.E. KLEINER 1992, 191, 192, Fig. 159, quoted *verbatim infra*, n. 394, in Chapter III.

<sup>130</sup> For the assertion that the extant portrait of the young togate Domitian on Frieze B had been recut from the original portrait of Tiridates, cf. H. MEYER 2000, 134-138, Figs. 229; 251; 252; 256-259. This was refuted by M. PENTIRICCI 2009, 59-60 with ns. 417, 419. Cf. *infra*, at Chapters II.4.; VI.1.

Hugo Meyer's dating of the (alleged original) togate youth on Frieze B (in my opinion Domitian) in the Neronian period, has been followed by W. TRILLMICH 2004, 334-335, quoted after A. PEÑA 2017, 206-207 with ns. 56, 57. A. PEÑA himself, following E. BAUMER 2007, dates the Cancellaria Reliefs to the Flavian period). - To this I will come back below; cf. *infra*, in Chapter IV.1.1.h).

<sup>131</sup> For Tiridates, cf. M.S. DROWER and B.M. LEVICK: "Tiridates (4) (RE 6), brother of Vologeses I of Parthia, who set him on the throne of Armenia (AD 54). He fled before the Romans and was temporarily displaced by Tigranes (4) V, but was reinstated by Vologeses. By a compromise with Cn. Domitius Corbulo, Tiridates agreed to journey to Rome and receive the crown of Armenia ceremonially from Nero (AD 66) ...", in: *OCD*<sup>3</sup> (1996) 1531. The authors quote Tac. *Ann.* 12ff. and Joseph. *BJ* 7.244-51. It is unfortunately unknown how old Tiridates was in AD 66.

young Domitian. According to Hugo Meyer, Tiridates was shown in the moment of receiving his diadem by the Emperor Nero, whose head was later reworked into a portrait of Vespasian<sup>132</sup>.

When we read the just summarized extraordinary range of contradictory opinions, the main reasons for this diversity of scholarly opinion concerning the Cancellaria Reliefs are not as yet apparent<sup>133</sup>. In my opinion, those crucial points have already all been addressed by Magi, who, in addition to this, had also documented in excellent fashion the relevant details of the two friezes, on which his conclusions were based.

1.) Magi<sup>134</sup> discussed in detail and documented with drawings and photographs that the marble slabs, which belong to the two friezes of the Cancellaria Reliefs, had originally been prepared for several different projects that, in the end, had not materialized; all these slabs were also previously supposed to be attached to walls. On the back sides of those slabs and on their edges there are cavities (for lifting those slabs, for clamps, as well as dowel holes), that were clearly not used, and which allowed the further conclusion that even those slabs, that already originally belonged together, had previously been paired in different sequences. Magi also documented that other such cavities, which the slabs contain, *had* been used.

Those cavities in the slabs, that pre-existed the decision to use the slabs for the Cancellaria Reliefs, should cause a lot of problems, as soon as the first carving phase of those friezes had begun (as we shall see below at Chapter II., the Cancellaria Reliefs were carved *in situ*, that is to say, only after the slabs had been attached to the monument).

These technical peculiarities of the slabs have been ignored by many subsequent scholars, who therefore arrived at wrong conclusions concerning that phase of the lifetime of both friezes in antiquity, which followed their dismantling from their original monument.

2.) Magi<sup>135</sup> described in detail and documented with photographs substantial carving traces on the background of the reliefs around the three portrait heads (*i.e.*, of the two emperors and of the togate youth)

<sup>132</sup> H. MEYER 2000, 131-132, with n. 416, Figs. 243; 242.

<sup>133</sup> as I have only realized at a later moment, also M. PENTIRICCI 2009, 57, has discussed the question, why the scholarly opinions concerning the Cancellaria Reliefs are so diverse. He lists the following reasons for that: 1.) the "genericità" of the represented scenes, 2.) our ignorance, to which building the friezes had belonged, 3.) "l'incertezza riguardo all'identità di alcuni dei personaggi rappresentati, in particolare delle due figure di imperatori dovuta in primo luogo all'intervento di rilavorazione che i ritratti hanno subito".

Still very much later, I had the chance to read the summary of the scholarship on the Cancellaria Reliefs by H. MEYER 2011, 177-180: "Zur Forschungsgeschichte".

Cf. the relevant summary by S. LANGER and M. PFANNER 2018 (73-74, chapter "2.9.5 Deutung und Interpretation der Reliefs"), quoted *verbatim* and discussed *infra*, at Chapters V.1.; V.1.i.1.).

<sup>134</sup> F. MAGI 1945, 8-13. This has also been observed by S. LANGER and M. PFANNER 2018, 37-39 and 80, who do not give MAGI, *op.cit.*, the credit though to have observed this fact first. S. LANGER and M. PFANNER 2018 document this technical side of both friezes in great detail; cf. pp. 28-30: "[Kapitel] 2.6. Erhaltungszustand und ursprüngliche Breite der Reliefs"; cf. pp. 30-42: "[Kapitel] 2.7 Bautechnischer Befund".

<sup>135</sup> cf. F. MAGI 1945, 149-150 with n. 2 on p. 149 and n. 2 on p. 150 ("L'artista ritrattista"): "Infine un terzo artista sembra abbia collaborato al nostro monumento ... come sopra ho accennato: l'artista cioè che ha eseguito il ritratto di Vespasiano e che aveva fatto quello di Domiziano sul fregio A (e che forse esegui in fretta e furia, a distanza di tempo, la trasformazione di questo in Nerva). Non pare infatti attribuibile né all'artista di A né a quello di B la testa di Vespasiano. È vero che, come ritratto, essa si distingue naturalmente dalle teste cosiddette ideali o comuni, ma da queste non si differenzia invece il ritratto, sullo stesso fregio [*i.e.*, B], del giovane Domiziano. Nulla infatti ci spinge a dissociare quest'ultima testa da tutte le altre del fregio, mentre la singolarità di quella di Vespasiano non ha bisogno di dimostrazione. Si noti poi che intorno al cranio di questa testa [*i.e.*, of Vespasian] la superficie del fondo mostra una striscia che ne ripete parzialmente il profilo, non levigata come il restante fondo, la quale non può spiegarsi se non come la traccia di una più grossa testa. È evidente che si tratta qui della testa abbozzata dall'esecutore del fregio, lasciata da finire allo specialista in ritratti. La riprova si ha nella simile striscia, di cui ho già parlato [with note 2 on p. 149: "Le teste non del tutto finite nella calotta sono: nel fregio A, le teste del Genio del Senato, del sottoufficiale e del soldato che parla con questo; nel fregio B, le teste del littore presso Domiziano, di Domiziano e di Vespasiano".], intorno ai capelli della testa di Domiziano [now Nerva] sul fregio A, la quale non può in alcun modo attribuirsi, come si è visto, alla rilavorazione del ritratto stesso [here F. MAGI refers back to p. 61, see the *verbatim* quotation below at \*) in Chapter II.4., *Ad b*]), ma deriva anch'essa dalla testa abbozzata. Il ritrattista dunque non si è affatto preoccupato di lisciare con cura il fondo intorno ai suoi ritratti, di modo che le sagome delle teste abbozzate sono rimaste, specialmente a luce radente, ben visibili. Non così i suoi colleghi, che hanno dovunque levigato la superficie del piano, se anche si sono permessi di lasciare non del tutto

and around several of the 'ideal' heads of both friezes, whereas in other parts these friezes are characterized by a final finish. These remaining carving traces are of different kinds, and Magi explained their existence with the assumption that the sculpting of those heads had been prepared by roughening out their shapes, speaking of "teste abbozzate", and then later, those heads had been carved by specialists. Because of those traces, he believed the reliefs had been left unfinished at those parts of the background which surround the aforementioned heads. In addition to this, Magi realized that on Frieze A the original face of Domitian had been reworked into the portrait of Nerva, and suggested further that also the process of recutting Domitian's face into that of Nerva had not been completed<sup>136</sup>.

These carving traces have caused a great deal of scholarly discussion; Magi<sup>137</sup> himself refuted some of the relevant hypotheses published by Schefold (1949), Rumpf (1955-56) and McCann (1972).

3.) Both friezes show a pair of two allegorical representations, a bearded middle aged man and an unbearded youth, carrying a cornucopia; the iconographies of both are (slightly) different on Frieze A and B<sup>138</sup>. Magi<sup>139</sup> was first to identify them on both friezes as *Genius Senatus* and as *Genius Populi Romani* respectively, an identification that was followed by many subsequent scholars, including myself (cf. below and *infra*, at Chapter III.). On the other hand, Magi was also first to mention that the *Genius Senatus* on Frieze A is shown wearing the *calcei senatorii* - as he should - whereas on Frieze B, which shows the: "Genio del Senato (Tav. XXII,1 [illustrating only his head]), i cui piedi sono poi calzati con i consueti calzari con rovescia invece che con i <<calcei senatorii>>"<sup>140</sup>.

Thus already Magi himself had stated that the *Genius Senatus* on Frieze B is wearing the 'wrong shoes'. These 'wrong shoes', worn by the *Genius Senatus* on Frieze B, have likewise caused a great deal of scholarly discussion.

4.) Magi<sup>141</sup> suggested that : "tra la scorcia del I secolo e il primo ventennio del II" (at a date 'between the end of the 1<sup>st</sup> century and AD 120'), the Cancelleria Reliefs were brought to the deposit of an ancient sculptor's workshop (where they were finally excavated).

---

finite le calotte di alcune teste d'altronde non affatto visibili [with n. 2 on p. 150, mentioning the figures of *Dea Roma* and of *Victoria* on Frieze B]. Questo elemento esteriore persuade ancor più a ritenere che un solo artista abbia fatto i due ritratti, e di Vespasiano e di Domiziano [on Frieze A, now Nerva], il che è probabile già di per sé. Non saprei, per contro, fissare sicuri caratteri stilistici comuni fra le due teste, essendo che la seconda [*i.e.*, Domitian/ Nerva] non ha più il volto originale. Non sono confrontabili i capelli, forse i due orecchi, rispetto a tutti gli altri orecchi visibili nei due fregi, presentano fra di loro una maggiore affinità. Quanto al volto di Nerva, se teniamo conto soprattutto della distanza di tempo che lo separa dal ritratto originale [*i.e.*, of Domitian on Frieze A], penso che difficilmente potrà attribuirsi al ritrattista di cui si parla, ma non lo escluderei del tutto. Certo è che il confronto fra i due volti di Vespasiano e di Nerva si stabilisce malamente, dato che l'uno è un ritratto compiuto, l'altro un volto rimediato alla meglio; in questo, per esempio, è del tutto difforme il naso fra lato e lato nella veduta frontale: forse lo era già, ma meno evidentemente nella faccia originaria di Domiziano. Resta dunque possibile che abbia lavorato ai nostri fregi anche un quarto artista".

Cf. F. MAGI 1945, 61: "Qui importa piuttosto dar rilievo ad una conseguenza che sembra scaturire logicamente da questa rilavorazione della fronte [of the portrait of Domitian, now Nerva, on Frieze A], cioè che anche il restante della faccia abbia subito una rilavorazione, anche se di questa non si hanno tracce se non forse intorno ai buchi del naso dove pare che il marmo sia stato in parte tolto, dato che questi risultano assai meno profondi che nelle altre figure. Il tormento della superficie del fondo lungo la faccia può e non può esser dovuto a questa rilavorazione, o lo è solo in parte. Certamente non è da attribuire ad essa una specie di striscia o impronta che ripete sul fondo l'andamento dei capelli sulla parte anteriore del cranio, contornandola, la quale è invece sicuramente lasciata dalla sagoma della testa nel suo stadio di abbozzo; i capelli, infatti, per quanto si è già detto, non dimostrano di essere stati rilavorati. Neppure sembra che sia stato toccato l'orecchio e nemmeno il collo (o assai poco, questo)".

<sup>136</sup> so also M. BERGMANN 1981, 21 with n. 8.

<sup>137</sup> F. MAGI 1955-56, 310-312, Taf. 37-41; cf. MAGI 1973.

<sup>138</sup> cf. M. BERGMANN 1981, 29-31 with ns. 51-58.

<sup>139</sup> F. MAGI 1945, 22-23 with n. 3, Fig. 21 (drawing of the "Calzare senatorio", which the *Genius Senatus* on Frieze A is wearing), Tav. XV,2 (*Genius Senatus* of Frieze A); p. 24 and Tav. XVI,2 (*Genius Populi Romani* of Frieze A); pp. 30-31 (on the *Genius Senatus* and the *Genius Populi Romani* on Frieze B); Tav. I; XXII,1 (*Genius Senatus* on Frieze B); the quote is from p. 31.

<sup>140</sup> F. MAGI 1945, 22-24, 30-31 (cf. *supra*, n. 139). It was therefore not E. SIMON 1960, 135, who was first to observe this fact, as erroneously asserted by M. BERGMANN, 1981, 29, n. 61. Cf. now S. LANGER and M. PFANNER 2018, 77, quoted *verbatim infra*, at n. 193.

For *calcei patricii*, cf. H.R. GOETTE 1988, 451 "Abb. 35a-c, calceus patricius, senatorius und equester".

<sup>141</sup> cf. F. MAGI 1945, 138-140, with n. 4 (referring back to his pp. 40, 42, 50); p. 140, quoted *verbatim infra*, n. 255, at Chapter I.3.1.

His assumption, which, in my opinion, is well founded<sup>142</sup> because based on the detailed documentation and discussion of his own excavation of the site, has, however, been doubted by other scholars<sup>143</sup>.

Fehr<sup>144</sup> mentions, in a different context, a great variety of 'errors' that have been observed in Roman state reliefs, but does not himself apply those experiences to the 'oddity', mentioned above at point 3.), the wearing of 'wrong shoes'. In theory, we could simply interpret this iconographic detail on Frieze B as an 'error' on the side of the artist(s) involved (or else on the side of their consultant(s)). On the other hand, I am also aware of the danger that such an assumption could just as well be wrong: take for example the so-called Altar of the Vicomagistri, two marble slabs of which were found, exactly as the Cancellaria Reliefs, but prior to those, in the same deposit of a sculptor's workshop. The alleged Vicomagistri, represented on those reliefs, are in reality of a much higher social rank than we know the Vicomagistri possessed, since two of the represented men are wearing the *calcei patricii*<sup>145</sup>.

The question arises, how we should deal with such instances. In the specific case of the 'wrong shoes', the bearded personification on Frieze B is wearing, I side with Magi (1939 and 1945)<sup>146</sup>, Fuhrmann (1940; cf. *supra*, ns. 5; 7; 113), Rumpf (1955-56)<sup>147</sup>, Toynbee (1957)<sup>148</sup>, Simon (1960; 1963)<sup>149</sup>, Koeppel (1969)<sup>150</sup>, Linfert (1969), H.-W. Ritter (1982) and Ghedini (1986; for all three, cf. *infra*, n. 181), Kleiner (1992)<sup>151</sup>, Hugo Meyer

<sup>142</sup> so also J.C.M. TOYNBEE 1957, 4.

<sup>143</sup> so M. BERGMANN 1981, 25 with n. 28 (quoted *verbatim infra*, n. 252, at Chapter I.3.); and M. PFANNER 1981, 517 with n. 16, quoted *verbatim infra*, n. 318, at Chapter II.1.d). Also S. LANGER and M. PFANNER 2018, repeat these doubts (for a discussion, cf. *infra*, at Chapter V.1.a).

<sup>144</sup> B. FEHR 1998, 717 n. 3: "Über die - nur von uns als solche wahrgenommene - Nichtbeachtung der raumzeitlichen Einheit oder (bei Friesen) der 'richtigen' zeitlichen Reihenfolge der Ereignisse hinaus erscheinen im Bildgefüge nicht selten Personen und Objekte, die sich aufgrund von Naturgegebenheiten, historischen Tatsachen oder kulturellen Spielregeln der Antike auf dem (vom modernen Betrachter postulierten) 'Schauplatz des Geschehens' nicht befinden dürften (vgl. z. B. KOEPEL 1969, 144 Anm. 41: auf dem traianischen Extispicium-Relief im Louvre ist unmittelbar neben dem Jupiterempel auf dem Kapitol ein Liktör dargestellt, dessen Rutenbündel mit einem Beil versehen ist, obwohl dies innerhalb der Stadtgrenzen nicht erlaubt war) ...".

For the Extispiciumrelief, cf. also D.E.E. KLEINER 1992, 223-224, Fig. 187; and below, at *A Study on Domitian's cult-statue of Iuppiter Optimus Maximus Capitolinus* (cf. here Fig. 10); and *infra*, in volume 3-2, at *Appendix I.g.3.*; and *Appendix I.g.4.*)

For more such mistakes, as the one, mentioned by FEHR (*op.cit.*); cf. *infra*, at n. 145, and S. LANGER and M. PFANNER 2018, 77 with n. 123, quoted *verbatim infra*, at n. 193.

<sup>145</sup> but that fact was, of course, also known to the excavators, as Rudolf Horn reported, cf. R. HORN 1938, Sp. 686: "Cancellaria. In der Sitzung der Päpstlichen Akademie vom 1. Dezember 1938 haben der Generaldirektor der Päpstlichen Museen, B. Nogara, und dessen Assistent F. Magi, einen ausführlichen Bericht über die neuen Funde gegeben, den wir im folgenden kurz wiederholen [my emphasis]"; he discusses the reliefs of the so-called Altar of the Vicomagistri on Sp. 689-692 (with Abb. 29-31), mentioning the identification of the represented men as Vicomagistri and also the fact that some of them are wearing the *calcei patricii*; cf. M. PENTIRICCI 2009, 56 with ns. 3, 4; J. POLLINI 2012, 10; chapter "VII. The Smaller Cancellaria ('Vicomagistri') Reliefs and Julio-Claudian Imperial Altars: Limitations of the Evidence and Problems of Interpretation", p. 309-353, Figs. VII.1-36. POLLINI, *op.cit.*, identifies the two men, who are wearing the *calcei patricii*, as the *consules*. For the so-called Altar of the Vicomagistri, see now also P. LIVERANI 2018; and the review of the relevant volume by E.M. MOORMANN 2020a, 277: "P. Liverani opens the book with the 'Vicomagistri reliefs' (cat. 1) found near the tomb of Aulus Hirtius, just like the Cancellaria reliefs (see below). Whereas the connection with the Vicomagistri was abandoned rather briefly after their discovery in 1937 and 1939, various unconvincing alternative readings have been proposed. Liverani connects the scenes with a ritual executed by the two consuls in the emperor cult. The two reliefs would have adorned the sides of an altar like that of the Ara Pacis Augustae, made in the age of Tiberius". Cf. *supra*, n. 7.

For *calcei patricii*, cf. H.R. GOETTE 1988, 451 "Abb. 35a-c, calceus patricius, senatorius und equester".

<sup>146</sup> cf. *supra*, ns. 112, 139.

<sup>147</sup> A. RUMPF 1955-56, 114 (quoted *verbatim infra*, n. 172).

<sup>148</sup> J.M.C. TOYNBEE 1957, 5. So by the way already J.M.C. TOYNBEE 1946, 180.

<sup>149</sup> E. SIMON 1963, 10: "Die einfachen militärischen Schuhe, die Domitian und der Genius senatus im Frie [B] tragen ...". I am fully aware of the fact that E. SIMON 1985, 551-552 with Abb. 3, has identified the here-so-called *Genius Senatus* on Frieze B, because of the diadem he is wearing, with the mythical Roman King Numa Pompilius instead (quoted *verbatim infra*, at n. 181). B. FEHR 1998, 723-724 with ns. 26, 27, identifies this representation likewise as Numa Pompilius.

<sup>150</sup> G. KOEPEL 1969, 172. In his later publication, Koeppel had changed his mind concerning the interpretation of this allegorical representation; cf. KOEPEL 1984, 33, cat. 8 "Adventus des Vespasian", 11 [*i.e.*, fig. 11 on Frieze B; cf. here Figs. 1 and 2 drawing]: "Bärtige Gestalt mit Idealfrisur in toga und calcei. Wegen des Fehlens von calcei senatorii kann es sich nicht um den Genius Senatus handeln. Auch die Interpretation als Personifikation des ordo equester stößt auf Schwierigkeiten. Dazu s.[iehe] S. 7". The just mentioned observation by G.M. KOEPEL 1984, 7, is quoted *verbatim infra*, at n. 172.

<sup>151</sup> D.E.E. KLEINER 1992, 191.

(2000)<sup>152</sup>, Pentiricci (2009)<sup>153</sup>, Pfeiffer (2009), Hölscher (2009a)<sup>154</sup>, and Spinola (cf. *infra*, at Chapter III.), who, although being perfectly aware of the relevant fact, have nevertheless made the decision to identify this personification on Frieze B with the *Genius Senatus*. Please note: to my knowledge, Simon (1960; 1963) is so far the only scholar, who has suggested that the *Genius Senatus* on Frieze B has deliberately been represented as wearing the 'wrong shoes' (!)<sup>155</sup>.

Those scholars, who believe instead that this personification cannot possibly be the *Genius Senatus* (because this figure is wearing the 'wrong shoes'<sup>156</sup>), and who do *not* regard this 'oddity' as a simple error, or alternatively, as a deliberate decision on the side of the artist(s), are, of course, forced to identify this personification differently. The latter decision results in a lot of problems, as we shall see in a minute.

The following discussion relates to the kind of iconographic details, mentioned above in point 3.): the wearing of 'wrong shoes'. Two figures on Frieze B are characterized like this, the here-so-called *Genius Senatus*, and the togate youth, the here-so-called Domitian. A summary of this discussion will be provided below; cf. *infra*, at Chapter I.1.1..

Let's begin with the here-so-called *Genius Senatus* on Frieze B. Provided, he is another allegorical figure, also his young companion on Frieze B cannot possibly be identified as the *Genius Populi Romani*, since those two are always represented together<sup>157</sup>. Both are for example undoubtedly represented on Hadrian's *adventus* relief, to which I will come back below (cf. here **Fig. 91**). As already mentioned, the iconography of this youthful representation, in addition to this, is slightly different on both friezes, a fact, which has caused a detailed discussion on its own<sup>158</sup>. Frequently, this figure has therefore been identified with *Honos*<sup>159</sup>. In a certain sense consequently, because *Honos* was often venerated and represented together with *Virtus*, the amazon-like personification that likewise appears on both friezes, has therefore been identified with *Virtus*<sup>160</sup> (to this I will come back below, at Chapter I.2.); Bendinelli, on the other hand, identified this allegorical figure on both friezes with the goddess Bellona<sup>161</sup>. Personally, I side with Magi<sup>162</sup>, Simon (1960; 1963) and

<sup>152</sup> H. MEYER 2000, 126 with n. 402.

<sup>153</sup> M. PENTIRICCI 2009, 58 with n. 414.

<sup>154</sup> S. PFEIFFER 2009, 62, quoted *verbatim supra*, n. 59; T. HÖLSCHER 2009a, 58. S. LANGER and M. PFANNER 2018, 55, call this figure: "Genius Senatus [?]" (cf. *infra*, in Chapter V.1.a).

<sup>155</sup> E. SIMON 1960, 135 (quoted *verbatim infra*, n. 175); E. SIMON 1963, 9-10 (quoted *verbatim infra*, at n. 456, in Chapter III.). Also in E. SIMON 1985, 552, she suggested this, although she now interpreted both figures differently (quoted *verbatim infra*, at n. 181).

<sup>156</sup> so M. BERGMANN 1981, 29 with ns. 51, 52: "Ebenso müssen die anwesenden Götter und Genien eher aus dem Kontext gedeutet werden, als daß sie selbst den Vorgang erklären. Das gilt zunächst für den bärtigen Genius in der Toga [on Frieze B]. Er kann nicht der Genius des Senats sein, da er keine Senatorenschuhe trägt [with n. 51, quoting SIMON 1960, 135; KELLER 1967, 205 ff.]. Da er keine anderen Attribute hat, könnte er nur durch den Zusammenhang benannt werden. Sollte H. Gabelmann die Statue eines jugendlichen Genius mit Trabea in Neapel zu Recht als Personifikation des Ordo Equester erklären [with n. 52, providing references], wäre auch diese von manchen vorgeschlagene Benennung für den bärtigen Genius wenig wahrscheinlich". BERGMANN, *op.cit.* herself does not suggest an identification of this 'bearded Genius wearing a toga'.

<sup>157</sup> cf. D. BOSCHUNG 2017, 393-394, quoted *verbatim infra*, n. 213, in Chapter I.2. S. LANGER and M. PFANNER 2018, 55-56, call this figure on Frieze B: "Genius Populi Romani[?]" (cf. *infra*, at Chapter V.1.a).

<sup>158</sup> for a summary of the detailed discussion, in which various scholars have in vain tried to identify this representation, cf. M. BERGMANN 1981, 27-30; D.E.E. KLEINER 1992, 191. So also S. LANGER and PFANNER 2018, 62; cf. p. 77 with ns. 124, 125 (who provide examples and references).

For the *Genius Populi Romani* on Frieze A of the Cancellaria Reliefs, cf. A. HEINEMANN 2018, 229 with n. 71, Fig. 11.

<sup>159</sup> cf. M. BERGMANN 1981, 30. B. FEHR 1998, 721-724, is of the opinion that this representation should instead be identified as the god Terminus (quoted *verbatim infra*, at n. 459, in Chapter III).

<sup>160</sup> for a discussion, cf. M. BERGMANN 1981, 29-31. S. LANGER and PFANNER 2018, 45-46, call this figure on Frieze A: "Roma/Virtus?", and pp. 51-52 on Frieze B: "Dea Roma" (for further discussions, cf. *infra*, n. 221, in Chapters I.2.); and below, at Chapters V.1.h); and V.1.i)).

<sup>161</sup> G. BENDINELLI 1949; quoted after J.M.C. TOYNBEE 1957, 21-22, who has refuted his hypothesis.

<sup>162</sup> F. MAGI 1945, 21, Tav. XIV (Roma on Frieze A); p. 28, Tav. XX (Roma on Frieze B). Also J. HENDERSON 2003, 250, identifies both amazon-like figures on Frieze A and B as Roma.

Pollini (2017b)<sup>163</sup>, who, in my opinion correctly, have identified this representation on both friezes with the goddess Roma instead. So also Spinola (cf. below and *infra*, at Chapter III.).

As a result of all this, the scholars, who have discussed the Cancellaria Reliefs so far, can already, because of point 3.), be divided into at least two different 'camps'. Although in reality those 'wrong shoes', worn by the *Genius Senatus* on Frieze B, have generated some kind of 'genealogy' of interrelated interpretations. In the following, I will mention some examples.

Bergmann<sup>164</sup> states that the bearded personification<sup>164</sup> on Frieze B cannot be identified with the *Genius Senatus*, because this figure does not wear the *calcei senatorii*; she herself does not identify this figure, but refers to it as a "bärtigen Genius in der Toga". Then, after a discussion of the different suggestions to identify the here-so-called *Genius Populi Romani* on Frieze B with other allegorical figures, none of which is really convincing in her opinion, she follows Elisabeth Keller, who has identified this figure with *Honos*<sup>165</sup>. Then Bergmann discusses another of Keller's hypotheses, who identifies the seated, amazon-like representation on Frieze B, which is wearing a helmet, as *Virtus*. Bergmann<sup>166</sup>, who finds this identification also not convincing, refers to this figure on Frieze B as "sitzende amazonengestaltige Göttin". As already mentioned, Magi and some subsequent scholars (cf. *infra*, at Chapter III.), identify this seated amazon-like figure on Frieze B as *Dea Roma*<sup>167</sup> instead.

**I myself follow this suggestion here and believe it is provable, because precisely this representation of the statue-type (?) of the *Dea Roma* appears on the coins (cf. here Fig. 112), issued by Vespasian to commemorate his revival the archaic festival of the *Septimontium*, which would be especially lavishly celebrated by Domitian.**

Cf. *infra*, at Chapter V.1.i.2.) My own hypothesis concerning the statue-type (?) of the *Dea Roma* on Frieze B of the Cancellaria Reliefs (cf. here Fig. 2): it is reminiscent of Vespasian's coins commemorating his revival of the archaic festival of the *Septimontium* (cf. here Fig. 112).

**Now, since Bergmann does not identify on Frieze B the here-so-called *Dea Roma*, the here-so-called *Genius Senatus*, and the here-so-called *Genius Populi Romani* as such, her relevant decisions result in a great problem: as we shall see below, she is at the end of her discussion unable to say, what the scene, visible on Frieze B, represents. The reasons for that are, in addition to her just mentioned hypotheses, some further assumptions, to which we will now turn.**

Bergmann<sup>168</sup> rejects Magi's identification of the togate youth on Frieze B as the young Domitian. First of all she explains why, in her opinion, the head of this youth is not a portrait of Domitian, then she suggests that the head of this figure is not a portrait at all. Next Bergmann<sup>169</sup> discusses the impossibility of identifying this youth with Domitian, because he too is wearing the 'wrong shoes' (as first observed by A. RUMPF 1955-56). According to Bergmann<sup>170</sup>, who follows Rumpf, Domitian, being "senatorischen Ranges", should likewise

<sup>163</sup> E. SIMON 1960, 139 (Roma on Frieze A), p. 151 (Roma on frieze B); E. SIMON 1963, 9 (Roma on Frieze B), p. 10 Roma on Frieze A: "die amazonenhafte Roma (von manchen Gelehrten Virtus genannt)". So also J. POLLINI (2017b, 116: Roma on Frieze B; cf. pp. 117, 118: Roma on Frieze A).

<sup>164</sup> M. BERGMANN 1981, 29, n. 51 (quoted *verbatim supra*, n. 156), quotes SIMON 1960, 135 and KELLER 1967, 205 ff. But see BERGMANN's final remark on p. 31 at "Nachträge; S. 29", quoted *verbatim infra*, at n. 193.

<sup>165</sup> M. BERGMANN 1981, 30.

<sup>166</sup> M. BERGMANN 1981, 29-31.

<sup>167</sup> so also J.M.C. TOYNBEE 1957, 5.

<sup>168</sup> M. BERGMANN 1981, 20, 22, 24 with ns. 19-22, pp. 25-29 (cf. *supra*, n. 126).

<sup>169</sup> M. BERGMANN 1981, 26: "Er [*i.e.*, the togate youth on Frieze B] trägt die einfachen Calcei, ist also nicht senatorischen Ranges", with n. 34: "Die Schuhe waren auch ein unauflösbarer Einwand gegen die Deutung des Mannes vor Vespasian als Domitian: Rumpf [1955-56] 115 f. m. Lit.; Simon [1960] 135 [quoted *verbatim infra*, n. 175]; Keller [1967] 215 ...". KELLER 1967, 215 is quoted *verbatim infra*, n. 177.

<sup>170</sup> M. BERGMANN 1981, 26, with n. 34 (quoted *verbatim supra*, n. 169).

wear the *calcei senatorii*. We might at first glance object that Domitian was, of course, not 'of the senatorial order', but belonged instead, like his father Vespasian, to the *ordo equester*<sup>171</sup>. But Rumpf<sup>172</sup> did not refer to

<sup>171</sup> cf. B. LEVICK 2009, 15, Section: "Un imperatore plebeo"; G.E.F. CHILVER and B.M. LEVICK: "Vespasian (Titus Flavius (RE 206) Vespasianus), emperor AD 69-79, was born on 9 November, AD 9, at Sabine Reate. His father, Flavius Sabinus ... was a tax-gatherer; his mother also was of equestrian family ... **In 66 he accompanied Nero to Greece and allegedly offended him by falling asleep at one of his recitals, but at the end of the year he was entrusted with suppressing the rebellion in Judaea. By mid-68 he had largely subdued Judaea apart from Jerusalem but conducted no further large scale campaigns** ... On 1 July [69] the two Egyptian legions under Ti. Iulius Alexander proclaimed Vespasian; those in Judaea did so on 3 July, and the Syrian legions a little later ... [M. Antonius] Primus pressed on, entering Rome on 21 December -

[but note that is now assumed that M. Antonius Primus reached Rome already on 20th December AD 69, as B. LEVICK 2021, 34, herself writes, since he still received an embassy of Vitellius (who died on 20th December); cf. Tacitus (*Hist.* 3,81; for a discussion; cf. *infra*, in volume 3-2, at *Appendix I.d*)]

- the day after Vitellius' death. The senate immediately conferred all the usual powers on Vespasian [cf. *infra*, the *lex de imperio Vespasiani*], though he dated his tribunician years from 1 July, negating the acts of senate and people and treating his legions as an electoral college ... Vespasian returned to Italy in the late summer of 70 ... After the Jewish and Rhineland rebellions (see TITUS; IULIUS CIVILIS, C.) had been suppressed, Vespasian continued imperial expansion with the annexation of northern England, the pacification of Wales, and an advance into Scotland (see IULIUS AGRICOLA, CN.), as well as in south-west Germany between Rhine and Danube. On his death on 23 June 79 he was accorded deification, though Titus did not act at once (he had been Vespasian's colleague since 71 ...) ...[my emphasis]", in: *OCD*<sup>3</sup> (1996) 1590.

Cf. D. KIENAST, W. ECK and M. HEIL 2017, 101, "Vespasian (1. Juli 69-23. Juni 79) ... Wichtige Einzeldaten: 23 Juni 79 Tod: Gest.[orben] in seiner Villa bei Aqua Cutiliae (Suet., *Vesp.* 24). Beisetzung zuerst im Mausoleum Augusti (?), dann Überführung in das templum gentis Flaviae. nach 8. Sept.[ember] 79, vor 2. Mai 80. Consecratio: DIVUS VESPASIANUS (AUG.)."

Notoriously, it were Vespasian's humble origins, in combination with his acknowledged military prowess, which had caused Nero in 67 AD to entrust him the command in a conflict, called in retrospect 'the Great Jewish Revolt' or War, which should finally result in catapulting Vespasian himself to the throne. As Suetonius (*Vesp.* 4,5; translation: J.C. ROLFE) put it: "Since to put down this rebellion required a considerable army with a leader of no little enterprise, yet one to whom so great a power could be entrusted without risk, Vespasian was chosen for the task, both a man of tried energy and as one in no wise to be feared because of the obscurity of his family and name".

For the *lex de imperio Vespasiani* (CIL VI 930), cf. D. MANTOVANI 2009, *passim*, esp. p. 27 (quoted *verbatim infra*, n. 455, at Chapter III).

Cf. further for Vespasian, Titus and the Great Jewish Revolt or War, *infra*, ns. 189; and in Chapter I.1.1., ns. 195, 198, 200, 201, 229; and in Chapter III., ns. 404, 412, 413, 455; and in Chapter VI.3., n. 476.

For excavations at *Falacrinae* (Cittareale, Rieti), where Vespasian was born; cf. F. COARELLI (*et al.* 2011; *id.* 2012).

<sup>172</sup> in the following, I quote a very long section of RUMPF's account, because J.M.C. TOYNBEE 1957, 7-8 (quoted *verbatim infra*, n. 176), in her refusal of RUMPF's hypotheses, refers to all the arguments, mentioned by him in this passage.

A. RUMPF 1955-56, 114, wrote: "... so bleibt noch das Problem des jugendlichen Togatus, der auf den Platten mit Vespasian [*i.e.*, Frieze B; here **Fig. 2; Figs. 1 and 2 drawing; figure 12**] zwischen Genius Senatus und Genius Populi Romani steht (*Taf.* 22). Nach der Identifizierung des Vespasian galt er - wie gesagt - als Domitian, der im Jahre 70 seinen Vater in Benevent empfängt, und das ist auch heute die am öftesten vertretene Annahme ... Aber auch für Domitian spricht nichts. Der durch die Umstände zum Statthalter erhobene Sohn hätte Vater und Kaiser mit Handschlag begrüßen müssen [with n. 6, providing references]; pp. 115-116: "Der Kopf [of the togate youth on Frieze B] ist nicht von dem Meister der beiden Kaiserköpfe nachträglich gemeißelt. Er ist genau so nichtssagend und verblasen wie die Köpfe der anderen Nebenfiguren (*Taf.* 19,2). Bernhard Neutsch hat ihn mit Recht neben den eines Lictor in demselben Halbfries (*Taf.* 19,3) gestellt, von dem er sich in keinem wesentlichen Zug unterscheidet [with n. 7: quoting B. NEUTSCH 1948-49, 109]. Um zu erkennen, wen dieser Togatus darstellt, darf man nicht sein Gesicht betrachten, man muß ihm auf die Füße sehen. Der Dargestellte trägt nicht den 'calceus senatorius' wie Vespasian neben ihm [with n. 8, providing references]. Also kann er kein Mann senatorischen Ranges sein ... **nicht Domitian, der als praefectus urbi consulari potestate und als Praetor [corr: Domitian was praetor urbanus consulari potestate; cf. *infra*, at ns. 183-189]** Zutritt und Vorsitz im Senat hatte. Nie hätte der eitle Domitian einen solchen Schnitzer verziehen. Ja, es wäre nicht einmal Eitelkeit gewesen, 'calceos mutare' ist bekanntlich gleichbedeutend mit Aufnahme in den Senat [with n. 9, quoting: "Cicero, *Phil.* 13, 28".], das entsprechende Schuhwerk war also für jeden Betrachter selbstverständliches 'insigne' der Würde, das Domitian schon in seiner damaligen Eigenschaft als Praetor zustand. Man wende nicht ein, das sei eine Kleinigkeit, über die sich die künstlerische Freiheit hinwegsetzen könne. Auf einem offiziellen Denkmal ist das einfach unerlässlich, zumal wenn - wie auf den Friesen von der Cancellaria - der senatorische Schuh, der einfache calceus, die caligae der Soldaten und die Götterstiefel aufs sorgfältigste ausgeführt und unterschieden sind [with n. 11: quoting: F. MAGI 1945, 23ff.].

Die einfachen calcei, wie sie der in Frage stehende Togatus [on Frieze B] trägt, kann ein Römer senatorischen Ranges damals nur tragen, wenn er in militärischer Kleidung 'paludatus accinctusque' dargestellt wird, so wie Nerva [originally Domitian] auf dem anderen Fries [Frieze A]. Sie kennzeichnen ihren Träger als Angehörigen der 'militia equestris' im Gegensatz zur 'militia caligata' ... Also nur als Krieger könnte der Caesar Domitianus vom Jahre 70 ... mit solchen Stiefeln abgebildet werden. Ein Togatus senatorischen Ranges hat von republikanischer Zeit bis zu den Elfenbeindiptychen des 6. Jahrhunderts die seinem Stand entsprechenden Stiefel mit den vier Riemen, welche in zwei Knoten mit herabfallenden Enden verbunden sind [with n. 12, quoting: AA 1935, 396.]. Unser Togatus trägt die calcei ohne solches Riemenwerk ganz ebenso wie der Apparitor der Vestalinnen [on Frieze B] und die Lictoren [on both friezes]. Er ist also kein Mitglied des Senats, dennoch kann er eine relativ hohe Würde bekleiden ... Der Rangunterschied zwischen Nerva [originally Domitian; on Frieze A], dem Ritter [the togate youth on Frieze B] und den Lictoren mag am Relief durch die verschiedene Färbung der an sich gleich geformten Fußbekleidung angegeben gewesen sein [with n. 13, providing references.].

Domitian's family at all - as I at first erroneously assumed - but rather to his position *praetor urbanus*, which Domitian held as of 1st January 70 (that is to say, he also held this position at the moment, which is presumably represented on Frieze B; for both, cf. *infra*). Domitian thus belonged to the Senate and should therefore, according to Rumpf and Bergmann, be represented with the *calcei senatorii*. Rumpf further assumed that this togate youth on Frieze B, because of the type of shoes he is wearing, is rather characterized as being of equestrian rank. And because Rumpf could not imagine that a human being of equestrian rank could possibly have been placed at this privileged position on Frieze B - right between the *Genius Senatus* and the *Genius Populi Romani* - he identified the togate youth with the allegorical representation *Ordo Equester*.

When we apply Bergmann's and Koeppel's relevant findings (cf. *supra*, **ns. 156, 172**), the 'togate youth' - provided, he actually were the *Ordo Equester*, as suggested by Rumpf - should instead be clad with a different garment, namely 'the *trabea*, worn by the *equites*, and not the long *toga*, which reaches down to the foot' (G.M. KOEPPEL 1984). But it is, on the other hand, certainly more prudent to follow Koeppel's earlier statement (cf. *supra*, **n. 172**), according to which the iconography of the (only supposed) allegorical representation of the *Ordo Equester* is unknown.

Already Koeppel (1969)<sup>173</sup> had rejected Rumpf's relevant hypotheses, but for different reasons: "Die Deutung des Reliefs (Bild 16 [*i.e.*, Frieze B] wird dadurch erschwert, daß der Fries eine spätere Interpretation des Ereignisses vom Jahre 70 darstellt, als Vespasian nach Rom kam. Die Hauptfigur des Reliefs ist nicht Vespasian, sondern Domitian [with n. 157]. An der Identifizierung dieser Gestalt als Domitian ist festzuhalten trotz Rumpf ... [1955-56, 112ff.] (= *Ordo Equester*) ... Vgl. [vergleiche] Toynbee ... [1957], 7", who, like Koeppel (1969), still identified the togate youth with Domitian, despite Rumpf's arguments against this assumption.

By the time of his later publication, Koeppel had radically changed his mind concerning this subject. Following several of the ideas, suggested by Bergmann (1981), he assumed now that the head of Vespasian on Frieze B was recut from an original portrait of Domitian, and that, consequently, the togate youth standing in front of the emperor, cannot possibly represent Domitian as well. Koeppel (1984) denied also that the here-so-called *Genius Senatus* may be identified as such (because he does not wear the *calcei senatorii*), but could not offer an alternative identification for this figure. In addition to that, Koeppel (1984) referred to the here-so-called *Genius Populi Romani* as *Honos* instead (cf. *supra*, **ns. 150, 172**), and suggested that the

---

Was sollte aber ein Ritter [*i.e.*, the togate youth on Frieze B] an dieser Stelle? Zweifellos ist der Platz zwischen *Genius Senatus* und *Genius Populi Romani* bevorzugt, so bevorzugt, daß man in ihm keinen Sterblichen erkennen wird. Die Schwierigkeit löst sich sofort, wenn man in ihm die Personifikation des *ordo equester* erkennt. Ganz ebenso bekleidet, als *Togatus* mit einfachen *calcei* ist er mit den *Genien* von Senat und Volk auf dem *Beneventer Bogen* dargestellt [with n. 14, providing a reference]. *Vespasian* stammt aus dem Ritterstand, er hat sich nach Sueton (*Vesp. 2*) lange ... dagegen gesträubt, den *latus clavus* anzustreben [*i.e.*, to become a senator]. Der Repräsentant des zweiten Standes [*i.e.*, the representation of the *Ordo Equester*] wäre also hier in vollstem Maße sinnvoll angebracht ... [my emphasis]".

For the representation of the (alleged?) *Ordo Equester* at Trajan's Arch at Beneventum, mentioned by A. RUMPF 1955-56, 114, in the above-quoted passage, cf. G. KOEPPEL 1969, 162-163, Fig. 12: "Vor einer Architektur, die aus korinthischen Säulen und einem mit einem Waffenfries geschmückten Gebälk besteht ... steht eine Gruppe von neun Figuren. Die drei im Vordergrund sind Personifikationen: in der Mitte der *Genius Senatus*, links 'Ordo Equester' [with n. 112], und rechts der *Genius Populi Romani*". - For this relief; the left hand side panel in the lowest register of the Arch of Trajan at Beneventum ('city side'); cf. *infra*, in Chapter II.3.3., and here Fig. 46.

In his **note 112**, G. KOEPPEL 1969, 163, writes: "Es gibt keinen *Genius* des Ritterstandes: Béranger ...[B]b 165 (1965)], 85 mit Anm. 54". So also S. LANGER and M. PFANNER 2016, 78, who state that: "wir kennen keine Ikonographie einer Personifikation des römischen Ritterstandes".

But see G.M. KOEPPEL 1984, 7, where he has modified his idea concerning this subject in so far, as he does not deny any more that there possibly were representations of the allegorical representation *Ordo Equester*. Discussing the here-so-called *Genius Populi Romani* and *Genius Senatus* on Frieze B, he writes: "Daß die im Hintergrund neben der Jünglingsfigur [*i.e.*, the here-so-called *Genius Populi Romani*] stehende Personifikation nicht als *Genius Senatus* bezeichnet werden kann, weil ihr die *calcei senatorii* fehlen, ist ein weiteres Argument gegen die Deutung des Jünglings als *Genius Populi Romani*. Als *Ordo Equester* kann der bärtige *togatus* [*i.e.*, the here-so-called *Genius Senatus*] aber nicht gedeutet werden, denn als solcher müßte er die ritterliche *trabea*, und nicht, wie hier, die bis zum Fuß herab fallende, lange *toga* tragen [with n. 41, providing a reference]".

<sup>173</sup> G. KOEPPEL 1969, 172 with n. 157. In n. 157, KOEPPEL quoted: E. SIMON 1960, 151; E. SIMON 1963, 10.

amazon-like figure on Frieze B is rather *Virtus* than *Dea Roma*. In his final comments on Frieze B, Koepfel (1984) came to the conclusion, that 'very much remains unexplained on Frieze B, especially the rôle of the *togatus* [*i.e.*, the here-so-called Domitian] who turns to the Emperor'. Cf. Koepfel (1984, 7, 31-33, quoted *verbatim infra*, at n. 416, in Chapter III.). But before discussing that (cf. *infra*, at Chapter III.), let's return to our discussion of Bergmann (1981) herself.

Bergmann (1981), who mentions the scholars quoted here in her bibliography and discusses many of their other observations, in stating her approval of Rumpf's hypotheses<sup>174</sup>, quotes also Simon (1960) and Keller (1967) in this context with the relevant page numbers of their publications. In these sections of their publications, Simon and Keller have refuted Rumpf's ideas, but Bergmann does not address these facts. By quoting these scholars the way she does, Bergmann thus gives the wrong impression that also those scholars, like herself, had followed Rumpf's relevant ideas. This is not the case: Simon<sup>175</sup>, who herself followed Magi (1945) and Toynbee, mentioned that Magi himself (1955-56) had refuted Rumpf's relevant ideas. Before Simon, already Toynbee<sup>176</sup> had refuted Rumpf's hypotheses, Koepfel (1969) too, who followed

<sup>174</sup> M. BERGMANN 1981, 26, with n. 34 (quoted *verbatim supra*, n. 169), quoting: E. SIMON 1960, 135 (quoted *verbatim infra*, n. 175); and E. KELLER 1967, 215 (quoted *verbatim infra*, n. 177); cf. p. 19 for her bibliography.

<sup>175</sup> the hypotheses, published by A. RUMPF 1955-56, 112f., were refuted by F. MAGI 1955-56, 309ff. - as stated by E. SIMON 1963, 12, - in her bibliography, who herself described the togate youth's shoes as 'einfache militärische Schuhe', and who identifies the young man as Domitian.

Cf. SIMON 1960] 134-135 (where she likewise discussed the hypotheses of A. RUMPF, *op.cit.*): "Nur das Bildnis des Vespasian in [Frieze] B steht unumstritten fest. Den jugendlichen Togatus vor ihm hält Rumpf nicht für Domitian, sondern für eine Idealgestalt [with n. 3, quoting: A. RUMPF 1955-56, 114ff.]. Er sei die Personifikation des Ritterstandes, dem Vespasian entstamme. Sein Gesicht sei so allgemein gehalten wie das des Liktors zu seiner Rechten. Das läßt sich - nicht nur vor dem Original - eindeutig widerlegen und wurde von Magi und Toynbee bereits zum Teil getan [with n. 4: "Die Entgegnung von Magi Bjb 155/56, 1955/45 (Teil II) 309ff."]. Die Augen des Togatus sind größer als die des Liktors und liegen tiefer. Sein Gesicht ist in allen Einzelzügen klar durchgeformt, wirkt schmaler und edler. Durch die ersten Bartlocken an Wangen und Kinn erhält er etwas Besonderes und Zartes [with n. 5]. Sein Haupthaar zeigt weder die kurzen Strähnen des Liktors noch die Lockenfülle der beiden Genien, die ihn umrahmen und denen er als Idealgestalt doch ähneln müßte. Es ist sorgfältig zu jener bestimmten Frisur zurechtgelegt, die in den beiden Friesen nur noch einmal wiederkehrt: bei dem Imperator [*i.e.*, Domitian, now Nerva; cf. here Fig. 1; Figs. 1 and 2 drawing: figure 6] in [Frieze] A. Die Haare sind nach vorn gekämmt und umrahmen in zwei Wellenreihen Schläfen und Stirn. Es ist die *coma a gradus formata*, die für zwei Kaiser, Nero und Domitian, bezeichnend war. Der jugendliche Togatus vor Vespasian ist sein Sohn Domitian. An dieser Tatsache kann auch die Beobachtung der Schuhe nichts ändern, auf die Rumpf großen Wert legt. Der Jüngling besitzt nämlich nicht die *calcei senatorii* mit Riemen und Schleifen wie Vespasian. Seine Schuhe sind einfache *calcei* mit überfallenden 'Gamaschen', wie sie die Liktoren tragen oder der Imperator [*i.e.*, Domitian, now Nerva] in [Frieze] A zu seiner militärischen Kleidung. Dort seien sie angebracht, nicht aber in Verbindung mit der civilen Toga. >>Nie hätte der eitle Domitian einen solchen Schnitzer verziehen.<< Rumpf hat übersehen, daß dieselben einfachen *calcei* auch von dem Genius Senatus getragen werden, der als Togatus hinter dem Jüngling steht. Und dem Schutzgeist des Senats kämen doch in erster Linie Senatorenschuhe zu, wie er sie in [Frieze] A auch wirklich besitzt [with n. 6, providing a reference]. Genius und Kaisersohn [*i.e.*, the young Domitian; figure 12] legen also in [Frieze] B eine Art 'understatement' an den Tag. Diese Besonderheit darf bei einem staatlichen Monument nicht dem Steinmetzen in die Schuhe geschoben werden, sondern war von oben befohlen. Wodurch könnte dieser auffällige Schuhwechsel veranlaßt sein? Besagte er vielleicht, daß man sich in Rom damals in einer außergewöhnlichen Lage befand, zu der die zivilen Senatorenschuhe nicht paßten? Rom war im Jahr vor dem Einzug des Vespasian Kriegsschauplatz gewesen. Geben die einfachen militärischen Schuhe des Jünglings und des Senats vielleicht einen Hinweis auf den gemeinsam durchgestandenen Kapitolinischen Krieg? Wie dem auch sei: sicher ist, daß sich Domitian und Senat durch diese Abweichung von der Regel nahe zusammenschließen ...".

Cf. E. SIMON 1963, 9-10, quoted *verbatim infra*, at n. 181 and at n. 456, in Chapter III.

<sup>176</sup> J.M.C. TOYNBEE 1957, 7-8, with n. 7 on p. 7 and ns. 1-2 on p. 8: "In a recent essay on our reliefs [with n. 7, quoting: A. RUMPF 1955-56, pp. 112ff.] A. Rumpf rejects the identification of the young man at the centre of Frieze B [cf. here Figs. 1 and 2 drawing: figure 12] with Domitian. Discounting the hair-style, which, if not peculiar to Domitian, is at any rate distinctive of him and is worn by no other figure in either of these friezes, and failing, so it seems, to appreciate the portrait-like appearance of the head, Rumpf argues that the simple half-boots worn by this youth instead of the senatorial boots (*calcei senatorii*), which Vespasian affects, rule out Domitian and proclaim this to be the personification of the *ordo equester*, to whom such footwear was well suited. **It is indeed a fact that in 70 Domitian was urban praetor and a member of the Senate and therefore entitled to senatorial boots. But it is no less true that from 69 until his accession, as coin-types and coin-legends show, Domitian was also *Princeps Iuventutis*, a title that marked him out from other senators as heir presumptive to the Empire and with which equestrian activities were definitely connected** [with n. 1, quoting references]. If these details of footwear are significant, as is very likely to be the case (although we may ask why the *Genius Populi Romani* goes bare-foot in this frieze, but is booted, as we shall see, in the companion frieze [A]), it could well have been to emphasize his special role as *Princeps Iuventutis* that Domitian had himself depicted here as shod like a rider. Again, it is difficult to understand why Vespasian should, as senator and Emperor, have still insisted so strongly upon his own equestrian origin [with n. 2, quoting: "Suetonius, *Vesp.* 2".] as to make his greeting of that Order the central feature of his *adventus* ceremonies in 70, with Senate and People, according to Frieze A, thrust well into the background behind the Knights' representative. Here, as in Frieze A, as we shall find, **the citizens of Rome are represented by the pair of personifications of *Senatus Populusque Romanus***; the intermediate Order does not appear; **and if the**

Toynbee, refuted them (quoted *verbatim supra*), and Keller<sup>177</sup>, who herself, like all the other scholars listed here, identified the togate youth with Domitian, had also followed Toynbee.

I myself follow Toynbee as well by assuming the following, 1.) the togate youth on Frieze B - as suggested by Magi - should be identified as the young Domitian, 2.) Domitian - as suggested by Toynbee - had commissioned the artists to represent him (*i.e.*, Domitian) on Frieze B with these - for a senator, as the *praetor urbanus* was, 'wrong shoes' - in order to stress the fact that he also had been elected as *Princeps Iuventutis*, for whom, being in close relation with the *ordo equester*, the wearing of those 'simple *calcei*' was appropriate (to this I will come back below).

**Finally Bergmann<sup>178</sup> questions Rumpf's hypothesis that, because of the shoes he is wearing, this togate youth on Frieze B could represent an *eques*<sup>179</sup>. In Bergmann's opinion, the assumption, to see an *eques* in this figure, cannot be verified, because this young man is not shown as wearing a (golden) ring. Bergmann<sup>180</sup> therefore concludes, that this 'ideal' figure of a youth cannot possibly be identified as a high ranking Roman magistrate.**

Before Bergmann wrote her article (of 1981), it was for example Simon (1960, 134-135 and 1963, 10), who had identified the togate youth on Frieze B as such a high ranking Roman magistrate. Acknowledging that the head of this youth is his portrait, and being well aware of the specific kind of shoes he is wearing (called the 'simple military shoes' by her), she identified this figure as Domitian, shown in his capacity as *praetor urbanus*, an office, that Domitian held starting on January 1st, 70 AD (cf. *infra*). But because Simon knew

footgear of this youthful figure is not inapposite to Domitian, in view of the above consideration, his features and hair-style and the conspicuous way in which he balances Vespasian are far more appropriate to that imperial prince than to any personification. We need not assume, with Rumpf, that two imperial persons invariably greeted one another with a handshake [my emphasis]".

<sup>177</sup> E. KELLER 1967, 211: "Der mit Toga und Senatorenschuhen bekleidete Kaiser [*i.e.*, Vespasian on Frieze B] kommt von rechts ... Dem Kaiser gegenüber steht sein jugendlicher Sohn [*i.e.*, Domitian], ebenfalls als Togatus, doch in einfachen Schuhen, wie sie die Ritter zu tragen pflegen"; cf. p. 215: "Es bleibt die Frage, wer mit der Personifikation des bärtigen Togatus [*i.e.*, the here-so-called *Genius Senatus*] gemeint sein kann. Auffallend ist, daß ebenso wie er auch Domitian einfache *calcei* trägt, obwohl letzterer als Stadtpräfekt berechtigt gewesen wäre, die Senatorenschuhe anzulegen. Man hat versucht, die Schuhe Domitians aus der Tatsache zu erklären, daß er als *Princeps Iuventutis* aufgefaßt werden wollte [with n. 1: "So Toynbee, The Flavian Reliefs [1957], 8", quoted *verbatim supra*, n. 176.]. Als solcher steht er in enger Verbindung zum Ritterstand und trägt deshalb auch einfache *calcei*".

<sup>178</sup> M. BERGMANN 1981, 26-27: "**Der Domitian/Vespasian [on Frieze B] Gegenüberstehende** [*i.e.*, the togate youth; here **Figs. 1 and 2 drawing: figure 12**] ist zwar etwas kleiner als der Kaiser, doch sind beide zusammen durch ihre Größe und durch die Komposition gegenüber den anderen nicht göttlichen Figuren hervorgehoben und als Hauptakteure bezeichnet. Die Handlung zwischen den so Hervorgehobenen war als Begrüßung verstehbar, solange es sich um die Begegnung von zwei Kaisern [!] handelte. Nun aber steht vor dem Kaiser ein Mann, dessen Funktion schwer zu erkennen ist. Er trägt die einfachen *Calcei*, ist also nicht senatorischen Ranges [with n. 34, discussed and quoted *verbatim supra*, at n. 169]. Er trägt keinen Ring, während der Ring des Kaisers in beiden Friesen angegeben ist. Ob man daraus schließen darf, daß er auch nicht ritterlichen Rang hat [with n. 35, providing references for the *ordo equester*], oder ob der Ring als Geringfügigkeit fehl- [page 27] en kann, ist schwer zu beurteilen. Ob er im übrigen der Inhaber eines höheren Ritteramtes sein könnte, hängt davon ab, wie man sein Alter einschätzt. Solange er als Domitian galt, deutete man den Bartflaum auf Wangen und Kinn gern als Jugendbart [with n. 36, providing references], d. h. [das heißt = *i.e.*] als den Bartflaum, der bei der zeremoniellen ersten Rasur, der *depositio barbae*, abgenommen wurde. Nach den bekannten Beispielen fand diese Zeremonie zwischen dem 18. und 24. Lebensjahr statt [with n. 37, providing examples]. Wäre die Bartracht hier so zu verstehen, könnte der Mann nicht Inhaber eines höheren Ritteramtes sein, denn Ritter hatten in diesem Alter militärische Posten inne [with n. 38, providing references; my emphasis]". She then discusses the fact that, at the time, such "*barbulae*" had also been fashionable, concluding:] "Das Bärtchen des Mannes [*i.e.*, of the togate youth] vor Domitian [*i.e.*, Vespasian; here **Figs. 1 and 2 drawing: figure 14**] kann also Mode sein, die nicht auf sein Alter um 20 Jahre schließen läßt". M. BERGMANN'S final conclusion is quoted *infra*, at n. 193.

<sup>179</sup> BERGMANN does not discuss that RUMPF 1955-56, 114 (quoted *verbatim supra*, n. 172) identified the togate youth on Frieze B as the (alleged) allegorical figure *Ordo Equester*, but asserts that the here-so-called *Genius Senatus* of Frieze B has allegedly been identified by 'some' scholars (without quoting them) as the *Ordo Equester* (so far example by G.M. KOEPEL 1984, 7, quoted *verbatim supra*, n. 172), cf. BERGMANN 1981, 29 with n. 52. Her relevant idea is discussed *supra*, n. 127.

<sup>180</sup> M. BERGMANN 1981, 26-29; pp. 27-28, writes: "Man kann demnach nur feststellen, daß dem Kaiser [in her opinion, originally Domitian, now Vespasian, on Frieze B; here **Figs. 1 and 2 drawing: figure 14**] ein Mann gegenübersteht, der keines der höchsten Ämter der Stadt innehat. Darf solch ein Mann als einziger Vertreter Roms umgeben von Symbolfiguren einen siegreich ankommenden Kaiser begrüßen und mit ihm über andere hinausgehoben werden? Die antiken Beschreibungen berichten, wie bei solchen Anlässen das Volk und uterque *ordo* den Herrschern vor die Stadt entgegenziehen [with n. 43, providing references]. Eine Begrüßung wird man sich aber nur durch hohe Beamte vorstellen können, >>Volk<< in der Mehrzahl und akklamierend. In den wenigen erhaltenen Adventusdarstellungen [with n. 44, providing a reference] wird der Kaiser von Personifikationen erwartet und begrüßt ...".

Rumpf's arguments concerning the shoes, the young Domitian is wearing on this panel - she quoted A. RUMPF 1955-56 in her bibliography - Simon (1963, 10) suggested the following:

"Rom war im Jahre vorher, dem berüchtigten Vierkaiserjahr, Kriegsschauplatz gewesen. Der achtzehnjährige Domitian hatte sich dort aufgehalten und angeblich den >Kampf um das Kapitol<, den er später in einem Epos schilderte, mitgekämpft. Die einfachen militärischen Schuhe, die Domitian und der Genius senatus im Fries tragen, spielen vielleicht darauf an". ('Rome was in the previous year, the notorious year of the four Emperors, at war. The eighteen year old Domitian was there and had allegedly fought in the 'battle for the Capitoline', which he later described in an epic. The simple military shoes, which Domitian and the *Genius Senatus* are wearing on the Frieze [B], possible allude to this fact'). For this quote from Simon (1963, 10); cf. also *infra*, at n. 456, in Chapter III.).

For those events in great detail; cf. *supra*, in Chapter *Preamble*, Section III.; at point 1.); and *infra*, in volume 3-2, at *Appendix I*.

After this *Chapter* was written up to this point, I found that, according to Eric M. Moormann (2022,, 150), Domitian, before himself becoming emperor, had actually written some literary texts. In his **note 93**, Moormann writes: "See, for example, Coleman (1986); Nauta (2002) 328 ...".

For a discussion of Domitian's literary texts; cf. *supra*, in Chapter *Preamble*; at Section II.; and *infra*, in volume 3-2, at *Appendix I.d.1.a*); and at *Appendix IV.d.4.b*).

According to Simon (1963), who assumed that Frieze B shows Vespasian's *adventus* into Rome in AD 70, the young Domitian is represented on this frieze because, as *praetor urbanus*, the highest ranking magistrate currently present at Rome (the *consules*, Vespasian and Titus, being both absent because conducting wars), he is holding the appropriate office to welcome the new emperor. Simon further assumed that the young Domitian is accompanied on Frieze B by the *Genius Senatus* and the *Genius Populi Romani* (cf. *infra*, n. 181). -

But note that, contrary to Simon's just quoted assertion, Titus was not *consul* at that stage, although it is true that he was conducting a war (cf. *infra*, n. 413, at Chapter III.).

In her article of 1985 it becomes apparent that, in the meantime, Simon had changed her mind concerning the identification of four of the figures on Frieze B: the emperor (following Bergmann 1981, she now assumed that his head had originally been a portrait Domitian, recut into Vespasian), the togate youth, as well as the here-so-called *Genius Senatus* (whom she now identified as Rome's mythical King Numa Pompilius), and the *Genius Populi Romani* (whom she now identified as *Honos*). Of her earlier interpretations of the figures on Frieze B, only one had remained the same: Simon still identified the amazon-like figure on Frieze B as *Dea Roma*, whereas she now identified the amazon-like figure on Frieze A as *Virtus* instead. Simon now identified the togate youth on frieze B as an anonymous *eques* of the *gens Flavia*, whom Domitian (now Vespasian), as *pontifex maximus*, by the gesture of his right hand, installs as an 'anonymous representative' of a new priesthood of the imperial cult, the *Sodales Flaviales Titiales*. In Simon's opinion, the scene, visible on Frieze B, is staged on the Roman Forum.

To understand Simon's hypothesis (1985), we need to recall the following. After the death of the Emperor Titus, his younger brother Domitian had succeeded him as emperor. Domitian immediately ordered the divinization of Titus and the foundation of this new college of priests, whose duty it was, to perform the cult for the new state god, *Divus Titus*. Hölscher (2009a; cf. *infra*, at n. 182) has refuted Simon's hypothesis. He convincingly argues that, to install another, anonymous person, for this kind of office, made no sense in this specific case. Because Domitian was himself a member of this college of priests by being its president, apart from the fact that all its members were high ranking personalities, which is why, as Hölscher adds, the representative of this priesthood should have been depicted as wearing the *calcei senatorii*. Provided, there actually was another representative of this priesthood, in addition to Domitian, its president - we might add - as Hölscher himself argues.

Simon (1985), in her turn, has refuted Hans-Werner Ritter's hypothesis concerning the interpretation of Frieze B. Also Ritter (1982) followed Bergmann (1981) in so far, as he assumed that the emperor on Frieze B had originally been Domitian, whose portrait had later been recut into that of Vespasian. But contrary to Bergmann (1981), Ritter identified the here-so-called *Dea Roma*, *Genius Senatus* and *Genius Populi Romani* on Frieze B likewise as such. Ritter interpreted the scene on Frieze B as an important religious ceremony, ordered by the Emperor Vespasian, by which the re-erection of the Temple of *Iuppiter Optimus Maximus* on the Capitoline had been inaugurated.

To understand this idea, we must recall, that 'in A.D. 69 the second temple of *Iuppiter Optimus Maximus* was burned during the storming of the Capitol by the Vitellians' (L. RICHARDSON Jr. 1992; cf. *infra*, n. 181.

For this event, which had occurred on 18th/19th December D 69; cf. *supra*, in Chapter *Preamble*; at Section III.; and *infra*, in volume 3-2, at *Appendix I.d*).

According to Tacitus (*Hist.* 4,53), the ceremony concerning Vespasian's *restitutio Capitolii* took place on the Capitoline on 21st June AD 70; in the course of which was laid the "Grundstein" ('foundation-stone') of the new temple, which Ritter recognized in the *cippus*, on which the *Genius Populi Romani* on Frieze B sets his left foot (cf. here **Figs. 1 and 2 drawing: figure 13**).

At that stage, Vespasian was still in the East, Ritter therefore suggested, that Domitian (cf. here **Figs. 1 and 2 drawing: figure 14**) appears on Frieze B as substitute of Vespasian in the ceremony. But note that Tacitus does not mention Domitian's presence at the ceremony, as Ritter himself admitted. Ritter identified the togate youth in front of Domitian (cf. here **Figs. 1 and 2 drawing: figure 12**) with the *eques* L. Iulius Vestinus, whom, as we know from Tacitus, Vespasian had entrusted with the prestigious office of the *restitutio Capitolii*. In Ritter's opinion, Vestinus, on Frieze B, is depicted as receiving this order from Domitian. Simon (1985) rightly objected to Ritter's hypothesis that Vestinus, at that stage, was a man in his fifties - as Ritter himself had admitted. Ghedini (1986) has added to Simon's critique of Ritter's hypothesis that, in such a case, Frieze B should additionally have represented Helvidius Priscus, since we learn from Tacitus, that this man had performed the relevant sacrifices on the Capitol.

Personally I would like to add another observation: as H.-W. Ritter (1982) had himself mentioned, Domitian was definitely not in Rome on 21st June 70 AD, when that ceremony had taken place, since he had left the City before for his military 'adventure' in Gaul and Germany (for that, cf. *infra*, at **ns. 229, 230**, in Chapter *I.2.*, and *infra*, in volume 3-2, at *Appendix I.c*)). I am mentioning this here, because Fehr (1998, 727-728, quoted *verbatim infra*, n. 459, in Chapter III.), in his turn, has suggested an explanation for Frieze B, that was based on Ritter's hypothesis.

Fehr (1998) followed likewise Bergmann (1981) in so far, as he assumed that the emperor on Frieze B had originally been Domitian, whose portrait had later been recut into that of Vespasian. Fehr's scenario has the advantage that, in theory, Domitian in this case could actually have had a chance to be present at the relevant ceremony. In Fehr's opinion, Domitian (now Vespasian) on Frieze B gives with the gesture of his right hand, "an einen hierfür kompetenten Mitbürger" ('to a competent fellow-citizen', *i.e.*, to the togate youth in front of him; cf. here **Figs. 1 and 2 drawing: figures 14 and 12**), the *mandatum* to rebuild - again - the (fourth) Temple of *Iuppiter Optimus Maximus* on the Capitoline.

To understand his idea, we need to remember, that the third temple, shortly before erected at Vespasian's order, had also been destroyed (in 80 AD), and that Domitian built the fourth temple. Fehr has come to this conclusion, *inter alia* because, following Simon (1985), he identified the here-so-called *Genius Senatus* (cf. here **Figs. 1 and 2 drawing: figure 11**) on Frieze B with Numa Pompilius. Consequently, he did not recognize the *Genius Populi Romani* on Frieze B (cf. here **Figs. 1 and 2 drawing: figure 13**) as such. Fehr referred to this figure as the god Terminus instead, who sets his left foot on his own altar, thus making clear with his gesture, that he is determined never to leave this place. Terminus was the god, who had not agreed to cede his place to Jupiter, when the first Temple of *Iuppiter Optimus Maximus* on the Capitoline was being built, which is why his altar had to be integrated within the temple of Jupiter. In Fehr's opinion, his assumption

identifies the locale, represented on Frieze B, as the *Capitolium*. Also the presence of Numa Pompilius in this scene, according to Fehr, is understandable, since Numa was believed to have founded many religious institutions, for example the festival in honour of the god Terminus, called *Terminalia*, and, according to others, even the cult of Terminus itself, as well as the priesthood of the Vestal Virgins, to whom so much space has been dedicated on Frieze B (cf. here **Figs. 1 and 2 drawing: figures 3; 4; 5; 6; 7**).

**We have no literary sources that report on a public ceremony, connected with Domitian's order to build the fourth Temple of Iuppiter Optimus Maximus on the Capitolium.**

Hölscher (2009a; cf. *infra*, at n. 182) has also refuted Fehr's (1998) relevant hypothesis. Besides, the fact that already the Emperor Titus had begun with the erection of the (fourth) Temple of Iuppiter Optimus Maximus Capitolinus, we should rather expect that Titus would have celebrated such a ceremony.

Cf. *infra*, in volume 3-2, at Appendix I.g.4.) Domitian's sacellum of Iuppiter Conservator, his Temple of Iuppiter Custos, and his (fourth) Temple of Iuppiter Optimus Maximus Capitolinus (cf. here **Fig. 83**). With The first Contribution by Peter Herz;

and below, at *The first Contribution by Peter Herz on the inscription (CIL VI 2059.11)*, which reports on a meeting of the Arvel brethren on 7th December 80 at the Temple of Ops in Capitolio, among them Titus and Domitian: Titus vows to restore and dedicate what would become Domitian's (fourth) Temple of Iuppiter Optimus Maximus Capitolinus.

Simon (1985, 543), wrote: "McCann [1972] machte die Beobachtung, daß das Bildnis des Vespasian des Frieses B aus einem anderen umgearbeitet ist"; and elsewhere (cf. p. 545), after refuting H.-W. Ritter's hypothesis (1982): "Er [*i.e.*, the emperor on Frieze B: Domitian in her opinion, later reworked into the extant portrait of Vespasian; here **Figs 1 and 2 drawing: figure 14**] nimmt vielmehr als Pontifex Maximus in Anwesenheit der Vestalinnen eine sakralrechtliche Handlung vor: Er ernennt eine Priesterschaft für den Kult des neuen Divus, die Sodales Titiales [with n. 17, providing references]"; she elsewhere (cf. pp. 548-549) interpreted the gesture of the Emperor 'Domitian' (now Vespasian) on Frieze B as: "priesterliche Gebärde ... Im Zusammenhang des Frieses B bedeutet das, daß der Pontifex Maximus [*i.e.*, 'Domitian' / Vespasian] den vor ihm stehenden Togatus [*i.e.*, the togate youth on Frieze B, in my opinion Domitian; here **Figs. 1 and 2 drawing: figure 12**] in das Kollegium der Sodales Flaviales Titiales beruft. Gemeint ist kein bestimmter Mann, sondern ein >>anonymer Repräsentant<< jener Priesterschaft [with n. 27], deren Mitglieder wegen des gentilen Charakters des dennoch hochpolitischen Kultes der Gens Flavia angehörten".

In her **note 27**, Simon (1985, 549) wrote: "Aus diesem Grunde dürfte der junge Flavier [*i.e.*, the togate youth on Frieze B] die domitianische Modefrisur tragen, die so bei keinem anderen Mann in der Umgebung des Kaisers in den Friesen A und B zu beobachten ist. Sie hat die Forschung lang auf eine falsche Fährte gelockt. Im Zusammenhang des Frieses sagte sie für den antiken Betrachter nur aus, daß der Togatus einer aus der Gens Flavia ist. Er gehört in den Zwischenbereich zwischen realen und idealen Gestalten, der im römischen Staatsrelief auch sonst zu beobachten, aber noch nicht genügend definiert ist [with n. 28, providing references]"; she identified elsewhere the here-so-called *Genius Populi Romani* on Frieze B (with n. 32; with her Abb. 1) as *Honos*, the amazon-like figure on Frieze B (with her Abb. 6) as *Dea Roma*, and the amazon-like figure on Frieze A (with her Abb. 7 and n. 34, providing references) as *Virtus*; she identified the here-so-called *Genius Senatus* on Frieze B (with her Abb. 3) as Numa Pompilius, and wrote elsewhere: "Die Gens Pompilia war wie die Gens Flavia ein nichtpatrizisches sabinisches Geschlecht. Das Fehlen der calcei patricii bei dem Bärtigen [*i.e.*, the here-so-called *Genius Senatus* on Frieze B] wie bei dem dicht vor ihm stehenden flavischen Gentilpriester [*i.e.*, the togate youth on Frieze B, in my opinion, Domitian] schließt die beiden Figuren zusammen zu einem understatement mit positiver Aussage: Die Flavier haben keine patrizischen Ahnen, aber sie stammen wie Numa aus einer alten, tüchtigen sabinischen Gens ... die Szene auf [Frieze] B spielt nach allem, was oben ausgeführt wurde, auf dem Forum [Romanum]. Denn dort lag das Vestaheiligtum und dort, in der benachbarten Regia, war der Amtssitz des Pontifex Maximus"<sup>181</sup>.

<sup>181</sup> E. SIMON 1963, the quote is from p. 10 (quoted *verbatim* in more detail *infra*, at n. 456, in Chapter III.); cf. E. SIMON 1960, 135, quoted *verbatim supra*, n. 175.

Francesca Ghedini (1986, 298; cf. n. 181) followed likewise Bergmann (1981) in so far, as she assumed that the emperor on Frieze B had originally been Domitian, whose portrait had later been recut into that of Vespasian. But contrary to Bergmann (1981), Ghedini identified the here-so-called *Dea Roma*, *Genius Senatus* and *Genius Populi Romani* on Frieze B likewise as such. Ghedini suggested that Frieze B shows the *consecratio* of the Temple of Fortuna Redux, that is to say, the temple, which Domitian, after his victory in the Sarmatian War (93 AD), had built on the *Campus Martius*. She, therefore, identified the togate youth on Frieze B with a magistrate *cum imperio* of the *ordo equester*, who, in the represented moment, is asked by the Emperor Domitian, who acts as *pontifex maximus*, to speak the ritually prescribed formula at that ceremony.

Ghedini (1986, 298) wrote: "Per perfezionare l'atto giuridico-religioso che costituiva la *consecratio* doveva infatti essere presenti entrambi i contraenti: il pontefice, in quanto garante dell'accettazione della offerta da parte degli dei, e un magistrato *cum imperio*, che rappresentava lo stato romano che cedeva il suolo pubblico sul quale sarebbe sorto il nuovo luogo di culto ... [with n. 119]"; and elsewhere: "Domiziano, in veste di pontefice massimo, invita il magistrato di rango equestre [*i.e.*, the togate youth on Frieze B], come denunciano le calzature, a ripetere le formule rituali della *consecratio*, che appunto il rappresentante dell'autorità civile pronuncia dopo il pontefice; in tal modo risultano pienamente comprensibili sia il discusso gesto che l'imperatore compie con la mano destra, che ben traduce l'atto dell'invito, sia il movimento dei littori al centro del rilievo che vogliono richiamare l'attenzione delle sacerdotesse [*i.e.*, the Vestal Virgins] sul rito che sta per compiersi. Assistono allo storico episodio il Senato ed il Popolo Romano, nella sintesi delle loro personificazioni [with n. 121, summarizing the *status quaestionis* concerning their identifications], assieme alle Vestali, custodi dei *pignora imperii* e garanti della *pax deorum*, mentre Roma, seduta in trono, partecipa immobile e beneaugurante alla scena". Also Ghedini's hypothesis has been refuted by Hölscher (2009a; cf. *infra*, n. 182). As Hölscher rightly observed, on Frieze B `of *Fortuna* nothing is visible,

---

For the Regia, cf. now E. CARNABUCI 2012.

Cf. H.-W. RITTER 1982, 25-26 (for the revolt in Germany, that had caused Domitian's military 'adventure' in 70 AD); pp. 25, 26, 30 (for his identification of the togate youth on Frieze B (here **Figs. 1 and 2 drawing; figure 12**) as the *equus* L. Iulius Vestinus); p. 31 (in 70 AD, L. Iulius Vestinus must have been in his fifties); p. 26 (on the ceremony of the *restitutio Capitolii* on 21st June 70 on the Capitoline [Tacitus, *Hist.* 4.53]: the sacrifices were performed by Helvidius Priscus); pp. 26-27 (following M. BERGMANN 1981, RITTER identifies the emperor on Frieze B with Domitian, whose portrait was, in his opinion, recut into that of Vespasian); p. 32: he identifies the here-so-called *Genius Senatus* and the *Genius Populi Romani* on Frieze B as such, "so daß man sozusagen SPQR lesen kann [with n. 49, quoting my late supervisor, A. LINFERT 1969, 62 n. 5, for an idea, which was very typical of him: namely to read the presence of both *Genii* together as: "SPQR"]. Dagegen scheint mir geringer zu wiegen, daß ihre Attribute und ihre Schuhe nicht mit denen der entsprechenden Genien im Fries A übereinstimmen [with n. 50, providing references]"; pp. 26, 32 (for his idea to identify the here-so-called *cippus*, on which the *Genius Populi Romani* sets his left foot, as "Grundstein" ('foundation stone') for Vespasian's Temple of *Iuppiter Optimus Maximus Capitolinus*); p. 34: he identifies the *Dea Roma* as such on Frieze B.

Apropos the idea to read the *Genius Senatus* and the *Genius Populi Romani* together as "SPQR": as I only realized much later, before Andreas Linfert (1969), this has already been suggested by J.M.C. TOYNBEE 1957, 7-8, quoted *verbatim supra*, n. 176.

Cf. E. SIMON 1985; the quotes are from pp. 543, 544 (discussing the hypotheses suggested by H.W. RITTER 1982); p. 544: RITTER 1982 regards in the Emperor on Frieze B "mit Bergmann [1981] überzeugend einen ursprünglichen Domitian"; cf. p. 544: Lucius Vestinus "müßte im Jahre 70 >>die Fünfzig überschritten haben<< [with n. 31, quoting H.W. RITTER 1982, 31]"; cf. p. 545 with n. 17; p. 546 and Abb. 1; pp. 549-550 with ns. 32, 33 (on the here-so-called *Genius Populi Romani*: which is identified as *Honos*); cf. p. 550: the amazon-like figure on Frieze B, Abb. 6, is identified as *Dea Roma*; cf. pp. 550-551 with n. 34, Abb. 7, the amazon-like figure on Frieze A is identified as *Virtus* (contrary to her earlier interpretations in her publications of 1960 and 1963, where SIMON, in my opinion correctly, identified both figures with the *Dea Roma*, SIMON here stresses the great differences of the iconographies of the amazon-like figures on both panels. For the iconography of the *Dea Roma* on Frieze B, cf. *infra*, at Chapter V.1.1); cf. p. 551-552, Abb. 3: the here-so-called *Genius Senatus* is identified as Numa Pompilius; cf. p. 552 (on Numa Pompilius, the *gens Pompilia* and the *gens Flavia*).

Cf. F. GHEDINI 1986. The two quotes are from p. 298; p. 298 (on her discussion of the hypotheses, published by H.-W. RITTER 1982); p. 298 (for her identifications of the *Dea Roma* on Frieze B as such, of the *Genius Senatus* on Frieze B as such, and of the *Genius Populi Romani* on Frieze B as such).

For the Temple of *Iuppiter Optimus Maximus* on the Capitoline and its various restorations, cf. L. RICHARDSON 1992, 221-224 s.v. *Iuppiter Optimus Maximus (Capitolinus)*, Aedes, Fig. 19; G. TAGLIAMONTE: "*Iuppiter Optimus Maximus Capitolinus*, Aedes, Templum (fino all'a.[anno] 83 a.C.)", in: *LTUR* III (1996) 144-148: this was the (first) archaic temple that was completely destroyed by fire on 6th July 83 BC. Cf. S. De ANGELI: "*Iuppiter Optimus Maximus Capitolinus*, Aedes (fasi tardo repubblicane e di età imperiale)", in: *LTUR* III (1996) 148-153: the (second) temple was dedicated by Quintus Lutatius Catulus in 69 BC For the events on 18th/19th December AD 69, that led to the destruction of the (second) Temple of *Iuppiter Optimus Maximus Capitolinus*, cf. *infra*, in volume 3-2, at *Appendix I*; the (third) temple was built by Vespasian, which in its turn was destroyed by the fire of AD 80; the (fourth) temple was built by Domitian.

and to delegate the foundation [*i.e.*, of the Temple of *Fortuna Redux*] to another person does not seem to be a plausible theme for a monument, that was erected to glorify the emperor'.

Hölscher (2009a; cf. *infra*, n. 182), in developing his own hypothesis to interpret the scene visible on Frieze B, does not accept Bergmann's conclusion, that the togate youth on Frieze B cannot represent a high ranking Roman magistrate, although he follows some of her other suggestions, for example that on Frieze B the (alleged) original head of Domitian had been recut at the order of Nerva into a portrait of Vespasian. But contrary to Bergmann (1981), Hölscher identified the here-so-called *Dea Roma*, *Genius Senatus* and *Genius Populi Romani* on Frieze B likewise as such. Hölscher has refuted the above-mentioned hypotheses concerning Frieze B by Simon (1985) and Ghedini (1986), and presumably also that by Fehr (1998), by writing:

"Di più ardua esegesi il fregio B. Dope [di] che si è verificato come anche qui in origine Domiziano fosse il protagonista principale [meaning, that the main protagonist's head on Frieze B was originally Domitian, that was only later reworked into a portrait of Vespasian], **sono state avanzate diverse proposte, tutte non impeccabili** [my emphasis]. Secondo Erika Simon [1985], Domiziano conferisce al togato davanti a lui [*i.e.*, the togate youth on Frieze B] la carica di rappresentante del collegio per il culto imperiale, i *Sodales Flaviales e Titiales*. Ma, visto che Domiziano stesso apparteneva a questo collegio in funzione di presidente, tale investimento di un altro anonimo rappresentante non pare del tutto ragionevole; poiché inoltre si componevano di membri distinti, il loro rappresentante dovrebbe calzare scarpe senatorie e non semplici calcei".

Hölscher (2009a) does not provide a reference for Simon, but her article of 1985 is listed in his bibliography. There we find also Ghedini (1986), whose relevant hypothesis Hölscher discusses immediately after Simon's (cf. *infra*), again without providing a reference. But because Hölscher does not only speak of *two*, but of: "*diverse proposte, tutte non impeccabili* [my italics]", concerning the interpretation of Frieze B, and mentions, in addition to Simon and Ghedini, also "Fehr 1998" in his bibliography, I have concluded above, that Hölscher, with the just quoted remark, had also refuted Fehr's (1998) hypothesis. I am suggesting this here - although Hölscher does not explicitly address Fehr's ideas in his text - because Hölscher has objected to Ghedini's scenario, that on Frieze B 'of *Fortuna* nothing is visible': personally, I agree with Hölscher's relevant judgment. In my opinion, Hölscher could therefore analogously have thought about Fehr's proposal, that on Frieze B, also 'of *Iuppiter Optimus Maximus Capitolinus* nothing is visible'.

For the time being, I maintain my assertion that Hölscher (2009a) has refuted also the hypothesis of Fehr (1998), *a*) because Hölscher has quoted "Fehr 1998" in his bibliography, and *b*) because Hölscher, as a result of his above quoted judgement - instead of following Fehr's hypothesis, for example - has himself suggested a *new* hypothesis to explain the scene, which is depicted on frieze B. - Only after I had written this *Chapter* so far, did I realize that my relevant assumption is most probably true, since Hölscher (2009a, 56; cf. *infra*, n. 316, in Chapter II.1.c)) follows also Bergmann (1981) in assuming that Nerva had ordered the head of the emperor on frieze B (in her opinion previously a portrait of Domitian) to be recut into a portrait of Vespasian; again, Hölscher does not quote Bergmann for that in his text, but lists only her publication in his bibliography.

Be all that as it may !

I should like to borrow here Hölscher's phrase, which relates to the hypothesis of Ghedini (1986; *i.e.*: 'of *Fortuna* nothing is visible' on frieze B), I apply that to the hypothesis of Fehr (1998), by saying myself that: on frieze B, also of *Iuppiter Optimus Maximus Capitolinus* nothing is visible. And this is the reason, why I myself do not find Fehr's hypothesis convincing.

Hölscher (2009a) continues immediately after that: "Stando invece a una più recente intuizione di Francesca Ghedini [1986], Domiziano è rappresentato in occasione del ritorno dalla guerra sarmatica nell'atto di

ordinare a un magistrato di rango equestre di pronunciare le formule religiose per la fondazione del Tempio di *Fortuna Redux*. Ma di *Fortuna* niente si vede, e delegare la fondazione a un'altra persona non sembra un tema plausibile per un monumento a gloria dell'imperatore".

Hölscher (2009a) himself identifies the togate youth on Frieze B as the *praefectus urbi*, who has come, together with the *Genius Senatus* and the *Genius Populi Romani*, to greet Domitian. Hölscher adds that 'considering that this magistrate [*i.e.*, the togate youth on Frieze B; cf. here **Figs. 1 and 2 drawing; figure 12**] belonged to the equestrian order, this explains his wearing of the simple shoes'. Because Hölscher argues with the "scarpe semplici"<sup>182</sup>, the togate youth is wearing, my first impression was that his words "*Praefectus urbi*" must be a typographic error, since we know that the *praefectus urbi* "was always a senator ... usually a senior ex-consul", as stated by Theodore John Cadoux and R.S.O. Tomlin<sup>183</sup>. A *praefectus urbi* should, therefore, always have been represented as wearing the *calcei senatorii*. - Apart from the fact that the togate 'youth' is much too young to have possibly represented "a senior ex-consul".

Looking for an explanation, why Hölscher (2009a) could have suggested that the togate youth on Frieze B should be identified with the *praefectus urbi* of Rome, there seem to be two possibilities: he either did this because of the above discussed remark by Rumpf (cf. *supra*, n. 172 - but, as I only found out later, Rumpf's relevant assertion was based on an error; cf. *infra*, at n. 189), or because scholars (convincingly) assume that on one of the panels of the Arch of Trajan at Beneventum, depicting Trajan's *adventus* into Rome in 99 AD, it is precisely the *praefectus urbi* (cf. here **Fig. 46**), who welcomes the new Emperor Trajan (to the Arch of Trajan at Beneventum I will come back below; cf. *infra*, in Chapter II.3.3.).

Whereas Hölscher (2009a), in a different context that will be discussed below (cf. *infra*, in Chapter III.), actually compares the Cancellaria Reliefs with the just mentioned panel on the Arch of Trajan at Beneventum (cf. here **Fig. 46**), that shows the *praefectus urbi* receiving Trajan at Rome, he does not discuss Rumpf's hypotheses, nor mentions him in his bibliography. It was Rumpf, who (erroneously) wrote about the togate youth on Frieze B: "Also kann er kein Mann senatorischen Ranges sein ... nicht Domitian, der als **praefectus urbi consulari potestate** und als Praetor Zutritt und Vorsitz im Senat hatte [my emphasis]"<sup>184</sup>.

*Praefectus urbi* and *praetor urbanus*<sup>185</sup> had always been two different offices, and we know that Domitian, from 1st January 70, only held one of these, called in his case *praetor urbanus consulari potestate* (cf. *infra*). If

<sup>182</sup> Cf. T. HÖLSCHER 2009a, 58, on the "scarpe semplici", the togate youth on Frieze B (here **Figs. 1 and 2 drawing; figure 12**), his *Praefectus urbi*, is wearing, and on his assumptions that Frieze B shows the civil *adventus* into Rome of Domitian [in T. HÖLSCHER's opinion reworked in a portrait of Vespasian; here **Figs. 1 and 2 drawing; figure 14**] in AD 81: "**Domiziano dovette essere accolto allora da Senato e popolo, rappresentato dai due Geni, nonché dal Praefectus urbi, riconoscibile nel togato davanti a lui; considerata l'appartenenza di quest'ultimo al ceto equestre, se ne spiegano le scarpe semplici** [my emphasis]". For Hölscher's assumption that the togate youth represents the *praefectus urbi*, cf. also *infra*, in Chapter II.3.3., at ns. 355-358. HÖLSCHER 2009a, 58, mentions the panel of the Arch of Trajan at Beneventum, on which the *praefectus urbi* appears (quoted *verbatim infra*, in Chapter III., at n. 417). For the Arch of Trajan at Beneventum, cf. *infra*, in Chapter II.3.3., at ns. 359-361. HÖLSCHER 2009a, 57, discusses Frieze B and the hypotheses of E. SIMON 1985, F. GHEDINI 1986, and presumably also of B. FEHR 1998 (for HÖLSCHER's bibliography, cf. p. 61, n. 43); on pp. 56, 57, he follows M. BERGMANN 1981 in assuming that Vespasian's portrait on Frieze B has been recut from a portrait of Domitian, and in likewise assuming that the head of the togate youth on Frieze B is not a portrait; p. 56 on the amazon-like representation on Frieze A, that should be identified as Roma or Virtus; p. 57 on the amazon-like representation on Frieze B, that should be identified as Roma; pp. 56-57, for his identifications of the *Genius Senatus* and the *Genius Populi Romani* on Frieze A; p. 57 for these two representations on Frieze B, who, according to him are "probabilmente i Geni del Senato e del popolo".

<sup>183</sup> for this office, cf. T.J. CADOUX; R.S.O. TOMLIN: "*praefectus urbi* 'Prefect of the City' (of Rome)", in: *OCD*<sup>3</sup> (1996) 1239. See for the office *praefectus urbi* also *infra*, in volume 3-2, at Appendix I.a).

<sup>184</sup> A. RUMPF 1955-56, 114 (quoted *verbatim supra*, n. 172). - RUMPF's just quoted formulation: "*praefectus urbi consulari potestate*", was therefore obviously likewise an error, since Domitian held the title: "*praetor urbanus consulari potestate*".

<sup>185</sup> for this office, cf. T.C. BRENNAN: "*praetor*; Republic 'Praetor' (from *prae-ire*, 'to precede', *i.e.* in battle) was originally the title borne by the two republican magistrates who were chosen annually to serve as eponymous heads of state. In 367 BC the Romans, as part of the Licinian-Sextian compromise .... decided to add a patrician 'praetor' as third colleague to these two chief magistrates, who were now (or were soon to be) called 'consuls'. The new praetor held *imperium*, which was defined as being of the same nature as the consuls' but *minus*, 'lesser' in relation to theirs. ... The praetor was, in the (quite common) absence of the consuls from the city, the chief magistrate in Rome and, as such, in charge of the legal system, as well as acting president of the senate and legislative *comitia*; but he also had the right to lead an army ... Plebeians ... were first admitted to the office in 337 [BC] ... In 81 as dictator Sulla raised the number of praetors to eight. He also institutionalized some earlier developments in a scheme aimed at ensuring regular annual succession, in

Hölscher, instead of writing "*Praefectus urbi*", had intended to write "*praetor urbanus*", that too would not help in this context, because also this assumption would imply that the togate youth on Frieze B should have been represented as wearing the *calcei senatorii*. If at all the current magistrate *praetor urbanus* is portrayed in the togate youth on Frieze B, as suggested by Simon (1963; cf. *supra*, at n. 181 and n. 175, and *infra*, at n. 456, in Chapter III.), this is only possible, as suggested by Toynbee (1957), provided this *praetor urbanus* was Domitian in the year 70 AD. Only in his case, this magistrate, who belonged to the senatorial order, could nevertheless have been shown as wearing the 'simple *calcei*', which were typical of members of the equestrian order, because those shoes were appropriate for the *Princeps Iuventutis*, a title, which Domitian likewise held at that time<sup>186</sup> (cf. *infra*). - Not to mention the already discussed possibility (cf. *supra*, at n. 144), that by carving the shoes of the togate youth, the artists had simply made a mistake (!).

**But Hölscher (2009a) interprets Frieze B, of course, very differently than is suggested here.**

Hölscher follows Bergmann (1981) in assuming that the togate youth, standing in front of 'Domitian'/Vespasian [cf. here **Figs. 1 and 2 drawing: figures 12 and 14**], is not a portrait, let alone a portrait of the young Domitian, obviously. Hölscher rather suggests that this panel shows the civil *adventus* of the (alleged) Domitian into Rome in the year AD 81 (at a moment, when Domitian was not as yet emperor). Since the *praefectus urbi*, with whom Hölscher identifies the togate youth, should have been represented as wearing the *calcei senatorii*<sup>187</sup> at this (alleged) public ceremony, Hölscher's interpretation of Frieze B thus proves to be impossible.

*Let's now turn from the individuals, who are possibly represented  
on the Cancellaria Reliefs, to the real historical events*

Barbara Levick<sup>188</sup> writes about the beginning of Vespasian's reign: "Il nuovo governo era diretto, in assenza di questi [*i.e.*, Vespasian], dal figlio diciannovenne Domiziano ... Domiziano divenne pretore con poteri consolari, ma il comando era in realtà nelle mani di Mucianus ...". And Kienast, Eck and Heil write about Domitian: "Wichtige Einzeldaten: 69 Verleihung des Namens Caesar im Osten (Juli oder August), später (21. Dez.[ember]) Anerkennung in Rom und Wahl zum PRINCEPS IUVENTUTIS: DOMITIANUS CAESAR (oder CAESAR DOMITIANUS). In die vier collegia maiora kurz nach Herrschaftsbeginn Vespasians aufgenommen ... [providing a reference]. 1. Jan. 70 praetor urbanus consulari potestate"<sup>189</sup>.

**Because Marianne Bergmann<sup>190</sup> identifies five figures on Frieze B differently than Magi and Simon (1960 and 1963), it follows that, in her opinion, no representatives of the City of Rome are visible on this scene (on Frieze B), who have come to the sacred boundary of the City of Rome (the *pomerium*) to welcome the new emperor. These five figures are in Bergmann's opinion: the Emperor Domitian: his portrait was later reworked at the order of Nerva into that of Vespasian (Magi and Simon 1960; 1963: his head was from the beginning a portrait of Vespasian), an unidentified bearded Genius wearing a *toga* (Magi and Simon 1960; 1963: *Genius Senatus*), the 'ideal' figure of a togate youth, who cannot be a high ranking magistrate, which is why his function is unknown (Magi: Domitian; Simon 1960; 1963: Domitian in his capacity as**

---

which all praetors were restricted to Rome to tend to the city jurisdiction and the various courts ...", in: *OCD*<sup>3</sup> (1996) 1240; cf. A.W. LINTOTT: "*praetor* ; *Caesar and imperial period* ... Under the Principate the praetors retained their traditional republican functions at Rome - performing civil jurisdiction ... and occasionally presiding over the senate ...", in: *OCD*<sup>3</sup> (1996) 1240-1241.

<sup>186</sup> as suggested by J.M.C. TOYNBEE 1957, 7-8 (quoted *verbatim supra*, n. 176).

<sup>187</sup> cf. *supra*, at n. 183.

<sup>188</sup> B. LEVICK 2009, 15; cf. *supra*, n. 171.

<sup>189</sup> D. KIENAST, W. ECK and M. HEIL 2017, 109. Further for Domitian, cf. *supra*, n. 82, and *infra*, n. 304, in Chapter II.1.b).

<sup>190</sup> M. BERGMANN 1981, 24 (for the assumption that the portrait of Vespasian on Frieze B has been recut from the original portrait of Domitian; here **Figs. 1 and 2 drawing: figure 14**); p. 29 (on the bearded Genius wearing a *toga* on Frieze B; here **Figs. 1 and 2 drawing: figure 11**); pp. 19-20, 22, 24-25, 26-29 (on the togate youth on Frieze B; here **Figs. 1 and 2 drawing: figure 12**); pp. 29-30 (on *Honos* on Frieze B; here **Figs. 1 and 2 drawing: figure 13**); pp. 29-31 (on the seated amazon-like goddess on Frieze B; here **Figs. 1 and 2 drawing: figure 2**).

*praetor urbanus*), *Honos* (Magi and Simon 1960; 1963: *Genius Populi Romani*), and the seated amazon-like goddess (Magi and Simon 1960; 1963; 1985: the goddess Roma).

Consequently, Bergmann<sup>191</sup> comes to the following conclusions: 1.) because, in her opinion, no representatives of the City of Rome are present on Frieze B, she believes that this panel cannot possibly be identified as an *adventus* of the emperor, who is depicted on this Frieze (originally Domitian in Bergmann's opinion, reworked into Vespasian at the order of Nerva), and because Bergmann was unable to find comparisons for her new interpretations of those five figures, especially not for the central group of her Domitian (the here-so-called Vespasian) and the 'ideal' togate youth standing in front of him (the here-so-called Domitian), she is 2.) unable to say, what the scene on Frieze B may represent.

The identification of Frieze B as an *adventus* (of Vespasian into Rome, in 70 AD) had first been suggested by Magi (1939)<sup>192</sup>, followed by some subsequent scholars. But those were and are of the opinion that the head of the emperor on Frieze B, already in the Domitianic phase of this panel, had been the still extant portrait of Vespasian (cf. *infra*, at Chapter III.).

Bergmann (1981, 31) closes her article with the following remark (in her Section: "Nachträge; S. 29" - a *post scriptum* to her p. 29): "Wahrscheinlich muß jedoch die Frage des Senatorenschuhs völlig neu

---

<sup>191</sup> M. BERGMANN 1981, 28-29 (discussing the question, whether or not the scene, represented on Frieze B, may be identified as an *adventus*): "Sehr merkwürdig wirkt auch das Übergewicht der empfangenden Seite [*i.e.*, the togate youth on Frieze B, here Figs. 1 and 2 drawing: figure 12, and the representations surrounding him], wenn nicht mehr, wie man früher meinte, der Empfangende die heimliche Hauptfigur des Frieses ist, sondern der Ankommende selbst. Abgesehen von der Victoria fehlt jeder Hinweis darauf, von welchem Unternehmen der Kaiser zurückkehrt und in welchem Sinne er empfangen wird. Der Amtsdieners mit der Rolle am rechten Rand des Frieses gibt dem Ganzen eher einen zivilen Anstrich.

Ich halte es deshalb für denkbar, daß das Relief nicht einen *Adventus* Domitians nach einem erfolgreichen kriegerischen Unternehmen darstellt, sondern einen ganz anderen Vorgang, in dem der Mann [*i.e.*, the togate youth] gegenüber Domitian/Vespasian eine Rolle spielt, um derentwillen er trotz seiner rangmäßigen Unterlegenheit mit dem Kaiser zusammen hervorgehoben ist [with n. 48].

Welcher Vorgang das sein könnte, ist methodisch schwer zu ermitteln. Das größte Hindernis bildet das Fehlen von Parallelen für die Hauptszene. Ob der Kaiser die Hand nur erhebt oder mit der Hand die Schulter seines Gegenübers berührt, ist von der Forschung unterschiedlich gesehen und interpretiert worden. Man spricht von Gruß, Segnung, Geste der Verwunderung, freundlicher Zuwendung, Geste der Ernennung [with n. 49]. Eine durch diesen Gestus verbundene Personengruppe kommt, soweit ich sehe, weder auf anderen Staatsmonumenten, noch auf Münzen vor. Deshalb läßt sich die Handlung, die die beiden Personen verbindet, vorläufig wohl nicht deuten.

Auch die übrigen Anwesenden geben über den Vorgang wenig Aufschluß. Da die Vestalinnen auffallend viel Raum einnehmen, die amazonenhafte Göttin hinter ihnen zurücktritt und der Zug der Liktores sich ancheinend auf sie zubewegt, könnte man an einen Vorgang denken, in dem die Vestalinnen selbst eine Rolle spielen und nicht nur als Zeugen eines staatspolitisch wichtigen Zeremoniells anwesend sind. Aus dem Wenigen, was von ihren Tätigkeiten und Funktionen bekannt ist, ergibt sich kein Hinweis [with n. 50]".

In her note 48, BERGMANN 1981, 28, writes: "Fuchs, Curtius [1948] und Rumpf [1955-56] dachten an eine Ernennung. Für die Einsetzung einer Person in ein Amt würde man aber eher die Übergabe der Ernennungsurkunde wie in den spätantiken Darstellungen erwarten"; in her note 49 on p. 28, BERGMANN 1981, writes: "Fuhrmann [1940] 471: wie segnend, Curtius: die Gebärde Vespasians zeigt, daß er seinen Sohn mit einem Amt betraut ..."; in her note 50 on p. 29, she provides a reference.

"Fuchs [my emphasis]", whom BERGMANN 1981, 28, mentions in her just quoted footnote 48, does not appear in her bibliography. A. RUMPF 1955-56, 112, n. 2, called him "Siegfried Fuchs [my emphasis]", quoting: AA 1940, 472, but that is the article by H. FUHRMANN: AA 1940, Sp. 362-554. RUMPF, *op.cit.*, thus referred to FUHRMANN 1940, Sp. 472, where the latter writes: "Wohl als erster hat S. Fuchs in dem Kopf des älteren Togatus statt eines alten Tiberius das Portrait des Kaisers Vespasian erkannt [my emphasis]". Unfortunately also FUHRMANN, *op.cit.*, did not provide a reference for this publication (?) by S. FUCHS. - As we have seen above, ns. 5; 113, Siegfried Fuchs's publication is of 1937, which is why he did not mention the Cancellaria Reliefs at all (besides: Frieze B of the Cancellaria Reliefs was only found in 1938; cf. *supra*, at ns. 5; 113).

F. MAGI 1945 does not mention S. FUCHS's (alleged) important finding, but as we have seen above (cf. *supra*, at n. 112), MAGI 1939 205, had already himself identified the head of the emperor on Frieze B as that of Vespasian. BERGMANN 1981, in her n. 48, quoted "Fuchs [my emphasis]" for his interpretation of the meaning of Vespasian's gesture towards the togate youth, the here-so-called young Domitian, mentioning the term "Ernennung [my emphasis]", and soon afterwards the term "Einsetzung [my emphasis]". But the latter is again a quote from H. FUHRMANN 1940, Sp. 472: "... daß der geschilderte Vorgang [on Frieze B] nur als die Einsetzung des Domitian zum Nachfolger des Kaisers [Vespasian] durch diesen selbst ... verstanden werden kann [my emphasis]".

See now for the publication of 'S. FUCHS 1938', *supra*, at n. 113, at the Section *The Siegfried Fuchs Saga*. But note that the reference, given by H. MEYER 2001, 175 with n. 5, for 'S. FUCHS 1938', has turned out to be wrong. See also for that now *supra*, at n. 113.

<sup>192</sup> so first MAGI 1939, 205 (quoted *verbatim supra*, n. 112); cf. MAGI 1945, 106-115.

überprüft werden" ('but probably the question concerning the senatorial shoe must be checked completely anew').

This has been done in the meantime, see Stephanie Langer and Michael Pfanner (2018): "Der Kaiser (**Figur 14** [on Frieze B]) tritt drei Männern mit idealisierten Gesichtern entgegen, deren Benennung stark umstritten ist. Die **Figuren 11** und **13** werden oft als *Genius Senatus* und als *Genius Populi Romani* gedeutet [with n. 121]. Dafür sprechen ihre Ikonographie [with n. 122], ihr Auftreten als Paar und die Tatsache, dass sie um den Kaiser gruppiert sind. **Dass der *Genius Senatus* nur die einfachen *calcei* trägt, ist auffällig, aber nicht singulär. So haben auf der *Ara Pacis* manche Senatoren ebenfalls einfache *calcei*** [with n. 123; my emphasis]".

In their **note 123**, Langer and Pfanner write: "B.[irgit] Bergmann, *Der Kranz des Kaisers. Genese und Bedeutung einer römischen Insignie* (Berlin 2010) 18-24. Vgl. [vergleiche] zu der Problematik der >>historischen Korrektheit<< römischer Staatsreliefs auch U. Kreilinger, *Römische Bronzeappliken. Historische Repliken in Kleinformat* (Heidelberg 1996) 106 Anm. 628. - **Es könnte sich aber auch schlichtweg um einen Fehler handeln:** s.[iehe] dazu Kap.[itel] 2.9.3 [my emphasis]"<sup>193</sup>.

For a discussion of this point; cf. *infra*, at Chapter V.1.h.1.).

### ***1.1.1. Summary of the scholarly discussion concerning the 'wrong shoes', worn by figures on Frieze B, and the decision to pursue a different avenue of research***

As we have seen above, the observation by Marianne Bergmann (1981; cf. *supra*, n. 156, in Chapter I.1.), that the so-called *Genius Senatus* on Frieze B is wearing the 'wrong shoes', has had consequences for the identification of the so-called *Genius Populi Romani* on Frieze B - at least in the opinion of some scholars.

The togate youth on Frieze B, provided we follow Magi (1945; cf. *supra*, n. 117), in identifying this young man as Domitian, according to Rumpf (1955-56, cf. *supra*, n. 172), and Bergmann (1981; cf. *supra*, n. 16; all in Chapter I.1.), is likewise wearing the 'wrong shoes'. Under the premise that Bergmann's assumptions of 1981 are true, several scholars have tried to understand the meaning of the two representations of *Genii* on Frieze B in their relation to the togate youth. Of those scholars, who have followed Bergmann's suggestions, I have chosen seven, whose work has been discussed in detail above. For the references, that relate to their research, cf. *supra*, n. 128, at Chapter I.1. In the following are summarized their results (cf. also *infra*, at Chapter VI.1.).

1.) I begin with Bergmann (1981) herself, who identified five figures on Frieze B differently than Magi (1945): the emperor (in her opinion originally Domitian, whose portrait was later recut into that of Vespasian), the togate youth (interpreted as 'ideal' figure of a togate youth, who cannot be a high ranking magistrate, which is why his function is unknown), the so-called *Dea Roma* (identified as seated amazon-like goddess), the so-called *Genius Senatus* (called by Bergmann an unidentified bearded *Genius* wearing a *toga*), and the so-called *Genius Populi Romani* (identified as *Honos*). As a result of her re-interpretations of those five figures on Frieze B, Bergmann could not say, where the scene, represented on this panel, takes place, nor what it means.

2.) H.W. Ritter (1982) followed Bergmann in identifying the (alleged) original representation of the emperor on Frieze B with Domitian, recut into a portrait of Vespasian, but identified the *Dea Roma* on Frieze B as such, as well as the *Genius Senatus* and the *Genius Populi Romani* on Frieze B as such. Ritter identified the togate youth with the *eques* L. Iulius Vestinus, and suggested that this panel shows the ceremony relating to the *restitutio Capitolii*, that took place on 21st June AD 70 on the Capitoline. This ceremony marked the beginning of the construction of Vespasian's Temple of *Iuppiter Optimus Maximus Capitolinus*, the third

<sup>193</sup> M. BERGMANN 1981, 31.

The quote from S. LANGER and M. PFANNER 2018 is from pp. 76-77, in their **footnotes 121-123**, they provide further discussions and references.

temple at this site, because the second temple had been destroyed on 18th/19th December AD 69. This hypothesis has been refuted by Simon (1985) and Ghedini (1986).

3.) Koeppel (1984, 7, 31-33) followed Bergmann in identifying the (alleged) original representation of the emperor on Frieze B with Domitian, recut into a portrait of Vespasian, the togate youth as an anonymous man (but without identifying him as an 'ideal' representation), the so-called *Genius Senatus* as an unidentifiable representation, and the so-called *Genius Populi Romani* as *Honos*. Contrary to Bergmann, Koeppel maintained his earlier opinion (of 1969) that the amazon-like figure on Frieze B represents *Virtus*, and that Frieze B shows an *adventus*. But exactly like Bergmann (1981), he could not define the possible function of the togate youth on Frieze B, nor offer an explanation, what the scene on Frieze B represents.

4.) Simon (1985), who followed Bergmann in identifying the (alleged) original representation of the emperor on Frieze B with Domitian, recut into a portrait of Vespasian, identified the togate youth on Frieze B as an 'anonymous representative' of the new priesthood of the *Sodales Flaviales Titiales*, founded by Domitian after Titus' death in AD 81, who is represented as receiving the relevant order by Domitian, who is acting in his capacity as *pontifex maximus*. This hypothesis has been refuted by Hölscher (2009a).

5.) Ghedini (1986) followed Bergmann in identifying the (alleged) original representation of the emperor on Frieze B with Domitian, recut into a portrait of Vespasian, but identified the *Dea Roma* on Frieze B as such, as well as the *Genius Senatus* and the *Genius Populi Romani* on Frieze B as such. Ghedini suggested that the togate youth is a magistrate of equestrian rank, whom Domitian, as *pontifex maximus*, invites to speak the usual formula at the *consecratio* ceremony of the Temple of Fortuna Redux, which Domitian, after his victory in the Sarmatian War in 93 AD, built in the *Campus Martius*. This hypothesis has been refuted by Hölscher (2009a).

6.) Fehr (1998), who followed Bergmann in identifying the (alleged) original representation of the emperor on Frieze B with Domitian, recut into a portrait of Vespasian, suggested that Domitian gives the togate youth, whom Fehr identified as 'a competent fellow-citizen in this field', the order to build the fourth temple of *Iuppiter Optimus Maximus* on the Capitoline, which Domitian built, after the third temple had been destroyed in 80 AD. This hypothesis has been refuted by Hölscher (2009a); and above by myself (cf. *supra*, in Chapter I.1.).

7.) Hölscher (2009a) believed that the scene on Frieze B shows a 'historical' moment in AD 81, when Domitian was not as yet emperor. Hölscher followed Bergmann in identifying the (alleged) original representation of the main protagonist on Frieze B with Domitian, recut into a portrait of Vespasian, but identified the *Dea Roma* on Frieze B as such, as well as the *Genius Senatus* and the *Genius Populi Romani* on Frieze B as such. Hölscher believed that the panel shows Domitian's civil *adventus* into Rome in AD 81, which he assumed shortly before the death of Domitian's brother, the Emperor Titus. Domitian is welcomed by *Dea Roma*, the Vestal Virgins, the *Genius Senatus*, the *Genius Populi Romani*, and the togate youth. Hölscher identified the togate youth as the *praefectus urbi*, wearing the 'simple *calcei*', as he observed. Hölscher suggested that for the *praefectus urbi*, being of equestrian rank, the wearing of such shoes was appropriate.

This hypothesis has been refuted by myself (cf. *supra*, in Chapter I.1.).

As already mentioned, Hölscher's assertions are not true, because the *praefectus urbi* "was always a senator ... usually a senior ex-consul" (so T.J. CADOUX and R.S.O. TOMLIN 1996, cf. *supra*, at n. 183, in Chapter I.1.), who should, therefore, have been represented as wearing the *calcei senatorii*. In addition to this the togate youth, obviously a man 'around twenty', because of his young age, cannot possibly be a *praefectus urbi*.

8.) Pentiricci (2009, 57-58 with ns. 409-414) followed Bergmann in identifying the (alleged) original representation of the emperor on Frieze B with Domitian, recut into a portrait of Vespasian, but identified the *Dea Roma* on Frieze B as such, as well as the *Genius Senatus* and the *Genius Populi Romani* on Frieze B as such. He stated that the togate youth on Frieze B is a much-discussed figure, but did not suggest, what kind of function he may have had, nor what the scene, shown on Frieze B, might mean.

The aforementioned seven scholars have discussed the fact that Bergmann (1981) has interpreted five figures on Frieze B differently than Magi (1945).

All seven have accepted Bergmann's assertion that the emperor on Frieze B had originally been Domitian (only that Domitian, in Hölscher's scenario, was not as yet emperor in the represented moment), whose portrait was later recut into that of Vespasian.

What the other four figures on Frieze B may be, whom Bergmann had likewise re-interpreted, are ideas that have not been accepted by those seven scholars *in toto*, but very differently, and by all of them only in part. These eight hypotheses were published over the course of 28 years (1981-2009), but none of them has so far convinced the entire scholarly community because of the following reasons: in the cases of three of these hypotheses, the authors were themselves unable to say, what the scene on Frieze B may represent, and in the case of the other five hypotheses, those have been refuted by other scholars.

### *Post Scriptum*

Only when the manuscript of this volume was about to be sent to the press, did I have the chance to read the account by Joachim Raeder on the Cancellaria Reliefs (cf. *id.* 2010, 141, quoted *verbatim* in more detail *infra*, in Chapter V.1.b). He too follows Marianne Bergmann (1981) in assuming that the emperor on both Friezes of the Cancellaria Reliefs had originally been Domitian, and states that no further historical figure appears on both panels (thus hinting at the controversy concerning the identification of the togate youth on Frieze B, but without explicitly addressing this fact). All the other above-quoted scholars took for granted that the reliefs represent specific historic events, but were either unable say, which event is represented, or in case they actually made such suggestions, they could not convince other scholars of their hypotheses.

Raeder himself arrives at a very different conclusion. He believes that it was by no means the intention to celebrate specific historic events in these panels; in his opinion they should instead be read as representations of "Herrscherlob". Raeder further believes that his hypothesis can explain, why Nerva, therefore, could very easily re-use those Friezes by simply replacing Domitian's portrait on Frieze A with his own likeness, and (allegedly) Domitian's portrait on Frieze B with that of Vespasian.

Concerning this point, Raeder (2010, 141) writes :

"Jeglicher ereignisgeschichtlicher Bezug ist in der Darstellung [on the panels of both Cancellaria Reliefs] unterdrückt, um den Kaiser als Repräsentanten eines Herrscherideals und als Garanten für das Glück und das Wohlergehen des Imperiums in seiner Sieghaftigkeit und Allgegenwart ausgestattet mit *virtus* und *auctoritas* zeigen zu können. Die Allgemeingültigkeit dieses 'Herrscherlobes' ermöglichte nach der *damnatio memoriae* des Domitian die Umarbeitung des Kaiserporträts in beiden Friesteilen, ohne Bedeutungsverlust konnte das Bildnis des Domitian in das des Nerva (Fries A (Abb. 229c) bzw.[beziehungsweise] das des Vespasian (Abb. 229d) verändert werden".

Also after reading Raeder's (2010) account, I maintain my own relevant hypotheses, to which we will now turn. For my comments on Raeder's suggestions; cf. below, in Chapters V.1.b); and V.1.h.2.).

### *Let's now turn to my own interpretation of Frieze B of the Cancellaria eliefs*

I believe that the scene, depicted on Frieze B, must have made sense in Domitian's opinion, since he commissioned this panel. He certainly accepted Frieze B, given the fact, that both reliefs were part of a Domitianic monument or building - which means, he must have approved them - and they were certainly only destroyed *after* Domitian's death. I assume the same in the case of Nerva, who, after all, decided to re-use both panels for his own purposes (for all of that, cf. *infra*, in Chapter II.), and by implication, in the case of all other ancient beholders.

Therefore it should be possible also for us to understand, what the real content of Frieze B was.

**After studying the eight hypotheses, summarized above, none of which convinces me, and because I myself do *not* follow any one of Bergmann's (1981) five re-interpretations of figures on Frieze B, I have decided to pursue a different avenue of research.**

It is, of course, essential to identify all 17 figures on Frieze B correctly, not only those five that Bergmann has re-interpreted.

Most importantly for our understanding of the represented 'historical event', are two of Bergmann's re-interpreted figures on Frieze B: the emperor and the togate youth, standing in front of him. After having studied those eight hypotheses, I maintain my earlier judgement, namely in *not* assuming - as suggested by Bergmann (1981) - that the emperor on Frieze B was originally Domitian (whose portrait, in her opinion, was later recut into that of Vespasian). A hypothesis which, provided it were true, would, of course, automatically result in the conclusion that the togate youth, standing in front of the Emperor Domitian, could not possibly be Domitian *as well*.

*In the following, I will explain my own avenue of research*

**I hope to show in the following (cf. below and *infra*, in Chapters II.;V.1.h); V.1.i.3.); and VI.3.) that Magi's<sup>194</sup> interpretation of the scene on Frieze B was correct, according to which it represents the *adventus* of Vespasian into Rome in AD 70. Currently it is assumed that Vespasian arrived at Rome 'in the first half of October AD 70'<sup>195</sup>. At Magi's<sup>196</sup> time, it was only known that this *adventus* had happened 'in the second half of AD 70'.**

Toynbee wrote<sup>197</sup>: "The *adventus* procession of Frieze B has, as we saw, attained its goal. Vespasian has reached Rome; and the representatives of Rome confront him". Toynbee, with this remark, was certainly right, provided we assume the following. Vespasian intended to be granted by the Senate the honour of a triumph for his victories in the Great Jewish Revolt or War, which was actually celebrated the following year, and precisely in June of 71 AD<sup>198</sup>. Consequently, until that very moment, the victorious general Vespasian had to stay outside the *pomerium*<sup>199</sup>. But this is only in theory true, as we will see below (cf. *infra*, at Chapters I.2.1.; V.1.i.3.)).

---

<sup>194</sup> so first F. MAGI 1939, 205 (quoted *verbatim supra*, n. 112, in Chapter I.1.); cf. F. MAGI 1945, 108-109 (who discusses the relevant literary sources and quotes them *verbatim*); cf. pp. 106-111, for his opinion that Frieze B shows Vespasian's *adventus* into Rome; p. 106: "6. Interpretazione del fregio B: <<adventus>> di Vespasiano ... anche in questo secondo fregio io vedo rappresentato un <<adventus>>, e più precisamente l'<<adventus>> di Vespasiano a Roma nell'anno 70 e l'incontro, in quella occasione col figlio Domiziano [with n. 1, providing references]"; cf. p. 110: "Non v'ha dubbio dunque che in questo secondo fregio ci troviamo di fronte alla rappresentazione dell'arrivo a Roma, nella seconda metà del 70, del primo imperatore di Casa flavia, e del suo incontro col figlio Domiziano". For *verbatim* quotations from MAGI 1945, 111, which likewise relate to Vespasian's *adventus* into Rome in 70 AD, cf. *infra*, in Chapter IV.1., at n. 463.

Cf. F. MAGI 1945, 111 (on the gesture, which Vespasian makes with his right hand on Frieze B, and on the characterization of the figure of the young Domitian on this panel, quoted *verbatim infra*, at n. 463, in Chapter IV.1.).

<sup>195</sup> so D. KIENAST, W. ECK and M. HEIL 2017, 101-102: "Wichtige Einzeldaten: ... 1. H.[älfte] Okt.[ober] 70 Ankunft Vespasians in Rom".

<sup>196</sup> cf. F. MAGI 1945, 110 (quoted *verbatim supra*, n. 194). Cf. also *infra*, at n. 412, in Chapter III.

<sup>197</sup> J.M.C. TOYNBEE 1957, 9.

<sup>198</sup> for that triumph and a discussion of the route, the triumphal procession took, cf. C. HÄUBER 2017, 178-202; and *infra*, in Chapter *The visualization of the results of this book on Domitian on our maps*.

<sup>199</sup> cf. M. ANDREUSSI: "Pomerium", in *LTUR* IV (1999) 99: "Il potere proconsolare si poteva esercitare soltanto fuori del *p.[omerium]* ... [providing literary sources] e i magistrati investiti di *imperium* dovevano rimanere all'esterno del *p.[omerium]* ... [providing literary sources] ... numerosi sono gli episodi che ricordano la necessità per i proconsoli, per i generali in attesa di trionfo ecc.[etera] di restare fuori del *p.[omerium]* ..."; cf. p. 98: "Il *p.[omerium]* separa le due zone *domi* e *militiae*, ovvero *urbs* e *ager* ..."; cf. p. 102: "fino allora [*i.e.*, the time of the Emperor Aurelian] il *p.[omerium]* dovette coincidere con le Mura Serviane..."; cf. p. 101 (for Augustus' enlargement of the

And Koeppel (1969) wrote: "Vespasian kommt als Togatus nach Rom im Relief B von der Cancellaria ... Das Relief B von der Cancellaria (Bild 16 [= here Fig. 2]) und der untere Adventus vom Bogen in Benevent (Bild 14 und 15 [= here Fig. 46]) stellen den Regierungsantritt eines neuen Kaisers dar, wobei die Anerkennung durch den Senat und das Volk zum Ausdruck kommt [with n. 271]"<sup>200</sup>.

Elsewhere (cf. *infra*, n. 201), Toynby remarked: "The meaning of Frieze B is reasonably clear. Dr. Magi's interpretation of it as depicting Vespasian's civil *adventus* in Rome in 70 carries conviction. The Emperor, attended by a lictor with axe and *fasces* and by a man who grasps a scroll, stands towards the left, togate ... to quote the description of his appearance on his entry into Rome given by the Greek historian Cassius Dio [with note 1: "lxvi. 10: 'not like an *imperator*, but like a civilian' ...". ]".

Note that Toynbee has mistakenly given the wrong quotation, the correct one is 'Dio Cassius 65.10' instead, and the historian does not describe Vespasian as being at Rome at this very moment, but instead at Brindisi. There he had landed, coming from Alexandria, and, as soon as arriving in Italy, he had obviously decided to wear civilian, instead of military garb.

For a discussion of Vespasian's actions at Alexandria and his journey from there to Rome; cf. *infra*, at Chapters *The visualization of the results of this book on Domitian on our maps*; and at *The major results of this book on Domitian*.

As is well known, not only Dio Cassius, but also Flavius Josephus had reported on those events<sup>201</sup> (to this I will come back below, at Chapter V.1.i.3.).

*pomerium*); cf. pp. 101-105 (for the *cippi*, which marked the different *pomerium*-lines); cf. pp. 101-102, 103, 104 for Vespasian's enlargement of the *pomerium*, and for the *cippi*, which marked its course.

For Vespasian's enlargement of the *pomerium*, see also F. COARELLI 2009b, 69-71; cf. p. 69 with n. 33: only four *cippi* of Vespasian's *pomerium* have survived. For the most famous one of those *cippi*, "Scoperto nel 1930 tra la via di Campo Marzio e via della Torretta", cf. F. COARELLI 2009a, 426, cat. no. "21 Cippo del pomerio di Vespasiano" (F. COARELLI): "Si tratta del cippo scoperto nel 1930 tra via di campo Marzio e via della Torretta [with n. 1], insieme da un altro di Adriano, che si trovava a un livello più in alto di circa tre metri, e doveva quindi sostituire il più antico dopo l'innalzamento del suolo del Campo Marzio avvenuto in quegli anni". In his n. 33, Coarelli writes: "CIL VI, 31538a; 1232 = 31538b; 31538c; 40854". To this I will come back below (cf. *infra*, at Chapter V.1.a.1.).

Cf. also G. KOEPEL 1969, 188 with n. 257, cf. his Fig. 15 on p. 165 (quoted *verbatim infra*, n. 361, in Chapter II.3.3.), who discusses the panel in the attic of the Arch of Trajan at Beneventum, depicting in his opinion the two *consules* of Rome, who tell Trajan, who, in KOEPEL's opinion, is represented as standing outside the *pomerium*, that the Senate has granted him to celebrate a triumph.

See also J. RÜPKE, *Domi militiae. Die religiöse Konstruktion des Krieges in Rom*, 1990; *id.*, *Peace and War in Rome*, 2019.

<sup>200</sup> both quotes are from G. KOEPEL 1969, 193. For those reliefs of the Arch of Trajan at Beneventum, cf. *infra*, at ns. 359-361, in Chapter II.3.3., at n. 454, in Chapter III.; and in Chapters IV.1.1.h); V.1.i.3.).

<sup>201</sup> J.M.C. TOYNBEE 1957, 4-5 with n. 1 on p. 5.

For Dio Cassius, cf. J.W. RICH: "Cassius (*RE* 40) Dio (c.[irca] AD 164-after 229), Greek senator and author of an 80-book history of Rome from the foundation of the city to AD 229 ...", in: *OCD*<sup>3</sup> (1996) 299-300.

For Flavius Josephus, cf. E. M SMALLWOOD, T. RAJAK: "Josephus (Flavius Iosephus) b.[orn] AD 37/8) was a Greek historian but also a Jewish priest of aristocratic descent and largely Pharisaic education ... and a political leader in pre-70 Jerusalem ...", in: *OCD*<sup>3</sup> (1996) 798-799.

T.P. WISEMAN 2013, XI-XIII, writes about Flavius Josephus and his book *Bellum Judaicum*: "[p. XI] When the events described in this book [*i.e.*, the events that led to the death of Caligula in AD 41] were taking place, its author was a four-year-old boy in Jerusalem, named Joseph ben Mattathias. Over fifty years later, probably in AD 94, he wrote an autobiographical justification of his career ... [with n. 4: Josephus, *Life* 1-2; providing also further references] ...

As a boy, according to his own account, Joseph ben Mattathias was a prodigy of learning, already at the age of fourteen being consulted by the high priests on the finer points of Jewish tradition. At sixteen he undertook a thorough course of training in all the three main sects - the Pharisees, the Sadducees and the Essenes - and followed that up with three years' discipleship to an ascetic teacher in the wilderness. 'Returning to the city in my nineteenth year, I began to conduct my life according to the rules of the Pharisees, a sect closely resembling what the Greeks call the Stoic school' (*Life* 12) ... Certainly Joseph could speak Greek fluently by the time he was 26, for in AD 64 he went on an embassy to Rome to negotiate the release of some priests who had been arrested by the procurator of Judaea. His contacts were good enough to get him introduced to Nero's empress, Poppaea Sabina, [p. XII] who arranged for the priests to be freed and sent Joseph home laden with goodwill gifts [with n. 6: Josephus, *Life* 13-16; providing a further reference.].

Not surprisingly, when the Jewish revolt against Rome broke out two years later, Joseph argued strongly against it. But in vain - and soon he found himself in charge of the defence of Galilee against the Romans. His motives and his loyalties were bitterly disputed at the time, and have remained controversial ever since. For our purposes it is enough to report that in the spring of 67 Joseph's forces were concentrated at Jotapata; Nero's general Vespasian besieged the town and then captured it in a surprise attack; the hard core of the resistance, hiding in a cave, refused to surrender and preferred to die by their own hands; Joseph was one of the last two left alive. Unwilling, he tells us, to stain his hands with the blood of a compatriot, he talked his fellow-survivor out of the suicide pact and surrendered to the Romans [with n. 7; providing references.].

**Provided, Domitian had in mind to show with the scene on Frieze B (cf. here Figs. 1 and 2 drawing) his version of Vespasian's *adventus* into Rome in AD 70, and considering at the same time, what was said above, we can come to some preliminary conclusions. The following is a working hypothesis, that will be pursued below; cf. *infra*, at Chapters II.; III.; V.1.h.1); V.1.i.3.); and VI.3.).**

As we have heard above, the appropriate chief magistrate to welcome a new emperor into Rome, on the occasion of the solemn ceremony of an *adventus*, was the man, who held the office of *praetor urbanus*; this magistrate 'was a member of the Senate and entitled to wear the senatorial boots'<sup>202</sup>. Although the togate youth on frieze B is shown as wearing the "simple half-boots"<sup>203</sup> instead, which prove his equestrian rank, the artists, who designed frieze B, have stressed the eminent importance of the young man: he is flanked by the *Genius Senatus* and the *Genius Populi Romani*, who are thus characterized as if they were his entourage (cf. here Fig. 2; Figs 1 and 2 drawing).

At the same time, the artists characterize the togate youth as heading a very long procession, to which, so to say, not only the entire 'Senate of Rome', and the entire 'Roman People', but even (almost) the 'entire college of the Vestal Virgins' belongs. The youth's social rank is thus portrayed in a way that, in reality, no one else at Rome possessed (apart from the two *consules*) than the *praetor urbanus*. We know also that on 1st January 70 AD, Domitian had been endowed with the office of *praetor urbanus* (cf. *supra*, at n. 189, in Chapter I.1.)

**Considering what else has been said above, in my opinion, nothing prevents us therefore so far from identifying Domitian as the *praetor urbanus* at the 'historical moment', pictured on Frieze B (here Fig. 2).**

And that because of the following reasons: provided the togate youth on Frieze B may be identified as the *praetor urbanus*, as I believe because of the context within which he appears, only Domitian - apart from the historical fact that he *was* the *praetor urbanus* at the real historical moment - may be identified with that magistrate, as he is characterized on this panel.

Joseph always insisted that his actions were guided from on high, by >dreams in the night by which God had forewarned him both of the calamities coming to the Jews and the fortunes of the Roman emperors ...< [with n. 8: Josephus, *Bellum Judaicum* 3, 352; translation: G.A. Williamson.]. When brought before Vespasian, he prophesied that the general would soon be emperor. Vespasian kept him in chains, but decided not to send him to Nero.

Two years later, Nero was dead, his successor Galba had been assassinated, and there was civil war between the pretenders Otho and Vitellius. The eastern armies hailed Vespasian as emperor in the summer of 69. Joseph, his prophesy now on the point of coming true, was released from custody. He spent the next eighteen months with the Roman army under Vespasian's son Titus, who brought the Jewish revolt to an end with the siege and destruction of Jerusalem.

Like the Babylonians 656 years before, the Romans destroyed the Temple as agents of the wrath of God, punishing the sins of the Jews. That was how Joseph saw it, with himself in the role of Jeremiah, prophesying in vain [with n. 9: Joseph, *Bellum Judaicum* 5,39; providing a further reference]. He had not been able to prevent the catastrophe, but at least he could bear witness to what had happened. He wrote an account of the war (probably [p. XIII] quite short) in Aramaic, for the Jews of the eastern diaspora in Parthia, Babylonia and Mesopotamia [with n. 10: Joseph, *Bellum Judaicum* 1,6; providing a further reference.].

By then he was in Rome. Titus' victorious army returned in 71, bringing with it the Jewish priest who had prophesied Vespasian's rise to power. The new emperor showed his gratitude with three valuable gifts: free lodging in one of the imperial mansions; a regular income from the imperial treasury; and the Roman citizenship [with n. 11: Josephus, *Life* 423.]. Joseph ben Mattathias now becomes Flavius Josephus ...

He was 34, safe, subsidised, and in the enviable position of an imperial favourite. For the next twenty-five years - through the reigns of Vespasian (70-9) and his sons Titus (79-81) and Domitian (81-96) - Josephus devoted himself to writing history, and defending himself from the attacks of his many enemies.

His first major work was a history of the Jewish war, expanded from his Aramaic narrative and elaborated with all the features proper to Greek historiography ...

The *Jewish War* was completed about 81, and published at imperial expense with a personal endorsement from Titus ('so anxious was he that men should learn of the events from my volumes alone') [with n. 12: Josephus, *Life* 261-3; with a further reference for the date]. Cf. T.P. WISEMAN 1991, IX-XI (this text is almost identical with his above quoted text of 2013).

For a very critical view of Josephus and his writings; cf. now Werner Eck 2021a, *passim*; and *id.* 2022, Sp. 494.

<sup>202</sup> cf. J.M.C. TOYNBEE 1957, 8. The *verbatim* quote reads: "It is indeed a fact that in 70 Domitian was urban praetor and a member of the Senate and therefore entitled to senatorial boots".

<sup>203</sup> so J.M.C. TOYNBEE 1957, 7.

**Because only Domitian could have had an interest in *not* wearing at the real *adventus* ceremony of his father, the Emperor Vespasian (if that had actually happened the way it appears on Frieze B - but cf. *infra*, at Chapter V.1.i.3.)), the *calcei senatorii*, but rather those shoes, which emphasized his equestrian rank. The reason being that he would thus have stressed to be the *Princeps Iuventutis*, a position very close to the *ordo equester*, which is why the person, being honoured this way, would wear this type of shoes.**

We know that Domitian had been elected as *Princeps Iuventutis* on 21st December 69 AD<sup>204</sup>; Domitian was in Rome at that moment, whereas his father Vespasian was still in the East - this fact is of great importance to my conclusion (cf. *infra*). **Toynbee has characterized the importance of this title: "Domitian was also *Princeps Iuventutis*, a title that marked him out from other senators as heir presumptive to the Empire and with which equestrian activities were definitely connected"**<sup>205</sup>.

If indeed Domitian had commissioned not only the overall content, but also the specific iconographic details of the scene on Frieze B, as assumed here, only he could have ordered, that 1.) by the choice of the composition, the artists would show that he, Domitian, had been the *praetor urbanus* at the historical moment of Vespasian's *adventus* into Rome, and 2.) that he, Domitian, be represented on Frieze B with those 'equestrian shoes' although, being *praetor urbanus*, and thus a member of the Senate, he was entitled to wear the *calcei senatorii*.

**And if this wearing of the 'wrong shoes' was intentional, as suggested Toynbee<sup>206</sup>, whom I follow here, Domitian would have stressed the following. On that occasion, for the first time since he had been elected as *Princeps Iuventutis*, Domitian had appeared in an important public ceremony at Rome, together with his father, the Emperor Vespasian, and that in his capacity as heir presumptive to the Empire.**

My interpretation of Domitian's 'first appearance in an important public ceremony at Rome', and of the meaning which that may have had for himself, is, of course, influenced by my impression that the content, propagated by Domitian on Frieze B, has similarities with the hieroglyphic texts on Domitian's obelisk (here Fig. 28).

Cf. *supra*, in Chapter *Preamble*, at Section III.; *infra*, at Chapter IV.1; and below, at *The first Contribution by Emanuele M. Ciampini: La regalità domiziana: una nota egittologica*.

Provided, the interpretation of Frieze B of the Cancelleria Reliefs suggested here is true, Toynbee has stressed yet another aspect of this 'first appearance of Domitian in an important public ceremony at Rome', which was presumably of equal, if not of greater importance within this 'sermon in stone' (George Maxim Anossov Hanfmann<sup>207</sup>), a term coined in a different context, but that we could also apply to Frieze B: "Finally, in the foreground [on Frieze B] between the Senate and the *Genius Populi Romani* we see the young Domitian, togate and slightly whiskered, turned three-quarters towards his father [*i.e.*, Vespasian]. There he stands, the pivot of the whole scene, composed, confident, and somewhat aloof, accepting as though it were his natural right the gesture of approval with which the Emperor [*i.e.*, Vespasian] greets him. The unpleasant encounter of father and son at Beneventum, when the former rebuked the latter sharply for his outrageous conduct, is over and forgotten; and it would seem that Domitian was publicizing here his own version - not so much a wholly false, as a 'rose-coloured' version - of his situation as Caesar in Rome at the time of his

<sup>204</sup> cf. *supra*, at n. 189, in Chapter I.1.

<sup>205</sup> J.M.C. TOYNBEE 1957, 8, with n. 11, providing references. For the so-called "Thronprätendententbart"; cf. A. LINFERT 1976; and A. SCHMIDT-COLINET 2005, 98 with n. 7. For a discussion of all hat; cf. *infra*, in Chapter III.

<sup>206</sup> J.M.C. TOYNBEE 1957, 8.

<sup>207</sup> G.M.A. HANFMANN 1975, 66-67, quoted after C. HÄUBER 2014a, 678 with n. 63: "Already George M.A. Hanfmann had aptly called such iconographies >Sermons in stone<".

According to J. POLLINI 2012, 105, with n. 178, the Arch of Trajan at Beneventum has aptly been called by J. BENNETT 1997, 205, a "panegyric in stone": "Aptly called a >panegyric in stone< [with n. 178], this grand arch, with its complex imagery in which history and allegory commingle, served as an illustrated testimonial of Trajan's domestic and foreign accomplishments, virtues, and programs". Cf. *infra*, n. 390, in Chapter III.

father's accession, as the recipient of congratulations on the 'vice-regency' exercised by him in the capital while Vespasian was still absent in the East. Thus the scene portrays the first public occasion on which Domitian, as a youth of nineteen, played a significant part in the crucial hour of the founding of the Flavian dynasty. It is almost an illustration of the saying which Suetonius attributes to him: '*patri se et fratri imperium dedisse, illos sibi reddidisse*' [with n. 1]<sup>208</sup>.

Apropos Toynbee's (1957, 5-6) suggestion in the above-quoted passage that Domitian was "a youth of nineteen" at the ceremony represented on Frieze B of the Cancellaria Reliefs (here **Figs. 1 and 2 drawing**). Since we know now that Vespasian arrived at Rome in the first half of October AD 69, Domitian was still 18 years old at that stage (cf. *supra*, n. 195).

## I.2. The amazon-like figure on Frieze A: Dea Roma, not Virtus

To chapter I.2. belongs the following text; cf. *infra*, in volume 3-2:

*A Study on the consequences of Domitian's assassination :*

*Nerva is forced to adopt Trajan and Trajan creates Domitian's negative image to consolidate his own reign. With Hadrian's adoption manquée in late October or at the beginning of November of AD 97, his 20-year long road to his accession and his thanksgivings for it, his Temple complex in the Campus Martius.*

*Or: The wider topographical context of the Arch of Hadrian alongside the Via Flaminia which led to the (later) Hadrianeum and to Hadrian's Temples of Diva Matidia (and of Diva Sabina?). With discussions of Hadrian's journey from Moesia Inferior to Mogontiacum (Mayence) in order to congratulate Trajan on his adoption by Nerva, and of Hadrian's portrait-type Delta Omikron (Δο) (cf. here **Fig. 3**). With The fourth and the fifth Contribution by Peter Herz, with The first Contribution by Franz Xaver Schütz (cf. here **Fig. 77**), with The Contribution by John Bodel, and with The second Contribution by Angelo Geißen.*

If we believe for a moment that the allegorical personifications on both Cancellaria Reliefs (here **Figs. 1 and 2 drawing: figures 13 and 9** on Frieze A, and **figures 13 and 2** on Frieze B) have correctly been identified as *Honos* and *Virtus* (instead of as the *Genius Populi Romani* and the *Dea Roma*, as I suggest here), I would take it at first glance (perhaps too naïvely) to a logical consequence, to find these interpretations in exactly *that* way also applied by those scholars, who identify either one of those representations as *Honos* viz. *Virtus*. But that is not the case, on the contrary, there are all sorts of mixtures of the two above-mentioned, in my opinion clearly cut, hypotheses (but that was a wrong judgement on my side; see below).

Hölscher<sup>209</sup> for example, who, as we have just seen (cf. *supra*, in Chapter I.1.), follows Bergmann's hypotheses in some other respects, has no problems with the identifications of the *Genius Senatus* and of the *Genius Populi Romani* as such on both friezes, but suggests that the amazon-like representations on those friezes, which are both identified here as the goddess Roma, should instead be identified as 'Roma or Virtus' on

<sup>208</sup> J.M.C. TOYNBEE 1957, 5-6. In her **note 1** on p. 6, she quotes: "Suetonius, *Domit.* 13". TOYNBEE, *op.cit.*, does not say that already H. LAST 1948, 12, had suggested the latter: "There is much that might be added about this panel [*i.e.*, Frieze B], for instance it invites consideration of the passage in which Suetonius (*Dom.* 13,1) asserts of Domitian that '*principatum ... adeptus, neque in senatu iactare dubitavit et patri se et fratri imperium dedisse, illos sibi reddidisse ...*'. This was also discussed by M. BERGMANN 1981, 19-20; and by H. MEYER 2000, 136: "Die alte Deutung des Frieses B ist gewiß zutreffend, sagt doch Sueton: >>Als [Domitian] dann zur Herrschaft gelangt war, hatte er die Stirn, vor dem Senat zu prahlen, er sei es gewesen, der seinem Vater wie seinem Bruder den Thron gegeben, sie hätten ihm diesen nur zurückgegeben<< [with n. 431: "Suet. Dom. 13".]". For that very influential idea, cf. also *infra*, at n. 456, in Chapter III. - Similarly also R. BIANCHI BANDINELLI and M. TORELLI (1976, ARTE ROMANA, *scheda* 105, quoted *verbatim infra*, in Chapter IV.1.

For a discussion of this passage from J.M.C. TOYNBEE 1957, 5-6; cf. *supra*, in Chapter *Preamble*; at Section III.

Without quoting Suetonius (*Dom.* 13), L. LUSCHI 2015, 197, obviously likewise referred to this (alleged) statement of Domitian; cf. *supra*, in Chapter *Preamble*, at Section III. Her quote was chosen as the second epigraph of this *Study*; cf. *supra*, at Chapter I.1.

<sup>209</sup> T. HÖLSCHER 2009a, 56, 57 (cf. *supra*, n. 182, in Chapter I.1.).

Frieze A, and as the 'goddess Roma' on Frieze B. Toynbee<sup>210</sup>, who likewise took the *Genius Senatus* and the *Genius Populi Romani* as such on both friezes, identified this amazon-like figure on Frieze A as *Virtus*, and on Frieze B as Roma. Kleiner<sup>211</sup> on the other hand, who identifies the *Genius Senatus* and the *Genius Populi Romani* as such on both friezes, calls the amazon-like representation on Frieze A: "Roma (or possibly *Virtus*)", and on Frieze B: "Roma (some other scholars identify her as *Virtus*)". T.P. Wiseman (1996), who took the *Genius Senatus* on Fries A as such, identified the amazon-like figure on Frieze A as the *De Roma*, and Hugo Meyer<sup>212</sup>, who took the two male representations on both friezes likewise for the *Genius Senatus* and the *Genius Populi Romani*, identified (like Toynbee and Simon 1985) the amazon-like representation on Frieze A with *Virtus*, and on Frieze B with the goddess Roma.

The reasons for this further controversy (or rather: for *my* misunderstanding of the above quoted hypotheses) become evident, when we read Dietrich Boschung's<sup>213</sup> discussion of the Cancellaria Reliefs, in which he concentrates on exactly those subjects, which interest us here: the iconographies of: *Genius Senatus*, *Genius Populi Romani*, *Honos*, *Virtus* and *Dea Roma*. Boschung himself follows the relevant findings, made by Pfanner, whereas Bergmann<sup>214</sup>, discussing the same hypotheses a long time ago, had come to the conclusion that, in the case of Frieze B of the Cancellaria Reliefs, the application of Pfanner's relevant 'system' does not lead to any results.

Boschung's definition, according to which the goddess Roma is always represented "thronend" (or seated), differs from the relevant assumptions, made by three of the aforementioned scholars: Hölscher identifies the (walking - as I at first wrote - but in reality standing) amazon-like representation on Frieze A (here **Figs. 1 and 2 drawing: figure 9** on Frieze A) as 'Roma or *Virtus*', Kleiner as "Roma (or possibly *Virtus*)", and Wiseman as 'goddess Roma', that, according to Boschung, should rather be identified as *Virtus*.

Personally, I follow Magi (1945), Simon (1960 and 1963), Pollini (2017b, 117, 118) and Spinola (cf. below and *infra*, at Chapter III.), by recognizing in this walking (but - as we shall see - in reality standing), amazon-like

<sup>210</sup> J.M.C. TOYNBEE 1957, 5 (the amazon-like figure on Frieze B is in her opinion *Roma*); p. 5 (identification of *Genius Populi Romani* and *Genius Senatus* on Frieze B); p. 9 (identification of *Genius Populi Romani* and *Genius Senatus* on Frieze A); p. 10 (the amazon-like figure on Frieze A is in her opinion *Virtus*).

So already J.M.C. TOYNBEE 1946, 180 (*Dea Roma* on Frieze B); cf. pp. 180-181 (*Virtus* on Frieze A). So also E. SIMON 1985, 550-551 with n. 34, Abb. 7 (cf. *supra*, at n. 181, in Chapter I.1.).

<sup>211</sup> D.E.E. KLEINER 1992, 192, 191.

<sup>212</sup> T.P. WISEMAN (1996, 20, Fig., illustrating Frieze A of the Cancellaria Reliefs; cf. *supra*, n. 48, in Chapter I.1.); H. MEYER 2000, 126 (for his identifications of the *Genius Senatus* and of the *Genius Populi Romani* on both friezes and of *Virtus* on Frieze A); p. 127 (for his identification of the *Dea Roma* on Frieze B). - Of almost the same opinion, as Hugo Meyer 2000, 126 was, is P. LIVERANI 2021, 86-87: concerning the *Genius Senatus* and the *Genius Populi Romani* on both panels, and concerning the (in my opinion alleged) figure of *Virtus* on Frieze A, only concerning the figure of *Dea Roma* on Frieze B he writes on p. 87: "probably Roma". Exactly the same identifications of these figures suggests P. LIVERANI 2023, 118, in the Italian version of his article.

<sup>213</sup> D. BOSCHUNG 2017, 393-394, Abb. 216 ("Cancellariere relief A, Ausschnitt mit Genius des Senats und *Genius Populi Romani*"), 217 ("Sesterz des Galba, Rückseite mit *Honos* (links) als Jüngling, mit langem Haar, Hüftmantel und Füllhorn; *Virtus* in Amazonentracht mit Schwert und Lanze"), 218 ("Basis der Antoninus Pius-Säule ... Ausschnitt mit *Dea Roma*, Rom, Musei Vaticani, Inv. 5115"), with n. 24: "So zeigen der *Genius populi Romani* als Personifikation des römischen Volkes (Abb. 216) und *Honos* als Personifikation der Ehre (Abb. 217) die gleiche Altersstufe, die gleiche Tracht und Frisur sowie die gleichen Attribute: Als bartlose Jünglinge mit vollen Locken und idealem nacktem Oberkörper tragen beide einen Hüftmantel und halten ein Füllhorn in der gesenkten linken Hand. Zu benennen und voneinander zu unterscheiden sind sie nur durch den Kontext. Während *Honos* in einer festen Verbindung mit *Virtus* (>>Tapferkeit<<) auftritt [with n. 24], erscheint der Genius des römischen Volkes zusammen mit dem Genius des Senats. Dabei bezeichnen diese gleich gestalteten Figuren durchaus Unterschiedliches: in einem Falle wird die Gesamtheit aller römischen Bürger in einer Person verkörpert; im anderen Falle die Ehre, die herausragende Persönlichkeiten durch außergewöhnliche Leistungen im Dienste des Staates gewinnen. *Virtus* wiederum ist von *Dea Roma*, der Verkörperung der Stadt Rom (Abb. 218), ikonographisch nur durch die unterschiedliche Haltung zu unterscheiden, da beide als bewaffnete und behelmte Frauen im kurzem Chiton und mit entblößter Brust dargestellt wurden; in beiden Fällen bilden ältere Amazonenbilder den Bezugspunkt. Aber während *Dea Roma* thronend mit unterschiedlichen Partnern (etwa auch neben dem Kaiser sitzend) erscheint, präsentiert sich *Virtus* stehend [my emphasis]". In his note 24, D. BOSCHUNG 2017 quotes: "Pfanner, Michael: Der Titusbogen, Mainz 1983, 81-82, 98-99".

<sup>214</sup> cf. M. BERGMANN 1981, 31 n. 58: "M. Pfanner hat in seiner noch ungedruckten Dissertation über den Titusbogen m. E. [meines Erachtens] überzeugende Vorschläge zur Unterscheidung von Roma und *Virtus* und *Genius Populi Romani* und *Honos* nach ihrer Verwendung im Erzählzusammenhang gemacht. Für Fries B der Cancellariereiefs führt sein System jedoch zu keinem Ergebnis [my emphasis]".

figure on Frieze A the goddess Roma, also because I side with those<sup>215</sup>, who identify the standing, amazon-like representation on the *adventus* relief of Hadrian with *Dea Roma*, who welcomes the emperor outside one of Rome's city gates (cf. here **Fig. 91**)<sup>216</sup>. Or, in other words: I do not subscribe to the assertion that *Dea Roma* is always represented seated.

**Figs. 91-94. The first three reliefs are on display in the staircase of the Palazzo dei Conservatori (Musei Capitolini) at Rome. Fig. 91: the *adventus* relief of Hadrian from the former Arch of Hadrian alongside the Via Flaminia/ Via Lata/ Via del Corso in Rome that led in Hadrian's lifetime to his Temple complex dedicated to the women of his adoptive family and later to the *Hadrianeum*; from: M. Fuchs (2014, 132, Fig. 12); Fig. 92: the *apotheosis* of Sabina (from the Arco di Portogallo); from: M. Fuchs (2014, 149, Fig. 21); Fig. 93: the *adlocutio* relief (from the Arco di Portogallo); from: M. Fuchs (2014, 139, Fig. 22); Fig. 94: the fourth relief is on display in the Palazzo Torlonia at Rome; from: M. Fuchs (2014, 135, Fig. 16); cf. pp. 133, 138: this panel shows a *supplicatio* scene and demonstrates, according to Fuchs, Hadrian's *clementia*.**

The *adventus* relief, illustrated on **Fig. 91**, once belonged to the former Arch of Hadrian alongside the Via Flaminia /Via Lata /Via del Corso in Rome on its west side, that led to the (later) *Hadrianeum* and to the Temple(s) of *Diva Matidia* (and of *Diva Sabina*?)<sup>217</sup>. We even happen to know a document<sup>218</sup>, which proves the provenance of this relief.

Cf. here **Fig. 58**, labels: CAMPUS MARTIUS; VIA FLAMINIA/ VIA LATA; former Piazza di Sciarra; AQUA VIRGO; ARCH of Hadrian; *HADRIANEUM*.

To this Arch of Hadrian and to the Hadrianic reliefs, illustrated on **Figs. 91-94**, I will come back below.

Cf. *infra*, in volume 3-2, at *A Study on the consequences of Domitian's assassination ...*:

Or: *The wider topographical context of the Arch of Hadrian alongside the Via Flaminia which led to the (later) Hadrianeum and to Hadrian's Temples of Diva Matidia (and of Diva Sabina?). With discussions of Hadrian's journey from Moesia Inferior to Mogontiacum (Mayence) in order to congratulate Trajan on his adoption by Nerva, and of Hadrian's portrait-type Delta Omikron (Δ) (cf. here Fig. 3). With The fourth and the fifth Contribution by Peter Herz, with The first Contribution by Franz Xaver Schütz, with The Contribution by John Bodel, and with The second Contribution by Angelo Geißen.*

Note that on Hadrian's *adventus* relief (cf. here **Fig. 91**) appear three of the just mentioned representations: the amazon-like figure, the *Genius Senatus*, and the *Genius Populi Romani*. The latter two have exactly the same proportions as the Emperor Hadrian, who is standing in front of them, whereas the likewise standing amazon-like representation - without any doubt the goddess Roma - who was probably originally shown shaking hands with Hadrian (in the gesture of *dextrarum iunctio*) - is much taller than Hadrian. I therefore agree with Koepfel, Kleiner, Elena di Filippo Balestrazzi, Maria Radnoti-Alföldi and Michaela Fuchs that

<sup>215</sup> cf. G. KOEPEL 1969, 156-158, Fig. 9 (this photo shows the emperor still restored with a head of Marcus Aurelius): "Das hadrianische Adventus-Relief im Palazzo dei Conservatori"; p. 156: he identifies the amazon-like goddess as *Dea Roma*; cf. H.R. Goette 1990, 56, 142, cat. no. C a 24, Taf. 34,1; D.E.E. KLEINER 1992, 254, Fig. 223, writes: " ... depicts the adventus of Hadrian, who is greeted at the gates of the city by Roma, the Genius Senatus, and the Genius Populi Romani". For further discussion of Hadrian's *adventus* relief, cf. below; **ns. 216-218**; and *infra*, in volume 3-2, at *A Study on the consequences of Domitian's assassination ...*; at Chapter I. *The Arch of Hadrian alongside the Via Flaminia and the four marble reliefs belonging to it (cf. here Figs. 91-94)*.

<sup>216</sup> cf. C. HÄUBER 2017, 242, 245-250, Fig. 5.7, pp. 520-523.

<sup>217</sup> cf. C. HÄUBER 2017, 242-250, chapter "Matidia, Sabina and the Arch of Hadrian on the Via Flaminia/ Via Lata (Figs. 3.5; 3.7 [= here **Figs. 58; 59**]; for those maps, cf. *supra*, **n. 66**, in Chapter I.1.), labels: VIA FLAMINIA/ VIA LATA/ Via del Corso; Arch of Hadrian; HADRIANEUM; "Tempio di Siepe"; Temple: MATIDIA?/ Collegio/ Teatro Capranica; TEMPLUM: MATIDIA; Temple: SABINA?]; 5.7; 5.8; 5.9); cf. pp. 520-523 (for this Arch of Hadrian and for Hadrian's *Athenaeum*); pp. 218-323 (for the new reconstructions of the Temple of *Diva Matidia*). Within the precinct of *Diva Matidia* stood in my opinion a second Temple - of *Diva Sabina*?; cf. pp. 310-320. For all that; cf. now *infra*, in volume 3-2, at *A Study on the consequences of Domitian's assassination ...*

Or: *The wider topographical context of the Arch of Hadrian alongside the Via Flaminia which led to the (later) Hadrianeum and to Hadrian's Temples of Diva Matidia (and of Diva Sabina?). With a discussion of Hadrian's portrait-type Delta Omikron (Δ) (cf. here Fig. 3) ...*

<sup>218</sup> Cf. F. CASTAGNOLI 1942, 76, Fig. 1, cf. pp. 76-77, 82.

there are undisputed representations of *Dea Roma*<sup>219</sup>, which show the goddess standing. In some of these (as on **Fig. 91**), she is represented amazon-like, in exactly the same iconography as the allegorical representation *Virtus*.

The distinctive difference between *Dea Roma* and *Virtus* is therefore at first glance not, whether or not the relevant figure is shown seated or standing, but rather the specific action of a figure, represented in this iconography, when it is standing or walking. As already observed by Koeppel (1969)<sup>220</sup>, there are some more criteria, which are of importance: those concern the context, in which the relevant figure is shown. But not only her action, or the context, in which she appears, can tell us, who she is. Because, as Pfanner has rightly pointed out, the aforementioned differences of the representations of *Dea Roma* and *Virtus* are caused by the facts that their constructed personalities, and as a consequence of that, their specific functions, are fundamentally different: *Dea Roma* is a goddess, whereas *Virtus* is the representation of a human 'virtue'. Also Pfanner identifies the amazon-like figure on Frieze A as *Virtus*, and precisely as Domitian's *Virtus Augusti*.

And, as if that were not irritating enough, I allow myself to anticipate here an observation that I made only 'at second glance'. In his later publication of 1984, in his comments on the amazon-like figure on Frieze A, which he again identified as *Virtus*, Koeppel argued that it was on purpose that the iconographies of *Virtus* and *Dea Roma* are so similar. To the effect that 'in these representations stress may be laid on either one, but that both ideas are contemporaneously implicit', quoting for that observation a remark by Klaus Fittschen,

<sup>219</sup> G. KOEPEL 1969, 156 (who identifies the here-so-called *Dea Roma* as such) writes: "Dextrarum iunctio wie auf Münzen S. 183f."; p. 192 (quoted *verbatim infra*, n. 220; D.E.E. KLEINER 1992, 254-256, Fig. 223, writes: "It ... depicts the adventus of Hadrian, who is greeted at the gates of the city by Roma, the Genius Senatus, and the Genius Populi Romani"; cf. E. DI FILIPPO BALESTRAZZI 1997, 1061 s.v. "Roma, 6. Roma e gli imperatori a) Salutatione dell'Imperatore, cat. no. 194. ... Rilievo storico, marmo, Pal. Cons. 810. Età adrianea. R.[oma], con figure del Senato e del Popolo romano ... stringe la mano di Adriano".

Cf. M. FUCHS 2014, 131-132 with ns. 59-65, Abb. 12 [= here **Fig. 91**]; 13: "Vor einem Torbogen ... steht die mit Schwert und Lanze bewehrte Dea Roma, die dem Kaiser zur Begrüßung die Hand entgegenstreckt. Der Arm mit dem Globus ist von der Schulter abwärts ergänzt und dürfte ursprünglich gerade vorgestreckt mit der Rechten Hadrians in *dextrarum iunctio* verbunden gewesen sein [with n. 61]". In her **note 61**, she writes: "CAFIERO 1986, 13, vgl. [vergleiche] Taf. 4. Unverständlich hierzu ALFÖLDI 1999 a [*i.e.*, here M. R.[ADNOTI]-ALFÖLDI 1999a], 187-190, hierzu 188 mit Anm. 5), welche die Restaurierung mit dem Globus für korrekt hält und daraus falsche Schlüsse zieht; in italienischer Sprache wieder abgedruckt in *BCom* 101, 2000, 101-104 [*i.e.*, here M. R.[ADNOTI]-ALFÖLDI 2000]; s.[iehe] auch ALFÖLDI 1999 b [*i.e.*, here M. R.[ADNOTI]-ALFÖLDI 1999b], 12-13". Immediately after that, M. FUCHS 2014, 132, continues, mentioning Hadrian's "ADVENTVS"-coins, issued between AD 134 and 138, which show the *Dea Roma* shaking hands with Hadrian: "Die *ADVENTVUS*-Münzen, welche der Legende nach zwischen 134 und 138 geprägt wurden [with n. 62], wiederholen dieselbe Szene (Abb. 13); diese kann daher wohl kaum auf etwas anderes als auf die glückliche Rückkehr des Kaisers nach dem Bar Kochba-Aufstand bezogen werden". In her **note 62**, M. FUCHS writes: "Zu den Datierungskriterien *BMCRE*, III, 1936, XXII-XXVIII, bes. CXIV-CXVIII; Beispiele *ibid.* 315-316, Nr. 581-588, Taf. 58; 16-18; vgl. CAFIERO 1986, 13, Abb. 2; zur Datierung s. auch KING 2007, 110".

*Contra*: M. R.[ADNOTI]-ALFÖLDI 2000, 103: "**La scena principale** [on Hadrian's *adventus* relief, here **Fig. 91**] **si svolge in primo piano: la Dea Roma porge ad Adriano il globo quale segno del potere** [with n. 5, providing references and further discussion, quoted *verbatim infra*, in volume 3-2, at *Appendix IV.c.1.*; my emphasis]. - This has been rejected by M. FUCHS 2014, 13, n. 61 (quoted *verbatim supra*).

In this book on Domitian, at *A Study on the consequences of Domitians assassination* (see below), I have now followed the interpretation by M. R.[ADNOTI]-ALFÖLDI 2000, 104, in believing that this relief, here **Fig. 91**, shows Hadrian's *adventus* into Rome on 9th July AD 118, when he entered Rome for the first time as emperor.

In my earlier publication (2017), I had agreed with Michaela Fuchs's (2014) above-quoted conclusion (also with her interpretation and dating of the inscription *CIL* VI 40518), since the Bar Kokhba Revolt lasted from AD 132-135; cf. C. HÄUBER 2017, 518; cf. p. 247, Fig. 5.7 [= here **Fig. 91**], p. 246 (on M. FUCHS's 2014 interpretation and dating of the inscription *CIL* VI 40518, which she attributes to this Arch of Hadrian), p. 248. But because of Werner Eck's (2019b) new interpretation and dating of the inscription *CIL* VI 40518, I have changed my mind.

See now *infra*, in volume 3-2, at *A Study on the consequences of Domitians assassination ... Or : The wider topographical context of the Arch of Hadrian alongside the Via Flaminia which led to the (later) Hadrianum and to Hadrian's Temples of Diva Matidia (and of Diva Sabina?)*. With a discussion of Hadrian's portrait-type Delta Omikron ( $\Delta o$ ) (cf. here **Fig. 3**) ...; at *Introduction*; at Section I. *The motivation to write this Study*: W. Eck's (2019b) new interpretation of the inscription *CIL* VI 40518, the decision to correct my own relevant errors in my earlier study (2017), and the subjects discussed here, as told by the accompanying figures and their pertaining captions; and at Section XI. *New research on Trajan and Hadrian ...*

<sup>220</sup> G. KOEPEL 1969, 192: "Auch das Bewegungs- und Standortmotiv und die Ausrichtung jeder einzelnen Figur spielen eine Rolle. So muß die amazonenhafte Göttin in den meisten Reliefs wegen ihres Standes und ihrer Wendung als *Virtus* gedeutet werden, die den Kaiser führt oder ihm beisteht (siehe S. 150). Nur im hadrianischen *Adventus* (Bild 9 [= here **Fig. 91**]) kann diese Gestalt als Roma erkannt werden, weil sie den Kaiser empfängt (siehe S. 156)".

who discussed the problems of identifying some of the allegorical figures, which appear in the reliefs of the Arch of Trajan at Beneventum<sup>221</sup> (to this arch I will come back below; cf. *infra*, at Chapter II.3.3., and here Fig. 46).

Only after this Chapter was written, did I have the chance to read the apt observations of Hans Rupprecht Goette (1988; cf. *supra*, n. 221), concerning the decisive differences in the constructions of the *Dea Roma* and of *Virtus*. Goette, too, identifies the amazon-like figure on Frieze A of the Cancellaria Reliefs as *Virtus*, and states, that both, *Dea Roma* and *Virtus*, are among those representations that may wear the "Fellstiefel" (*mullei*). Concerning *Virtus*, Goette (1988, 406) writes:

"Zumeist ist es *Virtus* (Abb. 7 [*i.e.*, the here-so-called *Dea Roma* on Frieze A, here Fig. 1]) [with n. 13], die eine Qualität des siegreichen Kaisers verkörpert". Whereas on the *Dea Roma*, Goette (1988, 406-407) remarks: "dagegen ist die Göttin Roma (Abb. 8 [*i.e.*, the *Dea Roma* on Hadrian's *adventus* relief; cf. here Fig. 91]) [with n. 14] dem Kaiser gleich gestellt, und sie tritt - entsprechend ihrer Funktion als Ortsgottheit - nicht in Szenen auf, die im Feld, sondern nur in solchen, die in oder bei der Hauptstadt anzusiedeln sind".

In his notes 13 and 14, Goette provides references.

Let's now return to Koepfel's earlier observations concerning the iconography of *Virtus*.

Koepfel (1969)<sup>222</sup> has also discussed the fact that, because of this identical iconography of both, the amazon-like figure on Frieze A could just as well be identified as either one: *Dea Roma* or *Virtus*. He himself identified

<sup>221</sup> cf. M. PFANNER 1983, 67-68 (on *Dea Roma*): "Wenn sie ohne Beschriftung allein und im Amazonentypus erscheint, ist sie von *Virtus* nicht zu unterscheiden"; p. 68 (on the amazon-like figure on Frieze A, which he identifies as *Virtus*); elsewhere on p. 68: "*Virtus* tritt also dem Kaiser nicht als selbständige Gottheit gegenüber [*i.e.*, as *Dea Roma* does], sondern begleitet ihn als Verkörperung einer seiner >Tugenden<"; and elsewhere on p. 68: "Es zeigt sich, daß Roma und *Virtus* in ihrer Art gänzlich verschieden sind, Roma ist eine selbständige Göttin, die dem Kaiser als gleichberechtigter Partner gegenübertritt. *Virtus* ist immer die *Virtus Augusti*, die zusammen mit anderen Eigenschaften den Kaiser begleitet und eine >Tugend< von ihm ausdrückt".

Consequently, S. LANGER and M. PFANNER 2018, 51-52,76, identify the amazon-like figure on Frieze B as the *Dea Roma*; cf. p. 76: "Im Hintergrund thront die mit Speer und Helm gerüstete Roma/*Virtus* (Figur 2) und blickt auf das Geschehen in der rechten Frieshälfte. Ihr Thronessel steht auf einem glatten Postament, das sie über die anderen Figuren hinaushebt. Ikonographie - Bewaffnung, Chiton, nackte Brust und Schulter - decken sich bekannterweise bei Roma und *Virtus*. Da *Virtus* in narrativen Kontexten meist der Hauptfigur beigeordnet ist oder sie begleitet, sprechen die Darstellungsform und die Szenerie auf Fries B eher für Roma [with n. 118, providing references concerning these controversial opinions]".

S. LANGER and M. PFANNER 2018, 45-46 identify the amazon-like figure on Frieze A as "Roma/*Virtus*" (for discussions, cf. *infra*, at Chapters V.1.e) and V.1.i)).

For a definition of the construction of *Virtus* by T. GANSCHOW 1997, 274, cf. *infra*, n. 236.

Cf. G.M. KOEPEL 1984, 7: "Die aktive Haltung von Kat. 7/9 [*i.e.*, the amazon-like figure on Frieze A; here Figs. 1 and 2 drawing: figure 9] spricht meines Erachtens eher für *Virtus* als Roma [with n. 42, providing references]. In Kat. 8/2 [*i.e.*, the here-so-called *Dea Roma* on Frieze B; here Figs. 1 and 2 drawing: figure 2] möchte man wegen Honos rechts [*i.e.*, the here-so-called *Genius Populi Romani*; here Figs 1 and 2 drawing: figure 13] auch lieber *Virtus* erkennen [with n. 43: "Die beiden Götter nehmen im Hintergrund eine deutlich parallele Haltung ein"]. Die Ikonographie von *Virtus* und Roma ist aber wohl mit Absicht äußerst ähnlich gehalten, so daß beide Ideen mit wechselnder Stärke mitschwingen. Dazu s.[siehe] FITTSCHEN, Arch. Anz. 1972, 758". Cf. K. FITTSCHEN 1972, 758: "Auch Roma und *Virtus* können in der Bildkunst gleichwertiges Aussehen haben [with n. 52, providing references], repräsentieren also ebenfalls gegeneinander austauschbare Werte". For a good analysis of the amazon-like figure on Frieze A, interpreted by her as *Virtus*, cf. also J.M.C. TOYNBEE 1957, 9-10 (quoted *verbatim infra*, n. 233).

Cf. H.R. GOETTE 1988, 403-404 (on his observation that both, *Dea Roma*, and *Virtus*, are among the representations that are shown as wearing the "Fellstiefel", *mullei*).

<sup>222</sup> G. KOEPEL 1969, 138-144, writes: "Der Fries A vom Palazzo della Cancellaria mit dem Auszug Domitians in den Krieg [with n. 11, providing references]"; p. 141 (he himself was of the opinion that the amazon-like figure on Frieze A represents *Virtus*): "Bevor wir die Frage nach der Deutung des Reliefs fortsetzen, sollen drei Punkte besprochen werden: die Deutung der Göttin hinter dem Kaiser, die Geste des Kaisers, das Standmotiv der Kaisers.

Vom Typus her gesehen kann die Göttin hinter Domitian sowohl *Virtus* als auch Roma sein. Demzufolge ist auch die Forschung über diese Frage geteilter Meinung [with n. 22: providing references for both opinions]. **Für Roma könnte der Platz der Figur in der Nachbarschaft der Genien sprechen. Doch in einer Hinsicht unterscheidet sie sich wesentlich von den beiden Genii: sie steht nicht wie diese, sondern stürmt vorwärts wie Mars und Minerva. Mit diesen beiden gemeinsam geleitet sie den Kaiser in den Krieg** [with n. 23, providing references]. Die Zugehörigkeit der Göttin zu den Gestalten, die den Kaiser in den Krieg führen, steht jedoch im Widerspruch zu einer Deutung als Roma, denn die Stadtgöttin könnte die beiden Genii, die ja die Stadt vertreten, nicht verlassen. Aus diesem Grund ist hier *Virtus* zu sehen.

this figure on Frieze A as *Virtus*, and that because of the following reasons. First of all he asserted that the amazon-like figure on Frieze A "stürmt vorwärts" ('is storming forward'), exactly as Mars and Minerva on Frieze A (who are moving very fastly, and who, without any doubt, precede Domitian to his military campaign). But as we shall see below, Koeppel's assertion that the amazon-like figure on Frieze A 'storms forward', is *not* true. And since Koeppel thought that the amazon-like figure - because of her alleged energetic movement forward - was meant by the artists as accompanying Domitian to his military campaign, exactly as Mars and Minerva on Frieze A, this figure, in his opinion, could not be identified with *Dea Roma*. Because *Dea Roma* could not possibly have been meant by the artists as leaving behind at Rome the *Genius Senatus* and the *Genius Populi Romani*, who are standing next to the amazon-like figure on Frieze A. Then Koeppel (1969) compared this, in reality standing, amazon-like figure on Frieze A with undisputed representations of *Virtus* on sarcophagi, but without illustrating his comparisons. Koeppel, after comparisons with representations of *Virtus* on lion-hunt sarcophagi, came to the conclusion that the amazon-like figure on Frieze A appears at exactly the same location within the composition, as *Virtus* on these sarcophagi, and that this amazon-like figure also moves and acts exactly like *Virtus*. Therefore, this amazon-like figure on Frieze A represents, in Koeppel's opinion, *Virtus Augusti*. When looking at those representations of *Virtus*, which were also discussed by Kleiner<sup>223</sup>, and by Thomas Ganschow, some of these images show *Virtus* indeed as moving very quickly.

Ganschow who, like Koeppel, identifies the amazon-like figure on Frieze A as *Virtus*, argues similarly like him: "Wohl kaum eine römische Personifikation dürfte ikonographisch so schwer faßbar sein wie V.[irtus], deren Ähnlichkeit zu Roma in vielen Fällen eine eindeutige Benennung unmöglich zu machen scheint. Dennoch muß dem antiken Betrachter unmißverständlich klar gewesen sein, wen er vor sich sah ..."; "Die Frage, welche Figuren als Roma benannt werden dürfen, ist bei Pfanner [1983] 67-68 ausführlich erörtert". Ganschow elsewhere characterizes *Virtus* as follows: "... bilden ihr starker Ausfallschritt und die auf das Jagdwild weisende Handbewegung charakteristische Motive, die auch ihr Erscheinungsbild bei der *profectio* oder dem Aufbruch zur Jagd prägen ([cf. his cat. nos.] 38-43): mit einer Geste fordert sie die Figur, die sie

---

Nicht nur aus Überlegungen, die das Relief selbst zum Gegenstand haben, sondern auch durch andere Denkmäler wird diese Deutung unterstützt. Löwenjagd-Sarkophage des dritten Jahrhunderts zeigen hinter dem zu Pferde jagenden Feldherrn eine amazonenhafte Göttin, die in diesem Zusammenhang auf keinen Fall Roma sein kann [with n. 24, with reference]. Die Verbindung von *Virtus* und Jagd ist bekannt [with n. 25, with references]. Dicht hinter dem Jäger selbst stürmt seine *Virtus*. Ihre heftige Bewegung und ihre Gestik bringen überzeugend den anfeuernden Charakter der Göttin zum Ausdruck. **An der gleichen Stelle, auch weit ausschreitend, mit einer anspornenden Geste dem Kaiser zur Seite stehend, befindet sich die Göttin des Reliefs von der Cancellaria. Man kann also mit Sicherheit hier die *Virtus Augusti* erkennen** [my emphasis];

cf. pp. 141-142 on the gesture, made by Domitian on Frieze A with his right hand. Such a gesture is called in different contexts by ancient literary sources "*dextra elata* [my emphasis]". Cf. p. 142: "Wie Franz Cumont gezeigt hat, findet sich dieser Gestus erstmals im Kult der alten semitischen Völker [with n. 30, with reference]. So hat sich bereits Vespasian darstellen lassen [with n. 32, with reference]. In der gleichen Haltung wie Vespasian erscheint Helios-Sarapis in domitianischer Zeit auf alexandrinischen Münzen [with n. 33, with reference]. Es wird nicht befremden, daß eine solche östliche Ikonographie gerade in flavischer Zeit in Rom eindringen konnte, war doch Vespasian selbst in Alexandria zum Imperator ausgerufen worden [with n. 34: quoting: "Tac., hist. 4, 81-82"; for that, cf. *infra*, n. 455, in Chapter III.];

cf. p. 143 on the gesture, called "*ingens dextra* [my emphasis]" by other ancient literary sources. According to KOEPEL, this is applicable to the gesture, made by Domitian: "*Ingens dextra* ist also in domitianischer Zeit gleichbedeutend mit *magnus dux* ... **Die ingens dextra des Kaisers im Relief A von der Cancellaria wird Verderben über seine Feinde bringen, die er, wie Victoria zeigt, besiegen wird** [my emphasis]" (for further discussion of the gesture, made by Domitian, cf. *infra*, at n. 246, in Chapter I.2.1.a), and *infra*, in Chapter III., ns. 382, 383);

cf. p. 143: "**Im Standmotiv des Kaisers [of Domitian on Frieze A] braucht man kein Zögern zu erkennen, denn wie die Victoria zeigt, Domitian ist der Sieg gewiß** [my emphasis]". In the following, KOEPEL explained that he took the fact that Domitian (after walking up to this point) has come to a halt, as a means, by which the artist stressed that Domitian is the centre of the entire composition of Frieze A; continuing on p. 143 as follows: "Jede Figur schaut auf ihn oder ist auf ihn bezogen. An dieser Stelle ist der Mittelpunkt der ganzen Komposition. Das Auge des Betrachters wird dorthin geleitet und verweilt dort".

<sup>223</sup> Cf. D.E.E. KLEINER 1992, 390-392: "Hunt Sarcophagi"; cf. her Fig. 360. "Lion Hunt Sarcophagus, 230-40. Paris, Musée du Louvre ...", and her comments on this sarcophagus on p. 390: "... lion hunt sarcophagi ... were produced between 220 and 280. In their fully developed form, such as the sarcophagus now in Paris of 230-40 (fig. 360), these lion-hunt sarcophagi depict the departure for the hunt and the hunt itself. In the former scene, the hunter, located on the left side of the front of the sarcophagus, receives the reins of his horse from a groom. The rest (nearly three-quarters) of the scene, represents the hunter on horseback. He is accompanied by *Virtus*, at whose urging he draws back his right arm and gets ready to plunge a spear into the pouncing lion ...".

begleitet, zum Handeln auf, z.T. [zum Teil] drängt sie sie geradezu (z. B. Cancellariarelief A: 38 [cf. here Fig. 1; **Figs. 1 and 2 drawing: figure 9**])"<sup>224</sup>.

Now, since Koepfel's and Ganschow's comparisons of the amazon-like figure, depicted on Frieze A, with representations of *Virtus* on coins, medallions and sarcophagi, all date to later periods than the Cancellaria Reliefs, we might object to their hypothesis, to identify the amazon-like figure on Frieze A as *Virtus*, that at the time, when the Cancellaria Reliefs were carved, those iconographies were possibly not as yet clearly differentiated between *Dea Roma* and *Virtus*. This has been suggested to me by Angelo Geißen<sup>225</sup>, who was so kind as to discuss the matter with me, alternatively, as he likewise remarked to me, both, *Virtus* and *Dea Roma*, may have had in Domitian's time a very close connection. As already mentioned, I should later find out, that this has already been stated as a proven fact by Koepfel (1984), who in his turn referred to observations by Fittschen, made while analysing the panels at the Arch of Trajan at Beneventum (both are quoted *supra*, n. 221). - But, as we shall see below, the solution to the problem discussed here is much simpler than all that.

*Virtus* does not appear on the coins, issued by Domitian, nor does *Dea Roma*, but Minerva does, and that very frequently, as well as the City of Rome, or rather, the many monuments, Domitian had erected there; cf. Laurent Bricault and Richard Veymiers (2018, 145 with ns. 129-130): "En 95/6 [with n. 125], l'Empereur fait frapper une série de deniers reproduisant au revers les façades de plusieurs sanctuaires reconstruits ou édifiés après l'incendie par la volonté impériale ... Elle comprend cinq revers".

For a discussion of those coins; cf. *infra*, in volume 3-2, at *Appendix I.g.1.*). See also *Appendix I.g.3.*).

Samuele Ranucci<sup>226</sup>, to whom we owe these findings, stresses "la complessità e il fascino della monetazione dei tre imperatori flavii". As we shall see, this is also true for that kind of iconographies, which are the subject of this *Study*. Given the gigantic building projects that Domitian undertook at Rome (cf. *infra*), the latter does not come as a real surprise. Besides, as Francesca Ghedini and John Pollini have rightly stressed, Domitian's commissions of buildings at Rome were by no means only grand in their physical dimensions, but their importance lay also in their artistic originality.

Ghedini (1986; cf. *infra*, n. 227), who aptly referred to Domitian's building projects as the: "quasi frenetica attività edilizia dell'ultimo dei Flavi", and who stressed the originality of the idea to show Domitian on Frieze A surrounded by gods, wrote about the Cancellaria Reliefs: "L'incertezza in cui versa la critica è per gran parte motivata dall'originalità di entrambe le composizioni che non hanno precedenti, se non generici [with n. 14], od esiti, se non modificati ad un punto tale che non sia possibile stabilire con i rilievi della Cancellaria una relazione men che superficiale [with n. 15]".

And Pollini writes: "By the end of the first century, Domitian was prepared to go a step further during his Principate (81-96 C.E.) than had his imperial predecessors with regard to direct association with the divine. In one of the state reliefs from the Palazzo della Cancellaria in Rome [with n. 164], Domitian - whose facial features in Panel B [*corr.*: A; cf. here **Figs. 1 and 2 drawing, figure 6: Domitian, figure 5: Minerva, figure 4: Mars, figure 9: Dea Roma; figure 11: Genius Senatus, figure 13: Genius Populi Romani**] (fig. II.37a-c) were recut after his damnation to those of his successor Nerva (96-98 C.E.) - was shown freely mixing not only with personifications but also with Olympian gods. Leading the way to a predestined victory [with n. 165] over the barbarians of the north are Domitian's divine *comites* - his patron goddess Minerva and the Roman war-

<sup>224</sup> T. GANSCHOW: "Virtus", in: *LIMC VIII* (1997) 271-281, the quotes are from his "Kommentar" on pp. 279, 280, 281; cf. p. 277 (for his cat. nos. 38-43). For *verbatim* quotes, cf. *infra*, n. 238.

<sup>225</sup> In a telephone conversation on 26th November 2018.

<sup>226</sup> S. RANUCCI 2009, 360 (on the reverses of coins, minted by Domitian: here appears very frequently his patron goddess Minerva; for that, cf. also, *infra*, n. 267, in Chapter I.3.2.); pp. 360-364 (on the buildings, erected by Domitian at Rome that appear on the reverses of his coins); p. 364 (on coins, issued by Domitian in 88 AD, that relate to the *ludi saeculares*, celebrated by him), Figs. 1-31 (illustrations of the discussed coins); the quote is from p. 358.

Cf. J.M.C. TOYNBEE 1946, 180-181, identified the amazon-like figure on Frieze A as *Virtus*, "in spite of the fact that on coins before the time of Commodus *Virtus* has no shield".

god Mars"; and elsewhere: "... Although it has been asserted that Domitian wished to represent himself as a living god on earth, including the demand that he be called *Dominus et Deus* ("Lord and God"), no evidence in official art or documents substantiates this claim.

**Domitian was, however, the first living Princeps to be represented in official monuments accompanied by Olympian gods, as in Panel A of the Cancellaria Reliefs in the Vatican's Museo Gregoriano Profano.**

Only in nonofficial literature and art was Domitian directly compared to or equated with the gods, following a long-standing private encomiastic tradition ...<sup>227</sup>.

One thing is clear, Domitian provided superb chances for marble workers and all kinds of people, who collaborated with them. Their results are especially noteworthy, as pointed out by Francesca Ghedini and John Pollini [cf. n. 227], in the vast field of politically motivated iconographies. It therefore seems, as if Domitian not only commissioned new buildings at Rome at a truly 'pharaonic' scale - as Julius Caesar's relevant activities have aptly been characterized by Eugenio La Rocca<sup>228</sup> - but also, that Domitian's relevant initiatives, by creating an atmosphere of artistic experimentation and innovation, are nothing less than pioneering.

**In other words, I regard the way that the interactions of Domitian, Minerva and the amazon-like personification are presented on Frieze A - be the latter *Dea Roma* or *Virtus* - and the designs of all three figures, as typical results of this 'atmosphere of artistic experimentation and innovation', in which Domitian or his consultants and these artists were seeking iconographic solutions for new ideas.**

But the main reason, why I am reluctant to agree with the aforementioned scholars that the amazon-like representation on Frieze A should be identified as *Virtus* - who, according to this hypothesis, urges Domitian to leave for (or even to start in the first place?) a military campaign, to which she will accompany him - is still another consideration.

Depending, for which war Domitian is represented as leaving on Frieze A, we must ask ourselves

a), whether there was a need to suggest to Domitian that he conduct this war, let alone to urge him to start this enterprise, and consequently -

b), whether Domitian could have decided to have himself characterized this way.

As we are told by our literary sources, to which we will now turn, Domitian's relative attitudes varied. We know that Domitian, already as Caesar, when both Vespasian and Titus were still in the East, had left Rome to conduct a military 'adventure' (so TOYNBEE, cf. *infra*) in Gaul and Germany. The only reason for that 'adventure' was, as stated by Suetonius and Tacitus, that his elder brother Titus was so extremely successful in this respect<sup>229</sup>.

---

<sup>227</sup> F. GHEDINI 1986, the quotes are from pp. 299 and 291-292 with ns. 14, 15, providing references; on pp. 294-296, she discusses the importance of the iconographic novelty, to represent Domitian on Frieze A together with gods.

Cf. J. POLLINI 2012; the quotes are from p. 103 (with n. 164 on p. 129, providing references, and n. 165, quoted *verbatim infra*, n. 430, in Chapter III., and p. 452, n. 153, which refers to p. 438. For this unjustified reproach most recently; cf. F.G. NAEREBOUT 2022; quoted *verbatim* and discussed *supra*, in Chapter Preamble; at Section II..

<sup>228</sup> E. LA ROCCA 2012, 68: "Il dittatore [Julius Caesar] era poi in procinto di avviare lavori faraonici". Referring to this, I have elsewhere characterized Domitian's building programme, realized at Rome, as likewise being of "'pharaonic' dimensions", cf. C. HÄUBER 2017, 167; cf. pp. 158-168 (for Domitian's building programme in detail); cf. p. 370 (for Julius Caesar). When I wrote this, I was not aware of the fact that already Mario Torelli (1987, 575) has referred to Domitian's relevant actions, as to "il faraonico programma".

<sup>229</sup> R.M. SHELDON 2007, 180, writes: "After the havock wrought by the *Bellum Judaicum* of 66, both sides tried to seek a renewed *modus vivendi* within the Roman provincial organization. Matters progressed under Nerva to the point where the Jews began to hope for a rebuilding of the Temple destroyed in the final phase of the fighting in 70 [with n. 6]. By the time of Trajan, however, it became clear that the Jews would not be able to live under Roman rule without suffering religious prosecution [with n. 7]. Trajan's father was one of the legionary commanders who served in the Great War under Vespasian's command, and the reputation of Vespasian and Titus as

Also after Vespasian's return to Rome, Domitian had very much hoped to conduct himself a military campaign, as we learn from Suetonius (*Dom.* 2) - but (thanks God!) - he had not been given a chance.

Bendinelli was of the opinion that both Cancellaria Reliefs referred to Domitian's just-mentioned military 'adventure' in his youth. Toynbee<sup>230</sup>, discussing Bendinelli's hypotheses, wrote: "Bendinelli's interpretation turns on two main points ... 2. Both friezes are to be connected with an unprovoked military expedition to Gaul and Germany on which Suetonius tells us (*Dom.* 2; cf. Tacitus, *Hist.* iv. 68, 85, 86) Domitian embarked, against the advice of his father's friends, solely for the purpose of securing prestige and influence equal to those enjoyed by Titus. Frieze A shows Domitian's *profectio* for this adventure, undertaken under pressure from the gods and people of Rome; while Frieze B shows his *reditus* from the same excursion to Rome and to the bosom of his father, who appears as congratulating him on his success and as honoured by Victory for the victory that his son has secured for Emperor and Empire".

Toynbee has rightly refuted Bendinelli's hypotheses, also because we know now that the portrait of Domitian on Frieze A (the face of which was later recut into a portrait of Nerva), follows his 'Alleinherrschaftstypus'<sup>231</sup>. This finding precludes Bendinelli's hypothesis of recognizing in this portrait the young Caesar Domitian, who is shown in the course of leaving for this military 'adventure', because it provides for the Cancellaria Reliefs the *terminus ad quem* or *post quem* AD 81.

**Therefore, the war to which Domitian is shown as leaving on Frieze A, must be one of the conflicts, mentioned by Suetonius (*Dom.* 6) :**

"His campaigns he undertook partly without provocation and partly of necessity. That against the Chatti was uncalled for, while the one against the Sarmatians was justified by the destruction of a legion with its commander. He made two against the Dacians, the first when Oppius Sabinus an ex-consul was defeated, and the second on the overthrow of Cornelius Fuscus, prefect of the praetorian guard, to whom he had entrusted the conduct of the war. After several battles of varying success he celebrated a double triumph over the Chatti and the Dacians [with n. *d*]. His victories over the Sarmatians he commemorated merely by the offering of a laurel crown to Jupiter on the Capitol"<sup>232</sup>.

great generals was important to the new emperor [with n. 8]. - In her ns. 6-8, SHELDON 2007, 261-262, provides references. Cf. *infra*, in volume 3-2, at *Appendix IV.c.2.*), where this passage is quoted in more detail.

For Titus and for the *Bellum Judaicum*, the Great Jewish War, cf. also *supra*, Chapter *I.1.*, ns. 171, 189; in Chapter *I.1.1.*, ns. 195, 198, 200, 201; in Chapter *III.*, ns. 404, 412, 413, 455; and in Chapter *VI.3.*, n. 476..

<sup>230</sup> J.M.C. TOYNBEE 1957, 21 (who discussed G. BENDINELLI 1949). For the importance of the revolt in Germany, that had caused Domitian's 'adventure' in 70 AD, cf. also H.-W. RITTER 1982, 25-26. When we read Josephus report (*BJ* 7.4.2, quoted *verbatim infra*, in volume 3-2, at *Appendix I.c*)) about Domitian's military 'adventure' in AD 70, the conclusion seems at first glance inevitable that the Senate granted Domitian precisely for that a separate triumph in AD 71; cf. Josephus, *BJ* 7.5.3, *infra*, at n. 458 in Chapters *III.*; and *V.1.c.3.*).

Also A. LINFERT 1969 was of the (erroneous) opinion that Frieze A of the Cancellaria Reliefs showed Domitian's *profectio* as Caesar to his military 'adventure' in AD 70. Cf. S. LANGER and M. PFANNER (2018, 61, "Abb. 13: Deutungen Relief A: Auswahl der Interpretationsvorschläge"): "Linfert 1969 *profectio* Domitian (**Fig. 6**) bricht gemeinsam mit Soldaten zu dem im Jahre 70 n. Chr. versuchten Gallien-Germanien-Feldzug auf, der jedoch vorzeitig beendet wurde und von Domitian hier in einem für den Princeps ruhmreichen Sinne umgedeutet wurde [my emphasis]". - For the numbering of the figures on Frieze on both Cancellaria Reliefs; cf. here **Figs. 1 and 1 drawing**.

<sup>231</sup> for that, cf. *infra*, n. 302., in Chapter *II.1.a*).

<sup>232</sup> Suet., *Dom.* 6: translation J.C. ROLFE (*Loeb Classical Library*, 1920); in his note *d*, he wrote: "Tac. *Agr.* 39 says that this unjustified triumph over the Germans [*i.e.*, over the Chatti] (and the Dacians) was a laughing stock". For the *verbatim* quotation of Tac. (*Agr.* 39); cf. *infra*, at *Appendix I.c*).

For a discussion of Tacitus's relevant assertions; cf. Markus Handy (2015, 34 with n. 90, p. 35, n. 92, and pp. 37-38, 48-50), quoted *verbatim supra*, in Chapter *Preamble: Domitian's negative image*; at Section *I.*, who discusses the fact that Tacitus, in his *Agricola*, denies Domitian's military successes in Germany - which are in reality proven. For all of Domitian's wars; cf. Peter L. Viscusi (1973, quoted likewise *verbatim supra*, in Chapter *Preamble: Domitian's negative image*; at Section *I.*).

For Domitian's war against the Sarmatians; cf. also *infra*, at ns. 304, 305, in Chapter *II.1.a*); and at ns. 343, 345, 346, in Chapter *II.3.1.a*). E. SIMON 1960, 140ff.; and E. SIMON 1985, 552, who assumes that Frieze A of the Cancellaria Reliefs shows Domitian's *adventus* into Rome after his Sarmatian War in 93 AD, has suggested the following. Domitian on Frieze A is depicted as praying to Jupiter, who, in her opinion, was represented on the (lost) fourth slab at the far left end of Frieze A, and that Domitian is on his way to the Temple of Iuppiter Optimus Maximus on the Capitol to dedicate to Jupiter the laurel wreath, which *Victoria* at the far left of Frieze A (which is partly preserved) is carrying. For the *verbatim* quote, cf. *infra*, at n. 352, in Chapter *II.3.2*.

Scholars disagree, whether on Frieze A (provided, they regard the depicted scene as representing a *profectio* at all) Domitian is leaving for his war against the Chatti (in AD 83), or against the Sarmatians (in AD 92). As indicated with the caption of my **Fig. 1**, which illustrates Frieze A, I myself was at first unable to decide which one of Domitian's relevant enterprises it represents (in the meantime, I have come to the conclusion that Domitian on Frieze A of the Cancelleria Reliefs is leaving for his Dacian war in AD 89, which he would celebrate with his (last) triumph the same year.

For a discussion; cf. below in Chapter *The major results of this book on Domitian*; and *infra*, in volume 3-2, at *Appendix IV.d.2.f*).

If Domitian's action and his body language on Frieze A, seen together with the action of the amazon-like figure behind him (here **Figs. 1 and 2 drawing: figures: 6 [Domitian]; 9 [Dea Roma]**), means

**a)** that he himself is reluctant to begin this war (as has been suggested by Hamberg 1945), and -

**b)** that she is urging him to this enterprise (as those scholars suggest, who interpret this figure as *Virtus*), this could mean - provided Suetonius (*Dom.* 6) is telling the truth - that Domitian is, 'realistically' represented, as unwillingly beginning his war against the Sarmatians.

---

For Domitian's triumph over the Chatti (cf. Suet., *Dom.* 6), see also the hieroglyphic inscriptions on the two obelisks at the Temple of Isis at Beneventum, in which this fact is mentioned; cf. *infra*, at Chapter *V.1.i.3*).

F. GHEDINI 1986, 292, argues that Domitian's body language on Frieze A can only be understood as hesitation, when the scene is interpreted as a *profectio*. In her opinion, Frieze A shows Domitian's *adventus* into Rome instead, after his victory in the Sarmatian War (93 AD). Since he resigned to celebrate the triumph, which he had been granted for this victory, Domitian's "gesto di modestia" (with n. 16), or his "pudore degli onori", is represented on Frieze A: Domitian is shown on his way to *Iuppiter Optimus Maximus Capitolinus* to dedicate the "corona d'alloro" to him, as mentioned by Suetonius (*Dom.* 6). Cf. pp. 292-293: GHEDINI does not believe that Domitian's gesture with his right hand may be identified as "Machtgestus", as suggested by Koepfel (with n. 27; for that, cf. G. KOEPEL 1969, 142, quoted *verbatim infra*, at n. 247, in Chapter *I.2.1.a*), nor as a "riferimento ad una simbologia culturale, per cui il gesto si configurerebbe come atto di benedizione o di preghiera" (with ns. 28, providing references), but suggests to read it as an "atto di omaggio" (towards Iuppiter obviously). Cf. p. 293 with n. 35: on Domitian's decision, instead of celebrating a triumph for his Sarmatian War, to build a Temple for *Fortuna Redux*, similarly as Augustus had done in 19 BC (cf. p. 292 with ns. 24, 25), who, instead of celebrating a triumph, had built an Altar for *Fortuna Redux*. On p. 294, GHEDINI calls Domitian's relevant attitude: "*recusatio honorum*". Cf. pp. 297-298 (for GHEDINI's interpretation of Frieze B, quoted *verbatim supra*, at n. 181, in Chapter *I.1*).

D.E.E. KLEINER 1992, 191, suggests: "Frieze A (see fig. 159) depicts ... Domitian's departure (*profectio*) for his Sarmatian War in 92-93. Domitian's Sarmatian War gives a terminus post quem of 93 for the reliefs".

Cf. H. MEYER 2000, 136: "Eine ähnlich präzise Auslegung des Frieses A [as in his opinion in case of Frieze B] ist schon deshalb nicht möglich, weil dort am [alleged] ernerischen Originalbestand nur das Kaiserporträt abgeändert worden ist. Eine Weihinschrift an der Baulichkeit, welche die Friese zierte, mag hier Klarheit geschaffen haben. Konkret kämen wohl am ehesten die jeweils mit Triumph zelebrierten und historisch bedeutenden Siege über die germanischen Chatten im Jahre 83 und der Dakerkrieg im Jahre 88 [corr.: 89] in Frage".

Cf. *infra*, in volume 3-2, at *Appendix IV.d.2.f*), where I myself suggest that Frieze A of the Cancelleria Reliefs shows Domitian's *profectio* in the spring of AD 89.

For a discussion of Suet. (*Dom.* 6.1); cf. also J. POLLINI 2017b, 120 with n. 106, and *infra*, in Chapter *V.1.i.3.b*); at Section *I*.

**For the triumphs, celebrated by Domitian**; cf. D. KIENAST, W. ECK and M. HEIL 2017, 109 (quoted in more detail *supra*, n. 82, in Chapter *I.1*):

"Wichtige Einzeldaten ...

Herbst 83 Triumph über die Chatten; Siegername GERMANICUS ...

85 ... (Okt.[ober]/Nov.[ember?]. Aufenthalt in Mösien (Winter 85/86?).

86 Triumph über die Daker ...

89 Abreise aus Rom ... Aufenthalt in Pannonien, Triumph über Daker und Germanen in Rom (Nov.[ember]/Dez.[ember]).

92 Erneuter Aufenthalt in Pannonien.

Jan.[uar] 93 Ovatio de Sarmatis ...".

To all this I will come back below (cf. *infra*, at Chapter *VI.3*.; and *infra*, in volume 3-3, at *Appendix IV.d.2.e*); and at *Appendix IV.d.2.f*).

Cf. S. LANGER and M. PFANNER 2018, 61, "Abb. 13: Deutungen Relief A: Auswahl der Interpretationsvorschläge".

**But because I believe that Toynbee<sup>233</sup>, who rejected Hamberg's relevant hypothesis, was right in stating that such state reliefs never represented anything 'negative' (i.e., showing in this case, so to say, a Roman emperor, unwillingly performing his foremost duty, that of defending the Roman Empire), I find this scenario not very convincing, also because Domitian's attitude to this war, as expressed by the artists on Frieze A, has been interpreted very differently.**

Even more serious seems to me the objection against this scenario - provided again that Suetonius' (*Dom.* 6) information is correct - that Domitian did not celebrate his victory in the war against the Sarmatians with a following triumph; there was presumably no reason to celebrate anything in this case. So why then represent a *profectio* to this war in a public building? But, as we have just seen, Simon (1960 and 1985) was, on the contrary, of the opinion, that Domitian on Frieze A is precisely represented in his *adventus* into Rome after his victory in the Sarmatian War in 93 AD. In addition to this, Ghedini (1986; for both; cf. *supra*, n. 232) has stated the following. Domitian had, of course, been granted a triumph for his Sarmatian War, but, out of modesty, and in order to emulate Augustus, had resigned to celebrate it, and instead built a Temple for *Fortuna Redux* on the *Campus Martius*.

If, on the other hand, Frieze A which, in my opinion, shows a *profectio* instead (cf. *infra*, at Chapter III.), does not represent Domitian's departure for the Sarmatian War, those scholars seem to be right, who have suggested that frieze A shows Domitian's *profectio* to his war against the Chatti: begun voluntarily by Domitian and celebrated with a triumph (but see *supra*, n. 232).

But if that should be true, what then means Domitian's body language on Frieze A, which seems to characterize him as reluctantly leaving for this war? (for various other interpretations, cf. below (n. 233) and *infra*, at Chapter III.) - and what on earth is the amazon-like figure behind him doing?

**All those attempts mentioned so far, that aimed at finding out what Frieze A of the Cancellaria Reliefs may possibly represent, are explicitly or 'between the lines' dependent of Domitian's negative image.**

But at the time, when those above-mentioned interpretations were published, it was not as yet known, that Domitian's negative image had been created at the order of Trajan in order to legitimize his own accession; the relevant texts were written for him by Tacitus and Pliny the Younger (cf. *supra*, n. 232). - After this entire *Study* had (almost) been finished, I have, therefore, added an additional Chapter, with the title *Preamble: Domitian's negative image*, in which this subject is discussed in great detail.

Let's now return to our main subject.

---

<sup>233</sup> J.M.C. TOYNBEE 1957, 9-10, wrote: "We are not attracted by G. HAMBERG's idea [with n. 2, quoting: P.G. HAMBERG 1945, 53] that Domitian had himself depicted here, on an official relief, as seeking to shirk responsibility for an unpopular war by shifting the blame on to Mars and Minerva, the latter of whom being his patron deity, stands close beside him. Such a purpose would, again, be altogether too *negative*; and the objection applies to H. M. Last's view [with n. 1, quoting: H. LAST 1948, 9ff.] that the Emperor intended the frieze to answer an allegation that he was a war-monger, by presenting him as personally reluctant to depart to war. Domitian is certainly not depicted here as rushing headlong to the fight; but religious awe, rather than some form of 'pacifism', would seem to be the natural explanation of his halt. And, incidentally, this halt, in the midst of hurrying figures to left and right, is cunningly devised to rivet our gaze upon the imperial person and to emphasize its solemn dignity. Again, the Amazonian figure to the right of the emperor does not press her hand against his arm, as though she were pushing him on, forcing him to advance unwillingly: she places her hand beneath his elbow with a gesture of support and of encouragement to move in heavenly company. This Amazonian figure is likely to be, not *Roma*, as Dr. Magi holds, but *Virtus*, *Roma's* counterpart, travelling north with the Emperor as the personification of his martial prowess. Were she *Roma*, she would have been seated, or standing stationary, with Senate and People, bidding the Emperor farewell".

Cf. H. LAST 1948, 12-14 (on Domitian's wars and on his relevant attitudes): "... that he [Domitian] went to war (no particular war, but his wars in general) when called on to by Heaven and urged to do so by Rome (and not otherwise) ... For if in its original form it said of Domitian that he was an emperor whose policy it was not to make war without good cause, it could truthfully be made to say the same of Nerva"; cf. p. 13 (on P.G. HAMBERG 1945, 52-53, the author's discussion of Frieze A): "that the emperor's decision to take the field ... is not portrayed as an everyday occurrence, nor as a solemn historic ceremony, but as the result of divine pressure brought to bear against his will, represented as a contrast between his own so apparent hesitation and the fated and therefore irresistible decision of the gods. Can this inseparable combination of resignation and irresolution be regarded as expressing a wish to shirk the responsibility of an unpopular war which the Emperor wished to depict as unavoidable? Perhaps we have no possibility of proving this". Cf. E. SIMON 1960, 139; and L.E. BAUMER 2007, 97 with n. 23.

*The above-summarized discussion leads us to the questions, what the characterizations of the two figures on Frieze A: of Domitian and of the amazon-like representation right behind him (here Figs. 1 and 2 drawing: figures 6 and 9), might mean*

I myself prefer to read this scene as follows. The amazon-like figure is *Dea Roma*, Rome's city goddess. She will stay behind at Rome after Domitian's departure. With her action on Frieze A, she not only encourages Domitian to leave, but assures him at the same time of the support of the City of Rome. Rome is, so-to-say, Domitian's solid 'home base', on which he can rely, and to which he can safely return - not exactly a matter of course, when we think of what Domitian had himself witnessed at Rome, especially in AD 69, the 'year of the four Emperors'.

For Domitian's own experiences during this civil war, the siege of the *Capitolium*, where the Flavians had fled from the Vitellians on 18th December 69 AD, and Domitian's escape from there on 19th December, cf. *supra*, in Chapter *Preamble*; Section *III.*; at point *1.*); and *infra*, in volume 3-2, at *Appendix I*.

*Dea Roma's* action, trying to push Domitian forward - in a very friendly way, we should add - seen in connection with *Victoria's*, who appears in front of Domitian at the far left of Frieze A, can also mean that both, *Dea Roma* and *Victoria*, each in their own way, thus assure the emperor that his campaign will be victorious<sup>234</sup>, thanks to their support (and obviously also thanks to the support of Minerva and Mars, who likewise appear on Frieze A). If so, this interpretation would leave Domitian the benefit, of having himself decided to begin this war. According to this interpretation, Domitian and *Dea Roma* are two different personalities, one human, the other divine, who are characterized on Frieze A as being close partners in this enterprise. To the much discussed question, what Domitian's gesture of his right hand on Frieze A might mean, and to Mars' and Minerva's rôles on this panel, I will come back below, and again *infra*, in Chapter *III.*, but Minerva's main function will be discussed immediately in the following.

Another, and in my opinion, decisive argument in favour of assuming the presence of *Dea Roma* in this context on Frieze A, is the fact that she is also represented on Frieze B - exactly as the *Genius Senatus* and the *Genius Populi Romani*, who are likewise pictured on both friezes. *Virtus*, on the contrary, does not appear on Frieze B. Besides, it is certainly not by chance that the artists placed the *Dea Roma*, the *Genius Senatus* and the *Genius Populi Romani* (on both friezes in exactly that sequence) on both friezes together in the same 'half' of the composition: on Frieze A they are all to be found on the right hand 'half' - which means, that, after Domitian's departure, they will all stay behind at Rome. On Frieze B, they all appear on the left hand 'half' of the composition - which means, they are all (of course) at Rome, when Vespasian approaches the city in his *adventus*. Note that on both friezes, this 'half' of the composition, where, in my opinion, the *Dea Roma*, the *Genius Senatus* and the *Genius Populi Romani* are to be found, is much larger than the other 'half'. By means of this decision, the artists, or presumably Domitian himself, indicated in a simple, but very effective way, the great importance, which the City of Rome, the Senate and the Roman People (*i.e.*, together the 'SPQR') actually had for him - in regard to both enterprises, represented on Frieze A and B.

Besides, the mutual estimation of emperor and Senate have also been expressed otherwise, as Dietrich Boschung (2012, 44) rightly observes in his description of the *Genius Senatus* on frieze A:

"Er hält ein Szepter mit der Büste des Kaisers und bringt damit die enge Verbindung von Herrscher und Senat zum Ausdruck [with n. 36, providing references]". - So also Anne Wolfsfeld (2014, 201-202, quoted *verbatim infra*, at Chapter *V.1.e*).

---

<sup>234</sup> so already, in the case of *Victoria*, F. MAGI 1939, 205 (quoted *verbatim supra*, n. 113, in Chapter *I.1*); and G. KOEPEL 1969, 143, quoted *verbatim supra*, n. 222. Cf. H. MEYER 2000, 133: "Das Thema des Friezes [A] ist eine bevorstehende militärische Aktion - deren glücklicher Ausgang vorweggenommen ist"; so also D. BOSCHUNG 2012, 44, quoted *verbatim infra*, at Chapter *I.2.1.c*); and J. POLLINI 2012, 103 with n. 165 on p. 129, quoted *verbatim infra*, n. 430, in Chapter *III*. J. POLLINI 2017b, 116-117, writes concerning the figure of *Victoria* at the far left end on Frieze A, who leads the procession represented on this panel: "This is a proleptic reference to a coming victory".

The scholars<sup>235</sup> quoted above assume instead that the amazon-like figure on Frieze A is Domitian's *Virtus*, because this female (allegedly) acts and moves in a way that is typical of this allegorical representation. The specific iconographic schemes of *Virtus*, that have been compared by those scholars with the amazon-like figure on Frieze A, are known from representations, which all date to later times than the Domitianic period.

If we follow that hypothesis, the scene on Frieze A means something else: it is *Virtus*, who either urges Domitian to start this military campaign in the first place, or else, *Virtus* is urging him at this very moment to leave Rome for this campaign; in addition, *Virtus* will accompany him, and she will stay with him throughout this whole enterprise.

**We must imagine that, 'in reality', the allegorical representation *Virtus* is part of Domitian's character.**

As I have only realized after this *Chapter* was written so far, this thought has already been expressed by Michael Pfanner<sup>236</sup>, so, in a certain sense, both (Domitian and 'his' *Virtus*) are one and the same.

**Therefore - paradoxically - Domitian appears to be a far 'stronger' personality, when we envisage him as being paired with the amazon-like figure on Frieze A, and that female is regarded as *Dea Roma*, than, when we imagine him as being 'paired' with the same amazon-like figure, but that is identified as his own *Virtus* instead (!).**

But my impression that Domitian does not need the amazon-like figure on Frieze A to urge him to this enterprise, was wrong (and right) at the same time.

Right was this intuition in so far, as Domitian, in the context, in which he appears on Frieze A, does not need the amazon-like figure for this specific function, but wrong, as he actually follows the urging of another figure on Frieze A to conduct this war: namely his personal patron goddess Minerva (who, as I hope to show below, therefore precedes him on Frieze A; cf. here **Figs. 1 and 2 drawing; figure 5 [Minerva]; 6 [Domitian]; 9 [Dea Roma]**). This has always been suggested, also by those scholars, who identify the amazon-like figure on Frieze A as *Virtus*. But contrary to them, I hope to show in the following, that, therefore, Domitian does not *need* the additional representation of 'his' *Virtus* on Frieze A.

**If we believe for a moment that my identification of the amazon-like figure on Frieze A as *Dea Roma* is correct, it seems that the artists, who created this figure, have emphasized some more features in her design that corroborate my hypothesis.**

Contrary to the graciously and swiftly moving Minerva on the same panel (**figure 5**), this amazon-like female on Frieze A (**figure 9**) is at first glance not an overwhelmingly successful invention, *inter alia* because the artists seems to have represented her as moving very awkwardly - but exactly that may have been intentional.

First of all, she is *not* walking, as I, at first, have erroneously written above; the same had already been suggested by Koepfel<sup>237</sup>. As the composition of this scene implies, this female has obviously rushed up to this point, where she appears on Frieze A, but has now come to a sudden halt. Her left leg is completely stretched out. The artists thus indicate her previous fast, striding movement, coming from the far right (and from behind the *Genius Senatus* - her lower left leg and foot are still behind him).

<sup>235</sup> G. KOEPEL (cf. *supra*, n. 222); M. PFANNER (cf. *supra*, n. 221); and T. GANSCHOW (cf. ns. 224, 238). - Contrary to them, J. POLLINI 2017b, 117, 118, identifies the amazon-like figure on Frieze A with the *Dea Roma*.

<sup>236</sup> cf. M. PFANNER 1983, 67, 68, quoted *verbatim supra*, n. 221. As rightly observed by T. GANSCHOW 1997, 273, the concept of the Romans concerning *Virtus* cannot be translated in a satisfactory fashion, he mentions for example the "vier Kardinaltugenden des Augustus" ('Augustus' four cardinal virtues'), that were mentioned on his *clipeus virtutis*, the inscription of which read: "*Mon Anc. 6,19: virtutis clementiae iustitiae pietatis causae*".

<sup>237</sup> so G. KOEPEL 1969, 141 (quoted *verbatim supra*, n. 222), who describes both, the here-so-called *Dea Roma*, his *Virtus*, and Domitian.

By means of the composition, the artists shows also, that her place in the foreground, next to Domitian, has been reserved for her, but the fact that her lower left leg still disappears behind the *Genius Senatus*, clearly indicates also, that she has arrived here at the very last moment, right before the *profectio* ceremony has actually begun (for that hypothesis, cf. *infra*): whereas Domitian, the *Genius Senatus* and the *Genius Populi Romani* have been standing here since quite some time already, waiting for the ceremony to begin, otherwise their quiet demeanor could not be explained.

Contrary, to what Koeppel suggested, this amazon-like figure (**figure 9**) does not 'storm forward' to the left, together with Mars and Minerva, but has definitely 'stormed here', to this appointment, from the right. Contrary to her left leg, the artists have planted her right foot, with its entire sole, firmly on the ground, and her right knee is bent: she leans forward, trying to push with all her physical strength Domitian, whom she touches with her right hand under his left elbow.

In order to push Domitian effectively forward, the amazon-like figure (**figure 9**) would better put both hands flat on his back and then lean forward, but the artists could not represent her in this more convincing way: her hands would thus be invisible for the beholder, apart from the fact that the figure needs also to carry a shield on her left arm, in order to be recognizable. But as already said above, the artists may just as well have intended to express something else, namely that the amazon-like figure does *not* intend to actually 'push' Domitian, but that she touches him, as Toynbee has convincingly suggested: "with a gesture of support and of encouragement to move in heavenly company" (cf. *supra*, n. 233).

**This amazon-like figure's (figure 9) heavy movement towards Domitian on Frieze A is not only stressed by her forward bent, but also by the momentum, her whole design receives through her left, outstretched leg. But by planting her right foot so steadily on the ground, the artist shows also, that she will not go any further, she will stay, where she currently stands.**

Besides, this amazon-like figure on Frieze A cannot possible have been meant by the artists, who designed her and Domitian, as 'storming forward' (so KOEPPEL), since the artists have characterized Domitian as standing composedly, where he is, with both soles of his feet planted firmly on the ground (as also described by KOEPPEL, cf. *supra*, n. 222).

If my analysis of the amazon-like figure (**figure 9**) on Frieze A, seen in relation to Domitian, should be true, this female may be identified as the *Dea Roma*. As we shall see below, it is even possible that the artists, by designing the *Dea Roma* in this peculiar way, have indicated, where exactly she stands.

**It is interesting to note that Domitian (figure 6) is characterized on Frieze A as being by no means impressed, let alone touched or at least physically 'moved' by the great efforts, the amazon-like figure immediately behind him (figure 9) undertakes - thus urging him to move. It seems at least at first glance that he does not show any reaction, because Domitian does not look at the amazon-like figure (to this I will come back below, adding my relevant thoughts 'at second glance'; cf. *infra*, at Chapter I.2.1.a)).**

*A comparison of Thomas Ganschow's Domitianic iconographic scheme of  
Virtus (his cat. nos. 31-37) with the amazon-like figure on Frieze A*

In my opinion, also this lack of emotional commitment - for example expressed by a glance - on the side of Domitian (here **Figs. 1 and 2 drawing: figure 6**) on Frieze A, in regard to this amazon-like figure (**figure 9**), speaks against the identification of this female as *Virtus*. This is at least true in the case of an iconographical scheme of *Virtus*, the invention of which is datable in the Domitianic period (*i.e.*, GANSCHOW's cat. nos. 31-37)<sup>238</sup>. As most other scholars, I assume that also the Cancellaria Reliefs are Domitianic.

---

<sup>238</sup> cf. T. GANSCHOW 1997, 273-281 s.v. *Virtus*; p. 276; cf. p. 276, cat. no. "31. Domitianisch (= Honos 142). Nördl.[iches] Durchgangsrelief des Titusbogens. V.[irtus] ... mit Speer in der Rechten führt das vorderste Pferd der Triumphalquadriga am Zügel,

I suggest here, therefore, to compare this iconographic scheme of *Virtus* with the amazon-like figure on Frieze A of the Cancellaria Reliefs (**figure 9**), which has so far not been done, precisely *because* this iconographic scheme of *Virtus* is Domitianic.

The iconographic scheme of *Virtus*, discussed by Ganschow himself together with the amazon-like figure on Frieze A (cf. his cat. nos. 38-43), apart from his cat. no. 38, the amazon-like figure on Frieze A itself (**figure 9**), is only known from representations dating to later periods. But, as we shall see below, the figure of *Virtus* in the latter iconographic scheme (the only exception being GANSCHOW's cat. no. 38), has been derived from the earlier Domitianic scheme (*i.e.*, GANSCHOW's cat. nos. 31-37). I likewise hope to demonstrate in the following, that Ganschow's cat. no. 38, the amazon-like figure on Frieze A, follows a different iconography than his cat. nos. 39-43, and therefore cannot be identified as *Virtus*.

**In the Domitianic scheme of *Virtus*' iconography (*i.e.*, GANSCHOW's cat. nos. 31-37), the male, whom *Virtus* accompanies, is characterized as caring for her, and she in her turn is characterized as caring for him. Domitian (figure 6) too, as depicted on frieze A, cares very much, but not for the amazon-like female, who follows him on Frieze A (figure 9), but instead for that female, who precedes him: his personal patron goddess Minerva (figure 5), as he has ordered the artists to emphasize on Frieze A: both look at each other.**

In addition to this, both are shown as having chosen for their attire the same, very unusual head-type of Medusa - with closed eyes ! - she for her *aegis*, he as decoration of the *fibula* of his *paludamentum*. It is regrettable that Domitian's face on Frieze A has not survived, but even so, we can still imagine the mutually

---

während sie nach links läuft und sich zum Kaiser umwendet, der von Victoria bekränzt wird. Neben dem Wagenkasten, hinter den Pferden, schreitet Honos"; cf. p. 276, cat. no. 32. Also in this case, *Virtus*, moving to the left, turns her face around to the right, and looks at the (lost) male, whom she precedes, and he probably looked in her direction: "Fr.[agmentarisches] Relief, Marmor, Vatikan, Cortile del Belvedere 10.22, Domitianisch.- V.[irtus] mit (wohl richtig ergänzter) bedeckter Brust neben den Pferden einer (verlorenen) Triumphquadriga nach l.[inks] schreitend, sich umwendend, in der Linken geschultertes *Vexillum*"; cf. p. 276, cat. no. See also M. PFANNER 1983, *passim*, providing an excellent documentation of the Arch of *Divus Titus* on the *Velia* (cf. here **Fig. 120**); cf. his Taf. 45: "Triumphatorrelief"; and D.E.E. KLEINER 1992, 183-191, Figs. 154-157; p. 183: "The Arch of Titus. The earliest of the three major Domitianic state monuments is the Arch of Titus (figs. 154-157), which was erected by Domitian in honour of his brother after Titus' death in 81". According to P. Liverani 2021, 83, the Senate had planned to build the Arch of Titus shortly before Titus's premature death, but it was actually built by Domitian; cf. the *verbatim* quote, *infra*, in Chapter *The major results of this book on Domitian*.

See for the Arch of *Divus Titus* on the *Velia* PFANNER'S and KLEINER'S further observations, discussed *infra*, **ns. 477-479.**, in Chapter VL3.

exchanged glances, which the emperor and 'his' Minerva shared. And because of the way, the artists have placed the two protagonists - who touch each other - within Frieze A, their composition even carries a distinct romantic touch<sup>239</sup>.

Minerva was Domitian's patron goddess, and he claimed to be her son; we know from literary sources that he built three temples for her in Rome. Interestingly, Domitian's Minerva was actually the goddess Isis-Neith of Saïs in Egypt, or in other words Minerva-Isis, which means that Domitian claimed to be the son of Isis, as the Pharaohs of Egypt had done<sup>240</sup>.

**On the reverse of a *sestertius* of AD 92-94, where Domitian appears as a victorious, cuirassed general, he is flanked by two representations: 'his' personal patron goddess Minerva (left), who has obviously led him to this victory, and *Victoria* (right), who is crowning him with a laurel wreath. In a certain sense, we can regard such coin images as quintessential abbreviations of the multifigured scene, represented on Frieze A of the Cancellaria Reliefs - or vice versa<sup>241</sup>.**

In my opinion, in lack of a personal patron goddess, Domitian could in theory just as well have ordered his artists to represent *Virtus*, instead of 'his' Minerva, as flanking him, together with *Victoria*, on this coin image. But because Domitian had his personal patron goddess Minerva, who, as shown on Frieze A, not

<sup>239</sup> D.E.E. KLEINER 1992, describes the entire scene as follows: "In frieze A, Domitian is led by Victory (only her left wing survives), by a lictor with a fasces with an ax, by Mars, the god of war, dressed in cuirass and with helmet and shield, and Minerva, goddess of war, clad in aegis and helmet. Minerva was Domitian's divine patroness, and panel A depicts visually their special bond. They gaze at one another intently, and Domitian's right arm projects forward and seems to become one with the upper part of Minerva's right arm; the lower part of her arm bends back toward the emperor. Domitian's relationship with the goddess Roma is also a close one. The emperor, dressed in a short tunic covered by a mantle (his traveling costume), is propelled forward by Roma (or possibly *Virtus*), identified by her short Amazonian costume, with one breast bare, and her helmet. She places her right hand under the emperor's elbow and urges him on his way".

For the unusual head type of Medusa, showing the gorgo with closed eyes, that both Minerva and Domitian are wearing; cf. M. MAGI 20: "Fig. 17. Fibula di Domiziano" (photo); cf. p. 21: "Fig. 18. Fibula di Domiziano" (drawing).

Cf. G.M. KOEPEL 1984, 29 "[figure 5 on Frieze A:] Minerva ... die Aegis mit einem Gorgoneion, das die Augen geschlossen hat ... Mit der Rechten drückt die Göttin den Nackenschutz ihres Helmes nach unten und enthüllt somit dem hinter ihr stehenden Kaiser [i.e. Domitian, now Nerva] das Gesicht; [figure 6] [on Frieze A: Domitian/ Nerva] Er trägt die tunica, das paludamentum und calcei. Die Fibel auf seiner rechten Schulter ist mit einem Gorgoneion verziert, das die Augen geschlossen hat". For a photo, on which both are visible, cf. the frontispiece of the catalogue, edited by F. COARELLI 2009a.

For the relation of the figures of Domitian and Minerva on Frieze A, cf. F. GHEDINI 1986, 296: "Ma una più puntuale valenza simbolica emerge, se si tien conto che l'elegante <<silhouette>> della dea in marcia con le vesti danzanti intorno al corpo, rielaborazione di un fortunato archetipo greco [with n. 81, providing a reference]". On pp. 296-297 she provides for Minerva-guida, *ducens Athena*, iconographic predecessors dating to the Augustan period.

For the statue-type of the Minerva, that appears on Frieze A, cf. W. SCHÜRMAN 1985, 86-86, 87, 88.

But see now I. ROMEO ("Un'Athena capitolina, il puteale di Madrid e il frontone Est del Partenone", 2020), who convincingly suggests that the statue-type 'Athena in corsa' copies the Athena from the Eastern pediment of the Parthenon at Athens, which shows the 'birth of Athena'. We owe I. ROMEO 2020, 850 with n. 53, the important observation that the figure of Minerva on Frieze A of the Cancellaria Reliefs (cf. here **Figs. 1; Figs. 1 and 2 drawing; figure 5**) is modelled on this statue-type 'Athena in corsa' (!). Cf. *supra*, in *Chapter Introductory remarks and acknowledgements*; and *supra*, n. 74, at Chapter I.1. As I only realized at a second moment, all this had already been observed by W. FUCHS: "Statue der Athena", in: *HELBIG*<sup>4</sup> II (1966) 199-201, no. 1395 (!). For *verbatim* quotes and discussions of W. FUCHS's 1966 and I. ROMEO's 2020 relevant texts; cf. *infra*, in volume 3-2, at *Appendix I.g.1.*

<sup>240</sup> for Domitian's patron goddess Minerva, cf. *infra*, at n. 267, in Chapter I.3.2.; and at n. 430, in Chapter III. For the fact that his patron goddess was Minerva-Isis, cf. C. HÄUBER 2014a, 795-796, Chapter B 32.: "The *Arcus ad Isis* and the goddess Minerva-Isis worshipped by Domitian"; cf. pp. 783-791 (Chapter B 31.).

For the goddess Neith; cf. M. BOMMAS 2018, 101-102.

*Contra*: S. PFEIFFER 2018, 184-185 with n. 47, pp. 185-186, who denies that Domitian, by representing Minerva, showed his reverence for Isis instead.

Cf. *infra*, at Chapter IV.1.1., for the content of the hieroglyphic texts of Domitian's Obelisk, in which Domitian claims to be the son of Isis.

<sup>241</sup> so similarly already J. POLLINI 2012, 103 (after describing the scene on Frieze A, quoted *verbatim supra*, at n. 227): "Such imagery was also reflected in state coinage, as in a *sestertius* of 92-94 C.E. in which a victorious Domitian in cuirass is flanked by Minerva and by Victoria, who crowns him (Fig. II.38)"; with n. 166, providing references. G. KOEPEL 1969, 160-161, with Fig. 11 on p. 161, interpreted this coin image as a representation of an *adventus*; datable 92-94 AD, providing on p. 160 n. 108 a reference for this coin: "BMC. Emp. II 404.406", "der Kaiser ist überhöht dargestellt". Elsewhere on p. 160, he wrote: "Das Datum der domitianischen Münze läßt ebenfalls die *Adventus* Deutung zu, denn der Sieg, auf den das Rückseitenbild hinweist, kann sich nur auf den Krieg in Dakien beziehen, von dem Domitian im Jahre 93 zurückkehrte".

only accompanied him, but who even preceded him to his war, he had - in my opinion - no need to commission this artist to show on Frieze A, in addition to Minerva, also *Virtus*. The same, in my opinion, is likewise true for Domitian's just mentioned coin image. I am suggesting this, because according to Ganschow's final comments quoted above (cf. n. 238) on the various iconographical schemes of *Virtus* (for those comments, see again below), *Virtus* acts in exactly the same way as Minerva is characterized on frieze A in her relation to Domitian:

**She is a female companion, who invites or urges the male, to whom she belongs, to an enterprise, at which she will accompany him - to this we may add in the case of Minerva on Frieze A: and she even precedes Domitian on his way to this enterprise.**

Or in other words: all the males, who are in the above-mentioned representations accompanied by 'their' *Virtus*, have only one such companion, who shares their enterprises with them. We can therefore conclude that also Domitian, in fortunate possession of his personal patron goddess Minerva instead, had likewise only one such companion (in his case: his patron goddess). There is consequently, in my opinion, no need to assume that on Frieze A should appear, in addition to Domitian's Minerva, also 'his' *Virtus*.

As I only realized after this *Chapter* was written, Domitian is not only accompanied by his patron goddess Minerva on his *sestertius* of 92-94 AD (there shown as his [only] companion, that is to say, in a function that in the case of other males could have been fulfilled by a representation of [their] *Virtus*), but is already shown on Domitian's Arch of *Divus Titus*, which Domitian built shortly after Titus' death in AD 81 (cf. *infra*).

On the 'spoils relief' of this Arch of *Divus Titus* are represented some statues (standing on the attic of the *Porta Triumphalis* (cf. D.E.E. KLEINER 2022; F. COARELLI 2009b; 2012; and P. LIVERANI 2021; 2023), through which the triumphal procession is marching). In the middle of those statues appears Domitian on horseback, accompanied by his patron goddess Minerva, who is walking beside him (cf. here Fig. 120).

**Fig. 120. The Arch of *Divus Titus* on the *Velia* in Rome. Cf. Paolo Liverani (2021, 83-84): "We can exemplify what is at stake by examining the decoration on the Arch of Titus ... a monument whose construction was planned by the Roman Senate shortly before the premature death of Titus, but which had to be built and finished under his brother and successor, Domitian". Cf. Diana E.E. Kleiner (1992, 183): "The inscription on the attic of the Arch of Titus indicates that the monument was erected by the senate and people of Rome in honour of the divine Titus, son of the divine Vespasian".**

The bay of the Arch of *Divus Titus* on the *Velia* is decorated with two famous relief panels, the "spoils scene" and the "triumph relief", and at the apex of the vault of this arch there is a relief representing "the apotheosis of Titus"; cf. Diana E.E. Kleiner (1992, 187, Fig. 155, p. 188, Fig. 156, p. 189, Fig. 157). On the 'spoils scene' stands at the far right an arch (*i.e.*, the *Porta Triumphalis*), through which the triumphal procession is marching. This arch is crowned by what seems to be statue groups. The centre of those statues is occupied by Domitian on horseback, accompanied to his left by his walking personal patron goddess Minerva, both are flanked on either side by the triumphal quadrigas of Vespasian and Titus, each of which pulled by four horses; cf. Diana E.E. Kleiner (1992, 185, Fig. 155). Photos: Courtesy Franz Xaver Schütz (4-IX-2019).

For discussions; cf. *supra*, in Chapter *Preamble*; Section III.; at point 2.); and below, in Chapter V.1.i.3.b); at Section III. *Does the design of the Nollekens Relief reflect the topographical context, for which Domitian had commissioned it?*; at n. 477, in Chapter VI.3.; in Chapter *The major results of this book on Domitian*; and *infra*, in volume 3-2, at *Appendix IV.d.2.f*).

Cf. now Liverani (2023, 115) for the above-quoted passage (*i.e.*, the Italian version of his essay 2021).

**My assumption, formulated above, that the rôles of Domitian's Minerva - and of *Virtus*, in the case of other males - must therefore be interchangeable, is actually provable.**

As already mentioned, Ganschow has discussed another iconographic scheme of *Virtus*, known from several state reliefs (*i.e.*, GANSCHOW's cat. nos. 31-37) - the here-so-called Domitianic scheme of *Virtus*' iconography. Here *Virtus* walks in front of a triumphal quadriga, in which an emperor (or another *triumphator*) rides, whom *Virtus* has obviously accompanied throughout his military campaign that ended for him victoriously. The represented *triumphator* looks in *Virtus*' direction, whereas *Virtus*, who guides the four horses of his quadriga, by holding the first of them by its reins, turns her head around and looks back at the *triumphator*. These processions move from right to left (GANSCHOW's cat. no. 33 is a mirror image of this scheme, here the figures are moving instead from left to right), as the procession on Frieze A, and the movements of the heads of *Virtus* and of the *triumphator* on these reliefs, as well as their mutual glances, are almost exactly the same as on Frieze A, only that on Frieze A goddess and emperor are shown as being much closer to each other, and that on Frieze A not *Virtus* is that companion, who precedes the Emperor Domitian, but instead his personal patron goddess Minerva (!).

The so-called Domitianic scheme of *Virtus*' iconography, in which *Virtus* appears in an iconography that resembles very much that of Minerva on frieze A, is datable in the Domitianic period, because the most famous example of this scheme is the horizontal panel on the north side of the bay of the Arch of *Divus Titus* on the *Velia* at Rome (cf. here Fig. 120), that was built by Domitian. This relief appears in Ganschow's catalogue of representations of *Virtus* as the first example within this iconographic scheme (*i.e.*, GANSCHOW's cat. no. 31).

**Contrary to his younger brother Domitian, Titus did not have a personal patron goddess. Domitian therefore ordered for him, to be represented on the Arch of *Divus Titus*, this new scheme of the iconography of *Virtus*, who accompanies Titus (cf. here Fig. 120; cf. GANSCHOW's cat. nos. 31-37). This iconography is very similar to the one, which is visible on Frieze A of the Cancelleria Reliefs - only that the represented males and the females, who accompany those two men to their wars, are different - and that in Frieze A of the Cancelleria relief the *profectio* to a war is represented, whereas the panel at the Arch of *Divus Titus* shows the triumphal procession after a war. What is very similar in both iconographies, is the way, how the relationships of both men with their accompanying females are visualized.**

**The comparisons just made show that under Domitian new iconographies were created that showed Titus with *Virtus*, and Domitian with Minerva respectively, and that both iconographies were in important details very similar. This means in theory that, what Ganschow has written in his comments about the iconography of *Virtus*, should equally be applicable to the iconography of Domitian with Minerva, as shown on Frieze A.**

But, as we have already seen, Frieze A of the Cancelleria Reliefs also contains two important iconographic details, which are not mentioned by Ganschow in his final comments on the iconography of *Virtus* (cf. *infra*), although also Ganschow himself mentions those facts in the descriptions of the relevant monuments of his catalogue (cf. GANSCHOW's cat. nos. 31-37; cf. *supra*, n. 238). I am referring here to the mutual commitment of Domitian and his patron goddess Minerva on Frieze A of the Cancelleria Reliefs: both look at each other. To be precise: she, the divine partner in this 'couple', is even more committed to him, because whereas Domitian on Frieze A is shown as looking straight ahead towards her, Minerva, who precedes Domitian in the procession, turns her head back to look at him.

In that version of *Virtus*'s iconographic schemes, chosen by Ganschow himself as comparison for Frieze A of the Cancelleria Reliefs (*i.e.*, GANSCHOW's cat. nos. 38-43; cf. *supra*, n. 238; here Figs. 1 and 2 drawing: figure 6), things are different: the male looks in a different direction than 'his' *Virtus*. Because of that, Domitian on Frieze A of the Cancelleria Reliefs, cat. no. 38 of Ganschow's relevant scheme of *Virtus*' iconography, in

theory qualifies as a potential male, accompanied by 'his' *Virtus*, as shown in this iconographic scheme. But the amazon-like figure behind Domitian, whom Ganschow on Frieze A of the Cancellaria Reliefs identifies as Domitian's *Virtus* (Figs. 1 and 2 drawing: figure 9), cannot be identified as such: instead of preceding Domitian and turning her head back to look at him, as all the other representations of *Virtus* of this iconographic scheme, this amazon-like figure follows Domitian and looks straight ahead. Therefore Ganschow's cat. no. 38 of *Virtus*, the amazon-like figure on Frieze A of the Cancellaria Reliefs, does *not* represent *Virtus*.

When we compare this scheme of *Virtus*' iconography, which comprises, in my opinion only Ganschow's cat. nos. 39-43 (cf. *supra*, n. 238), with the Domitianic iconographic scheme of *Virtus*, discussed above (*i.e.*, GANSCHOW's cat. nos. 31-37; and here Fig. 120), it is obvious that the former scheme has been derived from the latter, by maintaining the design of the figure of *Virtus*, and by pairing that figure with a male, who acts differently. As a matter of fact, all representations of *Virtus* that belong to this scheme (*i.e.*, GANSCHOW's cat. nos. 39-43), are datable after the Domitianic period.

The version of the Domitianic scheme of *Virtus*' iconography (*i.e.*, GANSCHOW's cat. nos. 31-37; and here Fig. 120), which I have chosen above to compare with Domitian and Minerva on Frieze A (cf. here Figs. 1; Figs. 1 and 2 drawing: figures 5 [Minerva]; 6 [Domitian]), shows *Virtus* and an emperor (or another *triumphator*) in a triumphal procession, both moving in the same direction; here both protagonists are depicted in a certain distance to each other. The scheme of *Virtus*' iconography, chosen by Ganschow himself as comparison for the amazon-like figure on Frieze A (but in my opinion only his cat. nos. 39-43), shows likewise a male and 'his' *Virtus*, but in a different context: the *profectio* of an emperor (GANSCHOW's cat. no. 38, Frieze A of the Cancellaria Reliefs, being the only example of a *profectio*<sup>242</sup>), or the emperor's or another male's departure for a hunt. Here both protagonists, *Virtus* and the male, whom she accompanies, are moving fastly, and both are shown closely together - exactly as Minerva and Domitian on Frieze A of the Cancellaria Reliefs.

But, as we have seen above, Ganschow's identification of the amazon-like figure on Frieze A of the Cancellaria Reliefs as *Virtus* of this latter iconographic scheme (*i.e.*, as his cat. no. 38), could be disproved, because this figure looks straight ahead and follows Domitian, instead of preceding him and turning her head back to look at him - apart from the fact, that the amazon-like figure on Frieze A is *not* a walking, but a standing figure.

If all that should be true, we can now add something to Ganschow's above-quoted comments on the iconography of *Virtus*<sup>243</sup>, that I translate here into English:

**'... her [*i.e.*, *Virtus*'] distinct striding pace and the gesture of her hand, with which she points to the hunting prey, are typical features, which also characterize her appearance in a *profectio* or in a departure for a hunt ([see his cat. nos.] 38-43): with a gesture, she invites the figure, whom she accompanies, to action, sometimes she even urges the person (*e.g.*, Cancellaria relief A: 38).'**

To Ganschow's just quoted comments, we may add: the author rightly stresses the 'striding pace', which is typical of all those schemes of *Virtus*' iconography, which have been compared with the amazon-like figure on Frieze A by Ganschow himself (cf. *supra*, n. 238) and by Koeppl (cf. *supra*, n. 222). The fact alone that the amazon-like figure on Frieze A does *not* walk, is enough to say that she cannot be identified as *Virtus*. But there is more.

In the Domitianic scheme of *Virtus*' iconography (*i.e.*, GANSCHOW's cat. nos. 31-37, and here Fig. 120), the male, whom *Virtus* accompanies on his enterprise, is shown as being emotionally committed to 'his' *Virtus*:

<sup>242</sup> if my hypothesis is true that GANSCHOW's cat. no. 38 (*i.e.*, the amazon-like figure on Frieze A of the Cancellaria Reliefs) does not represent *Virtus*, this iconographic scheme consequently was not applied to representations of a *profectio* at all.

<sup>243</sup> for the *verbatim* quote in German, cf. *supra*, at n. 224.

this is indicated by the fact that the male is shown as looking straight ahead in the direction of 'his' *Virtus*. She, his partner, who always precedes him, turns her head back and looks at him. The scheme of *Virtus'* iconography, compared by Ganschow himself with the amazon-like figure on Frieze A of the Cancellaria Reliefs (cf. GANSCHOW's cat. nos. 38-43), is in one important respect different from the Domitianic scheme: in the characterization of *Virtus'* male partner. The figure of *Virtus* herself is basically the same as in the Domitianic scheme: *Virtus*, who again precedes the male, moves very quickly. By doing so, she turns her head back and looks at him. The male, on the other hand, does not look in the direction of 'his' *Virtus*.

As we have already seen above, the iconographic scheme just described (cf. GANSCHOW's cat. nos. 38-43) does not apply to Ganschow's cat. no. 38, the amazon-like figure on Frieze A of the Cancellaria Reliefs. The fact that Domitian does not look at the amazon-like figure, could in theory define this scene as belonging to this iconographic scheme, but the amazon-like figure on Frieze A does not precede Domitian, turning at the same time her head back, in order to look at him. Because of those reasons, the amazon-like figure on Frieze A does *a*) not belong to Ganschow's relevant iconographic scheme of *Virtus* (only GANSCHOW's cat. nos. 39-43 belong to this scheme), and *b*) consequently, the amazon-like figure on Frieze A cannot be identified as *Virtus*.

Besides, because the amazon-like figure on Frieze A does not precede Domitian, Domitian in his turn (at least in the way, as he has been designed for Frieze A) 'cannot' look at this figure, he rather gazes at his personal patron goddess Minerva - who precedes him. It is not by chance, as we have seen above, that the position, occupied by *Virtus* in the Domitianic scheme of *Virtus'* iconography (*i.e.*, in GANSCHOW's cat. nos. 31-37, and here **Fig. 120**), on Frieze A of the Cancellaria Reliefs is occupied by Domitian's personal patron goddess Minerva instead.

As has already been said, the most famous example of the Domitianic scheme of *Virtus'* iconography, is the 'triumph relief' at Domitian's Arch of *Divus Titus* at Rome (*i.e.*, GANSCHOW's cat. no. 31; cf. here **Fig. 120**). Considering, what has been said so far, and combining this with the fact that Domitian built the Arch of *Divus Titus* on the *Velia* (erected after 81) much earlier<sup>244</sup> than the monument, to which the Cancellaria Reliefs belonged (*i.e.*, after AD 89; cf. *infra*), it seems as if Domitian must have commissioned his artists to create first the new iconography of Titus with *Virtus* (here **Fig. 120**; *i.e.*, the here-so-called Domitianic scheme of *Virtus'* iconography), and, derived from that, only at a second moment, the iconography of himself with Minerva, that we see on Frieze A (cf. here **Fig. 1**; **Figs. 1 and 2 drawing: figures 5 [Minerva]; 6 [Domitian]**).

Apropos, the date of the Cancellaria Reliefs. Scholars have dated them after AD 83, after 89 or after 93. I myself follow those scholars, who date them 'after AD 89', and hope to have found more evidence that supports this view. For a summary of this discussion; cf. below, in Chapter *The major results of this book on Domitian*; and *infra*, in volume 3-2, at *Appendix IV.d.2.f*).

But, as has already been mentioned above, on the 'spoils relief' of Domitian's Arch of *Divus Titus* Domitian appears already accompanied by his patron goddess Minerva, although in a different iconography. On the attic of the *Porta Triumphalis*, through which the triumphal procession on the 'spoils relief' is marching, appear statues, representing Domitian on horseback, with his patron goddess Minerva, who walks beside him, as well as Vespasian and Titus in their triumphal quadrigas (cf. here **Fig. 120**).

For discussions; cf. *supra*, in Chapter *Preamble*; Section III.; at point 2.); below, in Chapter *V.1.i.3.b*); at Section III. *Does the design of the Nollekens Relief reflect the topographical context, for which Domitian had commissioned it?*; at n. 477, in Chapter VI.3.; in Chapter *The major results of this book on Domitian*; and *infra*, in volume 3-2, at *Appendix IV.d.2.f*).

<sup>244</sup> so also M. PFANNER 1983, 91: "Auf dem Bogenmonument des Beutereliefs sind Vespasian und Titus in der Quadriga und Domitian auf dem Pferd dargestellt (s.[siehe] Taf. 56,4.5) [with n. 19]. Die Schlußfolgerung ist einfach. Da eine Darstellung Domitians nach seiner damnatio memoriae ausscheidet [with n. 20], ist der Titusbogen unter Domitian entstanden"; p. 92: "Aus der Interpretation des Bogens ergibt sich, daß der Bogen wegen der Konsekration des Titus errichtet wurde [with n. 22]. Demnach erscheint ein Ansatz zu Beginn der Regierungszeit Domitians sehr wahrscheinlich ..."; in his notes, PFANNER, *op.cit.*, provides references. - So now also P. LIVERANI 2021, 83, quoted *verbatim infra*, in Chapter *The major results of this book on Domitian*.

### ***I.2.1. The consequence of the identification of the amazon-like figure on frieze A as Dea Roma: she and Domitian (now Nerva) separate from each other at the pomerium of Rome; with a discussion of the lictors and soldiers on both friezes of the Cancellaria Reliefs***

We have heard above (cf. *supra*, in Chapter I.2.) about *Dea Roma* that: 'When she appears without legend, alone and amazon-like, she cannot be distinguished from *Virtus*' (M. PFANNER 1983; quoted *verbatim supra*, n. 221). I further hope to have proven in Chapter I.2. that the amazon-like figure on Frieze A is *not Virtus*.

This figure (cf. here **Fig. 1; Figs. 1 and 2 drawing: figure 9**) is represented as currently standing next to, or immediately behind, the Emperor Domitian (now Nerva), after having rushed there shortly before. If all that should be true, we can now with certainty identify this amazon-like figure on Frieze A with the *Dea Roma* - as already suggested by Magi, and likewise by Pollini (2017b, 117, 118), and by Spinola (cf. *infra*, in Chapter III.). We can also deduce, where *Dea Roma* is supposed to stand on Frieze A: exactly at the *pomerium*-line<sup>245</sup>, the sacred boundary of the City of Rome, whose tutelary goddess she is, and which is therefore a place, which she cannot possibly leave. - *Dea Roma* may, of course, go 'one step further, beyond Rome's *pomerium*-line/ the so-called Servian city Wall, with its gates' (for that, cf. *supra*, n. 199, in Chapter I.1.1.), when she welcomes a new emperor into Rome. So for example Hadrian, as shown on his *adventus* relief (cf. here **Fig. 91**), where we see *Dea Roma*, who stands immediately outside one of the gates of her city, greeting the emperor. - But, as we shall see below, it is, as usual, not as easy as here so far assumed.

The artists, who designed Frieze A of the Cancellaria Reliefs, in my opinion, have indicated the fact that *Dea Roma* is standing at the *pomerium*-line of Rome, by means of two details of their composition, 1.) by showing *Dea Roma's* abrupt halt at this very point, to which she has rushed, coming from the far right, that is to say, from the centre of her city, and 2.) by means of the overall compositions of both friezes - when viewed *in situ* - a subject, to which we will now turn. But before doing so, I wish to add something else to my analysis of the composition of Frieze A, the already announced thoughts 'at second glance', that refer to the relationship of Domitian with the *Dea Roma*, as they appear on Frieze A.

#### ***I.2.1.a) The relationship of Domitian with the Dea Roma on Frieze A of the Cancellaria Reliefs: thoughts at 'second glance'***

I maintain my assertion made above (cf. *supra*, at Chapter I.2.) that Domitian does not show *directly* his commitment to *Dea Roma*, for example, by looking at her. The artists have preferred to indicate Domitian's relevant feelings by certain choices of the composition which, regarded as a whole, prove on the contrary that Domitian's relation to *Dea Roma* is very intimate.

1.) Domitian has obviously ordered the artists to show himself and *Dea Roma* as standing next to each other, and that she too - exactly like his personal patron goddess Minerva - is clearly shown as touching him. Already these facts prove that *Dea Roma* is (almost) of equal importance to him as Minerva, since due to those choices of the composition, both goddesses are immediately flanking Domitian on either side, and are shown as *both being very close to him* - close not only in a 'physical' sense, but, by implication, also *au sens figuré*. These choices of the composition therefore mean: the area *domi*, which Domitian has just left, during his absence, will faithfully be guarded by his partner *Dea Roma*, together with the Senate and the Roman People, whereas within the area *militiae*, which Domitian has entered right now, the war-gods Mars and Minerva are his faithful divine *comites*, who will stay with him throughout this entire war;

---

<sup>245</sup> my thanks are due to Franz Xaver Schütz, who, after listening to my description of the scene, represented on Frieze A, has suggested this to me. As I have only realized much later, this has already been suggested by J. POLLINI 2017b, 117: "To the left [on Frieze A], Mars and Minerva (who makes a gesture of donning her helmet) rush ahead of **Domitian (his head was recut to that of Nerva subsequent to Domitian's damnatio). The imperial figure, shown paludatus as he leaves the pomerium, is sent on his way by Roma, who places her arm beneath his left.** This suggests that his campaign is willed by the Gods, as a counter to public opposition to Domitian's unpopular wars in the north [my emphasis]". - This will be discussed in detail below; cf. *infra*, at Chapter I.2.1.c).

2.) as already mentioned, *Dea Roma* belongs on Frieze A to the much larger 'half' of the composition, a choice, which shows in itself the importance of the City of Rome for Domitian's enterprise. Only thanks to *Dea Roma*, the *Genius Senatus* immediately behind her, who lifts his right hand to bid farewell (cf. *infra*, n. 453, in Chapter III.), and the *Genius Populi Romani*, that is to say, the Senate and the Roman People - as Domitian states in this 'sermon in stone' (G.M.A. HANFMANN 1975) - he will be able to win this war. That Domitian does not turn round to look at *Dea Roma*, may even be read as indicating that their relationship is so close, that he does not have the faintest doubt in the loyalty of his divine partner. Of course, this war is very dangerous for the City of Rome and the entire Roman Empire. This explains on the one hand *Dea Roma's* great excitement at the moment shown on frieze A, when the Emperor Domitian leaves her City for this war, and on the other hand, that Domitian is shown as completely concentrating on the dangerous task that lies ahead of him, by performing the gesture *ingens dextra* (cf. *supra*, n. 222, in Chapter I.2.);

3.) the artists seems to have indicated, that *Dea Roma*, by 'storming' from the right, and by touching Domitian's elbow, has caused a chain reaction.

Because, if we don't want to believe that Domitian would have made this gesture *ingens dextra* with his right hand on Frieze A for a long time, but only for a moment (as seems reasonable to assume), *Dea Roma* has - fortunately? - arrived at exactly that moment, when Domitian makes this gesture. But because *Dea Roma* touches Domitian with her right hand at his left elbow, in a way that is clearly visible, it may well be that the artists rather want to tell us something else: Domitian makes this gesture with his right hand at precisely that moment, *because* the goddess Roma has finally arrived, and has touched him at his elbow: only now the ceremony can begin.

But this here supposed chain reaction goes possibly even further. Not only *Dea Roma* to the right of Domitian, or immediately behind him, is totally excited: even the Olympian goddess immediately in front of him, Domitian's personal patron goddess Minerva, 'storms forward' at this very moment (together with Mars).

**Interestingly, Domitian, between those two goddesses, one 'storming' from the right, the other 'storming' to the left, 'ist die Ruhe selbst', as we could say in German, or like the quiet centre of a hurricane.**

This is, by the way, how already Gerhard Koeppel (1969, 143, quoted for the first time *supra*, in n. 222, at Chapter I.2.) had described the figure of Domitian on Frieze A (Fig. 1; Figs. 1 and 2 drawing: figure 6):

"Im Standmotiv des Kaisers [of Domitian on Frieze A] braucht man kein Zögern zu erkennen, denn wie die Victoria zeigt, Domitian ist der Sieg gewiß [my emphasis]". In the following, Koeppel explained that he took the fact that **Domitian (after walking up to this point) has come to a halt, as a means, by which the artist stressed that Domitian is the centre of the entire composition of Frieze A**; continuing on p. 143 as follows: **"Jede Figur schaut auf ihn oder ist auf ihn bezogen. An dieser Stelle ist der Mittelpunkt der ganzen Komposition. Das Auge des Betrachters wird dorthin geleitet und verweilt dort [my emphasis]".**

The ideas of the artists of closely matching on Frieze A these three figures - Minerva, Domitian and *Dea Roma* (Fig. 1; Figs 1 and 2 drawing: figures 5; 6; 9) - of totally different designs, moods and movements, and showing, after all, a human male between two goddesses, as if that were a matter of course, all engaged together in the same enterprise, at which the two goddesses will support this male with all their powers, are very remarkable indeed.

These choices of the artists secure the figure of Domitian on this panel the most possible attention (as already observed by Toynbee and Koeppel; cf. *supra*, ns. 233, 222), apart from the fact that this scene is also in so far highly innovative and groundbreaking for the future, as stressed by Ghedini and Pollini (cf. *supra*, at n. 227), as here for the first time in official state art a living emperor is shown together with Olympian gods (*i.e.*, Minerva and Mars).

**On Frieze A, Domitian is thus, in my opinion, characterized by the artists as being a man of extraordinary self-reliance, whose superiority is stressed, even when compared with his divine partners, who are all very upset, and who do everything to further his plans**

**At the same time, the artists show Domitian as completely concentrating on performing his enigmatic gesture. If that is true, the way, how the artists have orchestrated all this, can only mean, in my opinion, that with Domitian's gesture, the solemn ceremony of his *profectio* has just begun - which is why Minerva and Mars are 'storming forward', towards the theatre of Domitian's war.**

After this Chapter was written, Franz Xaver Schütz was kind enough to tell me that the phenomenon just described on Frieze A should, of course, not be called a 'chain reaction', since in reality, what we see on Frieze A, is the result of perfect timing. I agree, especially after having also studied Frieze B, in which the artists, again by means of their composition, assert exactly the same (cf. *infra*, at Chapter V.1.d)).

This leads us to the question of what the gesture of Domitian's right hand might mean. Of all the different explanations (for example those formulated by E. SIMON and F. GHEDINI, cf. *supra*, n. 232, and *infra*, at Chapters III.; and V.1.g)), I find Koepfel's suggestion quoted above (n. 222; in Chapter I.2.) most convincing. He referred to it as *ingens dextra*, a gesture, known from 'oriental' Sun gods, like *Sol 'Invictus'*, and discussed in ancient literary sources. Already Vespasian, who had obviously come across this gesture in the East, had ordered a representation of himself performing this gesture on one of his coins, and Domitian issued coins at Alexandria showing Helios-Sarapis with *ingens dextra*.

**We know that Septimius Severus would later issue coins with representations of *Sol 'Invictus'*, with lifted right arm<sup>246</sup>, as part of a complex political message that propagated "*Aeternitas imperii*" (so A. LICHTENBERGER 2011), with which he expressed his personal hopes in invincibility, the endurance of his dynasty, and the eternity of the Roman Empire. - As we shall see in the following, exactly the same thoughts had not only already been formulated at the order of Vespasian and Titus by Flavius Josephus (for that, cf. *infra*, at Chapters V.1.i.3.); VI.3.), but also by Domitian, as a passage from Stefan Pfeiffer (2018, 189) shows, which is quoted below.**

Koepfel<sup>247</sup> concluded: "*Ingens dextra* ist also in domitianischer Zeit gleichbedeutend mit *magnus dux* ... Die *ingens dextra* des Kaisers im Relief A von der Cancellaria wird Verderben über seine Feinde bringen, die er, wie Victoria zeigt, besiegen wird" ('*ingens dextra* has therefore in the Domitianic period the same meaning as *magnus dux* ... The *ingens dextra* of the emperor will cause the ruin of his enemies, whom he will defeat, as *Victoria* on Frieze A indicates').

But in the specific case of Domitian on Frieze A, the iconography of *ingens dextra* is combined with something else: Domitian has ordered his artists to represent him with his left hand holding a *rotulus* (cf. S. LANGER and M. PFANNER 2018, 74, quoted *verbatim infra*, at Chapter V.1.g), according to whom its precise meaning is allegedly unknown, although they likewise quote Erika Simon (1963) in their bibliography, whose interpretation I have followed here without at first realizing this fact.

---

<sup>246</sup> G. KOEPEL 1969, 142. The assertion concerning this gesture by T. HÖLSCHER 2009a, 56-57, is therefore not true: "La mano sollevata dell'imperatore si trova di norma solo per l'*adventus*, come gesto di saluto, che pretende una figura cui rivolgerlo: solo nel III secolo d.C. l'imperatore compare con simile gesto anche nella *profectio*, che da quel momento si eleva a segno di potere universale". For the meaning of this iconography for the Severan dynasty, cf. C. HÄUBER 2014a, 684-689, pp. 686-687 on Septimius Severus' *Sol 'Invictus'* coins, and on his concept of "*Aeternitas imperii*", quoting for that on p. 687 with n. 159 A. LICHTENBERGER 2011, 276, cf. p. 382: "*Aeternitas imperii* war ein Schlagwort, mit dem zwei Vorstellungen der kaiserlichen Repräsentation des Septimius Severus zusammengefaßt wurden: Zum einen war es die durch die severische Dynastie gewährleistete Ewigkeit des römischen Staates, zum anderen die mit der Gestalt Sols verbundene ewige und umfassende Sieghaftigkeit".

<sup>247</sup> G. KOEPEL 1969, 142. For the complete *verbatim* quotation, cf. *supra*, n. 222, in Chapter I.2. KOEPEL's just quoted interpretation has been rejected by F. GHEDINI 1986, 292-293 with n. 27 (quoted *verbatim supra*, n. 232, in Chapter I.2.). For this interpretation of *Victoria* on Frieze A, cf. also *supra*, ns. 233, 234, in Chapter I.2.

For the gesture, Domitian (now Nerva) is making with his right hand, cf. also *infra*, at Chapter V.1.g).

I myself believe that this *rotulus* contains Domitian's *vota*, that he will fulfill, provided the gods, to whom he has prayed - presumably Iuppiter - should grant him the desired victory in the war to which he is leaving.

Not by chance, Domitian has ordered his artists to represent Vespasian on Frieze B being accompanied by a man in his entourage who carries likewise a *rotulus* (cf. here **Figs. 1 and 2 drawing: figure 17**). The *rotulus*, carried for Vespasian on Frieze B certainly contains Vespasian's relevant *vota*, which he, since Iuppiter has already granted him the desired victories, will now certainly fulfill in due course. Thus, by representing those *rotuli*, Domitian has ordered his artists to lay great stress on propagating that Vespasian and he himself show *pietas* towards the gods.

I have obviously followed with these suggestions Erika Simon, whose entry on the Cancellaria Reliefs I had consulted several times, looking for something else. When I went back to it, I found more material; cf. Simon (1963, 9), who wrote about **figure 17** on frieze B):

"Den Zug beschließt eine Gestalt in doppelt geschürzter Tunika, wohl ein Kultdiener. Die Schriftrolle in seiner Linken enthält vielleicht ein Verzeichnis der gelobten Opfer, die der Feldherr bei seiner Rückkehr einzulösen hatte. Denn hier handelt es sich um eine Rückkehr (*reditus*), eine feierliche Ankunft (*adventus*) des Kaisers in Rom". And on the *rotulus*, held by Domitian (now Nerva) on frieze A, Simon (1963, 10) wrote: "Die Rolle in seiner [*i.e.*, Domitian's, now Nerva's] beringten Linken weist wohl wie bei der Gestalt in B auf Opfer hin, die pro *reditu* gelobt worden waren".

As I have only read after this *Chapter* was writteny, Stefan Pfeiffer (2018, 189, in his Chapter "The themes of Domitian's self-presentation"), has come to a conclusion that supports my interpretation just suggested of the gesture, Domitian on Frieze A is making with his right hand:

"1. it was a key issue for Domitian to show his *virtus militaris* and his victoriousness [with n. 85], as evident from 22 imperial acclamations [with n. 86], his epithet Germanicus [with n. 87], the coins depicting *Germania capta*, and the frequent representations of Minerva in military dress. His victories over the Chatti, Dacians, and Sarmatians were of utmost importance to Domitian [with n. 88], as clearly evident from the gigantic *equus Domitiani* on the Forum Romanum [with n. 89]. and the several triumphal arches that he erected [with n. 90]. Domitian's victoriousness was also expressed by the adulations of his subjects. The poets praise him for his victories [with n. 91] and in his unofficial titulature he is called *theos aniketos* and *Zeus eleutheros* [with n. 92]".

In his notes, Pfeiffer provides references.

For further quotations from Pfeiffer's "Themes of Domitian's self-presentation"; cf. *infra*, in Chapter II.3.1.c) for his points 2.) and 4.), in Chapter VI.3, for his point 2.), and in Chapter V.1.i.2.), for his points 3.) and 4.). For the *Equus Domitiani*, cf. *supra*, in Chapter Preamble, at Section II., *infra*, at n. 267, in Chapter I.3.2; and in Chapter *The major results of this book on Domitian*.

**I.2.1.b) An anticipation of my tentative reconstruction of the Cancellaria Reliefs as the two horizontal panels in the bay of one of Domitian's arches (cf. *infra*, in Chapter I.3., and here Figs. 1 and 2 of the Cancellaria Reliefs, drawing, `in situ`)**

In the following, I anticipate a hypothesis<sup>248</sup>, to be discussed below, in Chapter I.3., according to which Frieze A and B were the horizontal panels in the bay of an arch, built by Domitian. If so, when these panels were *in situ*, and their carving finished (the latter was never the case, as we shall see *infra*, at Chapter II.), both friezes would have been seen by an ancient spectator as being parallel and opposite each other.

---

<sup>248</sup> cf. *supra*, at ns. 195, 198-201, in Chapter I.1.1., where the presuppositions of this hypothesis are discussed.

We have based our relevant visualization on Magi's drawings (cf. here **Figs. 1 and 2 drawing**). **Fig. 2** shows a photo of Frieze B, which, at the Museo Gregoriano Profano, has been put on display this way, thus following the reconstruction of this panel as suggested by Magi (1945, Tav. I; cf. *supra*, in Chapter I.1.).

The reconstruction drawing by Markus Wolf (2015, cf. *supra*, n. 79, in Chapter I.1., his Fig. 8. "Ricostruzione arco monumentale, 1: 350"; cf. also *infra*, in Chapter V.2.) is based on a different approach. Wolf's reconstruction drawing of an "arco onorifico isolato" (also referred to by him as "arco monumentale") comprises the Cancellaria Reliefs, integrated as the horizontal panels into the central bay of this arch. Wolf's Fig. 8 illustrates a view of his reconstruction drawing of this arch, in which Frieze B is visible *in situ*: contrary to the reconstruction of Frieze B at the Museo Gregoriano Profano, in Wolf's reconstruction there is a wide gap between the slabs B1 and B2 of this panel. As we shall see below, this large gap, indicated by Wolf (2015), is (erroneously) assumed by Langer and Pfanner 2018 (for a discussion, cf. *infra*, in Chapter V.1.d)).

By looking at both friezes this way (cf. here **Figs. 1 and 2 of the Cancellaria Reliefs, drawing, 'in situ'**), it becomes clear, that the artists have placed the Emperor Domitian on Frieze A (here **Figs. 1 and 2 drawing: figure 6**), literally speaking, almost precisely opposite the togate youth on Frieze B (**Figs. 1 and 2 drawing: figure 12**), which seems to prove that the compositions of both panels were designed for being viewed opposite each other - in the bay of an arch.

At the same time, the locale, chosen for both protagonists is also identical. The Emperor Domitian (now Nerva) on Frieze A stands precisely, where Domitian, as the togate youth, appears on Frieze B: at the *pomerium*-line. As we have seen above (cf. *supra*, at Chapter I.1.1.), the young Domitian, by means of the composition, is characterized on Frieze B as being the *praetor urbanus* (a position that Domitian actually held at the historical moment, purportedly pictured on Frieze B), a magistrate, who was responsible for the City of Rome within the *pomerium*, but not beyond. On Frieze B, this is clearly indicated by the fact that the *Genius Populi Romani* (here **Figs. 1 and 2 drawing: figure 13**), who stands next to Domitian, sets his left foot on one of the *cippi* that marked the *pomerium*.

For a discussions of this subject; cf *infra*, at Chapters V.1.e) *The hypothesis of S. Langer and M. Pfanner (2018) concerning the alleged 'footstool' on Frieze B, on which the Genius Populi Romani sets his left foot (cf. here Fig. 2);* and at Chapter V.1.f) *My own hypothesis concerning the alleged 'footstool' of S. Langer and M. Pfanner (2018) on Frieze B, on which the Genius Populi Romani sets his left foot (cf. here Fig. 2) - it is a cippus of the pomerium-line of Rome.*

The young Domitian, on Frieze B, is thus depicted by the artists as standing right within the sacred boundary of the City of Rome, whereas on Frieze A the artists show Domitian, now emperor, as having just left the sacred boundary of Rome, by the position the artists chose for *Dea Roma* immediately behind the emperor (here **Figs 1 and 2 drawing: figure 6** [Domitian]; **figure 9** [*Dea Roma*]); in addition to that, Domitian is shown as wearing the *paludamentum*, which likewise indicates that he stands *outside* the *pomerium* (for that, cf. the next Chapter I.2.1.c), and *infra*, at n. 448, in Chapter III.).

If all that should be true, the artists have thus marked that the *real* centre of both friezes is the borderline between the areas *domi* and *militiae*, and in addition to this, they praise Domitian in these friezes as having acted competently in both areas, *domi* as Caesar and *praetor urbanus* on Frieze B, *militiae* as emperor, leaving for a (seen in retrospect) victorious war on Frieze A.

On Frieze A, *Dea Roma* has accompanied the Emperor Domitian up to this sacred boundary of her City, which she normally (but cf. here **Fig. 91**) does not transgress.

On Frieze B, one of the representatives of Rome, the *Genius Populi Romani* (**Figs. 1 and 2 drawing: figure 13**), likewise bound to stay within the City, has accompanied the young *praetor urbanus* and Caesar Domitian (**Figs. 1 and 2 drawing: figure 12**) up to this boundary, together with the other representatives of Rome (here **Figs. 1 and 2 drawing, figures 3; 4; 5; 6; 7** [five Vestal Virgins]; and **figure 11** [the *Genius*

**Senatus**]), all of whom are shown as standing within the area *domi* (whereas *Dea Roma* on Frieze B [here **Figs 1 and 2 drawing; figure 2**] is represented as being seated.

For the possible reason, why the artists decided to represent on Frieze B of the Cancelleria Reliefs this statue type (?) of the *Dea Roma*; cf. *infra*, at Chapter *V.1.i.2.*)

This entire group of Rome's representatives on Frieze B has come to the City's sacred boundary, in order to welcome the new Emperor Vespasian [here **Figs. 1 and 2 drawing; figure 14**], who approaches this boundary, the *pomerium*, from the opposite direction, and who is characterized by the artist as still standing within the area *militiae*.

As already said above, we should ask ourselves, whether Vespasian entered the City of Rome on the occasion represented on Frieze B (provided, Vespasian's *adventus* at Rome had happened this way at all; but see *infra*, in Chapter *V.1.i.3.*). Because, coming as victorious general from his Great Jewish War, he (in the represented moment) was now negotiating with the Senate to be granted a triumph. Only in the course of the triumphal procession, he would then be allowed to enter the City (for the consequences of the relevant Roman law, cf. *infra*, **n. 361**, in Chapter *II.3.3.*, and in Chapter *III.*).

As likewise mentioned above (cf. *supra*, at **ns. 195-201**, in Chapter *I.1.1.*), Vespasian is clad on Frieze B 'not like an *imperator*, but like a civilian' (so Dio Cassius 65,10), not because he had changed his military into civilian garb at the *Mutatorium Caesaris*, just outside Rome's city gate *Porta Capena* within the Servian city Wall, in order to be allowed to enter the city, but because he had decided to wear such clothes, as soon as he entered Italy at Brindisi.

For the *Mutatorium Caesaris*; cf. *infra*, **n. 405** in Chapter *III.*; and below, in Chapter *The major results of this book on Domitian.*

In my interpretation of this scene represented on Frieze B of the Cancelleria Reliefs, I follow in part the observations, made by Erika Simon (1960 and 1963) and Gerhard Koeppel (1969)<sup>249</sup>. Koeppel has explained, how the areas *domi* and *militiae* are differentiated on Frieze B:

"Immer wieder spielt im *Adventus* und in der *Profectio* die Trennung der Bereiche *Domi* und *Militiae* eine nicht zu übersehende Rolle, die durch die Trennung in der Relief-Komposition sichtbar ist [with n. 163]. So verhält es sich auch in Relief B [page 173, Abb. 16; page 174] von der Cancelleria: der Stein [*i.e.*, the *cippus*, on which the *Genius Populi Romani* sets his left foot, that marks the *pomerium*-line] steht an dem Einschnitt in der Komposition, an dem sich zwei Bewegungsrichtungen treffen".

In his **note 163**, Koeppel provided references.

See also Marion Meyer (2006, 134), who interprets likewise, as is suggested here, the scene on Frieze A as a *profectio*:

"Der Kaiser erscheint hier nicht im Panzer [as on the relief of the "Parthermonument" at Vienna, which she is studying in this article], aber bereits im *Paludamentum*, also nach Ablegen der *Toga* an der *Pomeriumsgrenze* [with n. 86]. *Virtus* [here interpreted as *Dea Roma* instead] unterstützt ihn, im wörtlichen Sinne, und die kriegerischen Gottheiten *Minerva* und *Mars* geleiten ihn. *Victoria* fliegt ihm voraus [with n. 87].

In her **notes 86 and 87**, Marion Meyer provides references. For the relief, she is discussing; cf. Diana E.E. Kleiner (1992, 309-312 : "The Great Antonine Altar at Ephesus", esp. p. 312, Fig. "281 Great Antonine altar, Apotheosis of Lucius Verus, from Ephesus, after 169. Vienna, Kunsthistorisches Museum").

---

<sup>249</sup> The relevant observations by E. SIMON 1963, 9-10, are quoted *verbatim infra*, at **n. 456**, in Chapter *III.* Cf. G. KOEPPEL 1969, 172-174 (in his n. 138, he provided references). This passage is quoted again *infra*, in Chapter *I.2.1.c.* The complete passage of Koeppel's text, in which he explains his hypothesis in more detail, is quoted *infra*, at **n. 416**, in Chapter *III.*

### ***I.2.1.c) The problems, connected with the lictors and soldiers on both friezes of the Cancellaria Reliefs***

"Relief A [i.e., of the Cancellaria Reliefs] most likely displays a *profectio*, the emperor's departure from Rome, preceded by armed lictors and followed by unarmed lictors, so that they symbolize both the realms *militiae* and *domi*".

Eric M. Moormann (2020a, 277).

Also Stephanie Langer and Michael Pfanner (2018, 74), who likewise tend to interpret Frieze A as a *profectio* (cf. *infra*, at Chapter V.1.)), write: "Fries A ... Die Likatoren 1 und 3 tragen Beile in ihren *fasces* (cf. here **Figs. 1 and 2 drawing; figures 1; 3; 7; 8**), die Likatoren 7 und 8 anscheinend nicht [with n. 94, providing a reference]. Das könnte dafür sprechen, dass sich zwischen ihnen das *pomerium* befindet, denn Beile innerhalb des *pomeriums* durften nur beim Triumphzug mitgeführt werden [with n. 95, providing a reference]. Die Likatoren 3, 7 und 8 schauen auf den Kaiser [my emphasis]".

As just mentioned, the figures represented on Frieze A and B, are numbered on here **Figs. 1 and 2 drawing**. For the figures of the lictors and soldiers, discussed in this Chapter; cf. *infra*, n. 250.

After having almost finished writing this Chapter, I had the chance to discuss the matter with Eric Moormann in December of 2019, from whose relevant (at the time forthcoming) publication I have chosen the epigraph for this Chapter. I agree with Moormann's statement, and with that by Langer and Pfanner (2018, 74), although at second glance it is definitely not as easy, as I have just suggested myself in Chapter I.2.1.b). - I am not joking.

**Admittedly I quite like the idea (suggested in Chapter I.2.1.b)) that on both friezes the real centre of the composition is not any of its 17 figures, but in reality the *pomerium*-line, but in Frieze A my hypothesis seems at second glance not to work - although at third glance it *does* seem to work.**

Paolo Liverani, in the course of our discussion of both friezes on 14th March 2019 in Rome, was so kind as to remind me of the fact that on the far right of Frieze A - that I have interpreted above (in Chapter I.2.1.b)) as belonging to the area within the *pomerium*, or *domi* - appear the **figures 10; 12; 14-17** (cf. here **Figs. 1 and 2 drawing**), who are following Domitian (now Nerva).

They are armed soldiers (as I have written in this *Study* elsewhere myself; cf. at **ns. 381, 447**, in Chapter III. !), which means, as Liverani has rightly pointed out to me, that the entire scene shown on Frieze A, not only the part to the left of the figure of Domitian (now Nerva), as I have suggested above in Chapter I.2.1.b), is meant as taking place *outside* the *pomerium* (!). - But see below.

If true, not the *pomerium*-line, but instead Domitian is to be regarded on both friezes as the centre of the composition.

Paolo Liverani's observation has even more consequences. In theory there are two possibilities.

1.) It is (in theory) conceivable that the artists had intended to show that *Dea Roma* has made on Frieze A one of her rare exceptions to meet with the Emperor at a point 'just outside the *pomerium*', as on Hadrian's *adventus* relief (cf. here **Fig. 91**).

The scenario I have developed here is, of course, dependent of my identification of the amazon-like figure on Frieze A as the *Dea Roma* (cf. here **Figs. 1 and 2 drawing; figure 9**, and *supra*, at Chapter I.2. *The amazon-like figure on Frieze A: Dea Roma, not Virtus*).

But the problem remains that the *Genius Senatus* and the *Genius Populi Romani* should stay within the *pomerium*. - Because: according to Liverani's just-mentioned hypothesis, both, *Genius Senatus* and the *Genius Populi Romani* (cf. **Figs. 1 and 2 drawing: figures 11; 13**) seem thus to appear on Frieze A *outside* the *pomerium* (!).

2.) As mentioned before, Burkhard Fehr, as well as Langer and Pfanner (cf. *supra*, at **ns. 144, 193**, in Chapter I.1.), discuss in different contexts various kinds of 'errors' that have been observed in Roman state reliefs.

Does that possibly mean that Frieze A of the Cancelleria Reliefs should be added to the list of such reliefs, because it represents a scene that takes place *within* the City of Rome, but where armed soldiers appear, which, according to Roman law, was of course forbidden?

Besides, it happens more than once that on the Cancelleria Reliefs appear figures at places, where we would not expect them, or rather, that they are seemingly occurring at places, where their equipment proves to be wrong. One example are the just mentioned *armed* soldiers **figures 10; 12; 14-17**, who appear on Frieze A on that '(right) half of the panel' that is otherwise dedicated to the representatives of the City of Rome (*Dea Roma, Genius Senatus* and *Genius Populi Roman*: **figures 9; 11;13**), who are, as I suggest here, meant as being 'within' Rome. And that, although these soldiers belong to Domitian (now Nerva), who stands on the 'other half of the panel', that is to say, 'outside the city of Rome', where under normal circumstances also those armed soldiers should be expected.

**By mentioning here certain characteristics of Frieze A, I have already anticipated my conclusion that it was these (as we shall see: secondary) decisions concerning the compositions that have caused all the iconographic problems - on both panels. - To this I will come back below.**

With the error just mentioned on Frieze B, I am referring to three men, according to the nomenclature of Langer and Pfanner (2018) their **figures 8; 9 and 10** (cf. here **Figs. 1 and 2 drawing**). These men have been attributed to the Vestal Vergins, but also to Vespasian.

According to Hugo Meyer (2000, 127 with Fig. 229), we see on the left side of Frieze B the Vestal Virgins (**figures 3-7**) and the *Dea Roma* (**figure 2**):

"An diese schließt ein Togatus mit Gerten an [**figure 1**], in dem man wohl zu Recht einen *apparitor* gesehen hat [with n. 405]; dessen Aufgabe war es, den Priesterinnen in der Öffentlichkeit Durchlaß zu verschaffen. Zwei seiner Gehilfen [**figures 8 and 9**, both of whom are only in part preserved] sind vor der vordersten Vestalin [**figure 7**] wiedergegeben, wie sie den heiligen Frauen eine Gasse bahnen [with n. 406]. Der den Priesterinnen zustehende Lictor ist in der nach rechts anschließenden Figur [**figure 10**] zu erkennen [229]: ihm hatten selbst die Konsuln Platz zu machen [with n. 407]". - When we follow for a moment Hugo Meyer's scenario, we must imagine that the lictor **figure 10** had before marched in the procession, headed by the togate youth (**figure 12**) towards Vespasian (**figure 14**), but has stopped now and does not go any further, because the protagonists of both groups, the togate youth and Vespasian, have finally met. These (**figures 12 and 14**) stand still, obviously for quite some time already.

In his **notes 405-407**, Hugo Meyer provided references and further discussion. In **note 405** he quoted: E. SIMON (1963, 9), and in **note 407**: J. MARQUARDT (1885) 340f.

As observed by Diana E.E. Kleiner (1992, 191):

"The Vestals [**figures 3-7** on Frieze B] are followed by two lictors in short tunics and mantles and with axes attached to their rods. The one farthest left [*i.e.*, **figure 9**] has his back to the spectator; the one on the right [*i.e.*, **figure 10**] faces front and, along with another lictor on the far right of the relief panel [*i.e.*, **figure 15**], flanks the central group of Domitian and Vespasian".

Diana E.E. Kleiner thus attributes the lictor **figure 9** on Frieze B to the Vestal Virgins, whereas Langer and Pfanner (2018; cf. *infra*, quoted *verbatim* in n. 250), whom I am following here, suggest that lictor **figure 9**, together with lictor **figure 8**, precedes Vespasian, and thus belongs to the emperor. Now, the irritating fact on Frieze B is that these three lictors (**figures 8-10**), all of whom are, in my opinion, positioned 'within' the *pomerium* of Rome, are presumably equipped with axes attached to their rods (only in **figure 10** the axe is preserved) - exactly as in the case of the lictor (**figure 15**), who follows behind Vespasian. Only in his case, the fact that this lictor is equipped with *fasces*, to which an axe is attached, may be regarded as correct, since Vespasian and his lictor **figure 15** (at least in my opinion) are meant as standing outside the *pomerium* (to this I will come back below and *infra*, in Chapter V.1.i.3.)).

Now, apart from the problems just mentioned concerning the three lictors (**figures 8-10**) on Frieze B, there are still more open questions. First of all not all scholars agree concerning the identification of those figures: Hugo Meyer (2000, 127 with n. 406) identified **figures 8 and 9** as two assistants of the *apparitor* (**figure 1**), who belongs to the Vestal Virgins. In his later publication on the subject; cf. Hugo Meyer (2011, 177), he called also the **figures 8 and 9** *apparitores*. This question has been clarified by Langer and Pfanner (2018, 53-54, for their **figures 8 and 9**), who have observed the remains of *fasces*, carried by the lictor **figure 9**, which is why probably also **figure 8** is a lictor. Langer and Pfanner (2018, 54) describe the lictor **figure 10** as follows: "Der sich nach links bewegend Mann wendet den Kopf nach rechts ...". From this (correct) observation follows that also the lictor **figure 10** belongs to Vespasian, which means that the emperors on both friezes are accompanied by four lictors each (in S. LANGER and M. PFANNER's opinion 2018 on Frieze B by possibly even five lictors). The lictor *curiatus*, who belonged to the Vestal Virgins, is according to Langer and Pfanner (2018, 50-51) the man on the far left of Frieze B, their **figure 1**, who is *not* equipped with *fasces* and an axe.

The next problem relates to the actions of the three lictors on Frieze B. Because of the directions, in which the **lictors 8 and 9** seem to move, Lorenz Baumer (2007, 101-102) suggested that they are 'walking around something', building on this (erroneous) observation far reaching hypotheses.

These hypotheses have been rejected by Hugo Meyer (2011b, 175-180: Section: "Ein interpretatorischer GAU [*i.e.*, ein 'größter anzunehmender Unfall']"), wrote on p. 177:

"Was Baumer selbst anzubieten hat, kann nur als abwegig bezeichnet werden und lohnt näheres Eingehen eigentlich nicht".

In reality, Baumer's observations at these lictors (**figures 8 and 9**) were not correct. Langer and Pfanner (2018, 53-54, discussing **figure 8**) were able to demonstrate, that the artists in question, instead of showing that the two lictors **figures 8 and 9** were walking in different directions, had simply made some serious mistakes concerning the legs and feet of **figure 8**, when they were sculpting this figure. Langer and Pfanner even suggest that the remains of **figure 8** could belong to two lictors: **figure 8** and **figure 8a**. Personally I am convinced that there was only one lictor: **figure 8**.

Although some of the aforementioned questions could thus be answered, other problems remain. If the lictor **figure 10** on Frieze B belongs to Vespasian, as is reasonable to suppose, we must assume that he, exactly as the lictors **figures 8 and 9** had at first preceded Vespasian - if not, he could not already stand at his current position. As I see now myself, he has clearly previously moved from 'right to left', exactly like Vespasian himself and as also almost all the other men of the emperor's entourage (**figures 9, 15, 17** - but not **figure 8**, although also this lictor must before have moved from 'right to left'), as well as *Victoria* (**figure 16**), who is crowning Vespasian. Now the lictor **figure 10** has stopped, looking back in the direction of the emperor, giving the impression that he must have heard something behind his back: possibly something that Vespasian is saying to his son Domitian (?), whereas the lictors **figures 8 and 9** are obviously not any more within ear shot of hearing Vespasian's voice (although the lictor **figure 8** looks in the direction of Vespasian).

**In the case of Frieze A, Lorenz E. Baumer has made some observations, which, together with those made by Langer and Pfanner (2018, 76, quoted *verbatim infra*, n. 250), allow the conclusion that the soldiers (figures 10, 12, 14-17) were only added at a later time to the composition of this panel.**

Baumer (2007, 97) writes:

"Keine Beachtung fand in der Diskussion bisher der Umstand, dass sich die Unruhe unter den Soldaten und Begleitern des Kaisers auf die Figuren im Vordergrund beschränkt, während die Likatoren und Soldaten im Hintergrund ein regelmäßiges Marschtempo angeschlagen haben. Ein ebenfalls wenig beachtetes ikonographisches Detail belegt, dass dieser Unterschied nicht zufällig sein kann. Bei den Likatoren am linken Bildrand ist zu erkennen, dass sie Rutenbündel tragen, an denen Beile befestigt sind, während die Likatoren, die in flachem Relief im Rücken des Kaisers vorbeimarschieren, keine Waffen in ihren *fasces* führen [with n. 25]".

In his **note 25**, Baumer writes: "Bemerkt von Herzog 2001, 122f., der daraus folgerte, dass die Likatoren im Hintergrund gerade die Stadtgrenze überschritten, während sich die anderen bereits außerhalb des Pomeriums befanden".

Also the observations by Dietrich Boschung (2012, 44) on Frieze A can help us to understand the relevant choices by the artists:

**"Einer der beiden sicher zusammengehörigen Friese [with n. 35] zeigte ursprünglich den Aufbruch des Kaisers Domitian in den Krieg (Abb. 29 [cf. here Fig. 1; Figs. 1 and 2 drawing: figure 6]); nach der Ermordung des Herrschers wurde sein Porträt zu einem Bildnis des Nachfolgers Nerva umgearbeitet. Der Kaiser steht als Hauptfigur im Zentrum der Darstellung (Abb. 30). Er trägt Tunica und Paludamentum, wendet sich nach links und gibt mit erhobener Hand die Richtung an. Eine bewaffnete Frau in Amazonentracht, die *Virtus* (die personifizierte Tapferkeit [here interpreted as *Dea Roma*; cf. *supra*, at Chapter I.2.]) darstellt, unterstützt den Kaiser, indem sie seinen linken Unterarm fasst ... Vor Mars und im Rücken des Kaisers schreiten die Likatoren, die den Rang eines hohen Beamten bezeichnen". Cf. p. 44 on the *Genius Senatus* on Frieze A [here Figs. 1 and 2 drawing: figure 11]: "Er hält ein Szepter mit der Büste des Kaisers und bringt damit die enge Verbindung von Herrscher und Senat zum Ausdruck [with n. 36]". Cf. p. 44 on the *Genius Senatus* and the *Genius Populi Romani* [here Figs. 1 and 2 drawing: figure 13] on Frieze A: "Im Gegensatz zu den Begleitern des Kaisers bleiben sie in Rom zurück, während die anschließenden Soldaten sich in Bewegung setzen, um ihrem Imperator zu folgen. Am rechten Ende des Frieses stehen drei Soldaten in der *paenula*, der Reisekleidung, jedoch mit Ovalschild und *pilum* ausgerüstet. Der Vierte, der ihnen vorausgeht, hat abweichend von ihrer Ausrüstung eine *hasta*, wie die *principales* (Unteroffiziere) sie tragen [with n. 37], und einen Rundschild, den er nicht angelegt hat, sondern unter dem Arm trägt. Es handelt sich bei dieser Figur um den *armiger*, den Waffenträger des Kaisers [here Figs. 1 and 2 drawing: figures 14-17] ... Das Relief zeigt also die *profectio* des Herrschers: Er bricht von Rom mit seinen Soldaten zu einem Kriegszug auf, dessen siegreicher Ausgang die vorausfliegende Victoria ankündigt ... Noch reist der Kaiser wie ein ziviler Magistrat mit seinen Likatoren, aber er führt seine Waffen mit sich und wird, wenn nötig, mit seinen Soldaten mitkämpfen [my emphasis]".**

In his **notes 35-37**, Boschung provides references and further discussion.

For the sceptre, held by the *Genius Senatus* (**figure 11**) on Frieze A in his left hand (cf. S. LANGER and M. PFANNER 2018, 75-76, Fig. 9 and n. 106, providing references): his loyalty to Domitian is stressed by the sceptre, provided that actually was adorned with a portrait of Domitian. This assumption has been doubted by some scholars, but Stephanie Langer Michael Pfanner (*op.cit.*) are able to prove it. See also Anne Wolfsfeld (2014, 201-202). This entire discussion is quoted *verbatim infra*, at Chapter V.1.e).

Tonio Hölscher (2009a, 57, according to whom both panels of the Cancellaria Reliefs represent an *adventus*) writes:

"Anche qui [*i.e.*, on Frieze B; cf. here **Fig. 2**] è quindi rappresentato un *adventus*, per cui i littori hanno scuri nei *fasces*, ma stavolta l'arrivo è di altra natura rispetto al fregio A: l'imperatore non torna da una campagna militare e non viene seguito da soldati, mentre Vittoria lo incorona non con lo corona del vincitore, ma con la corona *civica*".

For the fact that Vespasian is crowned by *Victoria* with this specific crown, and for the meaning of this decoration; cf. *infra*, **ns. 385, 386**, at Chapter III., and in Chapters V.1.i.3.); V.1.i.3.a); summarized in Chapter *The major results of this book on Domitian*.

**The problems that thus remain are the following: 1.) on Frieze A appear six armed soldiers (figures 10, 12, 14-17) within an area, that I would otherwise identify as being located 'within the city'; 2.) on Frieze B we find a lictor (figure 10), equipped with rods, to which an axe is attached, a fact that is possibly also true for Vespasian's other lictors (figures 8 and 9), all three of whom likewise positioned at points, that I would otherwise interpret as being located 'within the city'.**

**This leads us to the characteristics of the compositions of both panels.**

The decisions concerning the designs of both Cancellaria Reliefs, made by the artists in the above-mentioned two examples 1.) and 2.), are similar, and consist in each case in the trial to adjust two (or even more) already existing iconographic schemata to each other - and in both panels the relevant choices of the artists have created problems of interpretation<sup>250</sup>.

<sup>250</sup> For the *pomerium*-line, cf. *supra*, **n. 199**, in Chapter I.1.1. See also M. ANDREUSSI: "Pomerium", in *LTUR* IV (1999) 96-105.

For Vespasian's four lictors on Frieze B, mentioned here, cf. S. LANGER and M. PFANNER 2018, 53-54 (on **figure 8** on Frieze B); cf. p. 54 (on **figure 9** on Frieze B): "Reste der *fasces* befinden sich vor dem linken Oberarm"; cf. pp. 54-55 (on **figure 10** on Frieze B), cf. p. 54: "Mit seiner linken Hand hält er die mit Lorbeer geschmückten *fasces* vor der Brust ... an den *fasces* befestigt ist das Beil *securis*, das in ein Futteral eingesteckt ist ..."; cf. pp. 57-58, for **figure 15** on Frieze B, the lictor, who is following Vespasian. They write on p. 58: "Der linke Arm hält vor der Brust die *fasces*. An diesen ist in einem Futteral, dessen Stoffalten sich über die Beilschneide spannen, die *securis* eingesteckt. Beil und *fasces* sind freiplastisch gearbeitet ...".

S. LANGER and M. PFANNER 2018, 76 (on **Frieze B**), write about Vespasian's four (or in their opinion possibly five) lictors: "Der Gruppe der Vestalinnen und Stadtgöttin [*i.e.*, the *Dea Roma*] begegnen der Kaiser und sein Gefolge. Zuerst kommen drei bzw. vier Liktores (*i.e.*, their **Figure 8/9a-10**) an, deren lorbeerbekränzte *fasces* teilweise erhalten sind [with n. 119]. Ein weitere Liktor (**Figure 15** on Frieze B) nähert sich in schnellem Lauf von rechts. Hinter ihm steht ein nicht identifizierter Amtsdienstler (**Figure 17** on Frieze B) mit *rotulus* in der Hand. Die Figuren **10** und **15** tragen in den *fasces* das Beil (*securis*), was bei den übrigen Liktores aufgrund der fragmentarischen Erhaltung nicht gesichert ist [with n. 120; my emphasis]".

S. LANGER and M. PFANNER write in their note 119: "Eventuell handelt es sich um 4 anstatt 3 Liktores, die Rekonstruktion von Magi ist hier nicht gesichert. Siehe dazu ausführlich Kap. 2.8".

Cf. their note 120: "Die **Figuren 8 und 9** werden auch als Gehilfen des Lictor curiatus [of the Vestal Virgins] interpretiert: vgl. Meyer 2000, 126 [my emphasis]".

Cf. S. LANGER and M. PFANNER 2018, 50-51 on Frieze B, "**Figure 1**: Apparitor/Lictor curiatus[?] (Taf. 10a; Taf. 17; Taf. 32; Taf. 48,2; Taf. 50,1; Taf. 57,3) [my emphasis]".

S. LANGER and M. PFANNER (2018, 46-50) discuss the armed **figures 10, 12, 14-17** on **Frieze A**. Cf. p. 46: "**Figure 10: Soldat** (Taf. 8; Taf. 25,1; 26,5; Taf. 49,3) ... Nach links gewandter Mann im Hintergrund ... Von seiner Bekleidung sind lediglich die Falten des *focale* im Nacken zu erkennen Über seiner rechten Schulter trägt er das *pilum*, das in einer runden Speerspitze endet ... [my emphasis]"; cf. p. 48: "**Figure 12: Soldat** (Taf. 8,2; Taf. 25,2; Taf. 26,6; Taf. 27,6) ... Männliche Figur im Hintergrund, die sich in einem weiten Ausfallschritt nach links bewegt ... über der rechten Schulter trägt er das *pilum* ... Der Soldat trägt *tunica*, *paenula* und *focale* sowie die *caligae* ... [my emphasis]"; cf. pp. 48-49: "**Figure 14: Soldat (Beneficiar/armiger)** (Taf. 9; Taf. 28) ... die Falten der *paenula* sind z.T. abgebrochen ... [he carries a] "Lanze (*hasta*) ... Unter dem linken angewinkelten Arm hat er einen mit kurzen Federn verzierten Rundschild geklemmt, den er an der Außenkante mit der Hand umschließt ..."; cf. p. 49: "**Figure 15: Soldat** (Taf. 9; Taf. 29; Taf. 49,5; Taf. 57,1) ... Er ist in die knielange *tunica* und *paenula* gekleidet ... Er hält in der Rechten ebenso wie **Figure 12** das *pilum*, dessen unteres abgesetztes Ende bis zur Mitte des rechten Schienbeines reicht. Die Kugel unterhalb der pyramidenförmigen Zwinge ist mit einem Adler verziert. Rechts davon sind wohl die Reste eines zweiten [*i.e.*, *pilum*] vorhanden. Die linke Körperhälfte schützt er mit einem gebogenen Ovalschild ... [my emphasis]"; cf. pp. 49-50: "**Figure 16: Soldat** (Taf. 9; Taf. 29,5; Taf. 30) ... unterer Schaft des *pilum* und Rand des Schildes abgebrochen ... In der gesenkten rechten Hand hält er das *pilum* ... [page 50. He is dressed in *tunica*, *paenula* and the *focale*] ... Ein Ovalschild, dessen Mittelgradverstärkung als geflügelter Blitz geformt ist, deckt die linke Körperseite ... [my emphasis]"; cf. p. 50: "Figure

The relevant decisions, made by the artists who designed the Cancellaria Reliefs, can in my opinion be divided into two different kinds: *a)* overall decisions, which must have been made before the carving process started; *b)* in addition, and *ad hoc* decided changes, made at a later stage of the carving process, which we could characterize with the Italian term *pentimenti*.

Let's begin with *a)*, the overall decisions concerning the compositions of the Cancellaria Reliefs.

According to Gerhard Koeppel (1969) in Frieze B two separate, already well known 'static images', have been combined with additional figures to create a *continuous frieze* (the following passage from Koeppel 1969 is quoted in more detail *infra*, at n. 416, in Chapter III.).

Koeppel (1969, 172-174) wrote:

"Das Relief B von der Cancellaria mit dem Adventus des Vespasian ... Immer wieder spielt im Adventus und in der Profectio die Trennung der Bereiche Domi und Militiae eine nicht zu übersehende Rolle, die durch die Trennung in der Relief-Komposition sichtbar ist [with n. 163]. So verhält es sich auch in Relief B [page 173, Abb. 16; page 174] von der Cancellaria [cf. here **Fig. 2; Figs. 1 and 2 drawing**]: der Stein steht an dem Einschnitt in der Komposition, an dem sich zwei Bewegungsrichtungen treffen ...

Im Gegensatz zum Profectio-Fries [*i.e.*, Frieze A; cf. here **Fig. 1**], wo die Bewegung in einem Zug nach links verläuft und über die Grenze des Reliefs hinausweist (Bild 3), ist hier in der Komposition ein Aufeinander-Zukommen der Bewegungen festzustellen. Das ist im Thema des Adventus selbst begründet, der ja ein Begegnung darstellt oder eine Ankunft an einem festen Ort ... **Die Form des Frieses ist für diese Darstellungsweise nicht geeignet, was schon die Tatsache, daß man von 'Frieshälften' sprechen kann, anzeigt. Im Grunde sind hier zwei statische Bilder in ein Friesband hineingesetzt und durch zusätzliche Figuren verbunden** [with n. 165; my emphasis]".

These two 'static images' (so G. KOEPEL 1969, 174), which are the basis of the two 'halves' of Frieze B, have been 'connected with each other' by the tree lictors, who precede Vespasian (cf. here **Figs. 1 and 2 drawing: figures 8; 9 and 10**). In the case of Frieze A on the other hand, the armed soldiers (**figures 10; 12; 15-17**) and Domitian's *armiger* (**figure 14**), who carries Domitian's weapons, have only been moved to the right half, and therefore 'wrong' (because *domi*-)side of the composition, because on the correct, left half of the composition Minerva and Mars are occupying precisely that space, which we could regard as appropriate for armed soldiers. The reason to position the soldiers on the 'wrong' side of the panel was obviously the consequence of the - understandable - decision by Domitian himself or his artists that on the left side of the relief Domitian's divine *comites* Mars and Minerva should appear. This was, as we have seen above (cf. *supra*, at Chapter I.2.), an altogether innovative idea. And because Domitian wanted at the same time to stress his decision to be prepared to fight in person in this war, the artists had no other choice but to add the group of his *armiger* and the armed soldiers on the right side of the relief.

---

17 (Taf. 31; Taf. 49,6) ... Stehender Mann, der nach links ausgerichtet ist .. Er ist mit *paenula*, *focale* und *tunica* bekleidet ... An den Füßen trägt er die *caligae* ... An der rechten Schulter lehnt das *pilum* ... [my emphasis]".

Cf. S. LANGER and M. PFANNER (76, in their section 2.9.4) write on the same **figures 10, 12, 14-17 on Frieze A**: "Hinter den Genien formiert sich eine Gruppe von sechs Soldaten (**Figure 10, 12, 14-17**). Welcher Einheit sie angehören wird nicht deutlich [with n. 108]. Ihre Ausrüstung entspricht im Prinzip der üblichen Bewaffnung von Legionären [with n. 109], wobei die auffällig reiche und nahezu prunkvolle Verzierung nicht zu einfachen Soldaten passt. Ob es sich um Prätorianer handelt, ist aufgrund der fehlenden Feldzeichen nicht auszumachen [with n. 110]. Der muskulöse und bärtige Mann (**Figure 14**) hebt sich von den jungen Soldaten ab. Er trägt ein zusätzliches *cingulum* und eine auffällige blattförmige *hasta*. Diese Ausrüstung ist auch für Beneficiarius, d. h. [das heißt] Unteroffiziere, belegt. Als Machtsymbol ist die *hasta* zudem für andere Beamte und den Kaiser selbst bezeugt, wobei mit dem Speerattribut das höchste Entscheidungsrecht (*summa imperii*) bezeichnet wurde. Die *hasta* wurde dabei meist nicht vom Beamten bzw. Kaiser selbst getragen, sondern von einem subalternen Begleiter [with n. 111]. **Es könnte sich bei dem Mann also um den persönlichen Waffenträger (armiger) des Kaisers handeln**, der deshalb den Schild so unkriegsgerisch unter seinen Arm klemmt [with n. 112]. **Die technische Analyse (s.[iehe] Kap. 2.9.3) lässt vermuten, dass er in einer ursprünglichen Vorlage vielleicht gar nicht vorgesehen war, sondern nachträglich eingefügt wurde, was die Ungereimtheiten bei Füßen, Schulter und Schild erklären würde** [my emphasis]".

In her notes 108-111, S. LANGER and M. PFANNER provide references and further discussion.

It is interesting to compare in the just discussed context the solution, found by the artists who designed the Nollekens Relief (cf. *infra*, at Chapter V.1.i.3.b); Section I., and here **Fig. 36**). Here the two paludate lictors, who accompany Domitian, and one soldier (**figures 1, 4 and 3**) represent the area *militiae*. All three of them are standing just outside the *pomerium* and appear on the left hand 'half' of the panel - as they should. Whereas those figures, who represent the area *domi*: the *Dea Roma*, the *Genius Senatus* and the two *consules* (**figures 11; 8; 7 and 9**) are standing on the 'right' hand half of the panel - as also they should. The emperor himself thus stands at the *pomerium*-line - as he likewise should, provided we follow Pollini's interpretation. According to his hypothesis, Domitian is performing the sacrifice at the *Porta Triumphalis*. Only after its completion, Domitian will transgress the *pomerium*-line (by passing through his newly built *Porta Triumphalis*), and thus begin his triumphal procession, accompanied by his army and his lictors, who, at the represented moment, are still waiting outside the *pomerium*. And, as soon as the procession will have marched through the *Porta Triumphalis*, it will be solemnly received by the entire populace of Rome, indicated by the city's representatives on the right hand hand 'half' of the relief.

**Let's now turn to b), the ad hoc decided changes of the compositions of the Cancellaria Reliefs, or pentimenti**

In addition to this, Langer und Pfanner (2018, 49, in their texts related to **figures 14 and 15**; cf. p. 76, quoted *verbatim supra*, n. 250) have observed that the sculpting process of Frieze A shows two phases, suggesting that the *armiger* (**figure 14**) has been added at later time. For Frieze B on the other hand Langer and Pfanner suggest (2018, 69, in Chapter 2.9.3, the context are mistakes made by the artists on both Cancellaria Reliefs) that in the group of the three **figures 11; 12; 13**, the *Genius Senatus* (**figure 11**) and the *Genius Populi Romani* (**figure 13**): ">spontan< oder nachträglich eingefügt wurden. In diesem Fall ist auch eine Umarbeitung oder Planänderung nicht ganz auszuschließen". This passage is quoted *verbatim* in more detail *infra*, at Chapter V.1.e).

These decisions, made by the artists of the Cancellaria Reliefs, concerning *a*), the overall design of the Cancellaria Reliefs, and *b*), the 'last minute' changes or *pentimenti*, which characterize both panels, have caused the above-mentioned iconographic problems. But we can also formulate the results thus obtained in a positive way. The decision to add on Frieze A Domitian's *armiger* and some of his armed soldiers (on the 'wrong' side of the relief), and on Frieze B the (armed) lictors, who precede Vespasian (likewise on the 'wrong' side of the relief), are, in my opinion, another proof that these artists were indeed innovative.

**As is well known, the great disadvantage of any innovation is that it is new.**

**And that, in its turn, can mean that the results of such projects may still contain many 'mistakes'.**

After this Chapter was written up to this point, I received John Pollini's (2017b) article on the Nollekens Relief (cf. here **Fig. 36**). Independently, and arguing in part on the basis of different evidence (cf. *infra*, in Chapter V.1.i.3.)), I have come in many respects to the same results as Pollini. I will quote my relevant conclusions after Pollini's account.

**Pollini (2017b, 116, in his Section: "Comparison with the Cancellaria Reliefs") writes about Frieze B (cf. here Fig. 2):**

"In Frieze B (fig. 14 [cf. here **Fig. 2; Figs 1 and 2 drawing**]) we find three paludate imperial lictors [**figures 8; 9; 10**], indicating that the scene would have taken place just outside the *pomerium* of Rome upon Vespasian's victorious return from the East following his suppression of the Jewish rebellion. Vespasian's eastern victory is underscored by the now-largely missing goddess Victoria (her foot dangling in mid-air directly behind Vespasian [**figures 14; 16**]), who extends an oak crown (partly preserved) over Vespasian's head. The helmeted, Amazonlike figure of Roma [**figure 2**] seated at the far left in the company of the Vestal Virgins

[figures 3-7] alludes to the hearth of Rome that the latter tended in the Temple of Vesta, providing a topographical reference to Vespasian's ultimate destination. There is general agreement that Frieze B represents an *adventus*, but some scholars believe that Frieze A also shows an *adventus* [with n. 85].

In his **note 85**, Pollini writes: "See e.g., Ghedini *ibid.* [*i.e.*, here F. GHEDINI 1986], 292-297, who takes Frieze A [corr.: Frieze B; cf. here **Fig. 2; Figs. 1 and 2 drawing**] as Domitian's *adventus*, with the head of Vespasian being recut from a portrait of Domitian. See also Hölscher (*supra* n. 45 [*i.e.*, here T. HÖLSCHER 2009a]) 5-60, figs. 19-20".

For Francesca Ghedini's relevant hypotheses; cf. *supra*, at **n. 181**, in Chapter *I.1.*, and in Chapter *I.1.1.*; and for Tonio Hölscher's hypotheses; cf. *supra*, at Chapters *I.1.*, *passim*; and *I.1.1.*, as well as *infra*, at Chapter *III.*

**Pollini (2017b, 117, Section: "Comparison with the Cancellaria Reliefs") writes about Frieze A (here Fig. 1; Figs. 1 and 2 drawing):**

"To the left, Mars and Minerva [figures 4; 5] (who makes a gesture of donning her helmet) rush ahead of Domitian [figure 6] (his head was re-cut to that of Nerva subsequent to Domitian's *damnatio*. The imperial figure [*i.e.*, Domitian/ Nerva], shown *paludatus* as he leaves the *pomerium*, is sent on his way by Roma [figure 9], who places her arm beneath his left ... The personified, bearded Senate [figure 11], standing farther to the right at the emperor's back, raises his hand in a gesture of farewell (it cannot be a gesture of greeting, since this figure does not face the emperor). Next to the personified Senatus is the semi-nude Genius Populi Romani [figure 13], also alluding topographically to the *pomerium* of the City from which the emperor is now departing".

For the *pomerium*; cf. *supra*, **n. 250**, and *infra*, **n. 453**, in Chapter *III.*

**In the following (on p. 118), Pollini discusses the terms *domi* and *militiae*. After that, Pollini (2017b, 118) continues :**

"A division between *domi* and *militiae* is also evident in the Cancellaria *adventus* scene [*i.e.*, Frieze B; cf. here **Fig. 2**]. The right half, punctuated by the one well-preserved paludate lictor of Vespasian [figure 10]; near the middle represents the domain beyond Rome's *pomerium* [with n. 93]. The left half, with the seated Roma, Vestal Virgins, and their togate lictor *curiatus* (or *apparitor*) holding two rods (*bacilli*) in the left hand [with n. 94; *i.e.*, **figure 1**], represents the sphere within the *pomerium*. To the immediate left of Vespasian's lictor is another [figure 9] (only a trace of his *fasces* now appears on his left shoulder), who rushes toward Rome's civic and religious center (represented by the Vestals and Roma herself) to announce Vespasian's victorious return [with n. 95]".

In his **note 93**, Pollini writes: "Koeppel 1984 (*supra* n. 1 [*i.e.*, here G.M. KOEPPEL 1984]) 31-32 (no. 10)".

In his **note 94**, he writes: "These two rods (without axe) of the Vestal's lictors were technically used to move people out of the way in the street, if necessary, but were probably more symbolic than practical. For the lictor *curiatus*, see Schäfer (*supra* n. 75 [*i.e.*, here T. SCHÄFER 1989]) 228; Pollini (*supra*, n. 20 [*i.e.*, here J. POLLINI 2012]) 359 n. 40, 362 n. 80".

In his **note 95**, he writes: "See Koeppel 1984 (*supra* n. 1 [*i.e.*, here G.M. KOEPPEL 1984]) 31-32 (no. 90)".

**Concerning the precise location of the *pomerium*-line on Frieze B, my own interpretation differs from Pollini's (2017b, 118) because of two reasons:**

1.) I follow Simon (1960) and Koeppel (1969) in assuming that the *Genius Populi Romani* on Frieze B sets his left foot on a *cippus* of the *pomerium*-line.

Cf. Simon (1960, 152ff.), followed by Koeppel (1969, 172 n. 159), quoted *verbatim supra*, at **n. 249**, in Chapter *I.2.1.b*), and *infra*, **n. 416**, in Chapter *III.*, where Koeppel's account is quoted in more detail; Simon (1963, 9-10; quoted *verbatim infra*, at **n. 456**, in Chapter *III.*). See also *supra*, at Chapter *I.2.1.b*), and *infra*, at Chapter *V.1.f*)

*My own hypothesis concerning the alleged 'footstool' of S. Langer and M. Pfanner (2018) on Frieze B, on which the Genius Populi Romani sets his left foot - it is a cippus of the pomerium-line of Rome;*

2.) I follow Simon (1963, 10) in identifying in the togate youth **figure 12** the acting *praetor urbanus*. Also by means of the composition, the artists make clear that the young man holds this high office (cf. *supra*, at Chapter I.1.1.; see also below, Chapter *The major results of this book on Domitian*, with **Figs. 1 and 2 of the Cancellaria Reliefs, drawing, 'in situ'**, and the caption of this figure).

The *praetor urbanus* (cf. *supra*, at **ns. 172, 181, 185, 189**, at Chapter I.1.) was one of the magistrates, who could receive an emperor in an *adventus* ceremony (the other magistrates being the *consules* and the *praefectus urbi*, but those do not qualify here, because men holding these offices were much older than the togate youth; cf. *infra*, at Chapter V.1.h.1.).

But the *praetor urbanus* had an important spatial restriction: he could only act in the capacity of his office within Rome's *pomerium* (for a discussion of all that; cf. *infra*, at V.1.i.3.).

Since in Pollini's (2017b, 116) and my own opinion Frieze B shows Vespasianus' *adventus* into Rome in October of AD 70, the acting *praetor urbanus* (since 1st of January AD 70) was Vespasian's younger son Domitian (cf. *supra*, **n. 189**, in Chapter I.1.; and Chapter I.1.1.). Also Pollini (2017b, 118 with n. 96) himself identifies the togate youth on Frieze B (**figure 12**) with Domitian. But Pollini (*op.cit.*) does not address which 'topographical' consequences this assumption has in regard to Domitian's spatial restriction, when he was acting in October of AD 70 as the *praetor urbanus* in the (purported) *adventus* ceremony of his father Vespasian. A ceremony which, in its turn, had strict consequences for the locations of *both*, the *praetor urbanus* and the victorious Emperor Vespasian - *inside viz. outside the pomerium* - and thus consequently within the composition of Frieze B of the Cancellaria Reliefs.

For all that; cf. *infra*, in Chapter V.1.i.3.); summarized in Chapter *The major results of this book on Domitian*.

In the following, I anticipate a passage from Chapter V.1.i.3.). This was written before I studied Pollini (2017b, 118). Also after reading Pollini's account, I maintain the conclusions, at which I had arrived there:

'I myself have therefore followed the relevant hypotheses of Simon (1960; 1963) and Koeppl (1969), in assuming that on Frieze B the young Caesar and *praetor urbanus* Domitian and Vespasian are shown in Vespasian's *adventus* at Rome of October AD 70, which is staged at the *pomerium*-line.

And that, although I am fully aware of the fact that on Frieze B Vespasian's two lictors (cf. here **Figs. 1 and 2 drawing: figures 8 and 9**, who are not entirely preserved), could in theory have been represented with the axes attached to their rods, exactly as Vespasian's lictor **figure 10** on Frieze B. Note that these three lictors (**figures 8-10**) are positioned on Frieze B within that area, which is here interpreted as being located 'within the *pomerium*', an area, where lictors usually should *not* be shown with their axes attached to their rods. Although there is another state relief, in which exactly the same mistake has likewise been observed, the famous Extispicium Relief in the Louvre (cf. here **Figs. 16-18**).

For that mistake; cf. *supra*, **n. 144**, in Chapter I.1.; below, at *A Study on Domitian's cult-statue of Iuppiter Optimus Maximus Capitolinus*; and *infra*, in volume 3-2, at *Appendix I.g.3.*; and at *Appendix I.g.4.*

Note also that Vespasian's fourth lictor (**Figs. 1 and 2 drawing: figure 15**), who follows behind Vespasian, is correctly shown with the axe attached to his rods, because he stands outside the *pomerium*'.

**To conclude.** When we consider that the 'wrong shoes', worn by the *Genius Senatus* on Frieze B; nor the question of whether the amazon-like representation on Frieze A should be identified as *Dea Roma* or *Virtus*; or the just mentioned example of the six *armed* soldiers (figures 10; 12; 14-17) on Frieze A, who appear in a context that otherwise might be interpreted as an area *within* the *pomerium* of Rome; or the

**lictors (figures 8; 9 and 10) on Frieze B, with "axes attached to their rods" (D.E.E. KLEINER 1992, 191), who are likewise seemingly represented within the City of Rome - are not the only iconographic problems, which are connected with the Cancellaria Reliefs - it becomes clear, why the 'history of scholarship' concerning those two friezes has grown to such enormous complexity.**

After having finished writing this Chapter, I received on 22nd April 2020 Paolo Liverani's forthcoming essay ("Historical reliefs and architecture") that has in the meantime appeared in the essay volume, edited by Aurora Raimondi Cominesi *et al.* (2021), and on 30th April 2020, Liverani has kindly granted me the permission to quote *verbatim* from this text.

Concerning Frieze A, Liverani (2021, 87) writes now (in my opinion convincingly), but to my not small surprise, when compared with our above-mentioned discussion of the subject on 14th March 2019 in Rome:

"The lictors standing before the Emperor carry the fasces with axes, and on one of them we find small traces of red among the folds of his dress, the *sagum*. [with n. 19] All these elements are signs of the *imperium*, the military power of the Emperor, and therefore the lictors must be standing outside the pomerium. On the other side, in contrast, the lictors behind the Emperor carry fasces without axes. Thus, they are still inside the pomerium. This means that the Emperor is going to cross the boundary of the city in a *profectio* for a military expedition". - Cf. now also Liverani (2023, 118, the Italian version of his essay).

In his **note 19**, Liverani writes: "Liverani 2014, 26". - Liverani (2014, 26) is quoted *verbatim* in more detail and discussed *infra*, at **n. 448**, in Chapter *III*.

### ***I.3. Were the Cancellaria Reliefs the horizontal panels in the bay of an arch, built by Domitian?***

Unfortunately, the Cancellaria Reliefs themselves do not contain any data that could tell us for which building they were made, or, in case they do contain such data or information, as is presumably the case, we are so far unable to recognize and interpret them. As we shall see below, one such datum may be provided by the sheer *lengths* of both friezes, and there seem to be also other information.

This is the reason, why different emperors could be suggested, who had allegedly first commissioned these friezes. In addition to this, Magi's<sup>251</sup> suggested date ('not after AD 120') for the moment, when the friezes became inaccessible at the deposit of the sculptor's workshop, to which they had been brought in antiquity, has been challenged. In the following, I therefore come back to Magi's point 4.), which has already been mentioned in Chapter *I.1.*:

4.) Magi suggested that : "tra la scoria del I secolo e il primo ventennio del II" (at a date 'between the end of the 1<sup>st</sup> century and AD 120'), the Cancellaria Reliefs were brought to the deposit of an ancient sculptor's workshop (where they were finally excavated; cf. *supra*, at **n. 141**, in Chapter *I.1.*).

Bergmann, who belongs to those, who doubt Magi's relevant suggestion, has therefore come to the conclusion that the friezes may have been dismantled from their original building at a much later date than suggested by Magi:

"In beiden Friesen ist also das Porträt Domitians ausgelöscht und durch ein anderes Kaiserporträt ersetzt worden [in Frieze A by a portrait of Nerva, and, in Bergmann's opinion, in Frieze B by a portrait of Vespasian]. Die Friese schmückten demnach ein Gebäude, das beim Tode Domitians nicht abgerissen,

---

<sup>251</sup> cf. F. MAGI 1945, 138-140, with n. 4 (referring back to his pp. 40, 42, 50); p. 140, quoted *verbatim infra*, **n. 255**. Cf. *supra*, **n. 141**, in Chapter *I.1.*

sondern weiterbenutzt wurde und können ohne weiteres erst zu einem viel späteren Zeitpunkt abgenommen worden sein"<sup>252</sup>.

Bergmann's idea was followed by Hölscher, who writes:

"Ovviamente dopo la morte di Domiziano furono staccati [*i.e.*, the Cancellaria Reliefs] dal monumento originario per essere rilavorati per un secondo impiego sotto il successore Nerva. Tale nuova destinazione tuttavia i rilievi non l'hanno mai raggiunta, perché rimasero in un deposito: si può così dedurre che essi appartennero a un edificio che, senza essere esclusivamente un monumento celebrativo di Domiziano, altrimenti destinato all'abbattimento dopo la sua morte, svolse funzioni più generali, per cui sotto Nerva o continuò a essere impiegato o venne completato"<sup>253</sup>.

Because of all this, Magi's point 4.) is of the greatest importance. Or in other words, if we would succeed in reliably dating the moment, when those friezes disappeared in the deposit of the sculptor's workshop, or when that deposit became inaccessible in antiquity, we could work 'backwards' from those dates, in order to better understand the different phases of the lifetime of these panels in antiquity. In my opinion, only a topographical study of the area, where those friezes were excavated, could in theory provide the relevant data we need.

As a matter of fact, this kind of research has actually been conducted by several scholars, who have thoroughly studied the topography of the entire area in question, diachronically, as it should be done. They have studied the relevant documentations of old excavations, and even conducted new ones there themselves, and have studied all the ancient structures, as well as the pertaining archaeological and architectural finds from this area, in their topographical contexts; *nota bene*: all finds from all previous excavations, as well as from the new excavations, *together*. The relevant research had already started in the 1980s and the results were published since the early 1990s. This is true for both here mentioned areas: that underneath the Museo Barracco and that underneath the neighbouring Palazzo della Cancellaria. The new excavations underneath the Palazzo della Cancellaria and the Church of San Lorenzo in Damaso, for example, were conducted 1988-1993; in this case, the first publications by Frommel appeared already in 1989 and 1991. The results of the new excavations conducted underneath the Museo Barracco, and of the old excavations, conducted there and at the Corso Vittorio Emanuele II from 1885-1904, have been summarized by Susanna Le Pera (2004)<sup>254</sup>.

Stephanie Langer and Michael Pfanner (2018), who have neglected all the above-mentioned publications, have, therefore, arrived at very different conclusions concerning the topography of this area (cf. *infra*, at Chapter V.1.a)).

What was obviously felt in the 1980s by several scholars, who are interested in the City of Rome, was the need to direct the perspectives of their research towards the just described aims. Interestingly, this scholarly approach was not entirely new, on the contrary, since it pursued the same avenues of research as Magi's

<sup>252</sup> M. BERGMANN 1981, 25 with n. 28: "Magi (Rilievi [1945] 137ff.) bezeichnet selbst seine Vermutung, der Bodenhorizont über den Platten könne durch die Niveauerhöhung des Campus Martius unter Hadrian bedingt sein, als hypothetisch ...".

<sup>253</sup> T. HÖLSCHER 2009a, 54-56.

<sup>254</sup> for the date of the new excavations (1988-1993), conducted at and underneath the Palazzo della Cancellaria and the Church of San Lorenzo in Damaso, cf. the title of the publication by C.L. FROMMEL and M. PENTIRICCI 2009a.

For those excavations, cf. C.L. FROMMEL 1989; C.L. FROMMEL 1991; C.L. FROMMEL and M. PENTIRICCI 2009b; m. PENTIRICCI 2009.

For the archaeological and architectural finds from the Palazzo della Cancellaria, see also *inter alia*: M. CIMA 2009; A. CARIGNANI and G. SPINOLA 2009; T. LORENZ 2009; M. WOLF 2015 (cf. *infra*, at Chapters V.2.; and V.3.).

Cf. S. LE PERA BURANELLI, 2004, who summarizes the results of the excavations, conducted underneath the Museo Barracco and at the Corso Vittorio Emanuele II from 1885-1904; for those excavations, cf. also: M.G. CIMINO and S. LE PERA 1995; C. BENOCCHI, P. CIANCIO ROSSETTO, G. CIMINO, S. LE PERA 1995; M.G. CIMINO 1997; M.G. CIMINO and M. NOTA SANTI 1998.

For the topography of the area in question, see also: F. FILIPPI 2010; F.X. SCHÜTZ 2010; F. FILIPPI 2015b; M.T. D'ALESSIO, 2017; C. HÄUBER 2017; and V. GASPARINI 2018.

generation had done. But all this *reappeared* at this time, and that, after these kinds of inquiries had been abandoned for a very long time. Admittedly, such interdisciplinary studies cost much money and take more time than other scholarly approaches, but those changes were much to the advantage of the subjects which interest us here. These shifts of the scholarly trends within the last 80 years or so have aptly been described by Pentiricci (2009, 61), cf. the next Chapter I.3.1.

***1.3.1. M. Pentiricci's discussion (2009) of the excavations underneath the Palazzo della Cancellaria, his reconstruction of the stratigraphy of the excavated area, and his discussion of the two sculptor's workshops found there, and of the pertaining architectural and archaeological finds***

Massimo Pentiricci (2009, 61) writes:

the distribution of the related architectural and archaeological finds, that had come to light in the excavations underneath the Palazzo della Cancellaria, to various locations which are owned by different institutions, "e la mancata edizione esaustiva degli scavi annunciata da Magi<sup>255</sup> in cui avrebbe trovato posto un'analisi più dettagliata dei marmi, hanno contribuito alla perdita delle informazioni riguardanti il contesto stratigrafico di cui si è tentata una ricostruzione nel Cap.[titolo] 6. All'epoca dei primi ritrovamenti, furono attribuiti allo stesso edificio da cui provenivano i rilievi [*i.e.*, *inter alia* the Cancellaria Reliefs discussed here] anche alcuni frammenti di soffitto a lacunari con profili curvo ritenuti pertinenti al fornice di un arco [with n. 429]. Magi datò questi pezzi, insieme ad un capitello di colonna di grandi dimensioni, in età flavio-traiana, come il capitello di lesena più anzi citato [with n. 430]"<sup>256</sup>.

Cf. Pentiricci (2009, 204-205: "Capitolo 7 L'isolato della Cancellaria tra la tarda età repubblicana e il IV secolo d.C.").

Cf. Pentiricci (2009, 204: "§ 3. La ristrutturazione urbanistica in età flavia (Periodo 3) :

"Dalla tipologia degli interventi attribuiti al Periodo 3 si deduce con chiarezza l'esistenza di un vero e proprio progetto urbanistico che solo può giustificare l'estensione e l'entità delle diverse attività edilizie riconosciute; come si è desunto dall'analisi dei materiali ceramici associati alla stratigrafia in fase, l'avvio di questo processo di rinnovamento può datarsi nella prima età flavia [with n. 26: "PENTIRICCI, Cap. 5 § 3".].

Nell'area della Cancellaria, a sud dell'*Euripus*, viene creato un nuovo quartiere il cui assetto planimetrico mostra notevoli differenze rispetto a quello che aveva caratterizzato i periodi precedenti; gli assi secondo i quali sono realizzate le nuove costruzioni, rimanendo invariati per secoli, costituiranno le linee guida del successivo sviluppo edilizio dell'isolato fin in età tardomedievale. Nel Periodo 3, l'*Euripus*, con i muri paralleli a meridione doveva comunque costituire ancora un ineludibile vincolo urbanistico; verso nord l'attività edilizia non supera infatti la struttura in opera quadrata di tufo, ancora perfettamente in uso, che servirà a contenere la spessa colmata messa in opera nel Periodo 4 su tutta l'area della Cancellaria per innalzare il piano di calpestio da m 10,89 s.l.m. [sul livello mare = *asl*], coincidente con il piano di spiccatto del muro in opera quadrata parallelo a via del Pellegrino (Periodo 1-Fase C), si passerà a m 12,54/12,44 s.l.m., quota del pavimento di uno dei nuovi edifici. Ciò determina la scomparsa del settore nord dell'edificio in laterizi del Periodo 2, mentre è possibile che a sud alcune delle strutture rimangano ancora in uso. Prima dell'accumulo dell'interro viene invece demolita completamente la costruzione identificata della fondazione 4579 la cui mole originaria, che doveva probabilmente superare lo spessore della colmata, risultava di ostacolo alla realizzazione dei nuovi edifici (fig. 2)".

Pentiricci (2009, 204-205), continues immediately after the above quoted passage:

**"L'officina marmoraria presso il sepolcro di Irzio**

L'accumulo dell'interro dovette provocare l'interruzione dell'attività della bottega di marmorari [here therefore referred to as the 'First sculptor's workshop', which was located to the south of the *Euripus*] di cui è stato ricostruita la presenza nel settore posto a sud dell'edificio in laterizio del Periodo 2. Non sarebbe

<sup>255</sup> cf. F. MAGI 1945, 138-140, with n. 4 (referring back to pp. 40, 42, 50); p. 140: "Riassumendo, sempre in via di ipotesi e in attesa che un approfondito studio topografico di questa zona di Campo Marzio e dei monumenti <<in situ>> della Cancellaria ne tracci le vicende edilizie, potremmo concludere che le lastre [*i.e.*, the Cancellaria Reliefs] scomparvero alla vista sotto Adriano: dovettero essere quindi portate al deposito del sepolcro di Irzio tra la scoria del I secolo e il primo ventennio del II [my emphasis]".

<sup>256</sup> M. PENTIRICCI 2009, 61. In his n. 429, he quotes: "Cfr. nel II volume CIMA, nn. 6-7 e CARIGNANI-SPINOLA, n. 41". In his n. 30, he quotes: "MAGI 1945, p. 51". To this "capitello di lesena", he refers also on p. 61 with n. 428 (quoted *verbatim supra*, n. 80, in Chapter 1.1.

dunque un caso che proprio in quest'area, nella colmata del Periodo 3, risulti utilizzata una cospicua quantità di frammenti di scaglie di marmo e travertino, distribuiti in strati di ampia superficie e spessore non irrilevante [with n. 27, quoting: "PENTIRICCI, cap. 6, p. 140"]. È possibile che la bottega sia stata trasferita sulla riva settentrionale dell'*Euripus* [thus creating the here-so-called 'Second sculptor's workshop'], rimasta esclusa dalla ristrutturazione edilizia; a nord del canale [*i.e.*, the *Euripus*] si deve comunque registrare un innalzamento della quota del piano di calpestio originario; lo strato [page 205] di riporto in base a quanto è stato possibile dedurre dalla documentazione degli scavi degli anni 1937-1940, non risulta di spessore uniforme: mentre in prossimità del sepolcro di Irzio la superficie del deposito doveva attestarsi intorno alla quota di m -7 ( m 10,54 s.l.m.), procedendo verso ovest doveva raggiungere m -6 (m 11,54 s.l.m.). Su questo interro, forse coevo all'attività del Periodo 3 interessano la zona posto a sud del canale, vengono ad accumularsi i numerosi materiali marmorei di spoglio venuti alla luce nel corso dell' esecuzione dei pozzi eseguiti, a partire dal 1937, lungo la facciata della Cancelleria su Corso Vittorio Emanuele [with n. 28, quoting: "PENTIRICCI, cap. 3, p. 931"]. Analogamente a quanto riscontrato per l'officina posta a sud dell'*Euripus*, anche la buona parte dei frammenti con sicurezza attribuibili al contesto artigianale localizzato a nord del corso d'acqua [*i.e.*, the *Euripus*], provengono dallo smantellamento di edifici preesistenti. Tra questi è un nucleo stilisticamente omogeneo, databile alla fine del I secolo a.C. costituito dalle due basi di colonna decorate e dai frammenti di cornice, in cui si è proposto di riconoscere elementi pertinenti all'edificio identificato dal tratto di fondazione 4579 [with n. 29, quoting: "Cfr. nota 15"]. Amettendo, anche in assenza di testimonianze certe, che la bottega si sia installato presso il sepolcro di Irzio in conseguenza dei lavori del Periodo 3, forse negli anni immediatamente successivi, si deve comunque prendere atto che i dati archeologici tendono a circoscrivere l'attività dell'officina nel periodo posteriore al principato di Domiziano, quando furono smantellati i monumenti da cui provengono i capitelli di lesena e di colonna, i frammenti di soffitto a cassettoni e il blocco iscritto di trabeazione, mentre i rilievi storici [*i.e.*, the Cancelleria Reliefs], che recano nel fregio A il ritratto di Nerva, prolungano l'attività di rimozione probabilmente nel corso del principato di Traiano, periodo al quale Degrassi datò le iscrizioni dipinti sul sepolcro di Irzio, che gli addetti all'officina eseguirono nei momenti di pausa dal lavoro [with n. 30, writing: "Per i frammenti architettonici: CIMA, nn. 4-7, CARIGNANI-SPINOLA, nn. 40-41 [cf. *supra*, n. 76, in Chapter I.1.]; sui rilievi della Cancelleria: PENTIRICCI, Cap. 2, § 8"]. Che la bottega potesse essere ancora operante nella prima età adrianea trova sostegno nel ritrovamento del rilievo con le due teste virili [the here-so-called "rilievo di prova"] la cui cronologia ne esclude un collegamento con l'officina posta a sud dell'*Euripus* [*i.e.*, the here-so-called 'First sculptor's workshop'], scomparsa sotto la colmata del Periodo 3 [with n. 31, writing: "Per il rilievo cfr. nel II volume: LORENZ [quoted verbatim *infra*, at n. 290, in Chapter I.3.2.]. Si distinguono da questi manufatti per l'ambito cronologico di pertinenza, oltre ai pezzi della prima età augustea poc'anzi citati, le *lastre* che dovevano comporre in origine la c. d. [cosiddetta] ara dei Vicomagistri, databile in età tiberiana dato che, ovviamente, non esclude che lo stoccaggio dei materiali possa aver avuto inizio già nel corso della dinastia Flavia; tanto più che le lastre, in base alle tracce sulla pietra >furono smontate in più di volte dai monumenti in cui erano poste< [with n. 32, quoting: "LIVERANI 1998, p. 168; cfr. anche: PENTIRICCI, cap. 2, p. 56, nota 403".]; si deve in ultimo citare il ritratto femminile non finito (n. 2 del catalogo CARIGNANI - SPINOLA nel II volume [for that head, cf. *infra*, n. 287, in Chapter I.3.2.], il quale qualora se ne accetti la provenienza dalla zona a nord dell'*Euripus* attesterebbe l'attività della bottega >alla metà/ seconda metà del I secolo d.C.<. È evidente come la creazione dell'officina sulla riva settentrionale dell'*Euripus*, sia un indizio incontestabile della perdita dell'originaria valenza commemorativa del sepolcro di Irzio a ridosso del quale si andarono accastonando le lastre dei rilievi storici e sulle cui pareti i lavoratori della bottega si dilettaavano a scrivere oscenità. È probabile che l'area di pertinenza del magazzino, dovesse estendersi anche verso nord-ovest se possono considerarsi dello stesso ambito, la serie di cinque capitelli scoperti nel 1923 scavando le fondamenta della nuova centrale telefonica e che M. Cima ha riconosciuto essere del tutto analoghi al capitello venuto alla luce lungo corso Vittorio Emanuele. Che la regione situata a nord dell'*Euripus* e a ovest dello stadio di Domiziano fosse, nel punto di vista produttivo, specializzata nella lavorazione dei marmi, era già stato evidenziato da Rodolfo Lanciani; lo studio di Maischberger ha consentito di percepire con maggiore precisione quale fosse l'entità di tali attività artigianale e come questi si distribuisse nella regione (fig. 3) [with n. 33, quoting: MAISCHBERGER 1997, pp. 95-110; per l'ubicazione delle botteghe: PENTIRICCI, cap. 2, § 8; in particolare p. 62, note 435-438"]. I dati della Cancelleria

consentono dunque di aggiungere nuovi tasselli al quadro delineato dallo studioso evidenziando l'importanza dell'officina *insediatasi* presso il sepolcro di Irzio nella seconda metà del I secolo d.C.: se la nostra ricostruzione coglie nel vero, l'attività artigianale aveva già avuto inizio, a sud del corso d'acqua [*i.e.*, the *Euripus*] già nella prima metà del secolo".

Massimo Pentiricci (2009, 205), at the end of this summary, adds the remark that there had unfortunately not been a chance in the context of writing and publishing this monumental work, to try a reconstruction of the structure, to which the Cancellaria Reliefs had once belonged, which, thanks to the research, published in the same volumes by Maddalena Cima (2009), would now be possible. - Precisely that has then been done for the first time by Markus Wolf (2015; cf. *id.* 2018; cf. *supra*, ns. 79-81 in Chapter I.1., and *infra*, at Chapters V.2.; VI.3.), who, based on the architectural fragments, published by Cima (2009) and Carignani and Spinola (2009), created two reconstructions: into the first, that shows an "arco onorifico isolato" ('an isolated honorary arch'), he has integrated the Cancellaria Reliefs as the horizontal panels in its central bay.

In the just quoted passage, Pentiricci (2009, 204-205) discusses *inter alia* the 'Second sculptor's workshops', excavated underneath the Palazzo della Cancellaria and the "rilievo di prova", which may be attributed to it, and to which I will come back below (cf. *infra*, at Chapter I.3.2.).

Concerning the 'Second sculptor's workshop' and the "rilievo di prova" Pentiricci (2009, 204-205) turns out to be of the same opinion as Cima was (cf. *infra*, ns. 286, 291, in Chapter I.3.2.): although Pentiricci does not date the "rilievo di prova" to the Flavian period, as Hölscher (2009a, 58, with Fig. 23, n. 49; cf. *infra*, n. 289, in Chapter I.3.2.) does, but instead Hadrianic. Pentiricci (*op.cit.*) is well aware of the fact that this relief was *not* found to the north of the *Euripus* (*i.e.*, within the deposit of the 'Second sculptor's workshop' proper), where the Cancellaria Reliefs and some of those architectural fragments were found, that are datable to the late Domitianic period. Pentiricci suggests that we better reckon with the possibility that this "rilievo di prova" nevertheless belonged to the workshop in question, concluding that we should regard this relief as the artifact, by which this workshop is datable. This "rilievo di prova", if actually belonging to the same workshop as the Cancellaria Reliefs (as seems to be the case), is so far the latest datable object that has been attributed to this deposit. I believe Pentiricci is right, because the 'First sculptor's workshop', that had existed likewise in the area of the Palazzo della Cancellaria, but to the *south* of the *Euripus*, had undisputedly disappeared, when the level of that area had been raised in the early Flavian period.

Because of the date of this sculpture, the situation is different in the case of the unfinished female head, published by Carignani and Spinola (2009, 510, cat. no. 2; cf. *infra*, n. 287, in Chapter I.3.2.), which the authors date: "alla metà/ seconda metà del I secolo d.C.". This head, which is unfortunately now lost, was likewise *not* found within the deposit of the 'Second sculptor's workshop' to the north of the *Euripus* itself, but only within the same area. Carignani and Spinola have published this head, and attribute it, because of its date, to 'one of the sculptor's workshop, found in this area'.

Pentiricci (2009, 204-205), referring to this female head, rightly concludes that - provided that it had likewise been sculpted at the 'Second sculptor's workshop', the lifetime of this enterprise should be dated accordingly: "si deve in ultimo citare il ritratto femminile non finito (n. 2 del catalogo CARIGNANI - SPINOLA nel II volume [for that head, cf. *infra*, n. 287, in Chapter I.3.2.]), il quale qualora se ne accetti la provenienza dalla zona a nord dell'*Euripus* attesterebbe l'attività della bottega >alla metà/ seconda metà del I secolo d.C.<".

To these two different sculptor's workshops, that were excavated underneath the Palazzo della Cancellaria, the first and older one to the south of the *Euripus*, the second, and younger one to the north of the *Euripus*, I will come back below (cf. *infra*, at Chapter V.1.a.1.).

Thanks to the kindness of Massimo Pentiricci, I could elsewhere publish a photo of a sculptural find that, as I see now, may likewise tentatively be attributed to the 'Second sculptor's workshop', found underneath the

Palazzo della Cancelleria. This find is datable relatively late and was not excavated within the area proper of that workshop, but underneath the Church of San Lorenzo in Damaso - namely: "a marble fragment consisting of a five-petaled rose (fig. 16f) [with n. 287], which is the closest parallel to the roses in the box at the support of the 'Esquiline Venus' (fig. 16e) [with n. 288] so far known".

Cf. Häuber (2014a, 772, fig. 16f on p. 41, with ns. 287, 288). In my notes, I have provided references. In my **note 287**, I quote: "Cf. E.M. LORETI, *s.v.* Frammento di capitello (?), photo: M. Pentiricci), in ... [*i.e.*, here C.L. FROMMEL and M. PENTIRICCI 2009a], II, pp. 94-95, no. 51, fig. 37. I thank Massimo Pentiricci who was so kind as to send me this photo and to allow me to publish it (by E-mail of March 15th, 2013)". In Häuber (2014a, 746), I have dated the 'Esquiline Venus': "to the Hadrianic/Antonine period" - at the time, when I was writing this book, I had not yet studied the results of Pentiricci's work and that of his colleagues (cf. C.L. FROMMEL and M. PENTIRICCI 2009a), which is summarized in this *Study*.

### ***1.3.2. A discussion of the question, whether the Cancelleria Reliefs and the architectural finds from the area of the Palazzo della Cancelleria could have belonged to an arch, built by Domitian (cf. here Figs. 1 and 2 of the Cancelleria Reliefs, 'in situ')***

Before the monumental publication of the excavations, conducted in the area of the Palazzo della Cancelleria, and edited by Frommel and Pentiricci (2009a), most recent scholars had taken it for granted that 1.) both friezes of the Cancelleria Reliefs showed scenes related to events in Domitian's reign, were 2.) part of a building or monument commissioned by this emperor and erected in his lifetime, and that 3.) the Cancelleria Reliefs, following Domitian's *damnatio memoriae*, were dismantled from this structure<sup>257</sup>, that the panels were brought to the deposit of a sculptor's workshop in the *Campus Martius*, where the emperor's head on Frieze A was recut into a portrait of Nerva<sup>258</sup>, and where these friezes were finally excavated underneath the Palazzo della Cancelleria. See Kleiner<sup>259</sup> for a good summary of the relevant hypotheses suggested until that date. But those assumptions were by no means all true (for a discussion cf. *infra*, in Chapter II.).

Pentiricci's<sup>260</sup> work and that of his colleagues, which Pentiricci has summarized (cf. *supra*, at Chapter I.3.1.), consisted in analyses of Magi's excavations, and of all other excavations in the area of the Palazzo della Cancelleria, in studies in the different magazines, where the relevant archaeological and architectural finds are kept, as well as in the related archives and in appropriate libraries. Many of the ancient architectural fragments (*inter alia* curved soffit blocks, capitals and column shafts), excavated in the area, are datable in the Domitianic period.

**Pentiricci<sup>261</sup> likewise dates the Cancelleria Reliefs to that period, and comes to the conclusion that all of those Domitianic architectural finds may have belonged to the same building that had been completely**

<sup>257</sup> so for example E. SIMON 1963, 9, who in addition to this suggested that the building or monument itself was destroyed because of Domitian's *damnatio memoriae*. This is discussed by S. LANGER and PFANNER 2018, 82 (both quoted *verbatim infra*, at Chapter V.1.i.1.). Cf. H. MEYER 2000, 128 with n. 108.

<sup>258</sup> so T. HÖLSCHER 2009a, 54-56 (quoted *verbatim supra*, at n. 253, in Chapter I.3.); so also D.E.E. KLEINER 1992, 192, who remarks that also this point is controversial. Already M. PFANNER 1981, 516 with n. 13, wrote that this was the *communis opinio* of this time. He himself (cf. *op.cit.*, p. 517 with n. 15) has, in my opinion, proven that the head of Nerva had instead been carved when both friezes were still *in situ* on the Domitianic monument; cf. *infra*, at Chapter II.1.a). H. MEYER 2000, 128-139, suggested instead, contrary to all other previous scholars, that the Cancelleria Reliefs had altogether three - not only two - carving phases; to this I will come back below, at Chapter II.4.). T. HÖLSCHER, D.E.E. KLEINER and H. MEYER, all *op.cit.*, quote PFANNER 1981, but do not follow his relevant suggestion.

<sup>259</sup> D.E.E. KLEINER 1992, 191-192, Figs. 158; 159.

<sup>260</sup> M. PENTIRICCI 2009, *passim*.

<sup>261</sup> M. PENTIRICCI 2009, 61 with ns. 428-431; p. 62 with ns. 440-442, p. 162 with n. 97, p. 204: "§ 3. La ristrutturazione urbanistica in età flavia (Periodo 3)", pp. 204-205 "L'officina marmoraria presso il sepolcro di Irzio" (quoted *verbatim supra*, at Chapter I.3.1.). - To this I will come back below (cf. *infra*, at Chapter VI.3.).

**destroyed. The curved soffit blocks, which certainly belonged to an arch, as had already been suggested by Magi and Nogara, and by Colini, and likewise by Cima<sup>262</sup>, and the considerable length of those friezes, leads Pentiricci, thus following Bendinelli<sup>263</sup>, to suggest that the Cancelleria Reliefs should be identified as the horizontal panels in the bay of an arch, built by Domitian.**

Pentiricci<sup>264</sup> discusses the objections of Pfanner (1983) to the hypothesis that the Cancelleria Reliefs had belonged to an arch, and is, in my opinion, right in rejecting Pfanner's arguments against such an assumption. The lengths of the Cancelleria Reliefs exceed the largest of those reliefs, which Pentiricci himself compares with them, by circa 6 cm. Since those reliefs date to later periods, it seems to me a better idea to compare two contemporary arches at Rome, not mentioned by Pentiricci himself, the Arch of

<sup>262</sup> cf. F. MAGI (1939, 205, quoted *verbatim supra*, n. 112, in Chapter I.1.), B. NOGARA 1939 (8, 105-106, 227; cf. *supra*, n. 6, in Chapter I.1.); and A.M. COLINI 1938 [1939], 270 (cf. *supra*, n. 4, in Chapter I.1.); M. PENTIRICCI 2009, 61 with n. 422.

So also M. CIMA 2009, 72: "Il quadro che emerge dalla lettura degli elementi architettonici rinvenuti negli scavi comunale permette di stabilire una continuità con quanto scoperto all'interno dell'edificio [*i.e.*, the Palazzo della Cancelleria, found in a different excavation] ... Nello stesso modo negli scavi eseguiti all'interno dell'edificio fu rinvenuta una base di colonna decorata identica a quella già segnalata negli scavi del '37 [with n. 24], nonché frammenti del soffitto curvo a cassettoni attribuibile ad un arco [with n. 25: "Cfr. CARIGNANI-SPINOLA [2009], n. 41."] e un capitello corinzio di grandi dimensioni analogo al nostro cat. no. 5 [with n. 26: "Cfr. CARIGNANI-SPINOLA [2009], n. 27"]. Risulta quindi piuttosto evidente che una stessa situazione di 'deposito' di materiali marmorei smontati da edifici preesistenti comprenda, in maniera unitaria, tutta l'area interessata dai lavori e situata a nord dell'*Euripus*". Further for this "deposito", cf. *supra*, at Chapter I.3.1.

Cf. A. CARIGNANI and G. SPINOLA 2009, 524, "cat. no. 27 Frammento di capitello corinzio (fig. 33)"; pp. 529-530, "cat. 41. Frammenti di soffitto a cassettoni (figg. 48-50)", who refer back to M. CIMA's cat. no. 6.

<sup>263</sup> BENDINELLI 1949; 38-39; cf. M. PENTIRICCI 2009, 61 with n. 426 (BENDINELLI was against the idea [for that, cf. B. NOGARA 1941; cf. *supra*, n. 112, in Chapter I.1.], to assume the Cancelleria Reliefs in the attica zone of a monument): "Bendinelli trovava logico, sulla base di esempi noti, che i rilievi avessero decorato le pareti del fornice centrale di un arco; la notevole lunghezza dei fregi, m. 6,058, non costituiva un ostacolo a tale ipotesi che veniva resa plausibile dalla profondità dei fornici di alcuni archi tuttora esistenti come quello di Costantino e Settimio Severo rispettivamente di m 6,482 e m 7,085 o quello di Orange, di m 7,60 [with n. 426]". M. PENTIRICCI 2009, 61, n. 427, quotes J. HENDERSON 2003, 249, and mentions H. KÄHLER 1950, 30-41 (to both I will come back below).

Cf. J.M.C. TOYNBEE 1957, 19: "If an arch were in question, our reliefs might have occupied the opposite walls of its passage-way, after the manner in which sculptured panels fill the passage-way walls of the Arches of Titus and Constantine [at Rome]".

Only after having finished writing this *Chapter*, have I found in R. SABLAYROLLES 1994, 131, n. 44 (quoted *verbatim supra*, n. 47, in Chapter I.1.), who quotes for this hypothesis J.M.C. TOYNBEE 1946a, 189, that Toynbee had at this earlier stage suggested that the Cancelleria Reliefs could have decorated an arch at the entrance of the *Divorum*. R. SABLAYROLLES (*op.cit.*) tentatively followed this hypothesis of J.M.C. TOYNBEE 1946a, 189.

<sup>264</sup> M. PENTIRICCI 2009, 61-62: "**È, a ben vedere, lo stesso tema di rilievi, la virtù militare del principe, a rendere poi del tutto plausibile l'ipotesi <<arco>> quale monumento di appartenenza** [with 431, quoting for the subject *verbatim* Suet. *Dom.* 13.]; **non si può fare a meno tuttavia di osservare che, pur esistono archi di misure compatibili con quelle dei rilievi della Cancelleria, i pannelli figurati tuttora esistenti entro fornici sono tutti di dimensioni minori dei nostri, compresi i pannelli traiane dell'arco di Costantino ritagliati in modo da non superare i m 6** [with n. 432; my emphasis]; cf. his n. 432. Here PENTIRICCI provides measurements and quotes M. PFANNER 1983, 61: M. PFANNER, *op.cit.*, finds reliefs like those of the Arch of *Divus Titus* on the *Velia* more appropriate for an arch than the Cancelleria Reliefs. Therefore PFANNER 1983, 51, according to PENTIRICCI, *op.cit.*: "riteneva più adatto per i rilievi della Cancelleria un tempio, un portico o un monumento dinastico. Alle considerazioni di Pfanner si può obiettare che il grande fregio traiano in parte riutilizzato nell'arco di Costantino possiede quelle caratteristiche tecniche che lo renderebbero adatto per una collocazione su un arco ma, che nel caso specifico, è notoriamente da escludere".

Cf. S. LANGER and M. PFANNER (2018, 81, quoted *verbatim infra*, at Chapter V.1.i)), repeat the earlier relevant opinion of M. PFANNER, 1983, 51, mentioned above, in modified form, without discussing that M. PENTIRICCI 2009, 61-62, has in the meantime rejected this opinion.

Domitian on the Palatine/ the Arch of *Divus Vespasianus* ?<sup>265</sup> (cf. here **Figs. 8.1: 58; 73**), of which only its two pylons are known, and the Arch of *Divus Titus* in the *Circus Maximus* (cf. here **Fig. 121**)<sup>266</sup>.

As already mentioned above, the innovative design of Domitian's arches has recently been observed by Claudio Parisi Presicce (2021a, 53; cf. *id.* 2023, 110): he discusses the Arch of *Divus Titus* on the *Velia* (here **Fig. 120**), the Arch of Titus in the *Circus Maximus* (here **Fig. 121**), and the "ARCUS AD ISIS", represented on the relief from the Tomb of the Haterii (here **Figs. 89; 90**), which he (convincingly) dates Domitianic.

Cf. *supra*, in Chapter *Preamble*, Section III.; at point 3.); and *infra*, in Chapter IV.1.1.g).

Both arches (*i.e.*, the Arch of Domitian/ Arch of *Divus Vespasianus* on the Palatine and the Arch of *Divus Titus* in the *Circus Maximus*) were much larger than Domitian's Arch of *Divus Titus* on the *Velia* (cf. here **Fig. 120**), which so far all scholars have compared, who discussed the question, whether or not the Cancellaria Reliefs might have decorated an arch at all, or more specifically, whether or not those friezes could have been the horizontal panels in one of its bays.

**Fig. 121. The Arch of Titus in the *Circus Maximus*. Reproduced are here three illustrations from M. Buonfiglio 2017, p. 171, Fig. "8. Ricostruzione del prospetto dell'Arco di Tito (Sovrintendenza Capitolina - Dipartimento di Architettura UniRomaTre - Laboratorio Rilievo e Tecniche Digitali)"; p. 177, Fig. "15. L'emiciclo del Circo Massimo con la ricostruzione dell'Arco di Tito. In nero le murature ad oggi esistenti, in grigio le parti nascoste o ipotizzate (elab.[orazione] grafica M. Buonfiglio su rilievo Zetema)"; p. 179, Fig. "17. L'arco di Tito al Circo Massimo (ricostruzione M. Buonfiglio, A. Ciancio, A. Vecchione)".**

According to the new reconstruction by Marialetizia Buonfiglio (2017) and her colleagues, the central bay of the Arch of *Divus Titus* in the *Circus Maximus* is 5 m wide and 15 m deep. The central bay was, as the ground-plan of this arch on the Severan marble plan indicates, interconnected with the two lateral bays of the arch, which were each 2,20 m wide. This arch was erected in AD 81 by the Roman Senate in honour of *Divus Titus* and all three bays were decorated with horizontal marble panels, of which some remains have survived.

Since neither Massimo Pentiricci (2009), nor Stephanie Langer and Michael Pfanner (2018), or Markus Wolf, or Klaus Stefan Freyberger (2018; for the publications of the latter four scholars mentioned here; cf. *infra*, in Chapters V.1.-V.3.)) discuss this monument, I think it is about time to consider this arch in this context, since it can help us to get an idea of the sheer sizes of the 'many arches' that the Emperor Domitian had himself built all over the City of Rome (cf. *supra*, n. 83, in Chapter I.1.), especially because its proportions fit the arch, to which the Cancellaria Reliefs might have belonged.

<sup>265</sup> A. CASSATELLA 1993) 92, Fig. 45; cf. A. CASSATELLA 1996.

For the foundations of this arch; cf. A. CLARIDGE, 1998, 120, "Fig. 50. Palatine. General site plan", no. "8 Arch: Palatine Gate (Domitian)"; A. CLARIDGE 210, 124, Fig. 50, no. 8, p. 127, p. 121; C. HÄUBER 2015, 9, "Fig. 4 [= here Fig. 73], Map showing the five different locations suggested for the temple of Iuppiter Stator", labels: VICUS APOLLINIS; "CLIVUS PALATINUS"; ARCUS DOMITIANI. Cf. below, in Chapter VI.3; in Chapter *The major results of this book on Domitian*; and *infra*, in volume 3-2, in *Appendix V*; at Section IV.; and in *Appendix VI*; at Section VII.

Because according to F. COARELLI (2012; 283) Domitian may have dedicated this arch to Vespasian, I suggest there that the Cancellaria Reliefs possibly belonged to this arch, or, because of the contents of both Friezes of the Cancellaria Reliefs, perhaps rather to the Arch of Domitian, postulated by Coarelli (2009b, 88; *id.* 2012, 481-483, 486-491) at the "Ingresso principale" of Domitian's Palace on the Palatine, the *Domus Augustana*; cf. here **Figs. 8.1: 58**, and below, at Chapter *The major results of this book on Domitian*.

<sup>266</sup> P. CANCIO ROSSETTO: "Arcus Titi (Circus Maximus)", in: *LTUR* I (1993) 108-109, Figs. 157; 160. M. PFANNER 1983, 98-99, mentions the publication by P. CANCIO ROSSETTO, and copies the inscription of this arch (cf. *infra*). For earlier publications of this Arch of Titus), cf. C. PARISI PRESICCE 2008, esp. p. 348, ns. 9, 10; and now C. PARISI PRESICCE 2021a; and *id.* 2023 (the English and Italian versions of the same essay).

Paola Ciancio Rossetto, whom I had asked whether she had published her relevant research and excavations in the meantime, has kindly alerted me in an E-mail of 1st March 2019 to the following publications, in which the relevant excavations have been published, together with reconstructions of this arch in "3D": M. BUONFIGLIO 2014; M. BUONFIGLIO 2017; M. CANCELANI, C. FAICOLINI, M.P. ALTABA, M. SACCONI 2017; M.G. GRANINO CECERE 2017 (for the inscription of this arch, that has been copied by the Anonymus Einsiedlense, and of which also some fragments have been found in the recent excavations, that allow the correction of this inscription).

As already mentioned, the curved soffit blocks, found together with the Cancellaria Reliefs, provided those had belonged, together with those reliefs, to the same "honorific arch", have been reconstructed by Marcus Wolf (2015) as belonging to an arch the passageway of which was circa 5,10 m wide (cf. *supra*, n. 79, in Chapter I.1.).

Besides, the Arch of Domitian on the Palatine/ the Arch of *Divus Vespasianus* ?, exactly like Domitian's colossal equestrian statue on the *Forum Romanum*, the *Equus Domitiani*<sup>267</sup>, can also teach us something else. Although both were obviously destroyed after Domitian's death and *damnatio memoriae*, they were by no means completely razed, on the contrary, in the case of this arch, the foundations were reused, and in the case of the *Equus Domitiani* not only its foundation, but also its base.

For the *Equus Domitiani*; cf. also *infra*, at *A Study on the colossal portrait of Hadrian (now Constantine the Great) in the courtyard of the Palazzo dei Conservatori at Rome* (cf. here **Fig. 11**). With The Contribution by Hans Rupprecht Goette on the reworking of the portrait of Hadrian (now Constantine the Great); at Part I. In my opinion, the idea to attribute the Cancellaria Reliefs to an arch is much preferable to all other so far aired suggestions concerning a building type, for which they might have been commissioned<sup>268</sup>. Because we know, as also mentioned by Pentiricci himself, that Domitian had erected many arches at Rome, all of which were destroyed after his death (Dio Cassius 68,1,1)<sup>269</sup>. As we have just seen, in the case of the Arch of Domitian/ The Arch of *Divus Vespasianus* ? on the Palatine at least, this monument did not disappear completely, as we might expect, when reading Dio's remark. In addition to this, Pentiricci<sup>270</sup> stresses convincingly, that also the contents of both friezes corroborate the assumption that they had adorned an arch (to this I will come back below).

Although, as I must also confess, when first comparing the horizontal panels in the bays of Domitian's Arch of *Divus Titus* at Rome (cf. here **Fig. 120**) and of Trajan's Arch at Beneventum (cf. *infra*, at Chapter II.3.3., and here **Fig. 46**), I believed to have realized a problem, that would contradict Pentiricci's hypothesis. Because, provided Pentiricci's idea is true, one of the Cancellaria Reliefs should have shown a procession, moving from right to left (as is actually true for both friezes - as I at first erroneously thought), whereas the other frieze should have shown the procession moving from left to right: to the effect that, when those reliefs were *in situ* in the bay of an arch, a spectator (as in Domitian's Arch of *Divus Titus*) could, so-to-say, move 'in the midst' of both processions, since both would 'walk' in the same direction as the spectator himself or herself.

<sup>267</sup> cf. C.F. GIULIANI: "Equus: Domitianus", in: *LTUR* II (1995) 228-229, Figs. 77-80. For the *Equus Domitiani* see also F. COARELLI 2009b, 81-83, Figs. 17-21, especially the reconstruction drawings Figs. 19; 20 (a comparison of the *Equus Domitiani* with the equestrian statue of Marcus Aurelius in the Palazzo dei Conservatori, both drawn to scale); and 21: "L'Equus Domitiani nel Foro Romano sullo sfondo della Basilica (disegno di Francesco Corni)". As C.F. GIULIANI 1995, 228, states, and this reconstruction drawing illustrates, this equestrian statue of Domitian showed the emperor looking south-east, in direction to the Palatine and the Temple of Vesta. - And in the direction of the *colossus* of the Emperor Nero, whose facial traits of Nero had been changed into those of the Sungod at the order of the Emperor Vespasian, and who had received under the Emperor Titus the facial traits of himself. For this and the following; cf. *infra*, at Chapter *The major results of this book on Domitian*.

T. HÖLSCHER 2009a, 57-58, discussing the possible meaning of the prominent place - and space ! - reserved for the Vestal Virgins on Frieze B of the Cancellaria Reliefs, writes about the *Equus Domitiani*: "Il culto di Vesta e il collegio delle Vestali occuparono una posizione chiave nella politica religiosa di Domiziano. Il suo famigerato procedimento contro quattro Vestali, che egli punì con condanne a morte estremamente dure a causa della violazione della regola di castità, fu meno un segno di crudeltà esagerata che un atto dimostrativo di un impegno conseguente per l'integrità di un culto, da lui trattato come centrale pegno della continuazione dell'eternità di Roma. Il Palladio troiano, conservato dalle Vestali, uno dei più sacri garanti del dominio romano, era allo stesso tempo un'immagine di Minerva, la divinità protettrice di Domiziano: così il potere dell'imperatore si collegò in modo strettissimo con il culto di Vesta. Si spiega di conseguenza perché egli sin dall'inizio del suo regno avesse coniato monete con Domiziano recante il Palladio: e anche la sua colossale statua equestre nel Foro lo reggeva in mano".

Cf. E.M. MOORMANN 2018, 168-169; cf. p. 168: "The monument [*i.e.*, the *Equus Domitiani*] was officially given by the Senate to honour Domitian's victory over the Chatti and Dacians in A.D. 89". Cf. p. 167 with n. 33 (quoted *verbatim infra*, in volume 3-2, at *Appendix IV.d.4.b*)), where MOORMANN discusses M.L. THOMAS 2004, 40-42. - To this I will come back below (cf. *infra*, in volume 3-2, at *Appendix IV.c.1.*)).

<sup>268</sup> for that, cf. M. PENTIRICCI 2009, 61 with n. 426, and *supra*, n. 264.

<sup>269</sup> cf. C. HÄUBER 2014a, 786 with n. 37 (quoting Dio Cassius 68,1,1); cf. *supra*, n. 83, in Chapter I.1.

<sup>270</sup> M. PENTIRICCI 2009, 61 with n. 431, quoted *verbatim supra*, n. 264.

But, and this objection seems to corroborate Pentiricci's idea: if we imagine that both friezes (cf. here **Figs. 1; 2; Figs. 1 and 2 of the Cancellaria Reliefs, 'in situ'**), when *in situ*, were located opposite one another and parallel, the positions of the two emperors in both panels are not exactly identical, but only almost. - And only at that second moment, did I realize that the figures on panel B belong to *two different groups* who, having moved to their current positions from opposite directions, and headed by the emperor and the togate youth, have just met and stand now opposite each other<sup>271</sup>.

If *that* symmetrical feature of both panels is indeed of importance, and I imagine that this could actually be the case, these friezes should better be read accordingly.

Or, in other words, seen under that perspective, those scholars, for example Magi, Fuhrmann, Bianchi Bandinelli, Simon, Bergmann and Hugo Meyer, seem to be right<sup>272</sup>, who have either themselves suggested, or have reported the opinion of other scholars, according to whom on frieze B not so much the *adventus* of the new Emperor Vespasian is the main subject (who is now standing stationary at the sacred boundary of Rome, the *pomerium*-line, but has before moved from right to left, together with those members of his entourage, who follow behind him: a lictor and another man<sup>273</sup>, who grasps a scroll<sup>274</sup>), whereas three lictors precede Vespasian (cf. *supra*, at n. 250, in Chapter I.2.1.c)), but rather the action of the young togate youth, who heads the representatives of the entire City of Rome, to whom also the Vestal Virgins belong.

This togate youth has been identified as Domitian *inter alia* by: Magi (1939, 1945), Fuhrmann (1940; *id.* 1941), Bianchi Bandinelli (1946-48), Simon (1960, 1963), Koepfel (1984), Pfeiffer (2009), Pollini (2017b), Chabrečková (2017) and Sheldon 2023, in press<sup>275</sup>, as well as by Claudia Valeri and Giandomenico Spinola

<sup>271</sup> contrary to myself, this has immediately been realized by S. LANGER and M. PFANNER 2018, 50: "Cancellariere relief B. Die 17 erhaltenen Figuren von Relief B bewegen sich aufeinander zu, d. h. [das heißt] die Figuren 1-7 und 11-13 nach rechts und die Figuren 8-10 und 14-17 nach links", for those numbers of the represented figures, cf. p. 19, their Abb. 2. Cf. here **Figs. 1 and 2 drawing**, where we have copied the numbering of the figures on both Friezes of the Cancellaria Reliefs after S. LANGER and M. PFANNER 2018, 19, Fig. 2.

For the Arch of Titus and the Arch of Trajan at Beneventum (here **Fig. 120**), cf. D.E.E. KLEINER 1992, 185-191, Figs. 154-157 (Rome, Arch of Titus); on p. 187, she writes about this arch: "It is the two large, horizontally oriented relief panels in the central bay that are of the greatest interest. They depict the two key scenes of the triumphal procession - the display of the spoils and Titus in his triumphal chariot. In the spoils panel, the figures march from left to right; in the triumph panel from right to left. In other words, both scenes are deliberately oriented in the direction of the Temple of Jupiter on the Capitoline hill, the goal of the triumphator"; cf. pp. 224-229, Figs. 188-193 (Benevento, Arch of Trajan).

<sup>272</sup> cf. F. MAGI 1939, 205 (quoted *verbatim supra*, n. 112, in Chapter I.1.); F. MAGI 1945, 111 (quoted *verbatim infra*, in Chapter IV.1., at n. 463); H. FUHRMANN 1940, Sp. 472 and H. FUHRMANN 1941, Sp. 544-545 (cf. *supra*, ns. 7; 113, in Chapter I.1., quoted *verbatim infra*, in Chapter IV.1.); R. BIANCHI BANDINELLI 1946-48, 259 (quoted *verbatim supra*, n. 112, in Chapter I.1.); E. SIMON 1963, 9-10 (quoted *verbatim infra*, at n. 456, in Chapter III.).

Cf. M. BERGMANN 1981, 26, 28-29 (on the togate youth; quoted *verbatim supra*, n. 191, in Chapter I.1.); cf. p. 29: "Da die Vestalinnen auffallend viel Raum einnehmen, die amazonenhafte Göttin hinter ihnen zurücktritt und der Zug der Liktores sich anscheinend auf sie zu bewegt, könnte man an einen Vorgang denken, in dem die Vestalinnen selbst eine Rolle spielen und nicht nur als Zeugen eines staatspolitisch wichtigen Zeremoniells anwesend sind. Aus dem Wenigen, was von ihren Tätigkeiten und Funktionen bekannt ist, ergibt sich kein Hinweis [with n. 50, providing a reference]. Cf. also *infra*, n. 475, in Chapter VI.3

Cf. H. MEYER 2000, 127, 136: "An Fries B erschien Domitian als Prinz [*i.e.*, the togate youth], an Fries A dagegen war er als regierender Kaiser dargestellt ... Die alte Deutung des Frieses ist gewiß zutreffend, sagt doch Sueton: >>Als [Domitian] dann zur Herrschaft gelangt war, hatte er die Stirn, vor dem Senat zu prahlen, er sei es gewesen, der seinem Vater wie seinem Bruder den Thron gegeben, sie hätten ihm diesen nur zurückgegeben<< [with n. 413, quoting: "Suet. Dom 13"]. Im Jahre 70 n. Chr. war Domitian etwa 20 Jahre alt gewesen: sein Kinn- und Backenflaum [(Fig.) 251] wird deshalb Zeichen seiner Jugendlichkeit zu verstehen sein [with n. 432, providing references]. Inhalt der Szene ist folglich die Überlassung der Herrschaft an Vespasian - ein aus Sicht der Regierungszeit Domitians lange zurückliegendes Ereignis .."; pp. 133-134 (on the Vestal Virgins on Frieze B); pp. 133-134: "Urteilt man nach der Komposition, so stehen die Priesterinnen der Vesta im Rahmen des dargestellten Vorgangs dem Kaiser nicht wesentlich an Autorität nach. Und wenn in Fries B ein *adventus* dargestellt ist, dann allenfalls ein solcher der Vestalinnen, nicht aber der des Kaisers: die Haltung des vestalischen Liktors und der Apparitorenhelfer lassen darüber keinen Zweifel [with n. 422, providing a reference]".

For a discussion of Suetonius (*Dom.* 13); cf. *supra*, in Chapter Preamble, at Section III.

<sup>273</sup> cf. E. SIMON 1963, 9: "Den Zug [behind Vespasian] beschließt eine Gestalt in doppelter geschürzter Tunika, wohl ein Kuldiener. Die Schriftrolle in seiner Linken enthält vielleicht ein Verzeichnis der gelobten Opfer, die der Feldherr bei seiner Rückkehr einzulösen hatte"; cf. p. 10, on the representation of Domitian (now Nerva): "Die Rolle in seiner beringten Linken weist wohl wie bei der Gestalt in B auf Opfer hin, die pro reditu gelobt worden waren".

<sup>274</sup> J.M.C. TOYNBEE 1957, 4.

<sup>275</sup> for F. MAGI; cf. *supra*, n. 117, in Chapter I.1.; cf. E. SIMON 1963, 9, quoted *verbatim supra*, n. 175, and at ns. 181, in Chapter I.1., and at n. 456., in Chapter III. Cf. G. KOEPEL 1969, 172 with n. 157, quoted *verbatim supra*, at n. 173; in Chapter I.1.; S. PFEIFFER 2009, 62, quoted *verbatim supra*, n. 59, in Chapter I.1.; J. POLLINI 2017b, 118 n. 96; quoted *verbatim supra*, n. 72; B. CHABREČKOVÁ 2017; 65-

(cf. *supra*, in Chapter *Introductory remarks and acknowledgements*; *infra*, in Chapters III.; at *The major results of this book on Domitian*; and at *The Contribution by Giandomenico Spinola on the Cancellaria Reliefs*), and by myself.

That Vespasian and the togate youth, who are the protagonists of the two groups, whose meeting is represented on frieze B, are shown as standing at the *pomerium*-line of Rome (for that, cf. *supra*, at n. 199, in Chapter I.1.1.), has been made clear by the artists, who designed frieze B, by some details of their composition, in combination with the choice of the figures they have represented, as well as by the particular positionings of those figures, and by their equipment. To this I will come back below (cf. *infra*, in Chapter V.1.i.3.)).

Marianne Bergmann and Hugo Meyer (cf. *supra*, n. 272) have, in addition to this, mentioned the large space, and thus importance, given the Vestal Virgins on frieze B. But also the *Genius Senatus*, the *Genius Populi Romani*, and the goddess Roma (as Simon 1960; 1963<sup>276</sup> interpreted those personifications on frieze B) belong to the representatives of Rome, *who, all together, are now likewise standing stationary, but have before moved from left to right to the pomerium-line*, to welcome Vespasian. That this entire scene, visible on frieze B, is staged at the City of Rome, the artists have shown by the presence of the *Dea Roma*, and by the large number of the just mentioned further representatives of Rome. Looking at both friezes that way, the spectator, passing under the bay of Domitian's arch, could indeed have proceeded 'together' with both processions: on his or her left, and *from left to right*, would have moved (on frieze B) the representatives of the City of Rome, led by the young Domitian, towards Vespasian, on the spectator's right, again Domitian, now as emperor, followed by his armed soldiers, would have moved (on frieze A), *from right to left*, to his (finally) victorious campaign.

We have, therefore, arranged the illustrations of both friezes (cf. here **Figs. 1 and 2 of the Cancellaria Reliefs, drawing, 'in situ'**) in a way that they are shown 'in situ' (as if in the bay of this Domitianic arch), but 'lying on their backs', so that we can better imagine, what the ancient spectator, passing under the bay of this arch, would have seen, while moving forward. Also in this illustration, both friezes are reproduced at the same scale. And because in the case of frieze B all four slabs are almost complete what their lower edges are concerned (but note that S. LANGER and M. PFANNER 2018, concerning this point, are of a different opinion - a hypothesis, which could be disproved though; cf. *infra*, in Chapter V.1.d)), and since of frieze A the far right border is preserved, and on frieze B the far left border, the positions of all three protagonists, who are visible on both friezes, are almost precisely known (see also the caption of **Figs. 1 and 2 of the Cancellaria Reliefs, drawing, 'in situ'**).

As already said above (cf. *supra*, at n. 248, in Chapter I.2.1.b)), we have based our first relevant visualization (of 2020) on photographs of the Vatican Museums (cf. here **Figs. 1; 2**). **Fig. 2** shows frieze B, which, at the Museo Gregoriano Profano, has been put on display this way, thus following the reconstruction of this panel as suggested by Magi (1945, Tav. I, cf. *supra*, at Chapter I.1.). Our second visualization (of 2022) we have based on Magi's drawings (1945) instead (cf. **Figs. 1 and 2 of the Cancellaria Reliefs, drawing, 'in situ'**)

The reconstruction drawing by Markus Wolf (2015, cf. *supra*, n. 79, in Chapter I.1., his Fig. 8: "Ricostruzione arco monumentale, 1: 350") is based on a different approach. His reconstruction drawing of an "arco onorifico isolato" (also referred to by him as "arco monumentale") comprises the Cancellaria Reliefs, integrated as the horizontal panels into the central bay of this arch. Wolf's Fig. 8 illustrates a view of his reconstruction drawing of this arch, in which Frieze B is visible *in situ*: contrary to the reconstruction of Frieze B at the Museo Gregoriano Profano, in Wolf's reconstruction there is a wide gap between slab B1 and B2 of this panel. As we shall see below, this large gap, indicated by Wolf (2015), is (erroneously) assumed by Langer and Pfanner 2018 (for a discussion, in which their hypothesis could be disproved; cf. *infra*, in Chapter V.1.d)).

69, Figs. XXXI-XXXII; cf. *supra*, n. 73; RM. SHELDON 2023, in press; Chapter 7; Section "The Cancellaria Reliefs", with ns. 60-68; cf. *supra*, n. 74, all in Chapter I.1.

<sup>276</sup> E. SIMON 1963, 9, 10. Quoted *verbatim supra*, n. 175 and at ns. 181, 456.

By looking at both friezes this way (cf. here **Figs. 1 and 2 of the Cancellaria Reliefs, 'in situ'**), it becomes clear, that the artists have placed the Emperor Domitian on frieze A, literally speaking, almost precisely opposite the togate youth on frieze B, which seems to prove that the compositions of both panels were designed for being viewed opposite each other - in the passageway of an arch.

Let's now look again at those positions of the two emperors on frieze A and B (Domitian, now Nerva, and Vespasian), as they appear on **Figs. 1 and 2 of the Cancellaria Reliefs, drawing, 'in situ'**. After what was said above, it does not come as a real surprise, that not the two emperors, who appear on those panels, are to be found at the same positions on both friezes. Domitian (now Nerva) on frieze A stands rather at almost exactly the same position as the togate youth on frieze B. Those two figures, Domitian (now Nerva) on frieze A, and the togate youth on frieze B<sup>277</sup> have thus been defined by the artist (or by Domitian himself) as the two main protagonists of both friezes.

Bergmann (1981, 24, quoted *verbatim supra*, n. 191, in Chapter I.1.), referring to previous interpretations of frieze B, writes about the togate youth that in the opinion of those scholars: "der Empfangende die heimliche Hauptfigur des Frieses [ist]" ('the receiving [the togate youth is] the secret main figure'). If our visualization of **Figs. 1 and 2 of the Cancellaria Reliefs, drawing, 'in situ'** in the passageway of one of Domitian's arches, should be correct, this youth was not only the 'secret', but in reality the very obvious main figure in frieze B.

If Pentiricci's hypothesis should be true, that both Cancellaria Reliefs had actually been the horizontal panels in the bay of one of Domitian's arches, the scenario, just developed by looking at **Figs. 1 and 2 of the Cancellaria Reliefs, drawing, 'in situ'**, could corroborate Magi's hypothesis (1939; 1945) that the togate youth on frieze B should be identified as a portrait of that man, who commissioned this arch: Domitian.

See for this hypothesis *inter alia* the following scholars, most of whom are discussed *supra*, in Chapter I.1:

Lugli (1946; cf. *supra*, n. 10), Bendinelli (1949; cf. *supra*, n. 16), Hammond (1953; cf. *supra*, n. 18), Hanfmann (1964; cf. *supra*, n. 23), Béranger (1964, cf. *supra*, n. 24), Andreae (1973, cf. *supra*, n. 31), Bandinelli and Torelli (1976, ARTE ROMANA, scheda 105; cf. *supra*, n. 32), Bonanno (1976; cf. *supra*, n. 32), Lochin (1990, cf. *supra*, n. 46), Kuhoff (1993, cf. *supra*, n. 47), Ramage and Ramage (1996; cf. *supra*, n. 49), Pfeiffer (2009; cf. *supra*, n. 59), Pollini (2017b; cf. *supra*, n. 72), Chabrečková (2017; cf. *supra*, n. 73), Sheldon (2023, in press; cf. *supra*, n. 74), Bianchi Bandinelli (1946-48; cf. *supra*, n. 112), Fuhrmann (1940; 1941)<sup>278</sup>, Toynbee (1946; 1957; cf. *supra*, n. 118), Keller (1967; cf. *supra*, n. 121), Koepfel (1969; cf. *supra*, n. 173, but not any more in 1984, cf. *infra*, at n. 416, in Chapter III.), Simon (1960; 1963 - but not any more in 1985)<sup>279</sup>, Daltrop<sup>280</sup>, McCann (1972; cf. ns. 73; 398, in Chapter III.), Kleiner (1992)<sup>281</sup>, and Hugo Meyer (2000; cf. *infra*, n. 397 in Chapter III. - but Meyer, although recognizing in the extant portrait of the togate youth Domitian, erroneously thought that this portrait had been recut from an alleged original portrait of the King Tiridates; cf. *supra*, n. 130), Claudia Valeri and Giandomenico Spinola (cf. *supra*, in Chapter *Introductory remarks and acknowledgements*; *infra*, in Chapters III.; and *The major results of this book on Domitian*; and below at *The Contribution of Giandomenico Spinola*), and myself.

<sup>277</sup> and not Domitian (now Nerva) on Frieze A, and Vespasian on Frieze B.

<sup>278</sup> cf. F. MAGI 1939, 205 (quoted *verbatim supra*, n. 112); F. MAGI 1945, 70-72, Tav. XXIII, p. 111 (quoted *verbatim infra*, at n. 463); H. FUHRMANN 1940, Sp. 472; H. FUHRMANN 1941, Sp. 544-545 (cf. *supra*, n. 113; quoted *verbatim infra*, in Chapter IV.1.).

<sup>279</sup> E. SIMON 1963, 9 (quoted *verbatim infra*).

<sup>280</sup> G. DALTROP 1966, 41 Taf. 31.

<sup>281</sup> D.E.E. KLEINER 1992, 191, 192, Fig. 159; cf. here n. 129, in Chapter I.1., and n. 394, in Chapter III.

Cf. S. LANGER and PFANNER 2018, 62 with n. 59, who write: "Vor den Arbeiten von McCann und Bergmann zu Beginn der 1970er Jahre bestand eine weitgehende Einigkeit darüber, dass hier [on Frieze B] Domitian (Figur 12) auf Vespasian (Figur 14) trifft und dem Vater im Beisein der wichtigsten Personifikationen seinen Herrschaftsanspruch abringt ... Diese Deutung wurde in leichten Variationen u.a. von Magi, J.M.C. Toynbee, J. Béranger, H. Fuhrmann, E. Simon, E. Keller und B. Andreae vorgetragen und schien so schlüssig, dass sie noch bis in die 1990er Jahre - unter Ausblendung der Umarbeitung - vertreten wird [with n. 59, with ample bibliography, quoting further scholars, who are of this opinion, but who are not discussed here]". Cf. *infra*, at Chapter V.1.h).

**What does all this tell us about the political messages of the Cancellaria Reliefs? Independently of Pentiricci's conclusions, which I will quote in a minute, and before I found out that it had been suggested that the Cancellaria Reliefs may have been the horizontal panels in one of Domitian's arches, I have come to the following conclusion: both Cancellaria Reliefs, if correctly interpreted here, celebrate in a certain sense the *invincibility*<sup>282</sup> of the Roman emperor (in frieze B, of Vespasian, in frieze A, of Domitian), and of all the virtues (or better: of all the different *aspects* of his *virtus*), attributed to and expected of a Roman emperor, *that was by far the most important one, since that alone could guarantee the survival and endurance of the Roman Empire and of the Roman People.***

For a discussion of this point; cf. *supra*, in Chapter *Preamble*, at Section II.

As already quoted in more detail above, Stefan Pfeiffer (2018, 189; cf. *supra*, in Chapter 1.2.1.a)), who has analysed the themes of Domitian's self-presentation, has come to a conclusion that supports the just formulated observation:

"1. It was a key issue for Domitian to show his *virtus militaris* and his victoriousness [with n. 85, providing a reference]".

In an earlier publication, Stefan Pfeiffer (2009, 62, quoted in more detail *infra*, in Chapter II.3.1.), had already explained, what precisely Domitian's "Sieghaftigkeit" mentioned for the Roman People: "... die Sieghaftigkeit Domitians und des durch ihn garantierten Reichthums Roms ...". - See also below, at Chapter *The major results of this book on Domitian*.

Apropos, the martial prowess that is allegedly represented in the case of Domitian (now Nerva) on frieze A, and of Vespasian on frieze B. At first glance the latter seems to be a wrong assumption, considering that *Victoria* does not crown Vespasian with a laurel wreath, but instead with an oak wreath, and because the emperor is not accompanied by members of his army. - As Rita Paris (1994b, 80-81) has demonstrated, this is nevertheless true, because the *corona civica* was in fact the highest decoration for a military victory, only granted Augustus and Vespasian because both had been able to end civil wars (cf. *infra*, at Chapters V.1.i.3.); V.1.i.3.a); and *The major results of this book on Domitian*). - Paris' observation proves at the same time that the emperor, represented on Frieze B, was from the very beginning Vespasian.

This was written, as long as I took for granted that the two emperors on both friezes are the main protagonists. As we have just seen in my comments, made to the assumption, that the Cancellaria Reliefs may have been the horizontal panels in the bay of a Domitianic arch, I rather believe now that Domitian (recut into a portrait of Nerva) on frieze A and Domitian as togate youth on frieze B, are the main protagonists of both friezes. The above-mentioned conclusion did likewise not yet consider Spinola's relevant findings, that will be discussed below (cf. *infra*, in Chapter III.; see also below, at *The Contribution by Giandomenico Spinola on the Cancellaria Reliefs*).

Before adding Spinola's thoughts to the whole picture, I therefore agree for the time being with Pentiricci's<sup>283</sup> relevant observations and conclusions:

"È, a ben vedere, lo stesso tema dei rilievi [*i.e.*, the Cancellaria Reliefs], la virtù militare del principe, a rendere poi del tutto plausibile l'ipotesi <<arco>> quale monumento di appartenenza".

But, as already said above (cf. *supra*, at n. 282), there are some more facts to consider:

<sup>282</sup> for 'invincibility' as the most important aspect of his *virtus*, expected from a Roman Emperor, cf. *infra*, in Chapter *The major results of this book on Domitian*. See also C. HÄUBER 2014a, 683-689 (for Septimius Severus and his son Geta), pp. 712-719 (for Commodus), pp. 733-735 with n. 377 (for the Egyptian Pharaohs, quoting A. AMENTA 2008, 72. This quote is here repeated *verbatim infra*, in volume 3-2, at n. 559, in *Appendix. II.c) My own interpretation of the relief Fig. 21, - a representation of the annual flood of the Nile and the Egyptian festival of New Year?*. Cf. C. HÄUBER 2017, 22, 247-248, Fig. 5.7, *adventus* relief of the Arch of Hadrian at Rome (= here Fig. 91), pp. 520-521, 580.

<sup>283</sup> M. PENTIRICCI 2009, 61-62, with 431. For a more detailed quotation of this passage, cf. *supra*, n. 264.

Vespasian on frieze B is clad as a civilian, he is crowned by *Victoria*, but not with a laurel wreath - which would be most typical for a victor - but with an oak wreath, and worst of all: he is not accompanied by his army - as we could duly expect in a representation of a military *adventus* of a Roman emperor into Rome (cf. here **Fig. 91**). As we shall see below (cf. *infra*, in Chapter *V.1.i.3.*)), frieze B thus faithfully documents Vespasian's real situation at the represented moment in October of AD 70. What we witness is Vespasian's first *adventus* into Rome as the new emperor; it is true that Vespasian, as emperor, had then come to Rome for the first time after his victories in the Great Jewish War, that had catapulted him to the throne (cf. *supra*, **n. 171**, in Chapter *I.1.*); it is also true that Vespasian was wearing the *toga*, when arriving at Rome; and we know also that Vespasian had left behind his army at that stage, because his son Titus was still fighting this war (cf. *infra*, **n. 404**, in Chapter *III.*). - But we shall likewise see below that it may well be that in reality Vespasian *was* accompanied by some of his soldiers (cf. *infra*, in Chapter *V.1.i.3.*)).

Only after this Chapter was written so far and our visualization was finished (cf. here **Figs. 1 and 2 of the Cancellaria Reliefs, drawing, 'in situ'**), did I have the chance to read the account of John Henderson (2003), which has been discussed by Pentiricci (2009, 61, n. 427, cf. *supra*, **n. 263**):

"Che il contenuto dei fregi fosse valorizzato da una collocazione che ne favorisce la specularità era stato già sostenuto da Kähler ... [with n. 427]". In his n. 427, Pentiricci writes: "Kähler 1950, pp. 30-41 (recensione al volume di Filippo Magi sui rilievi. Anche secondo Henderson i rilievi dovevano essere posti in maniera che se ne favorisce una lettura >in reciprocity<: HENDERSON 2003, p. 249".

As also mentioned above (cf. *supra*, **n. 263**), Toynbee (1957, 19) had discussed this idea as well: "If an arch were in question, our reliefs might have occupied the opposite walls of its passage-way, after the manner in which sculptured panels fill the passage-way walls of the Arches of Titus and Constantine [at Rome]".

Henderson (2003, 245) writes about the Cancellaria Reliefs: "[they] flank ... the opposite sides of the passage through another triumphal arch [with n. 51, with further discussion] ... At any rate, they reward a reading in 'confrontation'".

Henderson has likewise provided a visualization of this idea, which he has based on the same drawings by Magi (1945) that appear on our **Figs. 1 and 2 drawing**. Henderson's Fig. 48 stands above his Fig. 49. Fig. 48 illustrates the drawing by Magi of frieze A: "Magi Tav. Agg. D (sopra)", his Fig. 49 illustrates Magis drawing of frieze B: "Magi Tav. Agg. D (sotto) but reversed right/left".

Henderson (2003, 249) comments on this visualization of frieze A and B, as illustrated by his Figs. 48 and 49, as follows: "If we think one of the reliefs through another left/right reversal, *pace* the usual side-by-side presentation in books [as here our **Figs. 1; 2; Figs. 1 and 2 drawing**], and imagine them as directly *facing* each other, then the Reliefs will indeed find an apt setting for design in reciprocity".

Henderson describes in the following that his visualization has resulted in stressing relationships between the figures on both friezes that were previously unknown. Whereas Pentiricci (2009, 61, n. 427) is impressed by Henderson's relevant findings, I do not repeat them here, because they are based on an error: ancient beholders could not see any one of both friezes "reversed right/left", once both were attached to the opposite and parallel walls of a bay in an arch. I rather maintain my own idea, that beholders saw what we have visualized in our **Figs. 1 and 2 of the Cancellaria reliefs, drawing, 'in situ'**.

**To conclude.** I am not an architectural historian myself, but am happy to acknowledge with the greatest respect that the monumental publication, edited by Frommel and Pentiricci (2009a), allows us now to concentrate on attempts to reconstruct the building that the Cancellaria Reliefs once adorned. I thus assume as a working hypothesis, as Pentiricci does, that those architectural fragments, discussed by him and the co-

authors of this publication, which date to the Domitianic period (at least some of them), and the Cancellaria Reliefs may have belonged to the same building, and possibly even to one of Domitian's so far lost arches. As mentioned before, the first two reconstructions of this kind have already been published by Wolf (2015)<sup>284</sup>.

The second great accomplishment of the publication, edited by Frommel and Pentiricci (2009a), is provided by Pentiricci's own very detailed analysis of the topography of the entire 'western Campus Martius', which, in Pentiricci's<sup>285</sup> own opinion, has completely corroborated Magi's hypothesis concerning the moment, when the deposit of the 'Second sculptor's workshop' had been made inaccessible: at a date 'between the end of the 1<sup>st</sup> century and AD 120', that is to say, under the early reign of Hadrian.

Cima<sup>286</sup>, studying the data, related to the stratigraphy of the area in question, and the architectural fragments that were excavated in the area of the Palazzo della Cancellaria, material that is kept in the Antiquarium Comunale on the Caelian at Rome, has come to the same conclusion as Pentiricci, assuming that this deposit became inaccessible "nei primi decenni del II secolo d.C.". Carignani and Spinola (2009), who have studied those architectural and archaeological finds, which, after the excavations, had remained at the Palazzo della Cancellaria, arrive at a different date for the timespan, within which the deposit of this sculptor's workshop was accessible: "della fine del I - prima metà del II secolo d.C."<sup>287</sup> (to this I will come back below (cf. *infra*, at Chapter II.3.3.). The relevant findings are summarized at n. 363, in Chapter II.3.3.a).

The research, conducted by Pentiricci, Cima, and Carignani and Spinola, serves, in addition to this, as a basis for the attempt, to arrive at a reliable dating of the Cancellaria Reliefs. These scholars have come to their

<sup>284</sup> cf. *supra*, ns. 79-81 in Chapter I.1.

<sup>285</sup> cf. M. PENTIRICCI 2009, 162 with n. 97, p. 205 with n. 31 (quoted *verbatim supra*, at I.3.1.); for F. MAGI's relevant own opinion, which in PENTIRICCI's opinion has been proven by the new research, which he himself here refers to, cf. *supra*, at n. 141, quoted *verbatim supra*, n. 255 (cf. n. 256), in Chapter I.3.1.

<sup>286</sup> M. CIMA 2009, 72: "A giudicare dai materiali [found at the deposit of a sculptor's workshop underneath the Palazzo della Cancellaria, to the north of the *Euripus*], l'orizzonte cronologico del deposito corrisponde a quello delineato nello studio dei rilievi storici [*i.e.*, the Cancellaria Reliefs and the reliefs of the so-called Ara dei Vicomagistri] e della situazione topografica generale: non esistono infatti elementi databili oltre la fine del I secolo - primissimi anni del II secolo d.C."; and further down on the same page: "La notevole concentrazione di materiale architettonico - solo architettonico - nella stessa zona (i due siti [*i.e.*, the excavations at the Palazzo della Cancellaria and at the "centrale telefonica"] relativi ai principali gruppi di rinvenimenti distano poco più di cento metri) appare particolarmente interessante considerato che, per i materiali della Cancellaria, si evidenziano due precisi nuclei cronologici: quello augusteo con le piccole cornici a mensola, le basi decorate di colonna (e l'altare dei Vicomagistri) e quello domiziano con i capitelli, i soffitti arcuati (e i grandi rilievi storici [*i.e.*, the Cancellaria Reliefs]). Forse non è un caso che la datazione dei materiali corrispondano alle maggiori fasi di trasformazione urbanistica della zona legate alle figure di Agrippa e di Domiziano. Tale distribuzione cronologica concorda con le stratigrafie ricostruite da Magi [with n. 34: "MAGI 1945, pp. 37, 138, figg. 38 e 40".], confermate dalla pubblicazione dei disegni di Prandi [with n. 35] e dagli scavi successivi [with n. 36: "Su questa problematica cfr. nel I volume: PENTIRICCI; Cap. 6, pp. 163-164".], che mettono in evidenza l'esistenza di uno strato formato da scaglie di marmo, travertino e mattoni dello spessore di cm 40 ad una quota compresa tra m -4,50 e -4.80 databile all'età adrianea (strato definito A da Magi) che avrebbe livellato tutta l'area sigillando i materiali sottostanti. Non ci sono notizie di una simile situazione stratigrafica per quanto riguarda lo scavo realizzato a partire di 1919 per la centrale telefonica: infatti tra i materiali rintracciati compaiono alcuni elementi architettonici da un monumento circolare databile all'età antonina"; cf. pp. 74-75: "Leggermente diversa dal quadro delineato per questi ritrovamenti appare la situazione del 'deposito' di marmi architettonici rinvenuto presso il Palazzo della Cancellaria: qui infatti accanto alla presenza di rocchi di colonna e di blocchi di marmi colorati [with n. 46] che caratterizzano i ritrovamenti in tutta l'area del Campo Marzio, compare un gran numero di riperti di 'spoglio'. La situazione stessa di accumulo dei materiali che appaiono chiaramente tolti d'opera da qualche monumento preesistente e le tracce di rilavorazione presenti su molti elementi, nonché il recente ritrovamento di un rilievo non finito [with n. 47: "Cfr. in questo volume: LORENZ".] permettono di riconoscere nel contesto individuato nel sito del Palazzo della Cancellaria la sede di un'officina specializzata nel riuso e nella rilavorazione di materiali architettonici. La presenza delle iscrizioni dipinte sulla parete del sepolcro di Irzio, interpretate de Degrassi [with n. 48], già subito dopo le scoperte, come opera delle maestranze impegnate nella vicina officina marmoraria, offre un'ulteriore testimonianza della destinazione artigianale del sito. Come già concluse Filippo Magi [with n. 49: "MAGI 1945, p. 54".], un probabile cambiamento del disegno urbanistico della zona databile nei primi decenni del II secolo d.C. dovette portare ad un innalzamento del livello del suolo ed al conseguente abbandono dell'officina con il suo prezioso deposito di marmi".

<sup>287</sup> A. CARIGNANI and G. SPINOLA 2009, 542-543 (quoted *verbatim supra*, n. 76, in Chapter I.1.); cf. p. 510, cat. "2. Testa femminile non finita (figg. 3-4) Marmo bianco a grano fine. Alt.[ezza] cm. 21; largh.[ezza] cm. 18; prof.[ondità] cm. 21. La testa, in buono stato di conservazione, presenta scheggiate la punta e la parte destra del naso; manca dell'alliscitura finale della superficie marmorea e presenta le orecchie e la capigliatura appena sbazzate. Constatata la non reperibilità dal 19 ottobre 1995 ... per il resto si può riconoscere un lavoro - non finito ed attribuibile ad una delle botteghe di marmorari attestata nella zona - della metà/seconda metà dal I secolo d. C.".

conclusions, by either reconstructing the stratigraphy of the area<sup>288</sup>, and/ or by trying to date the excavated ancient structures and the related architectural and archaeological finds. Interestingly, some scholars consider also a small marble relief in this context, although this object was *not* found within the deposit of the 'Second sculptor's workshop', which was located 'to the north of the Euripus', where also the Cancelleria Reliefs occurred. The reason for that is *inter alia* the relief's subject matter, which allows the assumption that it was certainly made in a workshop of this kind: it shows two unfinished 'ideal' male heads in profile to the left, that even preserve two measuring points. It has therefore aptly been called "rilievo di prova" by Hölscher<sup>289</sup>. Since Frommel had already published this relief in a previous article, also Hölscher (2009) could discuss it in his account. In the following text, Hölscher has (erroneously) assumed that this relief had been excavated at the same site as the Cancelleria Reliefs:

"I Rilievi della Cancelleria dopo la rilavorazione non furono riutilizzati, ma restarono evidentemente nella bottega, da cui peraltro è riemerso un documento singolare, che ovviamente illustra l'addestramento degli scultori nel settore dei grandi rilievi statali: ci si riferisce a un pezzo di rilievo dal contorno irregolare con due teste di profilo in diversi stadi di lavorazione, entrambe con punti di misurazione ancora presenti e ricavate da un sfondo ancora grossolanamente sbizzato [with n. 49] (fig. 23); le forme stilistiche sono flavie. In botteghe come questa furono allestiti i grandi monumenti di tale periodo". The caption of his Fig. 23 reads: "Rilievo di prova con due teste maschili, dalla bottega romana sotto il Palazzo della Cancelleria. Città del Vaticano, Musei Vaticani".

Soon afterwards, Thuri Lorenz<sup>290</sup> published this "rilievo di prova" in the volumes, edited by Frommel and Pentiricci (2009). He wrote:

"Quando il presente contributo era in corso di stampa, e stato edito, nel catalogo della mostra Divus Vespasianus. Il bimillenario dei Flavi, a cura di FILIPPO COARELLI, Milano 2009, l'articolo di TONIO HÖLSCHER, >Rilievi provenienti da monumenti statali del tempo dei Flavi<, pp. 46-61, nel quale si fa riferimento al rilievo con profili virili. È naturale porre in relazione questo pezzo con i grandi rilievi scoperti da F. Magi in un diverso settore del Palazzo della Cancelleria; tuttavia dal raffronto di alcuni dettagli emergono delle differenze che inducono a riferire le sculture ad ambiti cronologici diversi". The caption of his Fig. 1 reads: "Roma, Palazzo della Cancelleria: rilievo con teste virili (foto: M. PENTIRICCI)".

Also Cima<sup>291</sup>, who, as we have seen above (cf. *supra*, at n. 286), assumes that this deposit of the 'Second sculptor's workshop' became inaccessible: "nei primi decenni del II secolo d.C.", has mentioned this "rilievo di prova", as a clear indication to the fact that underneath the Palazzo della Cancelleria there was: "la sede di un'officina specializzata nel riuso e nella rilavorazione di materiali architettonici". As we have already seen above, Pentiricci<sup>292</sup> has likewise discussed in great detail this 'Second sculptor's workshop' underneath the Palazzo della Cancelleria, which was located to the north of the *Euripus*, as well as this "rilievo di prova", that was found not precisely at this workshop, but in the area of the Palazzo della Cancelleria (cf. *supra*, in Chapter I.3.1.).

Filippi<sup>293</sup> has studied the Euripus, further parts of which have recently been excavated underneath the Palazzo della Cancelleria and underneath the near by Museo Barracco. Filippi documents in her text, and

<sup>288</sup> so M. PENTIRICCI 2009, 61, quoted *verbatim supra*, at n. 256, at I.3.1.

<sup>291</sup> M. CIMA 2009, 75 with n. 47 (quoted *verbatim, supra*, n. 286).

<sup>292</sup> M. PENTIRICCI 2009, 204-205.

<sup>293</sup> F. FILIPPI 2010, 59-63; cf. p. 61, Fig. "33 -Ricostruzione del corso dell'Euripus sulla base dei tratti archeologicamente documentati". Integrated into this maps are sections of the *Euripus*, that have been drawn at the "Palazzo della Cancelleria" and at the "Museo Barracco"; those sections are different from each other and also from all the other sections of the *Euripus* that have been documented and which are likewise inserted into this map at the relevant sites; cf. p. 61, Fig. "34 - Complesso dell'Euripus, ricostruzione tridimensionale del sistema: muro in opera quadrata, muro in opera reticolata, canale (elaborazione di P. Belardinelli)".

with plans and sections of the excavated parts of the *Euripus*, that in this area of the *Campus Martius* the level of the terrain had been raised in the second century AD. Consequently, it had become necessary to build a new phase of the *Euripus*, at a higher level. The most recent study of the *Euripus* is that by Valentino Gasparini<sup>294</sup>; whereas previously it was taken for granted that Agrippa had built the *Euripus*, Gasparini suggests instead that it had already been commissioned by Pompeius Magnus. In my opinion, Gasparini is able to prove this, *inter alia* by observations at the tomb of Aulus Hirtius, who died in 43 BC. This tomb was deliberately erected very closely to the *Euripus*, respecting its orientation, which means that the canal obviously existed already, and that Hirtius' tomb provides a *terminus ante quem* for the *Euripus*.

For further discussions of Gasparini's (2018) hypotheses concerning the *Euripus*; cf. *infra*, at Chapter *The visualization of the results of this book on Domitian on our maps*.

The detailed picture of the topography of the area that has thus been created by those studies, published in the two volumes edited by Frommel and Pentiricci (2009a), by Filippi (2010), Schütz (2010), Filippi (2015a), and Gasparini (2018), is rounded out by the likewise diachronic research, based on still more early excavations, complemented by more recent ones. The focus of that research had likewise been the Palazzo Le Roy (now accomodating the Museo Barracco), that stood immediately to the east of the Basilica di San Lorenzo in Damaso and of the Palazzo of Cardinal Raffaele Riario (now called Palazzo della Cancellaria). These ancient structures have also been documented with maps and plans<sup>295</sup>. That research was published by Cimino and Le Pera (1995), by Cimino (1997), Cimino and Nota Santi (1998), and has been summarized by Le Pera Buranelli (2004)<sup>296</sup>.

**This information, which proves the intentional levelling of the terrain in this entire area of the *Campus Martius* in the second century, taken together with the above-mentioned new findings, published by Pentiricci, Cima, and Carignani and Spinola, that concern the archaeological and architectural finds excavated there, enable us now, to reconstruct also the history of the Cancellaria Reliefs with much more confidence.**

As mentioned above, most scholars had previously taken for granted that those friezes had been taken off their original Domitianic monument, suggesting various dates for this event, and assuming at the same time, that the building itself had survived this procedure. Contrary to all earlier scholars, and because of the presence of those Domitianic architectural fragments in the same area, Pentiricci<sup>297</sup> was first to suggest, that instead this *entire Domitianic monument or building*, together with the pertaining Cancellaria Reliefs, had been destroyed in the process.

Also S. LANGER and PFANNER 2018, 82 (quoted *verbatim infra*, in Chapters *V.1.a*); and *V.1.i.1.*), who do not discuss M. PENTIRICCI 2009's, relevant hypothesis, suggest now that the Cancellaria Reliefs and the monument or building, to which they belonged, were destroyed simultaneously. - To this I will come back below (cf. *infra*, at Chapters *VI.3.*; and at *The major results of this book on Domitian*).

According to Wolf (2015)<sup>298</sup>, those Domitianic architectural fragments had either belonged to a free standing arch (that comprised the Cancellaria Reliefs), or also to an 'arched entrance to a Domitianic building' (to which the Cancellaria Reliefs did *not* belong).

---

Cf. F. FILIPPI 2015a, 438: "La piena funzionalità dell'*Euripus*, che vide interventi di adeguamento già nella seconda metà del I sec. [with n. 176: "FILIPPI 2010, pp. 59-63"]., entrò in una crisi grave nel II sec., quando divenne un canale interrato a causa del considerevole innalzamento del livello urbano".

<sup>294</sup> V. GASPARINI 2018, *passim*, esp. 90 with Fig. 11. Valentino Gasparini had been so kind as to provide me with earlier versions of his manuscript, which is why I had already been able to mention his relevant ideas in a previous publication; cf. C. HÄUBER 2017, 180, 204-217.

La ristrutturazione urbanistica in età flavia (Periodo 3)"; cf. pp. 204-205 "L'officina marmoraria presso il sepolcro di Irzio" (quoted *verbatim supra*, in Chapter *I.3.1.*); see also *supra*, at n. 261.

<sup>298</sup> cf. *supra*, ns. 79-81, in Chapter *I.1.*

To be prepared for the following Chapters II.-VI.3., let's for the time being assume that Frieze A of the Cancellaria Reliefs actually shows a *profectio* of Domitian - depending, which one of his departures to a military campaign was represented, an event that took place in 83 or else in 92 AD - or, as I myself believe, in the Spring of AD 89 (cf. *infra*, at Chapters II.; III.; and at *The major results of this book on Domitian*) - and that the deposit of the 'Second sculptors' workshop', underneath the Palazzo della Cancellaria and to the north of the *Euripus*, where those panels were finally excavated, became inaccessible at 'the beginning of Hadrian's reign' (circa AD 120 at the latest), exactly as suggested by Magi<sup>299</sup>. If both assumptions are true, the time span, within which the friezes were carved on the original monument (for this assumption, cf. *infra*, at Chapter II.1.a), later taken off this building, and brought to this deposit underneath the Palazzo della Cancellaria, is only circa 30 years long.

Or, if we follow Pentiricci's hypothesis, within this time span of circa 30 years, the Domitianic monument or building, comprising the Cancellaria Reliefs, had at first been erected and then completely destroyed, to the effect that the Cancellaria Reliefs, together with some architectural fragments that, in Pentiricci's opinion, had belonged to the same structure, were all discarded in the deposit of this 'Second sculptor's workshop'. If, on the other hand, we follow Carignani and Spinola's definition of the timespan, within which the deposit of this 'Second sculptor's workshop' was accessible, this time span extended instead: "della fine del I - prima metà del II secolo d.C." (cf. *supra*, n. 76, in Chapter I.1., and *supra*, n. 287), the relevant time span is thus circa 60 years long.

All this will be discussed in detail below, in Chapter II. (for a summary of this discussion, cf. *infra*, at n. 363 in Chapter II.3.3.a).

Only after having finished writing that part of this *Study*, which is dedicated to the Cancellaria Reliefs, have I been kindly alerted by Eric M. Moormann to Pier Luigi Tucci's hypothesis concerning the original function of the Cancellaria Reliefs. In his review of Tucci's new book on the *Templum Pacis* (2017), Moormann (2019, 269) writes:

"Chapter 5 [of P.L. TUCCI 2017 I] is on the works of art exposed in the TP [*Templum Pacis*]. Apart from the *opera nobilia* known from ancient texts and partly attested by inscriptions found *in situ*, Tucci includes the famous Cancellaria Reliefs which he interprets as the side ornaments of the Altar of Peace and sees as the aggrandizement of Domitian's deeds in the creation of the Flavian dynasty. Their removal to the Campus Martius would be the result of the bad recarving of Domitian's head as a Nerva and the bad appearance it would have made in the new regime".

Personally I do not follow Tucci's idea here but maintain the suggestion made in this *Chapter* that our visualization of **Figs. 1 and 2 of the Cancellaria Reliefs, drawing, 'in situ'** rather supports Massimo Pentiricci's hypothesis (2009, 61-62, quoted *verbatim supra*, in ns. 263, 264) that the Cancellaria Reliefs were attached to the opposite walls in the passageway of an arch.

Tucci's hypothesis is also mentioned by E.M. Moormann (2020a, 278); and by Riccardo Santangeli Valenzani (2018) in his review of Tucci's book (2017): discussing chapter 5 of the first volume.

Santangeli Valenzani (2018) writes in his review of Tucci (2017, chapter 5):

"In this chapter it is important to highlight the original hypothesis in which the famous Cancellaria reliefs, now in the Vatican Museums, would have been initially located in the *Templum Pacis* where they are imagined as decorating an enclosed altar in the same manner as the Augustan *Ara Pacis*. Following Domitian's *damnatio memoriae*, these would have been dismantled and stored in a warehouse in the area of the Campus Martius, abandoned there until their discovery in the 1930s. (In the reliefs, the portrait of

---

<sup>299</sup> F. MAGI 1945, 138-140, with n. 4 (referring back to pp. 40, 42, 50), quoted *verbatim supra*, at n. 141, in Chapter I.1., and *supra*, n. 255.

Domitian is actually reworked as Nerva, but Tucci bypasses this problem stating that "the operation proved unsuccessful the new head was too small".)

## ***II. Technical observations concerning the Cancellaria Reliefs and various hypotheses concerning their reworking***

### ***II.1. My own discussion of these subjects***

In order to understand the possible meanings of these friezes, which is, of course, my main interest, we need first of all to understand the various phases of their lifetime in antiquity. I therefore suggest that we try to approach this subject by answering some interrelated questions.

I had already roughly formulated these questions and the resulting answers, before reading Pfanner's article of 1981, in which he has already addressed and answered some of these questions. Concerning his conclusions, I often agree with him, but not always, as the following will show (cf. below, at Chapter II.4.). Pfanner has also dedicated a forthcoming publication to the Cancellaria Reliefs<sup>300</sup>; this has appeared in the meantime (cf. S. LANGER and M. PFANNER 2018 and will be discussed *infra*, in Chapter V.1.).

My own questions are:

- a) where exactly was the carving of the first phase of the Cancellaria Reliefs conducted and do we have criteria that allow us to date these friezes?;
- b) which emperor commissioned those friezes, and had that first phase of the reliefs been finished? What evidence do we have that other emperors were also involved in the making of these friezes?;
- c) where should we assume those friezes to have been, when the head of the emperor on Frieze A was recut into a portrait of Nerva?
- d) what can the state of the friezes, in which they were found when excavated, tell us?

A discussion of these points will lead us to:

- e) scenario, which tries to explain, why both friezes were not found attached to a monument, but rather as intentionally discarded material in the deposit of a sculptor's workshop<sup>301</sup>.

The main purpose of this Chapter is a detailed discussion of these questions. To allow the reader an easier understanding while reading this discussion, I allow myself to anticipate in the following summaries of my own relevant results. Based on that, I will arrive at two different conclusions (cf. *infra*, at Chapters II.2.; and II.3. - note that the latter Chapter is divided into: Chapter II.3.1.; II.3.2.; and II.3.3.).

Since I had arrived at the first conclusion before reading the account by Massimo Pentiricci 2009, the title of it is as follows: Chapter II.2. *My first conclusion, written before reading the account by M. Pentiricci (2009)*. I then wrote the following text: Chapter II.3. *My second conclusion, written after reading the account by M. Pentiricci (2009)*. In my first conclusion, I followed those scholars, who took for granted that the monument, for which the Cancellaria Reliefs were commissioned, had survived the dismantling of those friezes. In my second conclusion, I follow Pentiricci (2009), who suggests instead that the entire Domitianic building was destroyed (together with the Cancellaria Reliefs). After my own two conclusions will follow the discussions of those questions by other scholars (cf. *infra*, at Chapter II.4.). Let's begin with my own answers to the above posed questions.

---

<sup>300</sup> My thanks are due to Paul Scheduling for alerting me to this fact and to Michael Pfanner for kindly encouraging me to pursue my relevant studies, and for writing me the title of his publication; cf. S. LANGER and M. PFANNER 2018.

<sup>301</sup> so already F. MAGI 1945, 52-54; so also M. PFANNER 1981, 517; and D.E.E. KLEINER 1992, 192.

**II.1.a) where exactly was the carving of the first phase of the Cancellaria Reliefs conducted and do we have criteria that allow us to date these friezes?**

As Michael Pfanner (1981, 514-516; cf. *infra*, ns. 318, 364 in Chapters II.1.e); and II.4.) has shown, the first phase of the Cancellaria Reliefs was sculpted, after its still undecorated marble slabs had been mounted on the Domitianic monument or building, for which they were intended, that is to say, its reliefs were carved *in situ*. We do not know, when exactly that building was erected, nor do we know its function.

The only indication that allows us to date both friezes is the 'terminus ad quem or post quem AD 81', provided by the third and last portrait-type of Domitian<sup>302</sup>, that is visible on Frieze A. The head of Domitian on Frieze A (the face of which has in the second carving phase of this frieze been recut into a portrait of Nerva), had clearly been modelled according to Domitian's third and last portrait-type: on the back of this head is preserved its typical coiffure<sup>303</sup>. Unfortunately Domitian's datable portrait does not help us to decide, which one of Domitian's departures into military campaigns was actually represented on Frieze A, since he conducted all of them not only in person, but also as reigning emperor, that to say, after AD 81<sup>304</sup>. According to Diana E.E. Kleiner, Frieze A depicts "Domitian's departure (profectio) for his Sarmatian War in 92-93"<sup>305</sup>.

**II.1.b) which emperor commissioned those friezes, and had that first phase of the reliefs been finished?**

**What evidence do we have that other emperors were also involved in the making of these friezes?**

Concerning the traces of carving activities surrounding all three portrait heads (*i.e.*, the heads of the two emperors on Frieze A and B, and of the togate youth on Frieze B; cf. here **Figs. 1; 2; Figs. 1 and 2 drawing; figure 6** [on Frieze A: **Domitian/ Nerva**]; **figures 12 and 14** [on Frieze B: Domitian and Vespasian]) on both friezes (but also surrounding several of its 'ideal' heads, as already observed by Magi<sup>306</sup>), I do not follow those scholars, who assume complex recutting histories (cf. *supra*, at Chapters I.1.; and I.1.1.). I prefer the judgements of Magi and Daltrop<sup>307</sup>, who declared that these traces are not necessarily proof for the reworking of the portraits in question: they were rather left by the specialists, who *initially* carved those (portrait) heads; Giandomenico Spinola is likewise of this opinion (cf. *infra*, at Chapter III. See also below, at *The Contribution by Giandomenico Spinola on the Cancellaria Reliefs*).

If so, we should ask ourselves, why those 'traces' were not abolished, considering the otherwise very high formal quality of those reliefs that is characterized by a smooth finish. Personally, I have, therefore, come to

<sup>302</sup> so H. MEYER 2000, 128 with n. 411; Fig. 232: "Alleinherrschaftstypus", who quotes for that: M. BERGMANN and P. ZANKER 1981, 366ff.; G. DALTRÖP 1966, 30ff. Cf. D.E.E. KLEINER 1992, 176-177, Fig. 145; pp. 191-192: "One of the most recent studies of the [Cancellaria] reliefs confirm the late Domitianic date, and the portrait of Domitian in Frieze A is identified as an example of his last portrait type".

<sup>303</sup> see H. MEYER 2000, 128, Fig. 232.

<sup>304</sup> cf. J. B. CAMPBELL (1996, 491): "Domitian (Titus Flavius (RE 77) Domitianus, son of the emperor Vespasian, was born on 24 October AD 51 ... Although Domitian exercised no formal power, he was clearly part of the dynastic plan, and there is no convincing evidence that he was kept in the background or consumed by jealousy of his brother [*i.e.*, Titus], whom he succeeded smoothly in 81 ... Domitian was the first reigning emperor since Claudius in 43 to campaign in person, visiting the Rhine once, and the Danube three times ... In 82/83 he fought a successful war against the Chatti on the middle Rhine, brought the Taunus area under Roman control, and accepted a triumph and the name 'Germanicus'. But the military balance was shifting towards the Danube, and in 85 the Dacians, under king Decebalus, invaded Moesia killing its governor, Oppius Sabinus. Domitian came in person in 85 and 86; and after the defeat and death of Cornelius Fuscus (praetorian prefect), Tettius Iulianus, governor of Upper Moesia, won a victory at Tapae in 88. Since Domitian was facing trouble from the Marcomanni and Quadi in Pannonia, he made peace with Decebalus before launching a campaign against them (spring 89); at the end of 89 he celebrated another triumph. Then early in 92 a legion was destroyed in Pannonia by an incursion of the Sarmatian Iazyges and the Suebi, which was eventually contained under Domitian's personal direction ... he was murdered on 18 September 96; his memory was condemned by the senate". For Domitian, cf. *supra*, ns. 82, 189, in Chapter I.1., and *infra*, at Chapter IV.1. See also below, at *The first Contribution by Emanuele M. Ciampini: La regalità domiziana: una nota egittologica*.

<sup>306</sup> cf. F. MAGI 1945, 149-150 with n. 2 on p. 149 and n. 2 on p. 150, cf. p. 61, quoted *verbatim supra*, n. 135, in Chapter I.1.

<sup>307</sup> as reported by MCCANN 1972, 251, n. 8.

the conclusion that the friezes should be regarded as unfinished in these details, as already suggested by Magi<sup>308</sup>, and as likewise suggested by Carignani and Spinola<sup>309</sup>. Note that neither those earlier scholars (Magi and Daltrop), nor I myself, deny that the face of the emperor on Frieze A has been recut into a portrait of Nerva<sup>310</sup>. Because of the aforementioned assumption, I believe those scholars are right, who suggested that the heads of *both* protagonists on Frieze B (that is to say, also the head of the togate youth) are portraits, and that those two portraits on Frieze B represented from the very beginning the young Domitian and Vespasian<sup>311</sup>, or in other words: these two heads, in their opinion and in my opinion, have *not* been recut. Of the same opinion is Giandomenico Spinola (cf. *infra*, in Chapter III. See also below, *The Contribution by Giandomenico Spinola on the Cancellaria Reliefs*).

**If all that should be true, the monument in question must, therefore, 1.) originally have been commissioned by Domitian<sup>312</sup>, and 2.), also the represented emperor of Frieze A must originally have been Domitian<sup>313</sup> (besides, the latter assumption has already been proven, cf. *supra*, in Chapter II.1.a).**

*II.1.c) where should we assume those friezes to have been, when the face of the emperor on Frieze A was recut into a portrait of Nerva?*

The face of the emperor on Frieze A was recut into a portrait of Nerva, when both friezes were still *in situ* on the Domitianic building. Personally, I find this assumption (*i.e.*, alternative 1.) more convincing than alternative 2.), the hypothesis, that the portrait of Nerva was only carved, after the friezes had been taken off the Domitianic monument<sup>314</sup>.

Let's for a moment believe that alternative 2.) is true. Namely that, after Domitian's *damnatio memoriae*, both friezes had actually been taken off their Domitianic monument and brought to the 'Second sculptor's workshop', in order to recut the portrait of Domitian on Frieze A into that of Nerva, with the prospect, of finally being attached to another building, erected anew or restored by Nerva. In such a case, the workmen would presumably have removed the slabs of Frieze B with much more care, thus avoiding to damage them, as, in my opinion, has actually happened in the process of removing these slabs from their original monument (cf. *infra*, in Chapter II.1.d)). But note that this hypothesis, alternative 2.), leads to yet another problem. Bergmann<sup>315</sup> was first to suggest that Nerva had ordered the head of the emperor on Frieze B (in her opinion previously a portrait of Domitian) to be recut into a portrait of Vespasian, a hypothesis followed by many subsequent scholars, *inter alia* by Pfanner<sup>316</sup>. To this hypothesis we could object: but why then was this alleged second phase of Frieze B, commissioned by the 'good' Emperor Nerva, and already finished with the portrait of the 'good' Emperor Vespasian, so mercilessly destroyed? (for that assumption, cf. *infra*, at Chapter II.1.d)).

<sup>308</sup> F. MAGI 1945, 149 with n. 2 (quoted *verbatim supra*, in n. 135, in Chapter I.1).

<sup>309</sup> Cf. A. CARIGNANI and G. SPINOLA 2009, 542-543; Section: "Considerazioni conclusive": "Dall'area del sepolcro di Irzio - in possibile relazione con le botteghe di marmorari della fine del I - prima metà del II secolo d.C. - provengono alcune opere che mostrano tracce di ri-lavorazione o appaiono non finite o mancanti della rifinitura finale; tra queste ovviamente si dovranno innanzitutto ricordare le lastre che compongono i rilievi flavii [*i.e.*, the Cancellaria Reliefs] e la c.d. [cosiddetta] Ara dei Vicomagistri".

<sup>310</sup> on the contrary, F. MAGI 1945, 60-69, was first to suggest this. For the head of Nerva on Frieze A, cf. also G. DALTRÖP 1966, 43 Taf. 37.

<sup>311</sup> so first MAGI 1945, 57-60, 70-72, 149-150 (the latter two pages are quoted *verbatim supra*, n. 135, in Chapter I.1.).

<sup>312</sup> so also M. PFANNER 1981, 516, 518.

<sup>313</sup> so also M. PFANNER 1981, 518 with n. 17: "Es ist unverkennbar, daß nicht nur der Nerva auf Relief A, sondern auch der Vespasian auf Relief B umgearbeitet ist [with references]".

<sup>314</sup> so T. HÖLSCHER 2009a, 54-56; cf. D.E.E. KLEINER 1992, 192, who mentions the fact that both alternatives have already been debated. She herself prefers, like HÖLSCHER, *op.cit.*, the other alternative. Cf. *supra*, n. 258, in Chapter I.3.2.

<sup>315</sup> M. BERGMANN 1981, 22-24. As a consequence of this, she was forced to deny that the togate youth on Frieze B, standing in front of 'Domitian' / Vespasian could be a portrait of Domitian as well, she even denied that the head of this youth is a portrait at all.

<sup>316</sup> M. PFANNER 1981, 518 with n. 17; B. FEHR 1998, 717 with n. 4; T. HÖLSCHER 2009a, 56 (he quotes Bergmann only in his n. 43, not in the text); and S. LANGER and M. PFANNER 2018 (for a discussion, cf. *infra*, at V.1.h)).

If, on the other hand, we believe that my hypothesis suggested here, alternative 1.), is true, according to which the friezes remained for their second carving phase on their original Domitianic monument<sup>317</sup>, nothing prevents us from imagining that Nerva, who commissioned that second carving phase, could also have had in mind to order the reworking of the two portraits on Frieze B (which, in my opinion, already in the first carving phase of the Cancellaria Reliefs showed the portraits of Vespasian and Domitian). Following the hypothesis suggested here concerning the second carving phase of the friezes, it is thus easy to explain, what McCann was wondering about (cf. *supra*, n. 93, in Chapter I.1.): the portrait of the young Domitian on Frieze B did only survive, because Nerva died before the works on the second phase of the Cancellaria Reliefs, as commissioned by him, could be finished (but see below, for another hypothesis). Because the head of the emperor on Frieze B (at least in my opinion) had not yet been recut when this frieze was destroyed, we could alternatively assume that Nerva and his artists had still to decide how the extant scene on Frieze B could be re-interpreted into an event of his own reign. Or in other words: in my opinion, only Frieze A shows the results of two carving phases, whereas Frieze B is preserved in the state of its first carving phase.

#### **II.1.d) what can the state of the friezes, in which they were found when excavated, tell us?**

When found, the farthest slab on the left of Frieze A was missing, but the other three slabs were almost intact. In the case of Frieze B, we have remains of all four slabs, but unfortunately they are heavily damaged. Considering not only that those slabs are remarkably thin, but also, which parts of them are missing, it seems to me, as if the damages have occurred beginning at those points, where the slabs had presumably been fixed to the monument by means of clamps.

**I believe that, when an operation of the kind was planned, a decision had to be made beforehand by the person in charge: it was either preferable in the process *not* to damage the monument, or else *not* to damage the reliefs, because it seems to me unthinkable to accomplish such a procedure without damaging *either one* (but as we shall see below, in note 318, precisely that assumption is certainly *not true*). Obviously in this case, the decision had been made, *before* the actual dismantling began, to discard the reliefs anyway, otherwise I find it impossible to explain, why the *reliefs* were damaged.**

As I have only realized after writing this, Pfanner<sup>318</sup> had already come to the conclusion that the second carving phase of the Cancellaria Reliefs was conducted, when both friezes were still *in situ* on the Domitianic

<sup>317</sup> this had already been suggested by M. PFANNER (1981; cf. *supra*, n. 258, in Chapter I.3.2.) - as I have only later realized.

<sup>318</sup> M. PFANNER 1981, 516-517 with ns. 13-16, Section: "Das Schicksal der Reliefs", writes: "Gemäß der vorherrschenden Meinung nahm man die Reliefs nach der damnatio memoriae Domitians vom Bau und arbeitete in der Werkstatt den Kaiser um mit der Absicht, die Platten anderswo anzubringen. Zur Wiederverwendung kam es aber nicht mehr, und die Reliefs blieben in einem Depot liegen [with n. 13; page 517]. Die meisten Platten weisen nun eine auffallend gleichartige Beschädigung auf. Jeweils von den Hebelöchern gehen Sprünge aus [with n. 14]. Das ist kein Zufall und muß geschehen sein, als man versuchte, die - nach der Herausarbeitung der Reliefs sehr dünnen - Platten mit Hilfe dieser Hebelöcher vom Bau zu nehmen. Meistens schlug der Versuch fehl (A 4 rechts, B 1, B 3; nach Art des Bruchs wohl ebenso bei den unvollständigen Platten B 2 und B 4, Bei A 2 saß das Hebeloch im Relief, s. Abb. 2 [for those slabs of both Cancellaria Reliefs; cf. here **Figs. 1 and 2 drawing**]), nur bei Platte A 3 gelang er. Die Reliefs wurden durch diese Beschädigungen unbrauchbar. Offensichtlich sollten sie nicht wiederverwendet werden, sonst wäre man mit ihnen sorgfältiger verfahren und hätte sie anders bewegt; dafür sprechen auch die grob aufgeschlagenen Dübel- und Klammerlöcher. **Folglich muß die Umarbeitung des Kaisers am Bau stattgefunden haben** [with n. 15: "Daß die Beschädigungen erst nach einer Zweitverwendung erfolgten, ist nicht anzunehmen, da es keine Spuren einer weiteren Verwendung gibt."]. **Erst zu einem späteren Zeitpunkt nahm man die Platten vom Bau und lagerte sie des wertvollen Marmor materials wegen in einem Depot. Wann dies geschah, läßt sich nicht mehr genau bestimmen. Die Fundumstände geben m. E. [meines Erachtens] keinen sicheren Anhaltspunkt**, auch ist der gute Erhaltungszustand der Reliefoberfläche kein Indiz für eine kurze Anbringungsdauer, da die Platten in einem Innenraum angebracht gewesen sein könnten [with n. 16; my emphasis]".

Cf. S. LANGER and M. PFANNER 2018, 82 (quoted *verbatim infra*, at Chapter V.1.a)), who convincingly state that, contrary to what I have just suggested here, it must have been impossible to remove the Cancellaria Reliefs, without damaging *both*: the reliefs *and* the monument or building, to which they were attached.

monument, providing in my opinion undeniable proofs for this hypothesis (to this I will come back at Chapter II.4.). Only that his observations have not been accepted by subsequent scholars<sup>319</sup>, whose accounts I had read before finding his article. But contrary to my opinion, Pfanner<sup>320</sup> (I think erroneously) believes that the head of the emperor on Frieze B had only in the second carving phase been reworked into a portrait of Vespasian (to this I will likewise come back below).

**II.1.e) scenario which tries to explain, why both friezes were not found attached to a monument, but rather as intentionally discarded material in the deposit of a sculptor's workshop**

If the questions a)-d), posed in Chapter II.1., were correctly answered above, the following scenario seems to be possible.

After Domitian's death and the declaration of his *damnatio memoriae* (96 AD)<sup>321</sup>, his successor Nerva must have ordered the Domitianic monument, with its two (or more?) at that moment in some details still unfinished marble friezes, to be converted into a monument that would celebrate his own achievements. This is proven by the fact that his portrait on Frieze A had already been recut from the original portrait of Domitian, before both (extant) friezes were discarded. Nerva's death on January 27th (?), 98 AD<sup>322</sup>, obviously combined with a lack of interest on the side of the relevant later emperor, possibly Trajan<sup>323</sup> (cf. *infra*), to pursue Nerva's idea to dedicate this monument to himself, or also to convert it into one of his (*i.e.*, Trajan's) own monuments, must finally have caused the removal of those friezes from this originally Domitianic monument (for a different hypothesis, cf. *infra*, at Chapters II.3.2.; and II.3.3.).

---

**For the "Fundumstände" of the Cancellaria Reliefs, mentioned by M. PFANNER 1981, 517; cf. *infra*, at Chapter V.1.a) The stratigraphy of the site, where the Cancellaria Reliefs (cf. here Figs. 1; 2) were excavated, the topography of the entire area, and the date of the dismantling of these panels.**

<sup>319</sup> cf. *supra*, n. 258, in Chapter I.3.2.

<sup>320</sup> M. PFANNER 1981, 518 n. 17.

<sup>321</sup> cf. *supra*, n. 82, in Chapter I.1.

<sup>322</sup> J.B. CAMPBELL (1996, 1038-1039): "Nerva, Marcus Cocceius (*RE* 16), Roman emperor AD 96-98 ... However, Nerva was elderly and infirm and had no children. Naturally there was speculation about the succession, and further problems appeared ... The most serious signs of disquiet occurred among the soldiers, with whom Domitian had been popular ... Most ominously, rebellion broke out among the praetorians who had been stirred up by their prefect Casperius Aelianus into demanding the execution of the murderers of Domitian. Nerva had to accede, and was forced to give public thanks for the executions, thereby losing much of his authority. In October 97 amid gathering political crisis, he adopted Trajan, whom he had previously appointed governor of Upper Germany, as his son, co-emperor, and successor. His own title *Germanicus*, granted for a minor victory over the Germans in Bohemia [*corr.*: Pannonia], was conferred on Trajan. It is impossible to discover the exact circumstances of Trajan's adoption. Pliny suggests that the empire was tottering above the head of an emperor who now regretted his elevation to imperial power (*Pan.* 6.3, 7.3), but this may have been exaggerated in order to please Trajan. However if Nerva's regime faced increasing discontent, his advisers would doubtless take into consideration Trajan's distinguished background and career, popularity with the troops, and proximity to Rome ...".

See now Markus Handy (2015, quoted *verbatim supra*, in Chapter *Preamble: Domitian's negative image*; at Section I.), who is able to demonstrate that this negative image of Nerva and Domitian was commissioned by Trajan in order to legitimize his own accession; the relevant texts were written by Tacitus and Pliny the Younger.

For Trajan's adoption by Nerva in AD 97, cf. also A.M. MCCANN 1972, 272-275; D.E.E. KLEINER 1992, 228, 237; C. HÄUBER 2017, 242. Cf. D. KIENAST, W. ECK and M. HEIL 2017, 114: "Nerva (18 Sep. 96-27. [?] Jan. 98)", *Geb.[oren]*: 8. Nov. 30 in Narnia (Umbrien) ... Ende Okt.[ober] 97 Adoption Trajans. 27. (?) Jan. 98 *Tod*: Gest[orben]. in Rom ... imperator II 97 / Germanicus Nov.[ember] 97", with bibliography. Cf. *supra*, n. 87, in Chapter I.1.

<sup>323</sup> J.B. CAMPBELL (1996, 1543-1544): "Trajan (Marcus Ulpius Traianus), Roman emperor AD 98-117, was born probably in 53 at Italica in Spain ... [AD 117] and with his health declining, Trajan decided to return to Italy; but in early August he died suddenly in Selinus", in: *OCD*<sup>3</sup> (1996) 1543-1544.

D. KIENAST, W. ECK and M. HEIL 2017, 116-120; p. 116: "Trajan (28. Jan.-7. August 117) ... Wichtige Einzeldaten: Ende Okt. 97 Adoption durch Nerva und Erhebung zum Caesar: IMP. CAESAR NERVA TRAIANUS ... 28. Jan. 98 ... Akklamation als Imperator (dies imperii): IMP. CAESAR NERVA TRAIANUS AUGUSTUS, PONT. MAX. ... Spätherbst 98 Annahme des PATER PATRIAE-Titels. Winter 98/99 Aufenthalt an der Donau. ca. Okt.[ober] 99 Rückkehr nach Rom. Sept.[ember] 100 Panegyricus des Plinius auf Trajan ..."; p. 117: "... 7. (?) Aug.[ust] 117 *Tod*: Gest.[orben] in Selinus (Kilikien) ... Germanicus Nov.[ember] 97".

In my opinion, the process of carving the portrait of Nerva on Frieze A, at the moment, when those friezes were taken off the monument, was not already finished<sup>324</sup>. And if also my above-mentioned idea should be correct (cf. *supra*, in Chapter II.1.c), the possibly likewise planned recutting of the two portraits of Vespasian and Domitian on Frieze B into two other portraits, that were adapted to a propagation of Nerva's own *gestae*, had at that point not even been started.

The scenario suggested here thus comes to the conclusion that both friezes were taken off its original monument with the intention to discard them, and were consequently, in the course of this dismantling, destroyed. The slabs of both friezes were 'ripped off' the Domitianic monument, to the effect that Frieze B could not possibly be reused again in its entirety by any other emperor; Frieze A is less heavily destroyed (to this I will come back below). Or in other words: only the decision that was presumably made under Trajan, not to pursue the plans, which Nerva had made for those friezes, nor to use them for any of Trajan's own monuments (or for any monument, dedicated to him) can explain, why these friezes were not taken off the original monument with the utmost care, thus trying to avoid damages to the reliefs.

**But we shall see below (cf. *infra*, in Chapter II.3.2.) that it was presumably Nerva himself, who ordered the destruction of the entire building, comprising the Cancellaria Reliefs.**

In addition to this, I assume that only Frieze A has two carving phases, whereas Frieze B has come down to us in its first carving phase. I suggest this not only because I follow Magi (1939; 1945; cf. *supra*, n. 117, in Chapter I.1.) by assuming that the heads of Vespasian and of the young Domitian on Frieze B have not been reworked. -

As already mentioned, of the same opinion were and are also Daltrop (1966; cf. *supra*, n. 120); Pfeiffer (2009; cf. *supra*, n. 59); Pollini (2017b; cf. *supra*, n. 72), Chabrečková (2017; cf. *supra*, n. 73), and Sheldon (2023, in press; cf. *supra*, n. 74; likewise all in Chapter I.1.), Claudia Valeri and Giandomenico Spinola (cf. *supra*, in Chapter *Introductory remarks and acknowledgements; infra*, in Chapters III.; and below, in Chapter *The major results of this book on Domitian*; and at *The Contribution of Giandomenico Spinola on the Cancellaria Reliefs*).

**I find it also for a different kind of reasoning difficult to believe that Nerva could have commissioned a reworking of the head of the emperor on Frieze B - according to Bergmann 1981 (cf. *supra*, in Chapters I.1; I.1.1.) allegedly originally a portrait of Domitian - into a portrait of Vespasian.**

**My relevant idea is based on Magi's observation that the deposit of the slabs [*i.e.*, the Cancellaria Reliefs] should have been operating "tra la scorcia del I secolo e il primo ventennio del II"<sup>325</sup> (at a date 'between the end of the 1<sup>st</sup> century and AD 120'). - To this I will come back below in Chapter II.2.**

Magi, in my opinion convincingly, argued with the data collected during his excavation of this site. His findings comprise the proof that, under Hadrian, the level of this entire area had been raised, to the effect that the deposit in question became inaccessible. This was followed by Pentiricci (2009; cf. *supra*, in Chapter I.3.1. See also *infra*, in Chapter V.1.a)).

Obviously, I cannot myself offer here a detailed analysis of the relevant excavations underneath the Palazzo della Cancellaria, where the 'Cancellaria Reliefs' were found, and of the adjacent area immediately to the east, later occupied by the Palazzo Le Roy / now the Museo Barracco, comprising also analyses of all archaeological and architectural finds, and of the topography of the entire area. But in recent years all that

<sup>324</sup> so already F. MAGI 1945, 149-150, quoted *verbatim supra*, n. 135, in Chapter I.1. Cf. BERGMANN 1981, 21 with n. 8, p. 25 with n. 29 (referring back to p. 20 with n. 2).

<sup>325</sup> F. MAGI 1945, 138-140, with n. 4 (referring back to pp. 40, 42, 50), quoted *verbatim supra*, n. 255, in Chapter I.3.1. This was followed by A.M. MCCANN 1972, 265 with n. 64: "... the archaeological evidence indicates a date not later than the Hadrianic period for the placement of the reliefs in the mason's yard or marble worker's deposit in the Campus Martius where all but one were found carefully stacked with their sculptural faces protected by the tomb of the Republican Consul, Aulus Hirtius, who died in 43 B.C. [my emphasis]"; but doubted by M. PFANNER 1981, 517 with n. 16 (quoted *verbatim supra*, n. 318, in Chapter II.1.d)). Cf. next note.

has been done by other scholars<sup>326</sup>. As I have only realized after this text was written so far, long before me already Pentiricci, Cima, and Carignani and Spinola<sup>327</sup> had come to the same conclusion, namely that Magi had actually proven his relevant hypothesis. Summarizing their observations (cf. *supra*, at Chapters I.3.1; and I.3.2.), has resulted in two different possibilities: the deposit was either 'only' accessible until circa AD 120 (so Magi 1945 and Pentiricci 2009), or else until circa AD 150. The latter date has been suggested by Carignani and Spinola (2009), according to whom the deposit was accessible: "della fine del I - prima metà del II secolo d.C." (cf. *supra*, n. 76, in Chapter I.1., and n. 287, in Chapter I.3.2.). But for my first conclusion, to which we will now turn, neither Pentiricci's findings, nor those of Cima, as well as Carignani and Spinola (all *op.cit.*) had as yet been considered.

## II.2. My first conclusion, written before reading the account by M. Pentiricci (2009)

As discussed above, Bergmann<sup>328</sup> has formulated the hypothesis that the head of the emperor on Frieze B had originally been a portrait of Domitian, which, after the emperor's death and *damnatio memoriae*, had been recut at the order of Nerva into the still extant portrait of Vespasian. This has been followed by some subsequent scholars (cf. *supra*, in Chapters I.1.; and I.1.1.). Personally, I am not convinced of this scenario, because, when considering the fact that the Cancellaria Reliefs had already been discarded into this deposit of a sculptor's workshop 'before the early reign of Hadrian' (so Magi 1945, 138-140, quoted *verbatim supra*, n. 255, in Chapter I.3.1.), we must also answer the question, which one of Nerva's successors could have given the relevant order.

In my opinion, no emperor after the 'good' Emperor Nerva, so for example Trajan, who had after all been adopted by Nerva as 'his son, co-emperor and successor'<sup>329</sup>, and who, immediately after Nerva's death, had arranged that his predecessor be deified by the Senate<sup>330</sup>, or Hadrian, would have dreamt of destroying the state relief Frieze B, considering the fact that the portrait of Domitian on this frieze had been recut at the order of his own 'father, *Divus Nerva*' (in the case of Trajan), or else, at the order of his own 'grand-father, *Divus Nerva*' (in the case of Hadrian<sup>331</sup>), into a portrait of the likewise 'good' Emperor, *Divus Vespasianus*.

<sup>326</sup> cf. F. FILIPPI 2015b, *passim*, p. 432, Fig. 65; S. LE PERA BURANELLI 2004; C. HÄUBER 2017, 212, 483, cf. p. 69, map Fig. 3.7 [= here Fig. 59] (for that map, cf. *supra*, n. 66, in Chapter I.1.), labels: Corso Vittorio Emanuele II, Palazzo della Cancellaria; SEPULCRUM: AULUS HIRTIUS; Palazzo Le Roy/ Farnesina ai Baullari/ Museo Barracco.

For this tomb, cf. F. COARELLI: SEPULCRUM: A. HIRTIUS", in: *LTUR* IV (1999) Figs. I, 120, 126; Ii, 87-88; and M.T. D'ALESSIO 2017, 505: "2.6.4. Between Sulla and Augustus (76-27 BC)", p. 506 with n. 248 (where the tomb is mentioned; cf. p. 515: "2.8.2. From the reconstruction of Domitian to the death of Marcus Aurelius (AD 180) (tables 232, 275)"; p. 520: "structures for warehousing and artisanal activities stood between the Theater of Pompey and the river, an already commercial area ... Among the shops that housed artisanal activities in the quarter were those that worked the marble that arrived at the docks on the river [with n. 502]. North of the Euripus, which may have already been underground by this time, the wall marking the edge of the tomb of Hirtius was used for the workshop of an expert marble worker (IX 659). Among the objects found there were various tablets pending completion, but above all capitals, altars, *cippi*, and famous reliefs from the Claudian period belonging to the Altar of the Vicomagistri, as well as the honorary panels with the Cancellaria reliefs dated to the period of Domitian", with n. 503: "The reliefs are now kept in the Vatican Museums. To retrace the history of the fragments and their interpretation, see Pentiricci 2009, pages 55-62 with the bibliography therein".

<sup>327</sup> cf. for M. PENTIRICCI 2009, *supra*, in Chapter I.3.1.; for M. CIMA 2009, cf. *supra*, ns. 262, 286, 291, in Chapter I.3.2.; for A. CARIGNANI and G. SPINOLA, cf. *supra*, n. 76, in Chapter I.1., and n. 287, in Chapter I.3.2.

<sup>328</sup> M. BERGMANN 1981, 20, 22, 24, 25.

<sup>329</sup> cf. *supra*, ns. 55, 56, in Chapter I.1.

<sup>330</sup> so A. STEIN, in: *RE* IV 1 (1900) Sp. 149 s.v. M. Cocceius Nerva = Imperator Nerva Caesar Augustus, römischer Kaiser vom 18. September 96 bis 25. Januar 98 n. Chr.: "Trajan veranlaßte nach dem Tod Nervas sofort dessen Divinisierung", who provides literary sources); cf. W. ECK: "Nerva [2] Röm. Kaiser 96-98 n. Chr. ... er starb ... wohl am 27.1.98 ... Vom Senat wurde er divinisiert", in: *Der Neue Pauly* [DNP] Band 8 Mer-Op (Stuttgart - Weimar: Verlag J.B. Metzler 2000). D. KIENAST, W. ECK and M. HEIL 2017, 114: "Nerva ... 27. (?) Jan. 98 Tod: Gest. in Rom ... Beisetzung im Mausoleum Augusti. Consecratio: DIVUS NERVA".

<sup>331</sup> For Hadrian's adoption by Trajan in August of 117 AD, cf. A.R. BIRLEY: "Hadrian (Publius Aelius (*RE* 64) Hadrianus, emperor AD 117-38 ... When the Parthian expedition began (October 113), he joined Trajan's staff, becoming governor of Syria at latest in 117; and was designated to a second consulship for 118. His [*i.e.*, Hadrian's] position was thus very strong when Trajan died at Selinus in Cilicia at 8 August 117. The next day his adoption by Trajan was announced ...", in: *OCD*<sup>3</sup> (1996) 662; cf. A.R. BIRLEY:

I am suggesting this, although I am aware of the fact that the apparent peaceful beginnings of the reigns of the 'adoptive emperors', with Trajan, have been interpreted very differently by Barbara Levick: "L'uccisione di Domiziano nel 96 non fu seguita da una guerra civile ma da un rapido passaggio a un senatore debole anziano, sovrano *ad interim*, Marcus Cocceius Nerva (96-98), a cui subentrò senza difficoltà un uomo d'armi, Marcus Ulpius Traianus (98-117), secondo un processo che può essere interpretato come un colpo di stato senza spargimento di sangue<sup>332</sup>".

For a detailed discussion of those events; cf. *infra*, in volume 3-2, at *A Study on the consequences of Domitian's assassination: Nerva is forced to adopt Trajan and Trajan creates Domitian's negative image to consolidate his own reign ...*

As Pfanner has proven (cf. *supra*, n. 318, in Chapter II.1.d)), Frieze B was intentionally damaged in the process of 'ripping off' both friezes from their original Domitianic monument, and, as already observed above: even more so than the likewise discarded Frieze A. In my opinion, this crucial difference between both friezes has so far not attracted the attention it deserves. Contrary to Pfanner<sup>333</sup>, who suggests that *both* friezes, after having been removed from the monument, could not be used any more, I rather ask myself, whether Frieze A, at least in parts, could possibly have been re-used for a different purpose.

Because of all this, it therefore seems to me much more convincing to assume that Frieze B was discarded, and in the process of taking both friezes off the monument, destroyed, because of the following reasons. If it is true, as I believe, that Frieze B, until the very moment of its destruction, 1.) preserved its first carving phase, that showed 2.) the young Domitian and Vespasian, Frieze B was destroyed *because* of all that. Since Frieze B, in exactly that state, had been commissioned by the 'bad' Emperor Domitian. In addition, Frieze B was possibly therefore intentionally much more thoroughly destroyed than Frieze A, because it still carried Domitian's portrait (although that scenario does not explain why Domitian's face was left untouched).

But, as we shall see in my following second conclusion, many of those assumptions are *not* true. For my hypothesis that Nerva ordered the destruction of the building comprising the Cancellaria Reliefs; cf. *infra*, at Chapter II.3.2.

### ***II.3. My second conclusion, written after reading the account by M. Pentiricci (2009)***

***The observations made in Chapter II.3. allow new interpretations concerning the Cancellaria Reliefs and concerning Domitian's building policy in general***

If Pentiricci<sup>334</sup> is right when he suggests that the Domitianic building in question was destroyed *together with* the Cancellaria Reliefs, the overall picture changes accordingly. In this case, the differences in grades of destruction between Frieze A and B were certainly not intended. With the ideas presented below, I follow another of Pentiricci's<sup>335</sup> hypotheses, namely that this Domitianic building had been an arch, and that the Cancellaria Reliefs had been the horizontal panels in one of its passageways. Pentiricci<sup>336</sup> himself, to support his hypothesis, has mentioned the sheer lengths of those friezes, as well as the military subject matter of the scenes that are represented on both panels (for discussions, cf. *supra*, at Chapter I.3.2., and *infra*, at Chapters V.1.i.3.); and VI.3.).

***II.3.1. Nerva' victory in the bellum Suebicum October AD 97, the architectural fragments, found together with the Cancellaria Reliefs, comprising the architrave block carrying the inscription PP FECIT (CIL VI, 40543), Domitian's Forum/ Forum Nerva/ Forum Transitorium, and Domitian's building policy: praising the gens Flavia, emulating Augustus and Nero***

#### ***II.3.1.a) Nerva' victory in the bellum Suebicum October AD 97***

Provided, Pentiricci's idea (cf. *supra*, n. 336, in Chapter II.3.) is true, that the Cancellaria Reliefs, because of their sheer length and the military subject matter of the scenes that are represented on both panels, were once the horizontal panels in the passageway of an arch, then something else should interest us now: the question of what Nerva may have had in mind when he ordered the face of Domitian on Frieze A to be recut into his own portrait, and presumably likewise the heads of the two protagonists on Frieze B to be reworked into portraits that celebrated his own (*i.e.*, Nerva's) achievements, a plan that, if ever conceived by Nerva, in my opinion, had never materialized (cf. *supra*, at Chapter II.1.c)).

**Pentiricci's assumption (2009, 61-62; cf. *supra*, n. 264, in Chapter I.3.2) of a 'military subject matter' of both panels of the Cancellaria Reliefs, which, although this has been questioned for Frieze B by several scholars is, in fact, actually true. To this I will come back below (cf. *infra*, at Chapters V.1.i.3.); and VI.3.).**

Given the fact that Nerva reigned for only 16 [*corr.*: 13,5 !] months, a campaign under his reign in Bohemia, as this region is (erroneously) called by John Brian Campbell<sup>337</sup>, that had earned Nerva the title *Germanicus*, could have been the reason, why the emperor had decided to re-use Domitian's arch, which held the Cancellaria Reliefs as a triumphal arch of himself<sup>338</sup>. In reality, the victorious campaign that had earned Nerva the title *Germanicus*, had been conducted in Pannonia, against the *Suebi*<sup>339</sup>.

We do not know, whether or not this arch had been finished at all by the time Domitian was assassinated. As mentioned before, I side with those scholars who believe that the carvings of the Domitianic phase of the

<sup>334</sup> M. PENTIRICCI 2009, 204-205; quoted *verbatim supra*, at n. 292, cf. n. 297, in Chapter I.3.2.

<sup>335</sup> M. PENTIRICCI 2009, 61 with n. 426; cf. *supra*, n. 263, in Chapter I.3.2.

<sup>336</sup> M. PENTIRICCI 2009, 61-62, quoted *verbatim supra*, n. 264, in Chapter I.3.2.

<sup>337</sup> cf. *supra*, n. 322, in Chapter II.1.e). - Besides, S. LANGER and M. PFANNER (2018, 83, quoted *verbatim infra*, at Chapter V.1.b)), rightly observe that Nerva reigned only for 13,5 months (!).

<sup>338</sup> M. BERGMANN 1981, 31, writes: "Auch Fries A ließ sich ja nicht auf eine reale kriegerische Aktion Nervas beziehen, zumindest dann, wenn das Porträt unmittelbar nach seinem Regierungsantritt umgearbeitet wurde". See the comments by E. SIMON 1985, 554 with n. 60, quoted *verbatim infra*, at n. 352, in Chapter II.3.2.

<sup>339</sup> cf. A. STEIN, in: RE IV 1 (1900) Sp. 141 (quoted *verbatim infra*, at n. 343).

Cancellaria Reliefs had not as yet received their final finish<sup>340</sup>. Provided, Pentiricci is right, that this arch was at a certain moment *completely* destroyed - together with the Cancellaria Reliefs - also something else must be true. Because, if we further assume that Nerva, by ordering the face of Domitian on frieze A to be recut into his own portrait, actually wished to refer with the *profectio*, represented on Frieze A, to his first own *real*<sup>341</sup> military campaign, this Domitianic arch must still have been intact at the time, when this campaign had resulted in a Roman victory. And that because of the following reasons.

Pfanner (1981, 516-517 with ns. 13-16, "Das Schicksal der Reliefs", quoted *verbatim supra*, n. 318, in Chapter II.1.d)) has proven, that Domitian's face on Frieze A of the Cancellaria Reliefs was recut into a portrait of Nerva, when that panel was still *in situ* on its Domitianic building. Domitian was murdered on 18 September 96. As we will learn below (cf. *infra*, at Chapter II.3.2.), Nerva dedicated at the end of October (or at the beginning of November) AD 97 the laurel wreath to *Iuppiter Optimus Maximus Capitolinus* on the Capitoline, which, as a token of his victory over the *Suebi*, had been sent to him from Pannonia - that victory, for which Nerva would receive the title *Germanicus*. When we combine these facts, it seems reasonable to assume, that this Domitianic arch, at the stage of Nerva's victory, had survived Domitian's assassination already by more than 13 months. If so, we can further assume that this arch, following Nerva's decision, to convert this monument into one that celebrated his own victory, had again become a building site.

Perhaps we can even hypothesize something else: when we consider that the Cancellaria Reliefs were not yet finished, when Domitian died, the place may simply have remained, since Domitian's death, an abandoned building site. As we have already seen, when discussing the Arch of Domitian on the Palatine and the *Equus Domitiani* on the Roman Forum (cf. *supra*, at Chapter I.3.2.), not all the arches (nor the *Equus Domitiani*), erected (or begun) by Domitian, had immediately completely been razed to the ground after his *damnatio memoriae*, as one might perhaps take for granted for all of them, when reading Dio's account, who seems to have asserted exactly that (68,1,1; cf. *supra*, at n. 83, in Chapter I.1.). I do not know, what building sites would have looked like at the time, but in order to protect the citizens from possible damage, there were presumably some kind of fences around them. As we know for sure now, the Cancellaria Reliefs were carved *in situ* (for that, cf. *supra*, at Chapter II.1.a)). Provided, it is also true that they were the horizontal panels in the passageway of an arch - and that this monument was still a building site - no citizen would have been able to see from outside the fence, whom the togate youth on Frieze B represented (cf. here **Fig. 2; Figs. 1 and 2 drawing; figure 12**). If true, this could explain, why this head (in my opinion a portrait of Domitian) could survive. Also because I further suggest (cf. *infra*, at Chapter II.3.2.) that the monument in question (an arch?) was already destroyed by Nerva, which is why no citizen has ever really seen the Cancellaria Reliefs *in situ*.

As I have only realized after this Chapter had been written, John Henderson (2003, 246, quoted *verbatim infra*, in Chapters V.1.i.3.); and in *The major results of this book on Domitian*), provides another explanation, why the head of the togate youth on frieze B (in case it was meant as a portrait of Domitian at all) could survive the emperor's *damnatio memoriae*.

But what had happened next? Campbell<sup>342</sup> writes that Nerva's victory in 'Bohemia' in 97 AD was "conferred" to Trajan. If that is true, this could explain, why Trajan, after Nerva's death, did not pursue Nerva's plan to re-dedicate Domitian's arch as a triumphal arch to himself (*i.e.*, to Nerva). But also an alternative seems to be possible, which I myself find preferable. But before developing this idea (cf. *infra*, at Chapter II.3.2.), let me add some more information about:

<sup>340</sup> so already very detailed F. MAGI 1945, 149-150, quoted *verbatim supra*, n. 135, in Chapter I.1. See now the detailed observations by S. LANGER and M. PFANNER 2018; quoted *verbatim infra*, at Chapter V.1.i.1.); and summarized *infra*, in Chapter *The major results of this book on Domitian*.

<sup>341</sup> this has been questioned by M. BERGMANN 1981, 31 (quoted *verbatim, supra*, n. 338).

<sup>342</sup> cf. *supra*, n. 322, in Chapter II.1.e).

*The circumstances, under which Nerva had received the title Germanicus*

Arthur Stein<sup>343</sup>, after discussing Nerva's adoption of Trajan, wrote: "Da zur selben Zeit die Nachricht von einem in Pannonien über die Sueben erfochtenen Sieg eintraf, nahm Nerva den Siegerbeinamen *Germanicus* an, den auch Trajan erhielt", and further (in the chapter: "Germanenkriege"; "Pannonien, ein *bellum Suebicum* unter Nerva): "... und endlich steht durch Münzen und Inschriften fest, dass Nerva und Trajan seit Ende 97 den Beinamen *Germanicus* führen ... und dass Nerva schon damals auch zum Imperator acclamiert wurde, daher imp. II heisst ... dass wir annehmen, der Sieg in Pannonien sei über die Germanen, und zwar über die Sueben erfochten worden, gegen die auch unter Domitian an der Donau gekämpft worden war ... Einzelheiten aus diesem Krieg sind uns nicht bekannt". Elsewhere, Stein mentioned Nerva's full title:

"Nachdem er [Nerva] im Jahre 97 den Ehrennamen *Germanicus* erhalten hatte und zum Imperator acclamiert worden war ... hiess er gegen Ende seiner Regierung mit vollem Namen und Titel *Imp. Nerva Caes. Aug., Germanicus, pontifex maximus, tribuniciae potestatis II, imp. II, cos. IV, pater patriae*, vgl. CIL V 4314 [my emphasis]".

According to Dietmar Kienast, Werner Eck and Matthäus Heil, both Nerva and Trajan received the title *Germanicus* in November of AD 97<sup>344</sup>.

If indeed Nerva had wished to refer to his own victory over the *Suebi* in Pannonia in AD 97, when he ordered to recut Domitian's face on Frieze A into a portrait of himself, this idea was perhaps not so extravagant, as we might at first glance believe. Because, provided Domitian actually had commissioned Frieze A in order to commemorate his own victorious Sarmatian War, which the emperor had fought in person in Pannonia in 92-93 against the Sarmatian Iazyges, and likewise against the *Suebi*<sup>345</sup>, as one scholar has suggested<sup>346</sup>, Nerva's idea would become much better understandable (cf. *infra*, at Chapter II.3.2).

I myself suggest instead that Frieze A of the Cancellaria Reliefs shows Domitian's *profectio* to his (second) Dacian war in the spring of AD 89 (cf. *infra*, in volume 3-2, at Appendix IV.d.2.e); Appendix IV.d.2.f). Below (cf. *infra*, at Chapter *The major results of this book on Domitian*) I suggest that the Cancellaria Reliefs may have decorated the arch of Domitian, postulated by Filippo Coarelli (2009b; 2012) at the "Porta principale" of Domitian's Palace on the Palatine.

If that is true, considering at the same time that also the Emperor Nerva resided in Domitian's *Domus Augustana*, it would be more than understandable that he had the intention to appear with a portrait of *himself* on Frieze A (cf. here Fig. 1, or, if possible, on both Friezes ?), which decorated after all the arch at the entrance of *his* Palace.

For a discussion of this point; cf. *infra*, in Chapter *The major results of this book on Domitian*.

Cf. here Figs. 8.1; 58, labels: PALATINE; DOMUS AUGUSTANA; "Porta principale"; Arch of Domitian ? / Cancellaria Reliefs ?

<sup>343</sup> A. STEIN, *op.cit.*, cf. *supra*, n. 339. The quotes are from: Sp. 141, Sp. 142, Sp. 149, and Sp. 137.

<sup>344</sup> D. KIENAST, W. ECK and M. HEIL 2017, 114 "Nerva ... imperator II 97, Germanicus Nov. 97" (cf. *supra*, n. 87, in Chapter I.1.); p. 117 (Trajan): "Germanicus Nov. 97" (cf. *supra*, n. 323, in Chapter II.1.e).

<sup>345</sup> for discussions of Domitian's Sarmatian War, cf. also at n. 181, in Chapter I.1, n. 232, in Chapter I.2., n. 305, in Chapter II.1.a), and *infra*, at n. 346, and at n. 352, in Chapter II.3.2. See also below, at Chapter *The major results of this book on Domitian*.

<sup>346</sup> so D.E.E. KLEINER 1992, 191; cf. T. HÖLSCHER 2009a, 58 (but note that Hölscher does not interpret the scene as Domitian's *profectio* for his Sarmatian War, but rather as the emperor's *adventus* into Rome, after the victory in this war).

**II.3.1.b) The architectural fragments, found together with the Cancellaria Reliefs, comprising the architrave block carrying the inscription PP FECIT (CIL VI, 40543), and Domitian's Forum/ Forum Nervae/ Forum Transitorium**

Also a second thought that comes to mind, when reading Stein's account (cf. *supra*, ns. 339, 343, in Chapter II.3.1.a)), in which he mentions the fact that Nerva, in October of AD 97, had learned the news of his victory in the *bellum Suebicum*. This thought relates to the inscription on the architrave block, datable to the Domitianic period, that carries the inscription *PP FECIT* (CIL VI, 40543; cf. *supra*, n. 81, in Chapter I.1.), assuming at the same time that this inscription belonged to the same monument as the Cancellaria Reliefs.

As already mentioned before, the emperor, who commissioned the dedicatory inscription of this Domitianic building, which Nerva had decided to re-use for himself, was not necessarily Domitian, as we might take for granted, but may instead have been Nerva, since in this inscription only the title *pater patriae* survives, that, as we know, both Domitian<sup>347</sup> and Nerva<sup>348</sup> held. This assumption seems possible, provided it is true, that the Cancellaria Reliefs were not finished, when Domitian died, an idea which could, by implication, mean, that the entire building was not finished, and consequently not yet dedicated. But since only the far right end of this dedicatory inscription survives, the block, carrying this inscription, may also represent, what is left of Domitian's original dedication, which had not yet been recut under Nerva. Alternatively, this inscription may likewise be what is left of Domitian's original inscription, but which *had* already been recut under Nerva, only that in this specific detail it had not been necessary to change its content.

If this dedicatory inscription was already commissioned by Domitian, would that assumption automatically imply that this arch could not possibly have been a building site any more, when the emperor died? In my opinion, that is not necessarily the case.

For a possibly similar situation, let's compare the dedicatory inscription of Domitian's Temple of Minerva at Domitian's *Forum* at Rome, that is to say, of a temple which was located within a larger building, that was only finished and dedicated by Nerva. Heinrich Bauer and Chiara Morselli<sup>349</sup>, in their discussion of the *Forum Nervae*, write: "L'iscrizione di Nerva, che occupava non solo il fregio [of the Temple of Minerva] ma anche l'architrave levigato, tramandataci quasi interamente, sostituiva probabilmente quella di Domiziano ed è databile al 97/98 d.C. [CIL VI 953 = 31213]. ...". Bauer and Morselli thus assume, that Domitian's Temple of Minerva at Domitian's *Forum* had already received Domitian's dedicatory inscription, although we know that the *Forum* has definitely been finished and dedicated by Nerva. Nerva's dedicatory inscription of his '*Forum Nervae*', comprising this Temple of Minerva (cf. CIL VI 953), reads:

"IMP . NERVA . CAES . AVG . germanicus . PONT . MAX  
 TRIB . POTEST . II . cos. IIII . P. p. forum miNERVAE . FECIT

[a. 98]".

For a reconstruction in "3D" of Domitian's *Forum/ Forum Nervae/ Forum Transitorium*; cf. Alessandro Viscogliosi (2009, 203, Fig. "1. Foro Transitorio, veduta ricostruttiva verso il tempio di Minerva (Inklink)". In this reconstruction, the façade of the Temple of Minerva is visible, showing the above quoted dedicatory inscription on its architrave '*in situ*'; cf. p. 206, Figs. "5. Foro Transitorio, >le Colonnacce<" (cf. her Fig. 49); cf. p. 207, Figs. "7-9. Foro Transitorio, interpretazione delle fasi (Viscogliosi); pianta della prima e della seconda fase (da Viscogliosi 2008)".

For a discussion of "*Le Colonnacce*" at Domitian's *Forum/ Forum Nervae/ Forum Transitorium*; cf. *infra*, at Chapter *The major results of this book on Domitian*.

<sup>347</sup> cf. *supra*, n. 82, in Chapter I.1.

<sup>348</sup> cf. *supra*, n. 87, in Chapter I.1.

<sup>349</sup> H. BAUER and C. MORSELLI: "Forum Nervae", in: *LTUR* II (1995) 307-311, Figs. 115, 147, 148.

For two other reasons Domitian's *Forum/ Forum Nervae/ Forum Transitorium*, can be compared with the subjects discussed here: the inscription *PP FECIT* (CIL VI, 40543; cf. *supra*, n. 81 in Chapter I.1.), that was found in the same area as the Cancellaria Reliefs, is inscribed on an architrave block, exactly like the dedicatory inscription of the Temple of Minerva at Domitian's *Forum/ Forum Nervae / Forum Transitorium* (for a discussion of such architrave blocks, carrying dedicatory inscriptions, cf. H.B. WIGGERS 1983, and M. WOLF 2018, 91-93; cf. *infra* at Chapter V.2.). This architrave block, carrying the inscription *PP FECIT*, has been compared by Klaus Stefan Freyberger (2018, 97; cf. *infra*, at Chapter V.3.) on stylistical grounds with "*Le Colonnacce*" at Domitian's *Forum/ Forum Nervae/ Forum Transitorium*. In his conclusion, Freyberger dates all the architectural fragments, found together with the Cancellaria Reliefs (cf. *supra*, n. 76, and in Chapter I.3.1.), to the late Domitianic period, and attributes them to a workshop that was also active at Domitian's Palace on the Palatine, the '*Domus Flavia*'/ *Domus Augustana*.

For Domitian's Palace on the Palatine; cf. here Fig. 73, labels: PALATIUM; "DOMUS FLAVIA"; DOMUS AUGUSTANA; and below, in Chapters V.1.i.3.b); in *The major results of this book on Domitian*; and *infra*, in volume 3-2, at Appendix VI.

Already Stefan Pfeiffer (2009, 61-62), whose account I only came across once I had finished writing my entire text on the Cancellaria Reliefs, has discussed those panels in context with Domitian's *Forum/ Forum Nervae/ Forum Transitorium*:

"Das Forum des Domitian

Die in der Spätantike unter dem Namen Forum Transitorium (>Durchgangsforum<) bekannte Platzanlage befand sich auf relativ engem Raum (120 x 45 m) zwischen Augustusforum und dem vespasianischen Tempel des Friedens [*i.e.*, *Vespasian's Forum* or *Templum Pacis*]. Domitian wählte diesen, für ein Forum vielleicht etwas schmalen Ort, um eine Verbindung von Augustus und Vespasian auch topographisch zum Ausdruck zu bringen und sich selbst in beider Nachfolge zu stellen ...

Von der Dekoration des Forums ist nicht mehr viel erhalten, doch steht noch eine Wand (>Colonnacce< genannt), die einen Fries mit Szenen aus dem Themenkreis des Webens, für das Minerva/Athena zuständig war, zeigt. **Über dem Fries waren 2,65 m hohe Statuen angebracht, von denen noch eine erhalten ist, die man bisher als Minerva/Athena interpretierte [cf. here Fig. 49]. Inzwischen neigt die archäologische Forschung jedoch dazu, die Statue als Teil eines ganzen Statuenprogramms zu verstehen, das die 42 Joche der Wand ausfüllte (Wiegartz 1996). Es hätte sich demnach um Personifikationen von Provinzen des Imperiums oder von besiegten Völkern gehandelt. Sie würden auf die Sieghaftigkeit Domitians und des durch ihn garantierten Reichtums Roms hinweisen [my emphasis]**". - The last phrase was already quoted *supra*, at Chapter I.3.2.

See also *infra*, in Chapter *The major results of this book on Domitian*; and *infra*, in volume 3-2, at Appendix IV.d.2.a); Appendix IV.d.2.e); and Appendix IV.d.2.f).

After having finished writing the manuscript of this first volume of my *Study* on Domitian, I received the exhibition-catalogue *Domiziano Imperatore. Odio e amore*, in which Antonella Corsaro, Beatrice Pinna Caboni and Claudio Parisi Presicce have discussed Domitian's *Forum* ("*Domiziano, Nerva e il loro Foro*", 2023).

Cf. below, in Chapter *The major results of this book on Domitian*.

### II.3.1.c) Domitian's building policy: praising the gens Flavia, emulating Augustus and Nero

Immediately after the passage, quoted above (cf. *supra*, in Chapter II.3.1.b)), Stefan Pfeiffer (2009, 62) continues:

"Neben die von Domitian besonders geschätzten Gottheiten Jupiter und Minerva trat der Kult der eigenen Vorfahren, der dem Kaiser vor allem aus legitimatorischen Gründen wichtig war. Er bemühte

sich, seiner eigenen Dynastie Frömmigkeit (*pietas*) zu erweisen und sie auf diese Weise mit dem julisch-claudischen Kaiserhaus gleichzusetzen. Bildlich vor Augen führen uns die *pietas*-Politik gegenüber dem Vater die beiden in der archäologischen Forschung bezüglich ihrer Interpretation mehr als umstrittenen sogenannten Cancellaria-Reliefs (vgl. [vergleiche] zuletzt Henderson 2003). Sie sind nach ihrem Fundort im Garten des Palazzo della Cancellaria Apostolica benannt. Eines der beiden Reliefs [*i.e.*, Frieze B] zeigt auf jeden Fall Domitian mit Vespasian. Vater und Sohn werden von Minerva, Rom und den Genien von Senat und Volk Roms begleitet. Auf diese Weise ist nicht nur die Legitimation der Herrschaft des Domitian durch seinen Vater verkündet, sondern auch der *consensus universorum*, die Zustimmung zu seiner Herrschaft durch die Götter und die Untertanen [my emphasis]".

Concerning the interpretation of Frieze B of the Cancellaria Reliefs, I have come - independently of Pfeiffer (2009, 62) - to almost the same conclusions (cf. *infra*, in Chapters V.1.i.3.); VI.3.).

Stefan Pfeiffer (2018, 189, Chapter: "The themes of Domitian's self-presentation") concerning Domitian's relation to his dynasty, writes: "2. Domitian had a special interest in showing his close connection to his dynasty, which legitimized his rule [with n. 93]. He erected several buildings that were related to Vespasian and Titus, the *templum gentis Flaviae* [with n. 94], the *porticus Divorum*, the *templum Divi Vespasiani*, and the arch of Titus [my emphasis]". In his notes, Pfeiffer provides references.

In this *Study*, I have concentrated on Domitian's Arch of *Divus Titus* on the *Velia* (cf. here Fig. 120 and *supra*, at ns. 238 [= T. GANSCHOW 1997, cat. 31], 244, in Chapter I.2., and *infra*, at ns. 477, 478, in Chapter VI.3.). See below, in Chapter V.1.i.3.b); at Section III.; and at Chapter *The major results of this book on Domitian*.

In previous studies, I have discussed the meaning of some of the other buildings erected by Domitian, that Pfeiffer (2018, 189) mentions (cf. C. HÄUBER 2014a, 165 with n. 144 [on the *Templum Gentis Flaviae* and on the find of colossal acrolithic portrait of *Divus Titus* (and a colossal portrait of *Divus Vespasianus*, allegedly found in the same area) that belonged to the cult-statues venerated there]; C. HÄUBER 2017, 162-164, 167 [on the *Templum Gentis Flaviae*]; Cf. pp. 20, 134, 142, 164-168, 171, 174-177 [for the building *Divorum*, erected by Domitian on the Campus Martius and dedicated to the two *Divi*, his father and brother, *Divus Vespasianus* and *Divus Titus*, for the difficulty to reconstruct its ground-plan, and for its meaning]).

For the *Templum Gentis Flaviae*; see below, in Chapter IV.1.1., and especially Chapters IV.1.1.a)-IV.1.1.c), IV.1.1.f), IV.1.1.h); V.1.i.3.a); and *infra*, in volume 3-2, in *Appendix I.g.3*); and in *Appendix VI.*; at Section XII.; and here Figs. 58; 59, labels: Servian city Wall; Baths of Diocletian; site of *TEMPLUM GENTIS FLAVIAE*.

Stefan Pfeiffer (2018, 189, Chapter: "The themes of Domitian's self-presentation") writes concerning Domitian's relation to Augustus:

"4. Domitian tried to establish a symbolic relation to Augustus, as evident from his *correctio morum* and the saecular games he held [with n. 97; my emphasis]". In his notes, Pfeiffer provides references.

For Domitian's Saecular Games of AD 88; cf. also Trevor Luke (2018, 207-209).

Concerning Domitian's building policy, Stefan Pfeiffer (2009, 62; and 2018, 189), in this just quoted passages expresses his conviction that key motivations for the emperor were to show his close connection to his dynasty, and to emulate Augustus and the Julio-Claudian dynasty.

Eric M. Moormann (2018), who is of the same opinion as Pfeiffer, discusses his observations in detail and adds to this that Domitian also strived for emulating Nero.

Eric M. Moormann (2018, 161) begins his contribution with the epigraph: "A visitor to Rome today cannot avoid the Flavians [with n. 1]", followed by another one: "To the modern visitor the centre of Rome

**presents itself as essentially a Flavian city** [with n. 2; my emphasis]", quoting in his n. 1: "Darwall-Smith 1996, 17...", and in his n. 2: "Boyle 2003, 29 ...".

For the most recent observations by Moormann (2021; 2023) concerning this point; cf. *supra*, in Chapter *Preamble*; Section III.; at point 3.) where they are quoted *verbatim*.

Cf. Moormann (2018, 161-162):

**"Domitian has indeed been recollected in Suetonius' biography for his many building enterprises. After Augustus, he was the greatest builder in the city**, if we may believe the long list [page 162] of works executed by him, and some scholars argue that these building activities were among his greater achievements (see fig. 2 highlighting the monuments discussed in this paper [with n. 7, quoting G. GERING 2012, 213]. Truly, Suetonius wrote (*Domitianus* 12.1) that the emperor was exhausted by the costs of the public works and spectacles: *exhaustus operum ac munerum impensis stipendioque*. **According to Jens Gering, we can observe three fields of interest in Domitian's building policy: personal grandeur, family memory and legitimization, and functional (re-)organization of the city**. In these respects, he slightly differed from his father and brother [with n. 8, quoting G. GERING 2012, 210-211]. It was, so Gering argues, "ein gutes Beispiel für die Verbindung von realpolitischer und ideologischer Motivation kaiserlichen Handelns" [with n. 9, quoting G. GERING 2012, 206]. **Without doubt, in this respect, Domitian acts as a princeps bonus with his public restoration projects**, which is also true for Nero's public works [with n. 10, providing references and further discussion; my emphasis]".

Also for further discussion of this point; cf. *supra*, in Chapter *Preamble*; Section III.; at point 3.).

My following conclusions have already been anticipated above (cf. *supra*, at *What this Study is all about*).

Eric M. Moormann (2018, 162) thus mentions "three fields of interest in Domitian's building policy", as defined by Jens Gering (2012, 2010-211): "personal grandeur, family memory and legitimization".

This is exactly how, in my opinion, also the contents of the Cancellaria Reliefs can be defined. Contrary to all other scholars - the only exception being Wolfgang Kuhoff - I have concentrated in this *Study* on a comparison of the contents of Frieze B of the Cancellaria Reliefs (cf. here **Fig. 2; Figs. 1 and 2 drawing**) with the contents of Domitian's obelisk, which the emperor erected at the Iseum Campense (cf. here **Fig. 28**): namely the contents of the representations on the *pyramidion* of this obelisk, as well as the contents of its hieroglyphic texts. And I happily confess that my research on this obelisk was only possible thanks to the generous support by the Egyptologist Emanuele M. Ciampini. - As I only realized after having conducted this research, a comparison between Frieze B of the Cancellaria Reliefs and the hieroglyphic inscriptions of Domitian's obelisk has actually been drawn before, cf. Wolfgang Kuhoff` (1993, 77 with n. 103, quoted *verbatim infra*, at Chapter IV.1.), who mentions his relevant findings in a footnote.

To attain this goal, two avenues of research have been pursued in this *Study*, at first was made a detailed analysis of the contents of Frieze B of the Cancellaria Reliefs, and second, on the basis of this, a comparison of those contents with the contents of the representations on the *pyramidion* of Domitian's obelisk, as well as with the contents of its hieroglyphic texts, both of which have been analysed by Ciampini (2004; *id.* 2005; this article is quoted *verbatim infra*, at Chapter IV.1.1.d.). See also below, at *The first Contribution by Emanuele M. Ciampini : La regalità domiziana: una nota egittologica*. As a result of this comparison, I suggest that exactly the same themes (as on Frieze B of the Cancellaria Reliefs) are also formulated in the representations on the *pyramidion* and in the hieroglyphic texts of Domitian's obelisk.

The contents of Frieze B of the Cancellaria Reliefs are hotly debated, and what I am presenting here is my own opinion (for a summary of the relevant debate by other scholars; cf. *infra*, at Chapters I.1.; I.1.1.; and VI.1.). The contents of the representations on the *pyramidion* of Domitian's obelisk are likewise debated, but the hieroglyphic texts of Domitian's obelisk, on the contrary, have the great advantage that here Domitian's propadanda is formulated *expressis verbis*. See for both Ciampini (2005; cf. also *infra*, at Chapter IV.1.1.f), and

at *The first Contribution by Emanuele M. Ciampini : La regalità domiziana: una nota egittologica*, as well as my own comments on all those subjects (cf. *infra*, at IV.1; IV.1.1.d); IV.1.1.f); VI.3.). - Whether or not I have been able to define correctly: 1.) the contents of Frieze B of the Cancellaria Reliefs; and 2.) the contents of the representations on the *pyramidion* of Domitian's obelisk, as well as of the hieroglyphic texts of Domitian's obelisk, can both only be judged by other scholars.

For a summary of this discussion; cf. *infra*, at Chapter *The major results of this book on Domitian*.

Let's now return to Moormann's observations.

**Moormann** (2018, 172, quoted in more detail *infra*, at Chapter IV.1.) **himself writes about Domitian's obelisk: "The monument does not give us reason to detect a specific *aegyptophilia* of the emperor, but it rather is, again, a form of imitating Augustus** [with n. 67, providing references; my emphasis]"

That Domitian, by dedicating the Obelisk Pamphilius/ Domitian's obelisk, aimed at emulating Augustus, has, in addition to this, also been suggested by Giuseppina Capriotti Vittozzi (2014, 259; cf. p. 250 n. 51), and by myself. Domitian was by no means the only emperor to create such an *Architekturkopie* of Augustus' famous ensemble '*Circus Maximus*, with an Egyptian obelisk erected on its *spina*'. I anticipate here what will be discussed in more detail below (cf. *infra*, at Chapter IV.1.1.a):

'For the idea that Maxentius' re-use of Domitian's obelisk on the *spina* of his *Circus* may be regarded as an *Architekturkopie* of Augustus' obelisk on the *spina* of the *Circus Maximus*, cf. Häuber (2017, 37, Fig. 1.2, pp. 162, 599. Cf. pp. 19, 113 n. 63, pp. 424-426, for the Egyptian obelisk now on the Piazza del Popolo, which is the one, Augustus had erected on the *spina* of the *Circus Maximus*. Cf. pp. 382-384, for the other comparable *Architekturkopien*'.

Immediately after the above quoted passage, **Moormann** (2018, 162, ) **continues: "This brief presentation sets out to provide a sketch of Domitian's building policy ... which in itself, I would argue, constituted a remaking of Augustan Rome ... Domitian's building policy also illustrated the emperor's *liberalitas*** [in the following listing the areas of Rome, where Domitian's buildings were concentrated; my emphasis]" . - For the term *liberalitas*; cf. *infra*, in volume 3-2, at *Appendix IV.b*).

Moormann (2018, 163-164, Section: "From Golden House to Public Space") writes:

"Nero's memory [with n. 11] was not entirely obliterated in the *Domus Flavia* and *Domus Augustana* ... ". Cf. p. 164: **"There are several parallels between Nero and Domitian when we look at their building policy in Rome. Both had to rebuild Rome after a great and devastating fire ... Domitian envisaged the expansion of monuments in shape and dimension as a form of emulation in respect to his predecessors. Nero's rebuilding of Rome after the great fire of A.D. 64, the construction of a lavish residence, and the organisation of games were mirrored in Domitian's deeds. In this evocative program, Domitian used western and eastern formulae, which were both traditional and innovative. For instance, to establish his two predecessors as *diui* and himself as son and brother of gods, he erected a temple *cum* mausoleum for them [*i.e.*, the *Templum Gentis Flaviae*], which is similar to Hellenistic custom, but also to Roman practices. The same is true for the representation of his sacred self and his palace on the Palatine, in which we observe similarities with Ptolemaic palace buildings, but also with Nero's concept of imperial representation** [with n. 15]. **His veneration of Minerva has antecedents as well**, especially in the emblematic figure of the great man of Early Hellenistic Athens, Demetrios Poliorketes [Ann. 16; my emphasis]"

In his **notes**, Moormann provides references.

Especially interesting for the topics discussed here are the observations by Moormann (2018, 164) that: "for the representation of his [*i.e.*, Domitian's] sacred self and his palace on the Palatine, in which we observe similarities with Ptolemaic palace buildings". Because also in the hieroglyphic texts of Domitian's obelisk (cf.

here **Fig. 28**), stress is laid 1.) on the claim of Domitian's "sacred self" - which, as expressed in these hieroglyphic texts, was due to his family bonds with *Divus Vespasianus* and *Divus Titus* - as Emanuele Ciampini has observed, whereas 2.) Domitian's other important theme, that of the legitimation of his reign, in the hieroglyphic texts of his obelisk is expressed by copying the relevant passages from Ptolemaic texts, in which is likewise expressed the legitimation of the (new) king.

For both subjects, see below, at *The first Contribution by Emanuele M. Ciampini : La regalità domiziana: una nota egittologica*.

After a discussion of all of Domitian's building projects at Rome, Moormann (2018, 173, Section: "Conclusions") writes:

**".. Secondly, the aspect of innovation. Seeing himself as the greatest emperor, Domitian hoped to be a *novus Augustus* and a *novus Nero* [with n. 76] ... Thirdly, as we have seen, many Augustan projects were restored, amplified or modified, but always with a clear reverence for the founder of the Empire. Domitian also respected and made permanent the works realised by his father [*i.e.*, Vespasian] and his brother [*i.e.*, Titus] and, by doing so, worked in a dynastic tradition. In that sense, he imitated Augustus who, of course, had one only generation (that of Caesar) ... **the ... area of the Campus Martius was an emblem of the emperor's [*i.e.*, Domitian's] goodness, as shown in the distribution of grain and oil ...**".** In his notes, Moormann provides references.

Interestingly, Moormann (2018, 173) mentions the fact that the *Campus Martius*: "was an emblem of the emperor's [*i.e.*, Domitian's] goodness, as shown in the distribution of grain and oil ...", thus referring to the *Porticus Minucia Frumentaria*, built by Domitian.

I have elsewhere come to the same result as Moormann (2018, 173). In my effort to find proof for the assumption that Domitian's obelisk was indeed commissioned by Domitian for the restored Iseum Campense, I have compared the claims made in the hieroglyphic inscriptions of Domitian's obelisk (cf. *infra*, at Chapter IV.; and here **Fig. 28**) that concern the benefactions of the Flavian dynasty for the Roman People, as well as the claims made in these texts that concern the benefactions of Domitian himself, especially his provision of the Roman People with bountiful food - with those building, surrounding Domitian's obelisk, which Domitian himself had actually commissioned, for example the *Porticus Minucia Frumentaria*, mentioned by Moormann.

For the *Porticus Minucia Frumentaria*; cf. now Filippo Coarelli (2019a, 195-314, Chapter: "Le distribuzioni alimentari alla plebe Romana", esp. pp. 229-254, section: "4. *Porticus Minucia*"; and pp. 254-267, Section: "5. L'identificazione della *porticus Minucia*: una risposta alle critiche recenti").

Coarelli summarizes here again his identification of the *Porticus Minucia Frumentaria* with the architectural finds in the Via delle Botteghe Oscure and at the Crypta Balby. He identifies the temple within this porticus with that of the Nymphs and attributes this building to Domitian; cf. Coarelli (2009a, pp. 450-451, cat. no. "42 Frammento della Forma Urbis Romae con la *Porticus Minucia Frumentaria*" [F. COARELLI], providing new evidence). For further discussion of the *Porticus Minucia Frumentaria*; cf. *supra*, in Chapter *Preamble*; Section III.; at point 3.).

I have already earlier followed Coarelli's relevant reconstruction; cf. Häuber (2017, 20, 59-60, 71, Fig. 3.7.1 = here **Figs. 59; 60**, labels: Largo Torre Argentina; Republican temples; IUTURNA; FORTUNA HUIUSCE DIEI; FERRONIA; LARES PERMARINI; PORTICUS MINUCIA FRUMENTARIA; AEDES: NYMPHAE; Via delle Botteghe Oscure; THEATRUM BALBI.

As a prerequisite for the just described 'urbanistic comparison' of Domitian's obelisk within its real surroundings, I have assumed that Domitian's obelisk was indeed standing on the piazza between the Iseum Campense and the *Serapeum* to the south of this square, where it has been located by many scholars (for that, cf. *infra*, at Chapter IV.1.1.c)), and the maps, here **Figs. 59-61; 78**).

As I hope to have shown in this *Study*, Domitian had indeed commissioned the Obeliscus Pamphilius for precisely that location (cf. *infra*, at Chapter IV.1.1.c)). For my earlier studies (cf. *infra*, n. 466, at Chapter IV.1., part of this text is quoted below, and C. HÄUBER 2017, 158-167, Fig. 5.5.2 [= here Fig. 28] and the maps Fig. 3.7.1 on p. 71 [= here Fig. 60], and Fig. 3.7.1.1 on p. 73 [= here Fig. 61]).

**When I had the idea to make such an 'urbanistic comparison', I had overlooked the fact that Pierre Gros (2009, 106, quoted in more detail *infra*, in volume 3-2, at Appendix IV.d.2.a)) describes something very similar in his discussion of Domitian's Forum/ Forum Nervae/ Forum Transitorium. According to Gros, Domitian or his architect Rabirius, by choosing the subject of the frieze in Domitian's Forum, which shows, "sotto la protezione di Minerva ... figure femminili intente a filare e a tessere che simboleggiano le virtù e il talento dell'Atena "Erganè" ... Questo tema, che rompe con l'immaginario militare dei Fori precedenti, ben si addiceva a questo complesso orientato verso la parte popolare e artigianale della città [*i.e.*, the *Subura*; my emphasis]".**

Cf. here Figs. 58; 73, labels: FORUM DOMITIANI / NERVAE; Temple: MINERVA; SUBURA.  
**Moormann (2018, 174, after discussing the relevant topic), concludes :**

"In sum, in terms of religious interventions, Domitian did not really change the traditional world, but carefully proceeded in the footsteps of his father and brother and of the previous emperors, especially Augustus [with n. 77] ... **In my opinion, Domitian simply fulfilled his tasks as an absolute ruler and used his expertise to build a city that corresponded with his status as emperor and the city's status as the centre of the world, while at the same time he reinstalled important Augustan monuments.** When we look at the number of enterprises, Domitian is second to Augustus, who incidentally was never accused of megalomania but regarded as a good emperor, in contrast to his late first century 'imitator' [*i.e.*, Domitian]. Both - and other emperors - envisaged monumentality in their building programs as necessary features [with n. 81; my emphasis]".

In his notes, Moorman provides references and further discussion. This passage will be quoted in more detail below (cf. *infra*, in volume 3-2, at Appendix IV.d.4.c) *Domitian's building projects at Rome: Conclusions*).

Apropos, Moormann's (2018, 173) above quoted statement: "**.. Seeing himself as the greatest emperor, Domitian hoped to be a *novus Augustus* and a *novus Nero***".

There is actually another interesting proof for Moormann's observation that Domitian saw himself as a 'novus Augustus': the specific iconography of the cult-statue of Domitian's Temple of Iuppiter Custos. I anticipate in the following, what will be discussed in more detail below (cf. *infra*, in volume 3-2, at Appendix I.d)):

'At the same time, the iconography of Domitian's cult-statue in his Temple of Iuppiter Custos, with himself, sitting on Jupiter's lap (cf. Tac., *Hist.* 3,74,1), refers also to a legend, told about the later Augustus, when he was a child' (cf. Suet., *Aug.* 94,8).

Suetonius, *Aug.* 94,8, in the translation of J.C. Rolfe 1920, writes:

'**After Quintus Catulus had dedicated the Capitol [*i.e.*, the (second) Temple of Iuppiter Optimus Maximus Capitolinus], he had dreams on two nights in succession: first, that Jupiter Optimus Maximus called aside one of a number of boys of good family, who were playing around his altar, and put in the fold of his toga an image of Roma, which he was carrying in his hand; the next night he dreamt that he saw this same boy in the lap of Jupiter of the Capitol, and that when he had ordered that he be removed, the god warned him to desist, declaring that the boy was being reared to be the saviour of his country. When**

Catulus next day met Augustus, whom he had never seen before, he looked at him in great surprise and said that he was very like the boy of whom he had dreamed.

Some give a different account of Catulus's first dream: when a large group of well-born children asked Jupiter for a guardian, he pointed out one of their number, to whom they were to refer all their wishes, and then, after lightly touching the boy's mouth with his fingers, laid them on his own lips [my emphasis]’.

SUETONIUS, *Lives of the Caesars 2. The Deified Augustus*, Loeb Classical Library LCL 31:290-291.

Online at:

<<https://www.loebclassics.com/>> (11-VII-2020).

Therefore, **by choosing the iconography, which Tacitus (*Hist.* 3,74,1) records for the cult-statue of Jupiter in Domitian's Temple of Iuppiter Custos, the emperor not only thanked the god for his salvation on 18th/19th December AD 69, but propagated at the same time to be, like Augustus before him (cf. Suet., *Aug.*, 94,8), 'the saviour of his country'** (translation: J.C. ROLFE 1920).

Domitian's Temple of Iuppiter Custos was also in another way closely connected with Augustus.

Robin Haydon Darwall-Smith (1996, 110, Section: "The Temple of Jupiter Custos") writes:

"The Temple of Jupiter Custos, then, was Domitian's personal thank-offering to Jupiter for his escape. This resembles closely the action of Augustus in similar circumstances: having narrowly escaped a thunderbolt in Spain, he erected a temple to Jupiter Tonans on the Capitol (*DA*, 29,13) to which he attached considerable importance [with n. 20, providing a reference]. It is striking that Augustus, after a dream, made Jupiter Tonans into a 'doorkeeper' for Jupiter Optimus Maximus (*ibid.*, 91.2), for the name of Jupiter Custos could imply a similar function for Domitian's god".

But there is even more. To the above quoted observation by Moormann (2018, 163-164): "From Golden House to Public Space - Nero's memory was not entirely obliterated in the *Domus Flavia* and *Domus Augustana* ... ", I should like to add two things:

**Namely the fact that Domitian a) emulated Augustus by building his Palace called *Domus Augustana* deliberately at the site of the *domus*, where the first *princeps* had actually lived, and that Domitian b), again like Augustus, as the 'new founder of Rome', emulated Romulus (or else compared the achievements of his entire dynasty with those of Romulus).**

For all that; cf. *supra*, in Chapter *Preamble*; Section III., at point 4.); and *infra*, in volume 3-2, in *Appendix VI.*; at Section I.

Let's now return to the judgement of Domitian's self-presentation by other scholars.

**Irene Bragantini (2018, 246-247, quoted *verbatim infra*, at Chapter V.1.i.3.) has aptly compared Domitian's reception of Vespasian at Beneventum with Augustus' famous description of a delegation, led by the *consul*, who had come all the way down to Campania to greet him already there, when he returned from Spain and Gaul, the *ire obviam*, an unprecedented honour, as Augustus proudly stated in his *Res gestae* (12).**

Bragantini's example (2018, 246-247), in my opinion, does not sound as if Domitian contented himself in merely 'emulating' Augustus' example here, or as Pfeiffer (2009, 62) writes, that Domitian's objective was, "sie [*i.e.*, the Flavian dynasty] auf diese Weise mit dem julisch-claudischen Kaiserhaus gleichzusetzen". - In my opinion, since Domitian himself went to Beneventum, and Mucianus and some other dignitaries even down to Brundisium (circa 500 km distant from Rome), where Vespasian landed, coming back from Alexandria, they clearly aimed at 'outdoing' the Augustan example - also because one passage of the

hieroglyphic texts of Domitian's obelisk (cf. here **Fig. 28**) says *expressis verbis* that he [*i.e.*, Domitian] by no means regarded the Julio-Claudian dynasty as a good example. I have written elsewhere:

"In one of the inscriptions on his Obelisk, written in hieroglyphs, Domitian formulates his hope that his contemporaries as well as posterity will always remember the achievements of his family, the Flavian dynasty, especially their benefactions for the Roman People. Domitian stresses that his family managed to consolidate the state, which had severely suffered from those 'who reigned before' (*i.e.*, the Julio-Claudian dynasty)". Cf. Häuber (2017, 21; cf. *infra*, n. 466 in Chapter IV.1., for references concerning this hieroglyphic text).

For further discussion of Domitian's meeting with Vespasian at Beneventum; cf. *supra*, in Chapter Preamble; Section III., at point 2.).

**Another of Domitian's emulations of Augustus can be deduced from observations made by Giuseppina Capriotti Vittozzi (2013, 127, quoted *verbatim infra*): the hieroglyphic inscriptions of Domitian's obelisk (cf. here Fig. 28) mention that 'his kingship has been granted him by Isis, together with Ptah'.**

As is well known, in the past, the Egyptian kings had been crowned either in the Temple of Amun at Thebes, or in the Temple of Ptah at Memphis, the old capital of Egypt; cf. Günther Hölbl (2004, 531, quoted *verbatim* in volume 3-2, at *Appendix II.a*). Domitian's purposeful emulation of Augustus is proven in this case by the fact that Augustus' official title as Pharaoh of Egypt comprised the statement that he was 'elected by Ptah', as we likewise learn from Capriotti Vittozzi (2013, 93 with n. 3; quoted *verbatim infra*, in volume 3-2, at *Appendix II.a*)).

Cf. Giuseppina Capriotti Vittozzi (2013, 127, Chapter: "I luoghi 'egizi' di Roma"):

"Altre interessanti considerazioni riguardano il ruolo di Iside nell'obelisco di Domiziano, la quale appare come elargitrice di regalità e, in tal senso, in relazione con Ptah [with n. 11]: ciò lascia intravedere una precisa citazione dell'ambiente menfita, che peraltro era l'antica capitale dove avveniva tradizionalmente l'incoronazione".

In her **note 11**, Capriotti Vittozzi writes: "Ciampini 2004, 165". - For the *verbatim* quotation from Ciampini; cf. *infra*, at n. 467, in Chapter IV.1.

**Filippo Coarelli has observed that Domitian accommodated the *Tabularium principis* (the imperial archives) within that part of his Palace on the Palatine (at the later Vigna Barberini), which was very close to the *sacrarium Divi Augusti* at the *curiae veteres* (for those toponyms; cf. *infra*, in volume 3-2, at *Appendix V*; Section I., and here Fig. 73). This shows, in my opinion, likewise that Domitian tried to emulate Augustus.** The following is discussed again below in its wider context (cf. *infra*, in volume 3-2, at *Appendix IV.b.2.*)).

Cf. Coarelli (2019a, 67-72, Chapter: "Gli Archivi dello Stato"; Section: "5. *Tabularium principis*"). On pp. 67-68, Coarelli mentions the fact that this *Tabularium principis* could even be referred to as *sanctuarium Caesaris* or *principis* (by Siculus Flaccus, with n. 275), and as *tabularium Caesaris* (by Hyginus Gromaticus, with n. 276). Cf. p. 68: "Quanto al termine *sanctuarium*, si tratta di una 'sacralizzazione' degli uffici di pertinenza dell'imperatore, di cui abbiamo altri esempi (come la *sacra Moneta*) che probabilmente venne introdotta da Domiziano, da mettere in rapporto con la divinizzazione dell'imperatore, *dominus et deus vivente*".

For a discussion of the (untestified) reproach that Domitian had demanded to be called and addressed as '*dominus et deus*', as stated by Coarelli (2019a, 68); cf. *supra*, in Chapter Preamble; at Section II.

**Coarelli (2019a, 71-72) comments on the immediate neighbourhood of the *sacrarium Divi Augusti* at the *curiae veteres* and Domitian's *Tabularium principis*:**

"Veniamo così a sapere che un archivio di carattere privato esisteva fin dal periodo di Tiberio in un'area adiacente alla Vigna Barberini, dove si troverà in seguito il *Tabularium* (o *Sanctuarium*) *Caesaris*, realizzato in età domiziana: dovrebbe trattarsi [page 72] di quel "piccolo deposito di carte personali, l'archivio di gabinetto dell'imperatore" evocato da Cencetti [with n. 283]. È difficile immaginare che tale prossimità tra i due edifici possa essere casuale: sembra anzi che il *Sacrarium* abbia costituito il nucleo iniziale di quegli archivi imperiali, che si svilupparono in seguito nello stesso luogo, a partire del periodo giulio-claudio, quando viene per la prima volta documentata la loro esistenza". - In his conclusion, Coarelli (2019a, 72) mentions the fact that in this part of the Palatine, beginning with the *sacrarium* for Divus Augustus, have existed "archivi imperiali, e poi bizantini e pontifici ... La presenza nello stesso luogo e per un periodo così lungo di un'istituzione del genere attesta uno straordinario fenomeno di continuità ininterrotta, che attraversa un periodo di più di un millenio".

In his **note 283**, Coarelli writes: "CENCETTI 1953, p. 162."

As already Zarah Newby (2016, 67-68) and before her, Eve D'Ambra (1993) observed, Domitian in his *Forum/ Forum Nervae/ Forum Transitorium* used myth similarly as Augustus in his precinct of Apollo on the Palatine. The following passage is quoted in more detail *infra*, in volume 3-2, at *Appendix IV.d.2.a*):

"A similar use of myth [as on the doors of Augustus's Temple of Apollo on the Palatine] can be seen again at the end of the first century AD in the frieze from the Forum Transitorium started by Domitian, in which his patron goddess Minerva is celebrated through images of her associations with weaving and household tasks ... [page 68] ... As in the Precinct of Apollo on the Palatine, the myth celebrates the complex's patron deity but also reflects on the commissioning emperor's own regime ...".

Stefano Tortorella (1992, 99 with n. 114) has reminded us of the fact that it was - of course - Domitian, who restored the *Templum novum Divi Augusti* after that had been destroyed by the fire of AD 80, and dedicated it in AD 89 or 90. Cf. M. Torelli ("Augustus, Divus, Templum (novum); Aedes", in: *LTUR* I [1993] 145-146, Figs. 78; 79). Cf. *infra*, in volume 3-2, at *Appendix IV.d.4.b*); and *Appendix V.*; at Section I.).

See also below, at *The second Contribution by T.P. Wiseman on the questions which ancient author explicitly records that Domitian had restored the Templum (novum) Divi Augusti, and that he had dedicated this temple in AD 89 or 90.*

Cf. here **Fig. 73**, labels: CAPITOLIUM; VICUS IUGARIUS; Via del Foro Romano; site of TEMPLUM (novum) DIVI AUGUSTI; TEMPLUM MINERVAE?; GRAESOSTADIUM?; AEQUIMELIUM; FORUM ROMANUM; BASILICA IULIA; Via di S. Teodoro; VICUS TUSCUS; PALATIUM.

**This 'emulating' of Augustus, had, of course, already begun, when Vespasian in AD 69 went to Egypt.**

**Trevor Luke** (2018, 195) **writes about the importance of Vespasian's relevant decision and its consequences:** "The Augustan empire was arguably born in Egypt when Octavian completed his victory over Cleopatra and Antony ... The relationship Augustus forged between the emperor's power and Egypt subsequently found expression in Augustan monuments, images, and narratives, which celebrated Roman power over the land ruled by the pharaohs ... The *Campus Martius*, with its Egyptian obelisk - dedicated to Sol and placed near the Ara Pacis - and other Egyptian monuments and cult sites, served as a key *lieu de mémoire* of the role Egypt played in the birth of the principate [with n. 2].

A century later, during the civil war of A.D. 69, Vespasian visited Egypt to seize control of its grain supply, thus initiating a new chapter in Egypt's relationship with Rome and the use of the *Campus Martius* as a site of community memory of that relationship. Vespasian paid Isis and Serapis their due when he spent the night before his triumph in the Iseum Campense, but he did not exert much effort thereafter in the cultivation of the memory of Egypt as the place where he entered upon his empire [with n. 3, quoting: "Joseph., *BJ* 7.4"]. His youngest son, Domitian, whose passion for cultivating *aegyptiaca* in Italy and commitment to building in Egypt itself are well attested, was the Flavian emperor who chiefly promoted the miraculous origins of Flavian power in Egypt as he restored and augmented Egyptian monuments in the

Campus Martius after the fire of A. D. 80 [with n. 4]. This article explores how Tacitus, writing in the era of Trajan, reshaped the memory of Egypt in the rise of the Flavian dynasty and Vespasian's interactions with the god of the Rhakotis Hill [*i.e.*, Serapis, whom Tacitus himself identifies with Dispatēr]."

In his **notes**, Luke provides references.

For the 'Montecitorio Obelisk', brought by Augustus from Egypt, who erected it on the *Campus Martius*, where it served as the *gnomon* of a Meridian line, in order to bring Julius Caesar's calendar reform to a successful end, in addition to the references, quoted by Luke in his note 2 himself, cf. Häuber (2017, 33-122, 352-363, 388-417, 582-605, with a detailed discussion of the alleged 'Horologium Augusti', postulated by E. BUCHNER 1982). See also Amanda Claridge (2017) and Peter Heslin (2019); for all that cf. *infra*, n. 545, in volume 3-2, at *Appendix II.c*).

**Also by enlarging the *pomerium* of Rome, Vespasian had 'emulated' Augustus** (cf. *supra*, n. 199, in Chapter I.1.1.; and *infra*, at Chapter V.1.i.3.)).

**But his most important achievements were that Vespasian, a), like Augustus before him, had not only managed to end a civil war, as rightly stressed by Rita Paris (1994b, 81-83, Figs. 6; 7a-c), in her reconstruction of the *Templum Gentis Flaviae* (cf. *infra*, at Chapter V.1.i.3.a); and b) that Vespasian's reign, again as in the case of Augustus, has been called 'the return of the golden age'. Cf. Laurent Bricault (2018, 143), who write that Isis-Sothis, who is visible on Vespasian's *sestertius* (cf. here **Fig. 113**); "célèbre le retour à l'âge d'or que constitue l'avènement de Vespasien ..."** (cf. *infra*, in volume 3-2, at *Appendix II.a*)).

Besides, we should not forget, that Domitian had great part in Vespasian's just-mentioned first achievement. Rita Paris judges Domitian's *pro forma* regency, which lasted from 21st December AD 69 until October 70, as being so important for the establishment of Vespasian's reign that we could consider *that* as the reason, why Domitian was granted by the Senate in 71 a separate triumph for his actions at Rome during the absence of his father. Vespasian's reign had definitely brought peace after the civil wars, but Domitian had an important part in achieving this goal. Because 'in the most dramatic moment of the civil wars', as Rita Paris (1994b, 83) writes, 'Domitian was the only member of Vespasian's family present at Rome', and: 'Like Augustus, Vespasian - and for him Domitian - has saved the fatherland from the civil wars'. For a discussion of the reasons, why Domitian had been granted this triumph; cf. *infra*, in volume 3-2, at *Appendix I.c*). For further discussion of this point; cf. *supra*, in Chapter *Preamble*; Section III.; at point 2.)

For Augustus' reign, which has been described in antiquity and by modern commentators as 'golden age'; cf. Häuber (2017, 44 n. 18, p. 49 n. 47, pp. 341-342 with n. 95, pp. 362-363 with ns. 182, 183).

**There was also a third point, in which Vespasian emulated Augustus: namely the fact that contemporary poets praised both emperors for having c) founded a dynasty, which would hopefully guarantee peace for the future to come.**

I have elsewhere quoted the relevant hope, expressed by Ovid (cf. C. HÄUBER 2017, 380, 526):

"... this is precisely the hope expressed by Ovid ... a remark related to the consecration of the *Ara Pacis Augustae*: "You priests, add incense to the flames at the rites of Peace, and let the white victim fall, its brow well soaked. Ask the gods, who incline to pious prayers that the house [meaning the *Domus Augusta*, the family of Augustus] which guarantees her may last long years with Peace" (Ovid, *Fasti* 1.719-22, translation: T.P. and Anne Wiseman 2011)". Cf. the "Comments" by T.P. Wiseman (p. 722 in the same volume).

That Augustus' relevant achievement was emulated by Vespasian, is clear from Flavius Josephus' account of Vespasian's *adventus* into Rome in the first half of October AD 70, discussed in more detail below (cf. *infra*, at Chapter VI.3.). I anticipate in the following the conclusion: 'As we have seen above, Flavius Josephus (*BJ* 7,4,1, in the translation of H.St. Thackeray 1928), ended his enthusiastic description of Vespasian's

overwhelming reception at the City of Rome in October of AD 70 with a formulation that sounds at least in part very similarly:

"... The crowds then betook themselves to festivities and, keeping feast by tribes and families and neighbourhoods, with libations prayed God that Vespasian might himself long be spared to the Roman empire, and that the sovereignty might be preserved unchallenged for his sons and their descendants throughout successive generations. And, indeed, the city of Rome, after this cordial reception of Vespasian, rapidly advanced to great prosperity".

As mentioned ... [in Chapter V.1.i.3.], where the entire passage (*BJ* 7,4,1) is quoted, Flavius Josephus wrote his Book on the 'Jewish War', which he finished in AD 81, at the order of Vespasian and Titus (cf. *supra*, n. 201, in Chapter I.1.1.). - This means that the above quoted passage had certainly been approved by Vespasian himself, or else by Titus'.

In addition to this, there is even another, and in addition to this truly grandiose building project, with which Vespasian intended to emulate Augustus. I have written elsewhere: "Vespasian erected an amphitheatre [*i.e.*, the Colosseum], because already Augustus had (obviously in vain) planned to build one". See the "translation of Suetonius (*Vesp.* 9.1) by J.C. Rolfe (1914; 1920): "He [Vespasian] also undertook new works ... also an amphitheatre in the heart of the city, a plan which he learned that Augustus had cherished"". For both quotations; cf. Häuber (2017, 334).

I have remarked elsewhere about the Colosseum: "Amanda Claridge writes about the Colosseum: "In antiquity it was a theatre of ritual death, witnessed by the emperor, Vestal Virgins, and senators, in company with a segregated microcosm of the rest of male Roman society" [with n. 125]. Zanker writes: in the Colosseum, "Through this strict ordering of seating and clothing the Roman citizenry could experience itself as a structured and class-based collectivity. The emperor sat in the most prominent position in his lodge ... visible to all" [with n. 126]. Cf. Häuber (2014a, 706, Chapter: "B 25.) The iconography of the bust of Commodus as Hercules Romanus").

In my **note 125**, I wrote: "Claridge 1998, p. 278, Ead. 2010, p. 314".  
Cf. **note 126**: "Zanker 2010, p. 70".

Although also Domitian's building phase of the *Amphitheatrum Flavium* is of great importance, I have decided not to repeat the results of my earlier research on the Colosseum in this *Study*.

Cf. Häuber (2017, 21, 164, 325-337 with Fig. 5.4 on p. 139 [= here **Figs. 89; 90**]): the relief from the tomb of the Haterii, representing buildings in Rome); this account discusses the following subjects:

*a)* the new hypotheses, suggested by Klaus Stefan Freyberger *et al.* (2016a; *id.* 2016b) concerning the buildings visible on the relief from the tomb of the Haterii (cf. here **Figs. 89; 90**) that, as was hitherto believed, and as I myself likewise confirm, represents Flavian buildings and monuments at Rome, *inter alia* the Colosseum. Cf. Häuber (2014a, 415, 170 with n. 178; cf. p. 794: **there I have suggested that relief from the tomb of the Haterii (here Figs. 89; 90) may have been created under Domitian, and if so, documents what this part of Rome looked like at his time.**

Freyberger *et al.* suggest instead that all these buildings visible of the relief (here Figs. 89; 90) date to the Augustan period;

*b)* the Amphitheatre of Statilius Taurus;

*c)* the hypothesis of Freyberger *et al.* (2016a; *id.* 2016b), according to which the Colosseum was not erected *ex novo* by Vespasian, but should rather be identified as the Amphitheatre of Statilius Taurus instead, which Vespasian merely restored.

After this Chapter was written up to this point, Eric M. Moormann was kind enough to send me on 2nd July 2020 his forthcoming article on the *Templum Pacis* ("Some Observations on the Templum Pacis - a Summa of Flavian Politics"), from which emerges that Vespasian also with the conception of his *Templum Pacis* had aimed at emulating Augustus.

**Moormann (2022, 129) writes about Vespasian's *Templum Pacis* : "Begun by Vespasian in 71 CE as a triumphal remembrance of the reach of power and the 'pacification' of Judaea, the Templum Pacis or, as Procopius called it, Ἀγορά or Φόρος Εἰρηνησ was completed as soon as 75. [with n. 8] It would be embellished and enlarged during the reign of his second son, Domitian, from 81 onwards: Domitian installed a library as one of the main additions realised by him, so the complex in its final state can be considered a Domitianic project as well. Vespasian wanted to underline that the *pax* venerated here was a military peace, which had found its culmination in the victory over Judaea and other liminal areas of the Empire. In this way he created a peace monument similar to Augustus' Ara Pacis Augustae, be it on a much grander scale. [with n. 9; my emphasis]"**.

In his **note 8**, Moormann writes: "Joseph. *BJ* 158-162; Dio Cass. 66.5.1; Procop. *Goth.* 8.21.12. See Miles (2008) 263-5".

In his **note 9**, he writes: "See Goldman-Petri (2021) 45-46 for this comparison worked out more extensively". We thus learn from Moormann (2022, 129) that Vespasian, also with the design of his *Templum Pacis*, was deliberately emulating Augustus. Concerning this fact, Moormann (2022, 129) himself observes:

"In this way he [*i.e.*, Vespasian] created a peace monument similar to Augustus' Ara Pacis Augustae, be it on a much grander scale". And Moormann's additional remark: "Vespasian wanted to underline that the *pax* venerated here was a military peace", reminds us of Augustus's (RG 13) own famous line: *parta victoriis pax* ('peace through victory'), which has been discussed by John Pollini (2017b, 124 with n. 118; cf. *infra*, in volume 3-2, at *Appendix IV.c.1.*).

The above-quoted passage from Moormann (2022, 129) will be discussed and quoted in more detail *infra*, in volume 3-2, at *Appendix IV.d.4.b.*

### II.3.2. *Nerva's adoption of Trajan in late October or at the beginning of November AD 97 and the consequences which this had for the monument (an arch?), built by Domitian, that contained the Cancelleria Reliefs*

According to Arthur Stein's account (cf. *supra*, n. 343, in Chapter II.3.1.a)), at about the same time in October of AD 97, when Nerva received the message concerning the victory over the *Suebi* in Pannonia, Nerva realized that without the support of Trajan, he himself could not possibly survive his difficult political situation. He came to an agreement with Trajan that resulted in his adoption of the man "whom he had previously appointed governor of Upper Germany, as his son, co-emperor, and successor" (J.B. CAMPBELL; cf. *supra*, n. 322, at Chapter II.1.e)).

As already quoted before, Barbara Levick is more outspoken in her characterization of the situation: "L'uccisione di Domiziano nel 96 non fu seguita da una guerra civile ma da un rapido passaggio a un senatore debole anziano, sovrano *ad interim*, Marcus Cocceius Nerva (96-98), a cui subentrò senza difficoltà un uomo d'armi, Marcus Ulpius Traianus (98-117), secondo un processo che può essere interpretato come un colpo di stato senza spargimento di sangue" [B. LEVICK 2009, 14, cf. *supra*, at n. 332, in Chapter II.2.].

Kienast, Eck and Heil<sup>350</sup> provide a more precise date for Trajan's adoption: 'end of October AD 97'. They too cannot provide the exact date of this victory over the *Suebi* in Pannonia but only the information that both Nerva and Trajan adopted the title *Germanicus* in November of 97 AD, which they both received because of this same victory.

For the problem involved in defining the precise date of Trajan's *dies adoptionis*; cf. *The fourth Contribution by Peter Herz* ("Wann wurde Trajan von Nerva adoptiert?"), who comes to almost the same result as Kienast, Eck and Heil (*op. cit.*): 'at the end of October or at the beginning of November AD 97'.

Since we know now that both, Nerva and Trajan, received the title *Germanicus* for the same victory in Pannonia in November of 97, the following scenario seems to be possible. Because it had been Nerva's own clever decision to resolve his precarious political situation by adopting Trajan, I can also imagine that the emperor was prudent enough to abandon his unfortunate project to re-dedicate Domitian's arch into a triumphal arch of himself - if indeed this is true at all. Nota bene, what we know for sure is only that Nerva had intended to re-dedicate this Domitianic monument, which contained the Cancelleria Reliefs, to one that celebrated his own achievements. If this monument was indeed an arch (cf. here, in Chapters I.3.; V.1.d)), and considering the emperor's weak political position at the end of 97, Nerva would have made a complete fool of himself by demanding a (triumphal) arch to be dedicated to himself at this very moment. No one else will have known this better than Nerva, a man, who, after all, had been a close advisor to all emperors before him since Nero. I therefore believe that it was the Emperor Nerva who, in 97, as a nod to Trajan, abandoned the project by giving the order to destroy this Domitianic arch (that contained the Cancelleria Reliefs, on one of which, Frieze A, at that stage, the face of Domitian had already been recut into that of himself). But as we shall see in a minute, there was presumably a much more serious reason, that may even have forced Nerva to abandon this project (cf. *infra*).

If that scenario is true, this could also explain, why the reworking of Nerva's face on Frieze A was not yet finished when the Cancelleria Reliefs were destroyed. This was because of the following reasons.

The military campaign which Nerva's *profectio* on Frieze A refers to (if that is, what Nerva had in mind, when ordering the recutting of the face of Domitian on Frieze A into his own), had resulted in a Roman victory, of which Nerva was informed 'at about the same time, when he adopted Trajan' (so STEIN). Neither the precise date of this victory, nor the date, when the relevant message reached Nerva, are known. What we do know from Stein is that Nerva received the second acclamation as *imperator* because of this victory, but

---

<sup>350</sup> cf. *supra*, n. 56, in Chapter I.1., n. 202, in Chapter I.1.1.; and n. 344 in Chapter II.3.1.a).

Stein could not provide a precise date for that event either, and Kienast, Eck and Heil<sup>351</sup> only write, that Nerva received the title "imperator II" in 97. The adoption of Trajan occurred at the end of October (or at the beginning of November) 97, and likewise in November 97, both Nerva and Trajan accepted the title *Germanicus* for this victory in Pannonia. But Campbell (cf. *supra*, n. 322, in Chapter II.1.e)) writes: "His [*i.e.*, Nerva's] own title *Germanicus*, granted for a minor victory over the Germans in Bohemia [*corr.*: Pannonia] was conferred to Trajan".

By reading the chronology of events, as described and commented upon by those scholars, it seems reasonable to conclude that it was first only Nerva, who had adopted the title *Germanicus* for this victory in Pannonia, and that, as a consequence of Nerva's adoption of Trajan at the end of October (or at the beginning of November) 97, as his son, co-ruler and successor, Nerva had decided (or had agreed upon) that Trajan should likewise receive the title *Germanicus* for the same victory. The fact that Trajan accepted this title (cf. *supra*, n. 323, in Chapter II.1.e)), proves that this was in his own interest.

Also when looking at the Cancellaria Reliefs, we come to basically the same result. Given the fact that on Frieze A the face of the emperor had already been recut into a portrait of Nerva, before the friezes were intentionally destroyed, and further assuming that Nerva wished to refer with the representation on Frieze A to 'his own' victory in Pannonia in 97, it is reasonable to conclude the following. Nerva must have received the message of this victory in Pannonia *before* he adopted Trajan, and *before*, as a consequence of this adoption - as I believe - also Trajan had officially been credited with the title *Germanicus* for the victory in this campaign. As we have seen above, Nerva, at this critical moment of his reign, had no other choice than adopting Trajan. As a consequence of this decision at the end of October (or at the beginning of November) 97, Nerva, in my opinion, could not possibly any longer attribute this military triumph in Pannonia to himself alone, since the "uomo d'armi" (so B. LEVICK 2009, 14), the 'military man' in this new team of co-Emperors, Nerva and Trajan, was of course Trajan. At least according to Trajan's propaganda.

But this new alliance - of Nerva with Trajan - which literally 'saved' Nerva in this precarious moment of late October (or at the beginning of November) 97, caused insurmountable factual and 'artistic' problems in regard to the Cancellaria Reliefs: 1.) on Frieze A is represented only one emperor - not two - who is shown in the ceremonial *profectio* for this war; 2.) the fact that the slabs, used for the carving of the Cancellaria Reliefs, are extremely thin, prevents potential corrections to be made by simply cutting the relief scenes 'deeper'. I therefore suggest that Nerva, *nolens volens*, or (depending, on how well he actually got along with Trajan), even Nerva, *together with* his 'son, co-emperor and co-victor' Trajan, must have ordered the destruction of 'his triumphal arch' himself. - And that the (here assumed triumphal) arch, at the very beginning of Nerva's relevant plannings, was presumably supposed to celebrate *only his own* (*i.e.*, Nerva's) victory in Pannonia.

There are still some more problems that we should consider. The first concerns Frieze B, the second relates to some historical facts. We will now turn to both.

Since I believe that Frieze B still preserves the first, Domitianic carving phase, showing the portraits of the Emperor Vespasian and his son Domitian, it follows that Nerva had not been able to figure out, how the faces of the two protagonists on Frieze B could be recut into two individuals that would celebrate one of his own (*i.e.*, Nerva's), and *only his*, achievements. Now that Trajan, since late October (or since the beginning of November) 97, was Nerva's son, co-Emperor and co-victor, Nerva, in the few remaining months of his life and reign, in my opinion, could only have planned subjects to be represented in such a state relief that reflected the *gestae* of himself and his co-Emperor - together.

Therefore also the peculiarities of those two main figures on Frieze B must have caused problems for a possible re-use of this scene by the co-Emperors Nerva and Trajan. Provided, they would have wanted to use this panel, by recutting the heads of those figures into portraits of themselves, in an analogous scene, this would have been impossible. In theory, they could have thought of representing in this state relief the

---

<sup>351</sup> cf. *supra*, n. 344, in Chapter II.3.1.a).

*adventus* of Trajan into Rome, staged after the, seen in retrospect, very important historical event that Nerva had adopted Trajan as his son, co-Emperor, and successor. - This is at least what nowadays historians regard as Nerva's most important achievement during his reign (!).

Such an *adventus* could have been celebrated at the moment, when Trajan, after his adoption, had come back to Rome for the first time. But for an *adventus* of Trajan into Rome, received by Nerva, Frieze B could not have been used, because that would have meant recutting the face of the receiving part on Frieze B, the togate youth, in my opinion the on 24th October AD 70 19 years-old Domitian, into the portrait of Nerva who would have been almost 67-year-old in October of AD 97. And the face of the received person, the portrait of Vespasian, who was 61 years old in AD 70 should have been recut into the portrait of Trajan, who in October of AD 97 was 44 years old. Besides, such a possible re-use of Frieze B by the co-Emperors Nerva and Trajan is already therefore impossible, because we know that Trajan, after his adoption by Nerva in late October (or at the beginning of November) 97, only came back to Rome for the first time 'circa October 99'. This means, that father and son - Nerva and Trajan - never met again during Nerva's lifetime (cf. *supra*, ns. 322, 323, in Chapter at II.1.e)). To this I will come back below.

Besides, Frieze B could not even have been used by Nerva as an *adventus* of himself, should he actually at first have had in mind to re-use this Domitianic structure, possibly a (triumphal) arch, into one that celebrated his own victory in the *bellum Suebicum* - and only *his* victory. The reason being that Vespasian on frieze B is clad as a civilian, is crowned by *Victoria* not with a laurel wreath, but with an oak wreath, and worst of all: he is not accompanied by his army. - As we will learn below from Rita Paris (1994b, 81-82, quoted *verbatim infra*, in Chapter V.1.i.3.a) and here Fig. 33), the 'worst' insurmountable fact, why Nerva could not possibly use Frieze B for himself, turns out to be another iconographic detail, namely the *corona civica*, with which *Victoria* is crowning this homecoming emperor - Vespasian. Because by choosing precisely that crown, Vespasian had been honoured for having ended a *civil* war.

Therefore Frieze B was perfectly tailored to Vespasian's real situation at the represented moment in AD 70 (cf. *infra*, in Chapters V.1.c); V.1.i.3.); V.1.i.3.a)), whereas none of his successors could possibly have re-used this panel for one of his own 'normal' military *adventus* into Rome, because the iconography, depicting 'an emperor, who comes back from an 'ordinary' victorious campaign' differs considerably from that.

If my scenario is true, we can now approximately date Nerva's order to recut Domitian's face on Frieze A into his own portrait. If the represented scene was indeed supposed to celebrate the victory that had earned him the title *Germanicus*, as is suggested here, Nerva's relevant order can only have been given within the short time span between the arrival of the message of this victory in Rome and the 'almost contemporary' (so STEIN) adoption of Trajan by Nerva at the end of October (or at the beginning of November) AD 97. We should, therefore, consider the possibility that the second carving phase of the Cancelleria Reliefs, ordered by Nerva, may have lasted for only a few weeks, or even for only a couple of days. In other words: Nerva's order to recut Domitian's face on Frieze A into a portrait of himself most probably occurred shortly before the end of October (or the beginning of November) 97, when the emperor adopted Trajan.

As I only found out after this *Chapter* was written, the scenario I have suggested here had actually been corroborated a long time ago by data published by Simon (1985)<sup>352</sup>. In her discussion of Frieze A of the Cancelleria Reliefs, she is of the opinion, that it shows Domitian's *adventus* into Rome after his victory in the Sarmatian War (AD 93). She also discusses the precise chronology of the events discussed above that are connected with Nerva's adoption of Trajan - only that the dates Simon suggested have in the meantime been proven to be wrong:

"Fries A: Virtus Principis ... Auch an meiner Ergänzung des linken Friesendes mit dem thronenden Iuppiter Capitolinus halte ich fest [with n. 55], sowie an der Datierung des domitianischen Adventus auf das Jahr 93,

<sup>352</sup> E. SIMON 1985, 554-555, who refers back to E. SIMON 1960, 139-145 with Fig. 4 (cf. *infra*, at n. 427, in Chapter III.. For SIMON's discussion of the Cancelleria Reliefs, cf. also *supra*, at n. 181, in Chapter I.1.; and n. 232, in Chapter I.2.

die Rückkehr vom Sarmatenkrieg [with n. 56]. Nur in der Deutung der Idealgestalt hinter dem Kaiser weiche ich, wie schon erwähnt, heute ab (Abb. 7). Sie ist mit Sicherheit nicht Roma, sondern Virtus [with n. 57].

Wie seiner Zeit von mir dargelegt, zeigt Fries A eine seit Augustus (res gestae 4) von den Kaisern wiederholt vollzogene Handlung: Die Weihung von Lorbeer als Zeichen der siegreichen Vollendung eines Feldzuges an Iuppiter Capitolinus. Sie ist nicht nur für Nero und Domitian [with n. 58], sondern auch für Nerva nach dem *bellum Suebicum*, das der Statthalter Pannoniens glücklich beendet hatte, überliefert [with n. 59]: Am 27. Oktober 97 [this is not true, see below], am selben Tage, an dem Nerva den Trajan in dessen Abwesenheit feierlich auf dem Kapitol adoptierte, legte er den aus Pannonien gesandten Lorbeer dem Iuppiter Capitolinus auf den Schoß. Diese Handlung wurde, wie Plinius in seinem Panegyricus berichtet, als gute Vorbedeutung für die am selben Tag und Ort vollzogene Adoption des Trajan angesehen.

Nach alledem ist die Annahme von M. Bergmann, die neue Situation des umgearbeiteten Frieses A lasse sich »nicht auf eine reale kriegerische Aktion Nervas beziehen« [with n. 60], zu modifizieren. Auch wenn ein Kaiser nicht persönlich in den Krieg zieht, findet der Feldzug unter seinen Auspizien statt, der Sieg ist der seine [with n. 61].

Die dem Nerva in Fries A voranschwebende *Victoria* bringt dem Iuppiter den pannonischen Lorbeerkranz. Nerva naht sich betend dem Gott, Virtus drängt ihn voran. Sie ist das zentrale Thema des Frieses A ... Aus dem Adventus des Domitian vom Sarmatenkrieg wurde durch die Umwandlung des Porträts der Gang des Nerva zum Kapitol, um den mit frischem Siegeslorbeer geschmückten höchsten Staatsgott zum Zeugen der Adoption seines Nachfolgers zu machen. **So gesehen dürfte Fries A nicht nur für Nerva, sondern auch für Trajan von höchster Bedeutung gewesen sein** [my emphasis]."

In her **note 55**, Simon wrote: "Verf. [Verfasser] [1960] 140 ff. ...".

In her **notes 56** and **57**, she provided references.

In her **note 58**, she wrote: "Suet. Nero 13 and Dom. 6; vgl. [vergleiche] Verf. [Verfasser] [1960] 149".

In her **note 59**, she wrote: "Quellen in RE Suppl. X (1965) 1042 s.v. M. Ulpius Traianus (Hanslik)".

In her **note 60**, she wrote: "Bergmann 31 [*i.e.*, M. BERGMANN 1981, quoted *verbatim supra*, n. 338, in Chapter II.3.1.a)]".

In her **note 61**, she wrote: "Vgl. [vergleiche] Tac. ann. 2,22 und 2,41: dazu E. Simon, Kölner Jb 9, 1967/68, 17".

Concerning Simon's last remark, I do not agree with her, since I follow those scholars, who interpret Frieze A as the representation of a *profectio* instead - first of Domitian, now of Nerva (cf. *infra*, at Chapter III.). Provided, that should be true, in Nerva's case it is only possible to see in Frieze A the depiction of Nerva's *profectio* to the *bellum Suebicum*, that, in reality, the governor of Pannonia had victoriously fought for Nerva, and for which, as we likewise know, both Nerva and Trajan had received the title *Germanicus*.

Contrary to Simon's (1985) above-quoted assumption, Trajan even consciously distanced himself from Nerva, as we have learned above from Markus Handy (2015, 40 with n. 124, p. 45).

Cf. *supra*, in Chapter *Preamble: Domitian's negative image*; at Section I.

But also Handy's assumption is not true. I, therefore, anticipate a passage, written for *infra*, in volume 3-2, at *A Study on the consequences of Domitian's assassination ...*; at Chapter VI.1.:

'D.C.A. Shotter (1983, 225) states: "**Trajan's accession issue [*i.e.*, the coin here Fig. 140] shows Nerva handing Trajan a globe with the legend PROVID P M TR P COS II** [with n. 67; my emphasis]". Cf. p. 226: "Nerva's memory in Trajan's reign was correctly observed. **Trajan assumed Nerva into his nomenclature: indeed, his portrait on his early coins** [cf. here Fig. 4] **passes through as "Nerva" phase** [with n. 68; my emphasis] ...

By issuing the coin (here Fig. 140), which celebrates his adoption by Nerva, Trajan showed his gratitude towards his adoptive father and predecessor - to whose facial traits Trajan's portrait has even been assimilated on this coin (!). This conclusion seems to be inevitable and is in so far a surprising result as scholars often stress Trajan's lack of gratitude in regard to Nerva; cf. C.C.A. Shotter (1983, 225) ...'.

Let's now return to our main subject.

Thanks to Simon (1985 cf. *supra*, n. 352), we know now also that Nerva, on 27th October AD 97 - had contemporaneously - a) dedicated the Pannonian laurel wreath, sent to him from Pannonia as a sign of his victory, to *Iuppiter Optimus Maximus Capitolinus*, and b) had adopted Trajan as his son, co-Emperor and successor.

As I only found out much later by discussing the matter with Peter Herz, Simon (1985), by asserting that '27th October AD 97' had been Trajan's *dies adoptionis*, had followed an earlier opinion. This has since a very long time been superseded: the precise date 'in late October or at the beginning of November AD 97', when Nerva adopted Trajan, is unfortunately unknown. See below, at *The fourth Contribution by Peter Herz : Wann wurde Trajan von Nerva adoptiert?*

Because, according to this political propaganda, both Nerva and Trajan had won the *bellum Suebicum* 'together', it is, in my opinion, reasonable to conclude, that on Frieze A, which now depicted the *profectio* to this same war, Nerva and Trajan should likewise have been represented together as leaving for this war. And because Trajan does not appear on Frieze A, I do not believe, contrary to Simon (1985, 555), that Trajan could have felt the way she suggests in the above-quoted passage: that frieze A: "auch für Trajan von höchster Bedeutung [war]" ('that Frieze A [was] also for Trajan of the greatest importance').

Viewed from an iconographical perspective, Trajan, in theory, could have seen Frieze A in the same form as it is still preserved, when, after his adoption in late October (or at the beginning of November) of AD 97, and being now himself co-Emperor, he would have returned to Rome for the first time: Frieze A shows the *profectio* to the *bellum Suebicum*, for which Trajan (together with Nerva) had received the title *Germanicus* in November 97. The original face of the Emperor Domitian is recut into that of Nerva - but there is not a trace of Trajan. - Besides, when Trajan actually came back to Rome for the first time after his adoption by Nerva, 'circa in October of AD 99', Nerva had died in the meantime and Trajan was now sole emperor.

Most significant in this context seems to me the fact that the recutting of Domitian's face on Frieze A into Nerva's portrait had not been finished. This has already been explained above by the assumption that the time span between the date, when the message of the victory in the *bellum Suebicum* had reached Nerva, and the date of Trajan's adoption in late October or at the beginning of November 97, must have been very short. On that day, Nerva had dedicated the laurel wreath, the token of his victory in the *bellum Suebicum* in Pannonia, to *Iuppiter Optimus Maximus Capitolinus*, and had also adopted Trajan - who was at that stage the governor of Upper Germany and did not come to Rome to attend the ceremony of his adoption on the Capitol.

Within this time span of possibly only a couple of weeks or even days since late October (or the beginning of November) 97, Nerva had commissioned the recutting of the friezes, because he, at least according to my hypothesis, had intended at first to re-dedicate Domitian's arch into a (triumphal) arch of only himself, whereas in late October (or at the beginning of November) 97, or at the latest, on that day in November 97, when both Nerva and Trajan received the title *Germanicus* for the same victory in the *bellum Suebicum*, Nerva had then ordered to stop that work, because Trajan was now not only his co-Emperor, but also his co-victor, which meant that the re-cutting of both Cancellaria friezes had to consider both emperors. We may add that Nerva had possibly ordered to interrupt those works, in order to discuss the matter with Trajan in person, as soon as the latter would be back in Rome. Whether or not Nerva, after those important political changes had occurred, had already made relevant new plans for the building that contained the Cancellaria Reliefs, we cannot know, because only three months later the emperor was dead.

On the other hand, Nerva, being an experienced politician, and, after all, a man who was not in good health throughout his reign, must himself have realized that the scenes on the two Cancellaria Reliefs could not possibly be used to document *gestae*, conducted by himself *together* with Trajan in the period of their joint reign that had begun in late October (or at the beginning of November) 97. Although the most important difficulty, in my opinion, lies in another fact: both friezes celebrate the martial prowess of *one* emperor, not of *two*.

In this context, I repeat, what was already similarly said above (cf. *supra*, in Chapter I.3.2.):

‘Talking about the martial prowess that is allegedly represented here in the case of Domitian (now Nerva) on Frieze A, and of Vespasian on Frieze B. At first glance the latter seems to be a wrong assumption, considering that *Victoria* does not crown Vespasian with a laurel wreath, but instead with an oak wreath, and because the emperor is not accompanied by members of his army. I am nevertheless convinced that this is true and will discuss this point in more detail below (cf. *infra*, at Chapters V.1.i.3.); VI.3.). - As I only learned from Rita Paris (1994b, 81-82, quoted *verbatim infra*, in Chapter V.1.i.3.a)), the *corona civica* was, contrary to what I knew before, the highest ranking military decoration’.

I find it difficult to imagine that Trajan, after Nerva's death, could have destroyed the building in question, that, after all, comprised on Frieze A a portrait of his adoptive father Nerva (recut from the original face of Domitian). Because we now know that the Cancellaria Reliefs had been brought to the deposit of the ‘Second sculptor's workshop’ by circa AD 120 at the latest, or by circa AD 150 at the latest (cf. *supra*, in Chapter I.3.1., and *infra*, in Chapter V.1.a)), I maintain my above suggested hypothesis, that it was most probably Nerva himself, who ordered the destruction of the building that contained the Cancellaria Reliefs.

**II.3.3. The Cancellaria Reliefs (cf. here Figs. 1; 2), the panels of the Arch of Trajan at Beneventum (cf. here Fig. 46) and the importance of the hierarchy of scale**

As already said in Chapter II.3.2.), Trajan, after his adoption by Nerva, had only come back to Rome 'circa in October of AD 99'. Considering the fact that both friezes of the Cancellaria Reliefs are even now still unfinished, we must assume, provided the relevant building was still standing at the time, that, at Trajan's arrival at Rome in 99, Nerva's relevant building project therefore was likewise unfinished. Because Nerva had already died on 27th (?) January 98 (so D. KIENAST, W. ECK and M. HEIL 2017, 114), I find it difficult to believe that Trajan, at that stage, could have had an interest in pursuing Nerva's (unfinished) project to re-use the Domitianic building, that contained the Cancellaria Reliefs, a project, presumably come to a stop shortly after Nerva had adopted Trajan.

Interesting in this context is a comparison with the Arch of Trajan at Beneventum (cf. here Fig. 46), to which we will turn below. On this monument, although being composed of many relief panels, a scene that might refer to the fact that Trajan had been Nerva's co-Emperor is conspicuously missing. This arch was erected in AD 114-118 by the Roman Senate in honour of Trajan, but its political programme had certainly been discussed with the emperor (as long as he was alive). To borrow Simon's above quoted idea (cf. E. SIMON 1985, 554-555, quoted *verbatim supra*, at n. 352 in Chapter II.3.2.): neither on his Arch at Beneventum did Trajan express his pride in having been adopted by Nerva. Only the inscription in which the Senate dedicated this arch to Trajan, repeated on both attics of this arch, refers to this fact by quoting Trajan's official title: '... DIVI NERVAE FILIO ...' (cf. *infra*, n. 360, and here Fig. 46).

**Fig. 46. Beneventum, Arch of Trajan, built AD 114-118, general view of 'city side'.**

Left and right panels in the attic of the Arch of Trajan at Beneventum ('city side'). We see "Jupiter in the company of other important state gods [who] extends his thunderbolt to Trajan, his viceregent on earth - a gesture of divine approbation to rule and to conquer on behalf of the Roman People"; cf J. Pollini (2012, 105, with Figs. II.39b-c). On the right hand side panel appear the togate Emperor Trajan, a bearded and cuirassed man to his left (*i.e.*, in front of him), who has the same size as Trajan, and further to the left two adult *togati*, all standing in front of an arch. G. Koeppel (1969, 188-189, Fig. 15) suggested that the two *togati*, who are represented at the scale of children, are the two *consules* of Rome, who receive Trajan outside the *pomerium* of Rome to tell him that the Senate has granted him the celebration of a triumph. Koeppel compared this relief with Vespasian and the togate youth (in his opinion Domitian) on Frieze B of the Cancellaria Reliefs (cf. here Fig. 2; Figs. 1 and 2 drawing: figures 14 [Vespasian]: 12 [Domitian]).

D.E.E. Kleiner (1992, 228, Fig. 193) and A. Schmidt-Colinet (2005, 108-112, Abb. 9a; 9b) suggest that the bearded and cuirassed man to the left of Trajan may be identified with Hadrian.

Right hand side panel in the attic of the Arch of Trajan at Beneventum ('city side'). Detail, showing the head of the bearded and cuirassed man, identified by Kleiner (1992) and Schmidt-Colinet (2005) as Hadrian.

Right hand panel in the middle register of the Arch of Trajan at Beneventum ('city side'), where the adult male figures are differentiated by *three* different scales. The tallest figure is the togate Emperor Trajan on the right, who is accompanied by some of his lictors of almost the same size. In front of Trajan appears a man, who is smaller than Trajan and his lictors. He seems to have guided the three men on the left to Trajan, two of them are togate; compared with the emperor, these men reach only up to his chest, as if they were children. Cf. H.R. Goette (1990, 130 cat. Bb9 Benevent, Trajansbogen, Taf. 16,2).

Left and right panels in the lowest register of the Arch of Trajan at Beneventum ('city side'). They "depict two parts of the same scene, which has been identified as the *adventus* into Rome of Trajan as the new emperor in 99. The togate emperor stands before the entrance to the city, surrounded by a full contingent of twelve lictors, and guided by the warden of the city (*praefectus urbi*). The Genius Senatus and the Genius Populi Romani ... are there to greet him"; cf. D.E.E. Kleiner (1992, 227).

Cf. H.R. Goette (1990, 130 cat. Bb9 Benevent, Trajansbogen, Taf. 15.3,4).

All photos: Courtesy H.R. Goette (5th and 6th February 2017).

There may be still another reason, that will be discussed in the following, why this Domitianic monument containing the Cancellaria Reliefs did not survive until the Trajanic period. I am referring to the fact that the togate youth on Frieze B and the Emperor Vespasian (here **Fig. 2**; **Figs. 1 and 2 drawing**; **figures 12** [Domitian]; **14** [Vespasian]), who stands in front of the youth, are not designed according to a hierarchy of scale. According to such rules, the togate youth on Frieze B must be the emperor's equal. That would fit for the assumption of recognizing Domitian in this youth, as is suggested here. But it would *not* fit the alternative suggestions, made by those scholars, who have denied that this young man may be identified as Domitian.

As we have seen above, Bergmann not only suggests that the togate youth on Frieze B does not represent Domitian<sup>353</sup>, but also, that the head of this figure is not a portrait at all. Because of the simple *calcei*, this youth is wearing, she, following Rumpf, has rejected Magi's proposal to identify the togate youth with Domitian. Because he is not wearing a (golden) ring, she also denies that he may be identified as a high ranking Roman magistrate<sup>354</sup>; Bergmann's hypotheses have been followed by many scholars (for a detailed discussion, cf. *supra*, in Chapters *I.1.*; *I.1.1.*; and *infra*, at Chapter *V.1.h.1.*). Hölscher<sup>355</sup>, although following Bergmann in some other respects, for example in so far, as he too does not identify the youth's head as a portrait, nevertheless assumes that it is perfectly possible to identify the young man as a high ranking magistrate. Hölscher follows Bergmann<sup>356</sup> also in assuming that on Frieze B, in Nerva's alleged second carving phase of this panel, the original head of Domitian had been recut into the still extant head of Vespasian. As for the original subject matter of Frieze B, Hölscher suggests that we witness Domitian's *adventus* into Rome in AD 81. The author thus assumes that the scene represents Domitian, about to arrive at Rome, who comes straight away from *Aquae Cutiliae*, where he has left behind his dying brother Titus, in order to secure his own accession to the throne.

Hölscher writes: "Il più importante *adventus* di Domiziano a Roma ... fu il suo arrivo all'inizio del suo regno. Nell'81 d.C., per assicurarsi il potere nella capitale, aveva lasciato il fratello Tito sul letto di morte ad *Aquae Cutiliae* ... Alla luce di tale premessa, la scena [on Frieze B] trasmette un'interpretazione molto plausibile di siffatto evento cruciale. Domiziano dovette essere accolto allora da Senato e popolo, rappresentato dai due Geni, nonché dal *Praefectus urbi* riconoscibile nel togato davanti a lui; considerata l'appartenenza di quest'ultimo al ceto equestre, se ne spiegano le scarpe semplici"<sup>357</sup>.

As we have already seen above, Hölscher's interpretation of Frieze B is not possible<sup>358</sup>. To this I will come back below (cf. *infra*, at Chapter *III.*)

Trajan's Arch at Beneventum shows comparable scenes: here a man, whom Kleiner and Koepfel have identified as the *praefectus urbi*<sup>359</sup> (cf. here **Fig. 46**), and who has the same proportions as the emperor, guides Trajan in the ceremony of the emperor's *adventus* into Rome (in AD 99), in another relief, two togate men meet the emperor, but they, as also several other figures on those reliefs, are both represented as being much smaller than Trajan.

<sup>353</sup> M. BERGMANN 1981, 1981, 20, 22, 24 with ns. 19-22, pp. 25-29 (cf. *supra*, n. 89, in Chapter *I.1.*).

<sup>354</sup> M. BERGMANN 1981, 26-29; p. 27 (quoted *verbatim supra*, n. 122, in Chapter *I.1.*).

<sup>355</sup> T. HÖLSCHER 2009a, 56, 58 (cf. *infra*, at Chapter *III.*).

<sup>356</sup> M. BERGMANN 1981, 22, 24, 25. cf. *supra*, at ns. 130, 131, in Chapter *I.1.*

<sup>357</sup> T. HÖLSCHER 2009a, 58.

<sup>358</sup> for a discussion, cf. *supra*, at ns. 182-189, in Chapter *I.1.*

<sup>359</sup> so D.E.E. KLEINER 1992, 227; see her Fig. 189. So also G. KOEPEL 1969, 161 (Fig. 13), cf. pp. 162, 165 (cf. *supra*, at n. 188, in Chapter *I.1.*). For very good photographs, on which also the 'hierarchy of space' is clearly visible, cf. H.R. GOETTE 1990, 130 cat. Bb9 Benevent, Trajansbogen (Taf. 15; 16); Taf. 15.1: "nördl.[iches] Durchgangsrelief"; Taf. 15.2,3: "linkes Stadtseitenrelief unten"; Taf. 15.4: "rechtes Stadtseitenrelief unten" (Taf. 15.4 [= here **Fig. 46**] is the relief showing KLEINER's *praefectus urbi*, guiding Trajan); Taf. 16.1: "linkes Stadtseitenrelief Mitte"; Taf. 16.2 [= here **Fig. 46**]: "rechtes Stadtseitenrelief Mitte". On both reliefs appear two togate men, who are represented much smaller than Trajan; Taf. 16.1 shows the second relief, discussed by KLEINER's, depicting: "two veterans, also in togas, introduced to him [*i.e.*, Trajan] by two allegorical female figures". GOETTE's Taf. 16.2 illustrates the relief, mentioned by myself below: 'the right hand panel in the middle register of the Arch of Trajan (again 'City Side')'. Cf. J. POLLINI 2012, 105-107, Figs. II.39a-e.

The identification of the man, represented on the just-mentioned relief, as the *praefectus urbi* (cf. here **Fig. 46**) is convincing, since he is taller than the two *consules* (who appear on another relief of Trajan's Arch at Beneventum; also here **Fig. 46**), and has the same proportions as the emperor himself. He is thus aptly characterized as "the emperor's deputy at Rome" - so T.J. Cadoux and R.S.O. Tomlin ("*praefectus urbi* 'Prefect of the City', in: *OCD*<sup>3</sup> (1996) 1239, discussed in more detail below; cf. *infra*, in volume 3-2, in *Appendix I.a*), at Section I. *Introduction*.

Kleiner describes these scenes on Trajan's Arch at Beneventum as follows: "The eight panels [of Trajan's Arch at Beneventum] on the main body of the arch appear to represent major events from the principate of Trajan both in Rome and Italy and in the provinces ... The left and right panels in the lowest register of the city side of the arch (see fig. 189 [cf. here **Fig. 46**]) depict two parts of the same scene, which has been identified as the adventus into Rome of Trajan as the new emperor in 99. The togate emperor stands before the entrance to the city, surrounded by a full contingent of twelve lictors, and guided by the warden of the city (*praefectus urbi*). The Genius Senatus and the Genius Populi Romani, standing in front of the Curia Julia in the Roman Forum, are there to greet him. The scene in the upper left panel refers to the foundation of colonies by Trajan. The togate emperor with lictors meets with two veterans, also in togas, introduced to him by two allegorical female figures [cf. her Fig. 189]. What is most significant is that the two togati, both adult males, are much smaller in scale than the emperor, the artist using size to denote hierarchy ... What is significant about these panels as a whole is that they continue the Flavian tradition of depicting the interaction of human beings and divinities. And Trajan is usually represented in larger scale than the other figures in the scene - the idea of hierarchy of scale, that is, that the most important figure should be depicted as larger than the others. This is a device that has never before been used in state art but was developed on earlier coins and in the reliefs of freedmen since the Augustan period"<sup>360</sup>.

Bergmann discusses the right hand side panel in the attic ('city side') of Trajan's Arch at Beneventum (cf. here **Fig. 46**), which shows a group of adult men, again represented according to a hierarchy of scale. Koepfel and Klaus Fittschen, who have studied the same panel, identified the two *togati*, who are standing in front (and to the left) of Trajan and are, compared with the emperor, represented very small as if they were children, as the two *consules* of Rome. Koepfel suggested that they have come to tell Trajan that the Senate has granted him the celebration of a triumph; he likewise believed, that Trajan is shown on this panel as standing just outside the *pomerium* of Rome<sup>361</sup>.

<sup>360</sup> D.E.E. KLEINER 1992, both quotes are from p. 227; pp. 224-229, Figs. 188-193 (on the Arch of Trajan at Beneventum); Fig. 188 ('country side'); Fig. 189 ('city side'), both sides show in the attic the same dedicatory inscription.

The Arch of Trajan at Beneventum was dedicated by the Roman Senate; cf. J. POLLINI 2012, 105: "The direct mode of representation was not confined to Trajanic coinage, as evidenced by the magnificently preserved Arch of Trajan at Beneventum, which was voted by the Senat (figs. II.39) [with n. 177, providing references]".

Cf. D.E.E. KLEINER 1992, 227: "The inscription [on the attic] indicates that the Arch of Trajan dates to 114, because it records Trajan's titles of Germanicus and Dacicus but not of Parthicus, which he was awarded after 114. It is nonetheless difficult to determine whether 114 refers to the completion of the arch or to the laying of the foundation stone. The latter seems more likely. The arch was begun in 114 and completed by Hadrian in 118 after the death of his predecessor".

<sup>361</sup> M. BERGMANN 1981, 27-28, with ns. 44-47, writes: "In den wenigen erhaltenen Adventusdarstellungen [with n. 44] wird der Kaiser von Personifikationen erwartet und begrüßt. Ein bürgerlicher Togatus [identified by KLEINER 1992, 227, as *praefectus urbi*; quoted *verbatim supra*, at n. 360, and here **Fig. 46**] weist auf den unteren Reliefs der Stadtseite des Beneventer Bogens Trajans nur den Weg in Richtung der ihn erwartenden Personifikationen [with n. 45]. Allein auf den Attikareliefs des Bogens treten dem Kaiser noch vor den Göttern zwei bürgerliche Togati entgegen [with n. 46; cf. here **Fig. 46**]. Wer sie sind, ist umstritten [with n. 47]. Doch kann das Beispiel nicht als Parallele für eine Adventusdeutung des Cancellariareliefs [*i.e.*, of Frieze B] dienen, denn die Togati sind dort nicht nur dem Kaiser, sondern auch seiner Umgebung durch ihr kleineres Format untergeordnet". In her ns. 44-46, BERGMANN 1981, 28, provides references, in her n. 47 on p. 28, she writes: "In der Aufnahme Inst. Neg. Rom 29.460 meine ich zu erkennen, daß nur Trajan Senatorenschuhe trägt, die beiden Togati dagegen einfache calcei. Wenn das richtig ist, können sie wohl weder die Consuln noch die Duoviri von Benevent sein". -

For the first relief, discussed by BERGMANN, *op.cit.*, the left hand side panel in the lowest register of the Arch of Trajan at Beneventum ('city side'; cf. here **Fig. 46**); cf. also G. KOEPEL 1969, 162-163, Fig. 12, quoted *verbatim supra*, n. 172, at Chapter I.1.

The second relief, discussed by BERGMANN, *op.cit.* (*i.e.*, the right hand side panel on the attic of the Arch of Trajan at Beneventum; cf. here **Fig. 46**); for the left hand side and the right hand side panel on this attic together, cf. J. POLLINI 2012, 105, with Figs. II.39b-c: "In sculptural panels in the attic, or uppermost part of this arch [of Trajan at Beneventum], Jupiter in the company of other

Let me alert you to the fact that the same iconographic strategy is observable on the right hand panel in the middle register of the Arch of Trajan at Beneventum ('city side'; cf. *supra*, n. 359, and here Fig. 46), where the adult male figures are even differentiated by *three* different scales: here the tallest figure is again the togate Emperor Trajan, who stands on the right. He is accompanied by some of his lictors of almost the same size. In front of Trajan, and partly covered by the emperor, is depicted a man belonging to his entourage, who is smaller than Trajan and his lictors. This man turns to the emperor and seems to have guided the three men to him, who stand in front of Trajan, on the left. These three men are represented as being even much smaller than the man, who has guided them to Trajan, and compared with the Emperor, they reach only up to his chest, as if they were children. Two of these men are *togati*. Trajan addresses these men. In the background, behind the three men, appear the statues of three gods.

Applying to the Cancellaria Reliefs Kleiner's just quoted findings, which relate to the hierarchy of scale observable on the reliefs of Trajan's Arch at Beneventum, we can conclude the following. As is well known, the togate youth on Frieze B of the Cancellaria Reliefs is almost as tall as the Emperor Vespasian, who is standing in front of him (cf. here Fig. 2; Figs. 1 and 2 drawing, figures 12 [Domitian]; 14 [Vespasian]). Provided, this youth were Domitian, his smaller size, when compared with Vespasian, could be explained by the fact that Domitian, 'in the first half of October 70', the time, when Vespasian's *adventus* into Rome is currently assumed, was only 18 years old (his nineteenth birthday was on 24th October 70). Provided, this togate youth represents instead an 'ideal' image of an unidentifiable man, as suggested by Bergmann (1981), or the 'ideal' image of a Roman magistrate, as for example suggested by Simon (1985), Ghedini (1986), Fehr

---

important state gods extends his thunderbolt (fig. II.39b) to Trajan, his viceregent on earth (fig. II.39c) - a gesture of divine approbation to rule and to conquer on behalf of the Roman People".

Contrary to M. BERGMANN, *op.cit.*, G. KOEPEL 1969, 188, was of the convincing opinion, that the right hand side panel on the attic of the Arch of Trajan at Beneventum does not show the *consules* of Beneventum, but rather those of Rome ("Die Zweiteilung von Adventus-Darstellungen"; referring to his Fig. 15 on p. 165: "Benevent, Trajansbogen, Rechtes Attikarelief"): "Der zurückkehrende Kaiser [*i.e.*, Trajan] wird im Attika-Relief von den beiden Consuln begrüßt, die ihm die Erlaubnis zum Triumph übermitteln. Wie wir aus den literarischen Quellen wissen, geschah dies außerhalb der rituellen Stadtgrenze [quoting in his n. 257: "Ehlers, RE s.v. Triumphus 501"]. Das rechte Bild zeigt den Kaiser vor der Porta Triumphalis eben an dieser Grenze stehend (siehe S. 166)"; on pp. 188-189, KOEPEL 1969 himself compared this panel with Trajan and the two *consules* at the Arch of Trajan at Beneventum with Vespasian and the togate youth (in my opinion Domitian) on Frieze B of the Cancellaria Reliefs.

The just-mentioned relief; cf. G. KOEPEL 1969, 188, Fig. 15 on p. 165 (cf. here Fig. 46), is also reproduced by D.E.E. KLEINER 1992, 228, as her Fig. 193. Cf. *infra*.

Cf. K. FITTSCHEN 1972, 775: he is, like KOEPEL, *op.cit.*, of the opinion that this panel (cf. here Fig. 46) shows a locale at Rome, and that the two togate men, who stand in front of Trajan, who are represented as being much smaller than the emperor, 'may be the *consules*', but he suggests that the scene is staged on the Capitoline, in front of the Temples of *Iuppiter Feretrius* and of *Iuppiter Optimus Maximus*; p. 774, Abb. 27. "Benevent, Trajansbogen, Stadtseite, rechtes Attikarelief"; cf. p. 775: "Die zwei Personen im Vordergrund sind durch die Toga als Römer gekennzeichnet, sie mögen die Consuln sein [with n. 140, providing references]. Durch ihr kleineres Format sind sie vom Kaiser und den anderen Figuren deutlich unterschieden [with n. 141, providing references]; cf. p. 777: according to FITTSCHEN, the scene is staged on the Capitoline, Trajan is guided by Romulus, they are standing in front of the Temple of *Iuppiter Feretrius*, the visible wall belongs, in his opinion, to the Temple of *Iuppiter Optimus Maximus Capitolinus*.

Cf. FITTSCHEN 1972, 778: "Trajan wird also offenbar vom Stadtgründer selbst empfangen. Die Häufung derartiger vieler Repräsentanten der Stadt Rom: Roma, Romulus, Genius populi Romani, Penates publici populi Romani, macht den Sinn der Szene deutlich: Der Kaiser wird als ein weiterer Heros der Stadt begrüßt. Feiert das Attika-Relief der Landseite den Kaiser als den Gründer einer neuen Provinz, so hier als einen neuen Gründer Roms, einen neuen Romulus, einen CONDITOR URBS ...".

Cf. D.E.E. KLEINER 1992, 228, who identifies K. FITTSCHEN's alleged 'ideal' male figure on this panel, who has the same proportions as Trajan, welcomes the emperor at Rome, and whom FITTSCHEN, *op.cit.*, identifies as Romulus, as a portrait of Hadrian instead (cf. her Fig. 193 = here Fig. 46): "In the Benevento attic panel, Trajan receives his power from Jupiter, with the backdrop of Rome behind him. He stands in front of the Capitolium with an arch nearby. Two smaller male figures stand before him, as does a city tyche, but most significant is the young, bearded male figure who is portrayed as equal to Trajan in stature and stands at Trajan's right. Both men turn their heads toward one another as if linked in a special way. The younger man is dressed in a breastplate, whereas Trajan is togate. The man's beard and physiognomy identify him as Hadrian (he is also the mysterious young man in the right country side relief), who participated in Trajan's military campaigns but seems not to be included in the scenes on the Column of Trajan or even in what survives of the Great Trajanic frieze [*i.e.*, on the Arch of Constantine; cf. her Figs. 185 [= here Fig. 7.1]; 186]. It is for this very reason that the Arch of Trajan at Benevento must have been completed after Trajan's death. Hadrian is included in these two scenes because he was responsible for completing the arch after Trajan's death and because he was eager to accentuate his close relationship with his divine adoptive father".

Note that other scholars have not followed Kleiner (*op.cit.*) in identifying this bearded man with Hadrian. I thank Hans Rupprecht Goette for alerting me to this fact. Later I should find out that also A. SCHMIDT-COLINET 2005, 108-112 with ns. 27, 28, Abb. 9a; 9b, has suggested that this bearded man wearing a cuirass should be identified with Hadrian, basing his judgement on different scholars than D.E.E. KLEINER 1992.

(1998), and Hölscher (2009a), or the *equus* L. Iulius Vestinus, as suggested by H.-W. Ritter (1982; for these hypotheses, cf. *supra*, at ns. 181, 182; and elsewhere at Chapter I.1.1.), or an unknown man, as suggested by Koeppel (1984; cf. *infra*, n. 416, in Chapter III.), the mere proportions of this man may have been one of the reasons, why later emperors - so for example Trajan and Hadrian - had no interest in using the Cancellaria Reliefs for their own purposes any more. And that was because of the following reasons.

Already Koeppel (cf. *supra*, n. 361, also for FITTSCHEN 1972) had compared one of the above discussed panels on the Arch of Trajan at Beneventum with the togate youth and Vespasian on Frieze B: namely the right hand side panel in the attic ('city side') of Trajan's Arch, in which two *togati* appear, who have come to welcome the emperor, and whom Koeppel and Fittschen have identified with the two *consules* of Rome (cf. here Fig. 46). As we have seen, these adult men, when compared with Trajan, are represented at the scale of children.

That this assumption may not only be true for Trajan, but also for Hadrian, shows in my opinion the already discussed *adventus* relief of Hadrian (cf. here Fig. 91; cf. *supra*, in Chapter I.2.), in which the amazon-like goddess Roma is represented even much taller than the Emperor Hadrian himself.

Another of Pentiricci's findings<sup>362</sup> which corroborates Magi's relevant hypothesis, shows that those 'later emperors' after Nerva, who in theory might have considered to re-use the Cancellaria Reliefs, could only have been Trajan and Hadrian. The reason for that is the fact, that the deposit of the 'Second sculptor's workshop', where the Cancellaria Reliefs were kept after the destruction of the originally Domitianic building, to which they had belonged, was from a certain time in antiquity not accessible any more. This moment is datable in the early reign of Hadrian, a more precise date could so far not be established.

Only after this Chapter was written, did I realize that Carignani and Spinola (2009, 542-543; cf. *supra*, n. 76, in Chapter I.1., and n. 287, in Chapter I.3.2.) have defined the timespan, within which the deposit of this 'Second sculptor's workshop' was accessible, as follows: "della fine del I - prima metà del II secolo d.C.". Pentiricci himself (cf. *supra*, at n. 285, in Chapter I.3.2.; cf. Chapter I.3.1.) has not followed Carignani and Spinola's suggestion by changing his own opinion concerning the date, at which this deposit became inaccessible, but he discusses the relevant findings of Carignani and Spinola. I repeat in the following, what was already written above (cf. *supra*, in Chapter I.3.1.):

'Pentiricci (2009, 204-205), referring to this female head, discussed by Carignani and Spinola (2009, 510, cat. 2), rightly concludes that - provided that it had likewise been sculpted at the 'Second sculptor's workshop', the lifetime of this enterprise could be dated accordingly:

"si deve in ultimo citare il ritratto femminile non finito (n. 2 del catalogo CARIGNANI - SPINOLA nel II volume [for that head, cf. n. 287, in Chapter I.3.2.]), il quale qualora se ne accetti la provenienza dalla zona a nord dell'*Euripus* attesterebbe l'attività della bottega >alla metà/ seconda metà del I secolo d.C.<".

For a discussion of Carignani and Spinola's relevant finding; cf. *supra*, at Chapter I.3.2.).

---

<sup>362</sup> cf. M. PENTIRICCI 2009, 162 with n. 97, p. 205 with n. 31 (quoted *verbatim supra*, n Chapter I.3.1.; cf. *supra*, n. 285, in Chapter I.3.2.), who corroborates the relevant hypothesis of F. MAGI 1945, 138-140, with n. 4 (referring back to pp. 40, 42, 50). For MAGI, *op.cit.*, cf. *supra*, n. 141, in Chapter I.1., quoted *verbatim supra*, n. 255., in Chapter I.3.1.

*II.3.3.a) A Summary of the following Chapters:*

*I.3. Were the Cancellaria Reliefs the horizontal panels in the bay of an arch, built by Domitian?;*

*I.3.2. A discussion of the question, whether the Cancellaria Reliefs and the architectural finds from the area of the Palazzo della Cancellaria could have belonged to an arch, built by Domitian;*

*II.1.e) scenario, which tries to explain, why both friezes were not found attached to a monument, but rather as intentionally discarded material in the deposit of a sculptor's workshop;*

*II.3.1. Nerva' victory in the bellum Suebicum October AD 97, the architectural fragments, found together with the Cancellaria Reliefs, comprising the architrave block carrying the inscription PP FECIT (CIL VI, 40543), Domitian's Forum/ Forum Nervae/ Forum Transitorium, and Domitian's building policy: praising the gens Flavia, emulating Augustus and Nero;*

*II.3.1.a) Nerva' victory in the bellum Suebicum October AD 97;*

*II.3.1.b) The architectural fragments, found together with the Cancellaria Reliefs, comprising the architrave block carrying the inscription PP FECIT (CIL VI, 40543), and Domitian's Forum/ Forum Nervae/ Forum Transitorium;*

*II.3.2. Nerva's adoption of Trajan in late October or at the beginning of November AD 97 and the consequences which this had for the monument (an arch?), built by Domitian, that contained the Cancellaria Reliefs;*

*II.3.3. The Cancellaria Reliefs (cf. here Figs. 1; 2), the panels of the Arch of Trajan at Beneventum (c. here Fig. 46) and the importance of the hierarchy of scale*

Let's once again return to the finding by Carignani and Spinola concerning the 'lifetime' of the 'Second sculptor's workshop' (cf. *id.* 2009, 542-543: "della fine del I - prima metà del II secolo d.C."; cf. *supra*, **ns. 76, 287**, in Chapters *I.1.*; and *I.3.2.*). How does this affect my just formulated conclusions concerning the Cancellaria Reliefs? The 'Second sculptor's workshop'/ its deposit discussed here, was thus in theory accessible until circa AD 150 (as the latest suggested date), that is to say, until the reign of Antoninus Pius (138-161 AD). This emperor is known for his "long, peaceful reign", with only one "major war", his campaign in Scotland, "for which Antoninus took the acclamation 'Imperator' for the second time in late 142", as Anthony R. Birley (1996) wrote. In my opinion, that does not sound, as if we should imagine that Antoninus Pius could have had an interest in re-using the Cancellaria Reliefs, both characterized, as they are, by their distinct martial subject matter (for that assumption, cf. *infra*, at Chapters *V.1.i.3.*); *V.1.i.3.a*); and *VI.3.*), for a building that could have celebrated one of his own relevant achievements.

Antoninus Pius did not even build very much at Rome. Amanda Claridge (1998) wrote about this emperor:

"In AD 138 Hadrian died, having adopted as his successor the 52-year-old **Antoninus Pius**, born T. Aurelius Arrius Antoninus, at Lanuvium (SW [south-west] of Rome), **who was to rule for another twenty-three years, his reign a byword for peace, prosperity, and tranquility, in fact one of the dullest figures in Roman political history. He hardly moved out of Italy, a man devoted to his family, a careful manager of imperial wealth and resources, conservative in person and taste. He built practically nothing public in Rome except a temple for Hadrian, and another for his wife Faustina**, who died and was deified in AD 140, dedicated in their joint names on his own death in 161 ... [the words in bold have been highlighted like this by the author herself]".

Considering the fact that Antoninus Pius did not erect any other public buildings at Rome than the two still extant temples, which were dedicated to divinized members of his own family (and the second temple after his own death also to himself), I maintain my above formulated conclusions - see in the following my points *a)* and *b)*<sup>363</sup>.

**But before turning to those points *a)* and *b)*, I should like to add something that I only realized after this Chapter was written so far: Antoninus Pius restored also the *Templum (novum) Divi Augusti*; cf. below, at *The second Contribution by T.P. Wiseman on the question which ancient author explicitly records that Domitian had restored the Templum (novum) Divi Augusti, and that he had dedicated this temple in AD 89 or 90. For further discussion of this point: cf. infra, in volume 3-2, at A Study on the consequences of Domitian's assassination; Introduction; at Section XIV; and infra, in Appendix IV.d.4.b).***

**For the coins, issued by Antoninus Pius to commemorate his restoration of the *Templum (novum) Divi Augusti*; cf. also below, at *The second Contribution by Anglo Geißen : Zum 'Hadrianeum' auf Münzen des Antoninus Pius.***

Let's now turn to those two points *a)* and *b)* :

*a)* the Domitianic monument - possibly an arch - that contained the Cancellaria Reliefs, may already have been destroyed at the order of the Emperor Nerva (who possibly acted in the relevant procedure together with his co-Emperor Trajan). Trajan was, from the moment of his adoption by him, until long after Nerva's death, away from Rome, but since the time, when Nerva had appointed Trajan as governor of Upper Germany, both men, since late October or the beginning of November AD 97, in addition to this, (adoptive) father and son, as well as co-Emperors, certainly corresponded regularly on all matters regarded important by them.

**In my opinion, Nerva could have made the decision, to destroy the Domitianic building that contained the Cancellaria Reliefs, as a consequence of his adoption of Trajan in late October or the beginning of November AD 97, as his son, co-Emperor and successor. I assume this because of the following reasons.**

After the victory in the war against the *Suebi*, that had been conducted for Nerva by the governor of Pannonia, as a consequence of which Nerva added '*imperator II*' to his official title, and which should earn the emperor the title *Germanicus*, Nerva received, as a token for this victory, a laurel wreath from Pannonia, which he, in late October or at the beginning of November AD 97, dedicated to *Iuppiter Optimus Maximus Captolinus* in his Temple on the Capitol. On the same day, in a solemn ceremony, that had likewise taken place on the Capitol, Nerva had adopted Trajan - in *absentia* of Trajan. Trajan was in Upper Germany at the time, having been appointed by Nerva as governor of this province shortly before. Trajan received the title *Germanicus* - for the same victory in the war against the *Suebi* - obviously as a consequence of his adoption by Nerva. Both, Nerva and Trajan, adopted the title *Germanicus* in November of AD 97.

---

<sup>363</sup> the quotes are from: A. CLARIDGE 1998, 19; repeated *verbatim* in: A. CLARIDGE 2010, 20; and A.R. BIRLEY: "Antoninus Pius, Roman emperor AD 138-61, born at Lanuvium in Latium in 86 ...", in: *OCD*<sup>3</sup> (1996, 113-114; cf. p. 114: "His links with the *Annii Veri*, combined with his wealth, popularity, and character led Hadrian to choose him as adoptive son and successor on the death of L. Aelius Caesar [which occurred on 1st January 138 AD; cf. *infra*, at *Appendix IV.c.1.*). Post Scriptum: *Hadrian's situation in AD 117-118. With a Contribution by Angelo Geißen*. See also Anthony R. Birley: "Aelius Caesar, Lucius, Hadrian's first choice as successor ... After his sudden death on 1 January 138, his son (later called L. Verus) and prospective son-in-law (the future Marcus Aurelius) were adopted by Hadrian's second choice as heir, Antoninus Pius", in: *OCD*<sup>3</sup> (1996) 18. Cf. *id.*: "**Verus, Lucius**, Roman emperor AD 161-9; was born in 130 and named L. Ceionius (*RE* 8) Commodus, son of L. Aelius Caesar", in: *OCD*<sup>3</sup> (1996) 1589-1590.

Antoninus Pius was thus only 10 years younger than his adoptive father Hadrian, who was born in 76 AD; cf. *supra*, n. 331, in Chapter II.2.

For Hadrian's adoption of Antoninus Pius; see also below, in Chapter *The major results of this book on Domitian*; and *infra*, in volume 3-2, at *A Study on the consequences of Domitian's assassination .... Or: The wider topographical context of the Arch of Hadrian alongside the Via Flaminia which led to the (later) Hadrianeum and to Hadrian's Temples of Diva Matidia (and of Diva Sabina?) ...*; at Chapter VI.2.

When Nerva first gave the order to change Domitian's portrait on Frieze A into his own (cf. here Fig. 1; Figs. 1 and 2 drawing; figure 6), his idea had been, in my opinion, to celebrate only his own victory in this military campaign. I further suggest that Nerva can only have had this idea, *before* he adopted Trajan. I further believe that Nerva, as soon as Trajan was credited with the same victory, must have felt the obligation to add the portrait of Trajan to the *profectio* scene on Frieze A. Trajan, after all, was now his son, co-Emperor and 'co-victor' in the *bellum Suebicum*. The carving of another protagonist on Frieze A, if at all Nerva had thought of adding the portrait of Trajan to this panel, was, of course, impossible, simply because the slabs of the Cancellaria Reliefs are so extremely thin.

As I have only realized after this Chapter was written, Diana E.E. Kleiner (1992) has suggested something very similar for two panels of the Arch of Trajan at Beneventum. There she identifies two figures as portraits of Hadrian, that, in her opinion, were only carved after Trajan's death, at the order of Hadrian (cf. *supra*, n. 361, in Chapter II.3.3., and here Fig. 46. As already mentioned there, other scholars have not followed Kleiner in identifying this man with Hadrian). Later I should find out that, independently of Diana E.E. Kleiner (1992), also Andreas Schmidt-Colinet (2005, 108-112 with ns. 27, 28, Abb. 9a; 9b) has suggested that this bearded man wearing a cuirass, who is standing in front of Trajan on the right hand side panel in the attic of the Arch of Trajan at Beneventum ('city side') should be identified with Hadrian.

If indeed Nerva had in mind to convert this originally Domitianic building, to which the Cancellaria Reliefs belonged, into a monument, that celebrated his own martial prowess, this fact could be regarded as the decisive argument in support of the hypothesis here formulated, according to which the structure in question may be identified as one of Domitian's lost (triumphal) arches - that he had obviously built himself, provided the inscription *PP FECIT* belonged to the same arch (cf. *supra*, n. 81 and at n. 82, in Chapter I.1.; and *infra*, at Chapter *The major results of this book on Domitian*). With this idea, to attribute the Cancellaria Reliefs to one of Domitian's arches, I follow Pentiricci (cf. *supra*, n. 263, in Chapter I.3.2.). If true, that could even be the case, provided, the above-discussed architectural fragments (cf. *supra*, in Chapter I.3.1.) did *not* originally belong to the same monument as the Cancellaria Reliefs.

These architectural fragments are likewise datable in the Domitianic period, were found in the same area, and, since Magi (1939), Nogara (1939), and Colini (1938 [1939]) had first suggested this (cf. *supra*, ns. 4; 6; 112, in Chapter I.1.), have been attributed by many scholars to the same arch. Wolf (2015) has for example based his reconstruction of an "arco onorifico isolato" on those architectural fragments *and* on the Cancellaria Reliefs. But Wolf (2015) has also used the same architectural fragments for a reconstruction of an 'arched entrance to a Domitianic building', to which the Cancellaria Reliefs do *not* belong (for all that cf. *supra*, at ns. 75-81, in Chapter I.1., and ns. 284, 298, in Chapter I.3.2.; and *infra*, in Chapter V.2., for the publication of M. WOLF 2018 on the same subject).

With these two different reconstructions, Wolf (2015) has thus expressed his opinion that it is possible that those architectural fragments and the Cancellaria Reliefs belonged to the same building - but that it is not provable. I agree, *inter alia* because Domitian had erected many arches, all of which were allegedly destroyed after his *damnatio memoriae*. And because the deposit, where those friezes and some of the architectural fragments in question were found, had belonged to the 'Second sculptor's workshop' underneath the Palazzo della Cancellaria (cf. *supra*, in Chapter I.3.1., and *infra*, in Chapter V.1.a.1.)), that had obviously been specializing in the re-cycling of the marble decorations of state monuments - this could in theory mean that the extant Cancellaria Reliefs, the soffit blocks, etc., do all come from destroyed Domitianic arches, but from *different ones*. Likewise not provable, in my opinion, is the hypothesis, that Nerva had at first intended to rededicate the Domitianic building, that contained the Cancellaria Reliefs, into an (triumphal) arch, that celebrated his victory in the *bellum Suebicum* - and only *his* victory. Therefore this idea, in the title of Chapter I.3., has *not* been formulated as a fact, but rather in form of a question;

b) provided, that Nerva did *not* order the destruction of the Domitianic monument or building, that had contained the Cancellaria Reliefs, and assuming at the same time that those scholars are right, who have identified the togate youth on frieze B as the 'ideal' image of an unidentifiable man, as a personification, as a

(high ranking) Roman magistrate, or as an unknown man (cf. *supra*, in Chapters *I.1.*; *I.1.1.*, and *infra*, in Chapter *V.1.h.1.*)), I find it difficult to assume that Trajan and/ or Hadrian could have had an interest in re-using Frieze B (and by implication, both Cancellaria Reliefs) for their own state reliefs, given the fact that on Frieze B the represented emperor and the togate youth are *not* designed according to a hierarchy of scale (for that cf. *supra*, in Chapter *II.3.3.*, and here **Fig. 46**).

But, as already said above (cf. *supra*, at **ns. 282, 283**, in Chapter *I.3.2.*), there are more reasons, why Trajan and/ or Hadrian could not possibly have used Frieze B for themselves:

Frieze B could not even have been used by Nerva as an *adventus* of himself, should he actually at first have had in mind to convert this Domitianic structure, possibly a (triumphal) arch, into one that celebrated his own victory in the *bellum Suebicum* - and only *his* victory. The reason being that Vespasian on Frieze B is clad as a civilian, is crowned by *Victoria* not with a laurel wreath, but with an oak wreath, and worst of all: he is not accompanied by his army. Therefore Frieze B was perfectly tailored to Vespasian's real situation at the represented moment in AD 70 (cf. *infra*, at Chapters *V.1.c.*; *V.1.i.3.a.*); and at *The major results of this book on Domitian*), whereas none of his successors could possibly have re-used this panel for one of his own 'normal' military *adventus* into Rome, because the iconography, depicting 'an emperor, who comes back from a victorious campaign' differs considerably from that.

After this Chapter was written so far, I found the account by Rita Paris (1994b, quoted *verbatim infra*, in Chapter *V.1.i.3.*)), in which she describes her reconstruction of the *Templum Gentis Flaviae* (for the latter, cf. *infra*, in Chapter *IV.1.1.*, especially in Chapter *IV.1.1.g.*)).

Especially interesting in the context discussed here is the fact that Paris (1994b) was able to reconstruct one of its reliefs by comparing it with Frieze A and B of the Cancellaria Reliefs (cf. here **Figs. 1; 2; Figs. 1 and 2 drawing**). The relief of the *Templum Gentis Flaviae* in question shows, in my opinion, Vespasian's *adventus* into Rome in AD 70 (cf. here **Fig. 33**), in which the emperor appears as wearing the *corona civica*. Paris (1994b, 81-82) states that this is the highest possible decoration for the acknowledgement of military prowess, only granted Augustus and Vespasian for their victories, because both had managed to put an end to *civil* wars. Paris' second suggestion, which is of interest here, refers to her assumption that the composition of this relief (cf. here **Fig. 33**) was designed by applying a hierarchy of scale. And because the *Templum Gentis Flaviae* was commissioned by Domitian, the innovative invention of a 'hierarchy of scale' in state art - provided Paris is right - which was above (cf. *supra*, at **n. 360**, in Chapter *II.3.3.*, and here **Fig. 46**) attributed to Trajan's Arch at Beneventum, had actually already been developed under Domitian. - If true, this would not come as a real surprise: also Domitian's other artistic projects, discussed in this *Study*, abound in innovations.

For a discussion of this point; cf. *supra*, in Chapter *Preamble*; Section *III.*, at point **3.**)

See also the 'boy ministrants' on the Nollekens Relief, who flank Domitian on either side (cf. here **Fig. 36: figures 2; 10**). These two boys, when compared with Domitian (**figure 6** on the relief **Fig. 36**), are represented according to a very pronounced hierarchy of scale (cf. *infra*, in Chapter *V.1.i.3.b.*)).

**So far my own ideas. Let's now turn to a more detailed discussion of the questions posed above by other scholars.**

#### II.4. Technical observations concerning the Cancellaria Reliefs and various hypotheses concerning their reworking. Discussion of the above-mentioned subjects by other scholars

*Ad a) where exactly was the carving of the first phase of the Cancellaria Reliefs conducted and do we have criteria that allow us to date these friezes?*

I agree with Paolo Liverani, who helped me in long E-mail- and telephone discussions, that question "a)" has definitely been answered by Michael Pfanner, to whose publication of 1981 he has kindly alerted me<sup>364</sup>. Pfanner's Abb. 1 in his article of 1981 shows a reconstruction drawing: a section of the monument, with slab A 4 *in situ*. His comments to this reconstruction are based on the precise documentation and 'mapping' of all kinds of extant cavities on the backs of those slabs, as well as of all their dowel holes. The dowel holes on the lower and upper edges of the slabs show that Frieze A, when fixed to the core of the monument, protruded from its surface by 6-6,5 cm.

Cf. for the latter detail now also Langer and Pfanner (2018, 80-81, chapter 2.9.6, quoted *verbatim infra*, in Chapter V.1.i.1.)). For the single slabs of both Cancellaria Reliefs; c. here **Figs. 1 and 2, drawing**, an illustration, in which they are marked.

Pfanner (1981) also mentions in his Abb. 1 as the original thickness of slab A 4, 21,8-22,5 cm. In the process of carving the reliefs some of the above described cavities were hit, resulting in holes in the relief surfaces of those slabs. Pfanner is certainly right in assuming, that 1.) this was not intentionally done, and 2.) that this could only happen, because the reliefs were sculpted, when the slabs were already mounted on the monument. Or in other words, Pfanner has shown that the slabs were not yet adorned with their reliefs when they were attached to the monument. Before reading Pfanner's account, while looking at those friezes and discussing them with Giandomenico Spinola, I had instead taken for granted, exactly like Spinola himself (cf. *infra*, at Chapter III. See also below, *The Contribution by Giandomenico Spinola on the Cancellaria Reliefs*), that they were first carved in a sculptor's workshop, and only afterwards mounted on the building; this was actually also Magi's opinion<sup>365</sup>.

Hugo Meyer<sup>366</sup>, quoting Pfanner's article of 1981, realized that the marble slabs had been attached in their still undecorated state to the monument. He, as we shall see, assumed (erroneously) that they had been originally intended as mere marble veneer, so that the decision to decorate them with reliefs had only been made later. He thus unconsciously misunderstood Pfanner.

Since I am myself not familiar with this specific kind of technical question, I asked Amanda Claridge for advice, at first only hoping to learn from her the average thickness of marble slabs of a comparable size that had undoubtedly served as marble veneer. I mentioned to her the fact that, according to the findings of Pfanner (1981), Frieze A had protruded from the surface of the monument (cf. *supra*), and asked her, whether that fact could possibly contradict the assumption that both friezes initially had been intended as marble veneer - which is actually the case. I also asked her, whether or not it is conceivable that the reliefs were only carved when the marble slabs were already mounted on the building, as suggested by Pfanner. If so, this would mean that the slabs had from the very beginning been attached to the monument in order to carve its reliefs *in situ*. Reading Pfanner's account (1981), I had thought that this was exactly what the author had intended to say. Amanda Claridge was so kind as to answer that, yes, also other Roman reliefs protrude from the surfaces of the monuments, into which they were inserted, and that to her knowledge it is clearly conceivable that friezes of that size could have been carved *in situ*.

<sup>364</sup> cf. M. PFANNER 1981, 514-516.

<sup>365</sup> so M. PFANNER 1981, 514, n. 5, who quotes for that: "Magi [1945] 12f."

<sup>366</sup> H. MEYER 2000, 125: "Durch eingehende Beobachtungen konnte in jüngerer Zeit nachgewiesen werden [with n. 400: "M. Pfanner, AA 1981, 514ff.], daß sie nicht ursprünglich als Reliefräger vorgesehen gewesen waren: an mehreren Stellen haben sich bei der Ausführung der Frieße Durchschläge in Hebe- oder Klammerlöcher ergeben. Daraus ist ersichtlich, daß die Reliefszenen nachträglich am Bau - es ist nicht bekannt an welchem - in unverzierte Verkleidungsplatten eingetieft worden sind".

As usual, the problem is not as easy as here first assumed. It is true that Hugo Meyer had erred with his just quoted observation. It was not Pfanner, as asserted by Hugo Meyer<sup>367</sup>, but instead Magi<sup>368</sup>, who had made the following observations: clamp holes on the back of the slabs that belong to the two friezes of the Cancelleria Reliefs prove that those slabs had been originally made for a different purpose. And because those clamp holes were in none of the cases filled with lead, it is clear that the slabs had not been used for this purpose. Magi did *not* say that the slabs in this phase of their lifetime in antiquity - which we could call phase "-1" - had, in his opinion been intended to be mere marble veneer.

This means 1.) that the slabs were already re-used, when prepared for their first carving phase on the Domitianic building, 2.) it explains, as Magi himself wrote, and his Tav. I demonstrates, why these slabs have uneven lengths, and 3.), why it could happen that the artists, who sculpted the first carving phase, that occurred, when the slabs were already attached to the monument, ran into the cavities on the back of those slabs: those clamp holes had already been made in phase "-1" of the slabs, and possibly even by workmen of a different workshop.

***Ad b) which Emperor commissioned those friezes, and had that first phase of the reliefs been finished? What evidence do we have that other emperors were also involved in the making of these friezes?***

Almost all scholars agree that in Frieze A the original portrait of Domitian had been recut into that of Nerva<sup>369</sup>, thus at the same time assuming that Domitian had commissioned both friezes. McCann was instead of the opinion that the Cancelleria Reliefs were commissioned in the Hadrianic period, an opinion, which Pfanner<sup>370</sup> has rejected. Personally, I find Pfanner's resulting statements very convincing:

"Leider kennen wir nur von wenigen Staatsreliefs die einstige Anbringung. Die Reliefs am Titus-und Trajansbogen springen nicht friesartig vor, sondern sind weit in den Bau eingelassen [with n. 3, with reference]. Die Relieftiefe ist bei ihnen freilich viel größer als bei den Cancelleriareliefs. Man darf vielleicht folgern, daß tiefe Reliefs eine andere Anbringungsweise forderten als flache. Derartige Anhaltspunkte gewinnen Bedeutung im Zusammenhang mit der Beurteilung des Reliefstils. Klassizistisch wirkende Reliefs sind meist flach, barock wirkende dagegen tief. Wahrscheinlich bestimmten zu einem großen Teil äußere Kriterien, ob ein flacher (und somit klassizistischer) oder ein tiefer (und somit barocker) 'Stil' gewählt wurde. Als solche Kriterien sind der Bautyp, die Funktion des Reliefs im Baukontext und eben auch die davon abhängige Anbringungsart anzusehen [with n. 4, with further discussion]".

McCann's<sup>371</sup> assertion on the other hand that the original head of the emperor, represented on Frieze B, had been reworked into that of Vespasian, is still debated, and in a very complex way. Currently, several scholars<sup>372</sup> assume that the original portrait of Domitian in Frieze B had been recut at the order of Nerva into a portrait of Vespasian. Of these, Hölscher<sup>373</sup> is the only one who admits that, after all, this choice may at least be regarded as 'rather unexpected'.

<sup>367</sup> cf. *supra*, n. 366. F. MAGI 1945, 12f.; discussed by M. PFANNER 1981, 514 with n. 5.

<sup>368</sup> F. MAGI 1945, 12f.

<sup>369</sup> So first Magi 1945, 60-69, Tav. XII.

<sup>370</sup> MC CANN 1972, 255 (pl. 115,1), 260-271. The quotation is from M. PFANNER 1981, 514.

<sup>371</sup> MC CANN 1972, 251 with n. 8 (pls. 112,1-113,2); cf. *supra*, n. 111, in Chapter I.1. In her note 8, she mentioned, that she had discussed the matter in front of the original with Filippo Magi and Georg Daltrop, who had not shared her opinion, because both believed that Frieze B had shown the portrait of Vespasian from the very beginning (for MAGI 1939 and 1945, cf. *supra*, n. 112, in Chapter I.1.). See also F. MAGI 1973 (his response to MCCANN 1972). For that ongoing discussion most recently, cf. S. LANGER and M. PFANNER 2018 (cf. *infra*, at Chapter V.1.h).

<sup>372</sup> so first M. BERGMANN 1981, 22-24 (cf. *supra*, n. 315, in Chapter II.1.c), and at Chapter I.1.1.).

<sup>373</sup> T. HÖLSCHER 2009a, 56: "L'interpretazione dei due fregi deve anzitutto far sì che i temi si armonizzino in maniera sensata: siccome essi sono in larga parte conservati e non v'è traccia di altri frammenti, è verosimile che il monumento originario constasse solo di questi due. La lettura deve poi rendere plausibile perché solo il fregio A venne rilavorato in Nerva, mentre sul fregio B la rilavorazione, **con scelta non troppo scontata**, portò a Vespasiano [my emphasis]". Also S. LANGER and M. PFANNER 2018, 62, 83-84, write that they cannot explain this choice (quoted *verbatim infra*, at Chapter V.1.b).

Whereas most scholars assume that in Frieze A the head of the emperor had been reworked only once: having at first represented Domitian, and in the second phase the Emperor Nerva, Hugo Meyer<sup>374</sup> has been the first scholar to suggest that the head of the emperor on Frieze A had been reworked twice: the original head was in his opinion a portrait of Nero, which, in the Flavian phase of the Cancellaria Reliefs, was recut into that of Domitian, and in the final phase, commissioned by Nerva, into a portrait of himself.

In his discussion of the portrait of Domitian (now Nerva), Hugo Meyer (2000, 128, who in n. 410 referred to Magi's observations, quoting only Magi 1945 "60 ff.", but not also Magi (1945, 149-150, quoted *verbatim supra*, n. 135, at Chapter I.1.), thus neglecting many of Magi's important relevant observations.

Magi made a distinction between "teste abbozzate" (quoted *verbatim supra*, n. 135, in Chapter I.1, with addition under \*) which are found around many of the heads on Frieze A and Frieze B, and the distinctly different traces around the head of Domitian/ Nerva, that this head shows in addition to this, which Magi, after all, had been first to recognize as proofs for a reworking of this head. Magi, in my opinion correctly, suggested that only the head of this Domitian has been recut into a portrait of Nerva.

Hugo Meyer (2000, 128) suggested that, in addition to this, this head of Domitian, in its turn, had been recut from a portrait of Nero: "... schon das Portrait Domitians am Fries A war durch Umarbeitung eines älteren Bildnisses entstanden. Die Richtigkeit dieser Einschätzung wird auch dadurch bestätigt, daß der untere Abschluß von Nervas Stirnhaar zu tief liegt, um aus der Frisur Domitians im dritten Typus [234; 236] hervorgegangen sein zu können".

Of course, Hugo Meyer was right in suggesting, that we should compare this third portrait-type of Domitian with Nerva's head on Frieze A because, as already stated above, the back of Nerva's head shows precisely the coiffure of Domitian's third portrait-type. Cf. Meyer (2000, 128, Fig. 232, cf. *supra*, n. 85, in Chapter I.1., n. 232, in Chapter I.2.; and n. 302, in Chapter II.1.a)).

I admit that Hugo Meyer's comparison of Nerva's head on Frieze A with a photo of a head of Domitian of his third portrait-type (cf. H. MEYER 2000, 129, Figs. 234; 236) actually shows, that in this portrait-type,

<sup>374</sup> Cf. H. MEYER 2000, 130, Fig. 237: head of Domitian/ Nerva on Frieze A; cf. p. 130, Fig. 239, left profile of the portrait of Nero in his fourth and last portrait type/ Typus München, München, Staatliche Antikensammlungen und Glyptothek. The entire hypothesis was discussed by H. MEYER 2000, 128-132, with Figs. 232-244.

H. MEYER's hypothesis has been refuted by T. HÖLSCHER 2009a and by M. PENTIRICCI 2009 (cf. *supra*, n. 99, in Chapter I.1.).

Cf. H. MEYER 2011, 175, Section: "Ein interpretatorischer GAU

In den Jahren 2000 und 2001 legten Verfasser und Horst Herzog unabhängig voneinander Einzelbeobachtungen vor, die auf den Schluß führten, daß sowohl der Domitian im Nerva A, als auch der Vespasian B aus zunächst Nero wiedergebenden Bildnissen geschöpft worden waren".

Cf. S. LANGER and M. PFANNER 2018, 60: "Dagegen ist bezüglich des Stils und der Datierung in den letzten Jahren erneut Diskussionsbedarf angemeldet worden, nachdem H. Meyer und H. Herzog eine Entstehung in neronischer Zeit postuliert haben [with n. 45, quoting: H. MEYER 2000, 125-140; H. MEYER 2011, 175-180; H. HERZOG 2001, 108-119 (*non vidi*)] ... Die Diskussion um die Kaiserumarbeitungen hat sogar eine neue Dimension angenommen, denn wahrscheinlich unabhängig voneinander haben sowohl H. Meyer als auch H. Herzog eine zweifache Umarbeitung der Kaiserporträts vorgeschlagen: Die Porträtabfolge für Relief A sei als Nero - Domitian - Nerva, für Relief B als Nero - Domitian - Vespasian zu rekonstruieren [with n. 53]. Bisher scheint diese These nicht rezipiert worden zu sein". - The latter remark is not true (cf. *supra*, n. 99, in Chapter I.1.).

Cf. LANGER and Pfanner 2018, n. 53: "Meyer 2000, 128-132; Herzog 2001, 108-119 [*non vidi*]"; cf. LANGER and M. PFANNER 2018, 63, in the text of their "Abb. 14. Deutungen Relief B. Auswahl der Interpretationsvorschläge", at: "Meyer 2000".

Cf. S. LANGER and M. PFANNER 2018, 61, "Abb. 13. Deutungen Relief A: Auswahl der Interpretationsvorschläge", at: "Herzog 2001/ *profectio* / Dem Kaiser (Fig. 6), in der Reihenfolge der Umarbeitung: Nero - Domitian - Nerva ..."; cf. p. 63, "Abb. 14. Deutungen Relief B. Auswahl der Interpretationsvorschläge", at: "Herzog 2001 / *adventus* / Der ankommende Nero (Fig. 14) wird vor den Toren Roms von den Vertretern des Senates (Fig. 11), des Ritterstandes (Fig. 12) und des Volkes (Fig. 13) sowie von den Vestalinnen (Fig. 3-7) empfangen ...".

Cf. S. LANGER and M. PFANNER 2018, 71: "Für eine zweifache Umarbeitung des Kaiserporträts - nämlich von einem Nero in einen Domitian und von einem Domitian in einen Nerva, wie von H. Meyer und H. Herzog vorgeschlagen - gibt es keinen Beweis [with n. 83]. Der ursprüngliche Nero müsste einen ballonförmigen Kopf gehabt haben [with n. 84]. Zudem spricht der bautechnische Befund (s. Kap. 2.7) gegen die These einer mehrfachen Wiederverwendung"; in their notes 83 and 84 they provide references.

Domitian's hair on his forehead was more receding than Nerva's hair on Frieze A - but not very much. See also another portrait of Domitian, of which Hugo Meyer (2000, 128 with n. 414, p. 130, Fig. 238) illustrates the left profile, as well as Domitian's portrait on the Nollekens Relief (here **Fig. 36**), which shows likewise Domitian's third portrait type, and will be discussed below.

Hugo Meyer (2000, 130, Fig. 237: head of Nerva in Frieze A; cf. here **Fig. 1; Figs. 1 and 2 drawing: figure 6**) compares that portrait with his Fig. 239, the left profile of Nero's head in Munich, of Nero's fourth portrait-type, and suggests, that Domitian's (now: Nerva's head) on Frieze A must have been carved - because of the more suitable hair line on the forehead - out of a portrait of Nero of this, his fourth type. In order to test Hugo Meyer's hypothesis 'on his own grounds', so to say, I have made the following tests. In his Figs. 237 and 239 on p. 130, Hugo Meyer has reproduced the skulls of both heads intentionally at the same scale. This became even more clear than by simply looking at his comparison, when I cut out both heads from a photocopy of both figures. For this operation, I made a photocopy, on which both heads appeared together, so that they were both reproduced at the same scale, as on Hugo Meyer (2000, page 130).

Having studied sculpture myself, I then asked myself, how I would have proceeded in a similar case, coming to the conclusion that the artist would have tried to move the reworked head exactly the same way, as the original head, so that the entire represented scene looked as similar as possible as in the original phase of the frieze. Using those two heads, chosen by Hugo Meyer for his comparison, this is possible. My second thought was: in theory, a lot of details of the original head may be recut in the process, without any problem, provided the still extant marble is sufficient for the intended details, but two things, which concern the nose and the ear(s) of the portrayed person, can not be done: neither the position of the nostrils (if hollowed out), as defined in the original phase of the portrait, nor the position of the ear(s) with its auricle and ear lobe, and most importantly, the position of the ear canal (if hollowed out), can be changed for the recut portrait.

**Magi had already observed that, in the course of recutting on Frieze A the head of Domitian into Nerva (cf. here Figs. 1 and 2 drawing: figure 6), the artist had come to a solution concerning Nerva's nostrils ("buchi del naso") that is different from all other such details in the case of all the other figures on both friezes (cf. F. MAGI 1945, 61, quoted *verbatim supra*, n. 135, in Chapter I.1., in the addition, marked\*).**

Even when we put the photocopies of Hugo Meyer's two heads on top of each other and arrange them in a way that both ears, and especially their ear canals are positioned at exactly the same point, both represented men still look in exactly the same direction. Also the contours of their coiffures, from their foreheads, all the way around the skulls and down to their necks, are for the most part parallel, and in some spots at least almost parallel - so, in case of the coiffures, Hugo Meyer seems to be right.

But two facts contradict his hypothesis (for this test the photocopies of both heads had not been moved from their positions in the first test: the ear canals of both heads were at the same spot and the contour lines of the coiffures of both heads were parallel, or in some spots almost parallel):

1.) Nero's left auricle in his portrait in Munich is much smaller than the auricle of the head of Domitian (now Nerva) in Frieze A, which means that Nerva's left ear cannot possibly have been carved from a portrait of Nero of this portrait-type, and -

2.) Nerva's profile in Frieze A, from his forehead all the way down to his lower lip, and especially his nose, protrudes from Nero's profile.

Therefore, Nerva' head on Frieze A was certainly recut from a head of Domitian of Domitian's third portrait-type, but this portrait of Domitian was certainly not, in its turn, recut from a portrait of Nero of Nero's fourth portrait-type.

After this Chapter was written, I made the following illustration.

**Fig. 1.1. Drawing of the head of Domitian (now Nerva) on Frieze A of the Cancellaria Reliefs and of the portrait of Nero of his fourth portrait-type in Munich. After: H. Meyer (2000, 130, Figs. 237; 239). H. Meyer reproduced photographs of both heads on the same page of his book, where their skulls are intentionally reproduced as having the same sizes. Based on a photocopy of that page, on which both heads were illustrated together and thus showed both heads at the same scale, I made the drawings of both heads, that are here reproduced on top of each other. Drawing: C. Häuber (2023).**

As already said above (cf. *supra*, at Chapter II.1.a):

‘The only indication that allows us to date both friezes [of the Cancellaria Reliefs; cf. here **Figs. 1; 2; Figs. 1 and 2 drawing**] is the ‘*terminus ad quem* or *post quem* AD 81’, provided by the third and last portrait-type of Domitian [with n. 302], that is visible on Frieze A’.

After having finished writing this Chapter, I have been alerted to John Pollini's (2017b) study of the Nollekens Relief, of which Pollini is first to publish a photograph (cf. *infra*, at Chapter V.1.i.3.b), and here **Fig. 36**). Contrary to Frieze A of the Cancellaria Reliefs (cf. here **Fig. 1; Figs. 1 and 2 drawing; figure 6**), the portrait of Domitian on the Nollekens Relief has fortunately not been reworked in antiquity. Considering the findspot of the Nollekens Relief within the ‘*Aula Regia*’ of Domitian's Palace on the Palatine, the ‘*Domus Flavia*’ / *Domus Augustana*; Domitian is here obviously likewise represented in his third portrait-type.

Domitian built his Palace ‘*Domus Flavia*’ / *Domus Augustana* between AD 81-92; cf. *infra*, in Chapter V.1.i.3.b); at Section III.; and at Chapter *The major results of this book on Domitian*. Pollini (2017b) convincingly suggests that the Nollekens Relief (here **Fig. 36**) shows Domitian sacrificing at his *Porta Triumphalis*, before beginning his (last) triumphal procession of AD 89; cf. *infra*, in Chapter V.1.i.3.b); at Sections I. and IV.) Pollini's (2017b) suggested date for the scene, represented on the Nollekens Relief, can be supported by further evidence; cf. below, in Chapter *The major results of this book on Domitian*.

**Also Hugo Meyer's suggestion to identify the head of the togate youth on Frieze B (Fig. 2; Figs. 1 and 2 drawing: figure 12) with a portrait of Tiridates, that was later recut into the extant portrait of the young Domitian, has rightly been refuted by Massimo Pentiricci (2009, 59-60 with ns. 417, 419; cf. *supra*, n. 130, cf. ns. 131-132, at Chapter I.1.) - concerning Hugo Meyer's assertion that this head had earlier been a portrait of Tiridates.**

As already mentioned, Pentiricci himself follows instead Bergmann (1981) in assuming that the togate youth does *not* represent the young Domitian (cf. *supra*, n. 128, at Chapter I.1., and at Chapter I.1.1.).

Hugo Meyer (2000, 134, Section: "6. Die flavische Verständnisebene") wrote concerning this identification:

"Wie im Falle des Frieses von S. Vitale in Ravenna (vgl. [vergleiche] S. 35ff.) wird man von einer Interpretation der Cancellaria-Reliefs verlangen, daß sie sowohl für den ursprünglichen Kontext als auch für die nachträglichen Bedeutungsgefüge einen bündigen Sinn erschließt. Voraussetzung dafür ist die Einsicht, daß nicht nur zwei, sondern drei Köpfe umgearbeitet worden sind. Der dritte ist derjenige des Togatus gegenüber dem Kaiser in Fries B [251. 252] [with n. 423]. Das geht schon allein aus dem ungeglätteten Streifen um Haupt und linke Schulter deutlich hervor"; cf. here **Figs. 1 and 2 drawing; figure 12**.

In his **note 423**, Meyer wrote: "In diesem Punkt hat mir M. Fuchs zum Durchbruch verholfen, wofür ihr herzlich gedankt sei".

Hugo Meyer (2000, 134-138, Figs. 229, 251, 252, 256-259) had based his observations concerning the head of the togate youth on Frieze B on a plaster cast at the Museum für Abgüsse Klassischer Bildwerke (M. F. A.),

München, where Michaela Fuchs and I, thanks to the kindness of Daniel Wunderlich of the Museum für Abgüsse Klassischer Bildwerke, München (M. F. A.), on 18th October 2018 had the chance to study this plaster cast of the togate youth again. This plaster cast of Frieze B of the Cancellaria Reliefs comprises only the head of the togate youth and a very small part of the surrounding background of the relief, a fact, which is also visible on some of Hugo Meyer's illustrations of this plaster cast.

Hugo Meyer's illustrations (cf. *id.* 2000, Figs. 251, 252, 258, 259), showing the head of the togate youth, were made after this plaster cast. Michaela Fuchs and I were able to see on this plaster cast the three small holes behind the togate youth's head, which according to Hugo Meyer prove the former existence of Tiridates' diadem allegedly represented here, whereas neither Michaela Fuchs, nor I myself could see on this plaster cast a 'triangle' above those three holes, likewise in the background of the relief behind the youth's head, another alleged trace that, according to Hugo Meyer, proves the reworking of a previously existing diadem here.

According to Hugo Meyer (2000, 137) this diadem was of a type that his Fig. 257 illustrates. In front of the original, only the three small drill holes are visible, as already seen and described by Pentiricci (cf. *id.* 2009, 59-60 with ns. 417, 419), a fact that I myself was later able to verify. I agree with Pentiricci (*op.cit.*) that these three small holes cannot prove the former existence of a diadem at this point. Besides, in theory not only behind the presumed head of Tiridates his alleged diadem should have left traces, as suggested by Hugo Meyer himself, but especially so in the hair of the represented youth - where there are likewise no traces of a formerly here existing diadem.

**Personally I wonder, why Hugo Meyer had not studied the head of the togate youth on Frieze B in front of the original and had not chosen to illustrate the details of the relief he was interested in with photographs of the original - where actually almost nothing of these alleged traces is visible.**

**As we shall see below (cf. *infra*, at Chapter V.1.h.2.)), Stephanie Langer and Michael Pfanner (2018), who, like many other scholars follow Marianne Bergmann in assuming that the alleged original portrait of Domitian on Frieze B has been recut into the extant one of Vespasian (cf. *supra*, at Chapter I.1.1.), have likewise documented their new relevant ideas only working from photographs of a plaster cast.**

On 8th March of 2019, I had again the chance to discuss the Cancellaria Reliefs in front of the originals with Giandomenico Spinola and Claudia Valeri. - As a result of this, I maintain my earlier conclusion that the head of the togate youth on Frieze B (**Fig. 2; Figs. 1 and 2 drawing; figure 12**), in my opinion from the very beginning representing Domitian, has *not* been reworked from another portrait.

### III. A comparison of the interpretations of the Cancellaria Reliefs by Tonio Hölscher (2009a) and Giandomenico Spinola

In the following discussion I will refer to Giandomenico Spinola's observations that he generously shared with me on 24th September 2018, when we were discussing the Cancellaria Reliefs standing in front of those panels. He also wrote me all this in an E-mail on October 15th 2018 that I may publish here with his kind consent (cf. *infra*, n. 420; and below, at *The Contribution by Giandomenico Spinola on the Cancellaria Reliefs*).

I myself found it at first difficult to believe that only two reliefs should have belonged to whatever monument this may have been, as for example Tonio Hölscher<sup>375</sup> suggests, because (as I had at first erroneously assumed) in both friezes the represented processions move from right to left - at least if both friezes were attached to the same side of this monument; let alone, if both friezes actually showed an *adventus*, as Hölscher<sup>376</sup> likewise assumes.

In the meantime, I have written Chapter I.3., a discussion of the question of whether or not both friezes may have been the horizontal panels in the passageway of an arch. - I myself follow Massimo Pentiricci's relevant hypothesis, and hope to support it with our visualization, which Franz Xaver Schütz and I have produced for the purpose; cf. here **Figs. 1 and 2 of the Cancellaria Reliefs, drawing, 'in situ'**.

Hölscher<sup>377</sup> writes: "Ovviamente dopo la morte di Domiziano [the two Cancellaria friezes] furono staccati dal monumento originario per essere rilavorati per un secondo impiego sotto il successore Nerva. Tale nuova destinazione tuttavia i rilievi non l'hanno mai raggiunta, perché rimasero in un deposito ...". - Personally I follow Michael Pfanner (1981), who has, in my opinion, proven that the second carving phase of Frieze A, in the course of which the face of Domitian was reworked into the (unfinished) portrait of Nerva, was done when this panel was still *in situ* (cf. *supra*, n. 258, in Chapter I.3.2.; cf. Chapter II.1.a); and n. 318, in Chapter II.1.d).

Hölscher discusses the fact that scholars disagree in case of Frieze A whether a *profectio* of an emperor is represented or else an *adventus*. Because of some iconographic details, he himself is of the opinion that we witness an *adventus*<sup>378</sup>: in a *profectio* we should rather expect to see a horse that is ready to be mounted by the emperor<sup>379</sup>, in addition to this, Frieze A depicts some soldiers, who, according to Hölscher, in a *profectio* scene should be shown in full armour, including helmets. Since a horse is missing in Frieze A and the soldiers do not wear helmets, these facts, in case they should be as crucial as suggested by Hölscher, would mean that Frieze A cannot possibly represent a *profectio*<sup>380</sup>. But note that the soldiers on Frieze A *are armed*<sup>381</sup>, which is

<sup>375</sup> T. HÖLSCHER 2009a, 56.

<sup>376</sup> T. HÖLSCHER 2009a, 58. - In the meantime, I have also realized that on Frieze B two groups are meeting that move from opposite directions towards this meeting point (cf. *supra*, at Chapter I.3.).

<sup>377</sup> T. HÖLSCHER 2009a, 54-56.

<sup>378</sup> T. HÖLSCHER 2009a, 56.

<sup>379</sup> T. HÖLSCHER 2009a, 56, 57. For that, cf. also J.M.C. TOYNBEE 1957, 11, who discusses the same relief in a private collection at Anacapri as HÖLSCHER, which was first published by F. MAGI 1954-55. HÖLSCHER 2009a, 57 with n. 45, Fig. 21, following thus MAGI, *op.cit.*, interprets the scene, pictured on this relief, as an *adventus*, at the same time assuming, like MAGI, that this proves that also Frieze A should be identified as an *adventus*; HÖLSCHER writes on p. 57: "Un rilievo di Anacapri, chiaramente dipendente dal rilievo A [of the Cancellaria Reliefs] rappresenta un *adventus*, se si considera il cavallo condotto molto dietro l'imperatore [with n. 45] (fig. 21)"; cf. p. 59: "Un riferimento sorprendentemente preciso ai monumenti urbani viene trasmesso dal già menzionato Rilievo di Anacapri (fig. 21), che in forma ridotta ripete la composizione del fregio A della Cancellaria. L'imperatore e Minerva coincidono, mentre le restanti divinità e figure ideali sono eliminate; al loro posto due lettori e il conducente di un cavallo seguono il *princeps*". HÖLSCHER, *op.cit.*, overlooks that TOYNBEE 1957, 11-12, had already refuted MAGI's relevant hypothesis. Cf. T. HÖLSCHER 2009a, 58: the caption of his Fig. 21 reads: "Rilievo con scena di *adventus* (secondo altri di *profectio*) di Domiziano. Anacapri, collezione Armando Maresca". In his n. 45, HÖLSCHER 2009a, quotes: "Magi 1954-1955; Koeppel 1969, pp. 144-146". Cf. G. KOEPPPEL 1969, 144-146, Fig. 4: "Friesfragment in Anacapri mit Profectio des Domitian". I agree with TOYNBEE and KOEPPPEL, *op.cit.*, that also the relief in a private collection at Anacapri represents a *profectio*.

<sup>380</sup> T. HÖLSCHER 2009a, 56-57. HÖLSCHER, *op.cit.*, has overlooked that already R. BIANCHI BANDINELLI 1946-48, 260, had observed that the argument 'of a missing horse' does not prevent us from identifying Frieze A as a representation of a *profectio*.

why I doubt that Hölscher's hypothesis is true (to this I will come back below). In addition to this, Hölscher<sup>382</sup> writes that the gesture which Domitian (now Nerva) makes in Frieze A, where he is (presumably) greeting someone with his lifted right hand, who obviously occupied the now missing slab at the far left end of this frieze, is in his opinion only to be found in *adventus* scenes<sup>383</sup>.

Frieze B shows in Hölscher's opinion likewise an *adventus*. Here the original portrait of Domitian has in his opinion been recut<sup>384</sup> into a head of Vespasian, who is crowned by the now heavily destroyed representation of *Victoria*. This personification is flying behind Vespasian (only *Victoria*'s right leg is preserved, behind the emperor's back, and the tip of her left foot). Hölscher<sup>385</sup> observes that *Victoria* does not crown the emperor with a *corona triumphalis* (i.e., a laurel wreath), but with a *corona civica* (made of oak leaves); the far left border of this wreath, with clear indication that it is made of oak leaves, is visible immediately behind Vespasian's head. Hölscher therefore does not believe (as for example Spinola, cf. *infra*) that Vespasian is represented as coming back to Rome after a victorious military campaign. As I have remarked elsewhere, the *corona civica*, with which *Victoria* is crowning Vespasian, identifies this figure on Frieze B as the reigning emperor<sup>386</sup>.

According to Hölscher, Domitian's most important *adventus* into Rome as a civilian - took place in 81, when he rushed to the Urbs to secure his own accession to the throne, leaving behind at *Aquae Cutiliae*, from where he came, his dying brother Titus (!). Note that, in Hölscher's opinion, Vespasian's portrait on Frieze B has been recut from an alleged original portrait of Domitian. Hölscher suggests that it is precisely this *adventus* of Domitian into Rome, which is represented on Frieze B<sup>387</sup>. Hölscher<sup>388</sup>, therefore identifies the togate youth on Frieze B, standing in front of 'Domitian'/ Vespasian, as the *Praefectus urbi*, who, together with the *Genius Populi Romani* and the *Genius Senatus*, has come to meet the new emperor just outside the City of Rome - because this togate youth is not wearing *calcei senatorii*, but the "semplique calcei". As we have seen above, Hölscher's relevant assumption concerning the shoes, a *praefectus urbi* should usually wear, is not true<sup>389</sup>.

Hölscher<sup>390</sup> does not explicitly say so, but it is clear from two of his remarks<sup>391</sup>, that he assumes that the head of the togate youth, who is standing on Frieze B in front of 'Domitian'/ Vespasian (cf. here **Fig. 2; Figs. 1 and**

<sup>381</sup> cf. B. FEHR 1998, 719 with n. 7, p. 720.

<sup>382</sup> T. HÖLSCHER 2009a, 56-57.

<sup>383</sup> the latter assertion is certainly not true. This gesture, made by Domitian (now Nerva) on Frieze A, as well as the fact that he stands still, whereas some of the figures of his entourage move forward, has been interpreted differently by almost all scholars, who observed those facts. See for example J.M.C. TOYNBEE 1957, 9-10; cf. p. 12, and G. KOEPEL 1969, 138-144: "Der Fries A vom Palazzo della Cancelleria mit dem Auszug Domitians", both of whom interpreted Frieze A as the representation of a *profectio*. G. KOEPEL 1969, 143, interpreted the gesture, made by Domitian on Frieze A, in my opinion convincingly as *ingens dextra*: (for the *verbatim* quote of KOEPEL's interpretation, cf. *supra*, n. 222, in Chapter I.2., and at n. 247, in Chapter I.2.1.a). For further discussion of this point; cf. *supra*, in Chapter *Preamble*; Section III., at point 2.).

<sup>384</sup> T. HÖLSCHER 2009a, 56. Also D.E.E. KLEINER 1992, 192, mentions the fact that it has been suggested that in Frieze B the head of the emperor has been recut into that of Vespasian, although she herself on p. 191, and in the caption of her Fig. 158 on p. 190: "... adventus of Vespasian", maintains the traditional opinion that Vespasian was already represented in the original phase of Frieze B.

<sup>385</sup> T. HÖLSCHER 2009a, 56-57. This had, of course, already been observed by F. MAGI 1939, 205, quoted *verbatim supra*, n. 112, in Chapter I.1.; by F. MAGI 1945, 32; and by J.M.C. TOYNBEE 1957, 5.

Cf. M. BERGMANN 1981, 19-20 (who summarizes the relevant opinions of scholars, who have followed F. MAGI's 1945 interpretation of the scene, represented on Frieze B, but does not herself follow this hypothesis).

For the meaning of the fact that Vespasian is crowned by *Victoria* with the *corona civica*, cf. *infra*, at Chapters V.1.i.3.); V.1.i.3.a)).

<sup>386</sup> C. HÄUBER 2009b, 170: Mit der *corona civica* "wurden seit Augustus die Kaiser ausgezeichnet". For the meaning of the *corona civica* in this context, cf. also B. FEHR 1998, 725 n. 35, p. 727 n. 49; and *infra*, at Chapter V.1.i.3.a).

<sup>387</sup> T. HÖLSCHER 2009a, 58.

<sup>388</sup> T. HÖLSCHER 2009a, 58.

<sup>389</sup> T. HÖLSCHER 2009a, 57 (for a discussion, cf. *supra*, at ns. 182-189, in Chapter I.1., and at Chapter I.1.1.). See the discussion of this question by B. FEHR 1998, 725 with ns. 37, 38, who observes that the representation of the togate youth does not give any clue that he might be of equestrian rank.

<sup>390</sup> T. HÖLSCHER 2009a, 58.

<sup>391</sup> T. HÖLSCHER 2009a, 56: "il fregio B (fig. 20) effigia nella seconda versione Vespasiano : infatti, anche il suo volto è rilavorato da un Domiziano di partenza ... L'imperatore si rivolge a un uomo togato davanti a lui ..."; cf. *op.cit.*, p. 57 (quoted *verbatim supra*, at n. 182, in Chapter I.1.).

**2 drawing; figures 12** [Domitian]; **14** [Vespasian]), is *not* a portrait. Marianne Bergmann<sup>392</sup>, like Burghard Fehr<sup>393</sup>, both of whom Hölscher quotes in his bibliography, are in this respect more outspoken: they explicitly deny that the youth's head is a portrait.

Diana E.E. Kleiner<sup>394</sup>, on the other hand, follows in this respect the traditional view by recognizing Domitian's distinct facial traits in the head of this youth:

"The Vestals [on Frieze B; cf. here **Fig. 2; Figs. 1 and 2 drawing; figures 3; 4; 5; 6; 7**] are followed by two lictors in short tunics and mantles and with axes attached to their rods. The one farthest left has his back to the spectator; the one on the right faces front and, along with another lictor on the far right of the relief panel, flanks the central group of Domitian and Vespasian. **Domitian, identifiable by his youthfulness, his slightly protruding upper lip, and especially by his hairstyle, which is full, plastically rendered, and arranged in a tiaralike configuration across his forehead, wears a tunic and toga, the folds of which he grasps with both hands. He has a slight beard on his cheeks and chin, which was probably worn by young men before the traditional first shave at age twenty** [my emphasis]".

In my opinion, especially after having studied myself the head of the togate youth at the original Frieze B in the Vatican Museums on four occasions, Kleiner's description of this head proves beyond any doubt that it is in fact a portrait. This had already been observed by Jocelyn M.C. Toynbee (1957, 7-8, quoted *verbatim supra*, n. 176, in Chapter I.1.), who had thus refuted Andreas Rumpf's objection (1955-56, 115-116, quoted *verbatim supra*, n. 172, in Chapter I.1.) to see in the head of the togate youth on Frieze B (**Fig. 2; Figs. 1 and 2 drawing; figure 12**) a portrait of the young Domitian.

Apropos, his "slightly protruding upper lip", which Diana E.E. Kleiner (cf. *supra*, n. 394) has already observed in Domitian's youthful portrait on Frieze B of the Cancellaria Reliefs (cf. here **Fig. 2; Figs. 1 and 2 drawing; figure 6**). This feature has now been observed as being typical of Domitian's third portrait-type by Diane Atnally Conlin, who illustrates Domitian's bust in the Musei Capitolini (cf. *ead.* 2023, 157, and her Fig. 5 [= here **Fig. 7**]; quoted *verbatim supra*, in Chapter *Preamble; Section III.*; at point 5.)).

**Rumpf (1955-56, 115-116) in his turn had followed Bernhard Neutsch by writing:**

"Der Kopf [of the togate youth on Frieze B] ist nicht von dem Meister der beiden Kaiserköpfe nachträglich gemeißelt. Er ist genau so nichtssagend und verblasen wie die Köpfe der anderen Nebenfiguren (*Taf. 19,2*). Bernhard Neutsch hat ihn mit Recht neben den eines Lictor in demselben Halbfries (*Taf. 19,3* [cf. here **Fig. 2; and Figs. 1 and 2 drawing; figure 10**]) gestellt, von dem er sich in keinem wesentlichen Zug unterscheidet [with n. 7: quoting B. NEUTSCH 1948-49, 109]".

Neutsch's just quoted judgement concerning the togate youth, although it had already - in my opinion convincingly - been rejected by Toynbee (1957, by refuting Rumpf's opinion), is still followed by other scholars.

But before discussing Neutsch's hypotheses, let me alert you to something else. Some of the scholars, who have so far discussed the head of the togate youth on Frieze B (cf. here **Fig. 2; Figs. 1 and 2 drawing; figure 12**) have asserted, exactly like Neutsch, that this head 'is lacking portrait features', to use the phrasing of Burghard Fehr (cf. *supra*, n. 393): "Wegen der fehlenden Porträtzüge ist es überdies wenig wahrscheinlich, daß eine bestimmte Person gemeint ist". Interestingly, by doing so, all of these scholars concentrate only on the facial traits of this youth's head as well as on his elaborate coiffure, thus overlooking the fact that this young man is wearing, in addition to this, "a slight beard on his cheeks and chin, which was probably worn by young men before the traditional first shave at age twenty", as Diana E.E. Kleiner (cf. *supra*, at n. 394)

<sup>392</sup> M. BERGMANN 1981, 20, 22, 24 with ns. 19-22, pp. 25-29. Cf. *supra*, n. 126, in Chapter I.1.

<sup>393</sup> B. FEHR 1998, 725: "Wegen der fehlenden Porträtzüge ist es überdies wenig wahrscheinlich, daß eine bestimmte Person gemeint ist".

<sup>394</sup> D.E.E. KLEINER 1992, 191. Part of this passage was already quoted *supra*, at n. 250, in Chapter I.2.1.c).

writes. For this "Jugendbart"; cf. also Marianne Bergmann (1981, 27, quoted *verbatim supra*, n. 178, in Chapter I.1.).

This kind of beard, given the context, in which this youth appears on Frieze B, may, in my opinion, possibly also be interpreted as a "Thronprätendenten-Bart" ('a beard of a pretender to the throne'), which, if true, would further support the hypothesis formulated here that this togate youth is a portrait of Domitian, who is here represented as the *Princeps iuventutis*, "the heir presumptive to the Empire" (so J.M.C. TOYNBEE; cf. *supra*, at n. 205, in Chapter I.1.). For a discussion of this hypothesis; cf. *supra*, in Chapters I.1.; I.1.1.).

The phenomenon that ancient men could be characterized as 'pretenders to the throne' by wearing such beards, has long ago been discussed by my supervisor Andreas Linfert (1976). If so, this kind of beard is the 'only' portrait feature of this togate youth's head, which no scholar can possibly deny: given the problem, that all the other portrait features, which this head likewise possesses, as Kleiner (*op.cit.*) describes, are denied by those other scholars. - Adding to the features, mentioned by Kleiner herself, also the slightly aquiline nose of this youth, referred to by Hugo Meyer (cf. *infra*, at n. 397) as Domitian's typical "Höckernase", whereas McCann (cf. *infra*, at n. 398), being likewise of the opinion that this facial trait was typical of Domitian's portraits, called this feature an "indented bridge of the nose". See also the deeply set eyes of the togate youth - both features, the aquiline nose and the deeply set eyes, are not those of a normal 'ideal' head. Cf. also John Henderson (2003, 246, quoted *verbatim infra*, in Chapter V.1.i.3.), who discusses the portrait features of the togate youth's head that have been observed by Anthony Bonanno (1976, 56-57).

I have known these specific beards, discussed by Andreas Linfert (1976), since my supervisor was studying this subject back in the 1970s and, of course, likewise since a long time the beard of the togate youth on Frieze B of the Cancellaria Reliefs (cf. here **Fig. 2; Figs. 1 and 2 drawing: figure 12**). Nevertheless, I have only now realized the possibility to interpret this youth's specific beard as a "Thronprätendenten-Bart". The reason being a discussing with Hans Rupprecht Goette of a different ancient portrait, in the course of which Goette mentioned this term to me in an E-mail of 15th December 2020. This has finally 'opened my eyes' concerning the beard, worn by this togate youth - young Domitian.

I am referring here to Hadrian's portraits of the Delta Omikron ( $\Delta\omicron$ ) type (cf. here **Fig. 3**), and *infra*, in volume 3-2, at *Appendix IV.c.1.*).

See for this youthful portrait-type of Hadrian now Goette (2021); and *infra*, in volume 3-2, at *A Study on the consequences of Domitian's assassination ...*

*Or: The wider topographical context of the Arch of Hadrian alongside the Via Flaminia which led to the (later) Hadrianeum and to Hadrian's Temples of Diva Matidia (and of Diva Sabina?). With discussions of Hadrian's journey from Moesia Inferior to Mogontiacum (Mayence) in order to congratulate Trajan on his adoption by Nerva, and of Hadrian's portrait-type Delta Omikron ( $\Delta\omicron$ ) (cf. here **Fig. 3**). **Langer and Pfanner** (2018, 60, in their Chapter "2.9.1 Forschungsgeschichte") **comment on Neutsch's hypotheses as follows:**

"... war der archäologische Fokus stark auf den Stil und die Bildsprache der Reliefs gelegt [with n. 42].

Dazu gehörte auch die Unterscheidung der Meisterhände, wie sie seit dem frühen 20. Jahrhundert für alle Gattungen der Klassischen Archäologie gepflegt wurde. Man übersah nicht, dass Fries B schwächer, steifer und ausdrucksärmer als Fries A ist, was zu der Mutmaßung führte, dass nicht 1 Meister bzw. 1 Werkstatt, sondern mindestens zwei mit der Ausführung der Reliefs betraut gewesen sein müssen [with n. 43]. **Solche Überlegungen wurden schon 1948/49 von B. Neutsch grundlegend diskutiert. Er kam durch stilistische Analysen zu dem Schluss, dass mindestens vier Meisterhände zu scheiden seien, wobei jeder dieser Bildhauer eine Frieshälfte ausgeführt habe [with n. 44]. Seine Ergebnisse wurden seither kaum**

**mehr in Frage gestellt und dürfen heute als *communis opinio* und als einer der wenigen Punkte gelten, über die man sich einig zu sein scheint** [my emphasis].

**In their notes, Langer and Pfanner provide references, but not for their last remark, which has surprised me, because I had not realized so far that this point is allegedly *communis opinio*.**

Elsewhere Langer and Pfanner repeat the opinion of Neutsch (1948-49, 109) concerning the togate youth and the lictor **figure 10** on Frieze B (cf. here **Figs. 1 and 2 drawing**), that, as we have seen above, was followed by Rumpf (1955-56), and refuted by Toynbee (1957), but without giving Neutsch credit for this idea.

Langer and Pfanner (2018, 64) write: "**Dasselbe Phänomen der geklonten Kopfreiheit findet sich auf Frieze B. Unabhängig von Geschlecht und Status oder von ihrer göttlichen bzw. menschlichen Natur sind die Köpfe der **Figuren 1, 2 und 3** wie aus einem Guss; auch die Köpfe des Liktors (**Figur 10**) und des jugendlichen Togatus (**Figur 12**) könnten ähnlicher kaum sein** (s. Taf. 50 ) [with n. 63; my emphasis]". Cf. here **Figs. 1; 2; and Figs. 1 and 2 drawing: figure 10; figure 12**.

In their n. 63, Langer and Pfanner write: "**Die Tatsache, dass beide Köpfe so offensichtlich von der Hand eines Künstlers stammen und ihnen jeder individuelle Zug gleichsam fehlt, spricht auch gegen die Deutung des jungen Togatus als historische Persönlichkeit. Siehe dazu näher Kap. 2.9.3** [my emphasis] ". To this I will come back below (cf. *infra*, at Chapter *V.1.h.1.*)).

Let's now return once again to the hair-style of the togate youth/ Domitian on Frieze B (here **Figs. 1 and 2 drawing: figure 12**).

Richard Neudecker<sup>395</sup>, who calls his contribution "Il lusso in età flavia", writes that contemporary poets mocked about the fact that now even men spent hours at the hairdressers. He writes that in the Flavian period the *toga* comprised much more cloth than before - like those worn by the togate youth/ Domitian and Vespasian on Frieze B of the Cancellaria reliefs (cf. here **Fig. 2; Figs. 1 and 2 drawing: figures 12** [Domitian]; **14** [Vespasian]) - to the effect that a man, who wanted to put on such a garment, needed help of another person. Apart from the facts that these togas hindered the movements of those who were wearing them, and that all these new fashions were extremely expensive.

Neudecker mentions also that Domitian wrote a text about the care of the hair:

"Certo la toga non sembra avere lasciato molte possibilità alla moda. Cionostante, un paragone tra i togati dei Rilievi della Cancellaria [with n. 25] (fig. 2 [cf. here **Fig. 2; Figs. 1 and 2 drawing**]) e quelli dell'*Ara Pacis* augustea [with n. 26] mette in luce un mutamento dei costumi pieno di significati: in età flavia, la toga diviene ancora più ricca di tessuto, di fatto limitando sempre più pesantemente la libertà di movimento di coloro che la indossavano [with n. 27]. Questa moda comportò la necessità di avere un aiuto al momento di mettersi l'indumento e intensificò con ciò il ricercato stile di vita, a prescindere dai sempre più alti costi di manifattura. Ancora di più, una nuova moda dell'acconciatura comportò un sensibile incremento di spese, quasi un segno distintivo di uno stile di vita così lussuosa ... [after describing the famous complex hair-styles of the ladies in the Flavian period, he continues] Ancora più interessante che in questa fase nei ritratti degli uomini si riscontri una premura analoga [with n. 29]: i capelli sulla fronte non scendono più in ciocche, ma vengono composti con riccioli a fuoco e pomate in file (*gradus*) e boccoletti (*anuli*) (fig. 3). Persino l'inevitabile spreco di tempo era un argomento di discussione: al barbiere - dice Marziale [with n. 30, quoting: "Mart. VIII, 52."] - può crescere la barba ... Negli scritti di età flavia tali acconciature maschili alla moda sono segnalate senza eccezioni come negative, perché fungevano da segni di lusso [with n. 31]. Ma evidentemente proprio a questo fu dovuto il loro successo. Dei circa centoquaranta ritratti maschili di età flavia, circa la

<sup>395</sup> R. NEUDECKER 2009, 355. In his notes he provides references. The caption of his Fig. 2 reads: "Rilievo della Cancellaria, particolare. Città del Vaticano, Musei Vaticani". The caption of his Fig. 3 reads: "Ritratto maschile di età flavia. Firenze, Galleria degli Uffizi".

metà presenta questi boccoli. Non a caso i *coiffeurs* divennero sempre più ricchi [with n. 32], e addirittura lo stesso Domiziano scrisse nientemeno un libello sulla cura dei capelli [with n. 33, quoting: "Suet. Dom. XVIII"].]

In his **notes 25-33**, Neudecker provides references and further discussion.

Hugo Meyer<sup>396</sup> (in my opinion erroneously) believed that the original phase of Frieze B showed the Emperor Nero, crowning the client king Tiridates of Armenia with a diadem (*i.e.*, the togate youth standing in front of him; cf. here **Figs. 1 and 2 drawing: figures 14** [Vespasian, the alleged Nero]; **12** [Domitian, the alleged Tiridates]), a ceremony that in reality, in Hugo Meyers opinion, had taken place on the Roman Forum in AD 66. Hugo Meyer further believed that this alleged head of Tiridates, in the Flavian phase of the Cancellaria Reliefs, had been recut into the extant portrait of the young Domitian.

To Diana E.E. Kleiner's above-mentioned catalogue of facial traits, typical of Domitian (cf. *supra*, at n. 394), Hugo Meyer<sup>397</sup> added that the head of the togate youth on Frieze B comprises also Domitian's typical "Höckernase". McCann<sup>398</sup>, being likewise of the opinion that this facial trait was typical of Domitian's portraits, called this feature an "indented bridge of the nose".

I agree with Hölscher and Spinola (cf. *infra*) that the emperor on Frieze B is shown as coming back to Rome, or in other words, that he is still standing outside the *pomerium* of the City of Rome, since the *Genius Populi Romani*<sup>399</sup> (here **Figs. 1 and 2 drawing: figure 13**), standing in the background right between the represented emperor and the togate youth in front of him, sets his left foot on an object which obviously represents a *cippus* marking the *pomerium*-line of Rome<sup>400</sup>.

But contrary to Hölscher, thus following Spinola, I identify the represented emperor in the original phase of Frieze B with Vespasian, and the togate youth, who is leading the 'representatives' of the City of Rome (*Genius Senatus* and *Genius Populi Romani*), who have come to the *pomerium* of the City of Rome to welcome the emperor, with his son Domitian (here **Figs. 1 and 2 drawing: 12** [Domitian]; **14** [Vespasian]).

For my relevant assumptions, cf. *supra*, at n. 117, in Chapter I.1.; and *infra*, in Chapters V.1.h.1.; V.1.i.3.); VI.3; and at *The major results of this book on Domitian*.

To Hölscher's suggestion to interpret the *Genius Senatus*, the *Genius Populi Romani*, and the togate youth, as the 'representatives' of Rome<sup>401</sup>, I will come back below.

Besides, Vespasian is clad on Frieze B in a *tunica* and a *toga*<sup>402</sup>, and, provided Frieze B showed this emperor *from the very beginning*<sup>403</sup>, it is only conceivable that his *adventus* in Rome in AD 70 is pictured on this panel.

<sup>396</sup> H. MEYER 2000, 135, 137-138; cf. *supra*, n. 130, in Chapter I.1

<sup>397</sup> H. MEYER 2000, 136: "Die Identifizierung des jungen Togatus [on Frieze B] wird auch durch dessen auffällige Höckernase gestützt, für die sich an Münzbildnissen [256] Vergleiche finden", with n. 430..

<sup>398</sup> MCCANN 1972, 260.

<sup>399</sup> for the relevant passage, to which I refer here, cf. T. HÖLSCHER 2009a, 57.

the allegorical figure on Frieze B, discussed here, is usually and, in my opinion, correctly identified as the *Genius Populi Romani* (so for example H. MEYER 2000, 126 with n. 402; T. HÖLSCHER 2009a, 58). Personally, I therefore do not follow B. FEHR 1998, 720-725, who is of the opinion that this representation should instead be identified as the god Terminus, and (cf. *op.cit.*, pp. 723-724) that the bearded man standing right behind him, by many scholars regarded as the *Genius Senatus*, should instead be identified as the mythical king of Rome, Numa Pompilius. For a discussion of the *Genius Senatus* and of the *Genius Populi Romani*, cf. *supra*, at Chapter I.1.

<sup>400</sup> for that, cf. G. KOEPEL 1969, 172-174, quoted *verbatim infra*, at n. 416. See also *infra*, in Chapters V.1.e); and V.1.f).

<sup>401</sup> so already J.M.C. TOYNBEE 1957, 9, quoted *verbatim supra*, at n. 197, in Chapter I.1.1.

<sup>402</sup> so D.E.E. KLEINER 1992, 191.

<sup>403</sup> for different interpretations, cf. H. MEYER 2000, 131-132 with n. 416, Figs. 242; 243, pp. 136-138; Figs. 257-259 (the first phase of Frieze B showed Nero crowning king Tiridates of Armenia with a diadem); pp. 126-127, 128, 134-135, Figs. 251; 252 (the second phase of Frieze B showed the *adventus* of Vespasian, with the young togate Domitian standing in front of him); and T. HÖLSCHER 2009a, 56 (the first phase of the Frieze B showed the *adventus* of Domitian, the second phase the *adventus* of Vespasian).

In order to understand, where exactly the represented scene is supposed to take place, we need to know, that Vespasian in this very moment comes back from the East, and precisely from the Great Jewish War, where he has left behind his elder son Titus, who would finally finish this revolt victoriously. Rose Mary Sheldon has studied this war in great detail in many of her publications<sup>404</sup>.

In theory, therefore, Vespasian's *adventus* visible on Frieze B, could only be staged on the *Via Appia*, and precisely right in front of the *Porta Capena* within the so-called Servian city Wall (cf. here **Fig. 58**).

If so, Frieze B would (under normal circumstances) show the Emperor Vespasian after the ritual performed at the building called *Mutatorium Caesaris* on the *Via Appia*, which stood immediately outside this city gate: there victorious generals, coming home from a campaign conducted in the East of the Empire, had to change from military into civilian garb<sup>405</sup>. But we happen know that in Vespasian's case this was not true.

Cf. *supra*, at **ns. 195-201**, in Chapter *I.1.1.*). To this I will come back below (cf. *infra*, in Chapter *V.1.i.3.*); summarized in Chapter *The major results of this book on Domitian*).

Already Magi in 1939 and 1945, and some of the other scholars, discussed *supra*, in Chapter *I.1.*:

Bianchi Bandinelli (for F. MAGI and R. BIANCHI BANDINELLI; cf. *supra*, **n. 112**), Fuhrmann 1940 and 1941 (cf. *supra*, **n. 113**), Toynbee 1946 and 1957<sup>406</sup>, Kähler 1958<sup>407</sup>, Daltrop<sup>408</sup>, Keller<sup>409</sup>, and Koepfel (1969<sup>410</sup> - but see KOEPEL 1984, both quoted *verbatim infra*);

- had identified the emperor on Frieze B and the togate youth in front of him as Vespasian and Domitian respectively (cf. here **Figs. 1 and 2 drawing: figure 14** [Vespasian]; **12** [Domitian]):

Hammond (1953, 136; cf. *supra*, **n. 18**) identified the togate youth with Domitian. Note that these scholars obviously took for granted that Vespasian's portrait had not replaced a different portrait. Of the same opinion were also Erika Simon (1960; 1963 - but see SIMON 1985, both accounts quoted *verbatim supra*, at **n.**

<sup>404</sup> for the Great Jewish Revolt, also called Great Jewish War, cf. R.M. SHELDON 2007, 10, Chapter "Chronology": "66-73 CE Great Jewish Revolt; 70 CE Titus captures Jerusalem. Destruction of the Temple; 73 CE Fall of Masada".

For this war in detail, cf. *op.cit.*, Part II, pp. 129-152: "The Jews against Rome". R.M. SHELDON 2007, 139, writes about the beginning of Vespasian's campaign: "The Jewish military victory over the Twelfth Legion gave new hope to the extremist cause in Jerusalem ... When news of the defeat reached Nero, he did not choose a negotiated settlement with the rebels. The emperor appointed a veteran commander, Vespasian, to prepare a new campaign. In 67 CE, Vespasian was dispatched with sixty thousand men; he was joined by his son Titus, who marched a legion from Alexandria [with n. 60]".

Cf. her n. 60 on p. 251: "The army of Vespasian consisted of three distinct legions: the Fifth, the Tenth and the Fifteenth. There were also twenty-three auxiliary cohorts, six *alae* of cavalry and the auxiliary troops of King Agrippa, King Antiochus of Commagene, Soemus of Emesa and Malchus of Arabia (Josephus, *BJ* 3.64-9; *Vita* 26-30)".

For short summaries of some of R.M. SHELDON's relevant publications, discussed in relation to some buildings and toponyms in ancient Rome, cf. C. HÄUBER 2017, 178, 200, 518. Cf. *supra*. Chapter *I.1.*, **ns. 171, 189**; in Chapter *I.1.1.*, **ns. 195, 198, 200, 201**; in Chapter *I.2.*, **n. 229; ns. 412, 413, 455**, in this Chapter *III.*; and *infra*, **n. 476**, in Chapter *VI.3.*

<sup>405</sup> cf. C. HÄUBER 2014a, 265, 274-275; C. HÄUBER 2017, 248. For that, cf. also G. KOEPEL 1969, 194: "Beim Betreten des Stadtgebietes wechselte der Kaiser die Kleidung [with n. 272: "Von Hadrian und Marc Aurel ist diese Mutatio Vestis schon beim Betreten italischen Bodens überliefert."] ... Hier erscheint deutlich der Unterschied zwischen Domi und Militiae. Dem Bereich Domi entspricht das Stadtkleid, Militiae das Kriegsgewand".

<sup>408</sup> G. DALTRÖP 1966, 41 Taf. 31 (cf. *supra*, **n. 112**, in Chapter *I.1.*

<sup>409</sup> E. KELLER 1967, 211, 215.

<sup>410</sup> G. KOEPEL 1969, 172 with n. 157 (quoted *verbatim supra*, at **n. 157**, in Chapter *I.1.*).

181, in Chapter I.1.), and Bianchi Bandinelli and Mario Torelli (1976; cf. *supra*, n. 32), and are now Paris (1994b; cf. *supra*, n. 47), Pfeiffer (2009; cf. *supra*, n. 59), Pollini (2017b; cf. *supra*, n. 72), Chabrečková (2017; cf. *supra*, n. 73), Sheldon (2023, in press; cf. *supra*, n. 74), Spinola and Valeri (cf. *supra*, in *Introductory remarks and acknowledgements*; and Spinola (cf. below, at *The Contribution by Giandomenico Spinola on the Cancellaria Reliefs*), and I myself.

There are, of course, some problems with this interpretation of Frieze B (Fig. 2; Figs. 1 and 2 drawing), which, after what was said above, we could call: "Vespasian's *adventus* into Rome in AD 70, or Domitian welcomes Vespasian at the *pomerium* of the City of Rome". If we accept this interpretation of Frieze B for a moment, we must consider a historical fact which seems at first glance to contradict this assumption.

Domitian did *not* meet his father Vespasian for the first time in AD 70 at Rome - after Vespasian's victories in the Jewish War and in the Civil War of 68-69. Domitian, for this first meeting with his father after four years of separation, had instead gone from Rome all the way down the *Via Appia* to Beneventum<sup>411</sup>.

As already mentioned, we also know that at the time, when Vespasian is shown on Frieze B in his *adventus* in Rome in October of AD 70, the Great Jewish War<sup>412</sup> was still fought for him by his elder son Titus<sup>413</sup>. Other problems relate to the shoes<sup>414</sup>, the young Domitian is wearing on Frieze B (in case it is him, who is represented there), and to the question, why this scene has deliberately been located at the *pomerium* of Rome, although the first meeting of Domitian and Vespasian had occurred at Beneventum.

Elisabeth Keller<sup>415</sup> rightly observed in this context, referring to Frieze B of the Cancellaria Reliefs: "Vespasian hat schon beim Betreten Italiens die Toga angelegt, hat in Benevent seinen Sohn begrüßt und ist nun in Rom selbst angekommen. Noch befindet er sich außerhalb des Pomeriums, wie die Beile an den Fasces der Liktoren zeigen [my emphasis]".

For a discussion of those lictor; cf. *supra*, at Chapter I.2.1.c) *The problems, connected with the lictors and soldiers on both friezes of the Cancellaria Reliefs* (cf. here Figs. 1; 2).

And Gerhard Koepfel (1969), as I have only realized much later, had already answered all the above posed questions, but in his publication of 1984, he should interpret Frieze B very differently<sup>416</sup>. In the following will be quoted first the relevant section from Koepfel's publication of 1969, and second from his publication of 1984.

<sup>411</sup> J.M.C. TOYNBEE 1957, 5; H. KÄHLER 1958, 255. For a discussion of the 'four years of separation of Domitian and Vespasian', and for the meeting of Domitian and Vespasian at Beneventum; cf. *supra*, in Chapter *Preamble*; Section III.; at point 2.).

<sup>412</sup> cf. R.M. SHELDON 2007, 141: "The death of this emperor [Nero, in 68 AD] meant that Vespasian's commission as general had expired, and accordingly he discontinued his military activities [conducted by himself in the Great Jewish War since 67 AD, a revolt, which should last until 73 AD]. He obtained his recognition as emperor from the Senate and the troops in the West in December 69, and he entered Rome in early 70 CE. He left his son Titus to finish the Jewish campaign". Cf. *supra*, ns. 171, 189; Chapter I.1.; ns. 195, 198, 200, 201; in Chapter I.1.1.; at n. 229, in Chapter I.2.; at ns. 404, 413, 455, in this Chapter III.; and *infra*, n. 476, in Chapter VI.3.

<sup>413</sup> cf. D. KIENAST, W. ECK and M. HEIL 2017, 105-107: "Titus (24. Juni 79 - 13. Sept.[ember] 81) Geb.[oren] 30. Dez. 39 (?) in Rom ... Name: T. FLAVIUS VESPASIANUS ... Wichtige Einzeldaten: 69 Annahme des Caesarnamens (Juli oder August); T. CAESAR VESPASIANUS. Übertragung des Oberbefehls im Jüdischen Krieg (Ende 69). Wahl zum PRINCEPS IUVENTUTIS (21. oder 22. Dez.[ember] 69). Aug.[ust]/Sept.[ember] 70 Einnahme von Jerusalem. T. CAESAR VESPASIANUS IMPERATOR (Imp. T. Caesar Vespasianus ...). 71 ... Sacerdos collegiorum omnium, sodalis Augustalis ... 79 Erhebung zum Augustus (24. Juni = dies imperii): IMP. TITUS CAESAR VESPASIANUS AUGUSTUS ...13. Sept.[ember] 81 Tod: Gest.[orben] in seiner Villa bei Aquae Cutiliae. Bestattet erst im Mausoleum Augusti (?), dann im templum gentis Flaviae. Consecratio: DIVUS TITUS (AUG.) / cos. designatus seit 11. Dez.[ember] 69 / cos. I 1. Jan.[uar] - Ende Juni 70 / cos. design.[atus] seit Mitte März 71".

<sup>414</sup> for a detailed discussion of this subject, cf. *supra*, at Chapter I.1.

<sup>415</sup> E. KELLER 1967, 211.

<sup>416</sup> G. KOEPEL 1969, 172-174. In his footnotes 157-159, 162-165, KOEPEL 1969, 172, 174, quoted references In his n. 159 on p. 172, KOEPEL 1969, wrote: "F. Magi (I rilievi flavi [1945] 106ff.) interpretiert die Szene als Begegnung in Benevent. - E. Simon ... [1960, 152ff.] sieht hier mit Recht den Adventus des Kaisers an der Pomeriumsgrenze ...". KOEPEL erred in this point, MAGI had instead written exactly as SIMON, *op.cit.*; that Frieze B shows Vespasian's *adventus* into Rome. For the relevant *verbatim* quotations from MAGI, 1945, 106, 111, cf. *supra*, n. 194, in Chapter I.1.1. Cf. G.M. KOEPEL 1984, 7, 8, 31, 33.

Koeppel (1969, 172-174) wrote:

"Das Relief B von der Cancellaria mit dem Adventus des Vespasian

Die Deutung des Reliefs (Bild 16) wird dadurch erschwert, daß der Fries eine spätere Interpretation des Ereignisses vom Jahre 70 darstellt, als Vespasian nach Rom kam. **Die Hauptfigur des Reliefs ist nicht Vespasian, sondern Domitian** [with n. 157]. Wir wissen, daß Domitian seinem Vater bis Benevent entgegenging, und daß einige Senatoren mit Mucianus bis nach Brundisium gezogen sind, um den neuen Kaiser zu empfangen [with n. 158]. Den literarischen Quellen entgegengesetzt scheint jedoch die Interpretation zu sein, die wir in diesem Fries B von der Cancellaria vor uns haben [with n. 159] ... Zwischen den beiden aufeinander ausgerichteten Gestalten [*i.e.*, Vespasian and Domitian] befindet sich ein behauener Stein, der etwas schräg im Boden steckt, worauf sich der Genius Populi Romani mit seinem linken Fuß stützt. Dies kann nur als die Pomeriumsgrenze der Stadt Rom erklärt werden. In dem Stein kann man einen der Cippi erkennen, die diese Grenze markierten [with n. 162]. Immer wieder spielt im Adventus und in der Profectio die Trennung der Bereiche Domi und Militiae eine nicht zu übersehende Rolle, die durch die Trennung in der Relief-Komposition sichtbar ist [with n. 163]. So verhält es sich auch in Relief B [page 173, Abb. 16; page 174] von der Cancellaria: der Stein steht an dem Einschnitt in der Komposition, an dem sich zwei Bewegungsrichtungen treffen.

Auch von den anderen Adventus-Reliefs herkommend kann man diese Deutung vertreten. In Wirklichkeit hat Domitian seinen Vater nicht in Rom sondern in Benevent empfangen. Das Relief steht also im Widerspruch zur literarischen Überlieferung. Aber wir dürfen in diesem Fries keinen Bericht des Ereignisses sehen, sondern vielmehr eine Propaganda, die sich als solche auch in den literarischen Quellen feststellen läßt: **Domitian, der die Stadt für seinen Vater gehütet hat, übergibt Vespasian bei seiner Ankunft das Imperium** [with n. 164]. Für die Darstellung eines solchen Gedankens ist eine Begegnung in Rom viel sinnvoller als ein Treffen in Benevent ...

Im Gegensatz zum Profectio-Fries [*i.e.*, Frieze A], wo die Bewegung in einem Zug nach links verläuft und über die Grenze des Reliefs hinausweist (Bild 3), ist hier in der Komposition ein Aufeinander-Zukommen der Bewegungen festzustellen. Das ist im Thema des Adventus selbst begründet, der ja ein Begegnung darstellt oder eine Ankunft an einem festen Ort im Gegensatz zur Profectio, die ins Offene hinausführt. Die Form des Frieses ist für diese Darstellungsweise nicht geeignet, was schon die Tatsache, daß man von 'Frieshälften' sprechen kann, anzeigt. Im Grunde sind hier zwei statische Bilder in ein Friesband hineingesetzt und durch zusätzliche Figuren verbunden [with n. 165; my emphasis]".

In his notes 157-165, Koeppel provided references and further discussion.

Koeppel (1984, 7) wrote on Frieze B (**here Figs. 1 and 2 drawing, figures 14 [Vespasian]; 12 [Domitian]**):

**"Wie M. Bergmann überzeugend nachwies, muß der Vespasian (Kat. 8/14) vielmehr als Umarbeitung eines Domitiansbildnisses erkannt werden, was wiederum die Deutung des togatus im Vordergrund, Kat. 8/12, als Domitian ausschließt** [with n. 47, providing references]. Obgleich vieles am Relief B (Kat. 8) noch ungeklärt bleiben muß, besonders die Rolle des dem Kaiser zugekehrten togatus, kann an der Deutung des Vorganges als adventus Augusti festgehalten werden [with n. 48; my emphasis]".

Cf. his **note 48**, where he quoted G. Koeppel (1969, 172-174, 188-194).

Cf. Koeppel (1984, 8, on Frieze B): "... Zwischen 12 und 14 steht auf der Erde ein konkav profiliertes Gebilde, ähnlich einer ara, das allgemein als Angabe des pomerium gedeutet wird (s. Simon 1960), von Keller (1967) aber als Statuenbasis gesehen wird".

Cf. Koeppel (1984, 31, on Frieze B): "2 Göttin im Hintergrund ... vielleicht eine Statue darstellend ... Eher Virtus als Roma (s. dazu S. 7)".

Cf. Koeppel (1984, 33, on Frieze B): "12. Togatus im Vordergrund, leicht nach rechts gewandt, in toga und calcei. Leichter Backenbart. - Zumeist als Domitian, aber auch als Nerva (Schefold, 1949), Ordo Equester

(Rumpf, 1955-56) und Hadrian (McCann 1972) gedeutet. Da **Figur 14** ursprünglich Domitian darstellte (s. dazu S. 7), muß die Deutung als Kaiser für diese Gestalt aufgegeben werden.

13. Halbnackte Jünglingsgestalt im Hintergrund mit Idealfrisur ... Sein linker unbeschuhter Fuß steht auf einem ara- oder cippusähnlichen Gebilde (Pomeriumscippus?). Von Keller wird die ganze Gestalt als Statue angesehen und mit Recht eher als Honos denn als Genius Populi Romani bezeichnet. Dazu s.[siehe] S. 7.

14. **Domitian/ Vespasian im Vordergrund** ... Der rechte Unterarm ist erhoben, die Handfläche zur linken Reliefseite hin geöffnet wie zum Gruß. A.M. McCann (1972) hat erkannt, daß dieser Kopf eine Umarbeitung des ursprünglichen Bildnisses darstellt in dem sie Trajan erkennt. **Daß im Urbild vielmehr Domitian zu erkennen ist, hat M. Bergmann (1981) überzeugend dargelegt** (s. S. 7) [my emphasis]."

Hölscher<sup>417</sup> concludes his interpretations of both Cancelleria friezes as follows:

"Posto che tali letture siano giuste, entrambi i Rilievi della Cancelleria rappresentano due scene decisive dell'*adventus* dell'imperatore a Roma: un arrivo civile per l'inizio ufficiale del suo regno e uno militare dopo una vittoriosa campagna, probabilmente contro i sarmati nel 93 d.C. Una conferma di tale spunto è offerta dall'Arco di Traiano a Benevento: lì sulla facciata rivolta verso la città nei due rilievi inferiori ai lati del passaggio viene raccontato il primo arrivo dell'imperatore a Roma nel 99 d.C. dopo l'assunzione del potere, mentre nell'attico ne viene celebrato il ritorno trionfale dalle guerre contro i daci nel 106 d.C. **Per entrambi gli imperatori [i.e., Domitian and Trajan] il primo *adventus* si delinea come accoglienza legittimante da parte dei rappresentanti dell'Urbe, il secondo invece come ricevimento trionfale e panegirico** [my emphasis]". -

For the reliefs at the Arch of Trajan at Beneventum, mentioned here by Hölscher; cf. *supra*, at Chapter II.3.3. and here **Fig. 46**.

Spinola, in my opinion rightly, identifies that divinity as *Dea Roma*<sup>418</sup>, who on Frieze A urges the emperor (originally Domitian, now Nerva) to move forward, by touching the emperor's lower left arm<sup>419</sup>, in a scene, which Spinola, in my opinion correctly, interprets as a *profectio*<sup>420</sup> (to this I will come back in detail below). Spinola rightly observes that the goddess is shown in the same iconography as on Frieze B<sup>421</sup> (where she is enthroned at the far left; many scholars agree that the latter representation should be identified as the goddess Roma, although some scholars believe that the figure, shown on Frieze B, is not the goddess herself, but rather a statue representing her<sup>422</sup>). The divinity walking immediately in front of Domitian on Frieze A, as rightly observed by Spinola<sup>423</sup>, is Domitian's personal patron goddess Minerva<sup>424</sup>.

According to Spinola's interpretation of panel A, the gods Minerva and Mars lead Domitian (now Nerva) to a promised victory in a military campaign<sup>425</sup>, which the emperor reluctantly begins. Reluctantly, since although he was obviously earlier rushing forward, is right now represented as standing still for a moment<sup>426</sup>, but he greets at the same time a not preserved figure, or else several figures (definitely *Victoria*,

<sup>417</sup> T. HÖLSCHER 2009a, 58.

<sup>418</sup> H. MEYER 2000, 126, identifies this representation as *Virtus*. According to T. HÖLSCHER 2009a, 56, the represented divinity should be identified as *Roma* or *Virtus*. For a discussion, cf. *supra*, at Chapter I.2. *The amazon-like figure on Frieze A: Dea Roma, not Virtus*.

<sup>419</sup> For this gesture in detail, cf. J.M.C. TOYNBEE 1957, 9-10; B. FEHR 1998, 719 with n. 5.

<sup>420</sup> cf. Giandomenico Spinola's E-mail, which he wrote me on October 15th, 2018, that with his kind consent is published below as *The Contribution by Giandomenico Spinola*. Also H. MEYER 2000, 132-133, identified the represented scene on Frieze A as a *profectio*.

<sup>421</sup> so already F. MAGI 1945, 74-75.

<sup>422</sup> R. BIANCHI BANDINELLI 1946-48, 259, interpreted this figure on Frieze B as "immagine di Roma" ('a statue of the *Dea Roma*'). So also G. KOEPEL 1984, 31 (quoted *verbatim supra*, at n. 416), and J. HENDERSON 2003, 250. For my own hypothesis; cf. *infra*, at Chapter V.I.i.2.) *My own hypothesis concerning the statue-type (?) of the Dea Roma on Frieze B of the Cancelleria Reliefs: it is reminiscent of Vespasian's coins commemorating his revival of the archaic festival of the Septimontium*, and here **Fig. 112**.

<sup>423</sup> so also B. FEHR 1998, 719.

<sup>424</sup> so also D.E.E. KLEINER 1992, 192, who adds: "Minerva was Domitian's divine patroness".

<sup>425</sup> so also H. MEYER 2000, 133.

<sup>426</sup> for the various interpretations of Domitian's relevant action shown in Frieze A, cf. B. FEHR 1998, 719-720: it has *inter alia* been interpreted as Domitian's "gesto di modestia" in front of Iuppiter by F. GHEDINI 1986, 292 (the complete passage is quoted *verbatim supra*, n. 232, in Chapter I.2. Cf. H. MEYER 2000, 126: "Gebets- oder Bittgestus"; cf. p. 133: "Das Thema des Frieses ist eine bevorstehene

but possibly also Iuppiter?<sup>427</sup>) at the far left end of Frieze A, where only the left wing of the representation of *Victoria* is preserved. As we have already seen above, Domitian's action here and the gesture he makes with his right arm have been interpreted very differently<sup>428</sup>.

According to Spinola, Frieze A, therefore, refers to a military campaign, which (seen in retrospect<sup>429</sup>) has resulted in the promised victory, to which *Dea Roma* herself, as well as *Victoria* (and possibly Iuppiter?) and Minerva and Mars had urged, and/or faithfully led Domitian. The promise being represented on this panel by means of the *Victoria* (and Jupiter?) at the far left end of Frieze A<sup>430</sup>.

At Jupiter's orders and under his guidance the Romans fought their wars, and to him they consequently attributed their military victories<sup>431</sup>. As we shall see in a minute, in the specific case of Domitian, the poet Martial (9, 101, 14 ss.) had actually reported that belief *expressis verbis*.

Besides, Hölscher's assertion that frieze A, by considering the garment the represented emperor (Domitian/Nerva) is wearing, could just as well be a *profectio* scene or an *adventus*, is in my opinion not necessarily true:

"Parimente la veste militare da viaggio si riscontra sia nella partenza sia nel ritorno dalla guerra"<sup>432</sup>.

Or, in other words: there actually existed *very* different iconographic schemes for both, *profectio* and *adventus*, from which the artists of this period could choose - which, as I believe, was actually done here - so why represent these highly important statements related to an emperor's military career in similar fashion? For example in an *adventus*, which could *not* be mistaken for a *profectio*, the emperor could nevertheless wear civilian garb, namely *tunica* and *toga*, as the emperor (the alleged Domitian, but in my opinion from the very beginning) Vespasian on Frieze B (cf. here **Fig. 2; Figs. 1 and 2 drawing: figure 14**), and Hadrian in his famous *adventus* relief (here **Fig. 91**)<sup>433</sup>.

Although admittedly these two reliefs are not exactly perfect examples of a 'classic' *adventus*-ceremony, because both emperors appear here in civilian garb, at the moment of writing I (had erroneously) assumed

militärische Aktion - deren glücklicher Ausgang vorweggenommen ist -, doch wirkt die statische Haltung des Kaisers selbst in diesem Zusammenhang befremdlich: Roma-Virtus muß ihn drängen [230]"

H. MEYER 2000, 137 (cf. *supra*, ns. 130, 131, in Chapter I.1.), who was of the opinion that the emperor on Frieze A was originally Nero, suggested the following instead: "Der Fries A schildert in halballegorischer Form die vom Staatsrat für gut befundene, erneute Mobilmachung gegen Parthien ... Die Verhaltenheit Neros und seiner Soldaten mag vielleicht als Hinweis darauf zu verstehen sein, daß eigentlich einer diplomatischen Lösung der Vorzug gegeben wurde wäre, wie sie ja schließlich auch zustande gekommen ist". For a summary of the various interpretations concerning this point, cf. now S. LANGER and M. PFANNER, 2018, 60 (quoted *verbatim infra*, at Chapter V.1.g).

I myself follow G. KOEPEL's interpretation (1969, 141-143; quoted *verbatim supra*, n. 222, in Chapter I.2., and at ns. 246; 247, in Chapter I.2.1.a), who interprets Domitian's gesture as *dextra elata* or *ingens dextra*. For a discussion; cf. *supra*, in Chapter Preamble; Section III.; at point 2.).

<sup>427</sup> this was first suggested by E. SIMON 1960, 139-145 with Fig. 4, reconstruction drawing by S. SIMON of Frieze B, with the enthroned Jupiter at the far left of the panel; cf. E. SIMON 1985, 554-555 (quoted *verbatim supra*, at n. 352, in Chapter II.3.2.); so also B. FEHR 1998, 719 with ns. 6-8, p. 720 with ns. 10, 11, cf. p. 729; and T. HÖLSCHER 2009a, 57. This hypothesis was refuted by H. MEYER 2000, 126 with n. 403 (providing a reference).

If, on the other hand, we believe that both friezes showed only 17 figures (cf. *supra*, at n. 38, in Chapter I.1.), we cannot add an additional Jupiter on Frieze A. For a discussion of the hypothesis to assume a representation of Jupiter at the far left end of Frieze A, cf. S. LANGER and M. PFANNER 2018, 76 (quoted *verbatim infra*, at Chapter V.1.i)).

<sup>428</sup> cf. *supra*, n. 222, in Chapter I.2., and at ns. 246, 247, in Chapter I.2.1.a.

<sup>429</sup> so already H. MEYER 2000, 133, also Frieze B shows an event, seen in retrospect; cf. p. 136.

<sup>430</sup> cf. J. POLLINI 2012, 103: "Leading the way [on Frieze A] to a predestined victory [with n. 165] over the barbarians of the north are Domitian's divine *comites* - his patron goddess Minerva and the Roman war-god Mars"; cf. n. 165 (on p. 129): "As suggested at the beginning of the relief by the figure of Victoria, only a wing of which survives in the background". Cf. G. KOEPEL 1969, 142 (quoted *verbatim supra*, at n. 247, in Chapter I.2.1.a).

<sup>431</sup> cf. H. MEYER 2000, 126 (on Frieze A of the Cancellaria Reliefs): "Das übrige ist verloren, doch darf man vielleicht annehmen, daß Juppiter, der Gewährer des Sieges, den Zug angeführt hat [with n. 403, with further discussion]".

<sup>432</sup> T. HÖLSCHER 2009a, 56, cf. the frontispiece of the catalogue F. COARELLI 2009a, and Hölscher's Fig. 19 on p. 56.

<sup>433</sup> cf. *supra*, n. 216, in Chapter I.2.

that both of them were at the represented moment victorious generals. Although I have now realized my relevant error, I nevertheless mention both examples (Figs. 2 and 91) here, because the reasons, why they are pictured this way, are so interesting.

For a discussion of this error; cf. *infra*, in volume 3-2, at *A Study on the consequences of Domitian's assassination ...* To this I will come back below.

**Koeppel (1969, 194, quoted already *supra*, n. 405) wrote that for Hadrian is recorded the *mutatio vestis* - as soon as he had stepped on Italian soil, coming back from a military campaign :**

"Beim Betreten des Stadtgebietes wechselte der Kaiser die Kleidung [with **note 272**: "Von Hadrian und Marc Aurel ist diese *Mutatio Vestis* schon beim Betreten italischen Bodens überliefert ..."] ...".

This information fits the *adventus* relief illustrated here on **Fig. 91**, on which we see Hadrian, not in military garb, as we might expect to see a victorious general in an *adventus*-ceremony, but instead, clad in *tunica* and *toga*, on the other hand he is accompanied by soldiers. - But, as already mentioned, my earlier assumption that Hadrian is shown on this relief (**Fig. 91**) as a victorious general, which I had assumed, following a hypothesis of Michaela Fuchs (2014), has convincingly been rejected by Werner Eck (2019b, 200).

These publications are quoted *verbatim* and discussed *infra*, in volume 3-2, at *A Study on the consequences of Domitian's assassination ... Or: The wider topographical context of the Arch of Hadrian alongside the Via Flaminia which led to the (later) Hadrianeum and to Hadrian's Temples of Diva Matidia (and of Diva Sabina?). With discussions of Hadrian's journey from Moesia Inferior to Mogontiacum (Mayence) in order to congratulate Trajan on his adoption by Nerva, and of Hadrian's portrait-type Delta Omikron (Δο) (cf. here **Fig. 3**) ....; at Chapter II.*

We may wonder, whether Hadrian's changing from military into civilian garb, when first arriving at Italy, as reported by Koeppel (1969, 194), was meant as a gesture of homage to Vespasian. This seems actually to be possible, since Michaela Fuchs (2014, 130) has observed - in a different context - that in the inscription (CIL VI 974 = CIL VI 40524; cf. here **Fig. 29.1**), Hadrian's victory in the Bar Kokhba Revolt was explicitly compared with Vespasian's and Titus's victories in the East. This inscription belonged to a portrait of Hadrian, dedicated to the emperor by the Senate and the Roman People and was (possibly) on display in the Temple of *Divus Vespasianus*

See below at *A Study on Hadrian's portrait-statue from Hierapydna (cf. here **Fig. 29**)*; and *infra*, in volume 3-2, at *Appendix IV.c.1.*; and at *Appendix IV.c.2.*

Because, as we will hear below, Vespasian had done exactly the same in AD 70 - when he came back from his victories in the Great Jewish Revolt or War. Vespasian's *adventus* at Rome in the first half of October AD 70, showing him likewise in *tunica* and *toga* - but without any soldiers in his entourage - is in my opinion represented on Frieze B of the Cancelleria Reliefs (cf. here **Fig. 2; Figs. 1 and 2 drawing: figure 14**). Dio Cassius (65,10), from whom we learn of Vespasian's *mutatio vestis* in AD 70 as soon as he had arrived at Brindisi, even asserted to know Vespasian's relevant motivation to do this.

For a discussion of this point; cf. *supra*, at **ns. 195-201**, in Chapter *I.1.1.*; *infra*, in Chapters *V.1.i.3.*; and *VI.3.*; and in Chapter *The major results of this book on Domitian.*

In the following, I should like to mention again this Arch of Hadrian<sup>434</sup> at Rome, to which Hadrian's *adventus* relief in the Palazzo dei Conservatori (here **Fig. 91**) once belonged, because some scholars confuse it with the former Arco di Portogallo, which stood likewise on the *Via Flaminia/ Via Lata/ Via del Corso*. But contrary to this former Arch of Hadrian, that I am referring to here, which stood right in front of the (later) *Hadrianeum*, and on the west side of the *Via Flaminia/ Via Lata/ Via del Corso*, and parallel to it, the former Arco di Portogallo had actually bridged this road. The Arco di Portogallo stood until 1662, when it was destroyed, circa 358 m<sup>435</sup>

<sup>434</sup> for this Arch of Hadrian, cf. M. FUCHS 2014..

<sup>435</sup> measured on my map Fig. 3.7 of the *Campus Martius*; cf. C. HÄUBER 2017, 63, Fig. 3.5 [= here **Fig. 58**], p. 69, Fig. 3.7 [= here **Fig. 59**]. For that, cf. *supra*, n. 66, in Chapter *I.1.*

to the north of this Arch of Hadrian, and at the same time very close to the original location of the *Ara Pacis Augustae*. An inscription at a Palazzo on the east side of the Via del Corso<sup>436</sup> indicates the approximate location of the former Arco di Portogallo. I have elsewhere summarized the discussions related to this Arch of Hadrian alongside *Via Flaminia* and to the Arco di Portogallo<sup>437</sup> and have marked the former locations of both arches on the maps that accompany my texts.

Cf. here **Fig. 58; 59**, labels: VIA FLAMINIA/ VIA LATA/ Via del Corso; Via della Vite; Approximate location of the Arco di Portogallo; Via in Lucina; Via di Pietra; Arch of Hadrian<sup>438</sup>.

It has always (but erroneously) been assumed that no historical maps of Rome are known, in which the still standing Arco di Portogallo is represented. Franz Xaver Schütz has made a relevant research and found a hitherto not recognized representation of the former Arco di Portogallo on Antonio Tempesta's bird's-eye-view map of Rome (1593; cf. here **Fig. 64.4**).

The reason for the confusion just mentioned (of the Arch of Hadrian in front of the later *Hadrianeum* discussed here with the Arco di Portogallo) is the fact that two other Hadrianic reliefs, the so-called *adlocutio* relief of Hadrian (here **Fig. 91**)<sup>439</sup>, and the representation of the *apotheosis* of Hadrian's wife Sabina (here **Fig. 92**)<sup>440</sup>, had both been reused in late antiquity as decorations of the Arco di Portogallo. Following Ferdinando Castagnoli and Michaela Fuchs<sup>441</sup>, I have in my earlier *Study* (2017) suggested that all three Hadrianic reliefs mentioned here at the Palazzo dei Conservatori: Hadrian's *adventus*, here **Fig. 91** (and the two reliefs that, in late antiquity, had been reused at the Arco di Portogallo, here **Figs. 92: 93**), plus a fourth Hadrianic relief at the Palazzo Torlonia (here **Fig. 94**), had originally belonged to this Arch of Hadrian that stood right in front of the (later) *Hadrianeum*.

Cf. now *infra*, in volume 3-2, at *A Study on the consequences of Domitian's assassination ... Or: The wider topographical context of the Arch of Hadrian alongside the Via Flaminia which led to the (later) Hadrianeum and to Hadrian's Temples of Diva Matidia (and of Diva Sabina?)*. With discussions of Hadrian's journey from Moesia Inferior to Mogontiacum (Mayence) in order to congratulate Trajan on his adoption by Nerva, and of Hadrian's portrait-type Delta Omikron ( $\Delta o$ ) (cf. here **Fig. 3**) ...; at *Introduction*; and at *Chapter II. The Arch of Hadrian alongside the Via Flaminia and the four marble reliefs belonging to it* (cf. here **Figs. 91-94**).

All three Hadrianic reliefs illustrated on **Figs. 91; 92** and **93** are since a very long time re-united in the staircases of the Palazzo dei Conservatori in Rome<sup>442</sup>.

Let's now return to our main subject.

When compared with the iconography, chosen for the representation of the emperor on Frieze B of the Cancellaria Reliefs, who is clad as a civilian, things are very different when we look at Frieze A. Here

<sup>436</sup> for a photograph of this inscription, cf. C. HÄUBER 2017, Fig. 3.5.1 on p. 65. The Palazzo, into which it is inserted, stands on the east side of the Via del Corso, between the junctions of Via del Corso and Via della Vite and Via del Corso and Via in Lucina.

<sup>437</sup> for the former Arco di Portogallo, cf. C. HÄUBER 2017, 111-112, n. 56; map Fig. 3.5, cf. pp. 62-63; map Fig. 3.6, cf. pp. 66-67; map Fig. 3.7 [= here **Fig. 59**], cf. pp. 68-69; map Fig. 3.8, cf. pp. 104-106; map Fig. 3.9, cf. pp. 108-110; map Fig. 3.10. Some scholars regard the former Arco di Portogallo as a gate in the sacred boundary of Rome, the pomerium; cf. Häuber (2017, 111, n. 56, pp. 351-352 with n. 136, pp. 583-584, n. 306).

<sup>438</sup> the former locations of the Arch of Hadrian and of the Arco di Portogallo are both visible on my maps Fig. 3.5 [= here **Fig. 58**] and Fig. 3.7 [= here **Fig. 59**], labels: VIA FLAMINIA/ VIA LATA; Via del Corso; Via della Vite; Approximate location of the Arco di Portogallo; Via di Pietra; Arch of Hadrian. For those maps, cf. *supra*, n. 66, in Chapter I.1.

<sup>439</sup> for the so-called *adlocutio* relief of Hadrian, cf. C. HÄUBER 2017, 20-21, 23, 111-112, n. 56; p. 250, Fig. 5.9 [= here **Fig. 91**]; cf. pp. 520-521.

<sup>440</sup> cf. C. HÄUBER 2017, 20-21, 23, 111-112, n. 56, pp. 242, 246; p. 249, Fig. 5.8 [= here **Fig. 92**], the relief showing the *apotheosis* of Sabina, p. 521.

<sup>441</sup> CASTAGNOLI 1942, 76-77, 82, Fig. 1; M. FUCHS, 2014, 131-144, Figs. 12-23; cf. C. HÄUBER 2017, 20-21, 242, 245-246.

<sup>442</sup> cf. C. HÄUBER 2017, 246.

Domitian (now Nerva) is clearly wearing something else: military garb, as Hölscher<sup>443</sup> himself writes: "L'imperatore, in veste ["militare", cf. *supra*] da viaggio, è immerso in una processione di carattere militare", Simon<sup>444</sup> wrote: "Der Kaiser trägt Feldherrntracht, Tunika und Paludamentum, aber keinen Panzer", and Kleiner<sup>445</sup>, who observes that the emperor is "dressed in a short tunic covered by a mantle (his travelling costume)", in my opinion consequently interprets frieze A as a *profectio*<sup>446</sup>.

**That the emperor (i.e., Domitian, now Nerva) on Frieze A (Fig. 1; Figs. 1 and 2 drawing: figure 6) is definitely shown in a *profectio*-, and not in an *adventus*-scene, has in the meantime been proven by Paolo Liverani.**

Liverani has realized and documented with a colour photograph that the lictor, walking right in front of him, was clad in a red *sagum* (cf. **Figs. 1 and 2 drawing: figure 3**), which automatically means that the emperor was actually clad in the *paludamentum* - because that was coloured purple. In addition to this, Liverani with the following observations makes it clear that 'wearing the *paludamentum*' does not only mean that the emperor is shown in his 'travelling costume', as this detail has been interpreted by Kleiner and Hölscher (cf. *supra*), but rather that wearing the *paludamentum* means **a)** that the scene represented takes place outside the *pomerium* of Rome, and **b)** that this garment is the "segno della potestà militare" of the represented protagonist. To this I should like to add that the soldiers, following Domitian (now Nerva) on Frieze A, are armed, as we have seen above<sup>447</sup>.

Liverani<sup>448</sup> writes: "In altri contesti dobbiamo considerare che anche clienti e *apparitores* erano tenuti a uniformare il tipo e il colore delle loro vesti con quelle indossate dal patrono o dal magistrato che accompagnavano. Per esempio sappiamo che il littore di un magistrato dotato di *imperium* indossava fuori dal pomerio il *sagum*, un mantello corto, di colore rosso in quanto faceva riferimento al *paludamentum* purpureo del magistrato da cui dependeva, **segno appunto della potestà militare** [my emphasis]. Questo fatto è testimoniato dalle fonti scritte [with n. 72], ma si può facilmente riscontrare anche sul littore che precede Domiziano [now Nerva] nel rilievo di *profectio* [i.e., Frieze A] della Cancelleria (fig. 26 [cf. here **Figs. 1 and 2 drawing: figure 3**]). Un simile elemento apporta ulteriori utili elementi alla discussione, sempre vivace, sulla interpretazione dei rilievi, riconfermando una volta ancora la collocazione della scena al di fuori del pomerio".

The scholarly discussion, to which Liverani refers in this passage, that concerns the question whether the scene represented on Frieze A takes place inside or outside the *pomerium* of Rome, has *inter alia* been summarized by Koepfel<sup>449</sup>, and by Fehr<sup>450</sup>. See also the observations by Pentiricci<sup>451</sup>. - This is also elsewhere discussed in this *Study* (cf. at Chapters I.2.1.c); V.1.i.3.); and VI.3.).

**What was said above, supports Spinola's hypothesis that Frieze A actually represents a *profectio*<sup>452</sup>.**

<sup>446</sup> D.E.E. KLEINER 1992, 191.

<sup>447</sup> cf. *supra*, n. 381, and in Chapter I.2.1.c). See also M. PENTIRICCI 2009, 58 with n. 413.

<sup>448</sup> P. LIVERANI 2014, 26 with n. 72 and Fig. 26: "Rilievo della Cancelleria, Musei Vaticani, scena di *profectio* [i.e., Frieze A], dettaglio del littore". See now P. LIVERANI 2021, 87 with n. 19, where he has summarized these findings. For a discussion; cf. *supra*, at Chapter I.2.1.c).

<sup>449</sup> G. KOEPEL 1969, 138-144; cf. pp. 172, 194.

<sup>450</sup> B. FEHR 1998, 718 with n. 3, p. 720 with n. 9, p. 729 with n. 58.

<sup>451</sup> cf. M. PENTIRICCI 2009, 60 (who refers to the relevant interpretations by H. MEYER 2000 of both friezes): "Nel fregio A l'azione rappresentata, la partenza per la guerra, assumerebbe così un carattere del tutto generico e simbolico, come dimostrazione di potenza dal momento che una tale spedizione non ebbe mai luogo. Senza entrare nel merito della questione basterà solo ricordare come alcuni particolari della scena, quali, ad esempio, le scuri sui fasci dei littori, risultino del tutto incompatibili con un preteso contesto urbano dell'azione: risulta di conseguenza non condivisibile anche la ricostruzione proposta da Meyer della scena del fregio B priva di riferimenti a guerre combattute o da combattere".

<sup>452</sup> cf. H. MEYER 2000, 125, 132 with n. 418.

Further assuming that Frieze B represents an *adventus*, as so far most scholars take for granted, these two assumptions seem, in my opinion, also to be corroborated by the actions and by the positionings within the relevant scenes of two of the representatives of Rome, the *Genius Senatus* and the *Genius Populi Romani*.

On Frieze A, a *profectio*, both stand behind the emperor and bid farewell (cf. here **Figs. 1 and 2 drawing, figures 11; 13**)<sup>453</sup>, on Frieze B, an *adventus*, they stand in front of the emperor (cf. here **Figs. 1 and 2 drawing, figures: 11; 13**), since they have come to the *pomerium*-line of the City (*i.e.*, in reality a gate in the Servian City Wall) to welcome him.

**As I have only realized after this Chapter was written so far, the same has already been observed by Marion Meyer (2006, 134): "Die Interpretation der Szene auf dem Cancellaria-Relief [Frieze A] ist umstritten [with n. 84]. Eindeutig für eine Profectio und gegen einen Adventus spricht m. E. [meines Erachtens, 'in my opinion'] die Tatsache, daß die Genien des Senats und des römischen Volkes hinter dem Kaiser stehen und dadurch zeigen, daß der Kaiser Rom verläßt [with n. 85]".**

In her **notes 84 and 85**, Marion Meyer provides references.

Besides, precisely the missing of characteristic architectural features, in the case of Frieze B, for example a city gate - for the *pomerium*, which at the time coincided with the Servian city Wall (cf. *supra*, n. 199, in Chapter I.1.1.) - makes interpreting the Cancellaria Reliefs so hard, but perhaps the simple fact that the slabs used for those panels are so thin, can explain the relevant decisions of the artists involved.

#### **Also for the interpretation of Frieze B, Spinola has added an important new observation**

Already earlier scholars have stressed the fact that we witness something that we could call the investiture of the represented Emperor Vespasian, because the figure in question is crowned by the personification of *Victoria* with a *corona civica* (cf. *supra*). And Koepfel (1969)<sup>454</sup> had observed still something else: 'Frieze B of the Cancellaria Reliefs and the lower *adventus* of Trajan's Arch at Beneventum (cf. his Figs. 14 and 15 [cf. here **Fig. 46**]) both represent the beginning of the reign of a new emperor, in [a way by] which the approval of the Senate and the Roman People have been expressed'.

I believe that Koepfel - contrary to his own opinion, expressed in his article of 1984 - was right with his just quoted statement from his publication of 1969.

To this we should add that the situation represented on Frieze B of the Cancellaria Reliefs, as Domitian's contemporaries knew, was Vespasian's first public appearance at Rome as emperor in AD 70. And that, after

---

<sup>453</sup> cf. A.M. MCCANN 1972, 271. See also J.M.C. TOYNEBEE 1957, 9-10 (quoted *verbatim supra*, n. 233, in Chapter I.2.), and H. MEYER 2000, 132-133: "Der bärtige *genius senatus* [250] hat die Rechte zum Abschiedsgruß erhoben, sofern sich nicht auch sein Gestus an den vermuteten Juppiter am linken Friesende richtete [230]. Für den *genius populi* gilt wohl dasselbe".

Cf. S. LANGER and M. PFANNER 2018, 75 (on Frieze A): "Hinter der Kaisergruppe stehen zwei männliche Personifikationen (Figur 11 und 13). Ihre betonte Zusammengehörigkeit, ihre identische Haltung und ihre Ikonographie lassen sie als *Genius Senatus* (Figur 11) und *Genius Populi Romani* (Figur 13) und damit die personifizierte Formel des *senatus populusque Romanus* identifizieren, eine Deutung, die allgemein anerkannt ist [with n. 105, providing references]. Umstritten ist, ob es sich bei den erhobenen Händen um einen Gruß- oder Abschiedsgestus handelt".

**To be precise: at least the *Genius Senatus* on Frieze A bids farewell with his lifted right hand; the right arm of the *Genius Populi Romani* is lifted like that of the *Genius Senatus*, but the artists have forgotten to represent his right hand (a fact which has so far not been realized) - as so many other details in both friezes. For a discussion; cf. *infra*, at Chapter V.1.d.)-**

After this note was written, I found the relevant observation by J. POLLINI 2017b, 117: "The imperial figure [on Frieze A, Domitian/ Nerva], shown *paludatus* as he leaves the *pomerium*, is sent on his way by Roma, who places her arm beneath his left ... The personified, bearded Senate, standing farther to the right at the emperor's back, raises his hand in a gesture of farewell (it cannot be a gesture of greeting, since this figure does not face the emperor). Next to the personified *Senatus* is the semi-nude *Genius Populi Romani*, also alluding topographically to the *pomerium* of the City from which the emperor is now departing". - This was already quoted *supra*, in Chapter I.2.1.c).

<sup>454</sup> cf. G. KOEPEL 1969, 193, for the *verbatim* quote *supra*, at n. 200, in Chapter I.1.1. For those reliefs of the Arch of Trajan at Beneventum, cf. *supra*, at n. 359, in Chapter II.3.3., and here **Fig. 46**.

he had returned from the East, where he had already been hailed as emperor on July 1st, AD 69 by the troops stationed at Alexandria.

**Whereas the Senate had only "conferred all the usual powers on Vespasian" (documented by the *lex de imperio Vespasiani*, CIL VI 930) on 21st/22nd December 69, that is to say, a day after Vitellius' death<sup>455</sup>. For a discussion of the fact that Vitellius had already died on 20th December 69, and that the Senate could only meet on 22nd December; cf. *supra*, in Chapter *Preamble*; Section III., at point 1.).**

Spinola's new addition to all this previous knowledge consists in the following observation.

He has alerted me to the possible meaning of the gesture, which, on Frieze B, Vespasian makes with his right hand. The emperor lifts it and lays it on the left shoulder of the togate youth standing in front of him (in reality, Vespasian's right hand does not touch the youth's shoulder, but from a distance, it seems as if it does - for a good photograph, cf. R. NEUDECKER 2009, 356, Fig. 2).

Other scholars assume that Vespasian is greeting the youth in front of him (cf. *infra*) - I believe that both is true. Since Spinola takes it for granted that Frieze B shows the original portrait of that emperor and, therefore, Vespasian and Domitian (see also below, at *The Contribution by Giandomenico Spinola on the Cancellaria Reliefs*), he believes that Vespasian's gesture means that he thus bestows the (future) reign of the Empire on his younger son Domitian. Which, if true, would mean that Frieze B shows not only the very moment of the investiture of the Emperor Vespasian himself - as has already earlier been observed by many scholars - but at the same time the (future) investiture, or the "legittimazione" (so Spinola) of Domitian. Before commenting on Spinola's hypothesis, I should like to add some important observations by Simon (1963) that I had previously (in my *Vorlesung* of 2009) overlooked.

Simon has actually provided answers for those questions that have been asked above: why does the togate young Domitian - if it is him, who is represented in Frieze B - wear this particular kind of shoes, and why is

<sup>455</sup> G.E.F. CHILVER and B.M. LEVICK 1996, 1590 (the passage is quoted *verbatim* in more detail *supra*, n. 171, in Chapter I.1.); cf. *supra*, n. 412.

For the *lex de imperio Vespasiani* (CIL VI 930) and the procedure of the investiture of a Roman emperor, and especially of Vespasian, cf. D. MANTOVANI 2009, *passim*; cf. p. 27; "I poteri conferiti da Senato e popolo erano quelli che Augusto aveva accumulato nel corso della sua vita; a partire probabilmente da Caligola nel 37 d.C. furono appunto conferiti in blocco all'inizio del regno. ... Anche a proposito di Vespasiano, Tacito (*Hist.* 4,3,3) attesta che il Senato, all'indomani della morte di Vitellio, avvenuta il 20 o 21 dicembre 69, >decretò a Vespasiano tutte (le prerogative) consuete per i principi< (*Romae senatus cuncta principibus solita Vespasiano decernit*). Possiamo perciò concludere che tale senatoconsulto fu poi approvato dal comizio (in una data imprecisabile, ma difficilmente da collocare oltre il febbraio 70), che lo trasformo in *lex*. Come avveniva di solito, la *lex* fu incisa nel bronzo ed esposta alla conoscenza del pubblico, verosimilmente in più copie. Una tavola di una di queste copie destinate alla pubblicazione - anzi, di una copia particolarmente sontuosa, per spessore e scrittura - è quella oggi esposta nella Sala del Fauno dei Musei Capitolini". - Cf. p. 25, Fig. "1. La *lex de imperio Vespasiani* nella Sala del Fauno. Roma, Musei Capitolini". See also J. POLLINI 2012, 421-422, Fig. IX.13. To this I will come back *infra*, in Chapter V.1.i.3.)

Cf. C. HÄUBER 2014a, 152-153 (on the complex events at Alexandria in AD 69, orchestrated by the *Praefectus Aegypti*, Ti. Iulius Alexander, and on the special high Nile flood in AD 70): since Vespasian was the first Roman emperor, who was *not* related to any of his divinized predecessors, he chose "l'investiture égyptienne" as pharaoh of Egypt (so E. ROSSO 2007, 127), that took place at Alexandria in Egypt. These events occurred according to some prior to the acclamation of Vespasian as *imperator* (in the sense of 'Roman emperor') by the troops stationed at Alexandria on July 1st, 69 AD (Tacitus, *Hist.* 4,81), although this is contradicted by Suetonius (*Vesp.* 7,1), who asserted that Vespasian learned of the victory of M. Antonius Primus at Cremona, when he [*i.e.*, Vespasian] left the Temple of Sarapis at Alexandria; cf. G. HÖLBL 2004, 530-531; *id.* 2005, 327, quoted *verbatim infra*, in volume 3-2, at *Appendix II.a*) - and the victory at Cremona occurred only in December of 69; cf. G.E.F. CHILVER and B.M. LEVICK: "Vespasian (Titus Flavius (RE 206) Vespasianus), emperor AD 69-79 ... , in: *OCD*<sup>3</sup> (1996) 1590, quoted *verbatim infra*, in volume 3-2, at *Appendix I.d*). See also L. BRICAULT and R. VEYMIERS 2018, 141 with n. 79, quoted *verbatim infra*, in volume 3-2, at *Appendix I.c*).

For Tacitus' account, Vespasian's trip to Alexandria and his actions there, for example for "Vespasian's Serapis miracles" and their meaning, see now in great detail T. LUKE 2018; cf. p. 209 (for "Vespasian's Serapis miracles", quoted *verbatim infra*, at Chapter IV.1.).

Cf. A. HEINEMANN 2018, 236: "The summer Vespasian entered Alexandria and was hailed emperor (and, by consequence, pharaoh), a particularly bountiful Nile flood occurred (or, rather, was said to have occurred)". With n. 102, providing references. Cf. *infra*, in volume 3-2, at *Appendix II.a*).

For Vespasian, cf. also *supra*, ns. 171, 189, in Chapter I.1., ns. 195, 198, 200, 201, in Chapter I.1.1., and n. 229, in Chapter I.2., at ns. 404, 412, 413, in this Chapter, and at n. 476, in Chapter VI.3.

For Vespasian's recognition by the Roman Senate as Roman emperor on 21st/22nd? December AD 69, D. KIENAST, W. ECK and M. HEIL 2017, 101.

the scene, depicted in Frieze B, located at Rome, instead of at Beneventum, where Domitian actually met with his father Vespasian for the first time in AD 70 ?

Simon<sup>456</sup> wrote: "Das wichtigste Ereignis des Frieses [*i.e.*, Frieze B] ist aber nicht die Rückkehr des Vespasian, sondern die Begegnung mit seinem jüngeren Sohn Domitian, der ihm als Togatus gegenübertritt [this is precisely, what already BIANCHI BANDINELLI 1946-48, 259, had written, quoted *verbatim infra*, at Chapter IV.1.]. Für ihn ist die Frisur, die in zwei Wellenreihen das Antlitz rahmt, bezeichnend. Seine Züge sind weich und knabenhaft. Eigentlich müßte er den heimkehrenden Vater begrüßen, aber dieser hebt merkwürdigerweise vor seinem [page 10] Sohn die Hand zum Gruß. Im Hintergrund flankieren die Genien des Senats und des römischen Volkes diesen Jüngling, so daß er als Hauptgestalt wirkt.

**Dargestellt ist zwar die Rückkehr des Vespasian im Jahre 70 nach Chr. aber in der Art, wie Domitian sie gesehen wissen wollte. Das Relief ist eine spätere Rekonstruktion jenes Ereignisses aus seiner Sicht:** Rom war im Jahre vorher, dem berühmten Vierkaiserjahr, Kriegsschauplatz gewesen. Der achtzehnjährige Domitian hatte sich dort aufgehalten und angeblich den >Kampf um das Kapitol<, den er später in einem Epos schilderte, mitgekämpft. Die einfachen militärischen Schuhe, die Domitian und der Genius senatus im Fries tragen, spielen vielleicht darauf an. **Am 1. Januar 70 n. Chr. war der Prinz [*i.e.*, Domitian] praetor urbanus geworden und so der höchste Beamte in der Stadt, denn die Konsuln Vespasian und Titus waren im Krieg. Als solcher tritt er dem ankommenden Vater [*i.e.*, Vespasian] gegenüber, und zwar wahrscheinlich am pomerium, der rituellen Stadtgrenze, die vielleicht durch den etruskischen Altar unter dem Fuß des Genius populi Romani angedeutet ist. Bis zu dieser Grenze reichte die Befehlsgewalt des von außen kommenden Imperators [*'imperator'* here meant in the sense of 'magistrate, endowed with imperium'<sup>457</sup>, in this specific case the *imperator*/ victorious general Vespasian]. Domitian behauptete später im Senat, er habe seinem Vater und seinem Bruder [*i.e.*, Titus] das imperium [here in the sense of 'the reign as emperor'] gegeben (Sueton, Dom. 13) und im Jahre 94 sagte der Dichter Martial von ihm (9, 101, 14 ff.): >Er führte als Knabe für seinen Juppiter den ersten Krieg und obwohl er bereits die Zügel der julischen Kaisermacht in seinen Händen hielt, übergab er sie und war der dritte in dem Erdkreis, der doch ihm gebührt hätte<. Domitian als Begründer der flavischen Dynastie ist der eigentliche Inhalt des Frieses [*i.e.*, Frieze B; my emphasis]"**

For the events on the Capitoline Hill on 18th/ 19th December 69, the >Kampf um das Kapitol<, to which Simon (1963, 10) in the above-quoted passage refers, cf. *supra*, in Chapter *Preamble*; Section III.; at point 1.): and *infra*, in volume 3-2, at *Appendix I*.

Concerning Simon's (1963, 10) assertion that Domitian had allegedly written an epos >Kampf um das Kapitol<, I found, after this Chapter was written up to this point, that, according to Eric M. Moormann (2022, 150 with n. 96), Domitian, before himself becoming emperor, had actually written some literary texts. Moormann writes: "But there might be personal involvement as well, that is, Domitian's own keen interest in literature. As we know, he organized literary competitions and wrote some works before he became an emperor" [with n. 96: "See, for example, Coleman (1986); Nauta (2002) 328 ..."], quoted in more detail and discussed *infra*, in volume 3-2, at *Appendix IV.d.4.b*).

<sup>456</sup> cf. E. SIMON 1963, 9-10.

<sup>457</sup> cf. Peter Sidney DEROW: "*imperium* ...Viewed generally, *imperium* represents the supreme [page 752] authority of the community in its dealings with the individual, and the magistrate in whom *imperium* is vested represents the community in all its dealings. In practical terms, *imperium* may be seen as the power to give orders and to exact obedience to them (cf. *imperare*, to command). It was symbolized by the fasces borne by the lictors, of which the dictator had 24, the consul 12, and the praetor 6, to which was added the axe when the magistrate left the precincts of the city ...It [*imperium*] was voted to succeeding emperors [*i.e.*, after Augustus] at their accession by the senate ... though ratification of the senate's decree by a *lex curiata* remained a formal requirement [mentioning the "*lex de imperio Vespasiani*"; for that, cf. *supra*, n. 171, in Chapter I.1.] ...", in: *OCD*<sup>3</sup> (1996) 751-752; C. HÄUBER 2006, 40 n. 1; C. HÄUBER 2009a, 314 with ns. 40, 41, 44; C. HÄUBER 2014a, 619, 622 with ns 118, 119. For *imperium*, see also *supra*, n. 199, in Chapter I.1.1.

Cf. J. POLLINI 2018, 213: "... the Latin military term *imperator* (commander in chief) [with n. 18, providing a reference]"

For Domitian's own literary texts; cf. also *supra*, in Chapter *Preamble*; Section *II.*; in Chapter *I.1.*; and *infra*, in volume 3-2, at *Appendix I.d.1.a*). Rose Mary Sheldon, when correcting the final version of *Appendix I.d.1.a*), has added the following comments: "On Domitian writing a poem on the fall of the Capitol: Martial 5.5.7. He also wrote a poem on the capture of Jerusalem (Val. Flaccus, *Argon.* 1.10-12). Secondary reference to Domitian's poem: Brian Jones, *Domitian* [1993], p. 12".

As mentioned before, we should ask ourselves, whether on that very day, which is pictured on Frieze B (here **Fig. 2**; provided, the represented *adventus* ceremony had taken place at all - which was *not* the case !), Vespasian proceeded any further from the point, where he is depicted on this panel, or in other words: whether he entered the City of Rome. Not only, because his *imperium* reached only up to the *pomerium*, as observed by Simon (1963, 10) in her just quoted account, but also because he, being a victorious general, who wished to be granted a triumph for his Great Jewish War by the Senate, had to stay outside the *pomerium* until, on the basis of this decision by the Senate, the actual triumphal procession could begin. In this specific case, the Senate granted all three of them - Vespasian and Titus for their victories in the Great Jewish War - and Domitian for his contemporary actions at Rome (and/ or for his military 'adventure' in Gaul and Germany in AD 70?) - three separate triumphs (Josephus, *BJ* 7.5.3), which they decided to celebrate together: this happened in June of 71 AD<sup>458</sup>.

For discussions of all that; cf. *infra*, in the Chapters *V.1.i.3.*); *V.1.i.3.a*); in *The major results of the book on Domitian*; and in *The visualization of the major results of this book on our maps*; see also *infra*, in volume 3-2, at *A Study of the consequences of Domitian's assassination ...; Introduction*; Section *I.*; and at *Appendix I.c*)).

Fehr has summarized the various interpretations of Vespasian's gesture on Frieze B by earlier scholars. He himself is of the opinion that the original state of Frieze B had represented Domitian instead (whose head was later recut into a portrait of Vespasian), who was represented in the course of endowing the togate youth, standing in front of him, with a *mandatum*<sup>459</sup>.

As already said, I myself, like Filippo Magi, identify the togate youth on Frieze B as a portrait of Domitian (cf. here **Figs. 1 and 2 drawing: figure 12**). So also Heinrich Fuhrmann, Ranuccio Bianchi Bandinelli, Jocelyn M.C. Toynbee, Giuseppe Lugli, Erika Simon (1960; 1963 - but see SIMON 1985, both accounts quoted *verbatim supra*, at **n. 181**, in Chapter *I.1.*), Mason Hammond, George Maxim Anossov Hanfmann, Georg Daltrop, Elisabeth Keller, Gerhard Koepfel (1969 - but see KOEPEL 1984; both accounts are quoted *supra*, at **n. 416**), Diana E.E. Kleiner, Hugo Meyer, Stefan Pfeiffer, John Pollini, Barbora Chabrečková, and Rose Mary Sheldon (for all of them, cf. *supra*, in Chapter *I.1.*)<sup>460</sup>, Claudia Valeri and Giandomenico Spinola (cf. *supra*, at

<sup>458</sup> cf. C. HÄUBER 2017, 179; cf. *supra*, at **ns. 195, 196**, in Chapter *I.1.1*. For the suggestion that Domitian was granted his separate triumph because of his military 'adventure' in AD 70, cf. *infra*, at *Appendix I.c*).

<sup>459</sup> B. FEHR 1998, 727-728 with ns. 50-55; p. 728: "Wenn die vorgeschlagene Deutung zutrifft, so sehen wir Domitian [*i.e.* Vespasian] bei der Delegation einer seiner Aufgaben, die ihm durch das Projekt des Tempelneubaues [*i.e.*, the re-erection of the (fourth) Temple of *Iuppiter Optimus Maximus Capitolinus*, which had again been destroyed in 80 AD, after Domitian's father Vespasian had rebuilt it shortly after its destruction in 69 AD, cf. *op.cit.*, pp. 724, 727] zugefallen sind, an einen hierfür kompetenten Mitbürger [*i.e.*, the togate youth] ..."; pp. 721-724 (for his identification of the here-so-called *Genius Populi Romani* on Frieze B with the god Terminus); p. 723: "Das von Ovid und Tibull gezeichnete Bild des Gottes glaube ich auf Relief B in dem unbeweglich [with n. 24: "Terminus' Bein auf Relief B soll möglicherweise wirklich als steif im anatomischen-pathologischen Sinne verstanden werden ..."] wie der Grenzpfahl an seinem Platz verharrenden, lanzenbewehrten 'Postensteher' wiederzuerkennen, dessen von Getreideähren, Trauben, Feigen, Mandeln usw. überquellendes Füllhorn - ein häufiges Attribut der Göttin Pax - den reichen Ertrag seiner friedensstiftenden Wacht birgt"; pp. 723-724 with ns. 26, 27, quoting E. SIMON 1985, 551f., for the identification of the here-so-called *Genius Senatus* on Frieze B as Numa Pompilius, a suggestion, which he himself follows; p. 724: "Numa soll, neben vielen anderen kultischen Institutionen, sowohl das Fest der Terminalia - nach einigen auch den Kult des Terminus - wie auch, der Mehrzahl der Quellen zufolge, das Priestertum der Vesta geschaffen haben [with n. 28, providing references]". Cf. *supra*, at **ns. 181, 182**, in Chapter *I.1.*; see also Chapter *I.1.1*.

<sup>460</sup> cf. *supra*, **n. 10** (for G. LUGLI); **n. 59** (for S. PFEIFFER 2009); **n. 72** (for J. POLLINI 2017b); **n. 73** (for B. CHABREČKOVÁ 2017); **n. 74** (for R.M. SHELDON 2023, in press); **n. 112** (for H. FUHRMANN 1940; and 1941); **ns. 113, 117** (for F. MAGI 1939; 1945); **n. 18** (for M. Hammond 1953); **ns. 118, 176** (for J.M.C. TOYNBEE 1946; 1957); **ns. 119; 181**, in Chapter *I.1.* [and **n. 456** in this Chapter] (for E. SIMON 1960; 1963); **n. 120** (for G.M.A. HANFMANN 1964 and G. DALTRUP 1966); **ns. 121, 177** (for E. KELLER 1967); **ns. 122, 173** (for G. KOEPEL 1969); **n. 129**, in Chapter *I.1.* [and **n. 394** in this Chapter] (for D.E.E. KLEINER 1992); **n. 130** (for H. MEYER 2000. As already mentioned above, H. MEYER was of the opinion that the extant portrait of the young Domitian on Frieze B had been recut from a portrait of King Tiridates).

*Introductory remarks and acknowledgements*; and below in Chapter *The major results of this book on Domitian*), and Giandomenico Spinola (in this Chapter; and below, at *The Contribution by Giandomenico Spinola on the Cancellaria Reliefs*).

I thus follow Toynbee (1957), who explained the fact that the young Domitian is wearing on Frieze B the 'simple *calcei*' differently from Simon in her just quoted account of 1963. Toynbee (1957) and Simon (1960 and 1963) are so far the only scholars to assume in the case of Domitian's 'wrong shoes', that this odd iconographic detail may be explained with Domitian's *deliberate* decision. - It is, of course, also possible that those 'wrong shoes' were simply an error on the side of the artist, who carved them (cf. *supra*, at **ns. 144, 156**, in Chapter *I.1.*, and *infra*, in Chapter *V.1.h.1.*).

As we shall see below (cf. *infra*, at Chapter *V.1.h.1.*), Stephanie Langer and Michael Pfanner (2018, 60 with n. 52) have observed that Marianne Bergmann's (1981) very influential hypothesis has been rejected. According to this hypothesis, which has been followed by many scholars (cf. *supra*, at Chapter *I.1.1.*), the emperor on Frieze B had originally been Domitian, whose head was allegedly reworked into the extant portrait of Vespasian. The scholars who, according to Langer and Pfanner (2018, 60, n. 52), have refuted either McCann's hypothesis (1972) that the head of Vespasian has been re-cut from the portrait of Trajan, or Bergmann's hypothesis (1981), that the head of Vespasian has been reworked from the portrait of Domitian, are: Gauer (1973, 350), Darwall-Smith (1996, 172), and Varner (2004, 119f. n. 62).

By the way, Simon assumed this in the case of both 'wrong shoes', represented on Frieze B. As mentioned before<sup>461</sup>, to my knowledge, Simon (1960, and in the above-quoted account of 1963; cf. *supra*, at **n. 456**) is so far the only scholar, who has suggested that also the *Genius Senatus* on Frieze B has deliberately been represented as wearing the 'wrong shoes'.

According to Toynbee (1957), Domitian, by choosing to be represented with 'equestrian shoes' on Frieze B, wanted to stress that he held the title *Princeps Iuventutis*, for whom the wearing of those shoes was appropriate. If so, this would mean that Domitian wanted to be characterized as the *Princeps Iuventutis*, or in other words, as "the heir presumptive to the Empire" (J.M.C. TOYNBEE)<sup>462</sup>. Toynbee's observation leads us to the next Chapters, cf. *infra*, Chapter *IV.1.*, and to *The first Contribution by Emanuele M. Ciampini : La regalità domiziana: una nota egittologica*).

**IV. Frieze B of the Cancellaria Reliefs (cf. here Fig. 2) and the Obeliscus Pamphilius/ Domitian's obelisk (Fig. 28)**

On 7th September 2021 Franz Xaver Schütz and I have published an earlier version of this Chapter on our Webserver as a Preview for this *Study* on Domitian, which was updated on 6th October 2021:  
Online at: <<https://FORTVNA-research.org/FORTVNA/FP3.html>>.

**Chapter IV.1. A letter by Giandomenico Spinola concerning the Cancellaria Reliefs (cf. here Figs. 1; 2) and the Obeliscus Pamphilius/ Domitian's obelisk (cf. here Fig. 28)**

I have asked Giandomenico Spinola to summarize for me what we had discussed on September 24th, 2018, while standing in front of the Cancellaria Reliefs. He was kind enough to write me all this in an Email on October 15th, 2018, that I may publish here with his kind consent. See below, at *The Contribution by Giandomenico Spinola on the Cancellaria Reliefs*.

As already discussed above (cf. *supra*, at Chapter III.), and written by himself in this letter, Spinola, in my opinion correctly, identifies the emperor on Frieze B from the very beginning as Vespasian, and the togate youth, standing in front of him, as Domitian. According to Spinola, the gesture, the Emperor Vespasian is making on this panel with his right hand, means that the emperor thus endows his son Domitian with the "legittimazione" (so G. SPINOLA, *i.e.*, the 'legitimation') to become his successor as emperor (to this I will come back below; see also *infra*, at Chapters V.1.i.3.); VI.3.); and at *The major results of this book on Domitian*.

**As Spinola himself has written to me in this E-mail of October 15th, 2018  
(see below, at *The Contribution by Giandomenico Spinola on the Cancellaria Reliefs*),  
his interpretation of Vespasian's gesture is by no means new**

This idea was first published by Heinrich Fuhrmann (1940, Sp. 471-472; *id.* 1941, Sp. 544-545, both quoted *verbatim infra*); but only Fuhrmann (1941, Sp. 544-545, n. 3) mentioned Magi (1939) in his footnote 3.

Already Fuhrmann (1940) had followed Magi's (1939, 205) identification of the emperor on Frieze B, and of the togate youth, standing in front of him, with Vespasian and Domitian (cf. here **Fig. 2; Figs. 1 and 2 drawing; figures 14** [Vespasian]; **12** [Domitian]), but he did not give Magi (1939) credit for those identifications; cf. Magi (1939, 205, quoted *verbatim supra*, **n. 112**, in Chapter I.1.). In addition, Fuhrmann (1940, Sp. 472) asserted (erroneously) that "S. Fuchs" had (allegedly) been first to identify the emperor on Frieze B with Vespasian, which had (allegedly) before been identified with Tiberius; but Fuhrmann did not provide a reference for "S. Fuchs". Fuhrmann (1941) rejected Magi's (1939) likewise (correct) identification of the represented scene on Frieze B as Vespasian's *adventus* into Rome in AD 70.

Of all later scholars, who followed Fuhrmann's (1940, Sp. 472) (erroneous) assertion concerning Siegfried Fuchs's (alleged) first identification of the emperor on Frieze B with Vespasian, only Hugo Meyer provided a reference to the relevant article: 'Siegfried Fuchs 1938', but that has turned out to be wrong; cf. Hugo Meyer (2011, 175, n. 5, quoted *verbatim supra*, in Chapter I.1., at Section: *The Siegfried Fuchs Saga*).

Note that the article in question by Siegfried Fuchs ("Ein neues Bildnis des Kaisers Tiberius") had already been published in 1937, but the author did not (and could not) mention the Cancellaria Reliefs in his text at all, simply because those panels should only be found in 1938 (cf. *supra*, in Chapter I.1., **ns. 5; 113**; and at Section: *The Siegfried Fuchs Saga*).

Magi (1945, 111, quoted *verbatim* below, at **n. 463**) mentioned Fuhrmann's article (1940) in his bibliography on p. XV, and suggested a similar interpretation concerning the gesture, made by Vespasian with his right

hand, as Fuhrmann (1940). But Magi (1945, 111) did not quote Fuhrmann (1940) in his text, nor did he mention that he (possibly independently of Fuhrmann) had had the same idea as Fuhrmann (1940).

Instead of assuming that we should accuse Magi of plagiarism concerning this point, as has already happened in connection with the here-so-called '*Siegfried Fuchs Saga*', I rather ask myself, whether concerning *this* hypothesis something similar could have happened as in the case, mentioned by Hugo Meyer (2011, 175; cf. *supra*, n. 99, in Chapter I.1., quoted *verbatim supra*, n. 374, in Chapter II.4.). Both Hugo Meyer himself (2000) and Horst Herzog (2001) had published contemporaneously, but independently of each other, the (erroneous) idea that it was Nero, who had commissioned the Cancellaria Reliefs.

The Section '*The Siegfried Fuchs Saga*' (cf. *supra*, in Chapter I.1.) is dedicated to the (alleged) fact, asserted by Fuhrmann (1940, Sp. 472) that Siegfried Fuchs had been first to recognize Vespasian on Frieze B. And because Magi (1945, 111) did not mention this (alleged) observation by Siegfried Fuchs in his account, Andreas Rumpf (1955-1956, 112, quoted *verbatim supra*, n. 113, in Chapter I.1.) and Hugo Meyer (2011, 175 with n. 6) have 'between the lines', but erroneously reproached Magi for plagiarism concerning this point.

**To this I should like to add something else: because neither Rumpf (1955-1956, 112), nor Meyer (2011, 175 with n. 6) discussed Fuhrmann (1941), they did not know Magi's article (1939), which Fuhrmann (1941) quotes in his footnote 3. Had they read all this, they could just as well have reproached Fuhrmann for plagiarism, because Fuhrmann (1940) repeated Magi's (1939) ideas, without giving Magi credit for them.**

**It may well be that Heinrich Fuhrmann knew both, Siegfried Fuchs and Filippo Magi, very well, and used to discuss with both their research projects. This could (in theory) explain, why Fuhrmann (1940) mentioned Siegfried Fuchs's current research on Tiberius, and Magi's findings concerning the Cancellaria Reliefs, but the way Fuhrmann has done this has unfortunately created a lot of confusion.**

Magi's own hypothesis (1945, 111), which concerns the meaning of the gesture, Vespasian is making on Frieze B with his right hand, was, in its turn, followed by Ranuccio Bianchi Bandinelli (1946-48, 259, quoted *verbatim infra*), and by George Maxim Anossov Hanfmann ([1964] 108; *non vidi*), but Hanfmann's suggestion has been rejected by Gerhard Koeppel (1969, 172, quoted *verbatim infra*). - To later scholars, who likewise followed Magi's (1945, 111) relevant hypothesis, I will come back below.

At a later time (but in modified form) this idea was formulated by Anne Marguerite McCann (1972; cf. *supra*, n. 114, in Chapter I.1.). As we have seen above, McCann's hypothesis concerning the Cancellaria Reliefs has been refuted, because she (erroneously) dated them to the Hadrianic period. McCann was the first scholar to suggest that also the portrait of Vespasian on Frieze B had been reworked (exactly like the original head of Domitian on Frieze A (**Fig. 1; Figs. 1 and 2 drawing: figure 6**), whose face had been recut into the portrait of Nerva), suggesting that the alleged original portrait of the emperor of Frieze B (**Fig. 2; Figs. 1 and 2 drawing: figure 14**) had represented Trajan, which was later recut into one of Vespasian.

Heinrich Fuhrmann (1940, Sp. 471) wrote: "Der ältere Mann [*i.e.*, Vespasian on Frieze B] hält wie segnend seine rechte Hand gegen den Jüngling hin". Cf. Sp. 472: "**Wohl als erster hat S. Fuchs** [for him, cf. *supra*, ns. 5; 113; 191, in Chapter I.1.] **in dem Kopf des älteren Togatus statt eines alten Tiberius das Porträt des Kaisers Vespasian erkannt**. Der jüngere Togatus kann daher nur einer der beiden Söhne dieses Kaisers, Titus oder Domitian sein. Der Vergleich des Kopfes mit den Bildnissen dieser beiden ergibt, daß dieser jüngere Togatus der jugendliche Domitian ist [with n. 2, providing references]. **Für die Deutung der dargestellten Situation ergibt sich** in Hinsicht auf die Anwesenheit der Roma und der Vestalinnen und unter Berücksichtigung der Tatsache, daß Domitian zur Rechten des Vaters und gleichsam im Zentrum der Gesamtdarstellung steht, **daß der geschilderte Vorgang nur als Einsetzung des Domitian zum Nachfolger des Kaisers durch diesen selbst in Gegenwart der Vestalinnen, des Genius Populi Romani und des Genius Senatus vor Roma verstanden werden kann** [with n. 3: "Domitian hat sich immer als der wahre Nachfolger gegenüber dem älteren Bruder Titus gefühlt"; my emphasisi]".

As we have seen above, Fuhrmann's assertion concerning the alleged observations by Siegfried Fuchs (1938) are not true; cf. Siegfried Fuchs (1937), discussed *supra*, at n. 113, in Chapter I.1.

Cf. Fuhrmann (1941, Sp. 544-545): "Zu den großen historischen Reliefs, die wahrscheinlich dem Schmuck der von Domitian auf das prächtigste neu ausgestatteten Porta Triumphalis angehörten, aber nach seiner Ermordung beseitigt wurden [with n. 2: "AA 1940, 466ff.], wird eine kurze Notiz der Fundumstände sowie eine Beschreibung unter Beifügung zweier Umrißzeichnungen gegeben, die die Plattenfolge der beiden Reliefs verdeutlichen [with n. 3, **quoting F. MAGI 1939**; quoted *verbatim supra*, n. 112, in Chapter I.1.]. Wohl nicht haltbar ist die Beziehung des einen Reliefs [*i.e.*, Frieze B] auf die Ankunft des Vespasian im Jahr 70 und dessen Empfang durch Domitian und damit die Deutung als *adventus*. Das verbietet die Ökonomie der Darstellung. Denn sie macht nicht Vespasian, sondern sinnfällig greifbar den jungen Domitian zum Mittelpunkt der Handlung und der Darstellung. Auch ist Vespasian nicht in der für die *adventus* üblichen militärischen Tracht des imperator, sondern in der Toga dargestellt. **Es kann sich nur um die symbolische Bezeichnung des Domitian als den wahren Nachfolger durch den Vater handeln**, zumal die Handlung in Gegenwart der Vestalinnen sich vollzieht, bei denen die römischen Kaiser ihre letztwilligen Verfügungen niederzulegen pflegten. **Kaum anders als in dieser Richtung kann die Deutung gesucht werden, die Zeugnis für die bestimmte Auffassung des Domitian über die Thronfolge und sein Anrecht auf den Thron ablegt, der doch bekanntlich Titus geradezu die Verfälschung des väterlichen Willens vorgeworfen und sich als wirklichen Nachfolger immer betrachtet hat**", with n. 1: "Sueton v. Dom. 2,3 [my emphasis]".

Langer und Pfanner (2018, 63, in the text of their Abb. 14) interpret Fuhrmann's above-quoted passages as follows: "Abb. 14 Deutungen Relief B: Auswahl der Interpretationsvorschläge", at: "Fuhrmann 1940/1941 / **Inthronisation des Domitian** / Domitian (Fig. 12) wird durch seinen Vater Vespasian (Fig. 14) in Gegenwart des Genius Senatus (Fig. 11), des Genius Populi Romani (Fig. 13), der Vestalinnen (Fig. 3-7) und Roma (Fig. 2) als Kaiser eingesetzt" (the passage in bold has been highlighted like this by the authors themselves).

For Langer and Pfanner's (2018, 63, with their Fig. 2) numbering of the represented figures on Frieze B; cf. the caption of here **Figs. 1 and 2 drawing** (we have followed their numbering on this illustration).

Magi (1945)<sup>463</sup> wrote: "E il gesto del braccio del padre e della mano accostata alla spalle è indubbiamente gesto di saluto paterno e affettuoso. Chi si irrigidisse in una posizione che si direbbe <<attenti>>, senza slancio filiale, senza calore d'affetto, in un atteggiamento che vuole essere studiatamente di freddo ossequio è lui, **il figlio, sicché a ben guardare è proprio la sua figura che finisce, senza parere, per assumere la massima importanza nell'intera composizione**: è il personaggio che raccolta in se stesso, fra tutti gli altri che fanno qualcosa o fanno coppia o gruppo, non fa niente, non ha niente, non si muove, ma sta solo, con mal celato orgoglio sulle labbra e sicura coscienza di sé nello sguardo.

Finisce così che è quasi il padre a rendergli omaggio, di maniera che la situazione si capovolge, e questo omaggio egli lo riceve in presenza di Roma e delle Vestali, del Senato e del Popolo, della Vittoria e dei littori. **Ecco dunque una, e certo la più importante, delle ragioni politiche di questo rilievo. Mettersi in tale rapporto col padre, col fondatore della dinastia flavia al suo ingresso imperiale nell'Urbe, da prevalere sul fratello maggiore d'età ma assente, scavalcandolo quasi, mediante una presunta diretta successione, come già aveva tentato di fare alla morte del padre impugnandone il testamento e reclamando per sé immediatamente il trono** [with n. 1, quoting: "Suet. *Domit.* 2,3"]. Ciò non gli riuscì d'ottenere, com'è noto, e con mal animo dovette sopportare i due anni di regno del fratello [*i.e.*, of Titus] [with n. 2, providing references; my emphasis]".

Koeppel (1969, 172) wrote under the headline: "Das Relief B von der Cancellaria mit dem *Adventus* des Vespasian", "... Die Hauptfigur des Reliefs ist nicht Vespasian, sondern Domitian [with n. 157, quoted *verbatim supra*, n. 173, in Chapter I.1.]. Cf. p. 174: "Domitian, der die Stadt [*i.e.*, Rome] für seinen Vater [*i.e.*,

<sup>463</sup> F. MAGI 1945, 111; cf. *supra*, n. 194, in Chapter I.1.1., for further quotations from MAGI, that relate to Vespasian's *adventus* in 70 AD.

Vespasian] gehütet hat, übergibt Vespasian bei seiner Ankunft das Imperium [with n. 164]". Cf. his n. 164: "Suet. Domitian 13,1; Mart. IX 101, 13ff.; Bianchi Bandinelli, BullCom, 72, 1946-48, 259; Simon ... [1960], 153. - **Man darf nicht so weit gehen, hier die Darstellung des staatsrechtlichen Aktes der Einsetzung des Domitian als Nachfolger Vespasians zu sehen (so G.M.A. Hanfmann ... [1964] 108).** Die Ikonographie des Adventus ist klar. Hauptthema der Darstellung muß deshalb der Adventus sein. Inwiefern hinter dieser Adventus-Darstellung andere Gedanken stecken, ist eine zweite Frage. Wenn die Adventus-Ikonographie auch den Regierungsantritt verdeutlichen kann, so ist hier der des Vespasian gemeint, nicht der Domitians, denn der Sohn des Kaisers steht an der Spitze der Empfangenden [my emphasis]".

Ranuccio Bianchi Bandinelli (1946-48, 259) wrote: "Anche sul soggetto del rilievo B l'accordo è quasi completo: l'unico *adventus* di Vespasiano da imperatore è quello del 70; **ma mi par giusto vedere come scopo principale del rilievo, più che la celebrazione di quel ritorno, l'incontro con il giovane Cesare [i.e., Domitian] e dare a questo incontro il significato di una designazione alle successione.** Sappiamo che, storicamente, l'incontro fra Vespasiano e Domiziano avvenne a Benevento; mentre il rilievo trasporta l'avvenimento a Roma, come è mostrato dalla presenza delle cinque Vestali (la sesta non poteva esserci, perché il culto non poteva essere abbandonato) e dall'immagine di Roma seduta e appoggiata alla lancia. Ma non siamo di fronte a una cronaca illustrata, bensì come sempre nella scultura storica romana, di fronte alla trasfigurazione di un avvenimento storico entro una determinata tradizione iconografica, che l'artista usa come un canovaccio sul quale innestare le proprie variazioni, e in vista di una contingente situazione politica che andava manifestata [my emphasis]".

McCann (1972, 275), concerning the meaning of this gesture, made by the emperor on Frieze B with his right hand, had suggested exactly the same as Hanfmann [1964], only that she identified the two protagonists on Frieze B not as Vespasian and Domitian, as Bianchi Bandinelli [1946-48], Hanfmann [1964], and Ranuccio Bianchi Bandinelli and Mario Torelli [1976, quoted *verbatim infra*] had done or should do, and Rita Paris (1994b), Stefan Pfeiffer (2009; for both see below), Spinola and I myself still do, but as Trajan and Hadrian instead: "While a missing link in the reconstruction of the original iconography of Frieze B remains the identification of the emperor ... in the light of the historical and numismatic evidence discussed is it not probable that Frieze B commemorated the world Hadrian's right to the imperial office through his adoption by Trajan? The original of the head of Vespasian would therefore have been Trajan who is shown with his hand upon his selected successor".

**For more scholars, who have followed Magi's relevant opinion that Vespasian on Frieze B with the gesture of his right hand legitimizes the young togate youth Domitian's reign as emperor, cf. Langer and Pfanner (2018, 62 with n. 59; quoted in more detail *verbatim infra*, in Chapter V.1.h).**

Of those scholars, whom they list in their footnote 59, I had so far overlooked the following:

"J. Béranger ... [i.e., here J. BÉRANGER 1964] 81; B. Andreae, *Römische Kunst* (Freiburg i. Breisgau 1973<sup>3</sup>) 193 ... W. Kuhoff ... [i.e., here W. KUHOFF 1993] 77f. Anm. 103, quoted *verbatim infra*; LIMC V (1990) 500 Nr. 21. 502 s. v. Honos (C. Lochin); and N. H. Ramage ... [i.e., here N.H. RAMAGE and A. RAMAGE 1996] 144".

Langer and Pfanner (2018, 25) quote in their bibliography Ranuccio Bianchi Bandinelli and Mario Torelli (1976 *ARTE ROMANA scheda* 105, quoted in part *verbatim infra*), but they do not mention this account in their list of scholars who follow Magi's interpretation of Frieze B of the Cancellaria Reliefs (here **Fig. 2**): as a matter of fact, Bianchi Bandinelli and Torelli, in their interpretation, went even further than Magi did.

Thanks to Franz Xaver Schütz, I have finally been able to consult the work of Bianchi Bandinelli and Torelli (1976) - but only after I had (almost) finished writing this entire book.

And although Langer and Pfanner (2016, 26) quote in their bibliography Rita Paris (1994b, 80-83, Figs. 6; 7a-c, quoted *verbatim infra*, in Chapter V.1.i.3.a)), and on p. 27 Stefan Pfeiffer (2009, 62), in their just-quoted list of scholars, who follow Magi's interpretation of Frieze B, they too leave out the work of Paris (1994b) and Pfeiffer (2009).

Ranuccio Bianchi Bandinelli and Mario Torelli (1976 ARTE ROMANA, *scheda* 105) wrote:

"Nel secondo rilievo (B [= here **Fig. 2**]) ... è raffigurata una scena incentrata sul giovane Domiziano e su Vespasiano. All'estremità sinistra presso **una statua seduta della dea Roma**, è un gruppo di cinque Vestali accompagnate dal littore che spettava a queste sacerdotesse; all'estremità destra si colloca invece Vespasiano vestito di ampia toga ma a capo scoperto, incoronato da una Vittoria volante e seguito da un littore e da un *apparitor* con rotolo, mentre al centro Domiziano giovane, anch'egli in toga e sovrastato dal *Genius Senatus* e dal *Genius Populi Romani*, **è accompagnato da un littore e da due altre figure che si dirigono verso il gruppo delle Vestali (littori oppure apparitores)**. L'interpretazione di entrambe le scene è controversa. Nel rilievo B è forse da vedere l'*adventus* di Vespasiano, accolto dal figlio Domiziano **in veste di praetor urbanus e di servator Urbis (dove i littori alle sue spalle e Roma con le vestali): il suo gesto è di ossequio filiale, come quello delle Vestali, giuridicamente filiae del pontifex maximus Vespasiano. L'allusione sarebbe in tal modo chiara: Domiziano salvata Roma, la riconsegnerebbe al padre, prefigurando così i propri meriti per la successione e di vero fondatore della dinastia** [my emphasis]".

I have highlighted those passages which differ not only from Magi's hypotheses, but also from those of most other scholars.

Some of these 'highlighted ideas' go back to Jocelyn M.C. Toynbee (1957), whom Bianchi Bandinelli and Torelli (1976) themselves did not quote, but even Toynbee had copied those ideas from Hugh Last (1948), without quoting *him* (!).

I, therefore, repeat here what was quoted in more detail above, in Chapter I.1.1.:

Jocelyn M.C. Toynbee (1957, 5-6) wrote about Frieze B (cf. here **Fig. 2; Figs. 1 and 2 drawing**): "Finally, in the foreground [on Frieze B] ... we see the young Domitian, togate and slightly whiskered, turned three-quarters towards his father [*i.e.*, Vespasian] ... it would seem that Domitian was publicizing here his own version ... of his situation as Caesar in Rome at the time of his father's accession, as the recipient of congratulations on the 'vice-regency' exercised by him in the capital while Vespasian was still absent in the East. Thus the scene portrays the first public occasion on which Domitian, as a youth of nineteen, played a significant part in the crucial hour of the founding of the Flavian dynasty. It is almost an illustration of the saying which Suetonius attributes to him: *patri se et fratri imperium dedisse, illos sibi reddidisse*' (note 1) [with my note 208]".

'In my **note 208**, I write: "J.M.C. TOYNBEE 1957, 5-6. In her n. 1 on p. 6, she quotes: "Suetonius, *Domit.* 13". TOYNBEE, *op.cit.*, does not say that already H. LAST 1948, 12, had suggested the latter: "There is much that might be added about this panel [*i.e.*, Frieze B], for instance it invites consideration of the passage in which Suetonius (*Dom.* 13,1) asserts of Domitian that *principatum ... adeptus, neque in senatu iactare dubitavit et patri se et fratri imperium dedisse, illos sibi reddidisse ...*'. This was also discussed by M. BERGMANN 1981, 19-20; and by H. MEYER 2000, 136: "Die alte Deutung des Frieses B ist gewiß zutreffend, sagt doch Sueton: >>Als [Domitian] dann zur Herrschaft gelangt war, hatte er die Stirn, vor dem Senat zu prahlen, er sei es gewesen, der seinem Vater wie seinem Bruder den Thron gegeben, sie hätten ihm diesen nur zurückgegeben<< [with n. 431: "Suet. *Dom.* 13.]" - For that very influential idea, cf. also *supra*, at n. 456, in Chapter III."'.

Toynbee's above-quoted passage (1957, 5-6) is also quoted and discussed *supra*, in Chapter *Preamble*; Section III., at point 2.).

Pfeiffer (2009, 62; already quoted *verbatim supra*, in Chapter II.3.1.c) is the most recent scholar, who has followed Magi's (1939; *id.* 1945) opinion that Vespasian on Frieze B with the gesture of his right hand legitimizes the young togate youth Domitian's reign as emperor:

"Eines der beiden Reliefs [*i.e.*, Frieze B of the Cancellaria Reliefs] zeigt auf jeden Fall Domitian mit Vespasian. Vater und Sohn werden von Minerva, Rom und den Genien von Senat und Volk Roms begleitet. Auf diese Weise ist nicht nur die Legitimation der Herrschaft des Domitian durch seinen Vater verkündet ...".

The most recent scholar, who has followed Magi's interpretation (1939; *id.* 1945) of frieze B in a publication, is to my knowledge Pollini (2017b). He identifies on pp. 116, 118, the emperor on Frieze B with Vespasian, and on p. 118 n. 96 the togate youth on Frieze B with Domitian, "who greets his father [Vespasian]".

Only after having written this, did I have the chance to read the publications by Barbora Chabrečková (2017), and Rose Mary Sheldon (2023, in press; Chapter 7; cf. *supra*, in Chapter *Preamble*; Sections I. and II.; and ns. 73; 74, in Chapter I.1.). Exactly like Pollini (2017b) also the latter two scholars follow Magi's (1945) identification of Vespasian and Domitian on Frieze B (cf. here Fig. 2; Figs. 1 and 2 drawing, figures 14 [Vespasian]; 12 [Domitian]), but *without* quoting Magi (1945) for those hypotheses.

*A comparison of Frieze B of the Cancellaria Reliefs (cf. here Fig. 2) with the hieroglyphic texts of Domitian's obelisk (cf. here Fig. 28) shows that both propagate the same message*

Now, if Spinola is right with his hypothesis that Frieze B from the very beginning has been conceived of as showing Vespasian and Domitian, the message, this frieze contains - according to Spinola, the "legittimazione" of Domitian as emperor by his father Vespasian, indicated by the gesture Vespasian makes with his right hand - seems to have striking similarities with the political message of another monument, likewise commissioned by Domitian: the Obeliscus Pamphilius/ Domitian's obelisk, which is mounted on top of Gianlorenzo Bernini's famous 'Fountain of the Four Rivers' on Piazza Navona at Rome<sup>464</sup> (cf. here Fig. 28).

Fig. 28. The Obeliscus Pamphilius/ Domitian's obelisk. From the Iseum Campense. On display on top of Gianlorenzo Bernini's 'Fountain of the Four Rivers' in the Piazza Navona at Rome. From: C. Häuber (2017, 156, Fig. 5.5.2). Photos: F.X. Schütz (5-IX-2019). Courtesy F.X. Schütz. Photo: Cesare D'Onofrio (1921-2003). From: G. Simonetta, L. Gigli and G. Marchetti [2004] 122, Fig. 8. The caption reads: "La fontana dei Quattro fiumi, ripresa zenitale dall'alto della chiesa di Sant'Agnese". Courtesy: L. Gigli. Photo: L. Gigli (December 2003). Courtesy: L. Gigli.

Fig. 101.a. Cf. G.B. Cipriani (1823, with Tav. 1; 2), his discussion and etchings of the 12 (Egyptian) obelisks in Rome. The caption of his Tav. 1 reads: "Dodici Obelischii Egizj, che si osservano rialzati ad ornamento della Città di Roma, posti secondo ordine della loro rievazione". The caption of his Tav. 2 reads: "Fusti dei dodici Obelischii dei Egizj, che si osservano rialzati ad ornamento della Città di Roma, posti secondo il grado della loro altezza". Cipriani's etchings of those 12 obelisks are measured: the tallest one is the Lateran Obelisk. Cipriani has also discussed and drawn Domitian's obelisk, which he refers to in his text and on his plates as: "Agonale di Piazza Navona", see his Tav. 1; Tav. 2 (in both Domitian's obelisk is the fifth from left).

For a discussion of the book by Giovanni Battista Cipriani (1823); cf. below, at *The second Contribution by Franz Xaver Schütz : Wie schwer war der ägyptische Obelisk, der heute auf der Piazza di S. Giovanni in Laterano in Rom steht?*

<sup>464</sup> cf. C. HÄUBER 2017, Fig. 5.2 on p. 156, pp. 153-168.

In the hieroglyphic inscriptions of his obelisk, the "legitimacy"<sup>465</sup> of Domitian's reign is stressed. Jean-Claude Grenier<sup>466</sup>, commented on these inscriptions as follows: 'The first three sides [of Domitian's obelisk] glorify only Domitian *dominus et deus*: the proclamation of his divine birth and thus his predestination to exercise the supreme power like the great pharaohs of the past, an attestation of his legitimacy to be the heir to Vespasian at the head of the Empire'.

After I finished writing this Chapter, I had the chance to read the accounts by the scholars, who contributed to the Proceedings of the Iseum Campense Conference in Rome of May 2016, of whose findings I will quote in the following the passages that relate to Domitian's obelisk discussed here. All of these authors discuss this obelisk in context with the Iseum Campense, which Domitian had just restored after the great fire of AD 80, and for which, in my opinion, the emperor had commissioned this obelisk (probably shortly after his accession to the throne in AD 81; cf. *supra*, n. 466). For the recent controversy concerning the original location of this obelisk; cf. *infra*, in Chapters IV.1.1.a) - IV.1.1.h).

Katja Lembke (2018, 32) writes: "It is a much discussed and unfortunately unprovable hypothesis that the obelisk Pamphilj, placed today on Piazza Navona, stood at its centre. However, like a majority of recent scholars, I am still in favour of this view (fig. 6) [with n. 18, providing references in favour of this view]. It was imported from Egypt carrying hieroglyphic inscriptions that contain the titles of Domitian".

Laurent Bricault and Richard Veymiers (2018, 151-152) write: "À Rome, l'obélisque aujourd'hui visible sur la Piazza Navona, dont le programme iconographique et hymnique met principalement en scène Domitien et Isis, avait dû être dressé à l'intérieur, sinon à proximité du sanctuaire isiaque du Champs de Mars [with n. 161], sensiblement à la même époque, pour en célébrer la refondation [with n. 162, providing references]".

In their n. 161, they write: "On le situe le plus souvent au centre de la cour d'entrée du sanctuaire (... [*i.e.*, here K. LEMBKE 1994b], 25 e 29)". - For that assumption, which in my opinion is true, cf. *infra*, in Chapter IV.1.1.c).

Eric M. Moormann (2018, 171-172) writes: "As we know, the Flavians had a positive relationship with Egypt in general. Domitian might have stressed his bonds through the hieroglyphic inscription on the so-called *Obeliscus Pamphilus*, found in the Circus of Maxentius along the Via Appia and currently erected on Piazza Navona. On this needle, he is hailed as a pharaoh in what J.-C. Grenier has called a >>hymne à Domitien et à la dynastie flavienne<<, something that Domitien apparently did not object to [with n. 65]. However, this Egyptian text will not have played a great role in conveying [page 172] specific messages to the citizens of Rome, since no Roman could read it. Consequently, it was for that reason, that the obelisk remained untouched after A.D. 96 and did not fall prey to *damnatio memoriae* [with n. 66, providing references]. The monument does not give us reason to detect a specific *aegyptophilia* of the emperor, but it rather is, again, a

<sup>465</sup> cf. C. HÄUBER 2017, 163.

<sup>466</sup> cf. C. HÄUBER 2017, 159, 160-161, 164, where scholars are quoted, who discuss this passage of the hieroglyphic inscription on Domitian's Obelisk. The here quoted line is my own translation of J.-C. GRENIER 2009, 238, a passage, in which he commented on the hieroglyphic texts, written on Domitian's Obelisk (for those texts, cf. *infra*, n. 467): "I primi tre lati sono per la sola gloria di Domiziano *dominus et deus*: proclamazione della sua nascita divina e dunque della sua predestinazione a esercitare il potere supremo come i grandi faraoni del tempo passato, attestazione della sua legittimità a essere l'erede di Vespasiano alla testa dell'impero ...".

Cf. C. HÄUBER 2017, 21: "In one of the inscriptions on his Obelisk, written in hieroglyphs, Domitian formulates his hope that his contemporaries as well as posterity will always remember the achievements of his family, the Flavian dynasty, especially their benefactions for the Roman People. Domitian stresses that his family managed to consolidate the state, which had severely suffered from those 'who reigned before' (i.e., the Julio-Claudian dynasty)".

Cf. pp. 159, 163-164 (certain details in the contents of the hieroglyphic inscriptions of Domitian's obelisk allow the assumption that it was erected at the beginning of his reign, that is to say, shortly after AD 81).

Cf. pp. 20, 134, 142, 164-168, 171, 174-177 (for the building *Divorum*, erected by Domitian and dedicated to the two *Divi*, his father and brother, *Divus Vespasianus* and *Divus Titus*, for the difficulty to reconstruct its ground-plan, and for its meaning).

Cf. pp. 165-169 (for the benefactions of the emperors of the Flavian dynasty for the Roman People, as mentioned in the hieroglyphic texts of Domitian's obelisks, as well as for those buildings, which they erected all over the City of Rome); cf. p. 165 for the translation of the passage of one of these hieroglyphic texts, in which is explicitly stated, that Domitian's family members (i.e., Vespasian and Titus) had managed to consolidate the state, which had severely suffered from those, 'who reigned before'.

form of imitating Augustus [with n. 67]. The interpretation of things Egyptian is, as had been demonstrated various times by Miguel John Versluys, rather tricky, and in our context it seems more appropriate to see the Iseum Campense and the obelisk in the context of 'things Roman', as two of many tesserae in the mosaic of Flavian buildings on the Campus Martius".

In his **note 65**, Moormann writes: "J.-C. Grenier, *LTUR* III (1996) 356-57, esp. 356. See on this obelisk as a monument from the *Iseum* [Campense], i.a. ... [*i.e.*, here K. LEMBKE 1994b], 69-70 ... [*i.e.*, here S. PFEIFFER 2010a], 281-83 ... Albers 2013, 154; ... [*i.e.*, here F. COARELLI 2009b], 94; ... [*i.e.*, here J.-C. GRENIER 2009] 234-39 and Coarelli 2014, 205-7: **they see it as an element from the Temple of the *Gens Flavia*, which might be likely on the basis of the inscription, but not as to its shape and signification** [my emphasis] ... The sobriquet *Obeliscus Pamphilius* was coined in the title of the homonymous publication by Athanasius Kircher (Rome 1650)".

**Moormann's (2018, 172) just-quoted judgement concerning Domitian's obelisk as belonging to 'things Roman' is quite the opposite of what Emanuele Ciampini writes, who in our discussions on the subject has corrected my calling Domitian's obelisk 'Egyptianizing' (because manufactured in the Roman period), since in his opinion it is Egyptian; I myself follow now Ciampini's judgement (cf. *infra*, in Chapter VI.3.). To the controversy concerning the question, for which context Domitian had commissioned his obelisk, the Iseum Campense or the *templum gentis Flaviae*, I will come back below; cf. *infra*, in Chapter IV.1.1.**

Stefan Pfeiffer (2018, 181, in his Section "1. Domitian, an Isiac") writes:

"This section examines researchers' main arguments for suggesting a special relationship between Domitian and the Egyptian cults ... [in the following providing a list of these arguments by other scholars] ...

6. Hence, we arrive at the most important lines of reasoning:

a) Domitian restored the *Iseum* and *Serapeum* on the *Campus Martius*, which became one of the largest precincts of the area [with n. 15] ...

c) Inside the Isis precinct, Domitian was represented as pharaoh in the form of a statue. Furthermore, the well-known Pamphili obelisk, which probably belonged to the Iseum Campense, shows that he deliberately wanted to be regarded as pharaoh [with n. 19].

Having collected these main scholarly arguments, I do not intend to prove them wrong. Instead, I attempt to approach the same material from another perspective". In his **notes**, Pfeiffer provides references.

Pfeiffer (2018, 188), in his Section "1.6. The Iseum Campense", in which he describes his own opinion, writes:

"Last but not least, the most important object connected with Domitian's affinity to Egyptian religion is the Pamphili obelisk, which was eventually erected in front of the temple of Isis [with n. 76]. Its inscriptions and depictions present Domitian as Egyptian pharaoh, beloved and elected by Isis and other Egyptian gods [with n. 77, with references]. Even the dynasty itself is mentioned [78, with references]. It is possible that Domitian knew the meaning of the inscriptions and was informed about the pictorial representations on the pyramidion, which only could be seen from a bird's eye view [with n. 79, with a reference]. **However, it would be premature to conclude that Domitian had a religious policy in mind to make himself pharaoh in Rome, based only on this singular representation.** Furthermore, neither Egyptians nor Romans could read these hieroglyphic inscriptions [with n. 80, providing a reference]. **More conclusive evidence is needed to demonstrate that Domitian really wanted to be pharaoh; and if this is not possible, one could interpret the obelisk's inscriptions as a representation of Domitian as expressed by Egyptian priests, who attributed Domitian the power of a pharaoh**[h] [my emphasis]".

In his **note 76**, Pfeiffer writes: "... [*i.e.*, here K. LEMBKE 1994b], 40; attribution to the *templum gentis Flaviae*: e.g. Grenier 1999, 229 (does not appear in the bibliography [?]); ... [*i.e.*, here F. COARELLI 2009b], 94 (does not appear in the bibliography [?])".

Concerning the question of who might have been the *spiritus rector* of Domitian's Obelisk, I myself, contrary to Pfeiffer (2018, 188), quoted above, follow Emanuele M. Ciampini (cf. below, at *The first Contribution by Emanuele M. Ciampini : La regalità domiziana: una nota egittologica*), who suggests that the hieroglyphic texts of Domitian's obelisk were composed by Egyptian specialists, at the order of, and in close cooperation with, Domitian.

There are two prerequisites for my relevant assumption,

a) contrary to J.-C. Grenier (1996; 1999; 2009) and F. Coarelli (2009b; 2014; discussed *infra*, in Chapter IV.1.1.), I am convinced that Domitian commissioned the Pamphili Obelisk for the Iseum Campense, which he restored after the great fire of AD 80;

b) I suggest in this *Study*, that one passage of one of the hieroglyphic inscriptions of Domitian's obelisk says *expressis verbis*, what in my opinion Domitian has ordered his artists to express on Frieze B of the Cancellaria Reliefs: I follow in this respect the relevant interpretation by Magi (1939; 1945), who suggested that the Emperor Vespasian on Frieze B, with the gesture of his right, expresses the legitimation of his younger son Domitian to reign as emperor, who is standing in front of him.

Cf. *infra*, in Chapters V.1.h.1.); V.1.i.3.); VI.3.). - As we have seen above, not only Paris (1994b, 82, quoted *verbatim infra*, in Chapter V.1.i.3.a), but also Pfeiffer himself (cf. *id.* 2009, 62, quoted *verbatim supra*) follow this interpretation of Frieze B, suggested by Magi.

To the remark by Pfeiffer (2018, 188): "However, it would be premature to conclude that Domitian had a religious policy in mind to make himself pharaoh in Rome, based only on this singular representation [*i.e.*, Domitian's obelisk, here Fig. 28; my emphasis]", I should like to add an observation.

Tacitus (*Hist.* 3,74) describes the cult-statue of Jupiter in Domitian's temple of Iuppiter Custos. This temple was dedicated by Domitian on the *Capitolium*, and possibly even in the *area Capitolina*, that is to say, within the *temenos* of the (fourth) Temple of Iuppiter Optimus Maximus Capitolinus (built anew by Domitian; cf. *infra*, in volume 3-2, at *Appendix I.g.4.*)), as a thanksgiving for his escape from the *Capitolium* on 19th December AD 69, during the civil war. Interestingly, the cult-statue of this Jupiter temple was represented seated, with a portrait statue of Domitian on his lap. Domitian was thus interpreted as the son of the supreme Roman god Jupiter, and that in a statue-group that was certainly ordered by himself. Of course all Roman emperors since Augustus had claimed to be the son of Jupiter, but Domitian's here mentioned iconography was something completely new (for a discussion, cf. *infra*, in volume 3-2, at *Appendix I.d.*).

It is impossible not to understand this iconography as Domitian's claim of the 'doppelte Sohnschaft' 'double sonship', as the pharaohs of Egypt had done, as well as Alexander the Great and Augustus, all of whom had thus legitimized their reigns as kings of Egypt. For Alexander and Augustus, Pfeiffer (2010b, 45-50, 60-61) has himself studied this phenomenon and its meaning (cf. *infra*, in Chapter IV.1.1.a)). See also Giuseppina Capriotti Vittozzi (2013, 39 with n. 71; cf. *infra*, in volume 3-2, at *Appendix III.*).

In the hieroglyphic inscriptions of Domitian's obelisk, basically the same claim is formulated, here Domitian states to be the son of the supreme Egyptian god, Re-Harakhte. The underlying religious beliefs, that are thus expressed in these inscriptions, were acted out in sacred performances, the 'royal rituals' (some of which took place at the structures called *mammisis* in Egypt), which had the function to visualize the legitimation of the (new) king (cf. *infra*, in Chapters IV.1.1.d); IV.1.1.e)).

I therefore do not agree with Pfeiffer (2018, 188), that Domitian's obelisk is the only monument at Rome known to us which documents Domitian's relevant thoughts. At the same time, the iconography of Domitian's cult-statue in his Temple of Iuppiter Custos, with himself, sitting on Jupiter's lap, refers also to a legend, told about the later Augustus, when he was a child. The iconography, chosen by Domitian for the

cult-statue of his Temple of Iuppiter Custos had therefore again a political meaning, which has great similarities with the contents of the hieroglyphic inscriptions of Domitian's obelisk. Cf. Suetonius (*Aug.* 94,8, quoted *verbatim infra*, in volume 3-2, at *Appendix I.d*).

Besides, Domitian was the first Roman emperor to be represented as wearing a cuirass decorated with the she-wolf, suckling Romulus and Remus. As Claudio Parisi Presicce (2000, 28, 29, 39, cat. no. 13 [= here **Fig. 6, right**]) has shown, 'the *lupa* and the twins on those cuirasses symbolize the claim of Rome to eternal power and divine mission, and that it was the task of the Roman emperor to fulfill this obligation' (cf. *infra*, in volume 3-2, at *Appendix IV.c.2.*)).

As is well known, this was precisely one of the foremost obligations, the fulfillment of which was also expected of an Egyptian pharaoh (for a detailed discussion of that; cf. *infra*, in volume 3-2, at *Appendix II.c*)).

And Trevor Luke (2018, 207) writes: "Thanks to Domitian's restoration and building projects on the Campus Martius, the presence of *aegyptiaca* in 88 was more pronounced than ever before. The pyramidion of the Pamphili Obelisk provides a stunning example of how far this Egyptian expression of Domitianic imperial ideology could reach in its portrayal of Domitian as a pharaoh receiving the crowns of Upper and Lower Egypt from goddesses [with n. 77, quoting: Bülow Clausen 2015, 147]".

Cf. Luke (2018, 209): "The fire that ravaged Rome in A.D. 80 gave Domitian the opportunity to indulge his love of *aegyptiaca* by restoring and rebuilding the Iseum Campense. Particularly through the Pamphili obelisk Domitian expressed a distinctly Egyptian theological vision of his imperial ideology in the depiction of him in a close relationship with the gods of Egypt, being crowned as pharaoh by them [with n. 94, providing references, quoting *inter alia* E.M. CIAMPINI 2004; E.M. CIAMPINI 2005; this article is quoted *verbatim infra*, in Chapter IV.1.1.d)]. It is likely the case that these efforts coincided with Domitianic cultivation of the stories of Vespasian's Serapis miracles, which similarly depicted the usurper-emperor [*i.e.*, Vespasian] receiving royal tokens and interacting with the god Serapis [with n. 95, providing a reference]. Viewed synoptically, these structures, images, and narratives represent the crystallization of a memory - the memory of the momentous, and divinely mandated, connection between Egypt and the founding of the Flavian dynasty - at the Campus Martius".

For "Vespasian's Serapis miracles", cf. *supra*, n. 455, in Chapter III., and *infra*, in volume 3-2. at *Appendix II.a*).

Like Trevor Luke (2018, 209), I have studied the publication by Emanuele Marcello Ciampini (2004)<sup>467</sup> on the hieroglyphic texts of Domitian's Obelisk, and especially the inscription on its east side. In the following quotation, I have left out Ciampini's drawing of the relevant hieroglyphic inscription and his transliteration of this Egyptian text, but quote only his Italian translation of it:

"Lato verso Corso Rinascimento (est)

*Pyramidion* - Domiziano di fronte [corr.: fronte] a Mut, seguito da un'altra figura

H. 22 Horo: Quello per il quale dei e uomini fanno lode;

H. 23. quando riceve la regalità da suo padre **Vespasiano il dio**,

H. 24. dal fratello maggiore **Tito il dio**, mentre il suo ba si muove verso la volta celeste;

H. 25. le Due Signore: il forte, il campione, il muro efficace della terra intera;

H. 26 Falco d'oro: grande di forza che compie atti utili, signore delle feste giubilari come Ptah-Tatenen, sovrano come Ra;

H. 27. re dell'Alto e Basso Egitto, signore delle Due Terre, erede efficace, amato degli dei dell'Egitto **Autokrator**,

H. 28. figlio di Ra, signore delle Corone **Cesare Domiziano Augusto**, amato di Ptah e Iside, viva come Ra!"

<sup>467</sup> E.M. CIAMPINI 2004, 162-165.

(the passages in bold have been highlighted like this by the author himself).

This section of one of the hieroglyphic inscriptions of Domitian's obelisk thus means, as already mentioned in the introductory *Chapter* of this *Study* (cf. *supra*, at *Introductory remarks and acknowledgements*; see also below, at *Chapter: The major results of this book on Domitian*): the *Autokrator* [emperor] *Caesar Domitianus Augustus* has received his reign from his father, *Divus Vespasianus* and from his brother, *Divus Titus*.

**The meaning of Frieze B of the Cancelleria Reliefs (cf. here Fig. 2; Figs. 1 and 2 drawing) - if at all correctly interpreted by Spinola (cf. *supra*, in Chapters III.; IV.1.) and here by myself - and the meaning of the above quoted passages of the hieroglyphic inscriptions on Domitian's obelisk (cf. here Fig. 28) have so far not been compared with each other, but this short note hopefully marks the beginning of an inquiry into this direction.**

But also with this assumption I was wrong: after this Chapter IV. was written, I had the chance to read Wolfgang Kuhoff's account (1993). In his interpretation of Frieze B of the Cancelleria Reliefs, he follows Magi and in the pertaining footnote, he refers to the hieroglyphic texts of Domitian's obelisk (!).

**Kuhoff (1993, 77 with n. 103) writes: "Der seinem Bruder im Prinzipat gefolgte Domitian war von seinem Vater als *Caesar* ins Herrscherkollegium aufgenommen worden und blieb nach Titus Thronbesteigung unbestrittener Nachfolgekandidat [with n. 102, providing references for Domitian as *Caesar*]. Im Nachhinein stilisierte er sich zwar schon für das Jahr 69 als verkannter Anwärter für das Kaisertum, doch war dies nur Ausdruck eines Wunschdenkens [with n. 103]".**

In his n. 103, Kuhoff writes: "**Das hierfür bedeutungsvolle Adventus-Relief vom römischen Palazzo della Cancelleria ... [summarizing in the following some of its controversial interpretations]. Mir selbst erscheint immer noch die bisherige Interpretation als die überzeugendste. Daß sich Domitians Vorstellungen von seiner Rolle als wahrer Nachfolger Vespasians auch in ungewöhnlicher Form artikulieren konnten, zeigt Jean-Claude Grenier, Les inscriptions hiéroglyphiques de l'obélisque Pamphili. Un témoignage méconnu sur l'avènement de Domitien, MEFRA 88, 1987, 937-961 [my emphasis]**".

Note that "l'avènement" means 'to ascend to the throne'.

I had come to my own conclusions concerning this point, as summarized above, when Emanuele Marcello Ciampini was so kind as to send me the text that he has dedicated to the subject discussed here. See below, at *The first Contribution by Emanuele M. Ciampini : La regalità domiziana: una nota egittologica*.

**Chapter IV.1.1. The Obeliscus Pamphilius/ Domitian's obelisk (cf. here Fig. 28) - that was commissioned for the Iseum Campense, not for the Templum Gentis Flaviae**

As already said above, especially fruitful for this book on Domitian has turned out the fact that the organizers of the Iseum Campense Conference at Rome in May 2016, Miguel John Versluys, Kristine Bülow Clausen and Giuseppina Capriotti Vittozzi, had invited me to attend, since without the help of the scholars, I met there, I would definitely have been unable to solve many of the problems discussed here.

Generating *measured* maps takes a long time, and because I needed the maps, drawn for my talk at this Conference, for the book on the *Campus Martius*, which Franz Xaver Schütz and I wished to dedicate to Eugenio La Rocca, I have published my paper already in this *Study* on Augustus and the *Campus Martius* (2017), instead of in the Proceedings of that Conference (2018).

(Cf. C. HÄUBER 2017, 153-174, Fig. 5.5.2. [= here **Fig. 28**] and the maps Fig. 3.7. on p. 69 [= here **Fig. 59**]; Fig. 3.7.1 on p. 71 [= here **Fig. 60**], and Fig. 3.7.1.1 on p. 73. See also Häuber (forthcoming, *Collection of Papers Read*: the paper read at the Iseum Campense Conference 2016).

**Fig. 59. Map of the *Campus Martius*. C. Häuber & F.X. Schütz, "AIS ROMA". From: C. HÄUBER 2017, 69, Fig. 3.7. In the meantime it has been updated and has now the following title: Map of the *Campus Martius* at Rome in the Imperial period, showing also adjacent areas, and comprising the current layout of the city, 2023.**

For an explanation of the cartographic details of this map; cf. Häuber (2017, 68).

**Fig. 60. Map of the Iseum Campense. C. Häuber & F.X. Schütz, "AIS ROMA". From: C. HÄUBER 2017, 71, Fig. 3.7.1 (detail of the map here Fig. 59).**

For an explanation of the cartographic details of this map; cf. Häuber (2017, 70).

*Chapter IV.1.1.a) A summary of the hypotheses of J.-C. Grenier and F. Coarelli, according to whom Domitian's obelisk (cf. here Fig. 28) was not commissioned for the Iseum Campense, but instead for the Templum Gentis Flaviae. With a discussion of the contents of the reliefs on the pyramidion of Domitian's obelisk and of the contents of its hieroglyphic inscriptions*

After my talk at the Conference on the Iseum Campense on 25th May 2016, I was fortunate to make the acquaintance of the Egyptologist Alessandro Roccati, with whom I started an E-mail-correspondence. Roccati then helped me in my attempt to solve a great problem that I came across again the following year, namely the controversy concerning the question of whether or not Domitian had commissioned the Obeliscus Pamphilius/ Domitian's obelisk for the Iseum Campense. - This obelisk is today mounted on top of Gianlorenzo Bernini's famous 'Fountain of the Four Rivers' on Piazza Navona at Rome (cf. here **Fig. 28**). Already for my publication of 2017, I had tried to solve this problem, since Jean-Claude Grenier and Filippo Coarelli had suggested that Domitian's obelisk was instead originally created and erected at the *Templum Gentis Flaviae* on the Quirinal.

Cf. Jean-Claude Grenier (1996, 357; *id.* 2009, 234-239 [cf. *id.* 1987, 937-961, for the hieroglyphic inscriptions of Domitian's Obelisk]; F. COARELLI 1996, 108; *id.*, in: F. COARELLI 2009a, 451, cat. no.: "43 frammento della *Forma Urbis Romae* [*i.e.*, the Severan Marble Plan] con l'Iseo e il Serapeo"; COARELLI 2009b, 94; *id.* 2014, 194-207).

In his last relevant publication, Grenier (2009, 237-238) provided a summary of his earlier observations, but, as we shall see below, he had also changed his mind in many respects, when compared with his publication of 1987: "È ben radicato nell'opinione corrente che questo obelisco [*i.e.*, Domitian's obelisk, here **Fig. 28**] non poté essere eretto che in un contesto egittizzante. Perciò lo si attribuisce ai più significativi edifici >>egizi<< di Roma: l'*Iseum* e il *Serapeum* del [page 238] Campo Marzio che, senza dubbio, furono risistemati sotto Domiziano per cancellare i danni subiti nell'incendio dell'80 che aveva devastato tutta la zona (D.C. LXVI 24,2). **Questa ipotesi è rafforzata dal fatto che un frammento della *Forma Urbis* [*i.e.*, the Severan Marble Plan] mostra che, molto probabilmente, un obelisco si innalzava effettivamente nello spazio che separa il *Serapeum* dall'*Iseum*: se ne riconosce la posizione nel piccolo quadrato inciso al di sopra della seconda A della parola SERAPAEVM [see below, and *infra*, at Chapter IV.1.1.c]. E c'è un generale accordo nell'ammettere che quest'obelisco non può essere altro se non quello di Domiziano, tenendo conto del suo carattere >>isiaco<<.**

**Questo punto di vista mi sembra difficilmente condivisibile.**

Tralasciamo il fatto che un altro obelisco poteva essere eretto in questo luogo ...

Insistiamo sul presunto carattere >>isiaco<< del nostro obelisco che è in genere chiamato in causa per giustificare la sua collocazione nell'ambito dell'*Iseum* e del *Serapeum*. **Non capisco dove esso si trovi. Iside è**

**più che discreta nelle scene del *pyramidion* e, obiettivamente, ci si può chiedere se essa vi compaia davvero, a meno di non pensare che essa faccia sistematicamente propri, in questo caso, attributi di altre dee (Oadjet, Nekhbet, Hathor) o della regina-madre. Per quel che riguarda i testi, certamente per due volte Domiziano è chiamato >>amato di Iside<<. Raro qui e usuale altrove, questo epiteto non basterà, secondo me, a fare di questo obelisco un monumento >>isiaco<<. Basterà ricordare che Domiziano poteva a buon diritto definirsi >>amato di Iside<< e ricordare questo legame per una ragione personale precisa: bloccato sul Campidoglio in fiamme durante l'assalto dei partigiani di Vitellio, riuscì a sfuggire >>travestito<< da sacerdote della dea (salvato certamente più dalla testa rasata per l'occasione che dal indossare una veste di lino) (Suet. *Dom.* 1; Tac. *Hist.* III,74,1). Ma se si fosse davvero voluto ricordare e celebrare questo episodio per consacrare l'obelisco a Iside, il redattore di questi testi sarebbe stato obbligato certamente a comporre e farvi comparire un inno alla dea, che proclamasse con insistenza le sue virtù protettrici e salvifiche.**

**Ora, obiettivamente, i testi dell'obelisco non potrebbero essere più chiari: sono, nel loro insieme, privi di qualunque preoccupazione >>isiaca<<. I primi tre lati sono per la sola gloria di Domiziano *dominus et deus*: proclamazione della sua nascita divina e dunque della sua predestinazione a esercitare il potere supremo come i grandi faraoni del tempo passato, attestazione della sua legittimità a essere l'erede di Vespasiano alla testa dell'impero. Il quarto lato precisa il carattere esclusivamente solare del monumento dedicato a Ra-Harakhte e canta la gloria della *gens Flavia*.**

Più che qualsiasi altro, un contesto monumentale a forte destinazione ideologica sembrerebbe essere stato particolarmente indicato ad accogliere questo obelisco: **il complesso del *Templum Gentis Flaviae* eretto sul Quirinale alla fine del regno di Domiziano. Innalzato sul luogo della casa natale di Domiziano (Suet. *Dom.* 1), era certamente circolare in quanto immagine del cielo e dell'eternità ciclica (Mart. IX,1,8; 3,12; 34,2 e Stat. *Silv.* IV.3.18-19): come indicava il suo nome, esso era dedicato al culto della *gens Flavia* in quanto tomba dinastica: le ceneri di Vespasiano e di Tito vi erano state deposte (Mart. IX,34,7 e Stat. *Silv.* V,1,240-241) ed esso ospitava quelle di Domiziano che qui furono mischiate a quelle della beneamata Giulia, la figlia di Tito (Suet. *Dom.* 17 e 22). Ci sono qui tanti elementi quanti se ne ritrovano riflessi nella natura stessa dell'obelisco, monumento solare simbolo dell'eternità ciclica, e nel contenuto dei suoi testi, che glorificano da una parte la nascita e la dignità imperiale di Domiziano, dall'altra il ricordo dei sovrani della *gens Flavia*.**

Questa proposta di collocare l'obelisco nell'ambito del *Templum Gentis Flaviae* sembra supportata dal fatto che sia stato scelto proprio questo obelisco da Massenzio per decorare la *spina* del circo della sua villa sulla via Appia. Nella sua nuova collocazione, esso continuò a rivestire il ruolo che Domiziano gli aveva assegnato nell'ambito del *Templum Gentis Flaviae*: conservare una dimensione cosmica in un complesso monumentale che voleva essere, l'affermazione e la glorificazione di una nuova dinastia [my emphasis; to the relevant passages I will come back below]".

***The hypotheses, published by Grenier (2009). With discussions of the contents of the reliefs on the pyramidion of Domitian's obelisk and of the contents of its hieroglyphic inscriptions (cf. here Fig. 28)***

To the small square, which is incised on the Severan Marble Plan on the piazza between the *Iseum* and the *Serapeum* (cf. here Fig. 78), I will likewise come back below. As Grenier (2009, 238) observed in the just quoted passage, many scholars have so far identified this square with the socle of Domitian's obelisk. - I hope to demonstrate in this Chapter, that their assumption is actually true. Grenier (*op.cit.*) was right: on the Severan Marble Plan the lettering is indeed: SERAPAEUM; cf. *LTUR* I (1993, Figs. 122; 122a); Giuseppina Capriotti Vittozzi (2013, 178, Fig. 5). On Guglielmo Gatti's plan of the area (cf. *infra*, at Chapter IV.1.1.c) and here Fig. 78), the lettering has been 'turned around' in order to be legible, and reads: ISEVM ET SERAPEVM.

**To Grenier's statement (2009, 238): "Iside è più che discreta nelle scene del *pyramidion* e, obiettivamente, ci si può chiedere se essa vi compaia davvero, a meno di non pensare che essa faccia sistematicamente propri, in questo caso, attributi di altre dee (Oadjet, Nekhbet, Hathor) o della regina-madre" - two objections can be made :**

1.) Grenier's assertion, according to which: '[the presence of] Isis is more than moderate' in the scenes of the *pyramidion* of Domitian's obelisk, is not true. On the contrary, she is even herself represented, as we shall see below. Therefore it is not necessary to ask ourselves, as Grenier did, whether -

2.) Isis could possibly be equated in these scenes on the *pyramidion* of Domitian's obelisk with the goddesses, whom Grenier mentions: Wadjet, Nekhbet and Hathor, or with Grenier's "regina-madre".

With the latter remark, Grenier hinted obviously at scholars like Michel Malaise (1972a, 204-205), whose relevant opinion, as we shall see below, Grenier had in his earlier article rejected; cf. Grenier (1987, 957-958, with n. 40, quoted *verbatim infra*); or for example Katja Lembke (1994b, 212, quoted *verbatim infra*, in Chapter IV.1.1.c)), who is also of the opinion that on all four scenes of this *pyramidion* Isis turns to Domitian, thus equating these goddesses with Isis; or to Emanuele Ciampini (2005, 399, quoted *verbatim infra*, in Chapter IV.1.1.d)), who calls these goddesses the 'divine mothers of Domitian'. Besides, as we shall see below, according to some scholars, Grenier's "regina-madre" actually was likewise Isis.

For good photographs of the four sides of the *pyramidion* of Domitian's obelisk, cf. Grenier (2009, 236, Fig. "2. I quattro lati del *pyramidion* che coronava l'obelisco di Domiziano. Città del Vaticano, Musei Vaticani". - On top left: south side, on top right: west side, on bottom left: east side, on bottom right: north side). This large fragment of the *pyramidion* was later found than the shaft of the obelisk that in 1648 was re-erected on Bernini's fountain in Piazza Navona. Some more fragments of this *pyramidion*, comprising also some hieroglyphs, were found in the excavation of 1960, conducted on the *spina* of the *Circus* of Maxentius at his *Villa* on the Via Appia.

**Giuseppina Pisani Sartorio (2006, 58, in her description of the sculptures and monuments that were found on the *spina* of the *Circus* of Maxentius at his *Villa* on the Via Appia), writes about the various parts of Domitian's obelisk (cf. here Fig. 28):**

"6) obelisco in granito rosa, d'epoca romana, fatto trasportare da Massenzio dall'Iseo e Serapeo Campense domiziano dell'anno 81 o da altro luogo: il Grenier ha recentemente avanzato l'ipotesi di una provenienza dalla *domus* ["et le *templum*", so J.-C. GRENIER 1996, 357] *Gentis Flaviae* sul Quirinale (Grenier, 'L'obelisco' [*i.e.*, here J.-C. GRENIER 1999] 225-234). L'obelisco, caduto probabilmente a causa del terremoto del 365 descritto da Ammiano Marcellino (26.10.15-19) o di quello del 443, venne trasportato a piazza Navona nel 1648 sotto Innocenzo X. Il *pyramidion* dell'obelisco, rinvenuto più tardi e acquistato dal card.[inale] Borgia alla fine del Settecento, dopo la dispersione della collezione Borgia nel 1814 venne venduto al Vaticano, dove ancora si conserva (Calza [*i.e.*, here R. CALZA 1976] 168-170, nn. 12, 13a-b); alcuni frammenti, recuperati negli scavi del 1960, anche con geroglifici, sono conservati presso l'Antiquarium Comunale (cassa 307/236, nn. 3-10) (Ioppolo [*i.e.*, here G. IOPPOLO 1988] 126-130, figs. 21-25). La platea dell'obelisco era larga m 4,73 x 6,21, in posizione centrale sulla *spina* tra le due mete. L'altezza totale dell'obelisco, a seguito di nuove misurazioni effettuate nel 1995, è di m 16,38 m".

### *The 'royal rituals' represented on Domitian's obelisk*

The goddesses Wadjet, Nekhbet and Hathor (but not the "regina-madre"), all mentioned by Grenier (2009, 238), who are represented in the scenes on the *pyramidion* of Domitian's obelisk, have been studied in detail by Emanuele M. Ciampini (2005). These goddesses appear in the scenes on the *pyramidion* of the obelisk and are explicitly mentioned in one section of its hieroglyphic texts, and refer to the sacred dramas, performed at the structures called *mammisis* ('the houses of birth' [of the pharaoh]) in Egypt.

Ciampini (2005, 399) writes that the *raison d'être* of *mammisis* was the demonstration of the "legitimization of the king", which is why the appearance of these goddesses on Domitian's obelisk fulfills the same function. Jean-Claude Goyon (1988) calls the sacred dramas, performed at the *mammisis* and elsewhere the 'royal

rituals'. In their entirety, these rituals could last from the end of March until mid-July. They began with the enactment of 'the birth of the divine child', the (new) king of Egypt, and ended with his coronation as pharaoh, which occurred at the festival of Egyptian New Year. Those rituals were performed every year; in those years, in which a new pharaoh was not crowned, they served the reigning king as "the repeated confirmation of his royal power"; cf. Jean-Claude Goyon (1988, 33; cf. *infra*, at Chapter IV.1.1.e)). Emanuele M. Ciampini refers to such a ceremony as "rituale di conferma del potere regale alla Festa del Nuovo Anno"; cf. *The first Contribution by Emanuele M. Ciampini* in this volume: *La regalità domiziana: una nota egittologica*.

Both subjects, the birth of the divine child Domitian and his coronation as pharaoh, appear therefore not by chance likewise in the hieroglyphic texts of Domitian's obelisk (*infra*, at Chapter IV.1.1.d)), as well as in the scenes on the *pyramidion* of this obelisk (cf. *supra*, and *infra*, at Chapter IV.1.1.c)).

**Because Grenier (2009, 234, 237, 238) mentions in his descriptions of the scenes on the four sides of the *pyramidion* of Domitian's obelisk (cf. here Fig. 28) the following points a)-c), which are all related to the 'royal rituals'. These facts made me at first wonder, why Grenier did not himself arrive at the obvious conclusion that Isis is actually *very much* present on Domitian's obelisk.**

The difference between his interpretation, as compared to that of those scholars, who I am myself following here, is clear, when we look at point *b*). But let's first of all look at all three points:

*a*) these specific goddesses (Wadjet, Nekhbet and Hathor; but not Grenier's "regina-madre"), whom Grenier (2009, 238) mentions in the above quoted passage, in which he summarizes his descriptions of the four scenes, represented on the *pyramidion* of Domitian's obelisk, were all important actors in the 'royal rituals', performed at the *mammisis* in Egypt;

*b*) Grenier (2009, 234), in his description of the scene on the *pyramidion* on the west side of the obelisk, mentions in the centre the enthroned Domitian. Behind him stands in his opinion the god Amun: "progenitore dei faraoni a partire dal Nuovo Regno, che, secondo il dogma della trasmissione della dignità regale prendeva il posto del sovrano regnante nel momento dell'unione con la regina. Nella logica di questo dogma avremmo qui dunque un Vespasiano-Ammon e una Flavia Domitilla-regina che trasmettono al figlio la dignità regale rappresentata dalla doppia corona che ella gli offre. Ammon presenta il viso di Maat, simbolo dell'Armonia Universale, e mostra così che il frutto della loro unione si inserisce nell'ordine cosmico";

*c*), in the scene of the *pyramidion* on the north side of the obelisk appears the god Thot, about whom Grenier (2009, 237) writes: "uno degli attori divini fondamentali nei riti legati alla trasmissione del potere regale" (quoted in more *detail infra*), that is to say, one of the 'fundamental divine actors' in the 'royal rituals', as Grenier himself says.

Grenier (2009, 234), in the above-quoted point *b*), refers to the ritual of 'the birth of the divine child', performed at the structures called *mammisis*, with which the 'royal rituals' began that culminated in the coronation of this new king. By applying this to Domitian, Grenier thus follows what we know about the dogma of the 'doppelte Sohnschaft' ('double sonship', by other scholars referred to as theogamy; cf. *infra*). This was not only claimed by the kings of Egypt of the pharaonic period, but also by Alexander the Great and by Augustus and served the function of legitimizing their reigns as rulers.

**In the following, I allow myself a digression on the dogma of the 'doppelte Sohnschaft' ('double sonship'.**

Tonio Hölscher (2009b, 59-60) writes about Alexander the Great: "In Ägypten hatte der Gott Ammon ihn [Alexander] bei seinem Besuch des Orakels in der Oase Siwa als seinen Sohn anerkannt. Damit trat Alexander in die ägyptische Tradition des Herrschers als eines unmittelbaren Gottessohnes ein. Der Pharaon war Sohn

des Sonnengottes, gezeugt von Amun Re in Gestalt des regierenden Königs mit dessen Gemahlin. Daraus resultierte die Ebenbildlichkeit zwischen dem Gott und dem von ihm gezeugten neuen Herrscher. Die Theologie der Herrschaft hatte die Identität von Gott und Herrscher zur Grundlage, aus der das göttliche Wesen des neugeborenen Nachfolgers erwuchs. Gleichzeitig aber wurde an der Vaterschaft des regierenden Königs festgehalten. Damit kam es zu dem Phänomen der doppelten göttlich-menschlichen Herkunft, die dem königlichen Nachfolger die unverbrüchliche Legitimität verlieh".

For the dogma of the 'doppelte Sohnschaft' ('double sonship'), cf. Häuber (2014a, 717, 733 with n. 53, providing references); for "Maat, simbolo dell'Armonia Universale", as Grenier (2009, 234), referred to this Egyptian all-embracing ethic doctrine; cf. Häuber (2017, 166, 376-377, 418-423). According to Egyptian theology, the establishment and maintenance of Ma'at was the most important obligation of the king, it not only guaranteed the life and welfare of the king's subjects, but even the survival of the entire cosmos; for Alexander the Great's and Augustus' 'double sonship', cf. Häuber (2017, 570, 572-578), where I have discussed the relevant studies by Stefan Pfeiffer (2010b, 45-50, 60-61).

According to this dogma of the 'doppelte Sohnschaft', the (new) king of Egypt had mortal parents, the reigning king of Egypt and his queen. But in the moment of the conception of the new king, the god Amun [or Re-Harakhte] took the place of his mortal father. According to Grenier (2009, 234), therefore: "Vespasiano-Ammone e ... Flavia Domitilla-regina" transferred the 'dignity of kingship' on their son Domitian.

I myself follow instead scholars like Goyon (1988; cf. *infra*, at Chapter IV.1.1.e) and Ciampini (2004 and 2005; cf. *infra*, at Chapter IV.1.1.d)), who interpret the 'royal rituals' at the structure called *mammisis* differently than Grenier (*op.cit.*). Goyon (1988, 34) mentions the fact that in reality the queen of the reigning king (*i.e.*, Grenier's "regina-madre") conceives the 'divine child' and gives birth to it. Cf. Goyon's Fig. 9 (= here **Fig. 79**): "The birth of the child-god Harpre ("Horus-the-Son") before Amun-Re, the goddess Nekhbet, and Cleopatra VII ... [*i.e.*, the second figure from right]". - To this I will come back below, at Chapter IV.1.1.e), and here **Fig. 79**.

But Goyon (1988, 34) quotes also the texts which accompany the relevant scenes, representing the birth of the divine child (the future king): "Although we cannot state the precise dates assigned to the festivities, due to the lack of documents, they followed one another in a logical order, from 28 Pharmouthi to the fateful date of the coronation: the first day of the month of Thot (mid-July). When Re himself had announced the coming to the world of the heir by saying "Isis has brought into the world her Horus ...", the renewed king regained his efficacy, and Ma'at, momentarily menaced, continued to rule the universe". - With the latter remark, Goyon referred to the fact that these ceremonies were celebrated every year; in those years, in which not a new pharaoh was crowned, they served the reigning king as "the repeated confirmation of his royal power"; cf. Goyon (1988, 33; cf. *infra*, at Chapter IV.1.1.e)). And Emanuele M. Ciampini refers to such a ceremony as "rituale di conferma del potere regale alla Festa del Nuovo Anno"; cf. *The first Contribution by Emanuele M. Ciampini* in this volume: *La regalità domiziana: una nota egittologica*).

Ciampini (2005, 399) writes that Horus (*i.e.*, the king) is the son of Osiris, and that the new king is born as the son of the divine couple (Isis and Osiris). On p. 400, Ciampini, by explaining the gradual development of the various 'royal rituals' over time, mentions the fact that: "(Amon-Rê decides to have a son, his incarnation as human father of [the] king, conception and birth of pharaoh)", but does not mention the queen of the reigning king at all in this context. Ciampini speaks only of Isis as the mother of the king, and of his 'divine mothers' (cf. pp. 399-400). The reason being that according to the hieroglyphic texts accompanying the relevant representations in the structures called *mammisi*, which Ciampini refers to (which differ from Goyon's examples, his Figs. 8-10, here illustrated as **Fig. 79**), the king's mother, who gives birth to him and raises him, is identified as the goddess Isis herself.

Capriotti Vittozzi provides an interesting example for the 'application' of the old dogma of the 'double sonship', called theogamy by her, that caused the famous scandal under Tiberius in AD 32 and the destruction of the Temple of Isis, where that scandal had occurred. Some scholars, including Capriotti Vittozzi (2013) herself, believe (in my opinion erroneously) that the temple in question was the Iseum Campense. For a detailed discussion; cf. *infra*, in volume 3-2, at *Appendix III*).

Capriotti Vittozzi (2013, 38-39) writes: "A incentivare l'avversione imperiale [*i.e.*, of Tiberius] per quella che veniva considerata una pernicioso superstizione, intervenne un pubblico scandalo che ci viene narrato da Flavio Giuseppe [with n. 70]: un cavaliere romano che si era proposto di sedurre una virtuosissima nobildonna, dopo inutili tentativi vi era riuscito lasciandole credere che si stesse intrattenendo con il dio Anubi. Scoperto l'inganno, il marito di lei era ricorso all'imperatore. [page 39] È interessante notare che l'intrigo fosse stato ordito sulla trama di un'antica tradizione egizia, quella della teogamia, per la quale un dio visitava la regina dando vita al futuro sovrano".

In her note 70, Capriotti Vittozzi writes: "*Ant. Iud.* XVIII, 3,4".

Let's now return to the hypotheses, published by Grenier (2009). With discussions of the contents of the reliefs on the pyramidion of Domitian's obelisk (cf. here Fig. 28) and of the contents of its hieroglyphic inscriptions.

I have mentioned above this point *b*), because from this passage, Grenier (2009, 234), is clear, why the author (2009, 238) could assert that Isis is not present neither in the four scenes of the *pyramidion* of Domitian's Obelisk, nor in the hieroglyphic texts on the four sides of this obelisk. Grenier mentioned "il dogma della trasmissione della dignità regale" in this context at all, because he identified the figure behind Domitian as Amun, who appears in the scene on the *pyramidion* of the west side of Domitian's obelisk; so also Katja Lembke (1994b, 40, quoted *verbatim infra*, at Chapter IV.1.1.c)). Given the fact that the scenes on the *pyramidion* of Domitian's obelisk are badly preserved, other scholars are of the, as I believe, correct opinion that this figure is not identifiable at all. - To this "dogma della trasmissione della dignità regale", enacted in the 'royal rituals', I will come back below (cf. *infra*, at Chapters IV.1.1.d); IV.1.1.e)).

Ciampini (2004, 165) writes:

"Lato verso la chiesa di S. Agnese [*i.e.*, west]

Pyramidion / Domiziano di fronte a Nekhbet e seguito da un'altra figura [this is the figure that according to Grenier 2009, 234, represents Amun]".

Also still another subject of the hieroglyphic inscriptions on Domitian's obelisk, that Grenier mentions elsewhere in the above quoted passage, turns out to be a theme that was enacted in the 'royal rituals', *inter alia* at the structures called *mammisis*. Grenier (2009, 238) writes: "I primi tre lati [of the hieroglyphic inscriptions on Domitian's obelisk] sono per la sola gloria di Domiziano *dominus et deus*: proclamazione della sua nascita divina e dunque della sua predestinazione a esercitare il potere supremo come i grandi faraoni del tempo passato, attestazione della sua legittimità a essere l'erede di Vespasiano alla testa dell'impero. **Il quarto lato precisa il carattere esclusivamente solare del monumento dedicato a Ra-Harakhte** [my emphasis]". Add to this Grenier's translation (2009, 237) of a section of the hieroglyphic inscription on the fourth side of Domitian's Obelisk: "IV - lato nord verso il Tevere ... **Egli ha eretto questo obelisco** in granito son le sue mani (?) **per suo padre Ra-Harakhte** ... [my emphasis]".

The claim of the king of Egypt to be the son of Re-Harakhte was also enacted in those 'royal rituals' that were connected *inter alia* with the structures called *mammisis* in Egypt (cf. *infra*, at Chapter IV.1.1.d)).

Ad 2.) These parallels to *mammisis* in Egypt in the scenes on the *pyramidion* of Domitian's Obelisk and in the relevant sections of the hieroglyphic texts of the obelisk (cf. E.M. CIAMPINI 2005) prove that Isis is - already

indirectly - present here: despite the assertions to the contrary by Grenier (2009, 238). - Apart from the fact that Isis is also 'herself' represented in one of these scenes (cf. *infra*).

And that because of the following reasons: the "regina-madre" and the 'divine child Domitian', whom Grenier (2009, 238) mentioned separately in the above quoted passage, belong together: in the rituals at the *mammisis* in Egypt, in which 'the birth of the divine child' was enacted in sacred dramas, it was *not* the real "regina-madre", who gave birth to the 'divine child', the new king - having been impregnated by her husband, the reigning king of Egypt - but instead the goddess Isis herself, who was believed to have been impregnated by the god Re-Harakhte. - To all this I will come back in detail below (cf. *infra*, at Chapter IV.1.1.d)).

Ad 1.) As already mentioned, contrary to Grenier's assertion, Isis is in the opinion of other scholars also 'herself' present in one of the four scenes on the *pyramidion* of Domitian's obelisk. Cf. Grenier's translation (2009, 237) of the hieroglyphic text on the north side of the obelisk:

#### "IV - lato nord (verso il Tevere)

Scena del *pyramidion*. Domiziano al centro è rivolto verso sinistra (senso di lettura del testo), la testa adorna dello *pschent*, le mani, chiuse, sono alzate e la sinistra tiene uno scettro. Davanti a lui, una dea acconciata con il *basileion*, nella gestualità della protezione (mano levata aperta). Dietro di lui, il dio Thot con testa di ibis (uno degli attori divini fondamentali nei riti legati alla trasmissione del potere regale) sembra fare lo stesso gesto".

For the *basileion*, one of the most typical attributes of Isis, cf. Gemma Sena Chiesa (1997, 152; C. HÄUBER 2014a, 156 with ns. 53, 56, Fig. 7).

But see Alfred Grimm (1997) 128:

"... Domiziano arredò il santuario di Iside e Serapide [*i.e.*, the Iseum Campense] con numerosi monumenti egizi ed egittizzanti, tra i quali anche l'obelisco che oggi si trova in piazza Navona e che raffigura l'incoronazione del principe **da parte della dea Iside** [my emphasis]".

Ciampini (2004, 159) writes:

"Lato verso il Tevere (nord)

Pyramidion / Domiziano mentre **offre a Iside**: dietro l'imperatore è Thot [my emphasis]".

Capriotti Vittozzi (2013, 127, in her Chapter: "I luoghi 'egizi' di Roma") writes:

"**Altre interessanti considerazioni riguardano il ruolo di Iside nell'obelisco di Domiziano, la quale appare come elargitrice di regalità e, in tal senso, in relazione con Ptah** [with n. 11]: ciò lascia intravedere una precisa citazione dell'ambiente menfita, che peraltro era l'antica capitale dove avveniva tradizionalmente l'incoronazione [my emphasis]".

In her **note 11**, Capriotti Vittozzi writes: "Ciampini 2004, 165".

See also Capriotti Vittozzi (2014, 243-246, quoted *verbatim infra*, at Chapter IV.1.1.d)), where she likewise discusses the "ruolo di Iside nell'obelisco di Domiziano".

Also Laurent Bricault and Richard Veymiers (2018, 151) write:

"À Rome, l'obélisque aujourd'hui visible sur la Piazza Navona, dont le programme iconographique et hymnique met principalement en scène Domitien **et Isis** ... [my emphasis]".

**To conclude. The analysis of the above-quoted passages from Grenier (2009, 238, 234) has shown, why, in the author's opinion, Domitian's obelisk (cf. here Fig. 28) was not commissioned for the Iseum Campense, but rather for the *Templum Gentis Flaviae*. He did this by (in my opinion erroneously) asserting, that Isis is not present either in the scenes on the *pyramidion* of Domitian's obelisk, or in its hieroglyphic texts.**

Grenier mentioned his relevant opinion in his discussions of the following two figures that appear in the scenes on the *pyramidion*:

a) the "regina-madre", whose function in the 'royal rituals' he explained by applying the meaning of those sacred performances to Domitian, but note that Grenier did not say, in which scene of the *pyramidion* in his opinion the "regina-madre" is represented (to this I will come back below); and -

b) the figure of Amun, whom Grenier recognized in the scene of the *pyramidion* on the west side of Domitian's obelisk. But note also that none of the other here discussed scholars identify Grenier's alleged "regina-madre" as such.

As already mentioned, Grenier's interpretation (2009) of the 'royal rituals', performed *inter alia* at the *mammisis* in Egypt, differed greatly from those of Goyon (1988) and Ciampini (2004; 2005), whom I am following here (cf. *infra*, at Chapters V.1.1.d); V.1.1.e)).

**Let's now turn to Coarelli (2014, 204-207, with Figs. 50-52), who discusses the *Templum Gentis Flaviae* and explains, why he follows Grenier in attributing Domitian's obelisk (cf. here Fig. 28) to this building.**

Cf. Coarelli (2014, 204: "L'edificio così ricostruito ci restituisce un'immagine plausibile del *templum gentis Flaviae*: una struttura che riuniva in sé, per la prima volta, le caratteristiche e le funzioni di tipi edilizi in precedenza distinti: il sepolcro e il tempio dinastico.

Resta da chiarire il motivo per cui esso viene ancora citato nei Cataloghi Regionari di età costantiniana, quando ormai doveva essere scomparso per far luogo alle Terme di Diocleziano (Anch'esse menzionate nello stesso documento) [my emphasis]".

Cf. Coarelli (2014, 204-207): "**Va tenuto conto, a questo proposito, di un detta-** [page 205] **glio emerso dalle esplorazioni recenti [with n. 474], di cui non si è tenuto alcun conto: il fatto cioè che i resti dell'edificio spiccano a un livello più alto rispetto a quello delle successive terme. Questo dato ammette un'unica soluzione, che infatti è stata proposta, con prudenza, dai responsabili dello scavo: mentre la grande platea porticata venne certamente soppressa dall'edificio successivo, che ne prese il posto, la costruzione centrale, e cioè il nucleo essenziale del complesso, venne risparmiato, poiché veniva a cadere in un'area libera entro il recinto delle terme.** L'ovvia conclusione è che il complesso domiziano sopravvisse anche in seguito, ciò che consente di spiegare la sua menzione, insieme alle terme, nei Cataloghi Regionari. Una sua distruzione totale infatti sarebbe difficile da spiegare, in un'epoca in cui la memoria dei Flavi (escluso ovviamente Domiziano) continuò a vivere, e questo almeno fino all'età di Costantino. Non va dimenticato, che quest'ultimo apparteneva alla *gens Flavia*, e d'altra parte sarebbe difficile immaginare che la costruzione a *Hispellum* di un *templum Flaviae gentis* non abbia tenuto conto dell'omonimo modello domiziano [with n. 475].

**Un ultimo dato emerge dagli studi di J.-P. [corr.: J.-C.] Grenier [with n. 476], dai quali risulta l'estraneità dell'obelisco panfilio di piazza Navona, opera di Domiziano, all'Iseo del Campo Marzio (con il quale esso veniva in genere collegato, ma senza argomenti cogenti). In effetti, nel testo geroglifico è praticamente assente ogni allusione ai culti egiziani, mentre è palese l'insistenza sugli aspetti dinastici della *gens Flavia*, che vengono più volte ribaditi. Per questo, Grenier propone di attribuirlo al *templum gentis Flaviae*.**

Un elemento che sembra confermare l'identificazione è l'apparente disponibilità dell'obelisco subito dopo la distruzione di gran parte del tempio per la realizzazione delle Terme di Diocleziano, e quindi immediatamente prima della sua nuova sistemazione nel Circo di Massenzio. **Ma il fatto più interessante,**

**giustamente sottolineato da Grenier, è che tale collocazione mirava a ricostituire, nella nuova sede, un contesto del tutto analogo a quello originario: l'obelisco veniva infatti a trovarsi in prossimità del sepolcro detto di Romolo che in realtà era, nelle intenzioni, il mausoleo dinastico destinato a Massenzio e alla sua famiglia. Ora, come abbiamo visto, questo costituisce il primo di una serie di sepolcri analoghi, realizzati in età costantiniana. Ma l'archetipo, come sappiamo, è da riconoscere proprio nel *templum gentis Flaviae*, con il quale si era realizzata per la prima volta la sintesi tra tomba e tempio dinastico. Le motivazioni ideologiche di un tale connubio corrispondono in effetti alle esigenze della politica 'monarchica' di Domiziano.**

L'abbandono di questo modello, in seguito alla condanna del suo creatore [*i.e.*, Domitian], renderà improponibile ogni tentativo analogo nel periodo successivo: Nerva infatti sarà sepolto nel Mausoleo di Augusto e i corpi degli imperatori successivi, con la nota eccezione di Traiano, verranno ospitati nel nuovo Mausoleo di Adriano. Solo con Massenzio il tentativo sarà rinnovato, e con un certo successo, come sappiamo. **La voluta conservazione del monumento domiziano all'interno delle terme (realizzate dal padre di Massenzio, Massimiano Erculeo) e il trasferimento dell'obelisco costituiscono certamente operazioni collegate:** in ogni caso, tali da confermare l'ipotesi che vi riconosce l'avvenuto recupero di un modello già antico in funzione di un nuovo esperimento dinastico [my emphasis].

In his n. 474, Coarelli writes: "CANDILIO 2000-01, p. 552, nota 32".

In his n. 475, he writes: "GASCOU 1967".

In his n. 476, he writes: "GRENIER 1999; GRENIER 2009".

As already written elsewhere; cf. Häuber (2017, 158-164, for a summary, cf. *infra*, at Chapter IV.1.1.h)), I do not follow the hypotheses presented here by Coarelli and Grenier, which I have discussed on the basis of their following publications (cf. J.-C. GRENIER 1996, 357; *id.* 2009, 234-239; F. COARELLI 1996, 108; *id.*, in: F. COARELLI 2009a, 451, cat. no.: "43 frammento della *Forma Urbis Romae* [*i.e.*, the Severan Marble Plan] con l'Iseo e il Serapeo"; *id.* 2009b, 94; *id.* 2014, 194-207).

And that for the following reasons (I repeat below the relevant sections of Coarelli's text):

1.) Contrary to Coarelli's assertion (2014, 205) that: "nel testo geroglifico [of Domitian's obelisk] è praticamente assente ogni allusione ai culti egiziani", I follow those scholars, who have documented just the contrary. Their observations are summarized below (cf. *infra*, at Chapters IV.1.1.c); IV.1.1.d)).

**This means that Grenier's and Coarelli's main argument, which is the reason, why they both do not attribute Domitian's obelisk (cf. here Fig. 28) to the Iseum Campense, is actually not true.** - But there are more reasons that speak against their hypotheses (cf. also *infra*, at Chapter IV.1.1.h)).

2.) Contrary to Coarelli (2014, 205-207), I cannot see that: "il fatto più interessante, giustamente sottolineato da Grenier, è che tale collocazione [*i.e.*, of Domitian's obelisk] mirava a ricostituire, nella nuova sede [*i.e.*, at the *Villa* of Maxentius on the *Via Appia*], un contesto del tutto analogo a quello originario: l'obelisco veniva infatti a trovarsi in prossimità del sepolcro detto di Romolo".

### *The display of Domitian's obelisk at the Villa of Maxentius on the Via Appia*

Domitian's obelisk at the *Villa* of Maxentius on the *Via Appia* did *not* stand 'close to the sepolcro detto di Romolo', also known as 'Tempio di Romolo', as asserted by Coarelli (2014, 205-207), who follows, in this respect, Grenier, but was instead on display on the *spina* of the *Circus* of Maxentius, which is far away from this mausoleum.

Maxentius, in my opinion, had thus created with Domitian's obelisk on the *spina* of his *Circus* one of several *Architekturkopien* of the obelisk, that Augustus had erected on the *spina* of the *Circus Maximus*, and which at Maxentius' time was still in place (cf. here **Fig. 58**, label: CIRCUS MAXIMUS). - This was one of the two Egyptian obelisks, which Augustus was first to bring from Egypt to Rome; it is the one now standing on the Piazza del Popolo.

On the *Villa* of Maxentius on the Via Appia, Domitian's obelisk, and on the hypothesis that attributes it to the *Templum Gentis Flaviae*; cf. Amanda Claridge (1998, 338; cf. p. 337, "Fig. 166. Villa and Circus of Maxentius. Site plan", labels: "MAUSOLEUM; Circus; Spina": cf. pp. 211, 350, Fig. 174, number 15 [with the earlier, wrong location of the *Templum Gentis Flaviae* at the site of the *domus* of Domitian's paternal uncle, Flavius Sabinus]; cf. *ead.* 2010, 427; cf. p. 427, "Fig. 203. Villa and Circus of Maxentius. Site plan", labels: "MAUSOLEUM; Circus; Spina"; cf. pp. 237, 392, Fig. 180, number 15 [with the earlier, but wrong location of the *Templum Gentis Flaviae* at the site of the *domus* of Domitian's paternal uncle, Flavius Sabinus]); and G. Pisani Sartorio (2006, 49-59, esp. p. 58, quoted *verbatim supra*.

Concerning the different locations of the *Templum Gentis Flaviae*, I have written elsewhere:

"cf. Coarelli: "Gens Flavia, Templum", in: *LTUR* II (1995) 368-369. In this entry, Coarelli identified the *domus*, where Domitian was born, and thus the future site of the *Templum Gentis Flaviae*, with the *domus* of Domitian's paternal uncle, Flavius Sabinus, an opinion, which he would later correct [see below]. See for further references *LTUR* V (1999) 262"; cf. Häuber (2017, 160).

For the Caserma dei Corazzieri (next to the Church of S. Susanna), where Coarelli had earlier (but erroneously) assumed the *domus* of Flavius Sabinus (a suggestion, which I myself have at first followed), I anticipate in the following, what was written for Chapter *V.1.i.3.a*):

'For this coin; cf. Paris (1994b, 26 Fig. 14: "Sesterzio di Domiziano (95/96 d.C) con raffigurazione di edificio decastilo [= here **Fig. 30**]". For the "Rilievo Terme Vaticano", which, in her opinion, shows a procession in front of a 'tempio decastilo'; cf. Paris 1994b, 28, Fig. 16: "Il rilievo del Museo Vaticano e quello del Museo Nazionale [Romano] ricongiunti in un calco del Museo della Civiltà Romana" (cf. here **Fig. 31**). Cf. her Figs. 17-19 on p. 29, and Figs. 1-2 on p. 32. **Note that Paris (1994b) (erroneously locates the *Templum Gentis Flaviae* at the site of a *domus*, which has (erroneously) been identified by Filippo Coarelli ("Gens Flavia, Templum", in: *LTUR* II [1995] 368, who refers to: M. TORELLI: "Domus: T. Flavius Sabinus", in: *LTUR* II [1995] 102-103) with an architecture, excavated underneath the Caserma dei Corazzieri on Via XX Settembre, 12, close to the Church of S. Susanna on the Quirinal; cf. Häuber (2009, 312 with n. 20). For the excavation of this rich *domus*; cf. Häuber (2014a, 808 with ns. 9, 10) [my emphasis]'**

For the correct locations of the *domus* of Flavius Sabinus and of the *domus* of Vespasian/ the *Templum Gentis Flaviae*; cf. now Coarelli (2014, 71, 255-256, 263, 271-274, 277, 280-281). For a discussion of the correct location of the *domus* of Flavius Sabinus; cf. *infra*, in Chapter *V.1.i.3.a*). But note that Diane Atnally Conlin (2021, 158, Fig. 7) still believes that Domitian erected the *Templum Gentis Flaviae* at the site of the *domus* of his uncle Flavius Sabinus, where Domitian was allegedly born.

Cf. here **Figs. 58; 59**, labels: COLLIS QUIRINALIS; Servian city Wall; S. Susanna; Caserma dei Corazzieri; site of DOMUS; ALTA SEMITA / Via del Quirinale / Via XX Settembre; Via Firenze; site of DOMUS : T. FLAVIUS SABINUS / DOMUS : NUMMII; Piazza S. Bernardo; Va Torino, Baths of DIOCLETIAN; site of DOMUS : VESPASIAN / TEMPLUM GENTIS FLAVIAE

For the idea that Maxentius' re-use of Domitian's obelisk on the *spina* of his *Circus* may be regarded as an *Architekturkopie* of Augustus' obelisk on the *spina* of the *Circus Maximus*, cf. Häuber (2017, 37, Fig. 1,2, pp. 162, 599. Cf. pp. 19, 113 n. 63, pp. 424-426, for the Egyptian obelisk now on the Piazza del Popolo. Cf. pp. 382-384, for the other comparable *Architekturkopien*).

Only after this Chapter was written, did I read the first publication by Grenier (1987) on the hieroglyphic texts of Domitian's obelisk. I was hoping to find there, which figure in the scenes on its *pyramidion* the author might have referred to in the above quoted passage (cf. J.-C. GRENIER 2009, 238), as the "regina-madre". To my great surprise, Grenier (1987) did not identify any of the female figures in the scenes on the obelisk's *pyramidion* as the "regina-madre", in addition to this, he was of almost exactly the same opinion concerning the interpretations of the iconographic details of these scenes as Ciampini (2005; cf. *infra*, at Chapter IV.1.1.d)).

Grenier (1987, 952) wrote about the hieroglyphic texts of Domitian's obelisk and the scenes of its *pyramidion* :

"De même, sur la face I, la séquence bien connue vautant les mérites du pharaon constructeur ne saurait être ici employée fortuitement: <<Il a relevé ce qui était tombé en ruine et il a rempli ce qu'il a trouvé vide en augmentant e qui existait déjà, attentif à faire pour le mieux>>.

(I,7)

Compte tenu du contexte, il est licite de voir là une allusion aux travaux entrepris par Domitien pour reconstruire les édifices du Champ de Mars détruits par l'incendi de l'an 80 au nombre desquels se trouvait justement l'ensemble de l'Iseum et du Serapeum où se dressait l'obélisque [with n. 33, providing references]".

Cf. Grenier (1987, 955): "... rien ne vient indiquer que ce monument [*i.e.*, Domitian's obelisk] témoigne d'une dévotion particulière pour les divinités alexandrines en particulier [with n. 38] ... la déesse à qui, on le sait, il [*i.e.*, Domitian] devait la vie (cf. l'épisode fameux du jeune Domitien échappant à ses assassins lors de l'assaut du Capitole en 69, en se réfugiant dans le temple capitolin d'Isis comme le rapportent TACITE, *Hist.*, III, 74, 1 et SUÉTONNE, *Dom.* 1,4 [cf. *infra*, in volume 3-2, at *Appendix I.b-I.d*]).

Grenier (1987, 957-958, with n. 40, Figs. 5-8) comments on the scenes represented on the *pyramidion* of Domitian's obelisk as follows: "... dans lesquelles on a reconcé à l'iconographie traditionnelle du Pharaon adorant le démiurge solaire pour évoquer la cérémonie même du couronnement royal: remise des couronnes et du symbol royal par excellence, l'emblème de Maât évoquant l'harmonie du monde que le nouveau souverain avait la charge de entretenir [with n. 40]".

In his 40, Grenier wrote: "**Le caractère exceptionnel de ce pyramidion a été remarqué par tous mais ici encore on peut se demander si le contenu <<isiacque>> de ces scènes n'a pas été exagérée il s'il convient d'identifier systématiquement à Isis tous les déesses qui y apparaissent (cf. p. ex. [par exemple] MALAISE, *Inventaire* [*i.e.*, here M. MALAISE 1972a], p. 204-205). Il me semble que reconnaître Isis (Fig. 5), Hathor e Quadjet (?) (Fig. 6); Mout (Fig. 7) et Nekhbet (Fig. 8) serait plus vraisemblable et rendrait mieux compte de la nature de ces scènes ... [my emphasis]**".

*Chapter IV.1.1.b) My first attempt to find arguments in support of the hypothesis that Domitian's obelisk (cf. here Fig. 28) was commissioned for the Iseum Campense*

I repeat in the following a passage written for Chapter II.3.1.c).

'In my effort to find proofs for the assumption that Domitian's obelisk was indeed commissioned by the emperor for the restored Iseum Campense, I have compared the claims made in the hieroglyphic inscriptions of this obelisk (cf. here Fig. 28) that concern the benefactions of the Flavian dynasty for the Roman People, as well as the claims made in these texts that concern the benefactions of Domitian himself, especially his provision of the Roman People with bountiful food - with those building, surrounding the obelisk, which Domitian himself had actually commissioned, for example the *Porticus Minucia Frumentaria*'.

For those claims, cf. Grenier (2009, 237: concerning the claims made in the hieroglyphic inscriptions on Domitian's obelisk on behalf of the Flavian dynasty), and Häuber (2017, 165: concerning the claims made in the hieroglyphic inscriptions on Domitian's obelisk on behalf of Domitian)

As a prerequisite of the just described 'urbanistic comparison' of Domitian's Obelisk within its real surroundings, I have assumed that this obelisk was indeed standing on the square between the *Iseum* and the *Serapeum*, where it has been located by many scholars (cf. the maps, here **Figs. 60; 78**). As I hope to demonstrate here (cf. *infra*, at Chapter IV.1.1.h)), Domitian had indeed commissioned the Obeliscus Pamphilius for precisely that location. For my earlier studies concerning this subject (cf. *supra*, n. 466 in Chapter IV.1., and C. HÄUBER 2017, 158-167, Fig. 5.5.2. [= cf. here **Fig. 28**] and the maps Fig. 3.7. on p. 69 [= here **Fig. 59**]; Fig. 3.7.1 on p. 71 [= here **Fig. 60**], and Fig. 3.7.1.1 on p. 73 [= here **Fig. 61**]).

**Chapter IV.1.1.c) Further research that was undertaken to clarify the question, whether or not Domitian's obelisk (cf. here Fig. 28) was commissioned for the Iseum Campense and G. Gatti's (1943-1944) correct reconstruction of the central Campus Martius (cf. here Fig. 78)**

In 2017 the book by Hugo Brandenburg on 'Constantine's Basilica of Saint Peter at Rome' appeared. In it he mentions the fact that artworks could not be removed from 'pagan' temples until the middle of the 5<sup>th</sup> century (cf. H. BRANDENBURG, *Die Konstantinische Petersbasilika am Vatikan in Rom. Anmerkungen zu ihrer Chronologie, Architektur und Ausstattung* 2017).

Brandenburg (2017, 70), in his discussion of the question, whether or not ancient *spolia* could possibly have been re-used for the construction of Constantine's new Basilica of Saint Peter, writes: "Öffentliche Bauten einschließlich der Tempel, denen man Material in den entsprechenden Maßen und vielleicht auch Anzahl als Spolien hätte entnehmen können, standen nicht zur Verfügung, da sie in gutem Bauzustand waren und bis in die Mitte des 5. Jh. als *ornamenta urbis* unter Schutz standen [with n. 203]".

In his **note 203**, Brandenburg writes: "Schutz der öffentlichen Bauten und Tempel z.B. Cod. Theod. IX, 17, 2 von März des Jahres 349; XVI, 10, Ian. 29 vom Jahr 399; zur Bewertung dieser Bauten als *ornamenta urbis* s.[iehe] A. Geyer, *Ne ruinis urbis deformetur*. Ästhetische Kriterien in der spätantiken Baugesetzgebung: *Boreas* 16, 1993, 63-77; C. J. Goddard, The evolution of pagan sanctuaries in late antique Italy: M. Ghilardi, C. J. Goddard, P. Porena (Hrsg.), *Les cités d'Italie tardo antique (IVe-VIIe siècle)*, Rom 2006, 281-308; Bosman 2013, 77".

Brandenburg's just-quoted statement opened the following interrelated questions:

- 1.) how could Maxentius have removed Domitian's obelisk from the Iseum Campense? - Provided it stood there at all;
- 2.) provided this sanctuary was still 'operating' as such at that time;
- A 3.) problem lies in the fact that in the hieroglyphic texts of Domitian's obelisk no mention is made - as in such texts on other obelisks - where the obelisk had been erected in antiquity.

To begin with the second question posed above, we do not know precisely, until when the cult at the Iseum Campense survived. Still after the restoration in AD 195/196 or between 198 and 209 by Septimius Severus and Caracalla (cf. C. HÄUBER 2014a, 74 with n. 231 [a comparison of all Egyptian sanctuaries at Rome with each other]; 724), we have further information concerning its existence. Filippo Coarelli (1996, 107) writes: "Ulteriori restauri vennero forse realizzati da Settimio Severo e Caracalla (iscrizione letta, ma non trascritta: *NSc* 1925, 239; quoted *verbatim infra*, in volume 3-2, at *Appendix I.g.2.*) e da Alessandro Severo (*Hist. Aug. Alex.* 26.8). Il santuario è ancora menzionato in Porph. *Plot.* 10 e in Lyd. *mens.* 4.148". That is to say, the Iseum Campense is still mentioned by: Porphyry, *Vita Plotini* and Lydus, *De mensibus*.

Cf. Andrew Smith ("Porphyry (AD 234-c.[irca] 305), scholar, philosopher, and student of religions. He was born probably at Tyre; originally bore the Syrian name Malchus; studied under Cassius Longinus at Athens; became a devoted disciple of Plotinus with whom he studied in Rome [263-268 AD] ... ", in: *OCD*<sup>3</sup> [1996] 1226. Cf. L. M. WHITBY: "Lydus, i.e. John the Lydian, civil servant at Constantinople and Greek author (AD 490-c.[irca] 560) ... *De mensibus* discusses the Roman calendar ...", in: *OCD*<sup>3</sup> [1996] 899).

**For the fact that the hieroglyphic texts of Domitian's obelisk do not contain, as other such texts, explicit indications to the location where this obelisk was erected, cf. Katja Lembke (1994b, 41 with n. 117) :**

**"Keine Gründe für die Aufstellung werden dagegen auf dem römischen Obelisken angegeben [i.e., in the inscriptions, written in hieroglyphs on Domitian's obelisk; my emphasis]. Bei genauer Betrachtung ergeben sich allerdings einige Hinweise:**

1. Auf der heutigen Westseite ist die Kindheit des Pharaos [i.e., of Domitian] geschildert, die mit der Inthronisation endet.
2. Mehrmals (Nord- und Ostseite) ist von der Krönung Domitians als Nachfolger Vespasians die Rede.
3. Das Pyramidion trägt auf allen Seiten eine Darstellung der Begegnung Domitians mit Göttern. Anhand der Attribute ist die Vermutung naheliegend, hierin eine Schilderung der Herrschaftsübergabe zu sehen".

Interesting in the context discussed here are also the following observations by Lembke (1994b, 212):

"Der Domitiansobelisk ist aller Wahrscheinlichkeit nach zunächst im Iseum Campense aufgestellt worden. Folgende Argumente unterstützen diese Annahme:

1.) **In den Darstellungen auf dem Pyramidion wird jeweils Domitians enge Beziehung zu Isis thematisiert, die dem Princeps auf allen vier Seiten zugewendet ist, so daß die Errichtung in einem Heiligtum der ägyptischen Götter nahe liegt. Außerdem spricht die Inschrift der Nordseite von dem Wiederaufbau und der Erweiterung eines (oder mehrerer) Gebäude. Auch wenn konkrete Hinweise fehlen, kann man diese Aussage auf den Wiederaufbau des Iseum Campense nach dem Brand d. J. [des Jahres] 80 beziehen ... [my emphasis]**".

Lembke (1994b, 40) has made, in addition to this, more important observations concerning the *pyramidion* of Domitian's obelisk: "Nähere Aufschlüsse ermöglicht das Pyramidion. Auf den vier Seiten ist jeweils Domitian mit Herrscherinsignien in Begleitung zweier Götter dargestellt. **Vor ihm steht jedes Mal Isis;** weitere Götter sind Thot, Uto (?), Horus und Amun-Re. **Im Zentrum steht also Domitians enge Bindung an Isis. Außerdem aber tragen die Gottheiten Insignien, die auf ein konkretes Ereignis anspielen: die Inthronisation Domitians als ägyptischer Pharaos.** Die verschiedenen Gesten und Symbole, die ihm die Götter überreichen (w3ś-Szepter, Kronen, Statuetten der Maat, Uräus), sind Teil des ägyptischen Herrscherbildes. Ebenfalls in diesen Kontext gehören die Kronen Domitians (Doppelkrone, Kompositkrone, hprś-Krone), die sowohl die Herrschaft von Ober- und Unterägypten als auch den göttlichen Aspekt des Königtums darstellen.

**Wichtig ist in diesem Zusammenhang, daß nicht Pharaos Domitian agiert und als Träger der Verantwortung für die irdische Gerechtigkeit den Göttern das Symbol der Maat übergibt, sondern als Empfänger göttlicher Gaben in Erscheinung tritt. Damit wird ihm [i.e., Domitian] die Ordnung gleichsam als Attribut verliehen und verliert ihren Aspekt als Leistung des Pharaos. In Ägypten dagegen "kann sich Ma'at aus eigener Kraft nicht halten und bedarf des Königs zu ihrer Fortsetzung. Nicht die Ma'at fundiert den Staat, sondern der Staat fundiert die Ma'at" [with n. 113; my emphasis]**".

In her **note 113**, Lembke writes: "J. Assmann, *Ma'at* (1990) 201. Ihm verdanke ich ebenfalls den Hinweis auf dieses Phänomen". - Cf. the comments by Häuber (2017, 166).

**On the 4th of May 2018, I met again with Alessandro Roccati in Rome. This time we discussed the controversy concerning the context, for which Domitian had commissioned his obelisk, in addition to this I asked him, whether there is a chance to find out, when studying its hieroglyphic texts, for which context Domitian's obelisk had been made.**

He told me that the hieroglyphic inscriptions on obelisks actually always contain such information, which is why the Pamphili Obelisk, if indeed erected at the Iseum Campense, should contain clear hints at the goddess Isis. - A fact, although J.-C. Grenier (2009, 238), as well as Coarelli (2014, 205, both quoted *verbatim supra*, in Chapter IV.1.1.a)) have explicitly denied this, is actually the case, as other scholars have observed (cf. K. LEMBKE 1994b, 40-41, quoted *verbatim supra*. See also E.M. CIAMPINI 2004, 159, 165, H 30; *id.* 2005, 399-402, quoted *verbatim infra*, in Chapter IV.1.1.d)).

Roccati mentioned to me the relevant studies of the Egyptologist Emanuele Marcello Ciampini and kindly contacted him for me. Fortunately on 11th May 2018, I had also the chance to meet with Emanuele Ciampini himself in Rome. Personally I am unable to read hieroglyphs, and Ciampini was kind enough to present me with his book, in which he has translated these Egyptian texts of Domitian's Obelisk into Italian (cf. E.M. CIAMPINI 2004).

**When I discussed my above-posed three questions (*i.e.*, 1.); 2.); 3.)) with Ciampini on 11th May 2018 in Rome, he was of the opinion that Maxentius, being after all the emperor, could anyway act in this respect as he wished, even provided the cult at the Iseum Campense was still performed at that stage.**

**Also Hugo Brandenburg and Angelika Geyer, with whom I had the chance to discuss these questions on 13th May 2018 in Rome, were likewise of the opinion that Maxentius, who reigned from 306-312, did remove Domitian's obelisk to his Villa on the Via Appia. A fact, which, in Brandenburg's and Geyer's opinion does not preclude the assumption that originally this obelisk may have belonged to the Iseum Campense; cf. *supra*, in Chapter Introductory remarks and acknowledgements.**

Concerning the fact that Maxentius had moved Domitian's obelisk to the *spina* of his *Circus* at his *Villa* on the Via Appia, we have *a*) the reports since the 15<sup>th</sup> century, that the obelisk was found there, and *b*) the actual proof of this tradition, since fragments of the *pyramidion* of this obelisk have been excavated on the *spina* of this *Circus* in 1960; cf. Pisani Sartorio (2006, 58, quoted *verbatim supra*, in Chapter IV.1.1.a)).

Cf. Ciampini (2004, 157): "**Osservazioni:** All'inizio del IV sec.[olo] l'obelisco venne rimosso dalla sua collocazione originaria per essere eretto nella Villa di Massenzio sull'Appia Antica; dove andò a decorare la spina del circo; da qui fu poi spostato nella sua attuale collocazione sulla fontana dei Quattro Fiumi per volontà del pontefice Innocenzo X (1648). Il monumento è attualmente privo della parte superiore del *pyramidion*, un suo frammento è conservato nel Museo Gregoriano Egizio. I testi furono redatti e incisi a Roma e costituiscono una notevole testimonianza dell'adozione, da parte di Domiziano, di culti egiziani" (the emphasis is that of the author).

Of a very different opinion was J.-C. Grenier (1996, 357): "Nos sources ne mentionnent pas cet obélisque. Sa localisation première est problématique. **La tradition historiographique le situe dans l'espace séparant l'Iseum Campense du Sérapeum en le reconnaissant sur la FUR [*i.e.*, the *Forma Urbis Romae*, meaning the Severan Marble Plan] (recomposition [V.] Lundström [1929]; cf. [G] Gatti [1943-44], 121) dans le petit carré gravé au-dessus du deuxième A de SERAPAEV[M]. Cette opinion se heurte à plusieurs objections. L'ensemble voué par Domitien sur le Quirinal à la sacralisation de sa propre naissance et de sa famille (la *domus* et le *templum gentis Flaviae* ...) conviendrait mieux à la nature de cet obélisque telle que la révèlent ses inscriptions; cela permettrait aussi de justifier le choix de Maxence qui fit transporter et ériger cet obélisque dans sa *villa* de la *via Appia* dont l'ensemble flavien du Quirinal semble constituer un lointain mais évident archétype idéologique (Grenier à paraître [*i.e.*, here J.-C. GRENIER 1999]) [my emphasis]"**

To the *Templum Gentis Flaviae* I will come back below (cf. *infra*, at Chapters IV.1.1.h); and V.1.i.3.a)).

Guglielmo Gatti (1943-1944, tav. 4 = here Fig. 78) has reconstructed the ancient topography of the central Campus Martius by integrating the relevant fragments of the Severan Marble Plan into the then current paper cadastre. On his relevant map appears the ground-plan of the *Iseum* and the *Serapeum* to the south of it (cf. here Fig. 78); between those two sanctuaries, the Severan Marble Plan shows a piazza. As Grenier (1996, 357) writes in the above-quoted passage, it has been observed that on the Severan Marble Plan is marked a small square on this piazza, which has tentatively been identified by many scholars as the socle of Domitian's obelisk.

**Fig. 78. G. Gatti, reconstruction of the Central Campus Martius, based on the fragments of the Severan Marble plan, with the *Iseum* and the *Serapeum* and the piazza in between them. G. Gatti (1943-1944, 121, tav. 4; after: *LTUR* III [1996] Fig. 69). Note that on Gatti's plan the sanctuary is labelled: ISEVM ET SERAPEVM, whereas on the Severan Marble Plan, the sanctuary is labelled: SERAPAEVM (cf. *LTUR* I [1993] Fig. 122a).**

For Guglielmo Gatti's reconstruction of the central *Campus Martius*, comprising the *Iseum* and of the *Serapeum* and the piazza in between them; cf. Gatti (1943-1944, 121, Fig. 12, tav. 4 = here Fig. 78). The correctness of Gatti's entire reconstruction of the central *Campus Martius* has been challenged by Alessandra Ten (2015), whereas I myself have confirmed Gatti's reconstruction; cf. Häuber (2017, 133-134, 141-144, 203-218); this was followed by Alexander Heinemann (2018, 221 with n. 31). So now also Francesca De Caprariis ("VRBS e pianta marmorea; trenta anni dopo", 2022).

For a detailed discussion; cf. *infra*, in volume 3-2, in *A Study on the Consequences of Domitian's assassination; Introduction*; at Section X. *Further new research on the Precinct of Diva Matidia: C. Parisi Presicce's (2021) identification of my Temple of Diva Sabina? with a Temple of Diva Plotina. With related research and with The Contribution by John Bodel: The Label Inscribed on Fragment 36b of the Severan Marble Plan.*

**Gatti's reconstruction (here Fig. 78) shows that on the Severan Marble plan there is marked a small square on the piazza between his *Iseum* and his *Serapeum*, which also in my opinion represents the socle of Domitian' obelisk. This assumption has been rejected by Grenier (1996, 357, quoted above, and in *id.* 2009, 238, quoted *verbatim supra*, in Chapter IV.1.1.a)), and most recently by Filippo Coarelli (2019b, 74 with n. 55):**

**"Al centro dell'area [*i.e.*, on the piazza of the Iseum Campense] sono indicate due piccole costruzioni, di pianta rispettivamente circolare e quadrata: nella prima si è identificata una fontana (in cui poteva essere collocata la grande pigna bronzea vaticana, che proviene da questa zona); nella seconda la base di un obelisco, correntemente identificato (ma certamente a torto) con quello Panfilio di Piazza Navona [with n. 55; my emphasis]".**

In his note 55, Coarelli writes: "Iversen 1968, pp. 78-80. Alcuni autori accettano ancora questa identificazione, ormai definitivamente confutata da J.-C. Grenier (Grenier 1996). È importante anche segnalare a questo proposito che nel breviarium dei Cataloghi regionari (Nordh 1949, pp. 57 s.), dove sono segnalati tutti gli obelischi maggiori (5 nella Notitia, 6 nel Curiosum, evidentemente redatto dopo il 354, data della sistemazione nel Circo Massimo dell'obelisco lateranense [cf. here Fig. 101]) non ne è menzionato nessuno nell'Iseo campense [my emphasis]". - This is also quoted *infra*, in volume 3-2, in *Appendix VI.*; at Section VII.

Because the Emperor Maxentius reigned from AD 306-312, and we know that he had ordered the transportation of Domitian's obelisk to his *Villa* on the Via Appia, where it was erected in his lifetime on the *spina* of his *Circus* (cf. *supra*, at Chapter IV.1.1.a)), it is quite understandable that 'no obelisk is mentioned in this list for the Iseum Campense, which was compiled after AD 354', as Coarelli observes. - Besides, as I hope to demonstrate in this Chapter IV., contrary to what Coarelli (*op.cit.*) asserts, Domitian had certainly commissioned his obelisk (cf. here Fig. 28) for the Iseum Campense.

Cf. R.P. Davis: "Maxentius (*RE* 1), Marcus Aurelius Valerius (b.[orn] c.[irca] AD 283), son of Maximian ... Constantine ... (312) ... marched on Rome and defeated Maxentius's forces ... at Saxa Rubra; Maxentius was drowned near the Mulvian bridge ...", in: *OCD*<sup>3</sup> (1996) 940. Cf. Häuber (2017, 161).

For the history of the Obeliscus Lateranense (cf. here **Fig. 101**) in Roman times; cf. Häuber (2017, 113 with n. 64, pp. 162, 424, n. 214, pp. 427-428 [on p. 427 is stated that the Lateran Obelisk was brought by Constantius II 'before AD 357 to Rome'; cf. p. 162, quoted *verbatim infra*, in volume 3-2, in *Appendix VI.*; at Section VII.], **Fig. 101**). As we have seen above, Filippo Coarelli (2019b, 74 with n. 55) writes that the Lateran Obelisk was erected in the *Circus Maximus* in AD 354.

As already mentioned, others suggest that the Lateran Obelisk (cf. here **Fig. 101**) was erected in the *Circus Maximus* in AD 357 instead.

Cf. *infra*, at *A Study on the colossal portrait of Hadrian (now Constantine the Great) in the courtyard of the Palazzo dei Conservatori at Rome (cf. here Fig. 11)*. With The Contribution by Hans Rupprecht Goette; at Part II. *Ancient Rome's new commercial river part, at La Marmorata. With discussions of the 'Porticus Aemilia' (in reality identifiable as Navalìa) and of the Horrea Aemilia. With The sixth Contribution by Peter Herz : Rom. Strukturen der Versorgung; and with The second Contribution by Franz Xaver Schütz : Wie schwer war der ägyptische Obelisk, der heute auf der Piazza S. Giovanni in Laterano in Rom steht?*

I have intentionally not drawn this incised small square, which the Severan Marble Plan marks on the piazza in the Iseum Campense, in my own maps (cf. here **Figs. 59; 60**), given the fact that we integrate into our maps only features, whose nature, location, and dimensions are precisely known, information, which in the case of this cartographic detail is unfortunately lacking.

In the course of the discussion with Ciampini on 11th May 2018, and by looking at my map of the Iseum Campense (cf. here **Fig. 60**), I mentioned to Ciampini also the 'new' ancient road, that I could integrate into my maps of the area.

Cf. Häuber (2017, 144-145, Chapter: 'A "new" ancient road, the "Via Petrarca"/ Clivus Salutis?, the Sepulcrum of the Sepronii, the villa or horti of Scipio Africanus maior on the Collis Latiaris, and the consular auspices taken there, which preceded the elections at the Saepia'. See also here **Fig. 60**, labels: ISEUM; SERAPEUM; Arco di Camilliano; "VIA PETRARCA"/ CLIVUS SALUTIS ?).

Already Ferdinando Castagnoli (1985, 319 n. 22) and Carla Alfano (1992, 11 with ns. 3, 4) had discussed this road, but it had not been mapped so far, although great parts of it have been excavated. It was described by Petrarca (20.7.1304-18.7.1374), which is why I have called it "Via Petrarca" on my maps. This road, as the poet tells us, led from the Quirinal to the Tiber, passing through the Arco di Camilliano to the east of the Iseum Campense, as Petrarca explicitly wrote, and therefore certainly between the areas of the former ancient temples of Isis and Serapis. Alfano (*op.cit.*) has therefore convincingly suggested that this road was older than both temples and that its existence was the reason why these two 'halves' of the same sanctuary are divided by this piazza. If so, it follows, that this piazza was a public square. - To the Arco di Camilliano I will come back below (cf. *infra*, at Chapter IV.1.1.g)).

Alfano (1992, 11 with ns. 3, 4) does not discuss the hypothesis of Anne Roulet (1972, 27, Fig. 352), which I find equally convincing. According to Roulet (*op.cit.*), the two 'halves' of the Iseum Campense - Iseum in the north and Serapeum in the south - may not be explained by the pre-existing "Via Petrarca", as I assume here, following Alfano. Roulet (1972, 27) rather argues that the architects of the Iseum Campense followed a typology that was typical of such sanctuaries; she observes for example that the sanctuary at Memphis has a similar hemicycle (as the Serapeum at the Iseum Campense), and that the Serapeum C at Delos has such a "central courtyard"; cf. Roulet (1972, 25 with n. 7, Fig. 350, p. 27). Roulet's relevant observations have been followed by Coarelli (2019b, 76 with n. 58, Fig. 16).

**Chapter IV.1.1.d) E.M. Ciampini (2005) has observed that the contents of the hieroglyphic inscriptions and of the representations on the pyramidion of Domitian's obelisk (cf. here Fig. 28) are closely related to the structures called *mammisis* in Egypt. The (new) king of Egypt was legitimized by the 'royal rituals', which were performed there and elsewhere. With the article of Emanuele M. Ciampini (2005) and with The first Contribution by E.M. Ciampini**

Given the fact that the hieroglyphic inscriptions of Domitian's obelisk (cf. *supra*, at Chapter IV.1.1.a)) mention, as we have seen above, *a*) the goddess Isis and her close relationship with Domitian, and *b*) the birth of the divine child Domitian and his coronation as pharaoh, I asked Emanuele Ciampini, whether or not that could be compared with the famous rituals connected with buildings called *mammisis* ('birthhouses of the king') in Egypt.

The only publication on ">>the house of birth<< (*mammisi*)" (so J.-C. GOYON 1988, 33), known to me, that made me ask Ciampini this question, is that by Jean-Claude Goyon (1988, 32-37) which will be quoted below (cf. *infra*, at Chapter IV.1.1.e)).

"Certo", Ciampini replied, adding to this that he himself had made this observation long ago, and that he has also published it (cf. E.M. CIAMPINI 2005), namely that the scenes on the *pyramidion* of Domitian's Obelisk, as well as sections of its hieroglyphic texts contain contents that clearly relate to the ceremonies performed at *mammisis* and elsewhere (*i.e.*, the 'royal rituals') and thus to the legitimation of the (new) king. After our discussion, Ciampini sent me this article, which I publish here with his kind consent.

**Emanuele M. Ciampini (2005, 399-402, in his article "The Pamphili Obelisk: Two Notes on Pharaonic Elements in Domitian Ideology") writes :**

"Religious elements are clear evidence of relations between Rome and Egypt; in the first century B. C., the Iseum Campense became the greatest temple dedicated to Isis outside the land of the Nile, decorated with statues and material brought from ancient towns such as Heliopolis and Sais. In addition to genuine Egyptian materials, we find also a monument like the obelisk Pamphili or Pamphilus [with n. 1], whose texts have been composed in Rome from Egyptians who were still able to express the forms of pharaonic semantic [with n. 2].

#### **Divine mothers of Domitian**

Like pharaonic ones, the Pamphili Obelisk celebrates Domitian as the legitimate pharaoh, son of deities to whom the monument was dedicated. The inscriptions show the Emperor as son of the solar deities, such as Rê-Harakhti, while a female role is played by goddesses like Isis, Hathor, Wadjet, Mut, and Nekhbet. The same we find on the pyramidion [with n. 3], the power and the divine nature of the pharaoh as child-god was embodied in it, showing in this way the deep relation between Roman and Ptolemaic ideology.

The role of the goddesses is pointed out by an inscription which states: "The two Ladies (Uadjet and Nekhbet, patronesses of Lower and Upper Egypt) give their breast to his (Domitian's) mouth, the two Nurses are on his bands, and the Hathors play the tambourine around him. It is given to him the great duty (the kingship) that the Lady of mankind (Hathor) has created, while her ureus is on her head [with n. 4]. Here are stressed some key-figures for kingship: at first Isis as actress in the myth of Osiris, whose death is a topic in the growth of royal models and for the unity of the country, as shown by Graeco-Roman tradition in which the relics of the god are buried in the 42 Egyptian districts [with n. 5]; then her role can be related with the transmission of father's power to his son Horus. In the text it can be noted that a group of goddesses are related to the legitimation of the king: Hathor, Mut and above all Nekhbet and Uadjet are expression[s] of kingship which is the focus of *mammisis*, the structure where, since the Late Period, the king [was] born as a son of the divine couple, or as the son of the great goddess.

This role of some goddesses as mothers of the king is a late theology elaboration, whose growth can be dated to the Ptolemaic period, even if its origin is surely earlier (see below); some texts of *mammisis* show such a situation, the structure of the birth in Dendera, where the dynastic deities Nekhbet and Uadjet are at

both sides of Isis nursing the king. Here the divine mother [*i.e.*, Isis] says: "I suckle my baby, in order that he would vindicate his father; I nourish him as king, son of the king of Lower and Upper Egypt" [with n. 6]; Uadjet answers to her, [page 400] "I am the beautiful nurse of the fair baby, the nurse of the august child; I am behind you (Isis), embracing your body", while Nekhbet states, "I am the beautiful nurse who suckles her son without being tired, day and night" [with n. 7].

This scene is flanked by the solar god, Rê-Harakhti who gives a palm-branch to the child suckled by Hathor, saying, "I establish to you (Hathor?) endless jubilees, for hundreds of thousands of cycle of solar disc", and Hathor answers, "Oh Rê-Harakhti, I have nursed your heir as beautiful child, I renew him as your majesty" [with n. 8].

**Here we find the same actors of the Domitian[ic] text, and we have to note the figure of Rê-Harakhti who plays a central role in the legitimation of the Emperor.**

Graeco-Roman tradition about divine mothers can be traced back to the New Kingdom, when the mature state was able to create a complex model of legitimization. **During the Eighteenth Dynasty a mythological elaboration was composed about the Divine Birth of the Pharaoh:** in the funerary temple of queen Hatshepsut at Deir el-Bahari (west Thebes) and in the temple of Luqсор, dated to Amenhotep III, scenes and texts describe the divine origin of the king who is son of the Theban god Amon-Rê, lord of the Karnak temple and chief of the gods.

**This myth is an elaboration of Theban theologians who created a narration in which, through different episodes (Amon-Rê decides to have a son, his incarnation as human father of [the] king, conception and birth of pharaoh), the ideology stresses the legitimization of the living ruler.** With Amon-Rê, many gods act in the choral narration elaborated by the Theban clergy; among them we note **the couple Uadjet and Nekhbet, dynastic patronesses and mothers of the king who confirm his power by means of milk: with it they suckle the young king, giving to him the divine nature of ruler;** at the same time their milk is a topic in the resurrection of the dead pharaoh since the Pyramids Texts (third millenium B.C.) [with n. 9]. Thus suckling is an expression of the royalty of the triumphant king [with n. 10].

**In the Amenhotep III version of the Divine Birth (Luqсор temple) the king is nursed by two cows that say: "We nourish you as king of Upper and Lower Egypt, you being alive and your heart happy on the throne of Horus; may you conduct the livings and rule over the two lands in triumph, like Rê for ever"** [with note 11]. **In the southern rooms of the same temple, Amenhotep III is followed by two goddesses, the first is Mut, while the name of the second, now destroyed, can be reconstructed by a fragmentary epithet as Wadjet** [with n. 12]; according to the text, they give to him access in the temple of father Amon and endless years. **Thus, it is confirmed the divine nature of kingship, related with the deities who symbolize here the two halves of the country.**

The "ka" called Flavii

**Kingship's legitimization is a topic in the Pamphili Obelisk, becoming part of the propaganda relating to the predestination of the Emperor. This aspect, whose echo seems [to be] recognizable in the coronation ritual just exposed, is joint with patterns of an ancient royal tradition; in it the power of the king comes from the divine father and from that element which embodies the abstract concept of kingship. The texts call this personification "royal ka", [the] expression of pharaoh's legitimization since his birth.** This doctrine can be traced back at least to the XVIII [th] dynasty, when Theban kings stressed the relationship with their father Amon-Rê, as shown in the Divine Birth [*i.e.*, the *mammisi*] just noted. This conception is the core of the decoration of [the] Luqсор temple, which can be considered a kingship's shrine. The renewal and legitimization of royal power was described in the decoration of the temple dated to Amenhotep III; during the ritual the union of the king with his "royal ka" who ties the living ruler with his ancestors; in them the Egyptian tradition saw the royal past of the present king, as shown in the funerary ritual performed [page 401] in honour of ancient pharaohs. **Past and present of kingship are identified with Osiris, which is the dead king, and Rê-Harakhti, the solar deity as expression of living power grown up by ancestors. With the accession to the throne, the human pharaoh becomes the temporary incarnation of an eternal concept; owning the "royal ka", he is legitimated as king of Lower and Upper Egypt, son of the Creator god** [with n. 13].

Echoes of these conceptions seem to be heard on the monument of Domitian [*i.e.*, Domitian's Obelisk], on which we read: "he has raised up this obelisk in true granit [!] for his father Rê-Harakhti, so that mankind can see the monument made, and the names of kings of Lower and Upper Egypt who were on the throne of Horus could be established, and the world could be healthy at the time of that dynasty whose name is Flavi" [with n. 14], while another text evidences the relations of Domitian with his ancestors: "he takes the kingship from his father Vespasian the god and from his brother Titus the god" [with n. 15]. Both sentences tie the living ruler with the ancient kings of Lower and Upper Egypt, and with the father and brother who had taken the imperial power before him; in this doctrine the sun god Rê-Harakhti plays the role of the kingship's source, the same we have just noted in one scene of the mammisis in Dendera (see above).

All these elements are grouped on an obelisk, that is a monument which since the third millenium B.C. celebrates the bond of pharaoh with the solar god; thus the obelisk confirms the power of Domitian as pharaoh and ruler of the whole Empire. In the first century propaganda, Egyptian patterns can be used in imperial ideology, becoming part of a wider program in which old elements are transformed according to the necessities of specific forms of kingship.

Such a situation makes the Egyptianizing tendencies of the Emperor a coherent expression of pharaonic ideology in the inscriptions of the obelisk: Domitian uses a classical phraseology with some lexicographical nuances, which stress this attitude, such as the pharaonic titulary. Indeed, he [*i.e.*, Domitian] is one of the few Roman emperors to have the complete series of five names; but it is striking that his whole pharaonic titulary is attested only on Italian obelisks (Rome and Benevent) [with n. 16].

One of the texts just noted makes a clear connection among monuments, ancient kings of Lower and Upper Egypt, and the Flavii dynasty; thus the obelisk is conceived as something which renders the names of the Emperor everlasting, creating a strong connection between past and present, which is the pharaonic model of divine rule and the Domitian[ic] power which is extended over the world. Also noteworthy is the particular use of the word "ka", which has been noted to play a central role in the royal doctrine; according to the late use of the Egyptian language, it can be considered a synonym for "name" [with n. 17], and the text of Domitian shows clearly its correspondence with "gens", a concept in which the relation of a single with his family group is expressed.

This particular use of the word covers two different semantic fields: on the one hand it is related to the family's name, and more generally, with the ancestors of the living ruler; on the other hand, it can denote the same family, that is the "gens", in which it may be reflected the Egyptian concept of kingship. The mention of Vespasian and Titus in the last text [*i.e.*, on the fourth side of Domitian's obelisk] may offer an element of Roman interpretation of the Egyptian royalty; the origin of Domitian's power, according to this inscription, is the kingship of the imperial ancestors who were the owners of a divine authority before him. The superhuman nature of the Emperor is stressed by the epithet "the god" which follows the names of Vespasian and Titus; the divine kingship, embodied by the living pharaoh, makes him after the death a form of solar god [with n. 18].

The legitimization in Domitian's inscriptions uses an imperial interpretation of pharaonic elements; we have just seen the use of the term "ka" which expresses the core of the divine kingship, but the same can be said for another Egyptian pattern. In the royal funerary belief of the New Kingdom the ka of the father is shown introducing the dead king to the deities: in the tomb of Amenhotep III (valley of the kings, Thebes west) the "royal ka" of the king's father Thutmosis IV is depicted with the son, greeted by the sky-goddess Nut [with n. 19] [page 402]; in this situation we find the elements noted in the ideology of Domitian, that is the ruler and the ancestor who gives him the power and the legitimization as heir [with n. 20].

The attitude of Domitian toward Egyptian traditions may reflect the diffusion of Isiac cult in the Empire; at the same time, his legitimization uses phraseology partially coherent with ancient forms, as shown by the central role of Isis and other divine mothers [with n. 21]. The use of Egyptian models could be related with the growth of a pharaonic titulary of the Roman rulers, as shown since Augustus, when the royal Egyptian names used to be considered a way to express the role of the Emperor as manifestation of the supreme power (see the use of Autokrator in the so-called coronation name) [with n. 22]. The divine nature of the Emperor is celebrated in the Egyptian temples where he is an image of the gods [with n. 23];

**however, we have to note that the imperial ideology in Egypt has particular forms;** evidence of this can be recognized in the chapel of the imperial insignia installed in the Luqsor temple, the same which we have just seen as kingship shrine of the New Kingdom [with n. 24]. **In the roman interpretation which stresses the divine nature of the ruler, we note the ideological elaboration of Domitian: in using ancient forms of legitimization, the Emperor chose to raise up a single obelisk, celebrating in this way his divine nature according to pharaonic patterns** [with n. 25; my emphasis]".

In his **notes**, Ciampini writes:

Emanuele Ciampini

Università Cà Foscari, Dipartimento di Scienze dell'Antichità e del Vicino Oriente,  
Sezione di Archeologia, Palazzo Bernardo, S. Polo 1977, I-30125 - Venezia.

**To the following passage of Ciampini's (2005, 400) above-quoted text, I should like to add a comment :**

**"The "ka" called Flavii**

Kingship's legitimization is a topic in the Pamphili Obelisk, becoming part of the propaganda relating to the predestination of the Emperor. This aspect, whose echo seems [to be] recognizable in the coronation ritual just exposed ...".

Since I had not understood, why the text immediately preceding this section could possibly refer to a "coronation ritual", I asked Ciampini for advice. He kindly explained to me that in the just-quoted passage, he referred back to the paragraphs before, in which the goddesses are suckling the king: *this* is the allusion to the coronation ritual.

The relevant passages in Ciampini (2005, 400 with ns. 9, 11) read: "During the Eighteenth Dynasty a mythological elaboration was composed about the Divine Birth of the Pharaoh ... This myth is an elaboration of Theban theologians who created a narration in which ... (Amon-Rê decides to have a son, his incarnation as human father of [the] king, conception and birth of pharaoh), the ideology stresses the legitimization of the living ruler. With Amon-Rê, many gods act in the choral narration elaborated by the Theban clergy; among them we note the couple Uadjet and Nekhbet, dynastic patronesses and mothers of the king who confirm his power by means of milk: with it they suckle the young king, giving to him the divine nature of ruler ... In the Amenhotep III version of the Divine Birth (Luqsor temple) the king is nursed by two cows that say, "We nourish you as king of Upper and Lower Egypt, you being alive and your heart happy on the throne of Horus; may you conduct the livings and rule over the two lands in triumph, like Rê for ever".

**Only after having written this Chapter, did I find that also the Egyptologist Giuseppina Capriotti Vittozzi (2013, 101, in her Chapter: "Aspetti egizi dell'immagine imperiale") has addressed this specific feature in the hieroglyphic texts of Domitian's obelisk (cf. here Fig. 28) :**

"Particolare interesse riveste un frammento, oggi al Museo Archeologico Nazionale di Firenze [with n. 3], ritrovato nell'area dell'Iseo Campense, raffigurante il sovrano allattato dalla vacca divina (fig. 47): questa immagine, tradizionale in Egitto, introdusse a Roma un aspetto peculiare della regalità divina faraonica, riecheggiando rituali tipici dell'incoronazione, come appunto l'allattamento da parte della dea a segnare la

nascita del sovrano alla nuova vita regale: questo tema trova corrispondenza nell'obelisco di Domiziano [with n. 4] (fig. 48) ".

In her **note 3**, Capriotti Vittozzi writes: "Inv. 5419. Lembke 1994a [*i.e.*, here K. LEMBKE 1994b], 227-228 [Kat. E "18. Hathorhuh mit säugendem Haremhab (Taf. 36) ... Datierung: Neues Reich, 18. Dynastie, Haremhab (1333-1306 v. Chr.)]".

In her **note 4**, she writes: "Cap. 15.3".

**Capriotti Vittozzi** (2013, 162 in her Chapter: "15.3. L'obelisco di Domiziano") writes:

"Inoltre, come sottolineato da E.M. Ciampini [with n. 24], l'identità faraonica di Domiziano è espressa attraverso le scene del *pyramidion*, dove si definisce la sua nascita divina, grazie alla presenza di divinità femminili, mentre il testo parla dell'allattamento divino, un passaggio ben conosciuto nei riti di incoronazione [with n. 25]".

In her **note 24**, Capriotti Vittozzi writes: Ciampini 2005".

In her **note 25**, she writes: Leclant 1959 e Leclant 1960".

**Capriotti Vittozzi** (2013, 127, in her Chapter: "I luoghi `egizi' di Roma") writes:

"Altre interessanti considerazioni riguardano il ruolo di Iside nell'obelisco di Domiziano, la quale appare come elargitrice di regalità e, in tal senso, in relazione con Ptah [with n. 11]: ciò lascia intravedere una precisa citazione dell'ambiente menfita, che peraltro era l'antica capitale dove avveniva tradizionalmente l'incoronazione".

In her **note 11**, Capriotti Vittozzi writes: "Ciampini 2004, 165".

Capriotti Vittozzi (2013) discusses Domitian's obelisk also on pp. 41, 86, 87, 93-94, 99, 112, 113, 161-162, 167.

**See also Capriotti Vittozzi** (2014, 243-246, with ns. 26-36, Fig. 10.2), **where she *inter alia* summarizes Ciampini's above quoted article of 2005.**

**Capriotti Vittozzi** (2014, 245) writes: "... The divine descent of the Pharaoh [*i.e.*, of Domitian] is identified in connection to (the royal status of) Vespasian and Titus [with n. 26]. In addition, the divine birth of Domitian is expressed by the presence of maternal divinities (including Isis) in both the text and the images of the *pyramidion*. In his turn E. Ciampini has noted the relationships between the role of the goddesses on the obelisk of Domitian and Ptolemaic texts, in particular those from the *mammisi* at Dendera [with n. 27]. The scene of divine breastfeeding, described in the text on the obelisk [with n. 28], is closely associated with royalty, not only in regard to the divine birth, but also in regard to its role in the coronation rites [with n. 29]. The attention paid on the obelisk to the royal status of Domitian and his predecessors, expressed according to tradition but in a rather unusual way, can also be noted in the particular choice to designate the *gens* of the Emperor with the Egyptian term *ka* [with n. 30]".

In her **note 26**, Capriotti Vittozzi writes: "Grenier ... [*i.e.*, here J.-C. GRENIER 1987], 949. The scholar recognises [!] an explicit mention of specific dynastic events".

In her **note 27**, she writes: "Ciampini ... [*i.e.*, here E.M. CIAMPINI 2005] 399-400".

In her **note 28**, she writes: "Grenier ... [*i.e.*, here J.-C. GRENIER 1987], 945, Ciampini ... [*i.e.*, here E.M. CIAMPINI 2004], 167 (H.32)".

In her **note 29**, she writes: "J. Leclant ... [*i.e.*, here J. LECLANT 1951] 123-127; id. ... [*i.e.*, here J. LECLANT 1959], 69-71, Id. ... [*i.e.*, here J. LECLANT 1960] 135-145, Id. ... [*i.e.*, here J. LECLANT 1961] 251-284".

In her **note 30**, she writes: "Grenier ... [*i.e.*, here J.-C. GRENIER 1987], 939, "Ciampini ... [*i.e.*, here E.M. CIAMPINI 2005] 400-402".

In his first *Contribution* to this volume ("*La regalità domiziana: una nota egittologica*"), Ciampini deals in more detail with the subject 'legitimation of the (new) king', which is discussed in three passages of the hieroglyphic texts of Domitian's obelisk that are already mentioned in his above quoted article of 2005.

The 'royal rituals', described by Ciampini (2005), which the priests began in the structures called *mammisis* by the enactment of the birth of the divine child (*i.e.*, the new king), culminated in the coronation of the (new) pharaoh that occurred at the festival of Egyptian New Year. Those rituals were performed every year; in those years, in which not a new pharaoh was crowned, they served the reigning king as "the repeated confirmation of his royal power"; cf. Jean-Claude Goyon (1988, 33; cf. *infra*, at Chapter IV.1.1.e)). And Emanuele M. Ciampini refers to such a ceremony as "rituale di conferma del potere regale alla Festa del Nuovo Anno"; cf. below, at *The first Contribution by Emanuele M. Ciampini : La regalità domiziana: una nota egittologica*.

For the 'royal rituals', cf. also *infra*, at Chapter IV.1.1.e), and *infra*, in volume 3-2, at Appendix II. *Again on the Egyptianizing marble relief allegedly from Ariccia at the Museo Nazionale Romano, Palazzo Altemps (Fig. 111) - a representation of the Egyptian festival of New Year?*

*Chapter IV.1.1.e) J.-C. Goyon (1988) on the 'royal rituals', performed at the structures called mammisis, and P.G.P. Meyboom (2016) on the festivals connected with the Nile flood and on the 'royal rituals' at the festival of New Year*

Fig. 79. Drawings after scenes in structures called *mammisis* ('house of birth') in Egypt. From: J.-C. Goyon (1988, 34-35, Figs. 8-10; drawings).

The caption of his Fig. 8 in J.-C. Goyon (1988, 34) reads: "A scene from the *mammisi* at Philae. Here the divine child is nursed, modeled by the god Khnum, given years of life by the god Thoth, and, at the right, offered a pectoral by Augustus in his role as pharaoh. (Adapted from Champollion 1935: pl. LXXVI, 1)".

The caption of his Fig. 9 in J.-C. Goyon (1988, 35) reads: "The birth of the child-god Harpre ('Horus-the-Son') before Amun-Re, the goddess Nekhbet, and Cleopatra VII. The winged scarab above the child is identified as the King of Upper and Lower Egypt, the solar god Khepri, who appears each morning and is identified with Harpre, the son of Amun. The scene is from the destroyed *mammisi* of Armant. (Adapted from Lepsius 1849-59, pt. IV: pl. 60, a)".

The caption of his Fig. 10 in J.-C. Goyon (1988, 35) reads: "Divine nurses from the destroyed *mammisi* of Armant. (Adapted from Lepsius 1849-59, pt. IV: pl. 59, c)".

The caption of his Fig. 12 in J.-C. Goyon (1988, 37) reads: "Procession from the Temple of Horus at Edfu. The train of priests, led by the pharaoh, carries divine images of the Living Falcon and the falcon-headed Horakhty ("Horus-of-the-Two-Horizons"). (Adapted from Chassinat 1960b: pl. CLIV)".

Jean Claude Goyon (1988, 32-33) writes:

*"Horus-King and the Triumph of the Falcon King*

The adaption of the sacerdotal functions that had already been germinating, as we have just seen, toward the end of the first millennium at Thebes, was to become the rule in Ptolemaic temples. Thus it is that at Edfu, for example, at the time of the great annual ceremonies, where the titular royal person (a Ptolemy whose throne name we know and whose effigy we may have on coins, but who never ventured, so deep into the

south) would traditionally have presided and conducted the holy office, a sacerdotal delegate, often the local high priest, took the place of the sovereign and assumed the rank and function of "Priest of the King". This indicates even more clearly the transformation that had taken place in the theological expression of the royal function, although formal appearances were scrupulously kept up in the temple reliefs. There the only names mentioned or images depicted are those of the ruling king, of divine pedigree, who had been crowned King of Egypt in Memphis. We have seen above that the pharaoh-Horus, embodying the principle of the maintenance of Ma'at, was recognized and universally accepted, whatever his name, not because of who he was but for the sake of the fundamental principle of social harmony. By stressing this idea and making use of the imagery of Horus, a vehicle at once of the divine (son of Osiris) and the royal (pharaoh, "Horus of the Living", Horus of Gold"), the priests of the third century B. C. concentrated in the representation of the Falcon of Horus and its Living Image, the Sacred Falcon, all the properties inherent in the concept of pharaonic royalty; that is, **the intrinsic association described above between Power and the Sacred**. While the Delta was becoming Hellenized, the South was revitalizing the royal elements of the Heliopolitan doctrine in order to give them a liturgical vigor never before attained.

The walls of the Ptolemaic temples of Edfu and Philae have preserved almost completely the reliefs and texts of the great royal liturgies celebrated in honour of the Living Image, the Living Falcon or the "Animal Sacred to Horakhty". The Living Raptor, whom the vital energy of the great solar king Horus animated, was chosen from among all those of his species housed in the aviary of the temple, and during his lifetime was the incarnate Horus and the earthly royal principle. All the solemn liturgies of the annual royal cycle, celebrated on the day forecast by the calendar of festival (based on an ancient Heliopolitan model), associated the living Sacred Falcon with the statue of the god-king in the temple.

**Thus, around the second century B.C., when the construction of the royal temples of the South was practically finished - and in a region completely cut off from the turbulent political world of the distant Ptolemies of Alexandria the ceremonies of the royal cult, the annual highpoints of the exaltation of the monarchic principle, unrolled in their entirety within the walls of the temple, away from impure contact with the profane world. Only the final phase of the great festivities of the cycle of renewal of royal power at the New Year brought to the people the glorious sight of their god-king.**

**The cycle harmonized with the astral year; the rites were integrated with the cosmic rhythms and their symbolism was inspired by those rhythms. Weaving their way to the calendar, the rites celebrated the essential acts and events of the endlessly renewed life of the king of the world. The liturgical dramas devoted to the divine birth of Horus-king, to his coronation, his accession, then to the repeated confirmation of his royal power (assuring the perennial nature of the reign) made up the central episodes of the religious year.** The clergy based their work on the ancient rituals that came from Heliopolis, where they had been codified well before the time of the pyramids and piously preserved in the sacred archives; the clergy then drew up new copies, completed them and brought them to light to form the *ordo* of the ceremonies. **And, under the guidance of the priest of the king, the priesthood carried out, with faith and the greatest possible pomp, the celebration of the rituals [my emphasis]."**

For "the intrinsic association described above between Power and the Sacred", mentioned by Goyon (1988, 33), see his Section: "The Creation of the World and the Royal Function"; cf. Goyon (1988, 29-30; *id.* 1989, 33-34. The English version of his text is quoted *verbatim* in C. HÄUBER 2014a, 733-734 with n. 56).

Immediately after that, Goyon (1988, 33-34) continues:

*"The Royal Rites*

The liturgies of Horus-king (some of whose celebrations are described below) most often began, at Edfu at least, **at the end of the fourth month of that long Egyptian spring, the season of Peret (28 Pharmouthi in the Coptic calendar, or about the end of March). In the >house of birth< (*mammisi*), a special building in the forecourt of the temple, was celebrated the mystery of the divine birth of Horus the heir, legitimate king of the universe, successor to Osiris, the paradigm for all kings.** Since Dynasty XVIII a myth of the miraculous birth of the earthly king had been known. **In this myth, the creator-god Amun magically took the place of the bodily father, the reigning king, in order to impregnate the queen, a mother sanctified by**

**the divine contact, who would bring the royal child into the world when her time was come.** It was this same myth, adapted to fit the legend of Osiris, that was an underlying theme of Ptolemaic times. **The mother is Isis: queen, wife of Osiris, rendered pregnant by him after his temporary resurrection; and the longed-for son is Horus, but a Horus perceived as the symbol of the universal king** (CATS. 100, 101).

[p. 34] It is he whose coming birth is announced by the priestly actors of the liturgy when playing the roles of the divinities involved in the sacred drama; divinities present in the form of their small, portable statues. **While the theogamy and the conception of the god-son (denoted modestly by the image of the potter-god Khnum fashioning the body of the child on his wheel [cf. his Fig. 8 = here Fig. 79]) were recalled in secret, the announcement was solemnly made to Isis that she would bring forth into the world the king of Egypt.** After being brought to childbed, the mother of the savior-god, under the protection of the genies of birth (Bes, Hytyt) and of the Seven Hathors, the good fairies of universal happiness, gave birth to the divine offspring. **The wondrous child, recognized by his father the god, began his life, then, as a royal infant suckled by divine wet nurses** (Figs. 8-10 [= here Fig. 79]).

The entire ritual play was recast with reference to the old myth of the birth of Horus in the papyrus thickets of the Delta, in the secrecy of the swamps of Khemmis near Buto (CAT. 13). Because of this, the focal point of these ceremonies was the presentation, against the backdrop evocative of the Delta marshland, of the effigy of the falcon-god wearing the Crown of Upper and Lower Egypt (Fig. 11). **The symbolism of the scene, moreover, was twofold: if it effectively evoked the presentation to the universe of the newly appeared king, it was also intended to recall the mode of the appearance of the king of the universe at Creation.** The falcon was also the first living incarnation of Re-Horakhty taking possession of the world that his divine Word had just caused to surge forth from the watery chaos. **Once again, Light had been revealed and was guaranteeing life.**

**Birth and the creation of the world, these were the *idée-forces* behind the celebration of the main mystery of the royal plays of the year.** It was then necessary to move on to the acts of the reign. Although we cannot state the precise dates assigned to the festivities, due to the lack of documents, they followed one another in a logical order, **from 28 Pharmouthi to the fateful date of the coronation: the first day of the month of Thot (mid-July).**

When Re himself had announced the coming to the world of the heir by saying "Isis has brought into the world her Horus ...", **the renewed king regained his efficacy, and Ma'at, momentarily menaced, continued to rule the universe** [my emphasis]. - With the latter remark, Goyon (1988, 34) referred to the ceremony in those cases, when the already reigning king was the subject of those 'royal rituals'. Immediately after that, Goyon (1988, 34-37) continues: **"Nevertheless, it was still necessary to confirm the divine decisions about the future of the reign, and to do so at the occasion of the New Year. With the rising of Sothis (Sirius), harbinger of the approach of the Nile flood, the ritualists would prepare for the most important of the ceremonies of the annual *ordo*: the confirmation of Horus' inheritance and the festivals of coronation, coinciding with the New Year (1 Thot, around July 20).** The astrologer-priest having announced the arrival of the new water, the people impatiently waited for [p. 35] the miracle of Egyptian agriculture to renew itself, while from the first hint of dawn on New Year's Day an intense activity animated the temples devoted to Horus throughout the South. The liturgy that was beginning would involve the presence of the two holy symbols of royalty: the divine statue of Horus and his Living Image, the Sacred Raptor (Fig. 12 = here Fig. 79). All the rites, concurrently or consecutively, through the twenty days of the festivities would concern them. Early in the morning of the Egyptian New Year's Day, a procession was organized to bring the actors, adorned and anointed for the festival, to the places of celebration. First it would cross the threshold of the Holy of Holiest; then it traversed the vestibule, the hypostyle, and the pronaos to reach the court. In the greatest [p. 36] purity the procession would make its way to the site of the "Pavilion of Bestowing the Inheritance". There, after the sacrament of anointing and the performance of prophylactic acts against "the dangers of the year", Horus-king and his Living Image would watch each other being presented with the emblems of the confirmation of the inheritance, while the lector-priest and choir chanted the verses of the great hymn "The Adoration of Horus Whose Inheritance Is Confirmed".

When the officiating priest had anointed the image of the royal falcon and the head of the Living Falcon, he pronounced the solumn salutation:

Hail to thee, Horus son of Osiris!

May thou be protected! May thou be protected!

Though art the eldest son of Onnophris,

Adoration to thee, Horus Triumphant! - four times - [with n. 1].

Then the acolytes would proceed to release the first set of messenger birds, who would fly forth to announce to the whole world that the king lived and reigned under the ultimate guarantee of the Creator.

Immediately afterward began the coronation ceremonies. Solemly, a priest playing the role of Thot proclaimed Horus king by intoning the powerful words of the "Royal Decree Spoken by Re-Horakhty", conferring on the son of Osiris the government of the earth. Sometimes Isis and Nephthys (personified by female members of the clergy, as at Philae) took up in turn the essential words of the decree, proclaiming them very loudly so that the world of man on the outside could not be in ignorance of their significance. The people, excluded from the secrecy of these rites, were never ignorant of their meaning and were living through the drama of waiting. Inside the sacred precinct, the divine stolist (priests charged with anointments and with dressing the divine statues) would now bring the Crown, the Red of the North and the White of the South; the scepters and weapons; and would consecrate them for the statue of Horus and for his Living Image who accompanied him. All this time a choir had been chanting the litanies for the protection of the Year, while the sacrament of anointing the statue of Horus was being carried out using a scented chrisem called "the greatest rejoicing" (*hekenu*).

Simultaneously, the Living Falcon was also receiving a similar anointment and was being offered the consecrated jewelry, the scepters, and the solar bouquets of Heliopolis, all symbols of the universal life of which he was to become the guarantor.

"Thy Ma'at is with thee, O Living Image, Living Falcon, and thou art its lord ... [with n. 2]".

When these sacramental words had been pronounced, the principal date of 19 Thot had arrived, a date which had to coincide with the announcement to the world of men of the consummation of the supreme act for the safeguarding of life. Then, from the aviaries of the temple were brought the messenger birds who would carry the message of salvation to the four cardinal points of the universe. After having received the anointment that sanctified their mission, a falcon (embodying a replica of the Living Falcon of the Year), an ibis, a vulture, and finally another falcon (incarnating Horus son of Osiris), successively took wing. Accompanying their departure the liturgical choir chanted once again the verse of the "Decree of Re", giving to Horus dominion over the Egyptian world and its people. This was made necessary by the fact that the *actual* king, guarantor of Ma'at, was, from this instant on, the Living Image, the Sacred Raptor of [p. 37] the Year. It mattered little that, at the appropriate points in the sacramental phrases, the name of the Ptolemy reigning in Alexandria was inserted; it was only pronounced following the evocation of the Sacred Animal of Horakhty. This animal alone played a real role and was, as far as the people of Egypt were concerned, the godking living on earth. And that is why this sacred hawk, in the company of the processional of Horus of Edfu or Philae, would be shown to the people amid a great concourse of joy and of chants invoking grace [cf. his Fig. 12 = here Fig. 79].

In later days at Edfu and Philae (around the first century B.C.), when the pylons had been built, the procession would form in the Court of Festivals to proceed to the Balcony of Appearances of the Falcon. Formerly constructed for the festival in the front area of the temple, it was now simply a balcony built in the passage over the central door between the two wings of the pylon on the south face of the building (Fig. 1), the side that opened to the world of men. The pylon itself was a symbolic representation of the ancient Egyptian conception of the horizon: a cross-section of the two cliffs bordering the Nile on the east and west. At the center of the pylon, the top of the axial gateway formed a special terrace where the divine effigy and its living counterpart could make their appearance. This appearance was the equivalent of showing the sun inscribing its course over the land of Egypt and of confirming to the assembled through the renewal of this priceless gift of the light of life. Such a transmission, through such a liturgy, proved beyond a doubt to even the least aware peasants of Upper Egypt gathered for the festival that their world could endure, that it was constantly being protected and recreated because, as had happened since the

**very beginning of their memories, the king and the god (closely united in the veneration of Egypt), were working together to give Egypt life [my emphasis]"**.

In his **note 1**, Goyon wrote: "Brooklyn Papyrus 47.218.50, XVI, 4-5".

In his **note 2**, he wrote: "Alliot 1954, vol. 2: 661".

At the end of his article, Goyon (1988, 39) provided a:

#### **Let's now return to the discussion of Domitian's obelisk (cf. here Fig. 28).**

Now, since the hieroglyphic texts of Domitian's obelisk, refer to Domitian's birth as the divine child and to his coronation as pharaoh (cf. K. LEMBKE 1994b, 41, quoted *verbatim supra*, in Chapter IV.1.1.c); J.-C. GRENIER 2009, 238, quoted *verbatim supra*, in Chapter IV.1.1.a); E.M. CIAMPINI 2005, 399-402, quoted *verbatim supra*, in Chapter IV.1.1.d)), it is indeed obvious that Domitian and his Egyptian consultants thus hinted at the rituals performed at the structures called *mammisis* in Egypt, where the birth of the king of Egypt by his divine mother, the goddess Isis, was enacted by priests. The hieroglyphic texts of Domitian's obelisk refer also to the other 'royal rites', described by Goyon (1988, 33-34) in the passages quoted above, which culminated in the coronation ceremony of the pharaoh that occurred on the festival of Egyptian New Year. The latter ceremonies are also discussed by Paul G.P. Meyboom, whose relevant observations are quoted in the following Chapter, as well as *infra*, in volume 3-2, at *Appendix. II. Again on the Egyptianizing marble relief allegedly from Ariccia at the Museo Nazionale Romano, Palazzo Altemps - a representation of the Egyptian festival of New Year?*

#### ***P.G.P. Meyboom (2016) on the festivals connected with the Nile flood and on the 'royal rituals' at the festival of New Year***

Paul G.P. Meyboom (2016, 57-58) writes about a ritual, with which the beginning of the Nile flood was celebrated, as follows: "Some other interesting examples of a chest being carried in a procession may be found in the Graeco-Roman period. Plutarch, *De Iside et Osiride*, 39, describes a procession in which a chest

plays an important part; 'On the night of the nineteenth day (of the month Athyr) they go down to the sea and the stolists and priests take out the sacred box, which has a golden casket inside it. Into this they pour some drinking water which they have brought with them, and the people present shout: "Osiris has been found!"'

**The meaning of this rite was that the finding of fresh water indicated that the Nile flood, which was considered to be the [page 58] efflux of Osiris' body, had begun [with n. 94, providing references] ...**

**Osiris, a mythical Pharaoh, was killed by his brother Seth. Isis, his wife, searches in mourning for his remains. This stage of the myth represents the period in which the Nile has become dry, Egypt is suffering from the summer heat and drought, and the vegetation is dead. Isis finds Osiris' remains floating in the water. This symbolises the arrival of the new Nile water in June. Isis has Osiris's limbs attended to, embalmed and mummified (see fig. 81). In the course of this procedure she unites herself with him and from their union Horus, the new Pharaoh, will be born.** In the Graeco-Roman period the union of Isis and Osiris symbolises the fertilisation of the land of Egypt by the water of the Nile during August and September, as is explained in a famous passage by Plutarch *De Iside et Osiride*, 38: ... Just as they view the Nile as the efflux of Osiris, thus they hold the earth to be the body of Isis, not the whole earth, but as much as the Nile goes over, fructifying it and uniting with it; and from this union they assume Horus to be procreated.

The mummification of Osiris effects his resurrection and his mummy is placed in a funerary chapel where he becomes king of the realm of the dead. **This symbolises the revival of the vegetation in November and December, as a result of the inundation [with n. 96, providing references; my emphasis]".**

Concerning one detail of the above-mentioned rituals, Giuseppina Capriotti Vittozzi (2013, 56, in her Chapter: "II: Iside e la su cerchia; 2.2.4. Il Nilo") writes: "Nel mito, il cofano contenente il corpo di Osiride, era stato gettato nel fiume [*i.e.*, the Nile] e questo stesso venne riconosciuto come derivante dagli umori cadaverici del dio".

Cf. Meyboom (2016, 68): "Because of the relationship between Isis and Osiris with the inundation, the Pharaohs, who were representatives of the gods, traditionally played an important role in the ceremonies connected with the inundation. This role was taken over by the Ptolemies and their queens [with n. 155]. Their presence at these ceremonies is well attested. In a relief at Dendera they are taking part in the procession of the feast on the first day of the germination season which immediately follows the Khoiak festival (see fig. 93) [with n. 156]. The Ptolemaic king and queen became equated with Osiris and Isis by their Egyptian subjects and with Dionysus and Aphrodite by their Greek subjects. Dionysus was equated by the Greeks in Egypt with Osiris-Sarapis, both being gods of the rebirth of nature [with n. 157]". - In his **notes 155-157**, Meyboom provides references.

Cf. Meyboom (2016, 72-74): "The Khoiak festival, however, was not the only festival connected with the inundation. The course of the flood was marked by several other festivities [with n. 177]. In the first place **the beginning of the flood, which ideally coincided with the rise of Sothis and the beginning of the new year on the 19th of July, was marked by important ceremonies in which the sovereigns (or their representatives) also participated (see figs. 71, 73, 93) [with n. 178]. Another feast took place when the flood had reached a height sufficient to offer the prospect of a successful crop. This height, sixteen cubits,** was indicated on the Nilometers by a mark called the *semeion*, and one of the names given to the feast, **at least in the Roman period, was the Semasia.** Depending on the speed and the volume of the flood, the mark was reached at the end of August at Assuan, and [page 73] ten days later in the Delta. **When the mark was reached the signal was given to cut the dikes which had blocked the irrigation canals and the inundation could spread over the countryside.** This signal was rapidly spread throughout the country, a process which, in the Roman period was symbolically represented by the figure of the Semasia, a young woman on a galloping horse, holding a palm-branch (fig. 94). **The occasion was celebrated with ceremonies and festivities in which the sovereigns again participated [with n. 179]. Everyone had a holiday and all along the Nile, especially near the temples of Isis and Osiris, there were banquets and revels, eating and**

drinking, dancing and boating (see figs. 47, 96). The lotus, which had germinated in the soil when the Nile started to rise, began to blossom. This was the first sign of the rebirth of the vegetation and consequently became a symbol for it [with n. 180] ...

Moreover, besides the feasts for the beginning of the inundation and celebrating the high flood, there was yet another important feast which in the later Ptolemaic period [when the Nile mosaic at Praeneste was created, the main focus of Meyboom's book] fell in the inundation period. The beginning of the new year, the first day of the month of Thot, originally fell on the 19th of July, the day when Sothis rose and ideally the Nile flood began. In the course of more than a thousand years this date had rotated through the [page 74] year and around the middle of the second century B.C. it fell in September. At the time of the calendar reform of Augustus it fell on the 29th of August, and the beginning of the new year remained fixed on that day from then on. The 29th of August happened to be roughly the date when the necessary height of the flood was reached at Assuan and therefore actually coincided with the Semasia ... Thus in the course of time the connection which traditionally existed between the Nile flood and the beginning of the new year was more or less reestablished [with n. 183].

The sovereigns had traditionally played the main part in the ritual connected with the beginning of the new year. Like Horus, the Pharaoh triumphed over Seth, avenging his father Osiris (cf. fig. 93), and succeeded to his throne and sailed triumphantly down the flooded Nile. Because of this mythological and ritual background the feast of the new year was the ideal occasion for coronations and coronation jubilees. The same idea of the triumphant sovereign was associated with the Khoiak festival, at the conclusion of which the Djed pillar was erected, which again symbolised the triumph of Horus and the rebirth of Osiris (see fig. 81, above centre). For this reason the feast of the Djed pillar was even considered to be an alternative beginning for the new year [with n. 184]. In all events we find the Pharaoh closely associated with both the beginning of the new year, the coronation jubilee of the Pharaoh, the inundation and the rebirth of the vegetation [my emphasis]". - In his notes 177-184, Meyboom provides references.

*Chapter IV.1.1.f) What consequences has the fact, that the contents of Domitian's obelisk (cf. here Fig. 28) refer to mammisis, in regard to our question, for which location this obelisk was commissioned?*

In the course of our discussion on 11th May 2018, by looking at the assumed location of Domitian's obelisk on this public square between the Iseum Campense and the Serapeum (cf. here Figs. 60; 78), Emanuele M. Ciampini mentioned to me that in Egypt the structures called *mammisis* are always to be found *outside* the temple - as also stated in the above quoted passage by Jean-Claude Goyon (1988, 33; cf. *supra*, at Chapter IV.1.1.e)), who refers to it as: "a special building in the forecourt of the temple" (a text, which, of course, I had not with me, when Ciampini and I discussed the matter).

Ciampini and I have therefore come on 11th May 2018 to the following conclusions:

a) Already the facts that Isis appears in the scenes on the *pyramidion* of Domitian's obelisk (cf. E.M. CIAMPINI 2004, 159, and here Fig. 28), and that Domitian is explicitly called "amato di Iside" in the hieroglyphic texts of the Obeliscus Pamphilius (cf. J.-C. GRENIER 2009, 238; E.M. CIAMPINI 2004, 165, H 30), is enough to attribute this obelisk rather to the Iseum Campense than to the *Templum Gentis Flaviae* - in the iconography of which Isis is conspicuously absent;

b) The scenes on the *pyramidion* and one section in the hieroglyphic texts of Domitian's obelisk (cf. here Fig. 28) refer to the rituals performed at the structures called *mammisis* in Egypt, in which, among other ceremonies, the birth of the divine child, the future king of Egypt by his divine mother Isis was enacted; these rituals culminated in the coronation of the new pharaoh at the festival of New Year. On the *pyramidion* of Domitian's obelisk his coronation as pharaoh is actually represented, apart from the fact that it is described in the hieroglyphic texts of this obelisk. This additional information, which the scenes and the hieroglyphic inscriptions on Domitian's obelisk contain, may be regarded as another support of this idea.

Our conclusions thus support the idea of identifying the small square, which is marked on the Severan marble plan on the piazza between the *Iseum* and the *Serapeum* (cf. here **Fig. 78**), as a representation of the socle of Domitian's Obelisk at its original position.

As mentioned above, many previous scholars had assumed that Domitian's obelisk was commissioned for the Iseum Campense, and precisely for the just mentioned location (cf. here **Fig. 78**). Also several contributors to the Proceedings of the Iseum Campense Conference at Rome in May 2016 are of this opinion (quoted *verbatim supra*, in Chapter IV.1.), and, most recently, Eric M. Moormann (2021, 46 with n. 18), Miguel John Versluys (2021, 170-171, Fig. 3), Olaf E. Kaper (2021, 183 with n. 13), and Nathalie de Haan and Eric M. Moormann (2021, 86, with Figs. on pp. 83, 86).

So also Emanuele Ciampini (cf. E.M. CIAMPINI 2004, 157): "**Provenienza**: area compresa tra l'Iseo e il Serapeo di Campo Marzio [the emphasis is that of the author]"; and below, at *The first Contribution by Emanuele M. Ciampini : La regalità domiziana: una nota egittologica*. - To this I will come back below, in Chapter IV.1.1.h).

**Chapter IV.1.1.g) The controversy concerning the "ARCUS AD ISIS" that is visible on a relief from the Tomb of the Haterii (cf. here Figs. 89; 90): it cannot be identified with the Arco di Camilliano to the east of the Iseum Campense, but stood instead near the Temple of Isis et Serapis in Regio III. With a summary of Domitian's 'pharaonic project', called 'Colosseum city'**

The "ARCUS AD ISIS", which is visible on the relief from the Tomb of the Haterii depicting six buildings in Rome (cf. here **Figs. 89; 90**), is identified by many scholars with the Arco di Camilliano (also called 'Arco di Camigliano') to the east of the Iseum Campense. So first Heinrich Brunn (*AdI* 1849, 363-410; *MonInst* 5, tavv. 6-8, quoted after F. COARELLI: "Arcus ad Isis", in: *LTUR* I [1993] 97, Fig. 52; cf. F. CASTAGNOLI 1941, 59; R. TURCAN 1983, 24 (cf. L. BRICAULT and R. VEYMIERS 2018, n. 139, quoted *verbatim infra*, in volume 3-2, at *Appendix I.g*)); K. LEMBKE 1994b, 20-21, 178-179, cat. C. 3, pl. 3,3; and M.C. LAURENTI: "Iseum: Arco di Camigliano", in: *LTUR* III [1996] 110, Figs. 70; 71. Cf. C. HÄUBER 2014a, 783 n. 1 [with ample bibliography]; cf. p. 794: it may have been created under Domitian, and if so, it documents what this part of Rome looked like under Domitian). Most recently, Claudio Parisi Presicce (2021a, 53; *id.* 2023, 110, quoted *verbatim infra*) takes for granted that the "ARCUS AD ISIS", represented on the relief from the Tomb of the Haterii, belonged to the Iseum Campense.

Cf. here **Figs. 59-61**, labels: CAMPUS MARTIUS; ISEUM; Arco di Camilliano; SERAPEUM.

Claudio Parisi Presicce ("The Arch of Titus in the Circus Maximus", 2021a, 53) writes about the Arco di Camilliano, which he identifies with the "ARCUS AD ISIS" on the relief from the Tomb of the Haterii (here **Figs. 89; 90**) :

**"Under Domitian, in Rome the practice to frame the archway with a pair of columns set against the pillars, came into being, as is testified by the Arch of Titus at the foot of the Palatine (Levick, fig. 1) and the four-sided Arch of Domitian that features on the reliefs of Marcus Aurelius. The Arch of Titus in the Circus Maximus [cf. here Fig. 121] displayed, for the first time in Rome, the type with four entirely round columns on the front sides - two on the outside and two in the middle between the central major passage and the two lateral ones - completely detached from the body of the structure. This scheme, which is also visible in the Arch of the Iseum Campense, probably Domitianic, and reproduced on the relief of the Tomb of the Haterii (Moormann, fig. 2), would become standard in the three-arched arches of the middle Empire [my emphasis]"**.

See the Italian version of Parisi Presicce's essay ("L'Arco di Tito nel Circo Massimo", 2023, 110), in which he has repeated this statement: **"È con Domiziano che si diffonde a Roma l'uso dell'inquadramento del fornice con una coppia di colonne addossate ai piloni, come testimoniato dall'Arco di Tito ai piedi del Palatino e dall'arco quadrifronte di Domiziano raffigurato nei rilievi di Marco Aurelio. Nell'Arco di Tito al Circo Massimo è attestato per la prima volta a Roma il tipo con quattro colonne a tutto tondo sulle fronti, due alle estremità e altre due al centro tra il fornice maggiore e i due laterali, completamente distaccate dal corpo della struttura. Lo schema è presente anche nell'arco dell'Iseo Campense, probabilmente domiziano, riprodotto nel rilievo della tomba degli Haterii e diverrà canonico negli archi trifornici del medio impero [my emphasis]"**.

**As I hope to have demonstrated elsewhere, the "ARCUS AD ISIS" - on architectural grounds - cannot possibly be identified with the Arco di Camilliano, nor with any of the other arches in the vicinity of the Iseum Campense; cf. Häuber (2014a, 788).**

*The "ARCUS AD ISIS" stood at the site of the Porta Querquetulana in the Servian city Wall*

**Other scholars locate the "ARCUS AD ISIS" (here Figs. 89; 90) near the sanctuary Isis et Serapis in Regio III. So for example Gösta Säflund (1932, 202), who was first to locate it at the site of the former archaic city gate Porta Querquetulana within the Servian city Wall. I have followed him, but assume the Porta Querquetulana at a different site than Säflund.**

I myself take the "ARCUS AD ISIS" for a replacement of the archaic *Porta Querquetulana* within the Servian city Wall, and thus as an entrance gate both to the sanctuary *Isis et Serapis* in *Regio III* (as its name implies), and to the 'Colosseum city'. As Fred S. Kleiner (1990, 129, n. 12; cf. C. HÄUBER 2014a, 786 with n. 40) has convincingly suggested, the Roman Senate had erected the "ARCUS AD ISIS" in honour of Vespasian.

Before Säflund, already some antiquarians of the 19<sup>th</sup> century had located the *Porta Querquetulana* at the same site as I do now again. Prerequisites for my re-location of this archaic gate in the Servian city Wall were the observation by Clementina Panella (1996b, 35-36, with ns. 9-11, Figs. 59; 60 [with drawing of my road 'L']; cf. pp. 63-65 with ns. 71-73, Fig. 147 after p. 158) that the modern Via Labicana follows an archaic road, and my own reconstruction of the Servian city Wall on the *Mons Oppius* and on the Caelian; cf. Häuber (1998, 111 n. 158; *ead.* 2001, 81-83; *ead.* 2006, 45, for my location of the *Porta Querquetulana* at this site); Häuber and Schütz (2004, 100-102, with ns. 158-160, Abb. II.19 [for Panella's excavation of this road, *i.e.*, my road 'L', and our relevant discussion with Clementina Panella in May of 2000]; cf. pp. 61-108, Teil II.1., for my reconstruction of the Servian city Wall on the Oppian and Caelian), and Häuber (2014a, 23 with ns. 161, 162 [for C. PANELLA's 1996b findings concerning my road 'L']; cf. pp. 251-289: Appendix I. The reconstruction of the Servian city Wall on the Oppian and Caelian; for the *Porta Querquetulana*; cf. p. 274 with ns. 218, 219, p. 351 with n. 40, pp. 790-791 with n. 95).

Cf. here **Fig. 72**, labels: MONS OPPIUS; [road] L; COLOSSEUM; modern Via Labicana; LUDUS MAGNUS; REGIO III; Vigna XII Apostoli/ Reinach; ISIS ET SERAPIS REGIO III / FORUM: PETRONIUS MAXIMUS; ISIS ET SERAPIS; "Porticus with Piscina"; FORUM: PETRONIUS MAXIMUS; "MINERVA MEDICA" / FORTUNA VIRGO; Round Nymphaeum / FONS MUSCOSUS; Nymphaeum; School; Via P. Verri; Nymphaeum Piazza Iside; LUCUS QUERQUETULANAE VIRAE; Servian city Wall; PORTA QUERQUETULANA/ ARCUS AD ISIS; Via Gregoriana / Merulana (1575); VIA IN FIGLINIS / ancient Via Merulana / Vicolo di S. Matteo; Via Pasquale Villari; 58a-d "Terme di Filippo"; [58] a; [58] b; [58] c; 58d S. Matteo in Merulana; SS. Pietro e Marcellino; [roads] U; V; Viale Manzoni; Retaining wall; HORREA ?; MONS CAELIUS.

In my list of ancient buildings within the *Horti* of Maecenas that comprises 58 structures, the "Terme di Filippo" have the catalogue numbers 58a - 58d; the ground-plans of these structures were drawn after Giambattista (G.B.) Nolli's Large Rome map (1748). The reason being that this originally very large structure

at Nolli's time consisted of five separate ruins. For my catalogue of ancient structures in the *Horti* of Maecenas; cf. Häuber (2014a, 16-17).

Besides, already Antonio Maria Colini (1962), in his publication with Lucos Cozza on the *Ludus Magnus*, had observed that the modern Via Labicana followed an archaic road. I have written elsewhere: "The ground floor of the substructure on Via Villari [*i.e.*, the "Terme di Filippo"] was probably level with the ancient road underneath modern Via Labicana. The ancient name of this road is unknown. It follows an archaic road, as observed for its western part by Clementina Panella [with n. 545]. This fact was already known to Antonio Maria Colini [with n. 546], but has been overlooked by most recent commentators [with n. 547]"; cf. Häuber (2014a, 107).

In my **note 545**, I write: "Cf. *supra*, p. 23 ns. 161, 162".

Cf. **note 546**: "Colini, in Id., Cozza 1962, pp. 90, 118, n. 7".

Cf. **note 547**: "Cf. Häuber 2005, p. 16 with n. 33".

But not only the fact that the ancient road underneath the modern Via Labicana / Viale Manzoni was archaic allows the assumption that the archaic city gate *Porta Querquetulana* had crossed this road somewhere : even the precise former location of this city gate is still visible at the Church of SS. Pietro e Marcellino, thanks to the 'topographical pattern' obtuse angle of a road, immediately followed by a fork or 'street fan' of ancient roads.

Concerning this point, I have written elsewhere: "**A number of 'topographical patterns' indicate that there had been a gate in the Servian city wall at the ancient road underneath modern Via Labicana**, [the first 'topographical pattern' being the obtuse angle of the modern Via Labicana] **immediately to the west of the former old church of SS. Pietro e Marcellino** [which was accommodated within the city gate *Porta Querquetulana*] (map 17 [= here **Figs. 71; 72**], labels: modern Via Labicana; SS. Pietro e Marcellino, the ground-plan of the old church is indicated with a red area, the ground-plan of the modern church, to the east of the old one, is drawn with thin black lines). **These 'topographical patterns' are: the abrupt obtuse angle** [with n. 174] **made by modern Via Labicana at this point and the former 'street fan'** [with my note 175] **which had issued at this point; the combination of both is especially indicative. This is still partly visible on Nolli's map (map 1) and even in the photogrammetric data of the Comune di Roma (now: Roma Capitale; maps 3; 15-17 [= here **Figs. 71; 72**], labels: modern Via Labicana; Viale Manzoni, the dotted green line marked "U", leading north-eastwards to the *Via in Figlinis* and to the later phase of the same road, called ancient Via Merulana or Vicolo di S. Matteo, and the dotted line marked "V", leading south-east). Seen under the perspective that there had been a city gate at this site, the sanctuaries under scrutiny here [*i.e.*, the Temple of *Isis et Serapis* in *Regio III*, the Temple of *Fortuna Virgo* and the Temple of *Dea Syria*] represent, taken together with this city gate, yet another 'topographical pattern'. All the 'topographical patterns' named here are quite frequent in Rome and in other towns (also post-antique ones) which had a city wall [my emphasis]". Cf. Häuber 2014a, 25).**

In my **note 174**, I write: "For the strategic properties of this feature at ancient city gates, cf. HÄUBER, SCHÜTZ 2004, pp. 95-96 with ns. 122-124 (with references), figs. II.17; II.17.A".

Cf. **note 175**: "Cf. HÄUBER, SCHÜTZ 2004, p. 95 with n. 118, fig. II.17".

For the "ARCUS AD ISIS", the Egyptian sanctuary *Isis et Serapis* in *Regio III* and adjacent shrines, the Nymphaeum at Piazza Iside, the *lucus* of the *Querquetulanae Virae*, the Servian city Wall with the *Porta Querquetulana*, and the "Terme di Filippo"; cf. Häuber (1998, 111 n. 158 [on the replacement of the *Porta Querquetulana* by the "ARCUS AD ISIS"]; C. HÄUBER and F.X. SCHÜTZ 2010, 85, Fig. 1, label: PORTA QUERQUETULANA/ ARCUS AD ISIS?; C. HÄUBER and F.X. SCHÜTZ 2004, 97; C. HÄUBER 2014a, 51-75 [on the Egyptian sanctuary *Isis et Serapis* in *Regio III*, the "Porticus with Piscina"]; pp. 75-80 [on two Nymphaea and the *Fons Muscosus*]; pp. 80-83 [on the building in Vigna Reinach]; pp. 83-84 [on the Nymphaeum at Piazza Iside and the "Terme di Filippo", an ancient substructure on Via Pasquale Villari,

built by Maecenas in his *Horti*, and on the still visible 'fan of roads', which had led to the city gate *Porta Querquetulana*. For the "Terme di Filippo" see also pp. 93-94, 163-167, 347-352]; pp. 95-106 [for the Forum of Petronius Maximus]; pp. 106-110 [for the *Lucus Querquetulane Virae*, the *Porta Querquetulana* and the Nymphaeum at Piazza Iside]; pp. 110-134 [for the Tempel of Fortuna Virgo and the Servian city Wall]. See also for the "ARCUS AD ISIS": pp. 153, 167, 170, 181, 228, 274 ns. 218, 219; Appendix VIII: pp. 415-417 [for the reliefs from the tomb of the Haterii, *inter alia* the "ARCUS AD ISIS"; p. 415 n. 6 [here the important observations concerning the reliefs from the tomb of the Haterii by G. SPINOLA 2012 are mentioned]; p. 480, Figs. 116; 117a [= here Figs. 89; 90]; Fig. 117b, p. 511; Chapter B 19.): pp. 634-643; Chapter B 31.): pp. 783-791; p. 783 with n. 1 [bibliography on the "ARCUS AD ISIS"]; Chapter B 32.): pp. 792-798).

For our re-location of the *Porta Querquetulana* suggested here; cf. also Lucrezia Spera ("Introduzione topografica", 2015, 9 with n. 37). Spera discusses all the buildings, to which also this *Chapter* is dedicated (cf. here Figs. 71; 72), and comments on all our relevant hypotheses that Franz Xaver Schütz and myself have presented before Häuber 2014a.

In their reviews of Häuber 2014a, Eric M. Moormann (2015a, 261) and Pierre Gros (2016, 351-352) have followed my reconstruction of the course of the Servian city Wall on the *Mons Oppius* and on the Caelian as well as my suggestion to locate the "ARCUS AD ISIS" at the site of the *Porta Querquetulana* within the Servian city Wall. James C. Anderson Jr. (2016, 288) acknowledges "the exact course of The Servian Wall in the area", and Mario Torelli (2016, 2013) follows my "ricostruzione del percorso delle mura serviane tra l'Auditorium di Mecenate e Porta Capena". Also T.P. Wiseman (2021, 12 with n. 19) follows my reconstruction of the Servian city Wall between the *Porta Esquilina* and the *Porta Capena*.

For the Arco di Camilliano (also 'Arco di Camigliano'), which is often (erroneously) identified with the "ARCUS AD ISIS" (here Figs. 89; 90), and for the "ARCUS AD ISIS" itself; cf. also Häuber (2017, 20, 28, 54, 62, 68, 70; pp. 72-73, Fig. 3.7.1.1; pp. 128, 132, 133, 134, 138; p. 139, Fig. 5,4 = here Fig. 89, pp. 142-144, 145, 153; pp. 171-172: "The Arco di Camilliano and G. Gatti's mosaico"; pp. 173, 174, 324, 325, 327. 328). - For the "Haterii Mausoleum"; cf. also Barbara E. Borg (2019, 253-255), suggested date: second quarter of the II. century AD.

To the tomb of the Haterii, and especially to the relief (here Figs. 89; 90), I will come back below, in Chapter IV.1.1.h), and *infra*, in volume 3-2, at Appendix I.g).

Fig. 89. Marble relief from the tomb of the Haterii, with representations of six buildings in Rome. Città del Vaticano, Musei Vaticani, Museo Gregoriano Profano (inv. no. 9997). From: C. Häuber (2014a, 480, Fig. 116). Suggested date: between the late Flavian period and 120 AD; cf. Häuber (2014a, 415, 170 with n. 178; cf. p. 794: it may have been created under Domitian, and if so, documents what this part of Rome looked like at his time).

Cf. C. Parisi Presicce, M. Munzi and M.P. Del Moro (2023, 94, *opera* no. 39): "Rilievo con rappresentazione di cinque edifici urbani, tra cui un anfiteatro a tre ordini identificato con l'Anfiteatro Flavio non ancora completato da Domiziano e due archi con titoli (CIL VI 19151) *Arcus ad Isis // Arcus in sacra via summa*. Marmo giallo. Alt. cm 42,8; largh. cm 162,9; prof. cm 23,8 120 d.C. ca., reimpiego di una base. Da Roma, via Labicana (odierna via Casilina), località Centocelle, sepolcro degli *Haterii*: maggio 1848. Depositato nel Museo Lateranense: 20 aprile 1849; venduto dal Capitolo Lateranense: 30 aprile 1853, Musei Vaticani, Museo Gregoriano Profano Ex Lateranense, inv. 9997".

Fig. 90. Same as Fig. 89. Detail with the "ARCUS AD ISIS". From: C. Häuber (2014a, 480, Fig. 117a).

Domitian restored also the huge substructure that flanked this former city gate *Porta Querquetulana*/ "ARCUS AD ISIS" on its outside to the north, and built a second one to the south. The multi-storeyed substructure to the north of the city gate was called by the antiquarians of past centuries "Terme di Filippo", on its roof

terrace stood, in my opinion, the Temple of Minerva Medica, built, together with this substructure, by Maecenas, but it functioned at the same time as an elaborate staircase that gave not only access to this temple, but also to the (later) sanctuary of *Isis et Serapis* in *Regio III*; in addition to this, it (possibly) accommodated shops for luxury goods.

For this substructure and the Temple of Minerva Medica, built by Maecenas within his *Horti*; which stands in Via Pasquale Villari; cf. now Häuber (forthcoming, Laocoon, Chapter IV.2.8.).

The city gate *Porta Querquetulana/ "ARCUS AD ISIS"* had in part survived in the buildings of the former old Church of SS. Pietro e Marcellino, which were documented on Giambattista Nolli's map of 1748, from where we have copied them into our maps. To the south of this city gate Domitian built anew a huge structure, by which he extended the plateau of the Caelian. Only recently excavated, it has been interpreted as accomodating *Horrea* (?).

**This important part of the Flavian 'nuova urbs' (a name for it suggested to me my Richard Neudecker many years ago), was begun by Vespasian, who started building the Colosseum (who also finished the Temple for *Divus Claudius* on the Caelian; cf. Suet., *Vesp.* 9), which was completed by Domitian. I have written elsewhere:**

"Already Stefania Adamo Muscettola [with n. 25] had observed: ``... e se Gerusalemme è stato l'Azio dei Flavi, Iside ha svolto un ruolo analogo a quello di Apollo''. The treasure of the temple at Jerusalem, which is mentioned here between the lines, and Vespasian's own drastic financial laws can explain how the Flavian emperors managed to spend so much money on building".

Cf. Häuber (2014a, 153 with n. 25). In my **note 25**, I wrote: "Adamo Muscettola 1994, p. 87; cf. Häuber 2009, p. 312 with n. 36".

For the fact that Vespasian had started building the Colosseum; cf. Rossella Rea ("Amphitheatrum", in *LTUR* I [1993] 31): "Iniziato da Vespasiano (Suet. *Vesp.* 11.1), inaugurato da Tito (Suet. *Tit.* 7.3) ...".

To this I will come back below; cf. *infra*, in volume 3-2, at *Appendix IV.c.1.*); and at *Appendix IV.d.3.*). See also *Appendix IV.d.4.a) Domitian's building project 'Colosseum City'*.

Only after this Chapter was written so far, did I learn from Laurent Bricault and Richard Veymiers (2018, 141, with n. 87) that Vespasien issued coins with the legend: *Roma resurge(n)s* (cf. below, in Chapter IV.1.1.h, and *infra*, in volume 3-2, at *Appendix II.a)*).

The part of Rome discussed here covered those areas of Nero's *Domus Aurea* that were built on the *Mons Oppius* and on the Caelian and the valley in between them, where today the modern Via Labicana runs, and extended for almost 1 kilometre from the Colosseum eastwards towards this gate in the Servian city Wall. By building the aforementioned huge substructures on either side of the city gate *Porta Querquetulana/ Arcus ad Isis*, Domitian certainly added to the grandiose appearance of the entrance to this entirely new city quarter.

**Fig. 72. The 'Colosseum city' between the Colosseum and the *Porta Querquetulana/ "ARCUS AD ISIS"* within the Servian city Wall, one part of the 'Flavian *nuova urbs*', begun by Vespasian and completed by Domitian. C. Häuber and F.X. Schütz, "AIS ROMA". From: C. Häuber 2014a, map 3 (updated 2023 as here Fig. 71, detail).**

For an explanation of the cartographic details of this map; cf. Häuber (2014a, 873-874), and *infra*, in volume 3-2, at *Appendix IV.c.2.*).

For a discussion of the topography of this entire area, 'The Colosseum city'; cf. Häuber (1998, 111 n. 158; *ead.* 2009, 312-314 with n. 32, Fig. 2; *ead.* 2014a, 105 [for the old and the new Church of SS. Pietro e Marcellino]; cf. 153 with n. 26 [the east-west extension of the 'Colosseum city', measured with the "AIS ROMA" from the west side of the Colosseum to the *Porta Querquetulana/Arcus ad Isis*, is circa 920 m]; cf. pp. 153, 383, 552, 553-554 [for the Temple of *Divus Claudius* and two of its possible cult-statues (?), that of Messalina (?)/Agrippina *minor* and of Claudius' son Britannicus (?)] - to those two statues I will come back below]; cf. pp. 154, 166 [for Maecenas's Temple of Minerva Medica on the roof terrace of the "Terme di Filippo"], cf. pp. 180-181, 347, 350; and pp. 401-414: Appendix VII The finds recorded by Pirro Ligorio (1513/14-1583) in this area, and especially pp. 412-414 (on the *Summum Choragium, Castra Misenatium; Ludus Magnus, Armamentaria*; p. 413 with n. 96, for the most recent location of the *Ludus Dacicus* to the west of the *Castra Misenatium* (*i.e.*, both to the north of the modern Via Labicana); Chapter B 31.): p. 783 with n. 1 [bibliography]). - I myself have not drawn the *ludus Gallicus* on our maps because, apart from the fact that it is listed in one of the Constantinian Regionary Catalogues within the Augustan *Regio II*, its precise location is unknown. Carlo Pavolini ("Ludus Gallicus", in: *LTUR III* [1996] 196) tentatively suggests that it stood in the vicinity of the *Ludus Matutinus*.

Cf. Häuber (2014a, **maps 3** [= here **Figs. 71; 72**]; **17**, labels: MONS OPPIUS; COLOSSEUM; MONS CAELIUS; TEMPLUM: DIVUS CLAUDIUS; [road] L; modern Via Labicana; site of LUDUS MATUTINUS; LUDUS MAGNUS; site of LUDUS DACICUS; site of CASTRA MISENATIUM; ARMAMENTARIA?; SUMMUM CHORAGIUM?; MONETA/ HORREA?/ S. Clemente; ISIS ET SERAPIS REGIO III; Via Pasquale Villari; 58a-d "Terme di Filippo"; Temple: MINERVA MEDICA; Servian city Wall; PORTA QUERQUETULANA/ ARCUS AD ISIS; SS. Pietro e Marcellino [the ground-plan of the old church and its adjacent convent, copied after Nolli's map of 1748, are drawn as red areas, being ancient structures, built into the ancient city gate, the ground-plan of the modern church, to the east of the old church, is drawn with thin black lines]; Retaining wall; HORREA?. See also C. HÄUBER 2017, 166-167, 324, 337); and *infra*, in volume 3-2, at *Appendix IV.d.4.a*) *Domitian's building project 'Colosseum City'*.

For the transformation of Nero's *Domus Aurea* into the here-so-called Flavian 'Colosseum city'; cf. Eric M. Moormann (2018, 163-166, Section: "From Golden House t); cf. p. 165 (on the Temple of *Divus Claudius*); and pp. 165-166 (on Domitian's *Meta Sudans*. For that; cf. also *infra*, in volume 3-2, at *Appendix V.*; Section V.). See now also Moormann (2021, 44; *id.* 2023, 57).

**For the four *ludi*, which belonged to the 'Colosseum City'; cf. now Werner Eck ("Zur Entstehung der kaiserlichen Gladiatorenschulen in Rom: Der *Ludus Dacicus*", 2020).**

My thanks are due to Hans Rupprecht Goette for providing me with this article.

Eck (2020) does not address the recent topographical discussion of the entire area comprising those *ludi*, which is why he has overlooked that the *ludus Dacicus* is not any more located at the site, where he suggests (*i.e.*, to the south of the *Amphitheatrum Flavium*/ the Colosseum, and thus to the south of modern Via Labicana); cf. Eck (2020, 64-65 with n. 33; cf. p. 60 n. 18). Currently, the *ludus Dacicus* is located to the north of the modern Via Labicana instead; cf. most recently Häuber (2014a, 413 with n. 96, summarized above), and here **Figs. 71; 72**.

Eck (2020, 59), after an analysis of the relevant ancient sources, comes to the convincing conclusion that of those four *ludi*, two, the *ludus Magnus* and the *ludus Matutinus*, had existed as an institution already under Nero. In the following, Eck (2020, 59) discusses also the assertion of the Chronographer of AD 354, according to whom Domitian had built all four *ludi*.

Cf. Eck (2020, 59): "In der wissenschaftlichen Diskussion haben dabei Aussagen des Chronographen von 354 die wesentliche Rolle gespielt. Denn dort wird unter dem Jahr 94 von der kaiserlichen Bautätigkeit unter Domitian folgende lange Liste vorgelegt [with n. 17]: *multae operae publicae fabricatae sunt: atria vii, horrea*

*piperataria ubi modo est basilica Constantiniana et horrea Vespasiani, templum Castorum et Minervae, portam Capenam, gentem Flaviam, Divorum (sc. porticus), Iseum et Serapeum, Minervam Chalcidicam, Odium, Minuciam veterem, stadium, et thermas Titianas et Traianas, amphitheatrum usque ad clypea, templum Vespasiani et Titi, Capitolium, senatum, ludos IIII, Palatium, metam sudantem et Panteum.*

Interessant ist in unserem Zusammenhang nur die Angabe *ludos IIII*. Vier *ludi*, Gladiatorenschulen, werden hier mit Domitian verbunden. Die einzelnen Namen werden an dieser Stelle nicht angegeben".

In his **note 17**, Eck writes: "*Chronographus anni CCCLIII*, in *Chronica minora saec. IV. V. VI. VII*, hg. TH. MOMMSEN (= M.G.H. Auctores Antiquissimi 9), Berlin 1892, 14".

See for the Chronographer of AD 354 more recently: Michele Renée Salzman (*On Roman Time. The codex-calendar of 354 and the rhythms of urban life in late antiquity*, 1990).

**For the (erroneous) assertion of the Chronographer of AD 354 that Domitian restored the "senatum" (i.e., the Curia Iulia); cf. *infra*, in volume 3-2, at Appendix IV.c), and for his (correct) assertion that Domitian built "thermas Titianas et Traianas" (i.e., the Baths of Trajan); cf. *infra*, in volume 3-2, at Appendix IV.d.4.c).**

**In the following, Eck (2020, 60-67) summarizes the scholarly discussion on the *ludus Dacicus* and explains why he believes that only Trajan could have built this *ludus*.**

Cf. Eck (2020, S. 67, the abstract of this article):

"In der Kaiserzeit wurde die Ausbildung von Gladiatoren bald in kaiserliche Regie übernommen. Im 2. Jh. existierten in Rom vier *ludi*: *ludus Magnus*, *ludus Matutinus*, *ludus Dacicus* und *ludus Gallicus*. Umstritten ist aber, wann sie eingerichtet wurden. Nach dem Chronographen von 354 soll Domitian *ludos IIII* errichtet haben. Obwohl diese Aussage nicht selten von der Wissenschaft übernommen wurde, ist sie unzutreffend. Sicher ist, dass eine spätestens unter Nero bereits zwei kaiserliche Gladiatorenschulen in Rom existierten: der *ludus Magnus* und der *ludus Matutinus*. Das hatte man schon bisher partiell auch gesehen, doch die beiden anderen sollen weiterhin auf Domitian zurückgehen. Doch ein *cursus honorum* eines Claudius Ilus zeigt, dass der *ludus Dacicus* auf die Zeit Traians zurückgeht [emphasis by the author]".

It would be interesting to create a '3D' model of the sanctuary *Isis et Serapis* in *Regio III* and its surrounding buildings, comprising the 'Colosseum city', in order to better understand their impact on the city scape. Franz Xaver Schütz has made a first attempt into this direction, cf. Franz Xaver Schütz (2014; and *id.*: in *FORTVNA PAPERS* vol. I, *forthcoming*; C. HÄUBER 2014a, **map 4**, cf. pp. 154, 873-874).

**Most recently, Gian Luca Gregori and Valerio Astolfi (2023, 161) have studied the area that I refer to as Colosseum city'.**

**Contrary to Eck (2020, 60-67), quoted above, they confirm that the *Ludus Magnus* had indeed been built by Domitian, but, as so many other Domitianic buildings, it had later been 'usurped' by Trajan. The same is, by the way, also true for the near-by Baths of Trajan, which, exactly like the Forum of Trajan, had been started by Domitian, and the Moneta, which, moved to the site of the later Church of S. Clemente by Domitian, should later likewise be 'usurped' by Trajan :**

"La medesima operazione di appropriazione da parte di Traiano [as in the case of Domitian's *Mega-Forum* that became the *Forum Traiani*] potrebbe riconoscersi nel complesso termale della *regio III* (colle Oppio), che secondo le fonti letterarie sarebbe stato edificato da Domiziano [with n. 21]. Nonostante la pressoché totale assenza di documentazione archeologica relativa a una fase domiziana, le terme di Traiano si inserivano in uno stratificato paesaggio urbano marcatamente flavio, nel segno di una eccezionale continuità urbanistica con l'ultimo della dinastia. Ancora più problematica risulta l'interpretazione della completa ricostruzione del

*Ludus Magnus*. Il complesso, edificato da Domiziano nell'ambito della riqualificazione della stessa regio III, venne interamente ricostruito da Traiano ad una quota superiore di m 1,50, ricalcando, tuttavia, la struttura domiziana, di cui si conservano tracce nei livelli di fondazione ...

Anche la zecca di Stato, trasferita da Domiziano nell'area oggi occupata dalla chiesa di S. Clemente, fu ridedicata da Traiano, come documenta l'epigrafe su di un blocco di marmo pavonazzetto, riutilizzata poi come architrave di una porta della chiesa [with n. 24; my emphasis]"

In their **note 21**, Gregori and Astolfi write: "Anderson 1983, pp. 102-104; Packer 1997, pp. 3-4".

In their **note 24**, they write: "Lawlor 1992; Coarelli 2019 [*i.e.*, here F. COARELLI 2019a], p. 101".

**Apropos, "Nonostante la pressoché totale assenza di documentazione archeologica relativa a una fase domiziana", concerning the Baths of Trajan on the Mons Oppius, as stated by Gregori and Astolfi (2023, 161), quoted above.**

**Precisely that has in the meantime been provided** - by James C. Anderson Jr. ("The Date of the Thermae Traiani and the Topography of the Oppius Mons", 1985); and by Rabun Taylor, Edward O'Neill, Katherine W. Rinne, Giovanni Isidori, Michael O'Neill and R. Benjamin Gorham ("A Recently Discovered Spring Source of the Aqua Traiana at Vicarello, Lazio", 2020); cf. below, in Chapter *The major results of this book on Domitian*.

**In the following, I repeat a passage, written for *supra*, Chapter *Introductory remarks and acknowledgements*. I hope that in future studies these new observations, comprised in publications which reached me too late to be integrated into my text, can be added to the subjects discussed in this Chapter :**

Patrizio Pensabene ... sent me on 25th March 2023, in addition to this, two of his recent publications; cf. Pensabene and Javier Domingo ("Capitolo I L'area della Basilica e del Convento e il Tempio di Claudio", in: Franco Astolfi and Alia Englen: *Caelius II Tomo 2 Pars Superior La Basilica dei Santi Giovanni e Paolo e il Tempio di Claudio*, 2022), as well as the article by Pensabene, which has been published in the same volume ("5. Recupero e riuso dell'antico nei SS. Giovanni e Paolo: gli elementi architettonici", 2022).

... **Patrizio Pensabene and Javier Domingo (2022) discuss in their article not only the Temple of the divinized Claudius, but also the enormous "aula absidata" as they refer to it, called by other scholars the *Augusteum*, that was located in the southern portico, surrounding the *Claudianum*, which is represented on the Severan Marble Plan.**

**For this *Augusteum*, where she suggests that the statues discussed by her were possibly on display (or alternatively within the *Claudianum*); cf. Emilia Talamo (in: E. LA ROCCA *et al.* 2011, 230-231, cat. no. "3.7 Statua di Agrippina minore come orante", Roma; Musei Capitolini, Centrale Montemartini (inv. no. 1882), "Grovacca del Wadi Hammamat (Egitto) [my emphasis]"; this torso is restored with a plaster cast of the statue's head in the Ny Carlsberg Glyptotek at Copenhagen; cf. p. 232, cat. no. "3.8 Statua di fanciullo togato", Britannicus?, Firenze, Galleria degli Uffizi (inv. no. 1914). As already mentioned above, I myself wonder, whether the head of this statue actually belongs to the statue; cf. Häuber (2014a, 395-399).**

We have also heard above, that John Pollini has now dedicated a study to the portrait-type of Claudius's son Britannicus ("New Observations on the imperial reliefs from the Sebasteion at Aphrodisias and the portraiture of Claudius, Britannicus, and the young Nero", 2021). But Pollini (2021) does not consider in his article the "Statua di fanciullo togato", Britannicus?, Firenze, Galleria degli Uffizi (inv. no. 1914)", discussed by Talamo (2011).

According to Pensabene and Domingo (2022, 54) this enormous "aula absidata"/ the *Augusteum*, located in the southern portico, surrounding the *Claudianum*, accommodated a cult of members of the Flavian dynasty, and that Vespasian, who had built this phase of the *Claudianum*, thus had aimed to 'add' a cult of his own dynasty to that of the Iulio-Claudians. **Pensabene and Domingo (2022, 54) suggest that the statues of**

**Claudius's family (thus referring to the just-mentioned portrait-statues of Agrippina *minor* and of the presumed Britannicus ?), were possibly on display within the Temple of *Divus Claudius*:**

"... la definizione dell'ampliamento del recinto porticato della piazza [surrounding the *Claudianum*] nella fase vespasiana, ha consentito di approfondire la funzione di alcune strutture segnalate dalla FUR [*i.e.*, the Forma Urbis Romae, the Severan Marble Plan] sul portico del lato sud, in particolare quella di un'enorme aula absidata molto probabilmente destinata al culto dei membri della famiglia flavia, che si aggiunse a quella dei giulio-claudi le cui statue dovevano forse trovarsi nel tempio centrale".

**We have also heard above that Thorsten Opper (2021, 128 Fig. 144 "Statua of Agrippina performing a sacrifice") suggests that this portrait-statue is carved from basanite (*basanites*) instead.**

Pensabene and Domingo (2022), who have studied the fragmentary architectural marbles from both the *Templum Pacis* and the Vespasianic phase of the *Claudianum*, convincingly stress the great similarities of both buildings. **The great "aula absidata"/ the *Augusteum* in the southern portico surrounding the *Claudianum*, actually occupied the same position as the Temple of Pax within the *Templum Pacis* (for both cf. here Fig. 58).** Finally I found also Pier Luigi Tucci's most recent article on the *Templum Pacis* ("Il Tempio della Pace : ricostruzioni e istruzioni per l'uso", 2022), which, in my opinion, should be considered in this context as well.

In future studies all these above-summarized new observations concerning the *Claudianum* and the *Templum Pacis* will hopefully be considered *together*. And provided, this could actually become a new research project, also the above-mentioned new findings by Francesco Paolo Arata should be considered as well. Arata (2012) has discussed an excavation at the Casina Salvi on the western slope of the Caelian, where Domitianic foundations were found, which Arata (convincingly) attributes to the pillars of Domitian's branch of the *Aqua Claudia*, built by the emperor from the Caelian to the Palatine in order to provide his Palace '*Domus Flavia*'/ *Domus Augustana* with water. As Arata is able to demonstrate, the building history of the *Aqua Claudia* on the Caelian is closely related to the building history of the *Claudianum*.

In addition to this, we should not forget what Riccardo Santangeli Valenzani has recently reminded us of. In his review of Pier Luigi Tucci's book on the *Templum Pacis* (2017), **Santangeli Valenzani observes** (2018, quoted *verbatim* in more detail *infra*, in volume 3-2, at Appendix IV.d.4.b): **"that in some cases the book [*i.e.*, P.L. TUCCI 2017] has already been outdated by the results of the latest research ... [listing in the following some examples for this fact]. Naturally these lacunae cannot be attributed to Tucci (except for the choice of publishing a monograph on a monument that is still being excavated) [my emphasis]"**.

For discussions of all above-mentioned subjects; cf. above, in Chapter *Preamble*; Section III.; at point 3.); and *infra*, in volume 3-2, at Appendix IV.d.4.b) *Domitian's building project comprising the Campus Martius, the Capitoline Hill and the sella between Arx and Quirinal. With detailed discussion of the Templum Pacis, and some remarks on Domitian's Villa, called Albanum; and in Appendix VI.; at Section XII.*

**Chapter IV.1.1.h) The new findings by B.E. Borg (2019) concerning the *Templum Gentis Flaviae* support the hypothesis suggested here that Domitian's obelisk (cf. here Fig. 28) was commissioned for the *Iseum Campense*. With some observations concerning the Temple of *Divus Traianus* at *Italica*, and concerning the *Marble Forum* at the *Colonia Augusta Emerita (Mérida)* in Spain. With The Contributions by Eric M. Moormann, Mario Torelli, and Walter Trillmich, with The second Contribution by Jörg Rüpke**

On 2nd May 2018, I had the chance to attend the talk by Barbara E. Borg at the British School at Rome on the subject: "Reviving tradition in Hadrianic Rome: from incineration to inhumation", in which she also discussed the *Templum Gentis Flaviae*. On 3rd May 2018, I met with Borg at the British School at Rome, who was about to finish her book *Roman Tombs and the Art of Commemoration*, which has appeared in the

meantime (cf. B. E. BORG 2019), and in which she has published her findings presented in this talk. On 3rd May 2018, Borg was so kind, as to discuss the *Templum Gentis Flaviae* with me in Rome and to send me a printout of her text on the "*Templum Gentis Flaviae*".

**Domitian built the *Templum Gentis Flaviae* on the Quirinal, at the site of his father Vespasian's *domus*, where he himself was born (Suet., *Dom.* 1; cf. *Dom.* 15), and where later the Baths of Diocletian were erected.**

**Concerning the date of the construction of the *Templum Gentis Flaviae*, Filippo Coarelli (2009b, 94 with n. 311) suggests: 'not before AD 94'; cf. Häuber (2017, 162).**

But see Coarelli (2014, 196): "Dunque il tempio [*i.e.*, the *Templum Gentis Flaviae*] è menzionato esclusivamente nel libro IX [*i.e.*, of Martial], pubblicato tra la metà del 93 e la metà del 94 d.C., ciò che costituisce un decisivo *terminus post quem non*: la frequenza con cui esso appare in questi anni fa pensare che la costruzione fosse recente. Un'altra indicazione [concerning the date of the *Templum Gentis Flaviae*] si può trarre dalla data della morte di Giulia di Tito (89 d.C.), **la prima che fu deposta: se ciò avvenne immediatamente dopo, potremmo attribuire allo stesso anno l'inaugurazione del monumento, che comunque sarà da fissare al più tardi, nel 92-93 [my emphasis]**".

Of the architecture of the *Templum Gentis Flaviae* only scarce remains have been found in excavations, in addition, some architectural fragments and some relief fragments, all carved in Pentelic marble. Also the head of its colossal acrolithic cult-statue of *Divus Titus* (here Fig. 53) has been identified. And, as was earlier (but erroneously) believed, possibly also the head of its colossal acrolithic cult-statue of *Divus Vespasianus*. I am referring to the colossal head of Vespasian at Napoli, Museo Archeologico Nazionale (MAN) (alleged inv. no. 1889, in reality without inventory number).

As we shall see below, this head of Vespasian (MAN, alleged inv. no. 1889), according to Giuseppe Fiorelli, had (allegedly) occurred at the same site as the portrait of Titus (here Fig. 53). Note that the portrait of Vespasian in question is of a different style and of smaller proportions than the portrait of Titus (here Fig. 53). So far the marble quality of those two heads has not been described, nor tested.

**For the (alleged) find of "una testa colossale di Vespasiano, scoperta nel corso dei lavori di costruzione del Ministero delle Finanze, che già [Rodolfo] Lanciani (*BCom* 1873, 229) aveva collegato con il tempio [*i.e.*, the *Templum Gentis Flaviae*; my emphasis]"; cf. Filippo Coarelli ("Collis Quirinalis", in: *LTUR* IV [1999] 183).**

**But note that Lanciani (*BullCom* 1, 1873-73, 229) here announced instead the find of the colossal portrait of Titus (here Fig. 53). Lanciani was, therefore, first to suggest that the find of this colossal portrait of - obviously - *Divus Titus* - allowed the conclusion that in the area in question, as he expressed himself, 'should be located the *Domus* [of Vespasian], located in *Regio VI, ad malum Punicum*, which later Domitian had turned into the *Templum Gentis Flaviae*':**

"*Gentem Flabiam*. Questa indicazione dei cataloghi dee [deve?] probabilmente riferirsi alla casa posta *regione Urbis sexta ad malum Punicum ... quam postea (Domitianus) in templum gentis Flaviae convertit* [with n. 2]. Ora nelle fondamenta del nuovo palazzo del ministero delle finanze, presso l'angolo del recinto serviano, ove apparvero avanzi della porta Collina, è tornata alla luce **una testa colossale di Tito Flavio Vespasiano**; scoperta che ci permette assegnare il posto definitivo della *Gens Flavia*, e del luogo detto ad *malum Punicum* nella topografia della sesta regione [my emphasis]".

In his **note 2**, Lanciani quoted: "Svet. *Domit.* 1".

As I should only realize much later, already Paolo Sommella (2022, 261) has mentioned the fact that Lanciani had identified the area, where the colossal head of Titus (here Fig. 53) had come to light, as that of the *Templum Gentis Flaviae*.

**Even later than that did I realize that among the recent scholars, who discussed the subject, it has been first Maria Cristina Capanna (2008, 177) to map the findspot of this head of Titus (cf. her Fig. 1, label: 5), and to identify this portrait as belonging to one of the cult-statues of the *Templum Gentis Flaviae*.**

Capanna (2008, 177) writes: "4. **A meno di 150 m dalla posizione dei resti** [of the *Templum Gentis Flaviae*, excavated by D. CANDILIO within the Baths of Diocletian; cf. her Fig. 1, label: B, and her Figs. 3; 4], **in occasione dei lavori di costruzione del Palazzo delle Finanze, venne rinvenuta una testa colossale di Tito (Fig. 1.5), che possiamo ipotizzare fosse appartenuta a una delle statue di culto del tempio** [with n. 1; my emphasis]".

In her note 1, Capanna writes: "**La testa fu rinvenuta sopra uno dei tratti di basolato della strada che limitava a N[ord] le Terme di Diocleziano. Si ipotizzò, in base alle abrasioni documentate, che fosse stata fatta rotolare per spostarla dal luogo di rinvenimento ad altro, a fini di riutilizzo come materiale edilizio; il tentativo di trasporto fallì probabilmente per il gran peso della scultura dalle notevoli dimensioni: CARNEVARI 1874-75; CAR II I 15; POLLA 1979, p. 37. La testa è conservata al Museo Nazionale di Napoli ed è in corso di studio da parte di E. La Rocca (informazione di A. Carandini)** [my emphasis]".

Cf. *Carta Archeologica di Roma, Tavola II* (1964) 239, II I no. 15: "Via Pastrenga - Ministero delle Finanze. Sterri per le fondamenta a) strada selciata [providing references]. b) Testa colossale marm.[orea] di Tito ... b) *Relazione 1871-72, 42; MemLinc 1874-75, 433*".

**Let's now turn to the colossal head of Vespasian in Napels (MAN, alleged inv. no. 1889), which, according to Fiorelli's (as we now know wrong assertion), was found in the area of the *Templum Gentis Flaviae*.**

See Coarelli (2009b, 93 with n. 298, for a colossal portrait of Vespasian which, in Coarelli's opinion, who [erroneously] believed it belonged to the former collection Farnese, was found in the *Horti Farnesiani* on the Palatine. This is the head COARELLI 2009a, 495, cat. no. 98: "Ritratto colossale di Vespasiano, Provenienza sconosciuta", Napoli, Museo Archeologico Nazionale (MAN) [alleged inv. no. 1889, in reality without inventory number] [E. ROSSO]; from Emmanuelle Rosso's account is clear that this portrait did *not* belong to the former collection Farnese).

According to Eugenio La Rocca (2009, 225 with n. 21) Giuseppe Fiorelli, "allora direttore generale per le antichità del Ministero della Istruzione Pubblica", had decreed in 1876 that the colossal head of Titus (here Fig. 53), which, in 1873, had been excavated in the area of the *Templum Gentis Flaviae*, was 'exchanged for' "alcuni frammenti degli *acta fratrum Aroalium*", and brought to Napoli under the pretext that the colossal head of Vespasian, MAN [alleged inv. no. 1889], had earlier been found in the same area. Which, if true, could have meant that this portrait of Vespasian had belonged to the cult-statue of Vespasian in the *Templum Gentis Flaviae*.

This whole procedure had caused a scandal at the time; cf. La Rocca (2009, 225 with n. 21; and *id.* 2020b, *passim*). As La Rocca (2009; 2020b) likewise found out, the provenance of this portrait of Vespasian (MAN [alleged inv. no. 1889]), is unknown, therefore, this head was certainly not found near the *Templum Gentis Flaviae*. La Rocca is also able to prove that the inventory number '1889' of this portrait of Vespasian at the MAN is based on an error. In reality this portrait has no inventory number at all; cf. La Rocca (2020b, 371, note 16). To this I will come back below.

La Rocca (2020b, 369, 371-378) discusses in great detail the scandal, caused by Giuseppe Fiorelli's decision to send the colossal head of Titus (here **Fig. 73**) to Naples, but does not mention Rodolfo Lanciani's above-quoted announcement of the find of this portrait of Titus in the (*BullCom* 1, 1873-73, 229).

Nathalie de Haan and Eric M. Moormann (2021, 82) seem to refer in their text to the (false) information by Fiorelli, mentioned above, that in the area of the *Templum Gentis Flaviae* were found two colossal portraits of the divinized Vespasian and Titus: the head of Titus (here **Fig. 53**), which they do not explicitly mention, and a colossal portrait of Vespasian. De Haan and Moormann (2021, 82) illustrate on the same page *the other* famous colossal portrait of Vespasian at the MAN Napoli (inv. no. 6068), ex collection Farnese, tentatively suggesting that this portrait could have belonged to the cult-statue of *Divus Vespasianus* in the *Templum Gentis Flaviae*. De Haan and Moormann rightly stress the fact that only divinized persons could be buried in the area in question, because the *Templum Gentis Flaviae* stood within the *pomerium* (the sacred boundary of the City of Rome), which, when the city walls were first built, had run parallel to the Servian city Wall. For the *pomerium*; cf. *supra*, n. 199, in Chapter I.1.1.).

For the topographical position of the *Templum Gentis Flaviae*, in relation to the Servian city wall; cf. here **Fig. 58**, labels: COLLIS QUIRINALIS; Servian city Wall; S. Susanna; Caserma dei Corazzieri; site of DOMUS; ALTA SEMITA; site of DOMUS : T. FLAVIUS SABINUS / DOMUS : NUMMII; Baths of DIOCLETIAN; site of DOMUS : VESPASIAN / TEMPLUM GENTIS FLAVIAE;

De Haan and Moormann (2021, 82) write: ".. de *Templum Gentis Flaviae* ('de tempel voor de familie van de Flaviërs'). Dit bestond uit een vierkant terrein met een tempel, een park en de grafmonumenten voor Vespasianus en Titus, die hier als vergoddelijkten personen vereerd werden. **Alleen als vergoddelijkte konden zij hier in hun urnen worden beïjgezet, omdat doden normaal gesproken buiten de stadsmuren werden begraven ... In dit gebied kwamen bovendien twee kolossale portretkoppen van de vereerde keizers [i.e., of Vespasian and Titus] aan het licht, die tot de cultusbeelden in de tempel zelf kunnen hebben behoord** [my emphasis]".

The caption of de Haan's and Moormann's illustration on p. 82 reads: "Kolossaal portret van Vespasianus, mogelijk afkomstig uit de *Templum Gentis Flaviae* en onderdeel van het cultusbeeld van Vespasianus in de tempel zelf © Napels, Museo Archeologico Nazionale [inv. no. 6068]".

This portrait of Vespasian at Napoli (MAN inv. no. 6068), from the collection Farnese, has so far not been attributed to the *Templum Gentis Flaviae*. Because a photo of this head (MAN inv. no. 6068) and three photos of the above-mentioned portrait of Vespasian, Napoli (MAN, alleged inv. no. 1889), are published in Coarelli's (2009b) catalogue *Divus Vespasianus* on the same page, my guess is that this fact may have caused de Haan's and Moormann's (2021, 82) relevant confusion; cf. Filippo Coarelli (2009a, 495, cat. nos. 97 and 98).

For the portrait of Vespasian at Napoli (MAN inv. no. 6068), ex collection Farnese, has so far been suggested a provenance from the Baths of Caracalla and its identification with the head of the cult-statue in Domitian's Temple of *Divus Vespasianus*. Concerning this portrait, I anticipate in the following a passage, written for *infra*, in volume 3-2, at *Appendix IV.c.2.*), where I have discussed the old tradition that this head was found in the Baths of Caracalla:

'Now, interestingly, Filippo Coarelli suggests instead that this colossal portrait of Vespasian at Naples (MAN inv. no. 6068) should be regarded as the head of the cult-statue of Vespasian at the Temple of *Divus Vespasianus*; cf. Coarelli (2009b, 77, with n. 90, Fig. 14). Emmanuelle Rosso (cat. no. 97 "Testa colossale del *Divus Vespasianus*", Naples, MAN inv. no. 6068, in: F. COARELLI 2009a, 495) writes: "Benché l'appartenenza della testa alla collezione Farnese sia accettata, il luogo preciso di ritrovamento rimane problematico: la provenienza dalle Terme di Caracalla talvolta ipotizzata, è probabilmente da scartare ... [discussing further suggestions]", but note that Emmanuelle Rosso does not discuss Vincent (1981). - For a discussion of the Temple of *Divus Vespasianus*; cf. *supra*, at *Appendix IV.c.1.*'.

Of a very different opinion than Coarelli (2009b, 77, with n. 90. Fig. 14) was Eugenio La Rocca (2009, 225, n. 21), who, discussing the colossal portrait of Vespasian at the Museo Archeologico Nazionale [MAN] at Naples (ex collection Farnese, inv. no. 6068), informed us that: "... Si crede che la testa colossale Farnese inv. 6068 provenga, insieme con un altro ritratto colossale di Antonino Pio inv. 6078 (= Ruesch 1911, pp. 248 sg., n. 1029, fig. 63), dalle Terme di Caracalla: Vincent 1981, p. 338".

Cf. R. Vincent, "Les collections Farnèse, Les antiques, in: Le palais Farnèse, a cura dell'École française de Rome, 1.2 (1981), pp. 331 sgg."

**But see now La Rocca (2020b, 371 with n. 16, quoted *verbatim infra*, in volume 3-2, at Appendix IV.c.2.), who states that the colossal portrait of Vespasian in the Museo Archeologico Nazionale at Naples (inv. 6068) was certainly *not* found in the Baths of Caracalla (!).**

Most recently, the colossal head of Vespasian in Naples (MAN, inv. no. 6068) has been discussed in the exhibition catalogue, edited by Claudio Parisi Presicce, Massimiliano Munzi and Maria Paola Del Moro (*Domiziano Imperatore. Odio e amore*, 2023, 155, *opera* no. 75).

Note that the artworks on display in this exhibition are referred to in this catalogue as '*opere*'.

The caption reads:

"[Opera] 75. Testa-ritratto colossale di Vespasiano su busto moderno

Marmo

Alt.[ezza] cm 192; largh[ezza]. cm 95

**Da Roma, Foro Romano, tempio dei divi Vespasiano e Tito (?): 1540-1550 (?)**

Roma, Collezione Farnese, Roma: 1566

Napoli, Museo Archeologico Nazionale di Napoli, inv. 6068 [my emphasis]".

**To this caption, I should like to add some comments :**

- a*) after what was said above, this portrait of Vespasian (Naples, MAN inv. no. 6068) was certainly not found in "Roma, Foro Romano", as stated in this caption; the provenance of this head is unfortunately unknown;
- b*) the temple, to which this portrait is tentatively attributed in this caption: "tempio dei divi Vespasiano e Tito (?)" was only dedicated to the *Divus Vespasianus*, but not to the *Divus Titus*.

We will find this wrong assumption, mentioned under point *b*), also in the article by Eugenio La Rocca (in: E. LA ROCCA and L. KOSMOPOULOS 2023, 122, 131, 135, 137, quoted *verbatim* and discussed *infra*).

**For further discussions of both colossal portraits of Vespasian at Naples (MAN):**

Cf. below, at *A Study on the colossal portrait of Hadrian (now Constantine the Great) in the courtyard of the Palazzo dei Conservatori at Rome* (cf. here **Fig. 11**) ...; at Part I. *The statue of Hadrian (now Constantine the Great) in the courtyard of the Palazzo dei Conservatori* (cf. here **Fig. 11**), the inscription (CIL VI 974 = 40524; cf. here **Fig. 29.1**), and the cult-statue of *Divus Vespasianus* in the Temple of *Divus Vespasianus*. With The Contribution by Hans Rupprecht Goette on the reworking of the portrait of Hadrian (now Constantine the Great).

#### **For the *Templum Gentis Flaviae* and the finds attributed to it**

Cf. also Coarelli (2009a, 496-497, cat. no. 99: "Ritratto colossale di Tito, Napoli, MAN [inv. no. 11089; 152 cm high = here **Fig. 53**] [E. LA ROCCA, who tentatively identifies this head as that of the cult-statue of *Divus Titus* in Domitian's *Templum Gentis Flaviae*; this suggestion he has now confirmed in: E. LA ROCCA 2020b; so also L. KOSMOPOULOS, in: E. LA ROCCA and L. KOSMOPOULOS 2023, 125 with n. 32]; M.C. CAPANNA

2008; E. LA ROCCA 2009, 225 with ns. 19, 21, p. 230 writes that the portrait of Titus was a colossal acrolithic statue; cf. COARELLI 2009b, 94, with n. 322; C. HÄUBER 2014a, 165 n. 144; *ead.* 2017, 163; COARELLI 2014, 200 Fig. 50; E.M. MOORMANN 2018, 169-170; B.E. BORG 2019, 244-251, Figs. 4.20; 4.21; 4.22, especially p. 245 with n. 197; E.M. MOORMANN 2021, 46 with n. 17, who quotes C. HÄUBER 2021 [*i.e.*, this publication], and follows my view concerning the *Templum Gentis Flaviae* presented here; cf also below, at *The Contribution by Eric M. Moormann : Can We Reconstruct the Templum Gentis Flaviae?*. So also E.M. MOORMANN 2023, 59 with n. 18, who quotes for my relevant hypothesis: HÄUBER 2020 [*i.e.*, this publication]).

The colossal head of Titus (here **Fig. 53**) was also on display in the recent exhibition on Domitian, together with some architectural marbles from the *Templum Gentis Flaviae*. In this catalogue, the objects on display in this exhibition are referred to as 'opere'. Cf. Claudio Parisi Presicce, Massimiliano Munzi and Maria Paola Del Moro (2023, 153, *opera* no. 69).

The caption reads:

"[Opere] **69-74. Templum Gentis Flaviae**

[Opera] **69. Testa-ritratto colossale di Tito**

Portato a Napoli: 1875

Napoli, Museo Archeologico Nazionale di Napoli,

inv. 110892 [my emphasis]".

**The iconographies of all above-mentioned sculptures have no relation whatsoever with Isis or any other Egyptian divinity.**

#### **Was the *Templum Gentis Flaviae* built by members of the Haterii family?**

We have discussed in the previous Chapter (cf. *supra*, in Chapter IV.1.1.g)) one of the reliefs from the famous tomb of the Haterii, with representations of six buildings in Rome (cf. here **Figs. 89; 90**). I myself follow those scholars, who date this tomb between the late Flavian period and 120 AD; cf. Häuber (2014a, 415, 170 with n. 178). Barbara E. Borg (2019, 253 with n. 225), suggests instead the following date: "first quarter of the second century". Barbara E. Borg (2019, 255, Chapter: "4 Straddling Borderlines: Divine Connotations in Funerary Commemoration", Section: "Haterii Mausoleum") suggests the interesting hypothesis that members of the Haterii family may actually have been involved in building the *Templum Gentis Flaviae*:

**"He [*i.e.*, the tomb's founder, with n. 227] must have been in the building industry and, as a further relief from the tomb suggests in depicting a number of public buildings [= here **Figs. 89; 90**], [with n. 228] the Haterii were probably working as *redemptores*, contractors of building projects and construction work, for the emperor and the state. [with n. 229] While the father of the tomb's founder was an ex-slave, he was no imperial freedman but was probably freed by Q. Haterius Antoninus (*cos.* 53), a grandson of the Augustan orator. Antoninus is also known from brick stamps and so was in the building industry himself. The fact that he was closely related to a number of important individuals of his time, and that he was first cousin of both Valeria Messalina and Nero, will certainly have helped his freedmen to enter into important and lucrative businesses. [with n. 230] Having been involved in imperial Flavian building projects, the Haterii would doubtless have been close to the *familia caesaris*, and very aware of the *Templum Gentis Flaviae* as well as Priscilla's mausoleum [which Borg discusses as well]. We may even speculate that they were directly involved in the building of the *Templum* [my emphasis]".**

For the "Mausoleum of Priscilla"; cf. Borg (2019, 251-253): according to her, this was the first private tomb to copy the *Templum Gentis Flaviae*.

In her **note 227**, Borg writes: "For a different but unconvincing view, see below at n. 255".

In her **note 228**, she writes: "Sometimes called the 'Via Sacra panel' after the inscription on a triumphal arch: Sinn and Freyberger, *Grabdenkmäler* [i.e., here F. SINN and K.S. FREYBERGER 1996] II, 63-76 cat. 8 pls. 20-4. The buildings are normally identified as Flavian, though no agreement has been reached as to their identity. **Freyberger and Zitzl** ('*Bautenrelief*' [i.e., here K.S. FREYBERGER, C. ZITZL and C. ERTEL 2016a]) **recently identified the buildings on the relief with the Arcus ad Isis of the Isium Metellinum on the via Labicana, the amphitheatre of Statilius Taurus, an Augustan triumphal arch at the top end of the Scalae Caci in front of the temple of Magna Mater, the monumental entrance to the Augustan Templum Urbis Romae, the temple of Jupiter Stator and the Fornix Fabianus - all buildings erected and/ or restored under Augustus and connected with his victory at Actium. Should these identifications be correct, the authors are probably right to read the relief as an allusion to the founder of the Haterii's patron family, Q. Haterius Agrippa, a friend of Augustus and likely involved in his Actian victory, but through historic buildings that were destroyed in the fire of 64 CE and renovated or replaced under the Flavians [my emphasis]**".

In her **note 229**, Borg writes: See Martin, *Jurists* [i.e., here S.D. MARTIN 1989], 52-62, esp. 59, on Q. Haterius Tychicus as *redemptor operum publicorum*; Kolb, *Bauverwaltung* [i.e., here A. KOLB 1993], esp. [pecially] 130, 316-18; Kolb, *Rom* [i.e., here F. KOLB 1995], 473; Sinn and Freyberger, *Grabdenkmäler* [i.e., here F. SINN and K.S. FREYBERGER 1996] II, 22-6. For another *redemptor* depicting a crane as indication of his profession, see a relief in Capua: *ibid*, 56 with n. 63".

In her **note 230**, she writes: "As noted by the authors in n. 226". - Cf. her **note 226**: "**For a tentative reconstruction [of the tomb of the Haterii], cf. Hesberg, 'Profumo'** [i.e., here H. v. HESBERG 2002], 42-4 figs. 12a-c; for the relief, see Sinn and Freyberger, *Grabdenkmäler* [i.e., here F. SINN and K.S. FREYBERGER 1996] II, 51-59 cat. 6 pls. 11-16 [my emphasis]".

**To two of her notes; cf. Borg (2019, 255, ns. 228 and 230), I should like to add some comments.**

In her **note 228**, Borg mentions the hypotheses, suggested by Freyberger, Zitzl and Ertel (2016a. See also the publication by the same authors, 2016b). I too have discussed the interpretation of these authors of the relief with representations of six buildings in Rome, the 'Bautenrelief' (here **Figs. 89; 90**).

Cf. Häuber (2017, 21, 276-277, 283, 325-337), where I have come to the following results:

1.) Contrary to Freyberger, Zitzl and Ertel (2016a and 2016b), I hope to have shown that all the buildings, visible on the relief here **Figs. 89; 90** were built *anew* in the Flavian period.

2.) I agree with Freyberger, Zitzl and Ertel (2016a and 2016b) that the "ARCUS AD ISIS", the building at the far left of this relief (cf. here **Figs. 89; 90**), stood on the ancient road underneath the modern Via Labicana. But the sanctuary of Isis, to which this arch led, was certainly not the *Isium Metellinum* (as Freyberger, Zitzl and Ertel 2016a and 2016b suggest), which stood on the Caelian, but instead the sanctuary *Isis et Serapis* in *Regio III* on the *Mons Oppius* (for that; cf. *supra*, in Chapter IV.1.1.g)). - For a discussion of Freyberger's, Zitzl's and Ertel's (2016a and 2016b) erroneous hypothesis to locate the *Isium Metellinum* there; cf. Häuber (2017, 337).

3.) The second building from left on the relief here **Fig. 89** is certainly not "the amphitheatre of Statilius Taurus", as Borg writes in her **note 228**, thus referring to the relevant suggestion by Freyberger, Zitzl and Ertel (2016a and 206b), but, as was previously always taken for granted, and likewise confirmed by Giandomenico Spinola (2012, 346, at cat. no. "VI.11 Bassorilievo con raffigurazione di edifici (sepolcro degli Haterii)" = here **Fig. 89**), the Colosseum.

Cf. Häuber (2017, 325-328 [for the Amphitheatre of T. Statilius Taurus and its correct location]; pp. 328-337 [for the identification of the amphitheatre on **Fig. 89** with the Colosseum]; cf. pp. 332-334 [for the discussion of FREYBERGER *et al.* 2016b, 378-379 of Dio Cassius 62.18.2, and the new translation of Suet. *Vesp.* 9.1, suggested by FREYBERGER *et al.* 2016b, 380 with n. 69. See also pp. 723-724, T.P. WISEMAN's comments on this alleged "'doubled accusative'", claimed by FREYBERGER *et al.* 2016b, and with correct translations of Dio Cassius 62.18.2 and of Suet. *Vesp.* 9.1]).

But because on the relief **Fig. 89** the Colosseum is only 3 storeys high, this is a clear indication of the date of this relief - and by implication of the whole tomb of the Haterii, since only Domitian would add a 4th storey to the Colosseum. Hence my suggestion to date the tomb of the Haterii 'between the late Flavian period and 120 AD'; cf. Häuber (2014a, 170 with n. 178). For Domitian's addition of the 4th storey to the Colosseum; cf. the Chronographer of AD 354.

As was already quoted in more detail above (cf. *supra*, at Chapter IV.1.1.g), Werner Eck mentions the buildings at Rome, which this late antique author has attributed to Domitian.

Cf. Eck (2020, 59): "In der wissenschaftlichen Diskussion haben dabei Aussagen des Chronographen von 354 die wesentliche Rolle gespielt. Denn dort wird unter dem Jahr 94 von der kaiserlichen Bautätigkeit unter Domitian folgende lange Liste vorgelegt [with n. 17]:

... *amphitheatrum* [*i.e.*, the *Amphitheatrum Flavium*/ the Colosseum] *usque ad clypea* ...".

In his **note 17**, Eck writes: "*Chronographus anni CCCLIII*, in *Chronica minora saec. IV. V. VI. VII*, hg. TH. MOMMSEN (= *M.G.H. Auctores Antiquissimi* 9), Berlin 1892, 14".

For Domitian's additions to the Colosseum: cf. Rossella Rea ("Amphitheatrum", in: *LTUR* I [1993] 31, with n. 52 = a drawing of here **Fig. 89**).

4.) The relief here **Fig. 89** does not show the monumental entrance to "the Augustan Templum Urbis Romae", as Borg writes in her **note 228**, thus referring to the relevant suggestion by Freyberger, Zitzl and Ertel (2016a and 206b). The authors (erroneously) assume the *Templum Urbis Romae* at the site of the (later) *Templum Pacis*. For a discussion; cf. Häuber (2017, 276-277, 283).

5.) for a detailed discussion of the tomb of the Haterii, and of the various interpretations of its reliefs, which was overlooked by Borg (2019, 255); cf. Häuber (2014a, 153, 167, 170, 181, 228, 274 ns. 218, 219; **Appendix VIII**: pp. 415-417; p. 415 n. 6 [here the important observations concerning the reliefs from the tomb of the Haterii by G. SPINOLA 2012 are mentioned]; p. 480, Figs. 116; 117a; 117b, p. 511; chapter **B 19.**): pp. 634, 642; chapter **B 31.**): p. 783 with n. 1 (bibliography); pp. 784-787, p. 788 with n. 70; pp. 789-791; chapter **B 32.**): pp. 792-796, 798).

In her **note 230**, Borg refers back to her **note 226**. And there she mentions "a tentative reconstruction" of the tomb of the Haterii by Henner von Hesberg (2002).

**To this, I should like to add the following comment :**

**When we consider the new findings related to the reliefs from the tomb of the Haterii, published by Giandomenico Spinola (2012, 345-346, cat. no. "VI.11 Il Sepolcro degli Haterii", and on p. 346, at cat. no. "VI.11 Bassorilievo con raffigurazione di edifici (sepolcro degli Haterii)" = here Fig. 89), von Hesberg's (2002) reconstruction of the tomb proves to be impossible; cf. Häuber (2014a, 170, n. 178, p. 415 with ns. 1, 6).**

**Let's now return to the colossal portrait of Vespasian in Napoli (MAN, with the alleged inv. no. 1889)**

After this Chapter IV. had been written up to this point, I received from Eugenio La Rocca his article ("La testa colossale di Tito nel Museo Nazionale di Napoli: uno scandalo agli albori dell'unità d'Italia", 2020b), which is dedicated to the colossal head of Titus (here Fig. 53).

La Rocca (2020b) confirms his earlier suggestion to identify this head of Titus as that of the cult-statue of *Divus Titus* in the *Templum Gentis Flaviae*. La Rocca (2020b) discusses also the head of Vespasian in the same museum, which is likewise colossal, but of smaller proportions than the head of Titus (here Fig. 53), and was certainly not found near the *Templum Gentis Flaviae*. This is the above-mentioned head at the Museo Archeologico Nazionale (MAN) Napoli with the (alleged) inventory number 1889. As La Rocca (2020b, 371, n. 16: "Bernoulli 1891, p. 23, n. 13 («...im Hof links vom Vestibule, am Boden stehend [1889]»)») found out, in reality this number refers instead to the year ('1889') when this portrait was described by Johann Jacob Bernoulli, who mentioned this fact in his publication of 1891. To La Rocca's (2020b; and *id.* 2023) further findings related to the *Templum Gentis Flaviae*, I will come back below.

**Did Domitian bury in his *Templum Gentis Flaviae*  
also his mother and his sister, Flavia Domitilla *maior* and *minor* ?**

This fact is not explicitly recorded by our literary sources; cf. for those Filippo Coarelli ("Gens Flavia, Templum", in: *LTUR* II [1995] 368-369). Cf. p. 368: "È il *sacrarium* dedicato da Domiziano alla sua *gens* divinizzata, che servì anche da mausoleo: vi furono probabilmente collocate, togliendole dal *mausoleum Augusti*, le ceneri di Vespasiano e di Tito .... e certamente di Iulia, figlia di Tito (*PIR* F 426), che più tardi vennero mescolate con quelle dello stesso Domiziano (Suet. *Dom.* 17) ..."; cf. Coarelli 2009b, 94 with n. 309.

See also Grenier (2009, 238, already quoted *supra*, in Chapter IV.1.1.a): "esso [the *Templum Gentis Flaviae*] era dedicato al culto della *gens Flavia* in quanto tomba dinastica: le ceneri di Vespasiano e di Tito vi erano state deposte (Mart. IX,34,7 e Stat. *Silv.* V,1,240-241) ed esso ospitava quelle di Domiziano che qui furono mischiate a quelle della beneamata Giulia, la figlia di Tito (Suet. *Dom.* 17 e 22)"; Coarelli ("Gens Flavia, Templum", in: *LTUR* II [1995] 368); Eugenio La Rocca (2009, 228 with n. 45); Häuber (2017, 167); Barbora Chabrečková (2017, 40); Maria Paola Del Moro (2021, 185 with n. 2); Eric M. Moormann (2021, 46 with n. 16; *id.* 2023, 59 with n. 17); and many more scholars; cf. *supra*, in Chapter *Preamble*; Section III.; at point 5.). For this prudent and faithful act of his nurse Phyllis, who had educated both Domitian and Iulia Titi (Suet., *Dom.* 17; cf. *Dom.* 22); cf. Häuber (2017, 167); and *infra*, in Chapter *The major results of this book on Domitian*. Iulia Titi was first to be buried in the *Templum Gentis Flaviae*; cf. Filippo Coarelli (2014, 196, quoted *verbatim supra*). My thanks are due to John Bodel for telling me by Email of 15th February 2022 that Iulia Titi, too, was divinized.

For the portrait of *Diva Iulia Titi* in the *Templum Gentis Flaviae*, where she was possibly represented with the (nude) body-type of the 'Venus Medici' or of the 'Venus Capitolina'; cf. Barbara E. Borg (2019, 284-285 with n. 379):

**"The first person buried in it [*i.e.*, in the *Templum Gentis Flaviae*] was Iulia Titi [cf. here Fig. 55.1] (Suetonius, *Dom.* 17) and it is possible that she was honoured there with a portrait *in formam deorum*. A statue of her in the guise of Venus is attested by Martial (*Ep.* 6.13). As Annetta Alexandridis observes, it is the first time that an association with Venus is explicitly related to the woman's beauty and desirability, while under the Julio-Claudians the association with Venus Genetrix and the dynastic aspect were to the fore. Two replicas of a head with Venus coiffure in the style of the Capitoline or the Medici Venus that are likely to portray Iulia suggest that the body type that became the most popular choice for our private matrons [whose funerary monuments- and statues B.E. BORG is studying in her book of 2019] was equally inspired by her model [*i.e.*, that of the cult-statue of *Diva Iulia Titi* in the *Templum Gentis Flaviae*]. [with n. 379; my emphasis]"**.

In her **note 379**, Borg writes: "Alexandridis, *Frauen*, 86, 173 cat. 147-8 pls. 31.3-4 (Copenhagen, Ny Carlsberg Glyptotek 657 (IN 793); Vatican, Musei Vaticani, Braccio Nuovo 71 (formerly 78)). Cf. Mikocki, 'Ritratto', 385 n. 27; D'Ambra, 'Calculus', 222. The only extant portrait potentially of a nude empress as Venus is a statue in Dresden that may represent Lucilla (Fittschen, *Bildnistypen*, 78 no. 1), but has recently been identified as a private individual (Sinn, 'Verwandelte Götter', who establishes that the head belongs to the statue)".

For the two statue-types 'Venus Medici' and 'Venus Capitolina', mentioned by Borg (2019, 284-285); cf. Häuber (2014a, 644-648, Chapter: "B 20.) *The Medici Venus in the Uffizi at Florence and the statue of 'Germanicus' or 'Marcellus' in the Louvre at Paris*").

**Concerning Suetonius's (Dom. 22) reproach that Domitian had caused the death of his beloved niece Iulia Titi, Rose Mary Sheldon (Guarding the Caesars. Roman Internal Security under the Flavian Dynasty, 2023, in press; Chapter VII: "Domitian: Reigning in Rome"; Section: "Domitian as Emperor") writes:**

"Domitian's attitude later in his reign may have gotten worse because of the stress of the job and external events. Certainly, one of the things that may have affected Domitian's state of mind was the death of his niece, Julia, sometime between 87 and 90. [with n. 265] Domitian was absent from Rome for most of the year taking care of the revolts and wars on the frontier. If he received news of Julia's death under these circumstances, he would have certainly been affected. Julia was one of the few people for whom he felt any affection. They had grown up together and in the absence of their respective parents, may have grown close. Although her death may have caused him pain, the lurid story about her death being caused by Domitian forcing her to abort his child is probably a scandalous fabrication - what Jones calls 'standard vituperation'. [with n. 265]".

In her **note 265**, Sheldon writes: "On her death see Suet, *Dom.* 22. The traditional date of her death is assigned to 89 by most scholars. Julia is mentioned in the *vota* of the Arval Brethren for 3 January 87 (*CIL* 6.2065), but she is absent from those of 3 January 90, (*CIL* 6.2067). She appears as *diva* on coins of 90 during Domitian's fifteenth consulship".

In her **note 266**, she writes: "Jones (1992), 39, citing evidence from Martial, calls the abortion story a "farrago of nonsense." Southern (1997), 109 and n. 23. Foubert (2021), 97-100".

For one of Domitian's *aurei*, issued in AD 90 and representing Iulia Titi, which Sheldon (2023, in press) mentions in her above-quoted **note 265**; cf. Barbora Chabrečková (2017, 40, Fig. XII). Before that, in AD 88, Domitian had issued *aurei*, representing his wife Domitia Longina and Iulia Titi, both of them identified as "AVGVSTA", which have been discussed and illustrated by Lien Foubert ("Imperial Women and the Dynamics of Power. Managing the Soft Power of Domitia Longina and Julia Titi", 2021, 98, with Fig.).

Let's now return to Domitian's mother and sister.

Already Eugenio La Rocca (2009, 228) has suggested that we should suppose that, in addition to the already known members of his family, either Domitian's mother or sister, or both of them, were *buried* in the *Templum Gentis Flaviae* as well: "Si deve supporre che ivi fossero anche le urne ... di una o di ambedue le donne con il nome Flavia Domitilla, la moglie († ante 69 d.C.) [with n. 52] e la figlia († ante 69 d.C.) [with n. 53] di Vespasiano, una delle quali divinizzata da Tito più o meno contemporaneamente al padre [with n. 54] ...".

In his **notes 52-54**, La Rocca provides references and further discussion. In his **note 54**, he says that scholars tend to believe that of those two ladies rather Flavia Domitilla *minor* had been divinized.

Dietmar Kienast, Werner Eck and Matthäus Heil (2017, 104), on the other hand, state that it is debated whether Domitian's coins, showing *Diva Domitilla Augusta*, represent the emperor's mother or rather his homonymous sister. Cf. p. 102 (on Vespasian): "Eine Tochter FLAVIA DOMITILLA (s.[iehe] unten)".

Cf. p. 103: "Flavia Domitilla die Ältere Geburtsdatum unbekannt ... ca. 39 Heirat mit Vespasian; vor 1. Juli 69 Gest.[orben]; 80 Memorialprägung mit Carpentum für Domitilla; nach 90? Consecratio als DIVA DOMITILLA AUGUSTA (?)". Cf. p. 104: "... RIC II 124 Nr. 69 ff. RIC II<sup>2</sup> 275 f. Nr. 146 u.[nd] 157. (**DIVA DOMITILLA AUGUSTA. Umstritten ist, ob diese Münzen der D.[omitilla] oder ihrer Tochter gehören**) und RIC II Nr. 153 f. RIC II<sup>2</sup> 214 Nr. 262 f. (Memoriae Domitillae [my emphasis])".

More recently, La Rocca (2014b, 136) has expressed his conviction that Domitian's mother, Flavia Domitilla *maior*, was actually buried in the *Templum Gentis Flaviae*. In his discussion of the tomb next to Mausoleum of Augustus, built for the children of Germanicus, he writes: "In fact, the so-called *ustrinum* of Piazza San Carlo al Corso, often confused with the Strabonian *καύστρον*, has been identified by S. Panciera with a funerary monument annexed to the Mausoleum. It was destined for the children of Germanicus and Agrippina *maior*, who for various reasons did not have the honour of being buried in the great dynastic monument [*i.e.*, the *Mausoleum Augusti*]. **This funerary monument**, perhaps built upon the initiative of Agrippina *minor*, almost certainly between 49 and 59, **hosted for a limited time (and before Domitian built the *templum gentis Flaviae*) his mother's ashes** and those of other relatives of Titus ... [my emphasis]", quoted in more detail and with references in Häuber (2017, 555, Chapter; *THE MAUSOLEUM AUGUSTI* (Figs. 1.9; 3.5 [= here Fig. 58]; 3.7. [= here Fig. 59]; 3.8); Section: *The tomb next to the Mausoleum built for the children of Germanicus* (cf. Figs. 3.5; 3.7; 3.8).

Cf. here Fig. 59, labels: CAMPUS MARTIUS; VIA FLAMINIA/ VIA LATA/ Via del Corso; S. Carlo al Corso; Tomb for the children of Germanicus; MAUSOLEUM AUGUSTI.

Domitian's sister, Flavia Domitilla *minor*, has been identified with a portrait-type that is known from several marble portraits; alternatively, this portrait-type has also been identified with Domitian's and Flavia Domitilla *minor*'s homonymous mother, Flavia Domitilla *maior*. Personally, I side with those scholars who identify these marble portraits in the round with Domitian's sister, because they clearly show a young woman. - But the problem remains that those portraits have been identified on the basis of the above-mentioned coins, of which we ignore, whether they show Domitian's mother or his sister. Since both women had died before Vespasian became emperor, we don't have portrait-types of those ladies dating to Vespasian's reign.

The reasons, why I am suggesting that Domitian could have dedicated cult-statues of Flavia Domitilla *maior* and of Flavia Domitilla *minor* in his *Templum Gentis Flaviae* are:

- a) Only Domitian commissioned the portrait-type discussed here (cf. here Figs. 54; 55), which is identifiable because of coins, issued under his reign, that represent *Diva Domitilla Augusta* (but it is debated, whether those coins show Domitian's mother or his sister); it is likewise debated, whether or not both ladies have been divinized at all (but see below);
- b) because one of the marble replicas of this portrait-type has colossal size (cf. here Fig. 55), I wonder, whether Domitian could have made the, in my opinion very obvious, decision to commemorate also his mother who died prematurely, and sister by not only burying both of them in his *Templum Gentis Flaviae*, but also by dedicating cult-statues of both of them there.

If so, this temple tomb would not only have comprised cult-statues of two *Divi*, Domitian's natural father and brother *Divus Vespasianus* and *Divus Titus* (cf. here Fig. 53), but, in addition to this, also two cult-statues of *Divae*, Domitian's natural mother and sister, Flavia Domitilla *maior* and Flavia Domitilla *minor* (cf. here Figs. 54; 55). - We know also that a third *Diva*, Domitian's niece Iulia Titi, was actually buried in the *Templum Gentis Flaviae* and had a cult-statue there.

I have borrowed from Flavia Coraggio the information concerning Flavia Domitilla *minor* and the portrait-type, which has been identified with her, in my above-mentioned points *a*) and *b*); cf. Flavia Coraggio ("9. Ritratto di Flavia Domitilla Minore su busto moderno, detta Messalina", in: Salvatore Settis and Carlo Gasparri 2020, 152, cat. no. 9 = here **Fig. 54**). In this catalogue-entry, Coraggio writes: "Il ritratto coincide con quello apparso su alcune emissioni monetali di aurei e denari conati durante il principato di Domiziano con legenda *Diva Domitilla Augusta*".

Of this marble portrait at the Museo Torlonia (inv. no. MT 527) the provenance is unknown. Coraggio (2020) mentions also the colossal replica of this portrait-type in the Ny Carlsberg Glyptotek at Copenhagen (cf. here **Fig. 55**). For this colossal portrait, which is broken off a statue; cf. also Vagn Poulsen (1974 II, 44-45, cat. no. 9, *Diva Domitilla*, Pl. XVI-XVII). Poulsen (1974) reported that earlier this portrait had been identified with Domitian's mother, but he himself likewise identified the represented woman with Flavia Domitilla *minor*; also of this portrait the provenance is unknown. As also stressed by Coraggio (2020) in her discussion of this portrait-type in general, the left profile of this marble head of Flavia Domitilla *minor* in Copenhagen (cf. here **Fig. 55**) shows striking similarities with portraits of her brother Domitian.

Seen from the front, the facial traits of the portrait of Flavia Domitilla *minor* (here **Fig. 55**) show, in my opinion, great similarities with those of Iulia Titi, to the effect that Flavia Domitilla *minor* here is almost as pretty as her niece Iulia Titi in one of her portraits (cf. here **Fig. 55.1**). For the portrait of Iulia Titi I am referring to; cf. Filippo Coarelli (2009a, 416, cat. no. 12 "Busto di Giulia di Tito", Roma Museo Nazionale Romano, Palazzo Altemps [inv. no. 8638, ex collection Ludovisi [E. ROSSO]). For the same portrait of Iulia Titi; cf. Diana E.E. Kleiner (1992), 179, Fig. 147 [= here **Fig. 55.1**]. "Portrait of Julia Titi, ca. 80-81. Rome, Museo Nazionale delle Terme. Photo: DAIR 57.618".

As we have seen above, the divinized Iulia Titi was buried in the *Templum Gentis Flaviae* too, and there was also a statue of her in this temple tomb. If my hypothesis is true, the portraits of both ladies, dedicated by Domitian in the *Templum Gentis Flaviae* (of the divinized Iulia Titi and of the likewise divinized? Flavia Domitilla *minor*) could (in theory) have been carved by the *same* artist.

**Fig. 53. Colossal head of *Divus Titus*, marble (the marble has so far not been tested). H 1,52 m. Napoli, Museo Archeologico Nazionale (inv. no. 110892). Found at Rome "in 1873 in via Pastrengo during the excavations for the construction of the Ministry of Finance" (so E. La Rocca 2020b, 379), close to the north-west corner of the Baths of Diocletian. We owe to R. Lanciani (1872-1873, 229), to M.C. Capanna (2008, 177 with n.1), and to E. La Rocca (2009; 2020b) the identification of this portrait of Titus with the cult-statue of *Divus Titus* in the *Templum Gentis Flaviae*. From: E. La Rocca (2020b, Figs. 4-7).**

**Fig. 54. Portrait of Flavia Domitilla *minor* on modern bust, marble. H. 0,75, of the head 0,32 m. Roma, Museo Torlonia (MT 527). Cf. S. Settis and C. Gasparri (2020, 152, cat. no. 9, F. CORAGGIO). Photos: © Fondazione Torlonia.**

**Fig. 55. Colossal portrait of Flavia Domitilla *minor*, marble. H. 0,61 m. Copenhagen, Ny Carlsberg Glyptothek (inv. no. 3186). F.S. Johansen (1995, 40-41 Nr. 9). Photos: Courtesy H.R. Goette.**

**Fig. 55.1. Colossal portrait of Iulia Titi, marble. H. 0,83, of the head 0,47 m. Roma, Museo Nazionale Romano, Palazzo Altemps (inv. no. 8638). Cf. D.E.E. Kleiner (1992, 179, Fig. 147); F. Coarelli (2009a, 416, cat. no. 12 (E. Rosso). Photo: D-DAI 57.618.**

The colossal portrait of Flavia Domitilla *minor* at Copenhagen (here **Fig. 55**) comprises part of the neck, and is only 0,61 m high (the head of *Divus Titus* (here **Fig. 53**) from the *Templum Gentis Flaviae*, likewise comprising part of its neck, is 1,52 m high), which is why this portrait of Flavia Domitilla *minor* certainly did not belong to the here tentatively-assumed cult-statue of *Diva Flavia Domitilla minor* in the *Templum Gentis Flaviae*.
